MODEL NO. ROS20VSK - Features: • Best all-around sanding performance and convenience. • Twist-off translucent dust canister shows dust level and detaches easily. Ant-spillback design prevents dust from spilling on removal. • Bosch Microfilter system traps dust particles as small as 1/2 micron. • Hook-Tight™ hook-and-loop disk attachment ensures firm grip of standard hook-and-loop sanding discs. • Comfortable, ergonomic soft-grip top and body • Integral pad dampening system prevents swirl marks • Soft microcellular backing pad ensures smooth, fine finish on flat or contoured surfaces. • Variable-speed dial allows matching of speed to work piece and task. P/N 12-01766

BOSCH 3-1/4 INCH PLANER

MODEL 3365 - Includes: (2) Woodrazor™ Blades, Guide Fence, Blade Wrench, Chip Bag. **Features:** • Powerful 5 Amp Motor, 18,000 RPM. • Electronically-Counterbalanced Single-Blade System automatically positions blade at ideal cutting angle. • Eliminates uneven planing caused by misaligned blades. • Equipped with Bosch Woodrazor™ micrograin carbide blades, which resist fractures from nail and staple strikes. • Ratcheting Depth Knob. • No need to re-zero the depth. • Chip Ejection Switch. • Edge Guide Fence. • Has a protective shield that covers the section of blade not in use. • Lock-off Release Button. • Park Rest Stand • Double insulated, UL listed, complies to OSHA. P/N 12-01767

BOSCH PROGRAMMABLE HEAT GUN KIT

Model 1944LCDK - Features: • 12.5 Amps, 120-1,100°F. • Cool air setting. • Double insulated, UL listed, complies to OSHA. • Ergonomically-designed controls. • Infinite temperature range and blower speeds. • Integral stand. • LED temperature indicator. • Lightweight. • Multiple uses — Strip paint, shrink tubing or packaging, heat liquids, loosen fittings, soften caulking and surface finishes, thaw pipes. • Range of accessories. • Removable heat shield. 1/4" DRIVE MINI AIR RATCHET WRENCH

| SX1068 Specification | |
|--------------------------------|-----|
| Free Speed (RPM) @90PSI | 230 |
| Torque (ft. lbs.) @90PSI | 25 |
| Square Drive | 1/4 |
| Min. Hose Size | 2/8 |
| Recommended Air Pressure (PSI) | 90 |
| Average Air Consumption (CFM) | 3 |
| Sound Level (dBA) | 87 |
| Length (In.) | 8 |

- * Lever throttle for positive speed control
- * Ball detent socket retainer
- * Rear exhaust
- * Also available: 1/4" head kit

P/N 12-01932

1/2" DRIVE IMPACT WRENCH

| SX634CZ Specification | |
|--------------------------------|--------|
| Square Drive (In.) | 1/2 |
| Max. Torque (ft. lbs @90PSI) | 220 |
| Working Torque (ft. lbs.) | 50-190 |
| Free Speed (RPM@90PSI) | 7,000 |
| Air Inlet (NPT) | 1/4 |
| Recommended Air Pressure (PSI) | 90 |
| Average Air Consumption (CFM) | 4 |
| Sound Level (dBA) | 103 |
| Length (In.) | 7 |

- * Rocket dog clutch mechanism
- * Built-in regulator for positive speed control
- * Balanced design for ease of handling
- * Protective PVC rubber cover
- * The most economical 1/2" Impact wrench

MEDIUM DUTY AIR HAMMER

| SX275B Specification | |
|--------------------------------|--------|
| Blows Per Minute | 3,000 |
| Bore (In.) | 1 1/16 |
| Stroke (In.) | 2-5/8 |
| Air Inlet (NPT) | 1/4 |
| Min. Hose Size (I.D.) | 3/8 |
| Recommended Air Pressure (PSI) | 90 |
| Average Air Consumption (CFM) | 4 |
| Sound Level (dBA) | 105 |
| Length (In.) | 6.75 |

- * Built-in regulator
- * Accepts .401" Parker taper shank chisels
- * An excellent general purpose hammer
- * Quick change retainer spring

P/N 12-01935

SHORT AIR HAMMER

| SX821A Specification | |
|--------------------------------|-------|
| Blows Per Minute | 4,500 |
| Bore (In.) | 1-5/8 |
| Stroke (In.) | 1-5/8 |
| Air Inlet (NPT) | 1/4 |
| Min. Hose Size (I.D.) | 3/8 |
| Recommended Air Pressure (PSI) | 90 |
| Average Air Consumption (CFM) | 4 |
| Sound Level (dBA) | 105 |
| Length (In.) | 5.5 |

- * Built-in regulator
- * Accepts .401" Parker taper shank chisels
- * Ideal for standard duty applications
- * 3 pc. chisel set included
- * Quick change retainer spring

3" UTILITY CUT-OFF TOOL

| SXC209 Specification | |
|-----------------------------|--------|
| Wheel Size (In.) | 3 |
| Length (In.) | 7.6 |
| Maximum Speed (RPM) | 21,000 |
| Air Inlet (In.) | 1/4 |
| Minimum Hose Diameter (In.) | 3/8 |
| Avg. Air Consumption (CFM) | 3 |
| Weight (Lbs.) | 1.8 |

- * Durable comfort grip
- * Twin bearing spindle
- * 360° adjustable rear exhaust directs air away from work
- * Built-in speed regulator
- * Locking throttle lever for safety
- * High-torque motor for maximum efficiency

PN 12-01941

2" ANGLE GRINDER

| SXC606 Specification | |
|-----------------------------|--------|
| Wheel Size (In.) | 2 |
| Length (In.) | 7.4 |
| Maximum Speed (RPM) | 15,000 |
| Air Inlet (In.) | 1/4 |
| Minimum Hose Diameter (In.) | 3/8 |
| Avg. Air Consumption (CFM) | 3 |
| Weight (Lbs.) | 1.6 |

- * Durable comfort grip
- * 90° angle head for restricted areas
- * 360° adjustable rear exhaust directs air away from work
- * Built-in speed regulator
- * Locking throttle lever for safety
- * High-torque motor for maximum efficiency

PN 12-01942

4.5" ANGLE GRINDER

| SXC610 Specification | |
|-----------------------------|--------|
| Wheel Size (In.) | 4.5 |
| Length (In.) | 9.6 |
| Maximum Speed (RPM) | 10,000 |
| Air Inlet (In.) | 1/4 |
| Minimum Hose Diameter (In.) | 3/8 |
| Avg. Air Consumption (CFM) | 5 |
| Weight (Lbs.) | 3.3 |

- * Durable comfort grip
- * 100° angle head for restricted areas
- * 360° adjustable rear exhaust directs air away from work
- * Built-in speed regulator
- * Locking throttle lever for safety
- * High-torque motor for maximum efficiency

AN WRENCHES - DIGITAL THERMOMETERS

SOFTORQ CARBON FIBER AN WRENCHES

SofTorq currently offers the following patented scratch-resistant product: * Designed to meet the torque requirements for fastening your aluminum anodized hydraulic A/N fittings * Made from a special formulation of fiber-glass layered with carbon fiber for strength and durability * Comes in SAE, Metric, and AN sizes * Designed, Assembled, and Made in the U.S.A. * Patented in design Benefits: * Will not severely scratch the specialty coating or damage aluminum

anodized hydraulic A/N fitting like metal AN wrenches would when the tools are used for its intended purposes. * Scratched or damaged fittings lead to the dangers of corrosion and reduced product life * Reduce flight weight when carried on-board aircraft

HANDHELD ANTI-ICING AND DEICING SPRAYERS

Handheld Deicing Sprayers are aircraft-portable pressure sprayers appropriate for defrosting and light deicing operations. They are commercial grade, polyurethane, controlled-pressure sprayers designed to spray hot SAE Type I deicing fluid directly on your aircraft to remove frost, and light snow & ice. They are equipped with a 2 piece brass wand, flat-fan spray pattern, high-capacity, interchangeable nozzle tip that sprays 1.2 gpm of deicing fluid at 20 psi. They will also accept our optional 120-volt, 1100 to 1700 watt electrical immersion heaters to quickly heat the fluid within the sprayer tank to 160

| Description | Dimensions | Part No. | Price |
|---------------|---------------------|----------|-------|
| 1 Gal Sprayer | 7" Dia. x 17" H | 12-21605 | . |
| 2 Gal Sprayer | 8.5" Dia. x 19.5" H | 12-21610 | . |
| 3 Gal Sprayer | 9.5" Dia. x 21" H | 12-00499 | . |

To heat Deicing fluid you need to purchase a heater below.

| Heaters | | | | | |
|---------|-------|------|------------------|----------|-------|
| Voltage | Watts | Amps | Application | Part No. | Price |
| 120 | 1,100 | 9.2 | 12-21605 Sprayer | 12-02087 | . |
| 120 | 1,400 | 11.7 | 12-21610 Sprayer | 12-02088 | . |
| 120 | 1,700 | 14.2 | 12-00499 Sprayer | 12-02089 | . |

DEICING CARTS

Powered Deicing Carts are designed specifically for FBO, Air Charter, Corporate, Cargo, and Flight School operations for all general aviation aircraft. They will quickly and efficiently spray aircraft ground deicing or anti-icing fluid on your aircraft prior to takeoff. These portable, 3-wheeled carts are powered by either a small gasoline engine or a 12-volt electric pump. While both types will spray deicing or anti-icing fluid, they each have different characteristics which make them more appropriate for one type of fluid over the other.

MICROTEMP DIGITAL INFARED THERMOMETERS

Digital, non-contact infrared thermometers are used for hundreds of practical applications and are essential tools for professional automotive and aviation technicians.

Infrared Thermometers (IRTs) are great automotive and race tuning diagnostic tools-and are great for countless diagnostic tasks. Check track surface temperatures, tire temps, brake rotors, header and exhaust temps, air intake temp, heating and A/C vents. Think you have a leaky window? Find the link with a Microtemp IRT.

Applications:

- Engine Block Temperature
- Compressors and Turbochargers
- Any Cylinders Misfiring
- Batteries and Electrical Connections
- Cooling System Diagnostic
- Heating & AC System / Vent Testing
- Engine Diagnostics
- Brake Diagnostics (Rotor Temp)
- Window Defrosters
- Alignment (Test Tire Temp)
- Bearing Temp
- Exhaust and Catalytic Converters
- All Cylinders Running At Same Temp?

| Model | Description | Part No. | Price |
|--------|--|----------|-------|
| MT-002 | Temp Range: -27F - 428F (-33C - 220C); Compact Pocket Size, Metal Case | 12-01656 | . |
| MT-EXP | Temp Range: -58F - 752F (-50C - 400C); Laser Target, Pistol Grip | 12-01657 | . |
| MT-100 | Temp Range: -27°F - 230°F; Distance to Spot Ratio (D:S) 1:1, Accuracy +/-2°F, Response Time: 1 Second, Dimensions: .75" x 3.25", Battery Type 2 LR44 | 12-01994 | . |

WIDE RANGE DUAL PORT DIGITAL THERMOMETER

Jumbo Display with four digit LCD, Dual Channel K type ports T1/T2, Accepts K/J thermocouples, Fast response, Hi/Lo temperature alarm, Temperature hold, Instrument displays in °F/°C/Kelvin- absolute temperature

Features

- Jumbo Display with four digit LCD
- Dual Channel K type ports T1/T2
- Accepts K/J thermocouples
- Fast response
- Hi/Lo temperature alarm
- Temperature hold
- Min./Max./Avg.
- Clock setting
- Relative temperature mode
- Low Battery and Overload indicators
- Auto Power off
- Protective rubber housing
- Instrument displays in °F/°C/Kelvin- absolute temperature

Specifications

- Temp/ range: "K" -148°F to 2372°F, "J" range -148° to 1832°F
- Temperature Accuracy: ± 0.1% + 1°F
- Temperature Resolution: 0.1° up to 99.9° and 1° thereafter
- Sampling rate: 1 second
- Battery Life: 550 hours
- Operating Conditions: 32° to 122°F, 0-80% RH
- Storage Conditions: -4° to 140°F, 0-80% RH
- Weight: 415 grams with batteries
- Dimensions: 164 x 76 x 32mm
- Four AAA 1.5V Batteries

ENGINE TOOLS

VALVE WOBBLE TEST FIXTURE

The Valve Wobble Test Fixture for parallel valve Lycoming engines is used to comply with Lycoming SB-388a. Quality made of aluminum and alloy steel, it is easy to use with no set screws or feeler gauges required. Allows direct reading of wobble from dial indicator. Note: Will work on an angle valve engine.

Fixture without indicator P/N 12-21500
 Fixture with indicator P/N 12-21505

DISTRIBUTOR BLOCK SPRING INSTALLATION TOOL

This tool facilitates the proper installation of contact springs on Bendix magnetos. The O-ring locator ring assures proper location of the tool in the contact tower. Features knurled body grip and ball plunger grip. Made of alloy steel

P/N 12-21510

VALVE SPRING COMPRESSOR

This tool is used to compress valve springs during valve removal and installation. It is ergonomically designed for shop and field use and comes with special pivot pin. Features alloy steel construction with nickel plating.

P/N 12-00202

ELECTRODE SPREADING TOOL

This tool is used to increase the electrode gap on all massive electrode spark plugs. It is constructed from heat treated alloy steel and is nickel plated.

P/N 12-51520

SPARK PLUG SERVICE KIT

Our spark plug service kit includes the Precision Gap gapping tool which is easy to use, features fine thread adjuster and ball pressure tips, and works on all massive electrode plugs. Also includes the 18mm Thread Cleanout Tool with spring loaded jaws which offer maximum thread penetration & control carbon build-up in threads. Completing the Kit is a double-end Gap Plug Gauge which features an aluminum handle and is easy to use. Kit comes complete with durable birchwood storage case.

P/N 12-21525

THROTTLE SHAFT BUTTERFLY SCREW STAKING TOOL

This quality made alloy steel tool facilitates the proper staking of throttle shaft butterfly screws and eliminates the possibility of damaging the carburetor during staking. The tool can easily be operated by one person on the bench without chisels, special fixturing or hammers. All wear components are easily replaceable for long service life.

P/N 12-21528/ea.

BENDIX MAG LOCK

This Bendix Mag Lock works on S4 and S6 and other Bendix Mags. To use simply place a cotter pin loosely into lower plunger hole. Screw sleeve into magneto case. Align red slot in plunger parallel to mag tooth gear. Remove cotter pin to engage gear tooth. Dimension: 2-3/4" x 1/2" x 3/4"

P/N 12-02243

SAFETY MAGNETO LOCK TOOL

This handy tool fits most Bendix magnetos and prevents damage to distributor gear teeth brought about by accidental turning of the engine during magneto installation. Use for E gap or engine timing. Body taper locks into timing window. Polyurethane rubber throughout.

P/N 12-21535

LYCOMING TIMING POINTER

This tool is used to align timing numbers and marks to the crankcase parting line on Lycoming engines. It permits timing from the marks on the aft side of the flywheel. A spring clip holds the tool to the flywheel.

P/N 12-21540

CONTINENTAL O-200 TIMING POINTER

This tool is used to align timing numbers and marks to the crankcase parting line on the Continental O-200 engine. It is held to the propeller flange with magnets, and eliminates the need for all other timing angle devices and TDC indicators. Quality made from delrin and tool steel.

Greatly simplifies the timing of new magnetos

and periodic timing checks. P/N 12-21545

SIDEWINDER SPEED WRENCH

The Sidewinder Speedwrench specialty tool was developed to counter the frustrations of using standard socket wrenches especially in applications where excessive repetitions are required to install or remove long bolts; or where there is not enough resistance involved to allow the ratchet to function; or where there is not enough working space for efficient use of the standard ratchet wrench. The sidewinder can cut work time in half for professional mechanics and aircraft builders. Now being used by major racing teams, the Sidewinder is a revolutionary addition to every tool box.

 3/8"P/N 12-21100
 1/2"P/N 12-21110

ENGINE OVERHAUL STAND

This inexpensive engine overhaul stand is ideal for actual overhaul and for storage of engines. Constructed of heavy duty steel, it features three legs which allow it to sit level on uneven floors and comes complete with an adapter spacer block. The stand is 24" tall with made for user installed casters and comes predrilled for Continental A-65 through O-520 series engines and Lycoming 65 through O-720 engines. A quality engine stand at an affordable price.

P/N 12-21555

ENGINE OVERHAUL STAND KIT

The engine stand kit has all of the components to construct an engine stand. Beginning at the top; the engine stand kit includes (1) The top plate. Designed to bolt down the engine flange to the stand. (2) Three legs that are pre-cut to the proper angle. (3) Three spreader bars to hold the base of the stand from spreading apart. (4) Three feet to stabilize the base and allow installation of casters. The kit is ready to weld. 24" tall when finished..

P/N 12-01364

TWISTER DAMAGED NUT & BOLT REMOVERS

These handy Twister tools work with a socket or wrench and removes nuts regardless of the stud length. No chisels, hammers, drilling, or torches are required. No more busted knuckles! The flush face design allows the remover to grip on the smallest of surfaces, and only 3/4" of working space is required. The same set works on both standard and metric damaged bolts and nuts as well as on collar and flange nuts. Deep Socket. Made from high quality tool steel.

| Part No. | Nut or Bolt Size | Price |
|----------|------------------|-------|
| 12-00152 | 7/16" or 10 mm | . |

TO

TOOLS

LYCOMING BAFFLE SPRING COMPRESSOR

Our top quality Lycoming Baffle Spring Compressor speeds up the removal & installation of cylinder baffle springs. It eliminates the danger of broken or bent cylinder fins caused by use of screwdrivers and punches. This tool is easy to use and features 2 pivot locations for parallel and angle valve cylinders.

P/N 12-30200

VALVE SPRING COMPRESSOR TOOL

This unit will work on Continental 65 thru 0300, and some 0-470's. Lycoming 0320 & 0360, and most any cylinder with a vertical valve constructed head.

It is extremely simple to use. Place Spring Compressor in drill press, and a length of wood in cylinder (to keep valve seated). Depress and remove valve stem clips, and spring. Removes valves in a minute. P/N 12-02072

LYCOMING VALVE SPRING COMPRESSOR

This cast aluminum alloy valve spring compressor fits Lycoming parallel valve and angle valve horizontally opposed engines. An excellent tool at an economical price. P/N 12-21520

LYCOMING TAPPET GAUGE

Similar to Lycoming Gauge ST23, this tappet gauge is Rockwell hardened to 48-52 and precision ground to .028 and .080. This gauge is a must for professional aircraft mechanics. P/N 12-00918

EAR ISLAND REMOVAL TOOL

When substantial quantities of material have to be removed from the exhaust port, it may be necessary to also remove the island around the exhaust stud area. The ear island removal tool and pilot can be used to accomplish this without the use of power tools. P/N 12-17608

ECONOMIZER VALVE SETTING TOOL

The economizer valve adjusting tool is a simple, functional gage that eliminates the hassle of using a depth mic. The tool is precision made to assure required accuracy. P/N 12-17500

DRILL PILOT SLEEVE & BOLT HOLE BULLET

DRILL PILOT SLEEVE - Great for getting drill point centered, for drilling off rivet heads. Eliminates scoring of material and paint. Set of 3 (3/32, 1/8, & 5/32) Used with #40, 30, & 20 Drill Bit P/N 12-02092

BOLT HOLE BULLET - Every tool box should have a set. Simply tap bullet into bolt hole requiring alignment, and tap bullet on through with proper AN Bolt Set of 3 (1/4, 5/16, 3/8 7/16 and 1/2inch) P/N 12-02093

LINK® TOOLS LOCKING SOCKET SETS

7-PC LINK 1/4 & 3/8 INCH PROFESSIONAL UPGRADE AND DELUXE PROFESSIONAL SET

LINK Tools are available as professional upgrade sets for customers that wish to upgrade their tool chests with just a few LINK Tools. Additionally, a variety of sets with sockets and bits are available in convenient mobile cases. Adding a few LINK Tools upgrades your entire tool chest! The revolutionary LINK Tools are forged from solid steel, with a distinctive chrome finish for outstanding durability and strength. LINK Professional Upgrade Sets are available and work with all detent sockets.

Increase the productivity of every tool in your chest! **Comes with:** Locking Ratchet • Locking Unidriver® tool • Locking U-Joint • Locking Palm Wrench • 2" Locking Extendor™ Bar • 3" Locking Extendor™ Bar (1/4" Drive Only) • 6" Locking Extendor™ Bar • 9" Locking Extendor™ Bar ***available in deluxe set with Ratcheting Unidriver**

41-PC. LINK® 3/8" DRIVE SYSTEM SET

The revolutionary 3/8" Drive LINK® System tools are forged from solid steel, with a distinctive chrome finish. The set includes: [1] Universal Joint, [1] Unique UniDriver™ Drive, [1] LINK Automatic-Locking Ratchet, [2] Extendors™ (2 and 6-inch), [2] Spark Plug Sockets (5/8 and 13/16-inch), [9] SAE 6-Point Sockets (5/16, 3/8, 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, and 13/16-inch), [11] Metric 6 Point Sockets (8, 9, 10, 11, 12, 13, 14, 15, 16, 17, and 18-mm), [5] Socket Mounted Hex Bits (3/16, 5/16, and 3/8-inch, and 6 and 10-mm), [5] Socket Mounted Torx or Star Bits (T-25, T-30, T-40, T-45, and T-50), [4] Socket Mounted Screwdriver Bits (5-mm slotted, 9/3" slotted, #1 Phillips and #2 Phillips), and a Case. P/N 12-00807

41-PC. LINK® 1/4" DRIVE SYSTEM SET

LINK® extensions and sockets will not pull apart until you unlock them. A small pull on the locking device lets the socket or extension fall free. The new 1/4" Drive Quick-Lock™ Set comes with 12 pt. sockets in a new custom-fitted carrying case that floats and contains storage space. The set includes the following 6 Link-Lock™ Drive Tools: [1] Universal joint, [1] All-metal UniDriver® [1] 36-tooth Slide Button Quick Release Positive Locking Ratchet, [3] Extendor™ Extensions (1.5, 3, 6-inch); 16 12-point Sockets: [8] SAE (5/32, 3/16, 7/32, 1/4, 9/32, 5/16, 11/32, and 3/8 inch), and [8] Metric (4, 5, 6, 7, 8, 9, 10, 11 mm); 19 dingle piece machined steel socket bits: [6] Torx (T-8, T-10, T-15, T-20, T-25, T-27), [9] Hex (5/32, 3/16, 7/32, and 1/4 inch, 3, 4, 5, 6, and 7mm), [4] Screwdriver (#0 and #1 Phillips, 5.5 and 6.5 mm slotted); and a custom-fitted Case with storage space. P/N 12-02840

LINK® TOOLS PALM WRENCH & SPEEDER

LINK® extensions and sockets will not pull apart until you unlock them. A small pull on the locking device lets the socket or extension fall free. The locking device is similar to those found on air hose co plings, but is a lot easier to lock and unlock. Hand spin, then attach your ratchet to torque down. Not with old fashioned ball bearings, but a space age case-hardened nickel plated steel pin. Or, leave the Palm Wrench on your ratchet and use it as a handy spinner! Exceeds 130% of ANSI standards. P/N 12-00808

2" Palm Wrench/Speeder 3/8-in. Drive P/N 12-00809

LINK® BRACE STYLE SPEEDER 16.5 INCH

Just the accessory for tight places where there's not much room to turn. Hand spin, then attach your ratchet to torque down. Made of aluminum and steel. Highly polished and nickel chrome-plated for durability, rust resistance, and beauty. Exceeds 130% of ANSI standards. 1/4" Drive, 16.5" Speeder #25557. P/N 12-01701

LINK® 1/4" DR. LOCKING ELECTRIC-TOOL ADAPTER

For use with your battery-operated electric drill or screwdriver to always get secure locking and quick speed on your sockets and attachments. One end goes into the chuck of your power tool and the other clicks into a socket, socket-mounted accessory, or other LINK drive tool with the same Quick-Lock technology that gives you Hand-To-Work locking. P/N 12-00933

TO

ENGINE TOOLS

PRECISE-GAP SPARK PLUG GAPPING TOOL

Precise Gap is a simple tool to gap two-, three- or four electrode 18 mm sparkplugs. Only 2" overall - comfortably handheld. Precision made of stainless steel. "T" handle adjusters move the ground electrodes closer to the center electrode until wire feeler identifies proper gap. Adjusters have fine thread with ball tips for precise movement. Don't buy an inferior imitation at a higher price!

P/N 12-11600

.016 NOMINAL GAP PLUG GAUGE

Many customers have indicated that they have had difficulty obtaining setting wires for gaging the plug gap. We now provide a handy tool at reasonable cost. No need to buy extra gauge sizes that you don't need. Furnished with protective end caps.

P/N 12-17100.....

THREAD CLEANOUT TOOL

In servicing spark plugs, a common problem is carbon accumulation in the jug threads. Cleaning these threads regularly can save big money by preventing thread damage and the need to pull the jug and install thread inserts. This specially designed tool works very well to limit this problem. It provides maximum depth penetration and its unique spring action assures that there will be no enlargement of the existing thread pitch diameter.

P/N 12-17200

COMPASS ADJUSTING TOOL

The compass screwdriver is a great little tool that is totally non-magnetic, but also overcomes the shortcomings of solid brass or aluminum tools. This tool has a nice hex aluminum handle and a stainless steel driver insert. No need to worry about damaging the tip on a frozen compensator screw, and you can also remove the cover plate screws with the same tool.

P/N 12-17300

THROTTLE SHAFTBUSHING KNOCKOUT

The throttle shaft bushing removal tool is very competitively priced and will help you avoid a jury-rigged operation that could damage an expensive carburetor body. Now there is no reason not to have one. They are available and affordable.

P/N 12-17400

SPRING TOOL

Get a handle on those springs! The "C" shaped tip fit the bend in spring end and won't slip. Can be used to install and remove springs on anything!

P/N 12-16945

TEMPEST AA473 OIL DRAIN TOOL

Tired of messy oil filter changes? Tempest oil drain tool with a twist of the knob drills a hole in the filter and allows the oil to drain out of the filter into your container. No mess, easy to do and inexpensive.

P/N 12-02248

S4-1 RACE REMOVAL TOOL

A & P mechanics will find this S4 outer bearing race removal tool to be very effective and well priced. Hemispheres held together by the "O" ring are inserted together behind the bearing race. The pilot is then inserted to expand and lock the halves & push out the race. You'll like its simplicity and ease of use.

P/N 12-17601

S4-2 RACE REMOVAL TOOL

The S4 magneto drive end inner race removal tool works in conjunction with a standard bearing puller. The split gripper ring fits behind and around the race and is captured in the puller ring by 2 opposing set screws. A groove on the puller ring provides the point of attachment for the puller arms.

P/N 12-17602.....

S4-3 RACE REMOVAL TOOL

The S4 magneto seal installation, inner and outer race installation tool is three tools in one and is proportioned in such a way that it is easily accommodated by most small bench arbor presses.

P/N 12-17603

TIMING JUMPERS

The timing jumpers are easily used for timing magnetos without removing the breaker box cover. Simply remove the "P" lead and replace with timing jumper. Then hook up timing light leads. These handy devices have proven to be a real time saver and, in some cases, an outright necessity. **SOLD IN PAIRS**

ATS SPARK PLUG GAPPER

Sure-Gap is designed for use on all massive electrode aircraft spark plugs. Saves time and money, eliminates guessing of plug gap, prolongs plug life and ensures peak performance. 18mm. 1lbs shipping weight.

P/N 12-01682.....

ATS SPARK PLUG GAP GAUGE

Convenient Gap Gauge for all Champion and Autolite massive electrode spark plugs. Slider design keep gauge wires stowed away when not in use.

• Retractable slider design

- Includes wires for .015", .019", .018", and .022"
- Works with all Champion and AutoLite Massive Electrode Spark Plugs
- Replacement Wire Gauges are available. 1lbs shipping weight.

P/N 12-01692.....

ATS SPARK PLUG GAPPER & GAUGE 415K

A low-cost efficient gap setting tool for closing gaps on massive-electrode Aviation Spark Plugs. Great design allows it to clamp on to your workbench for easy gapping.

Features

- Manufactured from 4160 Tool Grade Steel
- CNC Machined surfaces for exact alignment
- Includes ATS450 Feeler Gauge
- Clamps to workbench for easy one-handed operation
- Compatible with all Champion, and AutoLite Massive Electrode Spark Plugs
- 2lbs shipping weight. P/N 12-01691

ATS SPARK PLUG THREAD CHASER

Chaser cleans threads in spark plug hole of dirt, carbon build-up, and metal particles. Double ended for both 14mm and 18mm threads. Neoprene band on hex drive holds tool securely in any 13/16" deep-well spark plug socket. 1lbs shipping weight.

P/N 12-01683.....

ATS MAGNETIC SPARK PLUG SOCKET

The new Spark Plug Socket features a thin-walled design to get into the tightest confines. Magnetic interior guarantees that you won't accidentally drop the plug during installation or removal. Works with all Champion and Autolite Aviation Spark Plugs.

- Works with all Champion and Autolite Aviation massive electrode Spark Plugs
- Thin-Walled design to get to the tightly spaced plugs.
- Magnetic interior holds spark plugs and keeps them from falling out
- 7/8" Socket
- 3/8" Drive
- 3-1/2" Overall Length
- Made of Chrome Vanadium Steel
- 1lbs shipping weight.

P/N 12-01693.....

ATS SPARK PLUG CLEANER

Cleans any size plug without changing grommet. Has 2-way valve (blast or air) and comes complete with abrasive powder. Ready to use.

P/N 12-01684.....

AIRCRAFT SPRUCE PLUG MAINTENANCE KIT

The Aircraft Spark Plug Maintenance Kit includes an aircraft spark plug tray, air-powered spark plug cleaner, feeler gauge, spark plug gap setting tool, aircraft spark plug socket, a set of 8 spark plug gaskets and a bottle of spark plug thread lubricant and anti-seize compound.

| Kit Includes: | | |

SPARK PLUG & FILTER TOOLS

CT-415AV GAP SETTING TOOL

A low-cost efficient gap setting tool for closing gaps on massive electrode type aviation spark plugs. May be used as a hand tool, mounted on a bench or held in a vise. Furnished with one adapter for 18mm spark plugs. (P/N GT-204) and one CT-450 gap gauge. Wt. 1-1/2 lbs., 7-1/2" high. P/N 12-00796

CT-450 RETRACTABLE GAP GAUGE

High-impact red plastic case contains four sets of accurate, retractable "go" and "no go" wire gauges: 2 sets .015-.019 (.016 Nom.) 2 sets .018-.022 (.019 Nom.) Length: 3-1/2". Wt. 1-1/4 oz P/N 12-00797.....

CT-457 FINE WIRE GAP SETTING TOOL

Designed exclusively for adjusting fine wire electrode sparkplug gap. Two sizes of slots fit all platinum or iridium electrodes for quick adjustment. Red plastic case. P/N 12-00798

LEAD-MASTER WRENCH SETS

Reduce time to remove and install sparkplug ignition leads. Permit shortarc turning due to 12-point grip head.

CT911 3/4" "T" Handle Box Wrench P/N12-00799.....
 CT912 7/8" "T" Handle Box Wrench P/N12-00801.....
 3/4" & 7/8" Open End Box..... P/N12-00802.....

CT-907 "PLUG-MATE" MAGNETIC SPARK PLUG SOCKET

A companion tool to the "Plug-Master" and other 3/8" square drive wrenches. Built-in magnet holds plugs. Chrome plated. 3-1/2" long, 7/8" deep hex socket. Wt. 8-1/2 oz. P/N 12-00804.....

SCREEN CLEAN SPARK PLUG CLEANER

The new Screen Clean tool works great for field cleaning of spark plugs. It is non-abrasive and can be used for several cleanings. Simple to use—just work the bi-fold edge through the gap with several strokes before setting the gap. Actually removes deposits blasting cannot reach. P/N 12-15610

SPARK PLUG TRAY

This unique spark plug tray is quality made of PVC plastic. Each holding position has 18 mm thread so that plugs screw in for positive holding. This tray permits simultaneous inspection of either the electrode or barrel end of plugs, protects plugs from damage, and can be stored in any position. Optional carrying strap attaches to ends. P/N 12-30185.....

PLUG-A-LONG SPARK PLUG TRAY

Holds 12 spark plugs each hole stamped with cylinder number also marked top and bottom so each plug can be identified easily, no mix-ups. Plugs can be serviced and returned back to where they were removed. a must for aircraft mechanics. Made from 18 gauge steel. Blue powder coat finish. Dimensions: W=4.0", L=8.0", H=2.6. P/N 12-00974

ECONOMY SPARK PLUG GAPPING TOOL

This handy spark plug gapping tool is made from heat treated stainless steel for long life. To adjust the spark plug gap, simply place the tool into plug with ground electrode between the forks, push up on the tool bending the ground electrode closer to the center electrode setting nominal gap of .016". P/N 12-21352

OIL FILTER DRAIN TOOL

This oil filter drain tool permits draining spinon oil filter prior to removal from the engine. Just clamp on to rear of filter with cutter, punch small air bleed at the top of the housing with anice pick, remove cutter and oil will drain freely in-can or hose-extended funnel. P/N 08-04200

MODEL 2500 GAP SETTING TOOL

Complete with accessories, gauges and instructions for use. A precision gap setting tool for all massive electrode sparkplugs. Permits simultaneous adjustment of 2 opposite prongs without removing the spacing gauge. P/N 12-15500

CT-446 SPARK PLUG TRAY

Steel tray holds up to 12 plugs. Speeds handling of used or new plugs. Holes numbered to correspond with engine cylinders. Protects against shielding barrel contamination. Dims: 5"H x 8"L x 3.5"W. Wt. 1 lb.

(12 plug tray) P/N 12-00795.....
 (18 plug tray) P/N 12-00162.....

CT-475AV AVIATION SPARK PLUG TESTER

Designed to clean and test all 14 and 18mm massive and fine-wire electrode aviation sparkplugs. Cleaner uses dry-abrasive air blast which quickly and effectively removes conductive deposits. The new "solid state" ignition test system produces a very stable ignition test voltage for greater accuracy and reliability. Contains a built-in automatic water trap. Size: 11.5"H x 16-3/8"W x 12-1/8"D. Requires 125-180 PSI compressed air and 115V 50/60 Hz AC. Power consumption: 35 W. For use with 230V, a cord is required (special order). P/N 12-00794

230V power supply and power

MODEL 2600A VIBRATOR/CLEANER

Champion now makes it easier than ever to clean heavily lead-fouled spark plugs with this new, improved Vibrator/Cleaner. Each unit is shipped with all accessories required for cleaning fine-wire and 2-prong massive electrode aviation spark plugs. This unit features quick-change cleaning head assemblies, easy and inexpensive replacement of single cutter blades, improved heavy duty top-mounted switch and improved vibrator motor for faster cleaning and maximum durability.

Model 2600A P/N 12-15600

NO. 91893 ABRASIVE COMPOUND

For use in CT-475AV Dry Abrasive Cleaner/Tester. Contains 1 full charge (15oz.). Note: This main item no longer ships with a tip unless it is ordered separately. P/N 91893

TO

SPARK PLUG TOOLS – OIL CAN CUTTERS

ULLMAN UNIVERSAL SPARK PLUG GAP GAUGE

This gap gauge provides easy accurate spark plug adjustment. Features flanged edge for electrode bending and beveled round hole for opening gap. 1-1/2" diameter. Wt.: 0.8 oz. Scaled from .020" to .100". Pewter plating makes the inches more legible for user to read. Also available in metric scale (0.5 mm to 2.4 mm). Gap gauge (inches) P/N 12-21375

CHAMPION CT-482 SPARK PLUG EROSION GAUGE

Champion CT-482 spark plug erosion gauge provides an easy, accurate method of determining whether your plugs have reached their maximum wear limit. Simply recap the used

plug to .016 nominal, then attempt to insert the electrode assembly through the chamfered hole in the gauge, as shown. Penetration of the hole by the electrode assembly indicates the plug has exceeded its recommended wear limits and should be replaced. The CT-482 is calibrated to reject plugs after their electrodes have eroded to at least one-half their original thickness. Although aviation spark plugs will continue to fire past this wear point, the rate of electrode erosion will increase as a result of non-parallel gaps and reduced sparking area. This leads to intermittent misfire, increased ignition system wear, and possibly costly unscheduled maintenance. P/N 12-00791

"GET THE LEAD OUT" SPARK PLUG VIBRATOR CLEANER

Anyone that cleans a lot of spark plugs knows that a spark plug vibrator cleaner is the only way to go to break up and clean out stubborn lead deposits. A spark plug abrasive cleaner is great for the finish cleaning, but it just won't take care of the lead deposits found down around the plug porcelain. Aircraft Spruce now offers an inexpensive way to professionally clean spark plugs. This 115V vibrator cleaner is small, light weight, easy to use. It is great for the pilot or mechanic that wants to carry one along — just in case. 90 day guarantee. P/N 12-21355

Extra Cutter Blades P/N 12-01147 /ea.

SPARK PLUG CLEANER

This economical spark plug cleaner cleans any size spark plug without changing the grommet. Features a 2-way valve and comes complete with abrasive powder and bag.

Cleaning Kit-2.2 lbs. P/N 12-00786
Extra Powder-1.8 lbs. P/N 12-00787

Challenger CP103 Oil Filter Wrench Torque Wrench Adapter 30 MMS P/N 12-01675
Challenger CP102 Oil Filter Wrench Torque Wrench Adapter 1" ST P/N 12-01676

OIL EASY WRENCH

The "Oil Easy Wrench" is specifically designed to remove the oil filter on any aircraft using the Teledyne Continental IO-520 or IO-550 engine. In fact, it is a universal oil filter wrench that works great on any piston engine airplane! Recommended at the Malibu Mirage Owners and Pilots Association (MMOPA) maintenance seminar!!! On IO-520's & IO-550's engines, it's the only wrench that can get between the top of the oil filter and the pressure pump and still provide enough leverage to remove the old (usually stuck) oil filter by hand. And because you are able to remove the old filter without any damage, your inspections of the old filter are more accurate, without any contamination from more extreme filter removal methods. P/N 12-01552

CHAMPION CT-456A INSPECTION LIGHT

The angled bulb socket is kept out of the viewing field of the magnifier providing a large viewing area. With a 2.75 magnification, it provides an extremely long focal length, ideal for viewing into spark plugs or igniter leads. It can also look into drilled or tapped holes on a part making it easy to spot burrs or foreign matter in items such as valves & fittings. P/N 12-00793

ACS OIL CAN CUTTER

This unit has the capacity of both P/N AFC-470 & 12-21395. It also uses the same replacement blade as the 12-21395. Anodized "Red" for corrosion resistance. Base can be clamped in a bench vise if desired. s black anodized. P/N 12-01048

TEMPEST OIL FILTER CAN CUTTER

This universal cutter from Tempest is easy to use and is a great addition to any toolbox. It's made from high quality aircraft aluminum, making it lightweight and very durable. Works on all aircraft spin-on oil filters. Adapter pin easily removed for 'male' filters. P/N 12-01392

Tempest Oil Can Cutter Blades. P/N 12-01393

AIRWOLF AFC-470 OIL CAN CUTTER

Every A&P knows the importance of cutting every single oil filter open after an oil change. The problem up to now was oil filters were difficult to open and the tools to open them were expensive. This is no longer the case with the Airwolf AFC-470 oil filter cutter. The AFC-470 is the easiest and quickest way to determine the current health of your engine. The Airwolf AFC-470 oil filter cutter is constructed out of a solid 6" billet of super strong 6061-T6 aluminum, hard anodized to resist scratches

and wear. Stainless steel rollers allow the oil filter to spin effortlessly during cutting. And finally, our specially designed razor sharp cutter wheel hardened to 60 Rockwell, will make quick work of opening any oil filter. This filter is designed to last a lifetime. Fits new style oil filters. P/N 12-00789

Replacement Cutting Wheel..... P/N 13-03958

HAND CRANK OIL FILTER CUTTING TOOL

This tool was designed to eliminate much of the mess that occurs with small handheld oil filter cutting tools. Very simple to operate, it is excellent for individual aircraft owners as well as FBO's and maintenance shops where a lot of filters need to be cut. Simply clamp in a vise, screw on the filter, turn the cutter into the filter and hand crank to open the filter. The rugged construction enables this tool to operate trouble free for years. P/N 12-00122

Replacement Cutting Wheel..... P/N 12-01685

AVIATION OIL FILTER CUTTER

This aviation oil filter cutter will open any size oil filter canisters for your inspection. To use the tool, place the filter in a vice, attach the tool to the top of the filter, and rotate 4 to 6 turns to open the canister. The cutting wheel will stay sharp for about 50 uses, and is easily replaced when dull. The tool is made from 6061 aluminum with

a purple anodized finish. The tool is ready to use on any oil filter with a male or female thread. Oil filter cutter P/N 12-21395
Replacement cutting wheel P/N 12-21396

TEMPEST AA471 OIL FILTER MEDIA CUTTER

Tempest's new AA471 provides a low cost, efficient and safe tool that every mechanic will want to put in their tool box. Strong guard and non-retractable blade to secure the media and ensure an accurate cut. P/N 12-01854

BB PRODUCTS FC-2000 OIL FILTER CAN CUTTER

Features: • Cuts all Champion and Kelly Aerospace 3.7" Dia. oil filters • Rugged 6061-T6 aluminum construction • Roller bearings provide smooth rolling action • Hardened hardware throughout • No parts or adapters to change • Made in USA - Hundreds sold!
P/N 12-00923-1.....
Replacement Cutter Wheel P/N 12-01689.....

BB PRODUCTS FMC-2000 OIL FILTER MEDIA CUTTER

This patented tool is designed to hold Champion Aerospace brand Aviation oil filter spools, and to allow cutting the paper filter media at each end of the spool without holding the filter spool by hand. Using this tool reduces the risk of cutting one's hands while cutting the filter media as well as reducing the time necessary to accomplish this task. The filter media is rotated in a special holder that is supported by roller bearings. A knife, with a retractable safety cover is brought into position to make a clean cut of the filter media at each end. The filter media can then be removed for inspection. Patented.
P/N 12-00925-1.....

BB PRODUCTS FH 2000 OIL FILTER HOLDER

The FH-2000 oil filter holder is designed to hold all Champion, Kelly Aerospace and Tempest Oil Filters for cutting.
P/N 12-00924-1.....

TOMS OIL FILTER CUTTING TOOL

Tom's oil filter cutting tool will allow you to inspect your filters in an efficient manner. Most filter cutters work like a pipe or tubing cutter in that you have to go around and around the filter, adjusting cutter depth with each pass. Although you could do that with this tool, the real beauty of this new product is that the cut can be easily made in one pass. The task of inspecting filters can be a bit messy but it is also quick and easy to do and should be part of

your regular maintenance program.

The tool, as supplied, is wet up for Lycoming oil filters that have a threaded insert sticking out of the out of the end of the filter. This should cover almost all Lycoming engines, however, some of them and almost all Continental engines do not have this insert. A "center bolt" supplied with the tool can be used in these cases. To use the tool on smaller filters, such as Rotax filters, remove the cutter handle and reposition the pivot bolt to the inner hold on the base handle. The "center bolt" may have to be used on these filters as well. This tool will also work on a number of automotive filters.
P/N 12-01697.....

MODEL 7000 OIL FILTER CUTTER

• Accepts both male & female styles of aircraft oil filters, and many automotive sizes. • Ball bearing rollers make it easy to turn the filter • Effective design helps insure a straight cut (the filter does not try to spiral off the cutter) • Heavy duty construction (designed for daily commercial use) • Aircraft quality aluminum construction • Replaceable hardened steel cutter wheel • Contoured knob is easy to turn, even with oily hands • Accepts oil filters 3 1/8" to 4" in diameter, which includes most aircraft oil filters such as Champion: CH48103, CH48104, CH48108, CH48109, CH48110 AND CH48111 • The cutter may be completely disassembled, and all parts are replaceable. P/N 13-03145.....
Replacement cutter Wheel P/N 13-05737.....

MODEL 7100 OIL FILTER KNOB

• Slips onto the hex of an aircraft oil filter • Large diameter knob for a strong grip even with oily hands. • Allows many filters to be installed and removed without using a wrench. • Works in tight spaces, you do not have to swing a wrench • Knob will accept a 3/8" drive ratchet handle to help remove very tight filters (ratchet handle not included) • Stainless steel core durability (your ratchet goes into stainless steel, not plastic). • Use a torque wrench to accurately tighten a new filter to the proper torque. • Handle can be used as a base to support the filter, holding it upright so the oil does not spill out. • Color: bright yellow. P/N 13-03146.....

MODEL 7300 OIL DRAINER

Make your oil changes less messy. Drain your oil lines and filter before removing the filter. Works with most Lycoming engines and remote filter installations, and some Continentals. When you drain the oil from the engine, you are only emptying the oil sump. Generally quite a bit of oil remains in the filter and oil lines (if you have a remote mounted filter). A remote mounted filter installation can easily hold a quart of oil in the filter and lines after the engine is drained. This oil will come pouring out when the filter is removed, making a mess in the engine compartment. Cleaning up this mess often takes longer than the actual oil change. The Oil Drainer clamps over the center of the oil filter. A hardened steel rod pierces the filter can and allows the oil to be neatly drained into your catch bucket. After the oil is drained, you can remove the filter with much less mess.
P/N 13-03147.....

OIL FILTER WRENCH

The 1" hexes of the wrench easily fit Champion oil filters. The hexes are rotated 15 degrees from each other so by turning the wrench over or flipping it end-for-end you can easily find an orientation that allows you to get on the filter, even the tightest engine compartment. It's 6 inch overall length allows you to turn it tight locations, and the shorter length helps prevent over-tightening the filter during installation.
P/N 12-01638.....

SPECIALTY TOOLS

ULLMAN MAGNETIC PICK-UP TOOLS

These Ullman pick-up tools with Powercap offer a unique combination of features which make them ideal for work around aircraft. The stainless steel telescoping handle is strong, long, and lightweight, and the comfortable, textured cushion grip keeps handle secure even in wet or oily hands. The head features a compact industrial strength magnet for retrieving heavy objects in tight places. The powercap shields magnet side so that the head can be easily guided past ferrous metal objects. Available in 3 convenient sizes.

- HT-1** lifts 1-1/2 lbs, over 2 lbs with POWERCAP™ telescopes from 6-5/8" to 33-1/4" P/N 12-21385.....
- HT-2** lifts 3-1/2 lbs, over 5 lbs with POWERCAP™ telescopes from 6-5/8" to 33-1/4" P/N 12-21386.....
- HT-3** lifts 5 lbs, 10 lbs with POWERCAP™ telescopes from 6-3/4" to 30-1/4" P/N 12-21387.....

CHP4-L HOOK & PICK SET - has picks that are 9.75" long with textured cushion grips. These longer picks are ideal for working in hard to reach awkward areas. P/N 12-00716.....

MSR-3 MEGAMAG SOCKET RACK - has a strong magnet on the front of the racks that keeps 1/4", 3/8" & 1/2" drive sockets together, organized and ready to use. The magnetic force on the back holds the rack loaded with sockets to most flat metal surfaces. P/N 12-00717.....

GMC-2 DUAL PURPOSE TOOL - contains a MegaMag Pickup Tool that lifts 16 lbs. and a 2.25" Inspection Mirror with a metal base that mounts in seconds and brings hidden areas into full view. P/N 12-00718.....

STEELMAX MAG-IT MAGNETIC PICK-UP TOOL

Safely remove metal chips and debris from machinery and work areas using SteelMax Mag-It® magnetic pick-up tool. The Mag-it® slide action lever quickly demagnetizes the tool, which releases chips for disposal. 10 inch Pick-Up.....P/N 12-01714.....

15 inch Pick-up.....P/N 12-01715.....

EXHAUST PORT RESURFACING TOOL

The exhaust port resurfacing tool is designed to recondition port surfaces where no more than .010" of material need to be removed. It is easily bracketed and aligned to the port in reference to the rocker cover surface. Execution of the cutting operation only requires hand power. No air or electrical power is required. Mounting bracket adapters are available for the following engines: A&C series continentals, Lycoming Parallel Valve, Lycoming Angle Valve, others on request.....P/N 12-17605.....

A & C Series Continental Bracket.....P/N 12-17609.....

Lycoming Parallel Valve Bracket.....P/N 12-17610.....

Lycoming Angle Valve Bracket.....P/N 12-17611.....

Cutter Head Inserts.....P/N 12-17607.....

EAR ISLAND REMOVAL TOOL - When substantial quantities of material have to be removed from the exhaust port, it may be necessary to also remove the island around the exhaust stud area. The ear island removal tool and pilot can be used to accomplish this without the use of power tools.....P/N 12-17608.....

DELUXE HEAT GUN

This handy tool gives you a fast, drum-tight, mirror smooth finish. It's ideal for heat-shrinkable covering films. Get a professional finish with less time and effort. 1-yr warranty. Features: •Includes removable wide nozzle •1000W heating power •Heavy-duty fan motor •Textured, composite hand-grip •3-position, hot/cool/off switch •Adjustable air intake baffle •Wt: 15 oz •5.5' AC power cord w/2-prong plug. P/N 12-00527.....

THE CORE RECESSOR

The core recessor is a new product with the purpose of serving as an efficient tool that makes the process of removing core cells in Nordam Panels and composite fiberglass more efficiently. Thus, it reduces time for edge fillers, which are necessary procedures to customize aircraft cabinets, floorboard, vanity's headliners, valance panels, etc. Is light weight, easy and safe to use. Core panels from 1/8 to 3/4 inch with no adjusting. Requires no electricity. Core Recessor.....P/N 12-02270.....

Core Recessor Mini.....P/N 12-02271.....

HANDY MAG RETRIEVAL TOOL

The Handy Mag is the size of a pen and can be carried in a shirt pocket. It telescopes out to an extended length of 32" and the magnet on the tip can pick up objects over 2 lbs. Excellent for retrieving dropped tools or parts in engine compartments or other unreachable areas. Tough stainless steel body. P/N 12-14550...../ea

AMAZING ROD SAW

Tiny particles of tungsten carbide, one of the toughest and hardest substances in the world, have been bonded to a steel rod to produce the Rod Saw. Fits standard 12" hacksaw frame. Use when regular hacksaw will not work. Lets you cut steel, rock. Not recommended for soft materials. P/N 12-01180.....

EXHAUST DESICCATOR PLUGS FOR EXHAUST STACKS

Quality made polyurethane rubber plug won't wear out and provides a positive seal in the exhaust pipe. Desiccator housing contains interchangeable desiccator canisters. Desiccant never needs to be removed from canister for drying. Removal flag and cap attach to external end of plug when in use. During storage, flag cap fits on desiccator chamber. Limits internal engine damage caused by corrosion. Fits 2" dia. exhaust pipes. Other sizes available as a special order. Minimum special order 5 pieces. P/N 12-30212..... ea.

HIGH CAPACITY EXHAUST DESICCATOR

2.5 times the desiccant capacity of previous design. One piece construction allows the desiccant to be contained in the core of the plug. Made of durable high quality urethane rubber that will last almost indefinitely. P/N 12-01057...../ea

GOLDENROD DEHUMIDIFIER

This compact, low-voltage dehumidifier is an ideal way to eliminate dampness and mildew in aircraft which can cause mildew growth in carpet and upholstery and wreak havoc with electrical systems. In stall under the instrument panel or on the deck between seats. If installed in the engine compartment, Goldenrod will eliminate moisture which leads to rust, keep ignition wiring dry, and facilitate cold weather starts. In the hangar, Goldenrod can protect parts, tools, supplies, and components. Operates on standard 110V current 24 hours per day but uses four times less power than a standard light bulb. Safe and effective. Available in four lengths.

| Part No. | Length | Watts | Approx. Coverage Up To | Price Ea. |
|----------|--------|-------|------------------------|-----------|

EVA-DRY DEHUMIDIFIER

This is a product that is the answer to a very common problem in Aircraft, HUMIDITY!!! The Eva-dry is a 100% renewable, wireless, mini dehumidifier that requires no power to operate. It works with a Silica gel that absorbs moisture from where ever it is placed. There is an indicator window on the front of the unit that will change from blue to pink as the units absorbs moisture. Once the crystals have turned pink it is time to renew. To renew, simply fold down the hidden plug on the back of the unit and plug it in to any a/c outlet for 8-10 hours. A heating element will be activated which will evaporate the moisture. The Eva-dry has a 10 year life span and has a 5 year mfr. Warranty. Size: 6.25" X 4.75" X 1.25". P/N 12-01621.....

SCROOGE CLAMP

By attaching this mechanism to any brace, piece of wood or steel, it can be made adjustable simply by turning the handle. It works like a C-Clamp that will push or pull. It can be used in place of a bar or pipe clamp, and can be made any length by using a 2x2 or 2x4 piece of lumber. Using it, any object or aircraft part can be moved into its exact required position, within a 1/64 of an inch, simply by turning the handle. It is a large turnbuckle with attachment plates at either end. It can be used to plumb walls, square up framing, pull together studs and joist (or push them apart) and straighten warped structural members for fixing in place. It can exert up to 2000 lbs of force with 80 lbs of force on the turnbuckle handle. In most common use, one plate is screwed to a 2x4 and the other to a stud wall or post. The free end of the 2x4 is then nailed or screwed to a joist deck, floor, etc. Maximum travel is 7-3/4". P/N 12-00636.....

TOOLS

WING STAND

This wing stand is ideal for aircraft homebuilders or restorers needing to safely store and protect aircraft wings during the project. It accommodates virtually all shapes and sizes of wings and is available at a very economical price. We ship this wing stand direct to you from the factory (freight collect). Dims: 72"l x 44"h x 36"w. Assembly req. Each stand holds 2 wings.

AEROROLLER-1000

AeroRoller makes movement of your aircraft or wheeled equipment easy. Aircraft can be loaded on AeroRoller without jack and minimum effort is required to move aircraft when on rollers. AeroRoller is constructed of Industrial 1/4" steel plate. Heavy duty Duraform 360° swivel castor wheels means no flat spots. Brake castor lock parking location. Each unit can carry 1000 lbs.

Manufacturer's warranty covers defective parts & labor.

TENNSMITH BRAKES & SHEARS

HAND BRAKE & STAND - Versatile, economical hand brake designed for straight forming of mild steel in thicknesses of 22 gauge & lighter. Made in the U.S.A by Tennsmith. Bends material up to 48" wide. Wts: brake: 280 lbs. Optional stand: 95 lbs. Ideal for bending materials used in light aircraft construction. Shipped direct to you from factory in Tennessee.

Model S48-22 hand brake.....P/N 12-20700
Optional Stand.....P/N 12-20705

UNIVERSAL HAND BRAKE & STAND - Tennsmith's heavy duty universal hand brake is a great tool for a wide range of sheet metal binding and forming operations in 12 gauge and lighter mild steel. The brake is ideal for both box and pan and straight bending in hold and cold rolled plate, stainless steel, aluminum, and heavy plastic. Welded steel plate construction for strength and rigidity. Bends material up to 48" wide Wts: brake:

1330 lbs. Optional stand: 95 lbs. Shipped truck collect direct to you from factory in Tennessee.

LAP JOINT JOGGLE TOOL

FOR UP TO .032 ALUMINUM SHEET - To use the Lap Joint Joggle Tool, install washers to adjust joggle set-back from edge of sheet. Start at one end of sheet and pull smoothly along edge to be joggled. Keep back plate of tool firmly and squarely against edge of sheet for smooth and parallel joggle. To break a sheet edge, insert sheet just one bearing depth (.4") then bend down as desired as tool is pulled along edge. Adjustments - For set-back, add or subtract washers. For different material thickness, loosen bolts, spread or close. For use on aluminum sheet up to .032 thickness.
P/N 12-30275

NON-CONTAMINATING SCRAPER

Our Non-Contamination Scraper is suitable for all airframe scraping operations. It will not contaminate delicate aluminum parts with steel particles which can induce corrosion. It is easily resharpened with a mill file and the .060" thick heat treated aluminum blade is easily replaceable. Features positive wood grip handle. P/N 12-30205

SEAT TRACK CLEANER

Maintaining adjustable cockpit seats, or passenger seating secured in notched tracks, requires removing the dirt and grit that have become embedded in the tracks. Rex-Cut Products has developed a thin-profile mounted wheel specially designed to accomplish this job efficiently and safely. The seat track cleaners are manufactured using layers of reinforced nonwoven cotton fiber and abrasive grain which are bonded into discs. When mounted on a die grinder they are able to fit inside the seat tracks. Designed for cleaning all the interior surfaces of the track without having to change discs, one disc will remove caked on sludge, dirt and grit while removing minor burrs and rough edges. The seat track cleaners are non-loading on aluminum and leave superior surface finishes. Available in 54 and 80 grits in aluminum oxide grain mounted on a 1/4 x 1/2" shank.
54 Grit Seat Track Cleaner.....PN 12-00955
80 Grit Seat Track Cleaner.....PN 12-00952

THE TOOL GRIP - TOOL AND CRAFT HOLDER

The Craft Grip is designed to hold tools or other items in the same manner as the Pen Grip. It differs only in the method of attachment. The attachment device is a u-shaped clip that fits over the edge of many surfaces and holds the organizer in place. These cups snap firmly onto the gripping unit. Its most popular uses are car and truck visors, tool boxes, painting easels and many other locations without harming or being permanently attached to the surface Available in Black or White.

Get a Grip Tool Grip (Black).....PN 12-00953
Get a Grip Tool Grip (White).....PN 12-00954

THE PEN GRIP - PEN AND TOOL HOLDER

The Pen Grip attaches to almost any surface with double stick tape. Just peel off the backing on the attached double stick adhesive, press firmly onto the surface to which you want it attached and insert your tools. The unique gripping fingers hold all sorts of pens, pencils, & tools in many different positions, even upside down. Like the Tool Grip, The Pen Grip is available in White and Black.

NOTCHERS

ACCU-JIGGER TUBING NOTCHERS

Constructed of 6061T6 hard anodized aluminum extrusions, steel, and cast iron with two 2750 lb. rated roller needle bearings, the Accu-Jigger rigidly holds the holesaw and tube to produce accurate, chatterless cuts. Accu-Jigger, with Single Point Technology, is able to notch tubes that "Fit Right The First Time" as fast as those produced from custom tooling. It employs a flip up Tube End Stop, (2) 1° step, pin settable Angle Indexes and standard bimetal holesaws to accurately notch the ends of tubes used in aircraft fuselages and engine mounts. Notches tubes up to 1" diameter with up to 2" holesaw at angles from 30 to 90°. Spin Angle settable 0 to 359°. Meant to be driven by 1/2 inch chuck hand drill or mounted to a drill press.

1" diameter capacity.....P/N 12-00377
2" diameter capacity.....P/N 12-00529

MAGNETIC BIT CADDY

A non-spill bit holder at your fingertips. 36 individual 1/4" and 5/16" screwdriver bits may be stored in this magnetic-based organizer. Remains solid at any angle placement while holding bits in their respective slots.P/N 12-01083

THE SPINNING RATCHET

This tool is a combination tool providing a ratchet wrench for power and a spinning action for speed. All types of accessories can be used with this wrench, such as extensions on either end, or flexible drives. The drive handle can be removed to make a very compact tool for restricted areas. The ratchet pawl is made from annealed steel to allow it to fail before the ratchet gear as it is a low cost item. The spinning gears are protected by a shear pin that will fail before the bevel gears, again a low cost item replacement, rather replace one or both of the bevel gears if they become over loaded. The pawl is pointed on one to distinguish the on or off motion. 3/8" driveP/N 12-00742

PNEUMATIC HIGH SPEED DRILL

This heavy duty pneumatic drill will give years of consistent service. Due to speed and design this drill is excellent for deburring or grinding when used with mounted wheels or points. When used with a mounted wire brush it functions as an excellent scaler. As a drill it is adaptable to wood, plastic, rubber, aluminum, brass and sheet metal where contact is brief. Drilling capacity: Steel - 1/8", plastic -3/16", wood - 1/4". Specifications: 13,000-17,000 RPM @ 80-150 PSI. 4-vane motor. Air supply: 4 CFM @ 80 PSI. Wt. 2 lbs.

5 oz. 1/4" chuck. Model 10.....P/N 12-01659

THE 3RD HAND WELDING CLAMP

A simple yet rugged tool, The 3rd Hand was designed to hold round or square tubing in place during the welding process. Originally used for aircraft engine mount and airframe fabrication work, it has many other applications. This steel fixture is infinitely adjustable due to its full swiveling clamp. Each model comes with 3 different length arms (3.5", 5.25" & 7.5") Hose clamps are not provided.

Model 01 (for tube size 3/8" - 2.5").....P/N 12-00736
Model 02 (for tube size 3/4" - 4").....P/N 12-00737
Model 03 (for flat sheets or plates)P/N 12-00747

MAGNETIZER / DEMAGNETIZER

This versatile tool saves you time and trouble by instantly magnetizing or demagnetizing you tools & parts on the job. Reliable, powerful permanent magnets for a super long life, and its compact size, shatterproof plastic shell, this tool will fit easily in your tool box. This tool allows easy, precise handling of small steel parts in confined spaces, collects metal items from inaccessible places, leaves 1 hand free for positioning the work piece, demagnetizes instruments & electronics components. Size: 2.1"x2"x1.1". Wt. .22 lb.P/N 12-16835

OL' JOINT JIGGER

OL' JOINT JIGGER MODEL RTN-100 TUBING NOTCHER - Ol' Joint JiggerTM quickly notches tubing of up to 2" O.D. in less than 30 seconds. Great for assembling and welding tubing in your garage or workshop. Adjusts in single degree increments to make up to 60° angle notches. Automatic round tubing centering and alignment. CNC machined steel construction. Bi-metal hole saws not included. Use with your 1/2" hand drill. U.S.A. Ship Wt. 9 lbs. P/N 12-01107

RTN-BASE (UNIVERSAL DRILL PRESS MOUNT) - For use with RTN100 only. Allows for set up and dedication of a small drill press for tube notching. Adjustable for out-of-square tables, the RTN-Base also makes it easy to lay the notcher over horizontally, still bolted to the table, to handle long or cumbersome tubing that can't be notched in a vertical position. Minimum requirements: 1/3HP drill press with 3-1/2" to 4" of travel and 14" from the table or base to the chuck. (Bolts for attachment included) U.S.A. Ship Wt. 3 lbs. P/N 12-00691

OL' JOINT JIGGER MODEL RTN-1000 DELUXE ALUMINUM TUBING NOTCHER - Ol' Joint JiggerTM combines precision performance, versatility and comfort for quickly notching tubing of up to 2" O.D. in less than 30 seconds. Enhanced vibration-reducing design and dual-axis base allow for either work bench or drill press mounting to provide the professional or hobbyist with the ultimate in tubing notchers. Laser-engraved protractor allows adjustments in single degree increments to make up to 60° angle notches. Automatic tube centering and alignment. Anodized aircraft-grade aluminum construction. Bi-metal hole saws not included. Use with your 1/2" hand drill or drill press. U.S.A. Ship Wt. 9 lbs. P/N 12-01108

PIPEMASTER WELDER'S TOOL FOR CONTOUR FITS

Pipemaster gives aircraft builders the ability to cut a piece of tubing on both ends and have it fit its intended location on the first try. Tedious hours of grinding and misfit joints can be eliminated producing exact welds and stronger airframes. Features spring temper stainless steel pins, aluminum inner shell, and rugged ABS housing. Simply slip over the pipe, push down, transfer and cut, and the tubing is ready to weld. Pipemaster transfers the exact outline of the pipe joint in just seconds. Use for penetration cuts as well.

NOTCHERS - SURFACE TREATMENT KITS

JMR NOTCHERS

Made in the U.S.A! • Highest quality, most versatile notcher on the market • Capacity greater than notchers costing 10-20x more! • Notches faster and better than any end mill/belt notcher • Manufactured from bar stock not plate, to increase strength 1.125" induction hardened shaft supported by Timken™ bearings • Custom designed shaft seals prevent bearing/shaft damage •

Replacable hole saw mounting threads • Timken™ thrust bearing increases clamping force (at pivot) while reducing wrench pressure, making angle changes easy • Capable of notching in a 210° arc • 2.5" tube, 2" pipe capacity • Double v-clamp vise allows square to be held flat or corner to corner • Will hold thin wall tube without distortion • May be clamped on tube/pipe to bore holes • Great hole saw life of any notcher (Average 200+ cuts)* • Multiple mounting positions • Designed for prototype and production work • Engraved degrees and stainless steel pointer ensures accuracy • Aluminum bronze acme threaded bushing on clamp. P/N 12-01389

JMR DIMPLE DIES

Made in the U.S.A! • Made from heat treated 4142 steel • Will dimple .125" 4130 • All corners radiused • Set of 7 includes fi, fl, 1, 1/4, 1 fi, 1 fl, 2". P/N 12-01390

JMR MANUAL BENDER

Capacity greater than benders costing 10-20x as much!! • Dies available in 120 and 240 • Will bend .250 wall 4130 Tube • Dies are all billet • Follower blocks case hardened .050 min. • Lifetime guarantee against breakage on dies • All pins made from heat treated 4140 • Aluminum bronze bushings at pivot points • Light weight and portable - 110 volt • Built for industrial use, yet affordable enough for everyone! P/N 12-01388.....

MBX KITS AND ACCESSORIES

MONTI MBX Surface Treatment Systems

PATENTED TECHNOLOGY - MBX Systems are different from conventional surface treatment systems in that MBX Systems are based on several physical principles. Flexible brush-belts are inserted loosely into a cage-like adaptor system and secured with safety arms. The centrifugal force created by rotation causes the brush-belt to tighten and work as if suspended on a cushion of air. Advantages: Vibration-free operation: The vibration of the wire bristles that occurs when the bristles strike the target surface is absorbed by the air-cushion. The bristles re-strike the target surface at rest (without vibration). This achieves the maximum kinetic energy.

MBX BRUSH-BELT TECHNOLOGY - MBX Belts consist of individual, U-shaped crimped wire bundles anchored in a polyamide fabric. Made of spring steel, the wires have hardened tips that strike the target surface individually during rotation.

ADVANTAGES - High safety level: The U-shaped anchor points of the individual crimped bundles prevent wire bristles from being thrown clear. No heat development: Avoid toxic fumes and no smearing during the removal of sticky materials. No grinding: No removal of healthy material, no deformations. Flexibility: High degree of adaptability when working on contoured areas or areas with sharp edges. Optimal performance: Because of their design, each wire tip strikes the target surface twice per rotation. Long service life: Specially hardened wire tips with a hardness up to 68 HRC (Rockwell hardness) provide for a level of hardness never before achieved with conventional brush technology.

MBX PNEUMATIC DRIVE UNIT - Easy handling, lightweight - 1.1 kilograms, high torque, safe to use! Specially developed for the MBX brush-belt and MBX Vinyl Zapper systems. The high output rpm of the compressed-air turbine (21,000 rpm) is reduced to 3,500 rpm by means of a planetary gear and toothed belt; torque increases. This gives our MBX pneumatic drive units an optimised power profile. MBX brush-belts and MBX eraser wheels work as a direct extension to the drive shaft, i.e., there is no lateral centre of gravity and MBX drive units operate in-line. Work in hard-to-reach areas or in the removal of tough, thick, sticky materials (e.g. compounding materials, underbody corrosion) with optimal ventilation.

MBX PNEUMATIC STARTER SET

For the removal of seam sealant, corrosion, paint, vinyl decals, glue on aluminum and alloy. **SET 1** -- MP-3500 - MBX Pneumatic Power Tool S (3500 rpm) with adapter system for 23mm belts/31mm rubber eraser. • AA-0011 - Adapter for 11mm wire belts • BS M11X - V2A Wire Belt, Med., 11mm angled tips • BS-F11 - V2A Brush Belt, Fine, 11mm • RE-0023 - Rubber Eraser, 31mm P/N 12-01394

MBX ELECTRIC STARTER SET

For the removal of seam sealant, corrosion, paint, vinyl decals, glue on aluminum and alloy.

ME-3200 - MBX ELECTRIC POWER - Tool A (3200 rpm) with adapter system for 23mm belts/31mm rubber eraser • AA-0011 - Adapter for 11mm wire belts • BS-M11X - V2A Wire Belt, Med., 11mm angled tips • BS-F11 - V2A Brush Belt, Fine, 11mm • RE-0023 - Rubber Eraser, 31mm P/N 12-01396

MBX BRUSH BELTS

Medium (11 or 23 mm) For the removal of seam sealant & corrosion on aluminum bodies

Fine (11 or 23 mm) For the removal of paint on aluminum bodies.

MBX Belts are made of a high-performance polyamide fabric - tension resistant up to 440 kilograms. Individual bristles made of spring steel or stainless steel are anchored U-shaped in the flexible polyamide fabric. The materials used for the production of MBX Belts offer top safety and durability due to the high flexibility of the MBX Belts. No clogging - no heat built-up - no grinding. The high masses due to centrifugal force during rotation are absorbed safely by MBX Adapter Systems. MBX Medium have angled tips to create a sandblast effect. 11mm is for especially hard-to-reach-areas such as a 90° angles.

BS-M11X Med. Blue 11mm Brush P/N 12-01402

BS-M23X Med. Blue 23mm Brush P/N 12-01403

BS-F11 Fine Blue 11mm Brush P/N 12-01404

BS-F23 Fine Blue 23mm Brush P/N 12-01405

MBX VINYL ZAPPER

"The rotating toothed eraser wheel", patented For the removal of self-adhesive foils and materials, wide-area decoration, adhesive residue on decorative strips and lettering on OEM-painted surfaces made of metal, aluminium, glass, fibreglass (gel coats) - and most amazing: NO PAINT DAMAGE. The centrifugal force created by rotation makes the MBX Vinyl Zapper work as if suspended on a cushion of air. Advantages: Faster working speeds of up to 3,500 rpm Conventional rubber eraser wheels operate only at circa 1,500 rpm. No paint damage, no smearing despite speeds of 3,500 rpm Toothed wheel design. Easy handling. Vibration-free, smooth running (compare a solid rubber tire with an air-filled tire). Increased performance. The working surface of the MBX Vinyl Zapper is strongly enlarged by the application of pressure to the work surface. This improves performance (compare to a car tire containing only a small amount of air). Long service life Wide construction. Vinyl Zapper 31mm Toothed Wheel Construction Removal of elements such as vinyl decals & DOT tape from metal surfaces, fiberglass, plate glass, wood, aluminum, OEM paint finish. P/N 12-01406

MBX VINYL ZAPPER KITS

MBX Vinyl Zapper Kit is for removing vinyl decals and graphics on metal glass and fiber glass. It is available with either a pneumatic tool or an electric tool.

REUSABLE CLECO BOOTS

Eliminates surface marring both on painted and unpainted surfaces. Easily slips on plier operated style clecos, one size fits all. Yellow polyurethane color. 25 pcs./pkg. P/N 12-00626

CLECO SHEET HOLDER PLIERS

These pliers are designed to grip and actuate all standard sizes of sheet holders and tension clamps. New manufacture. P/N 12-10105

CLECO REVERSE PLIERS

Used in limited access areas. requires less travel per activation. Model TP74B. P/N 12-00370

PNEUMATIC CLECO INSTALLATION TOOL

This new pneumatic cleco installation tool features a lever throttle, 360° swivel mount, quiet operation, a straight handle, and a 6ft. polyurethane lead hose. The ergonomic design and its ease of operation allow for quick insertion of all button or plunger type fasteners, including side grips. Wt. 12 oz. Length: 5 1/8", Air Inlet: 1/4". P/N 12-01120

COUNTERBORE

This 5/8" diameter boring tool, has 1/4" diameter pilot. A 10" thread extension is used for boring holes in hard-to-reach places. Primary use is in the installation of the landing gear on the LongEZ and Cozy aircraft. 3/4" bore does not have 1/4" pilot and must use the pilot received with the 5/8" boring tool. 5/8" dia. w/pilot.....P/N 12-00219
3/4" dia. w/o pilot.....P/N 12-00220

HEAVY-DUTY SHOE SAW ARBORS

ARBOR - Use for hole saw sizes 5/8" through 1-3/16". 3 milled flats prevent slipping in chuck. Pilot hole size 1/4". Has 1/4" shank. P/N 12-01993

QUICK CHANGE ARBOR - Use for hole saw sizes 1-1/4" and larger. The Quick Change 7/16" shank prevents slipping in chuck. Pin drive construction permits fast interchanging of hole saws without removing arbor from chuck. Pilot drill size 1/4". P/N 49-56-7055

STURDY STEP SAFETY PLATFORM

This 22" square platform puts you at the right height so you can work comfortable and safely. Heavy duty construction for years of dependable use. With the Side-Kick, your Sturdy-Step is even more useful. It attaches to the Step in seconds and keeps all of your hand tools and small parts at your fingertips.

Features: Holds up to 350 lbs. • Rubber non-slip feet • Meets all of OSHA safety requirements •

The top & bottom steps feature perforated tread areas to help prevent slips • Yellow traction markers are also placed on the edge of each step for added safety. P/N 12-00206

ACCESSORIES FOR THE STURDY-STEP

SIDE KICK TRAY - Tray holds many small tools and allows you to work without making several trips to the work bench or tool box. Attaches to Sturdy-Step with one Phillips head screw and a special clip. Wheels allow you to move the step without lifting or dragging. P/N 12-00207

KICKSTAND - Adds extra stability and increases maximum load capacity to 25 lbs. P/N 12-00209

SPRING-LOADED CASTER SET - Caster assemblies make it easier to move Sturdy-Step without lifting or dragging. Each caster is equipped with a special spring. When you step on the Sturdy-Step, it settles onto the rubber feet, making it a stable, work platform. Set includes 4 caster assemblies, installation hardware & instructions. P/N 12-00208

WHEEL AND HANDLE KIT - Attaches to the Sturdy-Step quickly and easily. Wheels allow you to roll the step freely without lifting or dragging; no more back bending, no marred floors. Tip of handle is 44" from ground. Net weight: 7 lbs. P/N 12-00211

HEAVY-DUTY BI-METAL HOLE SAWS

Milwaukee hole saws provide an economical means of extending the useful range of portable drills, drill presses and lathes. High speed cutting edges welded to steel bodies produce clean, accurate holes All hole saws listed cut to standard 1.25" depth. Order appropriate arbor for use with each size hole saw.

SUPERCHAMP IV CRIMPING TOOL

The professional quality crimping tool. This versatile hand tool has a separate set of crimping dies for insulated terminals and splices in wire sizes No. 22 to No. 10 AWG. It has a terminal locator to position insulated terminals during crimping and an in-nose cutter for tight locations. This tool is a wire stripper and has a built-in heavy duty bolt cutter. Color coded dies in tool nose correspond to color on terminal insulation sleeve to insure die selection. A stud gauge and wire stripping gauge are important on the tool body. Cushioned handles. P/N 604252-1

BANTAM ROTA-CRIMP TOOL

The AMP Bantam Rota-Tool crimps uninsulated terminals and splices for No. 8 to 1/0 sizes. The correct die position is selected by rotating dies to correct AWG number. Dies are fixed in tool to avoid loss. Compact, rugged and easy to handle. 15" long. Wt. 5 lbs. Not for certified Aircraft use. P/N 601075

3M™ CRIMPING TOOL TH-440

High carbon, heat-treated steel crimping tool that has a unique design that provides a high strength/weight ratio that crimps a broad range of 22-10 AWG terminals and connectors. P/N 12-01146

JEWELERS' SCREWDRIVER KITS

The Screwdriver and Hobby Kit includes five interchangeable blades and a heavy duty knurled handle. Loaded with the most popular jeweler's-sized Slotted and Phillips tips and a scratch awl, this modestly priced set is great for model making and other small-scale applications.

P/N 12-19600

SWIVEL HEAD PIN VISE

The Swivel Head Pin Vise provides fingertip control of small tools when working with jewelry, electronics or models. The double-ended collet offers two distinct sizes for holding a variety of drill bits, reamers and taps. For added control, this Pin Vise has been design with a knurled aluminum body for a sure grip while the swivel head turns smoothly against your palm.

P/N 92

STEEL PROTRACTORS

General's heavy duty steel protractors are trusted by machinists and draftsmen worldwide to deliver crucial measurements with unwavering accuracy. The 6" adjustable arm is ideal for setting bevels, taking measurements and transferring angles. Ultra-fine etched graduations read from 0 to 180 degrees in forward and reverse directions, and will not wear or rub off. Made of ground stainless steel for precision and durability.

P/N 17

POCKET CALIPERS

Although small in stature, these 4" Slide Calipers deliver the same accuracy and precision as some of our larger models. The rugged, stainless steel construction, coupled with a compact design makes these Slide Calipers a great addition to any workbench or toolbox. This item provides inside and outside readings in both 1/16" and 1/32" graduations. In addition, there is a decimal equivalents chart on the caliper's back side for help in making measurement calculations.

- 12" Long, 15/32" Wide P/N 1216

PERMANENT ALNICO MAGNETS

These industrial grade Alnico (Aluminum/Nickel/Cobalt) Magnets are built for heavy duty use and will not naturally demagnetize over time like other magnets. They are handy in a plethora of applications and work settings. The horseshoe-shaped Power Alnico Magnets are available in 2 distinct sizes with extraordinarily strong pull capacities ranging up to 13 lbs.

- No. 370-1 Pocket Magnet, 3/4 oz., approx. 1 lb. pull P/N 370-1
- No. 370-2 Power Magnet, 2 oz., approx. 13 lb. pull P/N 370-2

WIRE & SHEET METAL GAUGES

#20 WIRE GAUGE - The Wire Gage helps you to accurately determine the thickness of American Standard wire from 0 to 36. The Gage works with all non-ferrous wires, metals and rods such as copper, brass and aluminum. This heavy duty tool is made from hardened and tempered steel, and is stamped with wire sizes on the front and their decimal equivalents on the back.

#20 American Standard Wire Gauge - For gauging non-ferrous wire & metal like copper, brass, aluminum, etc. P/N 12-02384

#21 U.S. STANDARD SHEET METAL GAUGE - The Sheet Metal Gage is for gauging uncoated sheet, plate iron and steel, based on weights in ounces per square foot. gauge numbers are in U.S. Standard. Numbers 0-36 (.325"- .007"). Made of hardened steel, with a satin finish for easy reading. Decimal equivalents on the back side. Measures 3-1/4" in diameter. P/N 21

SCREWDRIVER HANDLE SCRATCH AWL

If you're looking for a quality, yet economic awl, then check out our Screwdriver Handle Scratch Awl. Featuring a 3-5/8" steel blade and a durable plastic handle, this Scratch Awl makes a great addition to any workbench of toolbox.

P/N 12-01873

UTILITY AUTOMATIC CENTER PUNCH

The Utility Automatic Center Punch is our most economical model, offering a light-weight aluminum body and a hardened steel point. The punch is great for use on various metals and woods, and is impact adjustable.

P/N 12-01874

TRAMMEL POINTS

General's adjustable trammels accurately measure and mark distances that are too great for conventional compasses and dividers. Trammels will accurately transfer measurements, scribe arcs and lay out circles. Points can be replaced with pencils, ballpoint pens, crayons or soap-stone sticks for marking various materials.

P/N 520

DRILL GAUGES

General's Drill Gages help you to quickly and accurately identify the sizes of stray drill bits in your workshop. These gages can be extremely useful with older, unmarked bits or ones that are too small for markings. Each heat treated, heavy steel gage is machined to close tolerance for spot-on accuracy. The bit sizes and decimal equivalents are permanently etched to the face to provide years of dependable use.

JOGGLE-360 FABRICATION TOOL

Noah Industries has introduced the Joggle-360 into its lineup of innovative metal aircraft fabrication tools. The Joggle-360 will joggle round openings for inspection plates with joggle widths up to 0.562 inch and straight joggle offsets up to 0.625 inch. The tool features hardened steel rollers that form the joggle while gliding around the opening or along the edge by ball bearings that eccentrically adjust for joggle width.

Instruction:

1. Adjust the guide rollers to the desired set back or width of joggle by rotating the Eccentric Guide Roller Adjustment Screws with an Allen wrench.
2. Place the Joggle-360 onto the work that you are going to joggle and tighten the Tension Knob.
3. For straight joggles, run the Joggle-360 back and forth along the work tightening the Tension Knob as required until you achieve the desired joggle depth. Jogging a hole is the same process. Be sure to keep the Guide Rollers in contact with the edge of your work.
4. When the joggle is finished, loosen the Tension Knob and remove the tool from your work.

Note: You may need to tighten the Eccentric Lock Screws from time to time in order to keep the Eccentric Guide Rollers from rotating during use. P/N 12-02252

DRILLS - TAPS - DIES

AIRCRAFT GRADE SUPER COBALT DRILLS

These super cobalt hi-speed jobber length aircraft drill bits feature heavy duty construction to Type J aircraft specifications. Use to drill hard, tough metals, stainless steels, iron based and titanium alloys, and certain plastics. Hardness of cobalt permits speeds 30% over regular H.S.S. drills. Cobalt drills demand rigidly held, positive feed drilling equipment.

ANGLE DRILL ATTACHMENT

Quickly connects to any drill chuck. Makes a convenient, inexpensive close-quarter tool. 3/16 drill capacity. Specify threaded spindle size: 5/16-24 (P/N 12-18503), 1/4-28 (P/N 12-18501) or 10-32 (P/N 12-18502)

Angle Drill w/ Key Chuck (1/4-28 Only).....P/N 12-18511

ANGLE DRILL KIT - Includes tool case, 24" flexible attachment, 4 threaded drills, collet adapter, 90° angle drill, straight drill attachment, 4 collet drills. P/N 12-18505

SNAKE DRILL ATTACHMENT

Heavy-duty 90° flexible drilling attachment. Overall length 26". 3 Female threaded spindle sizes.
1/4-28P/N 12-06500

W/Key Chuck (5/32"cap.).....P/N 12-06800

CONE JAW CHUCK

Heavy duty yet mini size fits any angle drill or attachment with 1/4" x 28 threads. It's just what you need for close quarter drilling. Features: •Capacity from 1/16" to 1/4" 3/4" length, 0.13 lbs •Wrench included. P/N 12-00245

ANGLE DRILL COLLET & CHUCK KIT

This 10-piece kit gives you 3 different methods of drilling in tight spots. Each shank is 1/4" x 28 which will thread into most drill spindles that angle attachments and angle drills are supplied with. 0.25 lb. KIT INCLUDES: • (4) #200 collets & adapters - drill sizes 11, 21, 30, & 40 • (4) threaded drill bits (1-1/4" length) - drill sizes: 10,21,30,40 • (1) Cone jaw chuck Model TP258P/N 12-00368

HAND THREAD TAPS

There are three basic types of straight thread taps:
PLUG TAPS - used for ordinary threading and have a 3 to 5-thread chamfer, or relief, at the point.
TAPER TAPS - have 8 to 10 threads chamfered for easy starting and are used for tough threading jobs.
BOTTOMING TAPS - with their short chamfer (1 to 1-1/2 threads), are used where the thread must go to the bottom of the hole.
Specify Plug, Taper or Bottoming Tap.

DRILLING & TAPPING SETS

13-Piece drilling and tapping set made from special high speed steel. Contains 6 screw machine length drill bits (Nos. 43, 35, 29, 25, 21 and 7), 16 NC taps (4-40, 6-32, 8-32, 10-24, 10-32 and 1/4-20) and one tap wrench. Choice of 135° split point or spiral point drill bits. Set with Split-Point Drill Bits. P/N 41095

Drive for 3-1/8" PunchP/N #1433AVBB.....
DISCOUNT: 12 UNITS - LESS 15% (ASSORTED)

RAPTOR X81

Gives you the choice of using screw machine drills or threaded shank tools. Three flex collets encompass a range of 3/32-1/4 shank tools. A simple attachment immediately converts the tool to use threaded drills. Recommended to use short screw machined drills for special sizes and metric sizes, which is not possible with threaded series. Features: * More power * Greater Torque P/N 12-02251

DRILL BIT SETS - CARBIDE DRILLS & BURS

DRILL BIT SET – SIZES 1-60

This jobber length drill bit set includes high speed steel (HSS) drill bits in sizes 1-60. The set comes complete with a steel storage box. Ideal as a pre-drill for tapping of holes and for many other aircraft building applications.

P/N 12-00227

29-PC BRITE FLUTE DRILL SET

This 118° point, high speed steel (HSS) drill set performs well in a wide variety of drilling applications. It is recommended for non-ferrous metals, wood, and plastics. Set includes 29 pcs (1/16 to 1/2" in 64ths) in metal index.

P/N 12-00537

115-PC HSS JOBBER LENGTH DRILL SET

This 118° point, high speed steel (HSS) drill set performs well in a wide variety of drilling applications. It is recommended for non-ferrous metals, wood, and plastics. Set includes 115 pcs (1/16 to 1/2" by 64ths and #1-60 and A-Z in metal index).

P/N 12-00536

STRAIGHT FLUTE CARBIDE DRILLS

For use on hardened, treated, and abrasive materials, stainless steel, cryogenic alloys.

DRILL DOCTOR TRADESMAN BIT SHARPENER

The DD500X Pro Kit combines the Drill Doctor Tradesman sharpener with heavy duty carrying case. Sharpen bits either 118° or the high performance 135° setting and it can turn standard drill bits into self-centering, split point bits. Sharpens bits from 3/32" to 1/2" diameter in about

60 seconds and includes the patented E-Z align system and diamond grinding wheel for sharp precise results. Includes: Sharpener, 1/2" chuck, 110V power cord, carrying case, free video and easy to follow instructions.

ABRASIVE TOOLS & KITS

QUICK CHANGE SANDING & SURFACE CONDITIONING

Power Zirc sanding discs grind down welds and remove sharp edges on all types of metal surfaces. They also apply non-directional finishes to brake rotors, in addition to removing heavy rust and corrosion. Surface Conditioning discs remove baked on gaskets and silicone sealants. They are also used for deburring and polishing sharp edges, as well as paint and corrosion removal. Roloc® is a registered trademark of the 3M Company. P/N12-00845

STANDARD PORTING KIT

A very complete Porting Kit, with a large variety of Cartridge Rolls for a complete porting job. Includes Do-It-Yourself Guide. P/N 12-00842

| Qty. | Description | Application |
|---------|--|--|
| 2 | 1" x 1" x 1/4" Flap Wheel, 120 Grit | For porting intake runners. |
| 3 Total | Rotary Stones, Tapered, 60 Grit, (1) 3/8" Diameter, (1) 11/16" Diameter, (1) 1" Diameter | Removes large amounts of metal in small areas. |
| 7 Total | Cartridge Rolls, Straight, 1/4" Diameter, (2) 40 Grit & (5) 80 Grit | Porting heads and intake runners. |
| 7 Total | Cartridge Rolls, Straight, 3/8" Diameter, (2) 40 Grit & (5) 80 Grit | Porting heads and intake runners. |
| 7 Total | Cartridge Rolls, Straight, 3/4" Diameter, (2) 40 Grit & (5) 80 Grit | For large porting jobs, to remove a great amount of material. |
| 7 Total | Cartridge Rolls, Half Tapered, 3/8" Diameter, (2) 40 Grit & (5) 80 Grit | Remove material in small areas with a greater product endurance. |
| 7 Total | Cartridge Rolls, Half Tapered, 5/8" Diameter, (2) 40 Grit & (5) 80 Grit | Remove material in small areas with a greater product endurance. |
| 7 Total | Cartridge Rolls, Full Tapered, 5/8" Diameter, (2) 40 Grit & (5) 80 Grit | For quick removal of material in small areas of the engine. |
| 1 | 1/4" Diameter Mandrel, 2-3/4" O.A.L. | Use with Cartridge Rolls. |
| 1 | 1/4" Diameter Mandrel, 4" O.A.L. | Use with Cartridge Rolls. |

HAND PADS

Faster, cleaner, and more durable than wire brushes, scrapers and sandpaper. Non-woven nylon pads are pre-cut. They provide conformable, consistent finishes. General Purpose and Ultra Fine Pads may be used with lubricants and solvents. General Purpose - Clean up dirty parts in solvent tank • Light corrosion removal on steel and aluminum parts. Commercial - An aggressive hand pad for water-based products only. •Not to be used with solvents. •Heavy duty rust removal and general cleanup Ultra Fine - For scuffing in new rod and main bearings. • Light corrosion removal on steel and aluminum parts.

| Description | Size | Grain | Color | Qty. | Part No. | Price |

BENCH GRINDER DISCS

Quickly remove carbon from pistons and valve stems. Great for light deburring head bolts and studs. One disc is flexible when run alone. Stack as many discs on at a time for the desired finish and removal rate. Safer than a wire wheel, with a much better finish. The very fine grade Bench Grinder Discs are packaged 10 to a pack, and the medium grade Bench Grinder Discs are packaged 5 to a pack.

METAL POLISHING KIT

An easy way to polish chrome, aluminum and brass with an electric drill motor. Includes: 4 Felt Discs, 1 Holder Pad, 1 1/4" Mandrel
Metal Polishing Kit (2" Dia.)..... P/N 12-00843.....
Metal Polishing Kit (3" Dia.)..... P/N 12-00844.....

DEBURRING AND FINISHING WHEELS FOR HAND GRINDERS

These abrasive nylon Deburring & Finishing Wheels for hand grinders are very aggressive for metal removal and deburring. They produce a satin-textured finish. New abrasive grain is exposed throughout the wheel's wear, for a consistent quality finish. High Durability - The 1"x1" x 3/16" mini wheel is excellent for deburring and blending. • Used with our Cartridge Rolls for porting, our mini wheel supplies a smooth satin finish to ported heads and the intake manifold. • Increases edge life. • Resists loading - smear resistant for uniform final finish. • Conforms to work piece. • Prevents undercutting or gouging.

TIGHT-FIT DRILL KIT

Space, every inch of it, is at a premium in aircraft design as shape and weight is critical to function. Also, airplanes are riveted together which requires thousands of holes to be drilled in difficult locations without scratching or marring the work surface. So, engineers needed to design a versatile "chuck-less" drill attachment that could reach into very confined areas. The answer was found in putting threads on the shanks of drill bits. The benefits are significant. Threaded drill bits eliminate the need for a chucking mechanism. Freed of this restriction, it is possible to do a

wide variety of jobs in places with extreme space limitations (less than 1" x 2"). Chuck slippage is all but eliminated while the precision mating angle between threaded drill and drive spindle insures concentricity. Drill bit change times are reduced, an exact working drill bit length is insured and the chance of marring or scratching the work surface is greatly reduced. The Model 00105 Kit includes: a versatile close-quarter Right Angle Drill Attachment capable of drilling up to 1/4" diameter holes and compatible with all standard power drills, a 6" Threaded Extension for those deep hard-to-reach spots, a Chucking Spud which allows direct use of threaded TightFit® drill bits and extensions with your standard drill motor, five aircraft quality threaded TightFit® drill bits (Short Drill Bit Set, 00133), a Tight Fit® 3-Way Wrench, and is packaged in a red, heavy-duty, blow-molded storage case. Features: Attaches to any power drill; Recommended operating speed not to exceed 2500 rpm. • Light weight; Right angle drill weighs 1/3 of a pound and rotates 360 degrees for tight-spot access. • Threaded components allow for fast, easy tool changes; Drill over, under or around obstructions. • Design allows "deep reach" in confined areas; Provides utility of extension drill bit set.

DELUXE TIGHT FIT TOOL KIT PROFESSIONAL MODEL

Includes right angle drilling attachment, 6" extension rod, chucking spud, threaded countersink, (6) stub drill bits (9/16" long) & (6) short drill bits (1-1/2" long) in the following diameters: 1/16", 3/32", 1/8", 5/32", 3/16", 1/4". (1) threaded apex socket adapter to fit the angle head & extension rod. (4) screwdriver bits Number 1 & 2 slotted and Number 1 & 2 Phillips. (1) 1/4" threaded collet adapter to fit the angle head, extension rod or spud adapter. (1) 5/16" combination wrench. All above items are packed in a hard blow molded "everything in its place" aircraft mechanic style carrying case. The case even floats when fully packed. There is also a special internal tray for other drills or accessories. P/N 12-11215.....

UNIBIT CARBIDE HOLE CUTTERS

Unlike ordinary hole cutters, Unibit Carbide Hole Cutters cut without hogging, chattering, or vibrating. The aggressive carbide cutting edge holds sharpness for long life. Use them to cut clean, perfectly round holes through steel, stainless steel, aluminum, brass, copper, and many other materials. No center punch is required, and the double ended pilot drill allows for longevity and durability. Available in 16 sizes. Shank size on Hole Cutters 3/4" through 1-1/16" is 3/8", and on cutters 1-1/8" to 1-3/8" shank size is 1/2".

| Hole Size | P/N | Price | Hole Size | P/N | Price |

BLAIR HOLE CUTTER

The Blair hole cutter fits any 1/4" drill and set includes 7 blades (1/4" to 5/8" arbor), pilot and holder. The blades are threaded onto arbor and precise control of the depth of cuts is provided by adjusting screws. Over 3000 holes in sheet metal can be cut by each blade.

Model TP147 P/N 12-00243.....

FLANGING-360 TOOL

This is a companion tool to the ARC-360 lightning hole cutter. The Flanger-360 will form a 30 degree flange on 2024-T3 aircraft aluminum up to .032" thick and in diameters from 2 to 6 inches. Its polished hardened steel rollers gently and effortlessly form the flange as the operator rotates the tool around the lightning hole.

Unlike other flanging tools that rely on the skill and eye of the operator, the Flanger-360 stays in constant position with the lightning hole via guide rollers as it progressively forms the flange. P/N 12-02030.....

UNIBIT STEP DRILL

The UNIBIT Step Drill uses a unique single flute design to drill perfectly round holes in thin materials quickly and with less effort than any other bit on the market today. UNIBIT incorporates cutting steps of progressively larger diameter, making it possible to drill up to 13 different hole sizes with a single bit. Once the desired hole diameter is obtained, the hole is automatically deburred by the cutting edge of the next larger step. UNIBIT #1 drills 13 holes in 1/32" increments from 1/8" through 1/2" and has a shank size of 1/4". UNIBIT #2 drills 6 sizes of holes from 3/16" through 1/2" and has a 3/8" step thickness with a 1/4" shank. UNIBIT #3 drills 9 sizes of holes from 1/4" to 3/4" and has a step thickness of 1/8" with a 3/8" shank.

KETT KB-301 CORDLESS 18GA SHEAR

Kett's powerful 14.4 volt Cordless Shear gives you complete freedom in the shop. Its high torque 2300 SPM motor lets you easily cut 18 gauge mild steel or up to 20 gauge stainless at over 150"/minute. The swivel head gives you precise control as you make straight or contour cuts. The double-cut shearing action leaves a clean burr free edge and won't warp or bend the piece. The lightweight hi-impact thermoplastic housing and aluminum cutting head keep weight down to only 7 lbs. The extended run time NiCad battery recharges quickly and there's room for a spare, and the charger unit, in the handy carrying case. Length: 12-3/4", Weight: 7 lbs.

The kit includes the KB-301 power shear, KB-302 14.4 volt NiCad High Performance battery. KB-303 battery charger and KB-304 carrying case.

AMP PRO CRIMPER II HAND TOOL

The PRO-CRIMPER II Hand Tool provides the versatility of general-purpose service of general-purpose service tools along with the reliability and ease of use of many premium-grade tools. For versatility, 75 die sets (available separately) are interchangeable, including those for open-barrel contacts and terminals. Additionally, many of these die sets have multiple cavities for crimping a variety of contact or terminal sizes. For reliability, the tool is constructed of durable high carbon steel with extra-strength pivot pins. And, for user convenience, the PRO-CRIMPER II Hand Tool particularly excels. Ratchet control is provided for complete crimp cycling; this helps eliminate partial crimps. Also, an emergency ratchet release allows the user to open the tool jaws at any time during the crimp cycle. To reduce handle force, the linkage was designed to match the forces required to crimp our largest insulated terminal. The result is dramatically less hand force than comparable tools. Also, the angled had and specially designed handles provided comfortable operation. Locator are mounted on pin-and-socket style tools. They help properly locate the contact in the die set, provide a wire stop, and help minimize contact rotation and bending during crimping.

KOUL SINGLES STAINLESS BRAIDED HOSE ASSEMBLY TOOLS

Since the invention of stainless braided hose, racers and mechanics have been fighting the problem of installing it into the socket part of the assembly. If your lucky and get a clean cut on the end of that hose, you might get it in. Most of the time a little fuzz appears on the hose end and the battle begins. It is not only time consuming, it can get bloody. This tool is the solution that makes the assembly a snap. Manufactured of a high tech composite, it is virtually indestructible. No need to worry about vise marks or wearing out. Just insert the socket into the tool, twist the hose in, and in less than 10 seconds you have it assembled. You can repeat this several times without recutting the hose end. The tool can pay for itself the first time you don't have to scrap some hose because it got too short trying to clean up the end. You'll be amazed at the amount of time you'll save.

SMALL KIT - The Small kit contains the capsules to install -4, -6, -8 hose into their respective sockets. To accommodate all the different manufacturer's fittings, spacers and sleeves are required to tighten up the some of the sockets within the capsule. For the tool to perform at its best, the socket needs to be a snug fit in the funnel. The two spacers are used in some -6's and 8's. If the socket seems loose in the tool, use a spacer to tighten it up. In the small kit, only the Russell -4 needs a sleeve. Not for use with Teflon-style hose. P/N 12-01061.....

LARGE KIT - The Large kit contains the capsules to install -10, -12, -16 hose into their respective sockets. To accommodate all the different manufacturer's fittings, spacers and sleeves are required to tighten up some of the sockets within the capsule. For the tool to perform at its best, the socket needs to be a snug fit into the funnel. In the 1016 kit, all the -16's except Russell's require the sleeve and a rear spacer. See the instructions in the case for the proper spacer number. Most of the -10's and 12's* will use a spacer. Not for use with Teflon-style hose. * -12 is a stainless washer. P/N 12-01062.....

HOT ROD KIT - The Hot Rod kit contains the capsules to install -6, -8, -10 hose into their respective sockets. To accommodate all the different manufacturer's fittings, spacers and sleeves are required to tighten up some of the sockets within the capsule. For the tool to perform at its best, the socket needs to be a snug fit into the funnel. Spacers are used in some -6's, -8's, and most -10's. If the socket seems loose in the tool, use a spacer to tighten it up. See the instructions in the case for the proper spacer number. Not for use with Teflon-style hose. P/N 12-01898.....

THE PRO COMBO - The Pro Combo is a special offer of BOTH the #468 and #1016 kits listed above. Pros need both kits to handle all the hose sizes in a race car. Ordering this combination will save \$15.00. Not for use with Teflon-style hose. P/N 12-01897.....

P-KIT AIRCRAFT WINDOW INSPECTION PRISM KIT

The "P-KIT" (Inspection Prism Kit) is packaged as a completely self contained aircraft window inspection tool kit. It comes in a waterproof lockable case and includes Instructions, Inspection Prism, Coupling Agent and a 6000 Candlepower Flashlight with batteries. It's ready to use to inspect your aircraft windows for possible bolt hole damage. If the "P-Kit" Prism becomes scratched with use, simply sent it back to the factory and they will refinish it for you free of charge. P/N 12-01333.....

EXPRESS PORTABLE AIRCRAFT VACUUM

The Express Toner/ESD Vacuum provides .3 micron filtration which captures particles that are less than one one-hundredth the thickness of a human hair. This means these vacuums will do a thorough job of cleaning planes of the smallest particulates like mold spores, chemicals, foreign substances or any other microscopic particles

that could be hazardous on a plane. Additionally its light weight (about 6 pounds) makes the Express Vacuum easy to move into and around the interior of an airplane. Plus it is the only product in the market of this nature which is ESD safe, this is of great importance given all the delicate electronic equipment which is found on today's airplanes. Note: Bag is optional and may be purchased separately. Features: 600 Watt Flow Through Motor • 6' ESD safe hose • Crevice tool and brush • 12" Flexneck tool • .3 micron toner cartridge filter • Line filter • 12' power cord • ESD SAFE

THE SPINNING RATCHET

This tool is a combination tool providing a ratcheting action for power and a spinning action for speed. All types of accessories can be used with this wrench, such as extensions on either end, or flexible drives. With out the spinning handle attached, it is a very compact tool for restricted areas. The ratchet pawl is made from annealed steel to allow it to fail before the ratchete gear as it is a low cost item. The spinning gears are protected by a shear pin that will fail before the bevel gears, again a low cost item, replacement, rather than replace one or both of the bevel gears, if they become over loaded. The tool is 3/8" drive. Use your socket accessories, if you do not have a spinning handle purchase one when you buy your new tool. P/N 12-00742.....

Adapter set..... P/N 12-01601.....

KEYLESS DRILL CHUCK

This 3/8 inch square drive works well with the Spinning Ratchet(tm) and with other socket drives; such as the ratchet wrenches, flexible drives, u joints and extensions. Just the tool for getting into tight spaces to tap or other work that requires turning a tool. P/N 12-01387.....

TWISTED STRIPPER TWISTED SHIELDED PAIR WIRE PREPARATION TOOL

STP Wire Stripping Problem Background: From the beginning, Mil-Spec Tefzel Shielded Twisted Pair wire has defied every wire stripper available to installers, leaving a razor blade or knife as the best option for removing the outer jacket. This time consuming method

There is FINALLY a tool to quickly strip the shielded twisted pair wires in your avionics installations!

is imprecise, and it can easily lead to internal shorts between the center conductors and the shield, especially when solder sleeves are used for shield termination. With the increased use of RS-232, ARINC 429, and other types of data busses in today's aircraft electronics, this type of wire is now a major component of many avionics installations. Stop the Razor's Hidden Damage Ring and slit. That has been the standard way to remove twisted pair jackets since the introduction of this type of wire. This time consuming and inaccurate process has obvious disadvantages when compared to the TS-7000: P/N 12-02031.....

FEIN MULTIMASTER SPEED START

For beginners, who do not want to sacrifice professionalism in spite of being price conscious.

Includes:

- 1 FEIN MULTIMASTER FMM 250
- 1 universal E-CUT saw blade (29mm)
- 5 of each type of sanding sheet, grain 80, 120 and 180
- 1 universal E-CUT saw blade (29mm)
- 1 rigid stopping knife
- 1 key and mounting bolts

Features

- FEIN MultiMaster Start - a fully-fledged FEIN MultiMaster, suitable for all applications, featuring the most important accessories for grinding, sawing and scraping.
- In the lead through oscillation technology: unsurpassed versatility.
- Optimum handling thanks to ergonomic design and low weight
- Chuck with form-fitting mount provides high torque transfer.
- Powerful 250 Watt motor with electronic speed control.
- Integrated interface for adaptation of additional system accessories.
- Extensive range of accessories available

MILBAR WIRE TWISTERS MODEL 25W & 26W

 Milbar is the world's leading brand of Wire Twister Tools and Kits. Designed for the professional mechanic, Milbar forgings are made from high carbon alloy steel and are controlled throughout the manufacturing process to exacting engineering specifications. Each tool passes a series of rigorous quality assurance tests which ensure function and reliability under the most demanding environments. (Black oxide finish) TYPES AND STYLES - Wire Twisters come in 6" Diagonal Configuration. The 25W model incorporate a Cushion Throat to catch clipped wire ends, preventing FOD (foreign object damage). The Spring Return feature automatically retracts the twist rod to ease and speed the work.

25W-NOM Size 6" P/N12-01631
26W-NOM Size 9" P/N 12-02018

ECONOMY SAFETY WIRE TWISTERS

 These top quality twisting lock pliers with automatic return are economically priced and extremely durable. Features a sharp cutting edge and will twist up to .060" dia. safety wire. Length 9". Foreign made.
P/N 12-18900

SAFETY WIRE TWISTER KIT M300

 Contains 6" Safety Wire Twister and 19" Chrome Adjustable Safety Twister Tool with Durable Plastic Case
P/N 12-01680

MILBAR 105W PROFESSIONAL WIRING KIT

 The most versatile kit available. Contains three different SafetyTwist® Pliers to cover almost any application: 9" Automatic (1W393), 6" Mini (9W) and a 19" Deep Reach Twister (13W). Includes three 1/4 lb. spools of stainless steel safety wire (.020, .032, .041). Durable plastic storage case. Kit weight 4 lbs.
P/N 12-02020

MINI SAFETY WIRE TWISTERS

Same quality construction as T-3000 twist-ers above, but in small 6" length. Ideal for operation in confined spaces. P/N 12-18910

19" DEEP-REACH TWISTER EXTENSION

P/N 12-16640

SPECIALTY TWISTER

 An excellent tool for different access situations, this twister provides a deep reach and access to close quarters. Made in U.S.A.

P/N 13W

SAFETY WIRE TOOL MFG BY ACS PRODUCTS CO.

 Easy one-hand operation. Reaches into tight places, makes a fast, neat twist. Shatterproof plastic handle.
P/N 12-01072

POWER TWIST ADAPTER

 This new tool attachment provides quick and precise twisting of safety wire using Skill or Black & Decker type cordless screwdrivers. Just attach the adapter to the screwdriver, insert wire and you will have a neat, tight, easy wire twist. Works perfectly in a wide variety of applications (particularly twists in tight spaces). Available exclusively from Aircraft Spruce & Specialty Co.
P/N 12-20800

SAFETY WIRE DRILLING JIG

 This tool provides a fast, simple way to drill bolt heads with virtually no broken drill bits. The tool is made of 6061T6 hard anodized aluminum for durability. Fits 3/16" to 5/8" dia. bolts and works on hex head bolts, header bolts, 12 point countersink and Allen head cap screws. Includes drill bushings and two cobalt drills.
P/N 12-16600

"CENTER IT" HOLE DRILLING JIG

"Center It" is a jig used to drill holes in pipe or tube stock. To use the Center It, simply place it on your drill-press table, run the bit down (with the motor off) to hold the centered jig on the bit, then bolt the jig to the press table. No clamping of the tube is necessary; the angled flats of the jig hold it in a centered position. Your holes are automatically centered on the tube with no center-punching necessary. If the tube is too fat to drill in a single operation, simply turn it over. The device is useful to kitplane builders who have to drill several holes in a single tube or many tubes because no clamping or center-punching of the tube is required. It also makes short work of drilling.
P/N 12-20815

SAFETY WIRE STARTER KIT

This handy kit enables you to safety wire any nuts or bolts on an airframe or engine. Just place the special washers under the bolt or nut, bend up the small flanges to hold the bolt or nut in place, and then use the tab of the washer to attach the wire to a solid point so the bolt cannot move. This kit works on the same principle as drilled bolts do and is very handy for those flying with an engine that does not have safety wired nuts and bolts. Excellent for use on 2 stroke engines. Package of spare washers includes 6 ea. of: 6, 8, & 10 mm sizes.
Safety Wire Starter Kit P/N 12-16625
Package of 18 Spare Washers..... P/N 12-16626

AERO SAF-T-BLOKS

 Since the introduction of Saf-T-Bloks in 1981, they've helped thousands of mechanics by taking the headaches and hassle out of drilling safety wire holes in bolts and nuts. This easy to use Saf-T-Blok holds the bolt steady after you thread it in to the required depth. You then drill the hole through the center with no risk of misalignment. Saf-T-Blok is available in 4 sizes:
Standard: 1/4-5/16-3/8 USS & SAE P/N 12-15345
Metric: 6x1, 8x10, 8x1.25, 10x1.25, 10x1 P/N 12-15346
Aero: 8-32, 10-32, 1/4x20, 1/4x28, 5/16x24..... P/N 12-15347
Allen: #8,10,1/4,5/16,3/8 P/N 12-15348

NUT SAF-T-BLOKS

 Designed to enable safety wire holes to be drilled through the head of bolts or through nuts, across the diagonal. Designed to accept up to 3/4" dia. nut. Easy to use. Nut Saf-T-Blok requires that the nut or bolt be placed into the "V" groove, tighten down the holding screw, drill & deburr.
P/N 12-15349

DRILL RITE PRECISION DRILL GUIDE

 Light and portable, this tool provides straight and true holes every time. Your electric hand drill will perform like a professional drill press. The easy, accurate way to drill any curved surface: Simply place the Drill Rite VGuide™ on any type of pipe or round stock, from 1/2" to 2 1/2" in diameter. Swing the gate closed and lock it down. Insert the proper drill bit in the guide bushing and drill a precisely accurate hole. Includes super hardened drill bushings for popular 3/16" and 1/4" holes for rivets and aircraft hardware. Precision made in the U.S.A. from high quality aircraft grade aluminum.
P/N 12-00836

SAFETY WIRE KITS

 These kits include professional safety wiring kit for all applications. Contains 9" automatic standard twister, 6" safety wire twister, made of hardened alloy steel-black oxide finish plus (3) 1/4 lb. spools of annealed stainless steel safety wire. (Sizes: 020-032-042). Model 100 also includes 19" chrome adjustable safety wire twister (for cavity and deep access applications).
Model 200 P/N 12-16650
Model 100 P/N 12-00336

INSTRUMENT MOUNTING HOLE DRILL JIG

 Aircraft instrument mounting hole drill jig for standard 2-1/4" & 3-1/8" diameter instruments. Accurate and simple tool to use, drill jig made of hardened steel for long life.
P/N 12-00975

KLEIN TOOLS

STRIPPER/CUTTERS

Klein wire strippers and cutters cut, strip, gauge and loop a wide range of wire types and sizes. Made of strong, hardened steel with comfortable handles, these tools are durable and long lasting.

11055 KLEIN-KURVE™ WIRE STRIPPER/CUTTER

Solid and Stranded. Double-dipped comfort grips with curved handles, cuts, strips, loops and gauges 10-18 AWG solid wire and 12-20 AWG stranded wire, cleanly shears 6-32 & 8-32 screws, coil spring provides fast, self-opening action. P/N 12-00235.....

11057 KLEIN-KURVE™ WIRE STRIPPER/CUTTER

Solid and Stranded. Double-dipped comfort grips with curved handles, cuts, strips, loops and gauges 20-30 AWG solid wire and 22-32 AWG stranded wire, cleanly shears 6-32 & 8-32 screws, coil spring provides fast, self-opening action. P/N 12-00236.....

11045 KLEIN 10-18 WIRE STRIPPER/CUTTER

Strips 10 to 18 AWG solid wire, easy-to-read wire gauge markings, comfortable handles with cushion ridges. P/N 12-00233.....

11046 KLEIN 16-26 WIRE STRIPPER/CUTTER

Strips 16 to 26 AWG stranded wire, easy-to-read wire gauge markings, comfortable handles w/cushion ridges. P/N 12-00234.....

KLEIN WIRE STRIPPERS 6-12

This lightweight Klein-Kurve wire strip-cutter strips large gauge 6-12 AWG stranded wire and eliminates the need for a skinning knife. The tool clearly shears 6-32 and 8-32 screws and has a serrated pliers nose, which allows the user to pull, grip, and twist wire design and double-dipped textured grips provide control and comfort. P/N 12-01456.....

63020 KLEIN-KURVE MULTI CABLE CUTTER

Designed with 3 different cutting blades; anvil cutter, a copper curved cutter & a steel cutter. Cleanly shears 6-32 & 8-32 screws, double-dipped comfort grips with curved handles, coil spring provides fast self-opening action. P/N 12-00496.....

KLEIN TOOLS CABLE STRIPPER / CUTTER

Klein Tools added its new QTR-Turn NM cable stripper/cutter with Klein-Kurve handles to its existing line of strippers and cutters. The QTR-Turn technology allows users to place cable in the upper jacket strippers, squeeze the handle, and turn one-quarter to completely sever the outer jacket. It utilizes spring-loaded action for self-opening. P/N 12-01770.....

63030 KLEIN 8-1/4" CABLE CUTTER

Cuts up to 1" diameter aluminum and copper coaxial cable, curved jaws firmly grasp cable, shear-type cutting blades, precision, one-hand shearing action. P/N 12-00497.....

CRIMPING/CUTTING TOOL

This tool is designed to crimp insulated and non-insulated 10 to 20 AWG solderless terminals & connectors. It has easy-to-read tool markings to identify the insulated or noninsulated crimping dies. Its tapered nose design works well in tight places and has specially hardened cutter in the nose for quick, clean cuts. Size: 9.75". Lifetime warranty. P/N 12-00698.....

PLIERS

Designed and built with exceptional quality standards in a tradition that dates back to 1857. Klein specializes in the making of the world's finest pliers, for the professional. What makes Klein pliers different is induction hardening of cutting edges, pliers head hardness, hot riveting and special handle hardness.

KEARNEY SWAGER

This portable, hand-operated roll type swaging machine will swage MS type terminals onto galvanized and stainless steel cables from 1/16" diameter up to and including 3/16" diameter. Includes machine, a full set of roll dies, terminal gauges and feed guide adapters & instructions in a steel carrying case. Wt. 95 lbs. New manufacture. All replacement parts available. Special order P/N 12-01188.....

FLYING WIRE TENSIONER

This tool is used for setting the tension on flying wires from 1/4" - 1/2". Tension ranges from 200 lbs. to 2400 lbs. Can also be used for setting drag, anti-drag wire tension. Ideal for use on Stearmans, Wacos, and Pitts, etc. To use this tool you will need a torque wrench. P/N 12-12500.....

SOFT JAW PLIERS

This new tool is suitable for loosening and tightening threaded locking collars of electrical connectors without marring the gripping surfaces of the collars. Excellent for use on AN and MS connectors, plated pipe and fittings, plastics, glass and ceramics. The soft jaws will not crack or chip plating. Ideal for rod, tube or sheet. Grip Range: 3/4" to 2-1/2" dia. Made from heat-treated steel with black oxide finish. Meets government. Specs. American Made. P/N 12-16800.....

GREASE JOINT REJUVENATOR - PROFESSIONAL MODEL

Have you ever tried to push grease in through a grease fitting and couldn't? The Grease Joint Rejuvenator opens clogged grease joints and fittings effortlessly in less than a minute!

- Opens clogged grease fittings & joints
- Cleans and replenishes old and dirty grease fittings
- Loosens dried grease in joints
- Cleans ways and stays in milling machines and lathes
- Lubricates bearings on farm, lawn & construction equipment.

How it works: Remove the piston end and fill the tool with penetrating oil. Then place the end over the grease fitting and tap on the piston head with

a hammer until it starts to move down into the tool body. The hydraulic pressure created by tapping on the piston forces the penetrating oil into the grease joint where the blockage is and loosens the old hardened grease (or dirt), flushing the blockage and clearing the way for new grease

Grease Joint Rejuvenator (Pro Model).....P/N 12-01038.....

COMPRESSION WHISTLE ALERT

No more burning your fingers and hands! Just Listen! Insert Whistle Alert™ into any 14mm spark plug hole and bump the engine until you hear the whistle. You are now on the compression stroke!

- Easily find Top Dead Center compression stroke
- Turn engine over from inside the car and listen for the whistle.
- Made of steel and aluminum
- Made and assembled in the USA.

STEELMAX DRYCUT SAW S14

Utilizing a 14" carbide tipped blade, the Steelmax S14 cuts through metal faster, safer and cleaner than abrasive chop saws in a fraction of the time and cost. Powered with a 15 amp motor and geared to turn slower than a chop saw, the S14 dry cutter cuts like a cold saw, but at a fraction of the cost. Sold standard with a 14" carbide tipped mild steel blade attached, heavy duty, industrial strength cast iron base and two position locking vise, this saw is ready for immediate action! Cuts solid mild steel up to 1" thickness; cut profiles: pipe, angles, channel with a depth of cut up to 4-3/4". Bevels to 45 degrees. Saves time and money giving cool cuts that need little to no finishing, eliminating any need for grinding or cool down time. P/N 12-01717

AVIATION MECHANICS GLOVES

Researched, developed and designed by aviation engineers, this mechanics glove is your best choice for comfort, dexterity, and wear. Excellent for aircraft mechanics or for using during preflight inspections. These gloves are not flame proof or fire retardant; do not wear while draining or exposure to open flame. Available in black and blue. Wt: 6oz.

Main Features:

- Cuff made of neoprene, provides extra support, flexibility, impact protection and comfortable fit
- Two-way breathable stretch spandex, provides an extremely comfortable and snug fit.
- Knuckle panel protection made of neoprene for impact protection, comfort and to guard against scrapes and abrasions.
- Precision cutting and quality of fingertip seams ensure enhanced fingertip sensitivity.

CABLE CUTTERS - SWAGERS

FELCO CABLE CUTTERS

A cable when crushed or deformed is difficult to use with fittings. These fine quality Swiss made cutters, with unique triangular jaws, never leave a frayed end.

#C-7F CUTTER - Capacity 3/16" diameter and smaller. Length 8". Wt, 10 oz.
P/N 12-01135

#C-9 CUTTER - Cuts 1/4" steel cable
P/N 12-00179

#C-12 CUTTER - Capacity 3/8" diameter and smaller. Length 19". Wt. 3 lbs.
P/N 12-01174

#C2A CUTTER - Snub nose for loose cuts. 10% harder blade than C7 for long life and cutting of very hard wire or cable. Opening of tool cuts up to 2mm wire & stranded cable. P/N 12-00223

S & F CABLE CUTTERS

A fine tool made from high quality alloy steel and heat treated for best cutting action and long life of cutting edges. Handles shaped for comfortable grip and minimum cutting effort. Max. capacity 3/16" dia. 1 x 19 cable.

No. 316 Cable Cutter.....P/N 12-18600

BENCH MOUNT FOR #316 CABLE CUTTER

This bench mount adds to the versatility of the #316 cable cutter. Mounts with 2 screws to a bench or plate. Fingers can still grip the tool. Easy removed. P/N 12-00674

S & F HARD WIRE CUTTER

These quality cutters feature a unique handle design with thick "T" shaped vinyl handle grips for maximum comfort while cutting. Cuts 3/32" maximum diameter music wire, heat treated steel spring wire, stainless or galvanized cable. Produces clean square cuts. Gold iridite finish for maximum rust protection. Length: 6". Wt. 7 oz.
Model No. 093..... P/N 12-18605

CABLE TENSIO METER

This precision instrument gives accurate readings over a wide range of cable tensions. No preliminary adjustments are necessary. May be used continuously without resetting or checking. Extreme heat or bitter cold does not affect the accuracy of the readings. One instrument is usable on many cable sizes with absolute accuracy. The small size permits entry through small openings and permits accurate readings on cable located in confined areas. The entire operation of testing cable tensions can be done with one hand in a matter of seconds. Range in Lbs.: 10-100 on 1/16", 3/32", 1/8"; 15-150 on 5/32", 3/16"; 25-150 on 7/32", 1/4" T5-2002-101-00

BURROUGHS CABLE GAUGE

Easy to use - just squeeze ball handle, put gauge on cable, release handle and read tension on rotation dial. No conversion charts necessary. Tension range: 10-70lbs. for 1/16" cable, 15-70 lbs. for 3/32 & 1/8" cable. 50-350 lbs. on 5/32" & 3/16" cable. Only 3-1/4" wide. Fits through inspection hole. For 1/16", 3/32", 1/8"P/N 12-19200

For 5/32", & 3/16".....P/N 12-19210

TENSITRON CABLE TENSION METERS

Standard Features of all models: • Easy one-hand operation • No interchangeable parts are needed to adapt to different cable sizes • Memory Lock Pointer holds readings until cleared • Calibration chart affixed to back of meter • Durable and made of non-corrosive materials • Weigh approximately 21 oz. Compact design allows engagement of meter onto cables closely routed along floors, flat surfaces and other minimum clearance areas. Models ACM-100, ACM-200, ACM-300, ACM-400 are compact enough to allow use in limited access panels as small as 4" dia.

| Model | Part No. | Price |
|---|----------|-------|
| ACM-100 - Designed to measure from 5-100 lbs tension in 1/16", 3/32", 1/8", 5/32" diameter cables. | 12-01050 | . |
| ACM-200 - Designed to measure 20-200 lbs tension in 1/16", 3/32", 1/8", 5/32", 3/16", and 1/4" diameter aircraft cables. | 12-01051 | . |
| ACM-300 - Designed to measure from 40-300 lbs tension in 3/32", 1/8", 3/16" and 1/4" diameter standard cables. | 12-01052 | . |
| ACM-400 - Designed to measure from 40-400 lbs tension in 3/32", 1/8", 5/32" and 3/16" diameter standard cables. | 12-01053 | . |
| ACM-600 - Measures tension from 40-600 lbs in 1/8", 5/32", 3/16" and 1/4" diameter aircraft cables. | 12-01362 | . |

ECONOMY SWAGING TOOLS

NO. 2 SWAGE-IT - For use with sleeves for 1/16", 3/32" and 1/8" cable. Swaging pressure applied by using a wrench to tighten bolts. Size: 1/2" x 1" x 7". Wt. 1 lb. Cadmium plated. P/N 12-12000

NO. 3 SWAGE-IT - For use with sleeves for 1/8", 5/32", 3/16" and 1/4" cable. Same design as No. 2 tool but larger. Size: 3/4" x 1-1/2" x 14". Wt. 3-1/2 lb. P/N 12-12100

SWAGE-IT RIGGING KIT

This Swage-It rigging kit contains everything you will need for rigging and emergency repairs of Nicopress sleeves on cables. Includes the #2 Swage-It tool for 1/16", 3/32" and 1/8" sleeves, 1/2" extension wrench for use on the #2 tool and a #316 cable cutter. Size: 4-1/2" x 9". Packaged in a clear plastic tube with vinyl caps to better protect tools. P/N 12-12200

LOCOLOC NO. 1-SC SWAGER

No. 1-SC Hand Swager - Multi-compression hand swager with cable cutter. Swages 1/16", 3/32", 1/8", 5/32", and 3/16" oval and stop sleeves, plus 7/32 stop sleeves, for a total of 11 sizes plus the ability to cut up to 7/32" diameter aircraft quality steel cable. A tool with a dozen functions. 26 inches long, weighs 6.5 pounds. P/N 12-12400

LOCOLOC HANDSWAGING TOOL

LocoLoc #1-3-SBHS Hand Swager - This tool is an outstanding small hand tool, and it does a great job of swaging small sleeves. This is a (4) cavity tool, swaging sleeve sizes 1/32", 3/64", 1/16", 3/32" and #12 SEISMIC.

Ratchet mechanism will not release until swage is complete. Swages copper and aluminum sleeves only. Usage instructions and swage gauge included in each tool. Each LOCOLOC Swager is supplied with a gauge. Application: Copper Oval Sleeves, Copper Oval Plated Sleeves and Aluminum Oval Sleeves P/N 12-00222

GO-NO GO SLEEVE GAUGE

When the proper slot in the gauge slips over the compressed area of the sleeve after swaging then your swage is satisfactory. If the proper slot does not fit over the compressed area of the sleeve after swaging then your tool is out of adjustment and your cable assembly will not hold the rated breaking strength of the cable which should be the result when oval sleeves are used to form a loop or eye in a cable assembly. GA-1P: Gauges all swages performed on 1/32", 3/64", 1/16", 3/32", 1/8", 5/32", and 3/16" oval and stop sleeves. P/N GA-1P

TENSITRON ACX-SERIES DIGITAL AIRCRAFT CABLE TENSION METER

* Indicate Cable Tensions in Lbs, KG, or Newtons.
* Small space access. One-hand operation. Memory storage features.
ACX Screen Callouts :Display shows tension, battery charge level, name of calibration selected, and stores and displays up to 5 separate tension readings and their average. * Large, easy to read backlit, graphic display with adjustable backlighting and contrast. * Select cable size from menu. Instrument automatically adjusts calibration to correct setting. * Accuracy is +/- 2% full-scale for all menu-selectable calibrations. Accuracy for custom calibrations is material specific. * Up to 10 calibrations can be entered into instrument. (All calibrations password protected to provide due diligence). * Adjustable LCD refresh rates allow for stable digital readings. * All models factory-calibrated and ready for use on aircraft. * Calibration values traceable to National Standards. Calibration certificate included.

SPECIALTY TOOLS - DEBURRING TOOLS

THE GRIPPER - ALL DIGITAL CABLE TENSIO METER

There are no extra parts to worry about. The Gripper can adapt to 5 Cable sizes 1/16, 3/32, 1/8, 5/32, and 3/16. From 5 to 150lb's. 1%-2% Accuracy. An instrument that will pay for it self quickly. The time savings compared to your current tool will amaze you. Electronically measured readings, assures accurate, reliable and repeatable measurements every time you use the "Gripper". The Gripper heads small size (1 1/8" square by 4 1/8" long) lets you access tight areas as it will go where other just will not go. It comes to you calibrated and ready for use. **Features:** • Unique Remote Head Fits in to tight areas • Backlit Controller for easy reading. **Specifications:** • Cable sizes: 1/16, 3/32, 1/8, 5/32, and 3/16. • From 5 to 150lb's • 1%-2% Accuracy
P/N 12-01722.....

DEBURRING TOOL

Utilizes a twist-of-the-wrist action for deburring holes and radii. Curved blade automatically follows all contours. Telescoping blade holder extends to reach deep internal holes. Supplied with one #10 and one #20 deburring blade.
P/N 12-00700.....

| Item | Description and Application | P/N | Price |
|--------------------------|--|----------|-------|
| #10 Deburring Blade | High-speed steel. For steel, aluminum & smaller holes | 12-00800 | . |
| #20 Deburring Blade | High-speed steel. For brass, Bronze, cast iron, larger holes. | 12-00900 | . |
| #40 Scraper Blade | High-speed steel. Small triangular blade. | 12-01000 | . |
| #42 Scraper Blade | High-speed steel. Large triangular blade. | 12-01100 | . |
| #48 Scraper Blade Holder | Holder has 10-32 threads. Accepts #40 & #42 blades. Extends to 3-1/2". | 12-01200 | . |
| #50 Scriber | Carbide-tipped scriber. | 12-01300 | . |
| #60 Deburring Blade | For backside deburring & for restricted positions | 12-01400 | . |
| #70 Deburring Blade | Carbide-tipped blade for deburring edges of sheet metal. | 12-01500 | . |

SPEEDY BURR

Speedy Burr is designed to take the fatigue out of deburring. The wrist support makes the job easier. This tool is great for deburring spars and extrusions. The light weight, aluminum, hand-grip formed frame is comfortable and helps to maintain continuity in angle and depth of deburr. The wrist support is rubber lined to prevent skin abrasion.
P/N 12-00650.....

SPEEDY BURR II

Speedy Burr II is designed for deburring outside corners, sheet metal, machined parts, extrusions, castings, and plastic parts. This lightweight easy grip tool has a durable plastic coating on the handle for comfort and a sure grip. The burring tip is made from hardened steel and is replaceable.
Speedy Burr II..... P/N 12-00651.....
Replacement Burr Tip..... P/N 12-00652.....

COMPASS FILLING AID

The compass filling aid is designed to be used for filling most standard aircraft compasses. The standpipe is simply attached to the compass with a supplied special rubber band. The compass is then filled and purged through the standpipe. When all air is removed, and the level in the standpipe is constant, the plug is then installed through the filled standpipe. Thus the need for submerging for proper filling is eliminated.
P/N 12-17604.....

TURNBUCKLE WRENCH CABLE RIGGING

This tool consists of two clamps joined by a 12" length of sprocket type (bicycle) chain. It will accommodate all sizes of aircraft cable. When clamped to cable and fittings at each side of the turnbuckle, anchor the cable to allow free adjustment of the turnbuckle. The adjustment becomes a two hand instead of three hand adjustment.
P/N 12-00833.....

CESSNA COWLING FASTENER DRIVER

Slotted type cowling fasteners are not easy to fit with generic common screwdrivers. To overcome this, driver has a broad hollow cut tip that accurately engages the drive slot. Additionally, a no mar, spring loaded, plastic sleeve simultaneously guides the tip by fitting around the outside diameter of the fastener head.
P/N 12-17615.....

CESSNA SEAT RAIL GAGE

Allows for quick limit checking of seat rail hole and wear dimensions Gage elements are made from heat treated blue tempered steel Each element is marked to correspond to the limits set forth in the relevant ad The three gage elements are linked together on a universal spiral key ring.
P/N 12-01056.....

PORTABLE STRUT / TIRE PUMP

This pump is constructed of aluminum and nylon. It's overall dimensions are 29.5" (750 mm) long, with a body of approximately 1" diameter and a "T" handle and base 8" (200 mm) long. It weighs 1.65 lb (.75 kg), has a nylon hose with 2000 P.S.I. burst pressure and a strut valve fitting on the end that doesn't depress the valve so that no pressure can escape from the strut. The pump is capable of pumping up to 650 P.S.I. without any compressed air required for the inlet, which is more than adequate for most light aircraft, e.g.: Piper Cherokee PA28-235 needs 450 P.S.I. for the main struts with the weight of the Aircraft on the strut. The pump can also be used as a tire pump as a backup. The main use for the strut pump is for the individual aircraft owner that operates from remote areas and don't have access to a compressor, however they are popular with maintenance organizations as well. The pump is small and light enough to fit in the luggage compartment and have with you all the time ready for that moment when your Oleo goes flat.
P/N 12-16714.....

enough to fit in the luggage compartment and have with you all the time ready for that moment when your Oleo goes flat.

HX STRUT PUMP

Boost air to 1000psi without an air compressor.

- Very portable. No air compressor needed!
- Use air bottle, spare tire, tire pump for source air.
- Can also use with air compressor for air source.
- Detailed instructions.
- Equipped with 7 foot hose

P/N 12-16710.....

15X STRUT PUMP

Boost air or nitrogen to 2250psi.

- More than enough pump for most aircraft.
- Built for shop use or for a discriminating do-it-yourselfer.
- Weighs less than 7 pounds.
- Equipped with a 36" hose.
- Comparable to pumps priced in the thousands.
- Nitrogen adapter makes it easy to use bottled nitrogen.

WORK LIGHTS - INSPECTION MIRRORS

CONDUCT-A LITE INSPECTION KIT

Kit consists of aluminum 2-cell holder, 1-cell holder for use in small areas, 6" straight Lucite conductor, 4" curved Lucite conductor for lighting around corners, 2-1/2" straight conductor for pin-point lighting, and clip on mirror which attaches to any of the Lucite conductors. When used with curved conductor it can virtually make light available around a corner in a full 360° arc. Operates on penlight batteries (not included). P/N 12-14900

FLUORESCENT WORK LITE

Lights a greater area than a 150 W bulb for 1/10 the electricity. Throws a glare-free light. Hold it or hang it. Cool, insulated, shatter-resistant. Does not get hot - safe to handle. For 110V AC. Furnished with 25-ft. yellow oil-resistant cord. P/N 12-00909

FLEXIBLE MICROLIGHTS

This Super-Bright Micro 360 Flexible LED Light is 10 times brighter than standard flashlights and lasts up to 100 hours on a single set of batteries! Features: •Stainless Steel • Lifetime Warranty • Focused lens power beam • Shock proof, water resistant and cold burning • LED-"Light-Emitting Diode" • White beam • 100 hours of light without a battery change • Diode-charge system • Easy on/off-switch • 6" in length • Batteries included. Micro Flex P/N 13-02846 Mega Flex P/N 13-02847

PILOT'S FLEX-LITE

This ingenious light puts a shadowless light beam wherever you want it. Stainless steel clip, visor, interior panel, shirt pocket, etc. and leaves your hands free. Flexible neck bends into nearly any position and stays there. Anodized aluminum construction with vinyl covered flexible cable. Body of light measures 5.5" with a 6" cable. Uses two AA batteries (not included). This light is the only light available with a precision ground optic lens for even light distribution. Available in a clear or red lensed model.

Clear.....P/N 12-00383 Red.....P/N 12-00521

HEADLIGHTS

The Brighteyes Pro Headlights is a hands-free flashlight worn like eyeglasses to provide light for reading maps, instruments, repair work, and more. Excellent for work on aircraft, automotive applications, around the house, camping, & fishing. Headlights can be used with or without eyeglasses, and the lights will swivel to direct the light where you need it. (4) AAA batteries included. P/N 12-00242

BEND-A-LIGHT

Bend-A-Light flexible brass-alloy high intensity light tools bend to any configuration and illuminate hard-to-reach areas where conventional lighting cannot go. The incredibly brilliant light beam penetrates anywhere! Bend-A-Light is a must for electronics, automotive, maintenance, repairs, locksmiths, industrial, hobbies, around the house and more. You bend it...and it holds! Bend-A-Light is the only complete line of professional quality high intensity flexible light tools. Available in 3 lengths and 3 different lamps to choose from. All Bend-A-Light models are made in USA and come with batteries installed.

INSPECTION SCOPES

VISUAL OPTICS VIDEO STICK

Visual Optics new video based inspection scope, the VS36-10WW, gives you the latest in remote video technology.

The Video Stik is for remote inspection of areas generally inaccessible to the naked eye. IT comes with a distal video camera at the end of a 36" shaft for internal inspection of engines, A/C systems, interior structures of walls, and other industrial and simi liar applications. Imaging and illumination is provided by a full color image sensor and dual solid state LEDs which are controlled by an on/off rocker switch. The 2.5" full color LCD screen allows the user to observe live video from the distal camera. The unit is powered by 4-AA batteries. The Video Stik is shipped with a protective case for storage. Accessory Mirror allows user to see 90 degrees to axis of the shaft. The Magnet accessory will pick

up approx 1/4 lb.

Features:

- High resolution remote color camera
- 2.5" full color viewing monitor
- 10mm shaft diameter
- Waterproof, Flexible shaft
- 36" standard shaft length
- High output LED illumination
- 5 hrs operation on 4-AA batteries (included)
- Mirror and Magnet accessories included
- Video Output for recording
- Poly pro storage case

Specifications:

- Shaft Length: 36" Water Resistant
- Distal Tip Dia: 0.42" Maximum
- W/ Accessories: 0.46 Maximum
- Viewing Angle: 55 Degrees
- Viewing Distance: 0.4" to Infinity
- Resolution: 320x240 pixels
- Viewing Monitor: Color 2.5" LCD
- Video output: RCA - NTSC signal
- Shaft Radius: 2.5" Minimum
- Power: Alkaline AA batteries (4)
- Battery Life: 4hours
- Storage Temp: -4F to 158F (-20 to +70)
- Operating Temp: 32F to 113F(0 to 45)
- Accessories: Mirror and Magnet
- Warranty: 1 Year

VT-FLUV & VT-FLED SERIES SCOPES

Features:

- Highly detailed imaging with 7400 pixels
- Compact Design
- Superior optics provide easier viewing
- Waterproof shaft
- Petroleum & Chemical Resistant
- Viewing range, 40 degree - 1/2 inch to infinity
- Highly affordable

VT-FLED SERIES - Visual Optics has engineered and manufactured the next step in the evolution of the fiber optic bore scope. Their creation of the VO FLED Series Fiber Scope has raised the bar in the areas of optical quality, image light output, shaft control and material tolerance. The VO Series Fiber Scope achieves industrial level quality at an affordable price.

| Model | Length | Diameter | Includes | Part No. | Price |
|------------|--------|----------|--|----------|-------|
| VT24-4FLED | 24" | 4mm | Inspection Scope, Battery, White LED Flashlight, Mirror, Magnet & Suitcase Style Carrying Case | 12-01739 | . |
| VT24-6FLED | 24" | 6mm | | 12-01740 | . |

VT-FLUV SERIES - All VT Series Scopes (4.3MM or 6MM) can now be purchased with LEAK DETENTION CAPABILITIES. Exchanging the White Light LED flashlight with a UV Flashlight does this. The UV Flashlight will Fluoresce Leak detection dyes. The Kits (referred to as - FLUV) come complete with both flashlights. The VO FLUV Series Fiber Scope has raised the bar in the areas of optical quality, image light output, shaft control and material tolerance.

VISUAL OPTICS - 10MM LED SERIES SCOPES

Visual Optics has engineered and manufactured the next step in the evolution of the fiber optic bore scope. Their creation of the VO LED Series Fiber Scope has raised the bar in the areas of optical quality, image light output, shaft control and material tolerance. The VO Series Fiber Scope achieves industrial level quality at an affordable price.

Features:

- High resolution image bundle
- High flex shaft material
- Strong / stable light source
- Briefcase style instrument case
- Highly detailed imaging with 7400 pixels
- High output LED lighting - 2 White LED's in tip
- No bulbs to change - Ever
- Superior optics provide easier viewing
- Spring Lok Design - Longer reach w/o drooping
- Waterproof shaft
- Industrial grade, 2 level light switch
- Viewing range, 40 degree - 1/2 inch to infinity
- Standard lengths 18, 24, 36 and 48 inch
- Replaceable halogen bulb in the handle
- Highly affordable

SPRAY SYSTEMS

GRACO HVLP SPRAY SYSTEMS

Virtually eliminates mist. Requires less maintenance. Blows less heat up the stack. Uses up to 50% less material. Delivers better pattern control. Reduces overspray up to 90%. Eliminates high-pressure "flop" and tiger stripes.

GTS-2500 HVLP SPRAYER - This lightweight, portable sprayer features the GTS-960 Bleeder Style Gun and offers outstanding performance in its equipment class. Easily spray stains, lacquers, oils, enamels and urethanes.

- Turbine Stages - 2
- Cup - 1 qt (1 liter)
- Weight: Complete - 32 lb
- Turbine Air Working Pressure - 5 psi (.345 bar, 34.5 kPa) max.

- Turbine Air Outlet Flow Rate - 58 cfm (1642 lpm) max.
- Gun - GTS-960 Bleeder Style with Fluid Set #3
- Standard Turbine Air Hose Length - Standard units incl. 20 ft (6 m). Use 40 ft (12 m) max.
- Electrical Rating - 7A at 120 VAC
- Power Cord - No. 16 AWG, 3 wire, 6 ft (1.8 m)
- Shipping 18 in. x 15-1/2 in. x 16 in.

* **The GTS-2500 is not designed for use with non-bleeder guns.**
P/N 12-15710.....

GTS-3800 HVLP SPRAYER - The GTS-3800 is highly productive for nearly all fine finish applications. Easily spray stains, lacquers, oils, enamels, urethanes and automotive finishes. Plus, it atomizes many water-based latex and acrylic coatings, multi-color and other higher viscosity coatings.

- Turbine Stages - 3
- Turbine Air Working Pressure - 6 psi (.414 bar, 41.4 kPa) max.

- Turbine Air Outlet Flow Rate - 80 cfm (2265 lpm) max.
- Gun - GTS-980 Non-Bleeder Style with Fluid Set #3
- Cup - 1 qt (1 liter)
- High-Flex Turbine Air Hose Length - Standard units incl. 30 ft (9 m). Use 60 ft (18 M) max.
- Power Cord - No. 16 AWG, 3 wire, 6 ft (1.8 m)
- Electrical Rating - 12A at 120 VAC
- Weight: Complete - 34 lb
- Dimensions: 18 in. x 15-1/2 in. x 16 in.

P/N 12-15780.....

GTS-4900 HVLP SPRAYER - Our most powerful and versatile sprayer offers everything you need on the job for high productivity. This unit is loaded with features and can spray the broadest range of materials.

- Turbine Stages - 4
- Weight: Complete - 39 lb
- Turbine Air Working Pressure - 8 psi (.552 bar, 55.2 kPa) max.
- Turbine Air Outlet Flow Rate - 82 cfm (2321 lpm) max.

- Gun - GTS-980 Non-Bleeder Style with Fluid Set #3, #4 and #5
- Cup - 1 qt (1 liter)
- High-Flex Turbine Air Hose w/Quick disconnects - Standard units include 30 ft (9 m). Use 60 ft (18 M) max.
- Power Cord - No. 12 AWG, 3 wire, 15 ft (4.6 m)
- Electrical Rating - 14A at 120 VAC

CITATION 240

PAINT SPRAYER/RESPIRATOR SYSTEM

The Citation HVLP 'twin turbine' system provides both a 'professional quality' paint spray system and the HobbyAir supplied-air respirator in one portable package. This system comes complete with everything you will need to spray exceptionally fine finishes with practically any material and to breathe in safety and comfort while you work. The basic system includes two 40' airlines (one for breathing and one for painting) and a half face mask. Available options include: A larger two-person Citation system with 3 airlines (two for breathing and one for spraying), Full face masks, and air-supplied hoods. This system comes with an unconditional 1-year warranty.

P/N 12-15900

Optional 4 ft. whip hose..... P/N 12-15910

CITATION INTAKE ADAPTER

The Intake Adapter allows the pump unit to be placed inside the shop area, keeping it out of the elements. With the adapter installed, the vent hose can be extended to a fresh air location up to 50 feet away, allowing the pump to draw in fresh air from a distant location. The caution is to place the pump in a location inside the shop that is at least 30 feet away from the actual spray area in which it will not come in contact with flammable material. For example, the pump should never be placed inside a paint booth. Adapter kit comes complete with the steel adapter itself, screws, weatherstrip, hose clamp, 50 feet of 4-inch hose and installation instructions.

P/N 12-15901

PRIMER PISTOL

Simple and cost effective way to apply small amounts of primer paint and liquid with minimal cleanup time. A valuable tool for aircraft builders. Requires empty film containers and 1/8" ID plastic tubing.

P/N 12-00686

SUNEX SX-10 TOUCH-UP GUN

Ideal for tight areas. Holds approximately one pint of paint.

P/N 12-01121

SUNEX SX-80B SPRAY GUN AND CUP

Ideal for heavy duty spraying, precision air cap and fluid nozzle, features vented lid, two fingered control for ease of operation, 1.3 mm fluid orifice, shipping weight (Lbs.) - 2.7

P/N 12-01712

AXIS HVLP PAINT SPRAYERS

The Axis series of paint sprayers is designed to take the guesswork out of choosing a spraying system which can be confusing for the homebuilder who is going to paint for the first time. Rather than offer a wide variety of sprayers, Axis has selected the best turbine for each type of product normally used to finish an airplane. This is the SP 2003 (three stage turbine) which is furnished with 30 feet of air delivery hose and the Lexair spray gun.

Select one of the three systems shown below based on type of material you will be spraying. If waterborne materials are going to be used, we can furnish systems for this process on a special order basis.

- Sys. 1 to paint aircraft covered in fabric.....P/N 12-15920
- Sys. 2, to paint composite structure.....P/N 12-15930
- Sys. 3, to paint over metal or woodP/N 12-15940

BINKS MACH 1 HVLP

The Binks Mach 1 HVLP is a siphon-fed refinishing system that performs like your favorite conventional outfit but produces far superior transfer efficiency. A unique arrangement of air nozzle, fluid nozzle, and needle enable the Mach 1 to draw material from a standard siphon feed cup and avoid the need for a pressure cup. Eliminates the need for the operator to set fluid pressures. Delivers lower emissions for compliance with environmental regulations.

BINKS MODEL 95 SIGNATURE SERIES SPRAY GUN

Model 95 spray gun employs the best features of Binks' most popular conventional air spray guns. This gun delivers higher quality finish, faster production, less operator fatigue, greater fluid compatibility, and more application versatility than any spray gun currently available. Model 95 is a high production gun with stainless steel fluid passages which may be used with most coatings. This new gun replaces Models 18, 62, and BBR spray guns, incorporating the best features of all 3: drop-forged anodized aluminum body, stainless steel fluid passages, adjustable floating needle valve, hardened steel or stainless steel fluid nozzle, plated drop-forged bronze self-centering air nozzle, brass air valve cartridge, adjustable spray pattern, 3/8" NPS (m) fluid inlet, 1/4" NPS (m) air inlet. Weight 1 lb., 11 oz.

THE BEUGLER STRIPER PROFESSIONAL PINSTRIPING TOOL

The Beugler tool makes accurate lines consistently, without gravity or pressure, eliminating the need for tape. The unique serrated wheel and wheel head design are the secret to the stripers' success.

Ideal for any art project, the Beugler Striper is a professional tool used by auto, truck and motorcycle painters around the world. Beugler's magnetic guide securely holds to any steel surface, allowing the stripers' guide arm to slide smoothly along its recessed groove for long, accurate, straight, or arced lines. To ensure customer satisfaction, Beugler also offers a 40 minute video tape or DVD with instructions, tips and demonstrations. The Beugler Striper works well with any "creamy" consistency paint. You can stripe at any angle, as the tool is not gravity fed. Both Professional and Deluxe Kits are of the same quality and include guides, clean up brush, 2/3 oz. paint barrel (which stripes 250 to 1750 feet, depending on stripe size) and complete instructions. Length 4-1/4", O.D. 3/4".

- * Precision machined nozzle and fluid cap
- * Suitable for graphic artwork

Contains: 1 - Airbrush, 1 - Hose, 1- Wrench 1 - Jar Adapter, 1 - 5 cc. Paint cup Fluid nozzles - 1 of 0.3, 0.5, 0.7mm 2 - 22cc glass jar, 1 - 50 cc glass jar
P/N 12-02218

AB1117C - Double action trigger for air-paint control, precision machined nozzles -air and fluid, suitable for graphic artwork. 0.5 bottom feed with glass jar
P/N 12-02219

AOM MINI AIR BRUSH COMPRESSOR

AC18 1/8 HP Mini air brush compressor (Piston Type) with filter, micro switch and 10' retractable air hose (Airbrush Not Included)
P/N 12-02221

AOM 2 QT PRESSURE POT OUTFIT

RP-XX - 2 Qt. pressure pot outfit includes an R100 mini gun, 2 qt. pressure pot with regulator and 6' air and fluid hose with fittings. This outfit is especially designed to spray in hard to reach areas. Suitable for both water and solvent base material.
P/N 12-02186

P/N 12-02186

75-11187WB - 2 Qt. pressure pot outfit includes an 878WB mini gun, 2 qt. pressure pot with regulator, 5' air hose with fittings, 5' clear fluid hose with SS fittings, adapter and SS elbow. Other tip sizes available 0.8, 1.2 and 1.5
P/N 12-02188

KIT-R - Retrofit kit consists of adapter, SS elbow, 5' air hose with fittings and 5' clear fluid hose with SS fittings
P/N 12-02189

P/N 12-02188

75-112 - 2 Qt Gasket
P/N 12-02187

AOM 2-1/2 GAL PRESSURE POT OUTFITS

65-9121305-1.4 - 2 1/2 Gallon pressure pot outfit includes a 2 1/2 gallon pressure pot dual regulated, X series spray gun (available in 1.3, 1.4, 1.5, 1.8, 2.0) and 25' 1/4" air and fluid hose with fittings. This outfit is perfect for small to medium production facilities. Suitable for glues, lacquers, stains, water based and solvent based materials. OPTIONAL: 5/16" air hose and 3/8" fluid hose available on request at an additional cost.
P/N 12-02191

65-914 GASKET P/N 12-02119

AOM PRESSURE TANKS 2 QT. REMOTE

75-111 - 2 qt remote pressure tank, single regulator, safety relief valve, handle, lightweight, SS pick up tube, Screw type top. Dual regulated available.
P/N 12-02111

75-111S - Large Mouth 2 qt. remote pressure tank, teflon coated inside, single regulator, safety relief valve, handle, lightweight, screw type top. Dual regulated available.
P/N 12-02112

75-111 - Replacement gasket for 2 qt remote pressure tank
P/N 12-02113

65-424/1 - Replacement gasket for 2 qt large mouth remote pressure tank
P/N 12-02114

75-111SS - 2 qt all stainless steel remote pressure tank, single regulator, safety relief valve, handle, lightweight, screw type top.
P/N 12-02115

75-112SS - Replacement gasket for 2 qt all stainless steel remote pressure tank
P/N 12-02116

AOM PRESSURE 2-1/2 GALLON TANKS

65-911 - 2-1/2 gal. pressure tank, single regulator, Teflon coated inside and outside Safety relief valve, pick-up tube with filter, wide lid and low side walls, large wheels for easy movement. P/N 12-02117

65-912 - Same as above with dual regulators
P/N 12-02118

65-914 - Replacement gasket for 2 1/2 gal. tank
P/N 12-02119

AT2.5ASS - 2.5 gal pressure tank, air agitator, stainless steel inner liner, dual regulators, stainless steel fitted.
P/N 12-02120

65-0097 - Complete regulator assembly for 2 1/2 gal tank
P/N 12-02121

65-0098 - Complete second regulator assembly for 2 1/2 gal tank only
P/N 12-02122

65-0099 - Double regulator assembly for 2 1/2 gal tank
P/N 12-02123

AOM ACCESSORIES
AOM AIR BRUSH HOSE MCR011 - 10' Air brush hose 1/4" F X 1/8" F
P/N 12-02220

AOM GUN HOLDER RP 8413 - Gravity gun holder
P/N 12-02216

AOM DISPOSABLE LINERS - Disposable Liner round bottom fits # 65-911 & # 65-912 (10pk)
P/N 12-02124

Disposable Liner flat bottom fits # AT2.5ASS tank (12pk)
P/N 12-02125

Disposable Liner round bottom fits #65-911 & #65-912 (Same as 65-913-12 but is a pack of 60)
P/N 12-02126

Disposable Liner round bottom fits 5 gal pressure tanks (24pk)
P/N 12-02127

2 1/2 & 5 gal. bag tank liners 4 mil. (10 pk)
P/N 12-02128

Disposable Liner for 10 gal. pressure tanks (10 pk)
P/N 12-02129

AOM HARD CUP KITS - Can be mounted on any AOM spray gun.

DC 195-12 - Kit contains 12 Soft Liners, 12 Rings, 12 Lids w/Filters, 12 Caps, 1 Hard Cup and 1 Adapter
P/N 12-02203

DC 195-12 - Kit contains 12 Soft Liners, 12 Rings, 12 Lids w/Filters, 12 Caps (Used with DC 191 Hard Cup)
P/N 12-02204

DC 190-48 - Kit contains 48 Soft Liners, 48 Rings, 48 Lids w/Filters, 48 Caps (Used with DC 191 Hard Cup)
P/N 12-02205

DC 191 - Hard Cup (750 ml capacity)
P/N 12-02206

DC 192 - Adapter used with all AOM gravity guns (except Mini gun)
P/N 12-02207

DC 193 - Adapter used with all AOM pressure guns
P/N 12-02208

DC 194 - Shaker Cap
P/N 12-02210

SPRAY GUN ACCESSORIES
68-9637 - Air regulator w/gauge, 1/4" F swivel connection & 1/4" M NPS connection P/N 12-02213

68-9638 - Mini air regulator w/gauge, 1/4" F swivel connection & 1/4" M NPS connection
P/N 12-02214

61-2031 - Air adjustment Valve
P/N 12-02215

AOM QUICK COUPLERS -
41106 - 1/4" Brass Male thread P/N 12-02196

41156 - 1/4" Brass Female thread
P/N 12-02197

AOM QUICK CONNECTORS -
42200 - 1/4" Brass High Flow male P/N 12-02198

45600 - 1/4" Brass Std. flow male P/N 12-02199

42300 - 1/4" Brass High Flow female P/N 12-02201

45700 - 1/4" Brass Std. flow female P/N 12-02202

AOM MAINTENANCE KIT - Spray gun maintenance kit includes 12 special steel cleaning needles. Perfect for removing dry paint particles from air cap and nozzle as well as all difficult to reach gun parts.
P/N 12-02107

AOM SPRAY GUN LUBE 811-12 - Spray gun lube 12 pcs/Counter Display Box
P/N 12-02211

AOM 18 PC SPRAY GUN CLEANING KIT KK118 - 1 - Extra long 12" Pick-up Tube Brush 1 - 1/4" HVLP Brush 1 - 1/2" Body Cavity Brush 1 - Detail End Brush 2 - Nylon - Bristol Parts Brush 5 - Miniature Brush Set 6 - Precision Needle Set 1 - O-ring Removal Tool

TIG TORCHES - TIG WELDERS - WELDING CARTS

ASK MISTER TIG DVD

Learn how to tig weld with the best!! Mister Tig (Wyatt Swaim-30 years of aerospace welding experience) will teach you the fundamentals and launch your tig welding training. This 34 minute DVD will teach you the proper torch angle, tungsten preparation, tungsten stick-out, and the proper "dabbing" of the filler rod technique. This instructional DVD will help you set up your machine for the correct procedures including aluminum (alternating current), and 4130-cro-mo (DC-).

Mister TIG The DVD is also packed with tig information and is designed for the beginner tig operator and will even help the intermediate operator.

P/N 13-05751

TIG CALCULATOR

Just tell it what material you're welding, the thickness, and type of weld (butt, lap, etc.), and it will give you information concerning your weld such as travel speed, number of passes needed, tungsten type and size, what amperage to run, and speed of welding. Slide rule style.

P/N 12-00444

TIG TORCHES & REPLACEMENT CABLES

PTA-9F - Air-cooled TIG torch, rated 125 amps at 60% duty cycle. Includes a 12-1/2 foot Superflex Cable. Equipped with a flexible head for easy maneuverability into tight places.

P/N 12-00391

REPLACEMENT CABLE - 12-1/2 foot Superflex replacement cable for the PTA-9F

P/N 12-00399

PTA-17H - Air-cooled TIG torch, rated 250 amps at 60% duty cycle, heavy duty. Equipped with a 12-1/2 foot Superflex Cable

P/N 12-00392

REPLACEMENT CABLE - 12-1/2 foot Superflex replacement cable for the PTA-17H

P/N 12-00401

TIG TORCH ACCESSORY KITS

9GL KIT - TigDepot Parts Kits provide all the torch accessories you need to start welding. Parts Kits provide collets, collet bodies, a back cap, alumina nozzles and tungstens in a variety of sizes, all packaged in an easy to carry reclosable box.

The 9GL-Kit comes with .040, 1/16, 3/32 Collets, Gas Lens Collet Bodies, Gas Lens Nozzles, (#5, #6, #7), a long Back Cap, and an assortment of 2% Thoriated and Ceriated Tungsten in a convenient plastic box. For the 9 Series torches

P/N 12-00393

17H-GL KIT - The TigDepot 17H Gas Lens Kit is made specifically for the 210 Amp 17H Torch.

The Kit includes One of each:

- 2% Thoriated Tungsten .040, 1/16, 3/32 DIA.
- Alumina cups #5,6,7
- Gas lens .040, 1/16, 3/32
- Collets .040, 1/16, 3/32
- Backcaps-short, medium, long
- Insulator
- Tool box

PN 12-00394

TIG BUZZ BOX KIT

TIG weld Aluminum, Stainless Steel, Chrome Moly, and many other metals. Plug it directly into your standard household outlet (110 volts, 15amps). **Kit includes:** • CK9 Rigid Torch w/ Valve and 12.5' one piece cable with male dinse connector. • Flowmeter Regulator •

Adapter Plug with 1' extension cord • Female Dinse to allow you to go back and forth to stick welding. • AK-4 Accessories Kit • AMP Conversion Decal • Instruction Manual

P/N 12-00389.....

TIG WELDERS / WELDING EQUIPMENT

INVERTEC V155-S TIG READY-PAK - Weighing in at just under 15 lbs. (6.8 kg) it is no lightweight contender. It packs the full punch of a heavyweight professional that you can take to the most demanding jobs. With 120/230V auto reconnect operation, it can operate from a portable generator. It can also plug into a 200 foot (61 m) 230V extension cord (not included) so you can weld just about anywhere. The Dent resistant case is IP23 rated for outdoor use. P/N 12-01978

PRECISION TIG 225 READY PAC - Unit Includes: Precision TIG 225, Torch Parts Storage Compartment, Torch Hanger, 10 ft. Work Cable and Clamp, Removable Lift Eye, 9 ft. Input Power Cord, NEMA 6-50P Plug, NEMA 6-50R Receptacle, TIG Procedure Guide, GTAW (TIG) Handbook, PTA-17 Pro-Torch TIG Torch (12.5 ft., 1-piece), Gas Regulator with Hose, and Foot Amptrol® (K870). Shipped fully assembled. Shielding gas sold separately.....P/N 12-01634

TIG 225 With Understorage Cart.....P/N 12-01635

POWER MIG 140C - Power MIG® 140C (K2471-1)with continuous voltage control for more critical projects where precise adjustment is required. Diamond Core Technology™ and the rugged drive system aid arc performance for MIG welding on thin gauge steel, stainless and aluminum. Or, use gas-less flux-cored welding for deep penetration on thicker steel, even outdoors! With a wide 30-140 amp welding output range it is the highest output in 120 volt input power welder class. MIG weld 24 gauge up to 10 gauge (.135") sheet metal in a single pass. Includes: • Magnum 100L welding gun (K530-6) • Six spare contact tips • Gas and gasless nozzles • Work cable and work clamp • Adjustable gas regulator and hose •.025 and .035 smooth drive rolls •.030-.045 knurled drive roll •.025-.035 wire guide • 2 lb. spool .025" Super Arc® L-56 wire • 1 lb. spool .035" Innershield® NR-211-MP self-shielded flux-cored wire • 8" spool spindle adapter • How to Use DVD.

PRO-CUT 25 PLASMA CUTTER - The Pro-Cut 25 combines the next generation of plasma technology and enough power to easily cut 3/8" mild steel in a package that weighs only 29.5 lbs. (13.4 kg). The power source automatically reconnects between 115V or 230V for easy set-up. This further extends the flexibility of this plasma unit. Easy to use with its back lit LED status lights, 15 ft. plasma torch, and integral air controls.

P/N 12-00783

V205-T AC/DC INVERTEC - For TIG and Stick Welding. Ideal for critical AC or DC TIG Welding applications. Variable AC frequency allows you to focus the arc when precise arc control is required. The 115/230V auto-reconnect makes the V205-T AC/DC truly flexible. The unit comes with a 10 ft. 230V input cord and plug; a Twist-Mate Torch Adapter for 9 and 17 Series one piece torches; Twist-Mate adapter for work cable; and adjustable shoulder strap. This full featured TIG Welder is also capable of Stick Welding. P/N 12-00384

One-Pak™ Package Includes: V205-T Foot Amptrol (K870) and TIG-Mate 17 Starter Kit. Assembly required. P/N 12-00776

WELDING CARTS

These Welding carts are for the Invertec V-155, Invertec V-205T AC/DC, Procut 25 Plasma Cutter, and Power MIG 140C.

K520 WELDING CART - (150 cu.ft. bottle capacity) Accommodates power source, gas cylinder, tools and welding accessories. Includes adjustable handle, front casters, and rear wheels. Dimensions (HxWxD): 30 (min.)/34 (max.) x 18 x 35 inches. Physical specifications: Weight:38 lbs. (17.2 kgs.) Dimensions (in) H x W x D : 34 x 18 x 35 Dimensions (mm) H x W x D : 864 x 457 x 889 P/N 12-00773.....

K2275-1 WELDING CART - (80 cu.ft. bottle capacity) Full-featured cart is designed to store and transport a welder, 80 cubic foot gas cylinder, welding cables and accessories. Includes an angled top shelf for easy access to welder controls, a lower tray for added storage space, a sturdy handle and a convenient cable wrap hanger. Replaces K520. Physical specifications: Weight:24.75 lbs. (11.2 kgs.) P/N 12-00777.....

HENROB 2000 IV WELDING TORCH

The revolutionary design of the Henrob 2000 Torch makes it the ideal welding torch for aircraft construction. The Henrob 2000 allows less oxidation, minimal flux, reduced pressures and substantial materials savings. Fewer tips are required and hose fatigue is lessened. Perfect for steel and aluminum welding and cutting. Highly recommended by many aircraft builders. Formerly known as the Dillon Mark III.

P/N 12-16000

PORTASOL CORDLESS

BUTANE SOLDERING TOOL KIT

Contains four different tools. Simple tip/accessory installation allows you to convert into a soldering iron, blow torch, hot blower or hot knife within seconds. Ideal for aircraft, automotive, marine and home use. The hot knife will quickly cut and seal

repairs on dacron, mylar and nylon. The soldering iron is ideal for working on electronics and avionics. Portasol is lightweight and fits easily in a tool box. Features cordless, go-anywhere versatility, 90 minute continuous use capacity, refills in 20 seconds with standard butane lighter fuel, and full 2 year warranty. Kit includes Portasol soldering tool with 2.4 MM tip, hot knife, blow torch, hot blower, cleaning sponge, safety stand and rugged plastic storage case.

BULLDOG RED WELDING DAMAGE CONTROL CLOTH

-  This heavy duty red cloth is made from .015" thick fiberglass with a Hypercote finish. It resists abrasion and liquids, cuts without fraying, is electrically non-conductive and chemical resistant, and drapes easily. P/N 12-19500/lineal yd.

SILVER PENCILS

-  The best way to mark tubing. Will not corrode tubing and shows up well on greasy tubing. May be used to mark exhaust system without lead cracking P/N 12-05190

ECONOMY PORTABLE SAND BLASTING SYSTEM

A new portable blasting system for cleaning and surface preparation of metal, plastic, fiberglass or wood. Ideal for graffiti removal from brick or stone surfaces. Dee-Blast system consists of an abrasive hopper 20-1/2" high and 9-1/2" diameter molded PVC drum with tight fitting top to keep abrasive media clean. Hopper holds up to 65 lbs. of media. It has a 10 ft. long rubber hose, a full-length face shield and a trigger-operated blasting gun that completely mixes air and media to produce a uniform spray pattern. P/N 130

PORT-A-BLAST SANDBLASTER

The Port-A-Blast sand blast unit is the perfect tool for anyone who owns or flies an airplane. For removing paint and corrosion, cleaning spark plugs and even liquid blasting to clean your engine and parts. Its small compact design allows you to get into tight areas. Fill the container with an abrasive material and its ready to go to work. It will operate on as low as 60 psi. However, for best results, pressures of 100-500 psi are recommended. The higher

the pressure the faster the cutting will be. Port-A-Blast handles all types of abrasive, ranging from Silica Sand for average work to Nutshells for cleaning and polishing hard surfaces without scratching. For larger jobs you are also able to attach a siphon hose, and pull directly from a bucket. This is a versatile tool that every airplane enthusiast shouldn't be without. We now offer a kit for the enthusiast who's not quite sure which type of blast media the should use. The kit includes a Port-A-Blast gun and 4 media types: Glass Bead, Steel Shot, Nutshell, and Slag. We have also included a brief explanation of each media type and where it should be used.

- Replacement Ceramic nozzle P/N 12-00493

DELUXE PORTABLE PRESSURE BLAST SYSTEMS

Model 1000

These Portable Pressure Blasters are designed to make the most efficient use of your air and abrasive supply. These are not inexpensive siphon units. The entire tank is filled with air and sand under pressure. When the nozzle and valve is opened the sand/air mixture is released under tremendous pressure to quickly remove paint, rust, scale and other coatings. These units are 3-5 times faster to use than siphon units. All units arrive complete with air gauge, pressure vessel, sandblast hood, and sandblast hose. Simply fill with abrasive and attach to your air supply and you are ready to begin blasting. Order by Part no.

ABRASIVES - Black Beauty: Economical, fast cutting abrasive. For quick removal of paint and rust. 80# bag. P/N 12-20740.....

CENTURION TEAR-N-WEAR PROTECTIVE LENS COVERS

Each AOSAFETY Centurion® goggle TEAR-N-WEAR replacement lens protectors stack contains seven layers of high quality optically clear film. When the outer layer is soiled, scratched, or difficult to see through, simply "tear" the soiled layer off by pulling the tab horizontally from right to left. You now have clean and clear vision again and the next tab is automatically ready for your next tear away.

LANDING GEAR SAFETY STAND

The "Landing Gear Safety Stand" is a must! Anyone that has ever seen a plane slip off a jack knows! The stand slips on over the axle when ever the wheel is removed. Put the nut back on and the plane can't slip off the stand. It adjusts for height with a quick release pin. The

wide, stable "H" base is made from heavy gauge square steel tubing for strength, safety and durability. The unique stand is finished in an attractive, bright red powder coat finish. LGSS-2, has a 12" x 12" base with adjustable axle height of 10"-15", and LGSS-3 has an 18" x 18" base with adjustable height of 14"-21.5".

STRUT SERVICE TOOL

Service Strut in your Sunday Suit.

- Clean way to service struts.
- Strut valve core is NOT removed.
- Hose fitting releases pressure & fluid into the bottle.
- Raise & lower strut a few times, then apply the charge.

P/N 12-16792

PRO SERIES STRUT SERVICE TOOL

The Pro Series Strut Service Tool has all the great attributes of the original Strut Service Tool, with the addition of a dual tank and dual check valve design. The longer service hose makes it easy to attach. Strut pressure, fluid and foam is captured in one tank. Clean, foam-free fluid is drawn back into the strut from the second tank. Simplicity, cleanliness and less waste make this tool a must-have. The strut valve core is not removed. P/N 12-00677

AT508K CANNON CONNECTOR PLIERS

The AT508K features serrated jaws for improved gripping and a slip joint for improved leverage. Ideal for all common cannon connector applications. P/N AT508K

PRECISION AIRCRAFT SCALES FOR ACCURATE WEIGHT & BALANCE

Checks aircraft weight and balance after modifications or fitting of new accessories. Flight safety is improved by periodic weighing to verify weight and balance is within limits. Simply roll the aircraft up the ramps onto the scales or jack the wheels and slide the pads under tires. A single high performance strain gauge load cell is

in each pad. Temperature compensation prevents zero shift or sensitivity changes. Weighing pads, indicator and cables are color coded for easy match up. Include one 3 channel indicator, three colored cables, one 110V battery charger cable, three ramps, and six tire stops. Also includes a case.

TIRE BEAD BREAKER

Once the tire & wheel have been removed from the airplane, the air is let out of the tire. The "Tire Bead Breaker" is used to break the bead or bond between tire and wheel. The "TBB" let you safely break this bead almost without effort & with-out doing damage to the expensive cast wheels. One broken wheel half can easily cost more than the "Tire Bead Breaker"!

The "Tire Bead Breaker" adjusts to fit tires as small as tailwheel tires and as large as those tires found on large, corporate cabin planes. Can be used on both tube and tubeless tires.

P/N 12-16790

TIRE BEAD BREAKER

The universal design of this tire bead breaker accommodate tube type and tubeless tires. It is easily adjustable for a wide range of tire sizes up to as large as tires for Twin Beech and Aero Commanders. Features all steel construction. P/N 13-02360

ACCUGAGE PROFESSIONAL TIRE GAUGE

This very accurate bourdon tube tire gauge offers precision pressure control and a rugged steel case with rubber shock-absorbing cover. It comes complete with a 12" long flexible braided hose, a bleeder valve, and stop hand. It is easy to read the pressure on this 2" gauge with 1" psi markings and 60 lb. range. Excellent for use on aircraft tires as well as cars and trucks.

P/N 13-00437

TIRE PRESSURE MONITOR SYSTEM

Southern Precision Components Inc. is introducing a Wireless Tire Pressure/Temperature LCD Monitor (TPMS). With the flip of a switch, this battery operated, hand held unit, displays the actual tire pressure and tire temperature.

Small removable electronic valve sensors transmit pressure/temperature to the LCD monitor within 25-50 feet of the aircraft. The sensors can be easily removed when adding air to the tires, and when placing the sensors back on the valve stems, will send the new pressure readings to the LCD monitor. Pressure can be read as PSI, KPA, BAR, or KG/CM squared. Temperature can be read in Centigrade or Fahrenheit. The monitor also has an alarm setting for high or low pressure. The battery has an average life of two years. P/N 05-04367

RUGGLES AIRCRAFT SCALES

Ruggles Scales make it easy and affordable for you to compute weight and balance on your own aircraft any time and any place. They are small and easy to transport. With their drive on capability, there is no need to jack up each wheel to slide scales in place. Ruggles Scales

use the principle of a fulcrum and a very long lever. So simple, the only tool you will need is a screwdriver for calibration. Sturdily constructed of cadmium plated steel and precision engineered for accuracy. Complete instructions are included with scales. Not certified. Capacity is 3600 lbs. (1200 lbs. per wheel). Scale can be set to either 2:1 or 4:1 ratio. Tricycle gear set includes 3 arms and 3 scales. Taildragger set includes 2 arms and 3 scales.

AJS2 DELUXE JACK SET

Includes one complete AJS Jack system (describes above) plus one A-5 Jack with AT-1 tube, one AT-28 tube, and one ATC-4 cap. A very popular Jack system for general aviation maintenance.

P/N 12-01378

JACK PADS

Jack pads provide a cradle for the main landing gear legs. The cradle design securely holds the landing gear providing a safe jack point. The adjustable jack pad fits flat spring gear. The round gear jack pad fits the models listed below. • Save time when servicing tires, wheel bearings and brakes • Lift only the wheel instead of the whole aircraft • Eliminate the unsafe practice of stacking wood blocks under a bottle jack • All parts pack away neatly into a sturdy weather resistant toolbox • Made in USA

FLAT PIVOT POINT ADJUSTABLE JACK PAD - * Adjust width, taper and angle adjustment. * Adapts to many jacks. Shown with bottle jack. * Fits: Cessna C-120, 140, 150, 170, 172, 175, 180, 185, 182, 188, 190, 195, 205, 206, 336, 337, flat gear 177RG, Piper Tomahawk, Beech Skipper, Champion, Bellanca, and similar spring steel landing gear. P/N 12-00837

ROUND JACK PAD ADJ-R - Jack pads provide a cradle for the main landing gear legs. The ADJ-R has a half round design cradles the landing gear safely. Pivots on a machined bottle jack extension. Use with Cessna C-172RG, 177RG, 182RG, 210, T210, P210, and similar landing gear P/N 12-00679

C300 JACK PAD ADJ-300 - * Cessna 300, 400 & 500 series * Perfect for the Conquest & Citation. * Sold in Singles. P/N 12-00683

JACK EXTENSIONS

* Bottle Jack Extensions will fit any 1-1/4" O.D. ram. * Typical 6 ton jack has a 1-1/4" O.D. ram. * Extensions are machined & slide together for easy stacking. * Use on aircraft with a jack point pin. * Not the same extensions as found in the Aero Jack Kit below. * No special jack pad needed on tubular C-152, 172, 182 etc.

RV JACK STAND KIT

Someday you'll need to jack up your aircraft to install new tires, clean & grease wheel bearings, or fix a flat. This nifty jack stand is safer than using an engine hoist or the wing tie down location. Requires a modification to the axle nuts (about 1 hour). Kit includes the axle jack arm, axle nut modification hardware, & directions to modify the nuts. For hollow axles (Wittman style) Gear only. Uses automotive bottle jack. Jack not included. Not for RV-8s. For RV Gear Legs with Hole in Axle.
P/N 12-00634

PROP SLING, (BOGI-LIFT)

- The tool every mechanic needs!
- * Lift nose wheel without jacking up whole plane.
 - * Service nose wheel & strut effortlessly.
 - * Support a new propeller during installation.
 - * Use with 2 and 3 blade props.
 - * 4-point stability with tail & wing jacks.

AIRCRAFT JACKS

THREE TON HYDRAULIC AIRCRAFT JACKS

MODEL #324 3 TON LOW WING JACK - Eliminates the frustration of having unstable jacks that conflict with landing gear components and gear doors adjacent to your jack point. These jacks are especially appreciated by owners of Bonanza, Mooney, Comanche, & Twin Comanche Aircraft for the manner in which they may be positioned clear of the inner gear door hinge. Model #324 provides an easy slide under fit on aircraft with lower jack points. • **DOUBLE ACTION 3 TON (6,000lbs) HYDRAULIC CYLINDER** • **JACK POINT CENTERING CAP** • **LOCKING SAFETY COLLAR SECURES THE LOAD** • **RUGGED HEAVY GAUGE STEEL CONSTRUCTION** • **STABLE THREE LEG DESIGN CLEARS GEAR DOORS** • **CONVENIENT HANDLE STORAGE** Effective Range: 24"-40" Ram Capacity: 6000lbs P/N 12-01724.....

MODEL #326 3 TON LOW WING JACK - 26" - 43" Eliminates the frustration of having unstable jacks that conflict with landing gear components and gear doors adjacent to your jack point. Owners of Beechcraft Bonanza 33/35/36 aircraft especially appreciate these jacks for the manner in which they may be positioned clear of the inner gear door hinge. If the only plane you'll be lifting is the Bonanza... please see Model #324. • **JACK POINT CENTERING CAP TO ASSURE THE AIRCRAFT STAYS ON THE JACK** • **DOUBLE ACTION 3 TON (6,000 lb) HYDRAULIC CYLINDER** • **LOCKING SAFETY COLLAR SECURES THE LOAD** • **RUGGED HEAVY GAUGE STEEL CONSTRUCTION** • **THREE LEG DESIGN CLEARS GEAR DOORS** • **CONVENIENT HANDLE STORAGE** Effective Range: 26"-43" Ram Capacity: 6000lbs P/N 13-05544.....

MODEL #332 3 TON LOW WING JACK - 26" - 43" & 32" - 49" Especially suited for use on Cessna 310/320 Aircraft. Supplied with a removable 6" riser to accommodate the higher jack points found on some aircrafts. Similar in design to Model #326, this unique design allows the Model #332 to be easily converted for use as a Model #326 by removing the 6" riser. Owners report this versatility to be of great benefit when aircraft of various types are housed together or the jacks are loaned out to others. • **DOUBLE ACTION 3 TON (6,000 lb) HYDRAULIC CYLINDER** • **JACK POINT CENTERING CAP TO ASSURE THE AIRCRAFT STAYS ON THE JACK** • **6" RISER PROVIDED TO ACCOMMODATE HIGHER JACK POINTS** • **EFFECTIVE RANGE 26"-43" & 32"-49"** • **LOCKING SAFETY COLLAR SECURES THE LOAD** • **RUGGED HEAVY GAUGE STEEL CONSTRUCTION** • **THREE LEG DESIGN CLEARS GEAR DOORS** • **CONVENIENT HANDLE STORAGE** Effective Range: 26"-43" & 32" - 49" Ram Capacity: 6000lbs P/N 12-01725.....

THE ULTIMATE WHEEL LIFT FOR RV AIRCRAFT

- Mounts in back of the wheel on the axle
- Requires no hoist or bottle jack.
- No blocking required after wheel is removed - completely free standing.
- Wheel will come off and go back on with no changes or other equipment.

- Wheel is raised with rotation of hand crank - positive movement with full control.
- Total weight 4 lbs.
- Lays flat for storage in aircraft compartment.
- Will fit either right or left main wheels.

Note - will not fit on RV8 flat axles

P/N 12-01751.....

EIGHT TON HYDRAULIC AIRCRAFT JACKS

MODEL #838W 8 TON UNIVERSAL JACK - 26"-43", 32"-49", 38"-55" When the need is for a versatile jack that can accommodate the needs of a busy FBO, the Model #838W is the choice. Model #838W provides all the strength and versatility needed to accommodate larger aircraft. This unique design allows the Model #838W to easily convert from a 26" low wing jack to a 32" or 38" jack, avoiding the high cost of having to purchase model specific jacks. Now with "Tilt & Go" wheels and convenient handle storage for greater value • **DOUBLE ACTION 8 TON (16,000LB) HYDRAULIC CYLINDER** • **HIGHLY VERSATILE- SHIPPED WITH ADAPTERS FOR 26" 32" & 38" HEIGHTS** • **JACK POINT CENTERING CAP TO ASSURE THE AIRCRAFT STAYS ON THE JACK** • **LOCKING SAFETY COLLAR SECURES THE LOAD** • **STABRUGGED HEAVY GAUGE STEEL CONSTRUCTION** • **THREE LEG DESIGN CLEARS GEAR DOORS** • **"TILT & GO WHEELS FOR GREATER MOBILITY** • **CONVENIENT HANDLE STORAGE** Height Range 26"-43", 32"-49" & 38"-55" Ram Capacity: 16,000 lbs. P/N 12-01726.....

MODEL #868W 8 TON UNIVERSAL JACK - The ULTIMATE in versatile heavy duty general aviation jacks. When the need is for a versatile jack that can accommodate the needs of a busy FBO, the Model #868W is the choice. The Model #868W combines all the strength and versatility of Model #838W with the necessary fittings to accommodate High Wing Cessna Aircraft such as 172RG, 177RG, 182RG, 210 and 337. Shipped with adapters, our unique design allows the Model #868W to easily convert from a 26" low wing jack through the 32" and 38" levels to a 68" high wing jack, avoiding the high cost of having to purchase model specific jacks. • **DOUBLE ACTION 8 TON (16,000 LBS.) HYDRAULIC CYLINDER** • **HIGHLY VERSATILE- SHIPPED WITH ADAPTERS FOR 26", 32", 38", & 68" HEIGHTS** • **DOUBLE BRACED AT THE 68" HEIGHT FOR STABILITY** • **JACK POINT CENTERING CAP TO ASSURE THE AIRCRAFT STAYS ON THE JACK** • **LOCKING SAFETY COLLAR SECURES THE LOAD** • **RUGGED HEAVY GAUGE STEEL CONSTRUCTION** • **STABLE THREE LEG DESIGN CLEARS GEAR DOORS** • **TILT & GO WHEELS FOR GREATER MOBILITY** • **CONVENIENT HANDLE STORAGE** Height Range: 26"-43", 32"-49", 38"-55", 68"-87" Ram Capacity: 16,000 lbs P/N 12-01727.....

MODEL #375 TAILWEIGHT/POST - A tailweight that doubles as a tail post and can be moved easily about the shop. This unique design allows the secure anchoring of Compression or Torsion Loads without the need of numerous sand bags and anchor chains. The #375 Tailweight/Post is a safer and much more professional approach to securing the tail of an aircraft undergoing maintenance. Shipped knocked down, the Model #375 is easily assembled and weighted using Six (6) - 60 lb bag of Quickcrete - obtained locally. • **SINGLE UNIT PROVIDES THE TAILPOST AND TAILWEIGHT FUNCTIONS** • **NO MORE SANDBAGS** • **TELESCOPING SQUARE TUBE POST PINS IN 3" INCREMENTS** • **RUGGED SWIVEL CASTERS** • **CORROSION RESISTANT GALVANIZED WEIGHT BOX** • **SHIPS AT 32 lbs. - FINISHED WEIGHT 375 lbs.** Range of Adjustment: 17½" - 39½" P/N 12-01728.....

HOBBYAIR RESPIRATOR

The Hobbyair Pro 1 is a fresh air breathing system specifically designed for the amateur painter which allows only fresh air to reach the user's lungs. It features a comfortable, lightweight face-mask with beltline hook, simple snap together fittings, and is very affordable. Includes the pump unit with two stage, single speed, air bypass type motor, mask, belt and 40 foot delivery hose, fittings, filter, cord and case. The Buddy System Hobbyair is designed for two people and includes two 40 ft. delivery hoses. 1 yr warranty. Excellent for use in homebuilt aircraft construction and painting.

CITATION 4 HVLP SPRAYER/RESPIRATOR

Similar to, but much more powerful than their standard CITATION unit, this new sprayer will allow its' user to achieve 'show plane' quality results to a level never before possible with a turbine powered system. Do you have HVLP finish quality reservations? You can forget about them with this new system! The CITATION '4' offers a much higher PSI range without sacrificing the benefits of HVLP

such as lower overspray, the elimination of moisture and high transfer efficiency. This is all accomplished with a more powerful, yet quieter and cooler running turbine blower. Like the standard CITATION, this new system, of course, offers the additional benefit of a built-in supplied-air respirator to assure breathing protection for its' user.

TO

DRAEGER X-PLORE TWIN FILTER RESPIRATORS

X-PLORE 3300 SERIES RESPIRATORS

The 3300 Series Mask is an economical half mask made of TPE material with a continuous grey color neck strap.

Under the new particulate filter rules, there are three series of filters: N, R, and P. The N filters are Not resistant to oil; the R filters are resistant to oil; and the P filters are oil proof.

The N series of filters is appropriate for airborne particles such as silica or lead, when there are no oil-based products also in the air.

For example, an N series filter would be recommended during the removal of old lead paint. However, for spraying an oil-based lead paint, an R or P series filter would be recommended as protection against the airborne mist of oil-based solvent.

The R series (resistant to oil) should only be used for a single shift when solvent or oil mist is present in the air. This filter resists oil but may break down in contact with oil or solvent over a long time.

When using P series filters, check the manufacturer's instructions to determine how long the filter can be used when airborne particles are present. NIOSH originally thought that P series filters were oil-proof but recent tests have found there may be some breakdown of the filter material with long-term oil exposure.

Note: N, R, and P filters do not provide protection against organic vapors.

3300/N95 RESPIRATOR KIT

Kit includes 3300 Mask, 2 each N95 filter pads, 2 each filter pad retainers, and 2 each filter pad bases. P/N 12-02261

Kit includes 3300 Mask, 2 each P100 filter pads, 2 each filter pad retainers, and 2 each filter pad bases. P/N 12-02263

X-PLORE 3500 SERIES RESPIRATORS

The 3500 Series Mask is a premium half mask made of Draeger Flex Material. Clasped Slide-Down feature with a black neck strap.

Under the new particulate filter rules, there are three series of filters: N, R, and P. The N filters are Not resistant to oil; the R filters are resistant to oil; and the P filters are oil proof.

The N series of filters is appropriate for airborne particles such as silica or lead, when there are no oil-based products also in the air.

For example, an N series filter would be recommended during the removal of old lead paint. However, for spraying an oil-based lead paint, an R or P series filter would be recommended as protection against the airborne mist of oil-based solvent.

The R series (resistant to oil) should only be used for a single shift when solvent or oil mist is present in the air. This filter resists oil but may break down in contact with oil or solvent over a long time.

When using P series filters, check the manufacturer's instructions to determine how long the filter can be used when airborne particles are present. NIOSH originally thought that P series filters were oil-proof but recent tests have found there may be some breakdown of the filter material with long-term oil exposure.

Note: N, R, and P filters do not provide protection against organic vapors.

AEROX BASIC RETRO FIT KIT

FITTING IDENTIFICATION CHART (Not Sold Separately)

AEROX RETROFIT KITS FOR BUILT-IN SYSTEMS OR OTHER PORTABLES

The Aerox® Retrofit Kit consists of 3 parts:

- 1.) Oxsaver® Cannula—this comfortable device may be used in place of your mask up to 18,000 ft. MSL. It has a conserving feature which can extend your oxygen supply by up to four times.
- 2.) Aerox Flowmeter/indicator—this combination device conveniently reads both mask and cannula flow

rates in MSL altitude. 3.) Aerox Adjustable Flow Restrictor—a thumb screw operated needle restrictor valve allows you to precisely control flow. Shown are most of the connectors for general aviation. If you want us to supply the connector, be sure to indicate which is your type.

AEROX PRO-O2 EMERGENCY HANDHELD OXYGEN SYSTEMS

In the event that the primary oxygen system fails, the Pro-O2 provides oxygen until the aircraft can reach a lower altitude. And because Pro-O2 is refillable, there is no need to purchase replacement O2 cartridges.

During short flights at altitudes between 12,500ft. MSL and 14,000ft. MSL where maneuvering over mountains or turbulent weather is necessary, the Pro-O2 emergency handheld oxygen system provides oxygen to extend these brief legs. Included with the refillable Pro-O2 is a regulator with gauge, mask and a refillable cylinder.

OXIMETERS - FACE MASKS

AEROXIMETER

Developed at the request of one of the major aviation manufacturers, this new product protects you from the 2 major biological dangers of flight: Lack of oxygen and carbon monoxide poisoning. The system uses an electronic light to measure the oxygen saturation in your blood. It easily slides on your finger and gives continuous updates on the pilot and copilot's blood oxygen levels and heart rates. This system also constantly measures the amount of carbon monoxide in the cockpit and displays 3 levels. Carbon Monoxide is an odorless and tasteless gas. Without a proper electronic warning system, it can very quickly cause drowsiness and unconsciousness. Size: 1-3/8" thick X 5" w X 2-5/8" h.

CO/LOW OXYGEN 2 PL..... P/N 13-02718

FLIGHT STAT PULSE OXIMETER

Know the symptoms of in-flight hypoxia and evaluate your pulse rate and blood oxygen saturation with the FlightStat® Pulse Oximeter. FlightStat provides an easy and accurate way to check for in-flight hypoxia instantly - providing crucial data before it's too late. P/N 13-03248

THE OWL AVIATION OXIMETER

Can detect blood oxygen concentration through the use of a small sensor placed on the tip of a finger or in a headband. The oximeter will determine if the oxygen concentration of the blood becomes too low and alert the pilot of potential hypoxia conditions. At an oxygen saturation of 90%, the OWL will alert the pilot through standard aviation headphones with an audible "caution" message. If the saturation should drop below 85%, the OWL will sound a "warning" message. As an added feature, the OWL will give saturation readings on demand-- at the push of a button. Will also alert the user in the event the batteries become low by an audible "caution" and a visual indication with a red LED. Will "speak" to the user to alert for low blood oxygen saturation. This enables the pilot to concentrate on flying the aircraft instead of requiring the constant monitoring of a display. This can be important when flying IFR, where a pilot must focus on the aircraft instruments. The OWL is also the only oximeter with a sensor intended for continuous monitoring. P/N 13-04284

EDS-2IP BUILT-IN PULSE DEMAND OXYGEN SYSTEM

Complete kits that include all you need to do high flight-level cross country flying with ultimate physiological safety. Kit includes the low-profile instrument panel or overhead-mountable EDS 2ip control head unit with a 2.25" X 2.25" form factor, two (2) remote-mountable oxygen outlet distributor units, the new IPR (Intelligent Peripheral Regulator) with our light-weight carbon-fiber-wrapped cylinder with a 48 cu. ft. capacity allowing many round-trips without oxygen refills. In addition, masks, cannulas, as well as necessary hardware and tubing are included. The pilot station comes with our, FAA-CAMI flight-level 250 tested 'Pulse-Demand' ALPS FaceMask that can be upgraded with a noise-cancelling microphone at any time. You can add the Alps face mask with or without microphone for your co-pilot as well.

EDS-4ip built-in Pulse Demand oxygen management systems are complete kits includes everything in the EDS-2IP but with the EDS 4ip control head unit with a 2.25" X 3.125" vertical form factor, and four (4) remote-mountable oxygen outlet distributor units

NOTE: The EDS ip systems automatically operate from a 12 or 24 Volt system at a mere 250 ma. of current. Therefore, if not specified, during your order the IPR will come with a 12 volt valve and the schematics will instruct that it be powered from the control head, via pin-19. The most preferred configuration. Otherwise the valve for the IPR must be specified for either 12 or 24 volt operation if you decide to power the IPR valve through system power and not from the control head.

EDS-2IP P/N 13-05745
EDS-4IP (Shown) P/N 13-05746

CHECK MATE II WRISTWATCH OXIMETER

The Check Mate IITM (manufactured by SPO Medical) is an effective and affordable wearable pulse oximeter ideal for spot-checking, during mountain climbing, light jogging and speed walking. Pilots/aviators can also quickly assess their SpO2 while

flying at high altitudes. The Check Mate II wristwatch oximeter offers the features of a conventional oximeter in a compact, lightweight user-friendly wrist-based configuration. The unit accurately measures blood oxygen saturation levels and heart rate. Readings are displayed on the wristwatch unit that sits comfortably on the patient's wrist for maximum convenience and flexibility. P/N 13-05673

CHECK MATE PULSE OXIMETER

Easy Spot Check Monitoring of Your Vitals!

SPO Medical's Check Mate™ offers the features of a conventional pulse oximeter in a compact, user-friendly configuration.

Check Mate™ accurately measures blood oxygen saturation levels and heart pulse rate. Pilots love Check Mate™ because it allows them to quickly assess their SpO2 while flying at high altitudes. Hypoxia can be a pilot's worst enemy, and Check Mate™ is a low-cost product which gives pilots peace of mind. Check Mate™ answers the sports and aviation markets' demand for a lightweight, inexpensive monitor for measuring blood oxygen saturation and heart rate during physically active and high-altitude activities. It offers the user a greater ability to monitor these vital signs under motion and is less expensive than most available devices. The unit is designed to utilize very low power for extended usage, eliminating the need for frequent battery replacement.

To operate simply place the sensor on your finger and turn it on. P/N 13-03920

FINGER PULSE OXIMETER

MD300 C201 is intended for noninvasive spot-check measurement of function oxygen saturation of arterial hemoglobin(SpO2). It can be used with adult and pediatric and widely used in family, clinic and hospital. Features: • SpO2%, PR are displayed on screen. • Simple and convenient operation • Light, compact (the weight is 50g including batteries) Low power consumption, two AAA batteries can be continuously Operated for 30 hours • Indication of low power consumption • Two display modes P/N 13-05666

EMOX EMERGENCY OXYGEN GENERATOR

Emox is a dependable lightweight, portable, powdered emergency oxygen system which is not pressurized and has no moving parts and is also non-corrosive, therefore no service or maintenance is required. Both powders are environmentally accepted, have an indefinite shelf life and have no fire hazard and are non-explosive and are supplied in hermetically pilfer proof sealed containers. Unit consists of a nylon carry bag, a specially designed plastic cylinder with operating instructions and a built-in humidifier, 3 x 15 minute white powder applications plus 3 activator catalysts, a face mask with a 1.5 meter tubing and a water measuring bottle. The total unit weighs a mere 1.75Kg.

System w/ 3 Refills P/N 13-06617
Refills w/ 4 Powder Charges P/N 13-06618

MOUNTAIN HIGH ALPS FACE MASK

FAA-CAMI tested with the EDS-ip system, MH ALPS FaceMask and the MH ALPS-M (for microphone) FaceMask. Outfitted with an electronic "Clear-Speak" ambient noise-cancelling microphone and is compatible with most aircraft systems. Easy to put on and exceptionally comfortable as it does not require a polyvinyl bag. The ALPS or the ALPS-M FaceMask can be used with any of the MH oxygen systems. Available in small, medium and large.

MOUNTAIN HIGH PORTABLE OXYGEN SYSTEMS FOR CESSNAS

"MH FDS O2D2 Pulse Demand FADOC Oxygen Delivery System" is designed for Cessna pilots. The MH EDS O2D2 is the only single unit, portable, two-place, carry-on Pulse Demand oxygen system currently available.

The MH EDS O2D2, with the patented digital electronic "Pulse Demand" FADOC oxygen delivery system, enables the pilot and passenger/crew to fly at pressure altitudes up to 25,000 feet with safety and comfort. The O2D2 digital pulse demand system reduces oxygen consumption dramatically. Different from "standard" constant flow systems, the O2D2 pulse demand system wastes no oxygen during the breathing cycle. Studies show that 90% of the oxygen supplied by the O2D2 is transferred to the blood. The average user will enjoy a conservative consumption drop of four times compared to constant flow systems. The system operates, with two people, for up to 50 hours on three AA alkaline batteries. Easy to use, the two-person O2D2 reduces oxygen system workload to almost nil. There are no oxygen flow indicators to watch or manually operated constant flow valves to adjust due to altitude changes. Two push buttons cycle the O2D2 through the various modes that automatically deliver the required supplemental oxygen pulses for various altitudes.

The complete standard system includes an aluminum oxygen cylinder (buyer has a choice of sizes with upgrades), a cylinder carry case, primary reducing regulator, low pressure service line, connection fittings, the MH EDS O2D2 FADOC unit, breathing cannulas, face masks, and a tote bag.

With Small (4-1/2" DIA) Cylinder..... P/N 13-05068.....
With Large (5-1/2" DIA) Cylinder P/N 13-05069.....

OXYGEN SYSTEMS

The XCP is a low-cost, high-duration multi-place oxygen system. With the A3 and Oxymizer cannula each person will use at most 1.0 liter/min. at 18,000 ft. This makes it easy to calculate your cylinder life time. Example: If you have 415 liters and four persons and are to cruise at 18,000 ft., you would divide 415 by 4 which equals 103 minutes per person. The flow rate at 18,000 ft. is typically only 3/4 (0.750) liter/minute with the Oxymizer cannula. However, 1.0 liter/minute is used as a worst-case scenario and for calculation convenience. The XCP delivery system consists of: 1 ea. XCP quad-port regulator with self-sealing outlets, 4 ea. XCP face masks (for use with the A4 flowmeter or nasal congestion), 4 ea. Nelson A3 flowmeter/regulators with 3' (three feet) of high quality tubing with CPC connectors and 4 Oxymizer® type "M" nasal cannulas, 1 ea. Oxygen cylinder (AL-415 or AL-682), 1 ea. Tuff-Pack padded fabric carry/strapping case for cylinder and equipment. The XCP system comes with the A3 flowmeter/regulator. It has an altitude/flow scale calibrated for the unique Oxymizer oxygen-conserving cannula. The scale is marked in 2,000 ft. increments for VFR flight levels up to 18,000 ft. You can operate the XCP in IFR flight levels with the optional A4 flowmeter/regulator and associated F1 face masks. This will, however, use much more oxygen. All systems are shipped empty.

MOUNTAIN HIGH HANDHELD OXYGEN SYSTEM

The Co-Pilot is an affordable, handheld oxygen system designed for supplemental breathing at high altitudes. This system is especially useful for pilots who only occasionally fly at altitudes requiring oxygen and, therefore, do not need a full-featured oxygen system for their aircraft. Unlike similar systems, the Co-Pilot's oxygen regulator has an on/off and volume control knob that is adjustable from off to 2 L/min. The face mask is removable and can be replaced with an Oxymizer cannula for continuous "hands-off" use for more than 30 minutes of duration per cylinder, at 15,000ft. At a glance, the built-in pressure gauge will allow you to see how much oxygen is available at all times. The Co-Pilot system can be shut off and stored with a cylinder installed for more than a year without any noticeable leakage. The basic Co-Pilot kit comes with regulator & gauge, face mask, two 18-liter non-refillable replacement cylinders, and an instruction manual. Options include additional cylinders, Oxymizer cannula, & holster pack. P/N 13-01016.....

MOUNTAIN HIGH EDS OXYGEN SYSTEMS

The EDS (Electronic Delivery System) is the first supplemental breathing system specifically designed for aviation to employ the tested and well founded pulse-demand method of oxygen delivery. This reduces the amount of oxygen wasted by as much as ten times over constant-flow systems, while providing over 90% blood saturation levels at and well above pressure altitudes of 25,000 ft. The EDS senses and synchronizes itself with your breathing to provide a pulse of oxygen when you benefit from it the most: at the very beginning of your inhalation cycle and not while exhaling, pausing or talking. Measurements show that up to 90% of the oxygen delivered is absorbed directly into the blood stream. A built-in density altitude barometer responds to altitude changes automatically, adjusting the oxygen amount as needed for each breath. The EDS has been hailed by several flight surgeons & physiologists as the most significant development in supplemental breathing devices since the advent of high altitude flying. Mountain High's current digital version, EDS-D1, is about the size of a cigarette pack, and it offers 9 modes of operation. All systems shipped empty.

GROUND SUPPORT TOW BARS

CESSNA - This two piece telescoping tow bar fits all Cessnas with 5/8" lugs on nosegear. Overall length 42.5", collapsed 24".
P/N 13-01800.....

MOONEY - A simple "T" handle design for the Mooney axle. Overall length 33.5".
P/N 13-02000.....

CHEROKEE - This one piece tow bar has a retractable locking mechanism that gives a positive lock when installed. Overall length 31".
P/N 13-01600.....

BEECHCRAFT - The compact design of this tow bar makes it very popular among Beech owners. Overall length 38", collapsed 21.5".
P/N 13-01900.....

ARROW - This offset "T" handle design fits into the Arrow axle making it a simple and easy design to use. Overall length 33".
P/N 13-01700.....

TWIN CESSNA - The extra length provides extra nose clearance and leverage for Twin Cessnas and remains very compact. Overall length 55", collapsed 34".
P/N 13-01850.....

TWIN PIPER - The same as our P/N HH-007 except one piece construction. Overall length 33".
P/N 13-01778.....

COMANCHE - The same as our P/N HH-007 except one piece construction. Overall length 33".
P/N 13-02100.....

DELUXE CESSNA - The deluxe Cessna towbar is very popular and designed for those who demand the ultimate in convenience and durability. Spring loaded forks allow easy one handed engagement without getting on your hands and knees. Length 45.5" extended, 26" collapsed. Wt. 3.75 lbs. Ideal for Cessna RGs Including 210 series.
P/N 13-01540.....

DUTCHESS/PIPER - Fits Dutchess and Piper nose gear axle. Telescoping design provides extra nose gear clearance. Overall length 48", collapsed 28".
P/N 13-02210.....

DELUXE PIPER - The deluxe Piper towbar offers all the features of a standard Piper towbar plus the convenience of a two-piece design. When extended, this model provides additional propeller clearance and leverage. Length: 42" extended, 23" collapsed. Wt. 3.5 lbs.
P/N 13-01550.....

UNIVERSAL TOW BARS

CESSNA/ BEECH/ MOONEY - This universal tow bar is excellent for use with tug, tractor, or by hand. It fits most Cessna singles and twins with 5/8" lugs, Beech singles and twins with 1/4" lugs, all Mooneys, Twin Commanders, Lake and Comanche. Slide lock quickly adjusts & holds firmly.
P/N 13-02350.....

PIPER - Same design as the universal tow bar above, this towbar fits Piper single fork design, Arrow, Malibu, Lance, Seneca, and Seminole. Slide lock quickly adjusts and holds firmly.
P/N 13-02351.....

SCOTT TAILWHEEL - A tow bar designed for aircraft using a Scott 3000 series tailwheel. Overall length 48", collapsed 28".
P/N 13-02205.....

BEECHCRAFT AXLE - This two piece tow bar is designed for use in Beechcraft axles. Overall length 48", collapsed 27".
P/N 13-02215.....

CHEETAH/TIGER - This tow bar is designed to fit Grumman aircraft. Its collapsible design makes it easy to fit in the baggage area. Overall length 43", collapsed 26".
P/N 13-02200.....

ERCOUPE - Specially designed for Ercoupes. This tow bar has a spring loaded lever action for ease of operation. Overall length 46.5", collapsed 28.5".
P/N 13-01580.....

1-1/8" AXLE - This is a universal tow bar designed for aircraft with 1-1/8" axles such as Cessna Skymaster and Piper Seneca. Overall length 56", collapsed 33".
P/N 13-02110.....

COMMANDER - This model fits Rockwell 112 and 114. Spring loaded forks for ease of operation. Overall length 46.5", collapsed 28.5".
P/N 13-01570.....

DELUXE MOONEY - The deluxe Mooney towbar is a longer, two piece version of a standard Mooney towbar. Attractive black caps accentuate deluxe appearance. Length: 38", collapsed 21". Wt. 3 lbs.
P/N 13-01560.....

UNIVERSAL - For the FBO this is an ideal hand held universal tow bar. Fits Cessna, Beech, Piper, Scott Tailwheel and many others. Overall length 57", collapsed 34".
P/N 13-02250.....

VIKING - Designed especially for Bellanca Viking axle. Collapsible design and spring loaded fork. Overall length 46.5", collapsed 28.5".
P/N 13-02220.....

DELUXE BEECHCRAFT - Spring loaded forks for ease of operation. Overall length 47", collapsed 28".
P/N 13-01905.....

FBO UNIVERSAL TOW BAR

This heavy duty universal tow bar is standard equipment for FBO's. It fits Piper, Cessna, Beech, Mooney, AeroCommander, and many others. The adjustable fork allows you to extend the fork assembly from 3" to 10". This tow bar is extra long at 7 ft. 6".
P/N 13-02355.....

AIRCRAFT WINCH & MOUNTING KIT

AIRCRAFT WINCH - Hook cable to tail tie-down ring and press button. Easily moves aircraft up to 3,000 lbs. rolling weight. Includes wall mount. If a floor mount is desired order P/N 13-06124. Order bracket separately. Comes with 100' of cable and 75' of control cord and has an automatic safety shut off. Cable speed is 30 feet per minute. Voltage 110 DC.....
P/N 13-01764.....

HEAVY DUTY AIRCRAFT WINCH - Winch includes metal wind up drum, 100' of cable 125' of control cord. Moves aircraft up to 6,000lbs. Includes a wall mount. If floor mount is desired P/N 13-06124 must be ordered. Code 7
P/N 13-06125.....

AIRCRAFT WINCH MOUNTING KIT - Aircraft Winch Mounting Kit Everything you need to secure the winch to the floor. Mounting kit only. Can be used with P/N's 13-01764 and 13-06125 in a floor mount is desired.
P/N 13-06124.....

TOW BARS

BOGERT TOW BARS (BOGI-BARS)

Light enough to stow Built from a combination of steel for maximum durability comfort grips on the handle and spreader bar chip resistant red bar will look great for years. Operation: extend the handle easily with high shear wick release pin apply forward pressure on the spreader bar to open the wishbone jays. Line up the Bogi-Bar attachment at the tow points or axle depending on model.

Release the tension on the spreader bar and you are locked on! The tow bar will not slip off the plane. Reverse for removal.

TOW BARS

THE TAIL-DRAGGER DRAGGER

This manual tow bar has heavy-duty solid rubber 8-inch wide tread wheels and will move most tail-draggers up to 2,000 lbs. and tail wheel tires up to 10 inches in diameter. Options Available: Hitch Arms for towing, 3rd Wheel for heavier ships, and RV tail wheel lift pin.

Tail-Dragger Dragger™ Features:

- Patented Design
- No Winches
- No Hydraulics
- No Metal To Metal Contact
- No Adapters Required
- Superior Traction

- 5 Second Loading & Unloading
- Will fit Almost Any Aircraft
- Tail Wheel Stays In Trailing Position
- Lifting Pins Grip & Lift Tail Wheel
- Maneuver In Any Direction
- Operator Has Good View Of Wingtips

POCKET TOW TAILWHEEL LEASH

Black Pocket

Red Pocket

Pocket tow makes tail wheel aircraft maneuvering easy. Made with one-inch heavy-duty nylon webbing, the lightweight tow bar alternative is small enough to fit in your pocket and works on tail wheel aircraft with a 360-degree full-swivel tail wheel assemblies. The small end loops around the tail wheel leaf spring and cinches up tightly to pull and steer the aircraft backwards without pushing or pulling on any flight surfaces. Tailwheel leash - Black P/N 13-04681 Tailwheel leash - Red..... P/N 13-04682.....

NOSE WHEEL DRAGGER DRAGGER

The Nose-Dragger Dragger features a swing gate front roller (for easy loading), 10 ball bearing rollers (which push and guide the nose wheel), and does not require the use of adapters, winches, or hydraulics. Effortless ground handling is accomplished by its lightweight design and slow walking speed. The Nose-Dragger Dragger accepts nose wheels up to 600 x 6 (with or without wheel fairings), and no metal-to-metal or metal-to-fiberglass contact. Available in gas or electric power models. The 12V electric powered Nose-Dragger Dragger will accept aircraft up to 3,000 lbs. The Nose-Dragger Dragger Gas powered model accepts aircraft up to 6,000 lbs. Please call 1-877-477-7823 for freight quote.

EXTRA HEAVY DUTY 6HP GAS TAIL-DRAGGER DRAGGER

This powerful gas tug has an extra heavy-duty frame, an extra center bearing for the axle, a longer handle for better leverage, heavy duty 12 -inch air wheels and will move most tail-draggers up to approx. 7,500 lbs. and tail wheels up to 16 inches in diameter. This is nice for aircraft like Beech-18, Most Ag planes, BT-13, SNJ, T-6, Beaver, Howard, Reliant, heavy Cessna's C-195, C-185, 450 Stearman's, and many other tail draggers. P/N 13-04390

HEAVY DUTY TOW BUDDY CORDLESS POWERBAR

Features: • No Flammable gasoline needed in hangar • Easy To Use • Infinite Speed Control • Versatile Applications • Push button forward and reverse controls • Nose gear quick attach for easy nose gear hook up. • The adjustable fork height fits virtually any light aircraft • Trickle charger for battery • Large 16 x 6.50 - 8 turf tire • For aircraft weight of 3500 to 4500lbs. P/N 13-04513

BRACKETT MULTI-LINK TOW BARS

User benefits: All tow bars and heads are interchangeable with other popular tow bar systems such as tronair© warranty on all materials and workmanship money saving alternative to multiple tow bars

BRACKETT AIRCRAFT'S MULTI-LINK TOW BAR LINE CONSISTS OF TOW BARS THAT UTILIZE CHANGEABLE HEADS WHICH ALLOW YOU TO TOW A LARGE VARIETY OF TURBO PROP AND JET AIRCRAFT. THE TYGA LINE OFFERS A STANDARD MULTI-LINK SYSTEM FOR AIRCRAFT WITH MAXIMUM TOW WEIGHTS OF UP TO 125,000 POUNDS. ALL HEADS AND TOW BARS ARE INTERCHANGEABLE WITH MANY WIDELY USED MULTI-HEAD TOW BAR SYSTEMS. YOU NOW HAVE A HIGH QUALITY AND COMPETITIVE SOURCE FOR TOW BARS, CHANGEABLE HEADS, AND ACCESSORIES.

TOW BARS

ROBOTOW PORTABLE TOW BAR

Aircraft Spruce is pleased to offer the new all weather Millennium model Robotow. It is lightweight (under 30 lbs.) and portable, making it ideal for carrying onboard your aircraft. When the Robotow's heavy duty all weather knurled drive drum is held against the nose wheel, the aircraft is easily moved. A trigger on the handle controls the speed while a switch reverses direction on command. Powerful, portable, and dependable, Robotow is an ideal motorized towbar for the aircraft listed below. Order axle adapters separately.

CESSNA TOWBAR EXTENSION

The "QUICK-FOLD COMPACT TOWBAR" also known as the "QFC--Towbar-TM" This new to the market design was patented with you in mind...No more back breaking, bend over towing... Simply attach the QFC-TowbarTM extension to your already existent Cessna tow bar and stand up straight -away from under the propeller-for an added extension of 33". The QFC-TowbarTM has a unique compact design allowing for secure storage. It simply folds flat and is stowed securely along side the factory tow bar in the luggage compartment.

P/N 13-06722

DELUXE TAILWHEEL TOWBAR

The new Deluxe Tail wheel Towbar uses a positive locking control cable to attach to the wheel from a straight-on position. No extra maneuvering or lifting is required, and it can be adjusted for various tail wheel sizes. Towbar Weight: 26 lbs.

Note: Maximum weight to lift is 1,200 to 1,500 lbs. P/N 13-04918

ROLLING TOWBAR FOR TAIL DRAGGERS

Designed by an aircraft mechanic for easy ground handling of his Aeronca, this new tow bar is ideal for all types of tailwheel equipped aircraft. Just place the tail wheel in holding bracket, lift up, and tow bar wheels allow aircraft to be wheeled anywhere with ease. Bracket fits all standard aircraft tailwheels.

P/N 13-04277

GLIDER & BANNER TOW HOOKS

GLIDER & BANNER TOW HOOK RELEASE

Bolt-on tow hook with bumper is designed to be directly bolted to a custom mounting bracket. The bumper is designed to reduce the kick-back that occurs when releasing a banner. The polyethylene bumper absorbs the force of the release and your tow hook release will last longer. P/N 13-06281

GLIDER & BANNER TOW HOOKS RELEASE

Bolt-on tow hook is designed to be directly bolted to a custom mounting bracket. P/N 13-04975

GLIDER & BANNER TOW HOOKS RELEASE

Weld-on tow hook designed to be directly welded to a custom mounting bracket. This hook is similar in design to the Schweizer manufactured hook that is no longer available.

Design improvements were made to increase emergency release capability at all towing loads and angles. A common glider towing hazard occurs when the glider becomes extremely high or low compared to the tow plane. This applies a load to the tow hook at an angle that significantly increases the force required to release the tow rope. This new hook has greater release arm leverage and a unique hardened roller release design to reduce release force at all tow angles. Additionally, the geometry of the tow hook housing was improved to keep the tow ring in the optimum position to minimize release force. The tow hook is not to be used on gliders. FAA approval can be obtained for the complete tow hook and release system by following the guidelines in FAA Advisory Circular 43.13-2B, Chapter 8, titled, "Glider and Banner Tow-Hitch Installations" and the included tow hook installation instructions. Tow hook release is not STC or PMA approved. P/N 13-04974

GLIDER & BANNER TOW RING

The tow rings is designed for use with the glider and tow hook release. The size of the tow ring is 2 1/4" OD. The material is forged steel, finished with cadmium plate with a proof load to 2500 lbs. Tow ring is for use with Wings Unlimited, Inc. tow hooks only. It is not STC or PMA approved. P/N 13-06282

GLIDER & BANNER TOW RELEASE HANDLE

The release handle is attached to the support bracket in the cockpit of the airplane. A cable is attached to the handle and tow hook release. FAA approval can be obtained for the complete tow hook and release system by following the guidelines in FAA Advisory Circular 43.13-2B, Chapter 8, titled, "Glider and Banner Tow-Hitch Installations". The release handle is not STC or PMA approved. P/N 13-06283

GLIDER & BANNER TOW SUPPORT BRACKET

The support bracket is attached to the floor of the airplane in the cockpit and is the housing that holds the release handle. FAA approval can be obtained for the complete tow hook and release system by following the guidelines in FAA Advisory Circular 43.13-2B, Chapter 8, titled, "Glider and Banner Tow-Hitch Installations". The support bracket is not STC or PMA approved. P/N 13-06284

REDLINE TOW BARS

REDLINE SIDEWINDER POWER DRIVER

Powerful and portable, the Sidewinder will forever change the way you move your aircraft. Powered by Milwaukee's top of the line 28V power unit with a long-lasting, lithium ion battery pack, Sidewinder weighs less than 22 pounds, collapses to 27" and stows easily in your baggage compartment. Made in the USA using 4130 Chromoly material.

REDLINE WEDGE-LOC LINK

Provides a solid "link" between your airplane and other brands of tow bars or power tugs that were designed to connect to either your axle or tow pins. With the WLL, nothing touches any exterior surface of your plane -- the result is no scratching or other damage! Made in the USA using 4130 Chromoly material.

FITS THESE BEECHCRAFT MODELS: Bonanza, Baron, Travel Air, T-34 P/N 13-01913

REDLINE SLIDER FOR ECLIPSE

The Slider adapter inserts into the front axle and tightens securely. It provides a short "stub" on each side for any universal type tow bar attachment. With the Slider in place, nothing touches any exterior surface of the nose gear, avoiding scratching and other damage.

Made in the USA using 4130 Chromoly material. **FITS ALL ECLIPSE AIRCRAFT.**
 P/N 13-06854

TULSA TOWBOTS AIRCRAFT TUG

TULSA TOWBOTS REMOTE CONTROL AIRCRAFT TUG

The iTowBot's loading sequence is as easy as driving the unit directly under the nosewheel of your aircraft. The iTowBot is engineered so that when the aircraft loads, the weight of the loaded aircraft does not inhibit its zero-turn capability. This allows the operator to articulate the aircraft in a manner that places it ahead of all other towing equipment.

Releasing the aircraft is just as easy. A foot-operated release allows the operator to unlock the swivel carriage and merely back out from beneath the nosewheel. Now the operator can simply drive the unit back to its spot in the hangar....no tugging, pushing or rolling up extension cords required!

iTowBot can tow in any direction Tulsa TowBots offers a precision, ruggedly built towing machine that will allow the user to position aircraft in close quarters with ease. The iTowBot has the ability to rotate the aircraft inside of its own wingspan. With its hybrid zero-turn capability and fully-articulating self-locking carriage, turn limits of the aircraft nose wheel cannot be exceeded. The powerful 24VDC motors are regulated for smooth starts and stops while delivering the power you need to put your aircraft asset out on the ramp or back in the hangar.

The iTowBot was specifically designed to provide adequate distance for the operator to tow around the aircraft. The operator should exercise caution in selecting the vantage point from

which to operate the iTowBot.

Damage caused by conventional tugs This is a picture of the nosewheel strut damage caused by exceeding the turn limits with a conventional tug. This cannot happen with the iTowBot, since the front wheel remains stationary while the iTowBot is free to turn through 360°. With its hybrid zero-turn capability and fully-articulating self-locking carriage, turn limits of the aircraft nose wheel cannot be exceeded.

The DX2.0 transmitter is designed to provide bulletproof 2.4 GHz spread spectrum radio link. With the DX2.0 DSM system there are no worries of frequency clip or radio interference from noisy motors or no reason to be concerned that someone may turn on a radio on your channel. The unit is user-friendly and offers many features and functions that the operator may desire. The receiver is bound to the transmitter at our facility prior to shipment so that the receiver will only recognize its specific transmitter that comes with your iTowBot. During the binding process, the motor fail safe positions are also set to further provide another level of safety.

Specifications

- * Measures 38" Wide x 46" Long x 12" High
- * Rugged Steel Construction
- * Virtually Zero Maintenance
- * Max Towing Speed 1.7 Feet Per Second
- * Tows Aircraft up to 15,000+ Pounds Gross Weight
- * Solid State Heavy Duty Fully Articulating Motor Control
- * Hybrid Zero Turn Capability about Stationary Nosewheel
- * Also available with built-in 24V Auxiliary Power Plug (APU) & Power Cord
- * Powerful Reversible 24 Volt DC Motors
- * Powder-Coated Frame
- * Easy Ergonomic Remote Control Handset
- * Overvoltage Thermally Protected
- * Trouble Free Cast Iron Rims with Non-Marking Moldon Wheels
- * Equipped with Solid State Battery Charger/Maintainer

LITTLE STAR VTHRUST

Vthrust aircraft mover from Littlestar Products makes quick and easy work of moving your single-engine airplane, using an off-the-shelf 18V or 24V drill/screwdriver* as its power source. The drill's sealed mechanism means that there are no belts or chains to snag, and no adjustments to make. Most applicable drill/drivers have two or even three speed ranges for precise control of the Vthrust, and supply sufficient torque to move a 3000 lb. airplane up a 3% grade. The drill/driver chucks onto the vThrust, and attaches with a simple clamp. Just attach the driver and go! The drive system is versatile you've either already purchased the drill for other projects around the hangar and shop, or you've always wanted to! Operation is simple and safe. The internal worm-gear drive mechanism, coupled with the drill/driver's internal brake means the Vthrust stops and starts when you do smoothly and precisely. The variable speed of the drill/driver gives you complete control of the aircraft, from a standstill to moving at 40 feet-per-minute. Two versions are available -- in the deluxe steerable model, a simple twist of the stabilizing handle locks and unlocks the steering mechanism for total control. Robust construction gives the Vthrust the capability to deliver up to 325 lbs of drawbar force. Dual drive wheels deliver good traction and sta-

bility on almost all surfaces, and with the optional turf tires or tire chains, you're covered for the rest. Securing Vthrust to the aircraft is a snap, using a single lever to attach or detach the towbar. Several optional adapters are available, allowing the Vthrust to mate to many light aircraft, tricycle gear or conventional, with wheelpants or without.

The steerable model is easily converted to the trailer mover with the optional coupler adapter. The Vthrust is also available in a robust non-steerable model.

Lightweight and compact, the Vthrust aircraft mover's 62-lb. weight makes it easy to use and transport. All-stainless construction gives corrosion-free good looks, and the enclosed worm-gear drive mechanism is maintenance free. The Vthrust is easy to assemble and disassemble, making it a breeze to move and store. *Drill/Driver not included.

TIE-DOWNS

“THE CLAW” TIE-DOWN SYSTEM

Advanced Aircraft Anchoring System – The Claw® Aircraft Tiedown kit comes complete with three earth anchors, rope, spikes, hammer and canvas carry bag. The Harder You Pull, The More It Grips The Earth. Features: Easy installation...Easy removal. No more struggling with screw-in anchors The “Claw®” is designed exclusively for aircraft. The “Claw®” system has a 3600 lb. combined capacity. The last tie down you will ever have to buy - Lifetime Warranty, Tremendous holding strength. The harder you pull, the more The “Claw®” grips. Ideal for all aircraft, Works in hard clay, sandy soil or anything in between Large foot print spreads the load over a larger area for maximum holding power, Low profile will not puncture tires, Complete System weighs only 8 lbs (Including Hammer), Light-weight aircraft aluminum with hardened corrosion resistant die cast zinc plated steel spikes 25 ft 3/8” dia. solid braid polyester rope, Anchoring System hammer doubles as removal tool The “Claw®” includes: Bag that is easy to carry and store that contains: 3 Anchors; 9 spikes; 1 hammer; 25-ft rope Wt: 3.8 lbs.

P/N 13-02448

JEB'S REMOTE TIE-DOWN KIT

Remote Release System - This new safety device will be appreciated by anyone who hand starts their plane. Release and retrieve without leaving the cockpit - get off to a safe start.

P/N 13-04787

THE COMPLETE TIE DOWN KIT

Includes: (9) Anchor Rods; (3) Wheel Chocks; (3) Tie-Down Straps; (1) Storage Bag

This kit includes everything needed to tie your plane down when you must park on the grass. You can tie down both wings and the tail, and the kit includes a convenient storage bag. You can use the wheel chock as a chock when parked on pavement, and the strap can be used to secure the plane on a tarmac with built-in tie downs.

When parking overnight on grass, simply drive the 3 anchor rods through the holes in the wheel chock to create a tie down and clip your tie down strap to the wheel chock & wing. P/N 13-03148

TIE DOWN STRAP

15 feet long, long enough for most high wing aircraft • 2'300 Lb ultimate strap strength • Snap buckle on each end • Safety yellow color Snap buckles cannot fall off of aircraft when loose or in gusty winds

P/N13-03149

BAGGAGE TIE-DOWN

A very strong, light weight, and quick way to secure your baggage. The photo shows two units; One with the clamp/ring installed in the base and one with the clamp/ring removed to show more detail. The unit parts are made of anodized 6061 T-6 aluminum with a stainless ring. 2 rivnuts and 2 countersunk 10-32 cad-plated screws are furnished with each complete unit. Extra bases can be purchased individually, and include rivnuts and screws.

Note: Use rivnuts to attach to surfaces with no rear access - simply drill a .25” hole and install rivnut. By installing additional bases you can tailor your baggage tie-down options to suit your current needs.

P/N 13-01729

E-Z LOCK TIE DOWNS

EZ- Lock Tie Downs feature a braid slip lock which provides excellent tie-down security without the need to tie into any knots.

P/N 13-00159

NELSON AIRCRAFT TIE-DOWNS

- Three 15” welded (not bent) steel anchors with sharp tips for easy installation
- Three 15’ nylon ropes- Cordura, Int'l. Orange, 8”x15” case
- Wt: 4 lbs. P/N 13-00663

SECURIT TIE-DOWN

Super-strong and simple to use, Securit has a unique braid lock that provides holding action automatically, even when the line is slack. It releases quickly and easily, but positively will not release by itself. Adjustable to 100”. Tensile strength of the polypropylene rope exceeds 4000 lbs. Hooks are cadmium plated. Rope is resistant to water, oil and gas. Wt. 19 oz...P/N 13-22750

Less 10% for 3 or more. Price shown is for one unit.

FLY TIES TIE DOWNS

FlyTies Tie Downs Rated “Top Choice” by Aviation Consumer

FlyTies® unique design allows quick insertion and quick removal using the easy-out extraction tool provided. Rugged, die-cast steel rods are 3/8” x 14” for deeper penetration into harder ground. Cumulative load capacity is 3,600 lbs. Kit includes 3 eas. Delrin hubs, 9 eas. steel rods, 3 ea. 3/8” x 12’ ropes, easy-out extraction tool, and rugged compact canvas tote bag. Complete kit weighs only 6 lbs. (less than 1 gal of Avgas) and has a lifetime warranty. P/N 13-22751

NYLON TIE-DOWN ROPE

American-made 100% duPont filament fiber nylon rope. Over twice the strength of manila. Highly resistant to sun-light, rot & mildew. Don't be fooled by foreign imitations. 3/8” Rope (4000 lb. test) P/N 13-05400 /Ft. 1/2” Rope (6250 lb. test) P/N 13-05500 /Ft.

15% Discount on 100 ft.

Tie-down bar is guaranteed for 10 years under normal use.

When making your own length of tie-downs, add at least 30” for rope reversal and knots.

HOOK-N-PULL TIE DOWNS

Hook-N-Pull Tie downs feature closed end “s” hooks made from high quality steel with heavy plating, and tie down bards are made from high grade aluminum, hardened for strength and ball burnished and anodized. Furnished with 3/8” diameter nylon rope.

TOUGHMAN TIE-DOWN

The Toughman™ Tie-Down is a new and unique multi-use rope based tie-down system. The Toughman™ Tie-Down incorporate the patent protected Toughman™ Rope Clamp which has only two moving parts and is manufactured from high performance engineered nylon resin. It is very easy to use, extremely lightweight, high strength and permanently corrosion proof. The Toughman™ Tie-Down product package includes one rope clamp, ten or fifteen feet of rope and one corrosion resistant steel hook. Military Tough: The Toughman™ Rope Clamp has undergone rigorous testing by the US Army Soldier Systems Center, “Natick” test labs and has been approved for use on cargo nets and rope support lines on military tents.

AIRCRAFT TIE-DOWNS

These Aircraft Tie-Downs offer strong, durable, and easy to use tie downs for any weather condition. These tie downs are rated up to 3,000lbs. and tighten up with one quick pull. A sliding cap protects the buckle from freezing during cold weather and keeps grit out during windy field conditions. Each kit comes with: * Three 9 foot long tie down straps * Choice of tie down strap colors: black, red, or royal blue * A Dupont Cordura carrying bag with choice of colors; black, forest green, red, royal blue or navy.

Embroidery is available for an additional \$5. Choose from Silver, Royal, Navy, or Black.

THE PILOT BUDDY

The PILOT BUDDY is a pilot actuated safety and restraint system for hand propping and tail tie down. A 100 HP piston engine with climb propeller can produce about 500-700 pounds of thrust. The Pilot buddy is therefore constructed to meet and exceed that load for purpose of positive restraint. The Pilot

Buddy has a Black Velour storage Pouch (4" x 5"), and a slightly smaller restraint loop ring. The entire device and storage package weighs less than 2 OZ, and fits in the palm of your hand. Both the restraint loop (Left side-4 Yards=12'); and the release lanyard (Right side -6 yards = 18') are constructed of MIL Specification, MIL-C-5040, 750 pound test line. The Swing Latch Shackles release is test certified to 800 pounds tensile strength for operating loads. The Swing Latch mating ring on the Restraint loop (Left Side), is a ring constructed to MIL Specification. MS27762, with a tensile strength of more than 750 pounds. Package comes with instructions, a checklist for use, and other increasing safety materials.
P/N 13-04259

AIRCRAFT TIE-DOWN STRAPS

Monogramming available (max 10 letters or numbers). Monogrammed items are noncancellable and nonreturnable.

AEROSPOILER KIT, AERO-SPOILER EXTENSION KIT

A lift reduction device used for storm protection on aircraft parked outside during adverse weather conditions. The AeroSpoiler kit contains 10 cup/receiver assemblies and 8 30"x3" inch blade assemblies. Each kit contains 20' of wing coverage.

The AeroSpoiler will reduce the lift producing capability of your aircraft wing by as much as 96% on the area of wing covered by the Spoiler. Extension kits are available for aircraft requiring more than 20' of wing coverage.
P/N 13-06505

Extension Kit..... P/N -13-06506.....

ASA WHEEL CHOCKS

Mandatory equipment for all aircraft, these tire stops are for keeping aircraft securely parked. A pair of black molded plastic wheel stops are connected with 22' bright yellow and black braided nylon rope that won't rot or retain water. The bottom cleats keep aircraft securely parked.

Lightweight; 7-3/4" x 2-1/2" x 4-1/2"; concave design fits any aircraft tire. One pair is needed for each wheel. P/N 13-05752

FOLD DOWN MINI CHOCKS

These mini chocks are so small and light you can take them with you. They work perfectly on both hard and dirt surfaces. Anodized aluminum, each wheel pair folds down to 3.75"x 2"x.5" & weighs just 4 oz. A 14' lanyard is attached.
P/N 5229

TRAVEL CHOCKS

Travel chocks are a very light weight wheel chock designed for airplanes and other vehicles. Compact and easily stored, Travel Chocks are popular with pilots across the country. Powder coated in durable red, blue, or yellow finish. Available in 3 sizes. Chock set is for one wheel only.

Small - 1 1/2" angle x 6" long x 1/8" Thick Heat Treated Alum.

Medium - 2" x 2" x 8" 1/8 Thick Angle Heat Treated Alum.

Large - 3 1/2" x 3 1/2" x 8" Heat Treated 3/16" Thick Alum.

WOOD WHEEL CHOCKS

These chocks feature heavy duty wood construction and are finished in bright safety yellow. Connected with 18" of braided nylon rope.

Std chocks..... P/N 13-01765.....
Chocks w/ your N# or company name..... P/N 13-01766.....

RUBBER WHEEL CHOCKS

These ribbed rubber wheel chocks measure 4"x4"x8" and have reflective tape on all three sides. Connected with nylon rope. Very popular with corporate operations & FBOs.

P/N 13-01767

AIRGIZMOS WHEEL CHOCKS

These chocks are unique because they are stackable. This feature really cuts down on the amount of space required to carry them in the plane.

The durable plastic sides are lightweight, but are made to take a lot of abuse. There is space on the sides to put your airplane's n-number (you supply the vinyl lettering). The edges of these chocks are made of non-skid material, so they stay where you put them. They also won't damage anything else in your baggage compartment.

P/N 13-04298

HANDY CHOCKS

5904 "Handy Chocks" Light Weight - 8 oz* Powder Coated Aluminum Chock* 1 Pair per Package

QUICK CHOCK

Design - Unique but simple one-piece design consists of two chocking surfaces connected by a telescoping, tensioning member. Construction - Weather resistant PVC plastic exterior combined with heavy duty PVC (schedule 80) for interior support, along with military specification bungee assures years of service. The gripping surface is tire belt rubber to provide good friction and wear properties. P/N 13-06619..... ea.

WINDSOCKS

SCOTT'S WINDSOCKS

Scott's windsocks are manufactured of long-life polyester fabric that is treated to resist the effects of wind and weather. All seams are double stitched with polyester thread for strength. The windsock throat is reinforced and has solid brass grommets for easy attachment and corrosion resistance. Nylon ties are included with each windsock to attach it to the frame. Windsocks are available in high visibility orange, white or alternate orange and white stripes. Fully extended at 20 MPH or 15 Knots.

INTERNALLY LIGHTED EXTENDED FRAMES

An internally lighted windsock with extended frame makes the windsock "glow in the dark" for maximum visibility. The lamp operates on regular 120VAC current. The 18-inch diameter frame has a GE 8,000 hour lamp that lasts about 2 years. The 24-inch and 36-inch frames have reflector flood lamps. Designed to swivel without twisting the wires. The frame is constructed of all welded steel for strength and is painted to resist corrosion. The electrical connection for the lamps may be wired permanently or temporarily connected with an extension cord. The frame is mounted to a 1-inch diameter support pipe threaded to fit a 3/4-inch size pipe or conduit. **ORDER WINDSOCKS SEPARATELY.**

18" diameter sock is double stitched, durable, fluorescent orange vinyl coated nylon. Ball bearings let sock turn easily even in light winds. Aluminum frame holds mouth open. Mount on appropriate pipe. Order frame and sock separately
8 Foot sock only....P/N 13-20035

NYLON WINDSOCKS

These socks are windtunnel tested and designed for conditions in which safety and wind direction are of greatest importance. They are constructed of nylon oxford cloth for strength and flyability and dyed a bright orange for higher visibility. The throat and tail bands are stitched with multiple rows of tough synthetic thread. The throat band is finished with #1 brass grommets and nylon ties are included. Unlike canvas or vinyl, these Socks fly in the slightest breeze.

WINDSOCKS

AIRPORT WINDSOCKS

What makes these aviation windsocks different?

Two major things make a windsock, its material and its construction. Starting off with a premium nylon fabric that is made right here in the USA to exact standards. Nylon offers unparalleled windsock durability to the elements and will not become rigid in cold weather, keeping these windsocks extremely responsive in even the slightest of wind. From there it gets urethane coated and UV protected, giving the windsock superior fade resistance and color retention. The material is subjected to a variety of tests by an independent lab to verify its structural integrity and UV resistance. This superior material is then cut and sewn. Our reinforced double stitched hems and heavy duty brass grommets, assures these windsocks long life reliability.

The added expense of a superior material and manufacturing process meets the needs of even the most demanding windsock customers. Such as: US Military, US Coast Guard, US Embassies, State Airports, Offshore Oil Rigs, Nuclear Power Plants, Medical Heliports, Government Bio Hazard Units.

PORTABLE WINDSOCK KIT

Our portable windsock kit is a popular choice for remote locations where knowing the wind speed and direction is vital. This rugged, stand alone unit comes complete with the pole, frame, windsock and windsock ties. These units are manufactured right here in our facility reassuring only the best in quality and performance. This free standing system measures over 7' tall in its assembled configuration.

* It features an extremely rugged design that incorporates a pole with a foot lug and handle for easy installation and removal. The two part pole disassembles for easy transportation.

* The frame conveniently screws onto the top of the pole. Its aluminum hoop and bail pivot on a stainless steel shaft for years of reliable and responsive action.

* The portable unit incorporates the same high quality windsocks we manufacture for commercial airfield use. These high quality socks are constructed from U.S. made nylon fabric that is urethane coated and UV protected. This material is made to our very strict and exacting standards and then sewn right here in our facility, producing a windsock of uncompromising quality. They are offered in (3) sizes for the portable unit. UPS only on this product due to size of package.

DAHON SPEED D7 FOLDING BICYCLE

Riding a bike has never been this fun. The Speed combines sporty performance with unbelievable value. The frame is hand-welded from custom-drawn 4130 chromoly Sonus tubing and incorporates six different patented technologies, resulting in what is probably Dahon's stiffest frame. It features the Dahon Neos rear derailleurs, a revolutionary new design that has an ultra short cage for improved ground clearance and super fast shifting. Dahon paired the Neos with an 11-30T cassette, which, when compared with the previous 14-28T freewheel, represents a 37% increase in gear range. Sleek, simple and excellent value - just what most people want in a folding bike. Moroccan Blue 27.1lbs..... P/N 13-04094.....

DAHON CADENZA FOLDING BICYCLE

The Cadenza is a full-size 16 SPEED road bike which is ideal for long range riding on asphalt. With its skinny tires and lightweight aluminum frame and components, the Cadenza is a fast road bike which affords the rider an upright posture. Features include carbon-wrapped aluminum handle bar and ergonomic bar ends, quick release folding stem, and alloy rims with stainless spokes. P/N 13-04062.....

RIVIERA FOLDING ELECTRIC BICYCLE

Riviera folding electric bicycle is a one of kind folding electric bicycle that anyone can have fun with. You can ride this electric bike three different ways: 1. Like a regular bike in the "OFF" mode. 2. Pedal normally in the "ON" position and the pedal assist kicks in and helps you out! 3. Use the thumb throttle and NO pedaling is required! The Riviera is popular with RVers as well as private pilots. With gas prices high and with more people concerned about the environment, the electric bike is a wonderful option. P/N 13-04070.....

FUN CRUZ'N PORTABLE SCOOTER

Built with highest quality parts • Subaru Robin 4-stroke engine • Quiet, smooth, and "Subaru" long life • Meets California & Federal emissions • No mixing fuel/enclosed tank for 85 mi. • Foldable handlebars & adjustable seat • Compact and light for stowing • Rear "cruising" suspension • Front & back disk brakes • Quiet long-life belt drive • Many "cruising accessories". P/N 13-03273.....

TRAVEL SCOOT

PS

PARACHUTES

SOFTIE EMERGENCY PARACHUTES

MINI-SOFTIE

An extremely comfortable State-of-the-art lightweight emergency parachute system designed to fit into the restricted cockpits of today's aircraft. The steerable conical canopy is designed for a 240# maximum suspended weight. System size and weight 2"x15" w. x 24" long. 14 lbs.

P/N 13-03505-X.....

MICRO-SOFTIE

A narrower version of the Mini-Softie with a 13" wide harness designed to stay secure over the shoulders of slightly built people. The steerable conical canopy is designed for 180# maximum suspended weight. System size and weight 2"x13" w. x 23" long. 13 lbs.

P/N 13-03510-X.....

LONG-SOFTIE

Specifically designed for today's high-tech soaring machines and aerobatic aircraft which have little if any cockpit room. The Long-Softie comes complete with a steerable conical canopy designed for 240# maximum suspended weight. System size and weight 2"x15" w. x 35" long. 15 lbs.

P/N 13-03515-X.....

SOFTIE-SEAT PACK

Container and harness only. Order a parachute separately or specify type of parachute you have to make sure container is suitable size.

P/N 13-03520-X.....

WEDGE-SOFTIE

A wedged shaped version of the popular MINI-SOFTIE and MICRO-SOFTIES. The WEDGE-SOFTIE is designed specifically to add lumbar and sacral support during high positive "G" maneuvers. Ideal for the upright scotting found in Pitts style seating. Specifications: 3" thick at bottom, 1/2" thick at top x 14" wide x 24" long. Canopy Type: Slecraable Conical*. Total weight: 14 lbs.

P/N 13-03524.....

NOTE: Complete the Part Number with Color (-1) Red, (-2) Black (-3) Royal Blue, (-4) Navy Blue, (-5) Grey, (-6) Sage Green or (-7) Olive Drab. Also complete P/N with "C" for Conventional or "A" for Aerobatic. Example: P/N 13-00000-5A.

PREMIUM TRIM PARACHUTE

360/425/490" Premium Trim Emergency Back Parachutes. Includes: Snaps on legs, Snaps on thread thru adapter on the chest, free carrying bag. **Features:** * Color Choices: Black or Red or Navy Blue (Black Trim & Harness). * Hard-

ware: B-12 Snaps on Leg Straps, Thread-thru on Chest. * Logic: Mass produce in "standard configuration" with limited colors. * Free Carry Bag Included * Same quality parachute system that performs equally as the pre-existing "Signature Series" without frills or options.

| Premium National Flat Navy | 13-06265 | . |

NATIONAL EMERGENCY PARACHUTES

National parachutes are built with the finest U.S. materials in accordance with TSO C23b in the Standard Category. Constructed with 1.1 oz. ripstop nylon. High stressed areas are reinforced with Kevlar. The pack design allows greater movement in and around the aircraft. Highly recommended by Aerobatic Champions Leo Loudenslager and Patty Wagstaff.

NATIONAL'S BACKPACK - developed with the pilot in mind and the most popular model. The teardrop shape provides flexibility and maximum comfort even in the tightest cockpits.

Standard design includes a tapered width and teardrop shape that hugs the back and also provides comfortable lower lumbar support

| Size | L | W Top | W Bottom | Thickness Upper Back | Thickness Lower Lumbar | Part No. | Price |
|------|-----|-------|----------|----------------------|------------------------|----------|-------|

| 490" | 22" | 13" | 15" | 1-3/4" | 2-1/4" | 13-03400 | . |

*360 = Recommended Pilot Weight is up to 177 lbs.

*425 = Recommended Pilot Weight is up to 208 lbs.

*490 = Recommended Pilot Weight is up to 241 lbs.

NATIONAL'S SEAT PACK - Especially desirable when the cockpit has more vertical space than horizontal. For added comfort, the seat pad has 1 inch of "Astronaut Foam" above the parachute (accessible to remove or add foam/padding as required). Comes with TT adapters or two B12 snaps. Quick ejector snaps available (special order).

| Size | L | W Top | W Btm. | Thickness Upper Back | Thickness Lower Lumbar | Part No. | Price |
|------|-----|-------|--------|----------------------|------------------------|----------|-------|

| 490" | 40" | 13" | 15" | 1-3/4" | 2-1/2" | 13-03423 | . |

NATIONAL FLAT PARACHUTE

The flat pack is slightly wider and more rectangular but much flatter than our original back parachute's "teardrop" shape. The National FLAT is thinner and even more supple than before. The "Flat-Pack" parachute container provides two choices in packing configuration: 1. More canopy in the upper container for the absolute thinnest beltline thickness (Taper Pack). 2. Canopy spread evenly to be one thickness (thinness!) top to bottom (Fully Flat Pack).

| Description | Part No. | Price |

PARA-CUSHION EMERGENCY PARACHUTES

Each Para-Cushion system features the patented Pop-Top type container with the externally mounted pilot chute which provides a flat profile while worn and gives a quick and positive send off when released. The canopy risers are neatly hidden in built-in channels contoured into the container.

Each container is padded with a luxurious 1/2" (1cm) layer of Confor™ foam, covered with rich silver grey velour fabric. The harness utilizes a light weight fixed-dimension main lift web with individual leg strap design for ease of walking and maximum cockpit movement while saving weight and space. Fully adjustable. Deployment is ripcord actuated with the handle located at the front left side of the harness. Each system is assembled with the popular 26 ft diameter MID-LITE canopy freshly packed by an FAA licensed parachute rigger. Every system is delivered in a matching carrying bag with the complete service manual, ready for flight.

PARA-CUSHION BACK™ - The Model 303 parachute assembly is the most popular model and used by warbird, sailplane & aerobatic pilots. The back-mounted container conforms to the curve of your shoulders, and is only 24" (60 cm) tall by 16" (40 cm) wide and less than 3" (7 cm) thick. The Model 303 weighs approximately 15 lbs. (6.5 kg.). It is recommended when head space is at a minimum, such as Christen Eagle & Grob.

P/N 13-03440.....

PARA-CUSHION CHAIR™ - The Model 305 is truly a chair-parachute, covering the back of the body from shoulders to just above the knees. The patented chair-type container conforms to the curve of your back. It is especially popular among sailplane pilots flying for hours in the supine position, it is literally a "parachute-cushion" beneath the pilot. It is 42" (105 cm) long by 16" (40 cm) wide and varies from 2.5" to less than 1" (6.5 to 2.5 cm) thick, designed specifically for use where space is minimal. The complete system weighs approximately 16.5 lbs. (7.5 kg.).

P/N 13-03442.....

PARA-CUSHION SEAT™ - The Model 304 parachute assembly is designed specifically for emergency use by sport aviators flying aircraft utilizing a seat pan. The parachute container is a seat cushion 12"x16" (30cmx40 cm) and less than 3" (7 cm) thick. Because the backpad is only a half inch (1 cm) thick, the system is also especially suited to aircraft with restricted stick or rudder travel, or when head room is not restricted, such as Stearman, Great Lakes and Citabria. The complete system weighs approximately 15 lbs. (6.5 kg.). A zip-on 3" (7 cm) Confor-foam™ padded Travel Cushion is an optional accessory

P/N13-03441.....

OXYGEN POCKET - Zipper pocket that your oxygen tank can fit in. Available for the 303 & 305.

SURECHECK ACCESSORIES

ATISPAD - Sticky posting pads for obtaining ATIS, ASOS, AWOS. Shrink wrapped in pads of (50) 3-3/4" x 4"
P/N 13-09753

CLEARANCE PAD - Posting pads for obtaining IFR Clearances by pilots. Provides in-flight writing for Altitude, Heading, Frequency. Shrink wrapped in pads of 50 "CRAFT" style 5-1/2" x 6-1/4"
P/N 13-09754

FSSPAD - Bonded legal pad for obtaining weather briefings from FSS Shrink wrapped in pads of 50 sheet 5-1/2 x 6-1/4.
P/N 13-09755

APPROACHPAD - Spiral Bound IFR approach chart holder. Holds up to 10 approach charts in transparent plastic. Easy Access with visible chart name in right corner. Fits on yoke clips or kneeboards for easy in-flight use.
P/N 13-09756

V BOOK - Small notebook with V-Speeds and approach Speeds. Perfect for Flight Schools, and Renters.
P/N 13-09757

PREFLITEPAD - All the information you need for weight and balance and V-speeds. Calculate center of gravity and keep other vital information at your fingertips. You'll wonder how you got through preflight without it! 4.25" x 7". Pad of 40
P/N 13-09854

CHECKRIDE CHECKLISTS - Unique to the SureCheck brand. Incorporates FAA PTS standards for new ratings. Also serves as a handy reference during all phases of training. Packed with a wealth of information not found anywhere else in such a complete configuration. Perfect for students and seasoned pilots to renew rating certs. Include the updates from the FAA (effective August 2002). New redesigned format with increased size to make them

even easier to read.

MUTT MUFFS

- Over-the-Head Hearing Protector for Animals.
- Specially Designed Wide Foam Filled Ear Seals for Maximum Comfort.
- Engineered specifically to properly meet the contour of a dog's head
- Comfortable and Lightweight
- Adjustable Straps for Optimum Fit.
- Inner sound-deadening foam is the same density found in pilot's high-end headsets
- Made entirely in the United States of America
- Patent Pending

SIZE CHART - The overall circumference measurement of your dog's noggin at the largest point is the best determination of size, because if you choose a size too large, the muffs won't seal well against his head, and you lose all the sound-reducing properties you were shooting for. Your dog's weight is also a good indicator of which size to choose.

| Muff Size | Typical Dog Weight | Head Circumference | Inner Shell Width | Inner Shell Height |
|-----------|--------------------|--------------------|-------------------|--------------------|
| X-Small | 5-10 lbs | 7-9" | 1.5" | 1.625" |
| Small | 9-25 lbs | 9-13" | 1.75" | 1.75" |
| Medium | 20-50 lbs | 13-18" | 2.5" | 2.5" |
| Large | 50-95 lbs | 18-23" | 3.25" | 3.25" |
| X-Large | 95+ lbs | 23+" | 4" | 4" |

P/N 13-05541

CO-PILOT - TRIANGLE BANDANA FOR DOGS

The proper uniform for the distinguished canine aviator. Sewn on all three sides. Finished Sizes: Large: 21.5" x 21.5" x 29", Small: 14" x 14" x 20"
Large..... P/N 13-05547

Small..... P/N 13-05548

HYDRO-BOWL FOR DOGS

Next time your pooch is pantin' for a drink, pull out the convenient, collapsible Hydro Bowl. Waterproof and made of a high-tech, durable plastic canvas, the Hydro Bowl folds up and snaps closed into a compact triangle for storage. Attach it to a leash, backpack, bicycle, or a variety of other places for easy storage. Hold 5 cups
P/N 13-05546

DOG IS MY CO-PILOT - BUMPERSTICKER

"Dog Is My Co-Pilot" is the trademarked motto of Bark magazine - accept no substitute. As seen on dog-friendly cars from coast to coast!.... P/N 13-05545

E.S.P. CHECKMATE™

E.S.P. CheckMate™ is a 1st for Aviation, and the only product of its kind available. Our new "Emergency Substitute Pilot"™ could save the lives of you and your passengers by providing the most basic and simplest of terms and procedures to the NON-PILOT, in the unfortunate event the real pilot becomes incapacitated. E.S.P. CheckMate™ assists the NON-PILOT in controlling the aircraft, reaching help on the radio, and if necessary, landing the aircraft. The graphical format makes it easy and comfortable to follow. E.S.P. CheckMate™ can easily be the difference in the outcome of this most serious type of emergency. For safety

and readability, we are publishing only in 7.5" x 10" size.

P/N 13-01834

CHECKMATE CHECKLISTS

CHECKMATE CHECKLISTS

Checkmate is the only checklist that contains virtually all data desired by pilots to fly the airplane while excluding the extraneous information which leads to inefficiency, confusion and even refusal to use. They eliminate the tedious and cluttered 15-page flip-book that pilots quickly become discouraged from using.

Checkmate contains the most comprehensive V-speed section in the industry. V-speeds are listed in Knots and MPH. Checkmate not only makes a dramatic difference in everyday use, but also in critical situations. Emergency procedures are right there! Every time! With most of the emergencies there is no time to flip pages looking for the correct procedures.

Available for over 300 single and twin engine aircraft. All follow a standard format. Used by some of the best flight schools in the country. Checkmate checklists come in standard 6.5"x9" size.

CHECKMATE IFR

In the IFR environment organization and management lead to smoother, stress-free and safer outcomes. CheckMate IFR will assist you through preflight planning to touch-down on the IFR flight. Whether you are cleared for the complete approach or radar vectored to the FAF, CheckMate IFRs format will help keep the flight business orderly and functional. It is precise & specific to the different phases of those sometimes precarious flights. You will be reminded when to prepare and look ahead to each phase. A quick review of CheckMate IFR before flight will help you determine pilot and aircraft preparedness and legalities, how to give those greatly appreciated pilot reports on icing and turbulence, and what ATC expects you to do after radio failure; Professional information in a concise and orderly manner. Standard (6" x 9.5").....P/N 13-08805.....
 Compact (5" x 7").....P/N 13-08810.....

SURVIVING THE FIRST 24 HOURS CHECKMATE®

Surviving the First 24 Hours CheckMate® clearly details the procedures and equipment that you will need to survive a forced landing and the subsequent 24 hours. The preparation before a flight can easily make the difference between surviving or not surviving. This is one of the most important pieces of equipment in a pilot's pre-flight planning.

Available in three sizes.

Standard (6.5" x 9")..... P/N 13-00444
 Compact (5" x 7")..... P/N 13-00446
 Pocket (3.75" x 3.25")..... P/N 13-00447

CHECKBOOK CHECKLISTS

Aviation Checkbook is a high quality, multi-page laminated checklist utilizing factory type information for FAA Part 141 and 61 schools. Designed as a primary checklist giving all details and responses needed by new students or pilots wanting a multi-page checklist without the usual bulk. Shirt pocket size with mark and erase surface for notes. The various checklists for your aircraft are stacked and color tabs allow you to locate the checklist you need.

FLYWRITE COCKPIT WRITING PAD

FlyWrite™ is not another "flight planning" layout. It is designed to give you a dedicated place for all the information that flows while in the cockpit of the aircraft. Convenient top-bound writing pad. Each pad contains 50 5" x 8" sheets and can be used with or without standard junior legal vinyl binders. IFR clearances, ATIS, AWOS, frequencies, flight times, hobbs times, tach times, airport information, frequency changes, hand-offs, altitude changes, weather, etc, now have a home. There is also an area for random information or diagrams. FlyWrite™ also contains a handy vertical scale which measures mileage for WAC, SEC, TAC, NOS, JEPP, & ELA charts, eliminating the need for that ruler you can never find.
 P/N 13-03307.....

MOUNTAIN FLYING CHECKMATE™

CheckMate Aviation's new Mountain Flying CheckMate™ is a full color, plastic card that is a compilation of the special knowledge required for mountain flying. Competent flying in mountainous terrain requires knowledge far beyond what is taught in standard flight courses; and as most pilots discover, sooner or later, flying in mountainous terrain is inevitable.

CheckMate Aviation's Mountain Flying CheckMate™ covers both the rules and common sense of flying that are critical when in this aspect of flight. Available in 3 sizes. Each carries CheckMate's usual lifetime guarantee.

Standard (6.5"x9")..... P/N 13-02713.....
 Compact (5"x7")..... P/N 13-02714.....
 Pocket (6.75"x3.25")..... P/N 13-02716.....

CHECKLISTS

PROPILOT CHECKLISTS

Step up to professional quality with ProPilot Checklist! These handsome booklets are fully laminated and wire-bound for durability and long life, and are perfect for VFR and IFR pilots of all skill levels.

All Preflight, Normal, and Emergency procedures are included. IFR checklist items are integrated into phase of flight, and IFR Approach and Departure Briefing sections are also provided.

Flight planning is simplified by the inclusion of aircraft-specific performance data (V-speeds, takeoff distance, climb performance, cruise power settings, true airspeed, fuel burn, and landing distance), as well as weight and balance graphs. No

more digging through a bulky POH for critical performance numbers! Additionally, a wealth of other useful information is included, such as VFR communications and weather requirements, METAR & TAF codes, IFR Holding Procedures, illustrated Airport Signs & Markings, Light Gun Signals, and Intercept Procedures.

Conveniently sized at 6" wide by 9" high, ProPilot Checklist fits easily on your kneeboard. It's truly "The Last Checklist You'll Need!"™

THE PRECIFLIGHT CHECKLIST

More than just a checklist, PRECIFLIGHT® will actually help pilot along all phases of flight: from preparation to tie-down and through emergencies. It is a brightly colored 18 pages booklet that is logically divided to minimize page flipping. Once used to it, it is a natural as good landings.

It regroups important information such as light gun signals, VFR minimums, weather symbols and all that with easy to interpret drawings. Even better, it has features that pilots have to look for in other publications and equipment like a built-in 1/500 000 ruler, frequently used aviation phone numbers and Internet sites and more.

PRECIFLIGHT® was also designed for convenience: it will fit in your shirt pocket or clip on the aircraft yoke where it will be available to use with one hand. Made of a sturdy waterproof paper, it will last a lifetime. It is designed to conform to FAA and Transport Canada regulations by a team of flight instructors and airline pilots

CHAPPS CHECKLISTS

Chapp's Checker provides aircraft-specific, POH-accurate checklists for a number of airplanes. Made of heavy, plastic-laminated paper, the Checkers are top spiral bound and measure about 3 x 6.5 inches. Tabbed indexing of each page makes selecting the needed checklist a 2-second operation.

The checklists are presented in order of use during a normal flight. Emergency procedure checklists are boldly marked for quick access. In addition, there is a page on which you can write your local radio frequencies.

The POH checklists comprise just 85 percent of each Chapp's Checker. The remaining 15 percent is composed of good piloting procedures, such as when to contact ground control or the tower. A separate page lists all of the aircraft's V-speeds. The back cover provides general information about the aircraft in question, such as gross takeoff/landing weight, engine type, fuel capacity, and true airspeed, power settings, and fuel consumption (in gallons per hour) at different altitudes.

PLOTTERS

FLIGHT COMPUTERS

E6B METAL FLIGHT COMPUTER - The best slide-rule-style flight computer on the market, with solid aluminum construction and easy-to-read lettering. ASA's E6-B features a wind component grid and comprehensive cross-wind correction chart, and on the other side the slide computes time, speed, distance, altitude, true airspeed, and density altitude problems as well as conversions. Nautical and statute scales are included.

P/N 13-00813

E6B PAPER FLIGHT COMPUTER - Made from solid, heavyweight fiberboard, an economical version of the aluminum model described above including all its problem-solving features.

P/N 13-02298

MICRO E6-B - This pocket-sized, brushed aluminum E6-B is a full function aviation computer. Popular among military pilots, it features a high-speed and low-speed wind correction slide, high-speed compressibility table, and instruction manual. Micro E6-B performs all the standard manual flight computer functions, and it conveniently fits in a shirt pocket or glove box.

P/N 13-02299

E6-B HIGH SPEED SLIDE - A companion product, this slide picks up where the traditional metal flight computer leaves off (ASA-E6B), providing calculations for the high-speed realm of flight (in the range of 220-700 knots or miles per hour). Pilots simply replace their current slide with this one, which then continues to use the circular computer from traditional E6-Bs. The slide also

includes compressibility correction chart, ICAO Standard Atmosphere reference table, worldwide time conversion table, speed limits for the United States, and most frequently-used weight & balance formulas. All of the pertinent formulas & information required for high-altitude, high-speed operations. Meets both FAR & JAR (international) requirements.

P/N 13-02301

FOLDING LAP BOARD

This 9" x 16" flying desk has 2 large clips to hold in-flight necessities such as charts, flightlogs, and approach plates. Lost communications procedures for both VFR and IFR, light gun signals, position reports, frequencies, and transponder codes are silkscreened on the brushed aluminum lapboard for quick reference during

emergencies. It folds in half when less space is needed and for convenient storage. Foam strips on the back keep the lapboard comfortably in place.

P/N 13-02314

TRI-FOLD KNEEBOARD

For the pilot who has a little more to juggle, the Tri-Fold Kneeboard uses the expertly styled VFR Kneeboard in a 3-panel jacket. The high-quality construction features durable material & double-sewn seams where extra stress takes place. The color is jet black with a logo attractively embroidered in silver on the front. The left panel has ample

room for small books, papers and unusually shaped items. The center panel holds the kneeboard under clear plastic. Either side of the center includes a pen/pencil holder and buttonholes that allow the pilot to fold back one or both panels of the kneeboard with the legband. This is ideal when operating a cyclic or stick. The right-hand side contains a clear pocket for easy map viewing. The elastic legband has velcro closures and will comfortably fit any leg size. Try the kneeboard that puts everything at your fingertips.

P/N 13-06950

PLOTTERS

Durable Lexan® resin won't melt, warp or break in extreme temperatures - guaranteed! Each plotter features 8 scales to meet the needs of all VFR aeronautical charts - nautical on one side, statute on the flip. Nautical-Statute conversion scale also included. Made in USA.

ULTIMATE ROTATING PLOTTER - 13-1/4" long. Rotating azimuth eases flight planning with direct readout of course. Made in USA.

P/N 13-02302

ULTIMATE FIXED PLOTTER - 13-1/4" long. Quick scale reference is provided for both statute and nautical miles. Made in USA.

P/N 13-02424 .

ULTIMATE MICRO PLOTTER - 8" long. Convenient for flight bag, shirt pocket, or airplane storage. Made in USA.

P/N 13-02303

INSTRUMENT PLOTTER - ASA's instrument plotter features: 12 scales to accommodate both NOS & Jepp instrument charts, including a conversion scale for Nautical and Statute miles; holding patterns depicted for both Standard and Nonstandard entries; compass roses allowing quick course & bearing information; and professional layout enabling easy reading during en route spot checks.

P/N 13-02306

FIXED PLOTTER - Constructed of sturdy clear plastic with easy-to-read numbers and scales. It includes WAC, Sectional, and Terminal Area scales, and is checked and approved by the Weights and Measures Department.

Quick scale reference is provided for both statute and nautical miles.

P/N 13-02304

ROTATING PLOTTER - Made from the same material and having the same features as the Fixed Plotter, but with the addition of a non-slip rotating azimuth to ease flight planning.

P/N 13-02307

ASA IFR & VFR KNEEBOARDS

These IFR and VFR Kneeboards are an attractive, light gray, brushed aluminum. Instrument and visual information is clearly silkscreened on the boards so pilots can quickly reference rules at a glance when operating a cyclic or stick. All information on the Kneeboards match current Federal Aviation Regulations. The Kneeboards feature a comfortable, 1.5" wide elastic legband that hugs the leg without binding. Velcro fasteners

can be adjusted without removing the kneeboard and fits all leg sizes. A pencil/pen holder is designed into the leg for fast note taking. The Kneeboards also feature a 4-3/4" wide metal clip that is easy to lift and strong enough to hold NOS charts and other necessary papers. Paper-protector elbows secure material, yet papers won't rip when pulled out.

VFR Kneeboards P/N 13-06925

IFR Kneeboards..... P/N 13-06930

ASA PILOT SUPPLIES

APPROACH PLATE BINDER

Made of durable black vinyl with a reinforced spine, it has easy-to-open, 1-1/2" steel rings that accommodate the drill pattern of the approach plates. ASA wings tastefully silver-foiled on the front cover. Choose from either 4-ring NACO or 7-Ring design.

NACO.....P/N 13-01066
7-Ring.....P/N 13-02316

FLIP BINDER

Perfect for Instrument Pilots who carry a smaller number of approach charts. One-inch rings are attached to a sturdy poly backing, with a loose poly cover. Scoring on front and back covers allows you to flip charts completely around the rings and display the one you want on top. Compact, convenient, and practical.

P/N 13-02321

BINDER KIT

Contains 1 binder, 10 sheet protectors, 5 color side dividers and a sheet of area stickers. NOS kit also contains 3 color dividers which hang from the bottom.

NACO.....P/N 13-01065
7-Ring.....P/N 13-02322

ASA DELUXE RING BINDER

The Deluxe 2" 7-Ring Binder is made of richly-grained simulated leather with edge stitching. It's bound for maximum durability and equipped with a ring system that will keep your approach plates securely organized and easily accessible. Convenient 8.5" x 9" size makes it easy to fit in

almost any flight bag.
ASA Deluxe 1" 7-Ring Binder.....P/N 13-05759
ASA Deluxe 2" 7-Ring Binder.....P/N 13-05760

ASA 1 INCH 7 RING TRIP BINDER

The 7-Ring Trip Binder is made of durable poly. It's bound for maximum durability and equipped with a ring system that will keep your approach plates securely organized and easily accessible. The three rings are spaced to match the 7-hole approach plate drill pattern. Convenient 7" x 9" size makes it easy to fit in almost any flight bag.

P/N 13-05825

SHEET PROTECTORS

Made of durable, translucent plastic to protect the most frequently used approach plates. Sold in packs of 10.

NACO Vinyl Pocket pk of 10P/N 13-02317
NACO Poly Folders pk of 10P/N 13-05820
7-Ring Vinyl Pocket pk of 10P/N 13-02318
7-Ring Poly Folders pk of 10P/N 13-05821

5 COLOR DIVIDERS

For quick reference of various sections of both types of approach plate charts, these five distinctly-colored dividers extend out beyond the side of the charts. Set of 5.

7-Ring.....P/N 13-02323.....
4-Ring.....P/N 13-05826.....

ASA 4 RING NOTEPAD

Compact, convenient writing pad that fits in your approach plate binder. 100 sheets per pad. Weight .80lbs

7-Ring.....P/N 13-05823.....
4-Ring.....P/N 13-05822.....

CHART WALLETS

These chart wallets organize, hold, carry, and display standard FAA charts conveniently. All styles feature black covers, silver wings logo, and clear vinyl organizer pockets so you can easily find the correct chart in a busy or turbulent cockpit environment.

Accordion-Fold Chart Wallet - 10 map pockets plus front & back covers
P/N 13-02324

Book-style Chart Wallet - 6 double-sided pockets holds up to 12 maps between the covers.
P/N 13-02325

Large Book-style Chart Wallet - Pockets hold up to 22 charts between the covers. Riveted spine.
P/N 13-00412

YOKE CLIP

ASA's new yoke clip holds all the necessary flight paperwork right where pilots need it, leaving their hands free to fly. Simple to install, the black plastic, I-Beam construction is strong enough to serve as a pilot's third hand. The clip is higher than other yoke clips, holding sectionals, approach plates, flight logs, checklists, flight computers, and pens in easy view.

The unique, over-centering cam easily adjusts to fit all general aviation aircraft yokes without modification.
P/N 13-01043

QUICK CHECK CARDS

A great reference tool for student pilots, pilots who fly more than one aircraft, or pilots flying at a new airport. Convenient shirt-pocket size provides quick access to aircraft V-speeds, weight and balance limitations, airport information, radio frequencies, and light gun signals. The durable plastic cards have room for pilots to write in their own data. Sold in packs of 5.

P/N 13-02332

FLIGHT PLANNER SHEETS

Cross-country planning sheets contain a flight plan section, weight & balance calculation chart, special equipment suffix chart, fuel management, space for radio frequencies, & more. Sold in pads of 48.

P/N 13-02331

STUDENT FLIGHT RECORDS

ASA Flight Record Folders provide areas to record pertinent student information, stage checks passed, lesson content, lesson performance, flight hours, instructor notes & endorsements, solo endorsements or aircraft checkout records, and are current to both Part 61 & Part 141 program requirements. Sturdy & durable, these flight records are available

separately, as part of ASA's pre-packaged training kits, or as part of an ASA PACK - Personalized Aviation Custom Kit.

HOLDING PATTERN VISUALIZER

This useful tool shows a pilot which entry is appropriate given the assigned holding radial, making it a superb learning tool.

P/N 13-06940

LANDING PATTERN COMPUTER

Easily helps determine appropriate headings for each leg when landing or departing the airport - great teaching aid!

P/N 13-06935

HEADSET BAGS / FLIGHT BAGS

FLIGHT ATTACHE' - Holds all the materials a student pilot needs. 15" long x 11" deep.
P/N 13-02335

FLIGHT BAG - 23.5" long x 7.5" deep x 7.5" wide with expandable pockets.
P/N 13-02336.....

SINGLE HEADSET BAG - For those who like to fly with minimum baggage, this holds one headset, has extra pockets, and all-around padding.
P/N 13-02333

DOUBLE HEADSET BAG - Double-sided, 1/4" padding everywhere; can hold two headsets.
P/N 13-02334

ASA PILOT CAP

Pilot cap featuring comfort headband and classic wings logo. Stylish baseball cap. Black with classic grey trim neatly embroidered with white ASA wings. Adjustable headband for maximum comfort. No button to interfere with headset band. Long bill for sun protection. Perfect for cross-country flying, lounging with friends or on the tarmac hangar flying. Wear it proudly!
P/N 13-05841

FLIGHT COMPUTERS - LOG SHEETS - PLACARDS

AERO PRODUCTS RESEARCH CR COMPUTERS

CR computers are very popular with pleasure and professional pilots. They solve T/8/D and wind triangle problems for light aircraft as well as those which approach Mach 2 speeds. Corrections for errors of compressibility and temperature rise are computed with ease. The wind solution is displayed graphically using the small back-side discs. Each computer comes with handsome vinyl case and fully illustrated manual.

- CR-3** - 3-3/4" dia. shirt-pocket size (same as Jepp CR-5); vinyl P/N 13-03499
- CR-4** - 4-1/4" dia. (same as Jepp CR-2); vinyl. Standard model used by the military. P/N 13-03501
- CR-6** - 6" dia. Used by navigators for maximum readability (Same as Jepp CR-3); vinyl. P/N 13-03502

AERO PRODUCTS RESEARCH FLIGHT DESK

Folded size 8" x 9" Extends to 16" x 9" Anodized aluminum. Versatile space-saver lap desk locks in open position; folds in half for drop-in storage in your flight case. Heavy-duty clips hold charts and flight plans. Important VFR and IFR information always visible when open. Foam strips on back keep lap desk from slipping..... P/N13-03517

AERO PRODUCTS RESEARCH TIME/ SPEED/ DISTANCE COMPUTER

Time/Speed/Distance computers. "How-to-use" instructions printed right on the unit. Text printed in straight, easy-to-read lines; desired scales and windows located at a glance. Perfectly calibrated 2-color dials eliminate parallax errors. Fully illustrated instruction manual with each model. APR-303 3-3/4" dia. T/S/D computer with traffic pattern orientator; anodized alum. P/N 13-01133

THE ATIS WHEEL

Atis Wheel - Pilots and air crew now have the ability to reduce their pre-landing and pre-takeoff workload through the use of the amazing new Atis Wheel™.

The Atis Wheel™ is a mechanical device designed to help the airplane pilot in recording all ATIS information while presenting the data as a graphic depiction. The Atis Wheel™ is presented on a 5.5" x 8.5" rectangular durable format with seven individual 1.5" wheels positioned about the perimeter of the device along with two, 3" concentric wheels positioned in the center. Each wheel's topic coincides with

the sequential information reported in the airport terminal broadcast. Once the information is entered onto the Atis Wheel™, this displayed information is now available to the pilot for continued reference without the possibility of transcription error or forgetting the pertinent ATIS data. (It is recommended that the pilot listen to the pre-recorded ATIS information twice to verify that the correct information has been entered on the Atis Wheel™.) The Atis Wheel™ information coincides with the sequential layout of the Atis Wheel™, providing the pilot with all of the broadcast ATIS information data. Additionally offered on the Atis Wheel™ (though not offered in the ATIS broadcast) is an input on a wheel to display the airport Field Elevation, critical for instrument approaches. The Atis Wheel™ also displays clearly the visual relationship between the wind direction and the active runway, informing the pilot as to the pending cross wind takeoff and landing situation. The ATIS Wheel is 5-1/2" x 8-1/2" and fits nicely into a Jeppesen binder. This is a large format preferred by flight instructors and students. **Atis Wheel Pro** - Like the ATIS Wheel, but smaller (approximately 3.5" x 5.5") for the professional pilot to conveniently fit in a shirt pocket for quick and easy reference. Note, the ATIS Wheel Pro does not contain the "Wind Velocity", "Visibility" or RWY/Approach" wheels like its big brother ATIS Wheel Pro - Like the ATIS Wheel, but smaller (approximately 3.5" x 5.5") for the professional pilot to conveniently fit in a shirt pocket for quick and easy reference. Note, the ATIS Wheel Pro does not contain the "Wind Velocity", "Visibility" or RWY/Approach" wheels like its big brother ATIS wheel..... P/N 13-06643

ATIS wheel Pro P/N 13-05003

EZ ATIS REMINDER PILOT TOOL

The EZ ATIS Reminder makes it easy to communicate the ATIS identifier. No more fumbling through papers for the ATIS identifier - or worse yet, having to recall the prefix from memory! The 1-5/8" diameter knob with 1/2" pointer has a peel and stick adhesive tape on the back that can

be easily mounted on your instrument panel, knee board, or anywhere you need a quick ATIS recall. P/N 13-04920

AERO PRODUCTS RESEARCH T/S/D COMPUTER KEYCHAIN

1-1/2" diameter. Identical to the real thing, this traditional usable Time/Speed/Distance keychain has a beautiful compass star with flight plan on the back side. The computer keychain is calibrated meaning the ability to relate the key chain to the functions of the E6-B type Time/Speed/Distance computers. P/N 13-03505

AERO PRODUCTS RESEARCH CR COMPUTERS

Simplify VFR or IFR navigation with these handy logs which provide for listing of intersections, radials, frequencies, clearances and complete flight plan.

- EFL-100 Pad of 5-1/2" x 8-1/2" sheets; IFR Flight Logs P/N 13-03526
- EFL-200 Pad of 5-1/2" x 8-1/2" sheets; IFR Flight Logs P/N 13-03527
- EFL-100 Pad of 11 " x 8-1/2" sheets; organized detailed pre-planning and navigation on cross-country flights. Includes pre-flight checklists and sample instruction sheet. P/N 13-03528

AERO PRODUCTS RESEARCH PLACARDS

Now you can customize your cockpit with APR's easy-to-apply placards. Just cut out and press these stick-ons into place for that "factory-fresh" cockpit look. For all single and multi-engine aircraft systems, seaplanes, and gliders. Includes most-used legends (on, off, open, close, etc.), common amperage, voltage values, arrows, numbers and blanks. 8-1/2" x 10-1/2"; aircraft panel placard set; over 250 aluminum placards.

APR Instrument Panel Placard Set..... P/N 13-03522

EXPERIMENTAL AIRCRAFT CERTIFICATION KIT

A new amateur-built aircraft certification kit created by the Experimental Aircraft Association (EAA) gives builders a simplified way to complete the required FAA paperwork for their new projects. The Amateur-Built Aircraft Certification Kit includes everything you need to register and certify a new experimental amateur-built aircraft in the United States. The 15-page, step-by-step guide walks you through the entire process from

getting an N-number to the aircraft inspection, and provides samples to help complete each required form. The kit includes all FAA forms, Experimental sticker (in black), data plate, and a convenient placard decal sheet. P/N 13-04244

SPORT PILOT PRE-PRINTED LOGBOOK ENDORSEMENTS

The Instructors Endorsement Pack contains 14 sheets of labels. Each sheet of labels contains 10 copies of a specific endorsement. Each 2" x 4" endorsement label is identified by title and FAR number, has the exact wording as required by the regulations, and has data-prompted blanks for the students' name, your name, CFI cert.#, Biennial Flight Reissue Certification 61.56(a).

E6-B8P - Budget student computer, plastic body, plasticized wind slide; includes an 8" Navigation Plotter. P/N 13-03496.....

PILOT'S WIND VISUALIZER

The Wind Visualizer takes the guesswork out of crosswind takeoffs and landings. Simply put the Wind pointer on the wind direction, the Landing Pointer on the Runway heading, and "see" the wind in relation to your direction of flight. Then read your crosswind component from the table on the back. Simple, and fast to use. Durable non-warping 3.75" diameter plastic. Includes full instructions.

P/N 13-19520.....

RADIALMATE COMPASS ROSE

RadialMate™, a 3.5" clear 20 mil plastic compass rose allows you to instantly read a desired course by placing the product over any sectional, chart, or graphic. There are no reciprocals to calculate. RadialMate™ comes with a hole in the middle, allowing additional use as a string compass. It is conveniently sized to fit in your pocket. RadialMate™ also contains Safe Flight's vertical scale which measures mileage for WAC, SEC, TAC, NOS, JEPPE and ELA charts eliminating the need for that ruler you can never find.

P/N 13-08799.....

PDQ COMPUTER

The PDQ Computer is a quick visual presentation of the traffic pattern at your airport of arrival. Easy to operate with one hand, the PDQ shows you the 45° entry, downwind, base and final approach to the active runway. Durable plastic construction. Instructions included. P/N 8313.....

JEPPESEN STUDENT CSG COMPUTERS

This computer made of composite materials works just like an aluminum computer with all the same functions and features, but at a lower cost. Ideal for new students or as an extra to keep in your desk at home. Printed numbers are sharp, clear, and easy to read. Like all Jeppesen products, the quality is superior.

Plastic.....P/N 3866.....

Metal.....P/N 3867.....

EZ-VOR (A VOR TRAINING TOOL FOR STUDENT PILOTS)

Ever wish you could quickly determine where you are in relation to a VOR? I thought I was the only one! There are too many pilots that simply dial in a "TO" reading and fly to the VOR. Now you don't have to! EZ-VOR is designed to allow anyone, pilot or not, to quickly and easily determine the relative direction to the VOR.

Simply dial in your heading, your OBS setting and with a quick glance at your "TO - FROM" indicator and "Left & Right" needle deflection, your position relative to the VOR is amazingly apparent. Best of all, the directions are printed right on the back, no ten page manual to read! Small enough to fit on most kneeboards (5-1/2" in diameter) yet large enough to see clearly and accurately. P/N 13-04305.....

ASA E6B METAL FLIGHT COMPUTER

The best slide-rule-style flight computer on the market, with solid aluminum construction and easy-to-read lettering. ASA's E6-B features a wind component grid and comprehensive crosswind correction chart, and on the other side the slide computes time, speed, distance, altitude, true airspeed, and density altitude problems as well as conversions. Nautical and statute scales are included.

Standard..... P/N 13-00813.....

Mini..... P/N 13-02299.....

VOR FLASH CARDS

Designed to show any pilot how to look at a VOR receiver and read it at a glance. There's no time in the cockpit to spend slowly analyzing the CDI needle and To/From indicator! VOR-At-A-Glance flash cards will teach you: • The difference between VOR courses and VOR radials • What the VOR does not show you • The best way to think about the course deviation indicator • Inbound vs. outbound course indications • How to instantly know your position relative to the VOR • Tricks for reading interception courses right off the VOR • Pilots need to be able to look at a VOR and read the information off immediately. It's just like when you first learned how to read. There is a big difference between the ability to sound the words out and the ability to look at a work and just read it. Pilots need to be able to "read" the VOR! P/N 13-05773.....

PLOTTERS - COMPUTERS

PLOT-RITE ALL METAL NAVIGATION PLOTTER

The new Plot-Rite is an all metal navigational plotter for use with VFR sectional, terminal and WAC charts. The front has both sectional and terminal area scales and the rear has WAC and sectional scales. The top edge has the familiar 180° compass rose and the open center enables you to find longitude lines easily. Outside edges have full east and west routes, inside edges have north and south. Plot-Rite is all metal and will never break, warp, crack, shrink or distort in any way if left in the sun. Measures 2.5" x 12". Plot-Rite (Nautical Scale)

P/N 13-30300

THE AIRMILER TAPE MEASURE FOR CHARTS

An essential tool for every flight planning kit. A durable metal tape measure for measuring mileages on aeronautical charts. Sectional Scale (1:500,000) on one side, and WAC scale (1:1,000,000) on the other side. Kilometers, statute and nautical miles are shown on both sides.

P/N 8036

APS POWER WHEEL HORSEPOWER COMPUTER

Only device that we know of which can calculate your aircraft engine's power based on so many important factors. Using the RPM, manifold pressure, altitude and outside air temp, the pilot can use the Power wheel to calculate horsepower (as a % of max rated hp) very quickly and easily. Its calculations are based

on years of work done by the engine experts at Advanced Pilot Seminars and GAMI. Their calculations have proven their accuracy and worth to the pilot over years of use. Beyond the immediate answer to the question "How much power is my engine producing?" the information is useful in another way. Knowing how much power is being produced allows the pilot to operate the engine in a way that will reduce the stresses it sees, offering longer life and reduced operating expenses. Once the pilot uses the Power Wheel to find their % hp, they can take the next step to find the mixture setting that will be best for their engine. Built on the Red Box concept (and as seen in AOPA Pilot, Feb 2004, p 120) the mixture settings suggested by the computer will keep the engine's internal combustion pressures low, out of the Red Box region of operation.

E6-B4 Aluminum.....P/N 13-03960

E6-B HIGH SPEED SLIDE

Picks up where the ASA-E6B metal flight computer leaves off, providing calculations for the high-speed realm of flight (in the range of 220-700 knots or mph). Pilots simply replace their current slide with this one, which then continues to use the circular computer from traditional E6-Bs. The slide also includes a compressibility correction chart, ICAO Standard Atmosphere reference table, a worldwide time conversion table, speed limits for the U.S., and the most frequently used weight and balance formulas; all of the pertinent formulas and information required for high-altitude, high-speed operations. Comes with easy-to-follow instructions.

E6-B Flight Computer.....P/N 13-00813

WHIZ WHEEL HOLDING PATTERN COMPUTER

For instrument pilots, entering a holding pattern can sometimes be a challenge. The Instrument Pilots Whiz Wheel can alleviate this challenge by presenting pilots with pictorial views of both right- and left-hand holding patterns, and entry arcs for direct, parallel, and teardrop holding pattern entries. Made of sturdy plastic, the Whiz Wheel works for VOR, NDB (non-directional beacon), and localized facilities. Intercept angles are at the pilot's fingertips, and procedure turn information can readily be obtained by following the "prompts" on the device and aligning these prompts with the Whiz Wheel's compass marking. Intersection holding patterns can be pictured and coordinated using both VOR radials and cardinal headings. P/N 13-30210.....

DIRECTIONAL GYRO HOLDING PATTERN PROMPTER DECAL

Install this decal upon the face of your directional gyro and instantly determine entry procedures for both left-hand and right-hand holding patterns. Also includes prompts for headings used in teardrop procedures and procedure turns. Totally transparent. Includes instructional text. P/N 13-30215.....

PILOT'S "TIME MACHINE"

Convert the 12 hour clock to the twenty-four hour clock and to Universal Coordinated Time (UTC). Time zone chart is included. Fuel duration calculation can be determined with this new instrument. Use it to file accurate flight plans and to give position reports. P/N 13-30225.....

TRAFFIC PATTERN ORIENTER & SPEED COMPUTER

Graphically displays the headings required for standard or non-standard traffic patterns. Time, speed, distance computations, fuel consumption, true airspeed, mach and true altitude conversions. P/N 13-01133.....

JEPPESEN VOR/ADF MAGNETIC TRAINER

A great tool for demonstrating VOR and ADF navigation, the Magnetic Trainer includes an Instrument Board and a Wind Correction and Position Board, as well as an Accessory Kit with movable instrument indicators, rotating compass cards, a TO/FROM indicator, RMI designator sign, wind direction indicators, and miniature airplanes. This replacement accessory kit for the VOR/ADF Magnetic Trainer includes movable instrument indicators, rotating compass cards, a TO/FROM Indicator, RMI designator sign, wind direction indicators, and miniature airplanes in various colors. P/N 13-05789.....

UNBREAKABLE SUPER PLOTTER

Here's a special flight planning tool we really like. A colorful little plotter with a rotating azimuth that makes it much easier to plot a course line. Place the compass rose over your departure point and rotate the straight edge towards destination. Presto.. an instant readout of your course! Reads distance in statute miles or nautical miles for both sectional and WAC charts. Made of bullet proof Lexan. Won't crack, break, or warp in extreme heat or cold.
P/N 13-03473.....

FLIGHT FORMS

Pilot designed for pilot use - convenient kneeboard size (5.5"x8.5"). Color coded for instant recognition. Easy to read! Easy to use! Every flight-form comes with an FAA Flight Plan form. Each COMM-AID form also includes a three leg En-Route NAV-Log.

VFR CROSS COUNTRY FLIGHT PLANNING FORM - With step-by-step instructions. Folds to kneeboard size (5.5"x8.5") yet leaves all En-Route and destination information exposed for orderly display of in-flight information. Includes sections for weight and balance, fuel management com frequencies & airport diagrams. P/N 13-30115.....

EN-ROUTE NAV-LOG - For the more advanced VFR pilot, a nine leg En-Route NAV-log provides ample space for navigation data, time (estimated & actual) plus communication and destination sections. (25/pad). P/N 13-30119.....

WX-BRIEF FORMS -WX-BRIEF - forms take the mystery out of talking to briefers or controllers. Logical arrangement in correct briefier and controller sequence eliminates confusion. The WX-Brief form is arranged in briefing format to simplify note taking and increase understanding. Simply fill in the blanks as the FSS specialist gives a standard briefing. (25/pad)..... P/N 13-30116.....

IN-BOUND OR OUT-BOUND COMM-AIDS - Inbound or out-bound Comm-Aids organize your communications before takeoff. Know what to say and when to say it sections for ATIS, Clearance, Ground, Tower, Departure, & Approach. For use in class B, C, & D airspace. (25/pad)

| Out-Bound..... | P/N 13-30118..... |

HOLDUP HOLDING SITUATION INDICATOR

The Holdup is so easy to use that directions are provided on the device only because rust can develop on a pilot's holding techniques, especially for issued, nonpublished holds. They remind you how to set up intersection holds and station holds, if you forget. (There's also a built-in way to set up station holds in a single step.) Then, in both cases, you just find your heading to the fix on the compass dial, and read the entry in the zone next to it. At a typical intersection, there are 8 (eight) possible holds that can be assigned. "Hold south of OR-VIL intersection on the 340° radial, left turns?" You won't believe how easy this is with The Holdup until you try it. P/N 13-03365.....

HOLDING PATTERN AID

How would you like to increase the chances of passing your instrument rating? Did you know that the number one area that instrument applicants fail their check ride is Holding Patterns? It is not the hold itself, but the ENTRY procedure! Help yourself pass your test with this simple to use static clink overlay. Simply place the arrow on the radial that you are instructed to hold on and the holding pattern is overlaid on top of your heading indicator. The HPA helps you visualize the pattern quickly and easily while increasing necessary situational awareness. No need to shuffle in your bag for a piece of cardboard or draw a picture on your knee board, the HPA will stick to your aircraft window and easily peels off when you need it. One package includes four HPA's, two left hand holding patterns and two right hand holding patterns. Developed by a Certified Instrument Flight Instructor with the intent to decrease the failure rate of instrument students and increase the level of safety that pilots are entrusted with. Get some First Aid for your holding patterns, get the Holding Pattern Aid. Measures 3" in diameter. White lines and text on a clear background.
P/N 13-04166.....

FLITE-TAPE

NAVPRO specifically designed the Flite-Tape for aeronautical use. It is available for either Sectional (1:500,000) or WAC (1:1,000,000) charts and is graduated in nautical miles. The Sectional Flite-Tape measures up to 500 n.m. and the WAC Flite-Tape measures up to 1,000 n.m. This practical product offers you many advantages, for instance: • Measure the distance between any two points on a typical chart with out "stepping off" (a typical Sectional Chart measures 375 n.m., corner to corner). • Establishes an accurate straight line course between distance points in an instant. • Flexible tape is ideal for cockpit use and on pilots lap. The Flite-Tape is pocket size (2" x 1-3/4" x 1/2"). Steel tape is housed in a high impact plastic case. The locking mechanism means you extend only as much of the Flite-Tape you need. The Flite-Tape's unique end-piece is easy to position over a check point. Flite-Tape is a quality product and comes in a vinyl storage pouch.
Flite-Tape Sectional Charts.....P/N 13-01038.....\$8.50
Flite-Tape WAC Charts.....P/N 13-06001.....\$7.95

FLITE-TRAC

Flite-Trac is specifically designed for aeronautical use. It simplifies measuring headings from aeronautical charts by reading naturally. Flite-Trac uses a complete 360° compass rose, and avoids any confusion in determining heading. Its square shape, aided by parallel grid lines, aligns easily with the lines of latitude and longitude on the chart. This logical protractor offers you several advantages in the cockpit: • It is less awkward than a typical plotter, yet shows the complete compass rose on a larger scale. • Measures short distances in flight. Its grid is to a 5 n.m. scale on a Sectional chart and has a short distance scale for quick in cockpit use. • The magnetic variation formula is printed directly on a Flite-Trac to give you confidence in calculating a magnetic heading. Flite-Trac avoids the necessity to slip a plotter to a map grid line or the need to use parallel rules. Flite-Trac is a quality product made of lexan in the USA. It will not warp in a hot aircraft.
P/N 13-01039..... ea

KNEEBOARDS

VFR/IFR NAVBOARD & CHARTSAVER

Hold charts between two clear plexiglass surfaces for in-flight reference. Visible from both sides, so you can use two charts. One facing in each direction. Mark plexiglass with grease pencil without defacing chart. Pilot course lines, destinations, checkpoints, headings, vectors, etc., directory on surface. Revisions can be made during flight, easy to erase after flight. Charts stay fresh and reusable many times. Measures 12" x 10".

P/N 8154

SOFT-G PLUS KNEEBOARD

This kneeboard is originally designed for high performance fighter & attack aircraft. Standard features include: reversible clip board which allows pocket and document loops to be reversed right or left side, 1-1/2" wide adjustable plastic strap, clear plastic information pocket, removable document loops, 4 elastic pen/pencil slots, side release buckle, durable wire clip, and NEG-G strap.

P/N 13-12655

The performance package includes: information cards, clear document protectors, removable document protectors, and releasable cable ties (holds document protectors securely to kneeboard).

P/N 13-12656

TRIFOLD KNEEBOARD

The standard features include: right and left light pockets that double as pen/pencil pockets, 1.5" wide adjustable plastic strap, 4 clear plastic information pocket, right & left document loops, side release buckle, durable wire clip, and padded backing

P/N 13-12660

The performance package includes: information cards, clear document protectors, flex light with fixed or adjustable beam, and releasable cable ties (holds document protectors securely to kneeboard) optional.

P/N 13-12661

9-G PLUS KNEEBOARD

This kneeboard is originally designed for high performance fighter and attack aircraft. The standard features include: right and left light pockets that double as pen/pencil pockets, 1.5" wide adjustable plastic strap, 3 clear plastic information pocket, right and left removable document loops, side release buckle, easy access pocket, durable wire clip, and padded backing.

P/N 13-12650

The performance package includes: information cards, clear document protectors, removable document protectors, & releasable cable ties (holds document protectors securely to kneeboard).

P/N 13-12651

MINI TRIFOLD KNEEBOARD

This mini trifold kneeboard measures 8" x 16.5". The standard features include: reversible clip board which allows pocket and document loops to be reversed right or left side, 1-1/2" wide adjustable plastic strap, clear plastic information pocket, removable document loops, 4 elastic pen/pencil slots, side release buckle, durable wire clip, and NEG-G strap.

P/N 13-12665

The performance package includes: information cards, clear document protectors, removable document protectors, and releasable cable ties (holds document protectors securely to kneeboard).

P/N 13-12666

JEPPESEN IFR THREE-RING TRIFOLD

The Jeppesen three ring trifold is great for holding approach charts and features three approach chart pockets, collapsible rings, elastic pen / pencil / penlight holders, and valuable IFR flight information the clip board. Includes free U.S. Low altitude planning chart. Size: 10"x 20" open.

Kneeboard/Clipboard

IFR Clipboard only with leg strap.....P/N 13-06956-1

VFR KNEEBOARD

This kneeboard places information at your fingertips. It holds charts, flight computers and much more. An elastic leg strap holds this unit comfortably in place with a velcro closure. The metal clipboard (also available separately) contains valuable information for your VFR flight needs. An additional strap is included allowing you to use your clip board independent of the kneeboard. You are really getting two products in one.

NAV-DATA VFR KNEEBOARD

NAV-DATA Featherweight Kneeboard. This weighs approximately 10 ounces. This board is similar to a clipboard but is much sturdier than a standard clipboard and much less cumbersome in the cockpit (dimensions are 7"x10"). It includes A VFR reminder table that includes conversions, light gun signals, flight plan info, etc.

Both boards are outfitted with our comfortable form-fitting knee saddle and velcro strap assembly to ensure the board stays securely in place.

P/N 13-06086

NAV-DATA IFR KNEEBOARD

Once you own a Nav-Data IFR kneeboard, you can customize it's contents with your personalized data by simply filling in the blank 5 1/2 x 8 1/2 forms which include:

- * aircraft checklist
- * local area NAV and Com frequencies
- * navigation logs
- * flight plan forms
- * clearance copying pad

By placing these pre-recorded forms, approach plates, charts, etc., into our 3-ring transparent vinyl pocket page system (8 vinyl pockets included), you will have quick access to all of your important data. Note the retractable slider tab supporting the cover (Chart board) when open.

P/N 13-06085

PS

KNEEBOARDS

FLIGHT DESK TRI-FOLD KNEEBOARD

Our Flight Desk Kneeboard greatly improves cockpit organization of charts and accessories. Unlike some other kneeboards with limited utility, our Flight Desk Kneeboard will hold sectional charts, a large E6B type computer, and has 2 elastic loops on either side of the clipboard to hold a goose-neck type flashlight. If the middle loop is not used for a computer, it can be used to hold a handheld transceiver. Made of durable black cordura. Size: 19.25"x9.5" unfolded. Clipboard size: 6" x 9.5". P/N 13-03474

NAV-DATA KNEEBOARD

The Nav-Data Kneeboard is the most well-organized kneeboard you'll ever own. It's like having a flight desk strapped to your leg. The Nav-Data Kneeboard is a unique cockpit tool which combines all the function and features of a lap board, clipboard and VFR/IFR chart holder giving it a solid reputation as the 'CHAIRMAN OF BOARDS'. The Nav-Data Kneeboard was designed, hand-made and then flight tested by experienced pilots for more than ten years. It is

manufactured using durable high-tech composite laminate and anodized aircraft grade aluminum P/N 13-06005

ORGA-KNEE-ZER™ KNEEBOARDS

ORGA-KNEE-ZER™ Kneeboards are extremely versatile, organizer/kneeboards providing a standard 7-ring binder on a very stable platform with built-in pencil sharpener, combo maglite/ pencil holder and many other unique features. Compact stowage, rugged materials and powder coat finish, add even more to their rich feature set. Use for VFR or IFR flight, using NOS or Jepp charts and see how their versatility can adapt to your demanding and varied needs as pilot. The patented design of Model A1-MC allows you to flip through your charts, checklists or other reference materials, with unobstructed access to the writing surface for jotting ATC instructions or holding flight plans. It's excellent for most general aviation aircraft and is very popular with Cessna and Piper pilots. It's 9" long x 8" wide and up to 16" wide when fully

open. It can also be used as a simple clipboard for preflight checks when closed (includes 3 chart pockets). P/N 13-03326

THE HEADS UP FLIGHT DESK

The Heads Up Flight Desk was developed by a certified flight instructor and honors student at Embry-Riddle Aeronautical University. While studying human factors in aviation safety, he noted that on every airline flight deck you would find a yoke mounted chart desk. The reason for the board being mounted there is to keep important information in the normal field of view for the pilot. Having to look down

and away from this normal field of view is recognized as being a hazard to flight, because it takes the pilot's eyes away from scanning either the instruments or outside the aircraft for conflicting traffic. This innovative product is a great safety enhancer. Convenient for keeping important documents in view, such as instrument approach plates, airport diagrams and flight logs. As an additional safety enhancer, we imprinted important safety briefing items on the surface of the desk. Included are a passenger briefing, crew briefing, engine failure during takeoff briefing, engine failure in flight memory items, and a pre-landing checklist. FEATURES: · Aircraft quality aluminum clipboard for durability · Low-profile spring steel clip holds documents in place · Velcro® included for attachment to yoke · Heavy-duty steel spacer and spring steel clamp · Perfect size for approach plates and airport diagrams · Easy fit in flight bags due to low profile hardware · Yoke tube clip fits 3/4 to 1-1/8" tubes (other sizes available) · Guaranteed against breakage for the life of the product* Lighted Version: · LED light illuminates entire surface for ease of reading at night · Flex neck on light easily stores out of the way for day use. · LED lasts 100,000 hours / included batteries last 100 hours. ARMBORD

The ArmBoard provides agronomical, space saving writing surface as natural to wear as a wrist watch. Regardless of how large or small the cockpit is, the ArmBoard truly frees up much needed space.

The product was also tested by CFIs and proved extremely useful in taking notes during flight lessons and jotting down student performance comments for follow up during ground school. A writing pad is included with a flight planner version sold separately along with various flight reference cards to be used on the inside flap of the ArmBoard. P/N 13-06021

FLYBOYS GEAR FOR PILOTS

FLYBOYS PUBS BAG

Ideal for keeping things "co-located" while you're flying and mission planning. Integrates perfectly with FlyBoys kneeboards. Top opening flap gives access to the main pockets. Additional smaller external pockets are located in the front, rear as well. Handy for smaller items or for sliding enroute charts and maps for quick access. Top, front and back are secured with sturdy Velcro™. Pocket on one side for a water bottle or sunglass case. Slots on the opposite side for 2 pens or pencils. The most popular choice of most fighter and trainer pilots no matter what the airframe. Also, an excellent option for civilians looking for a no frills - priced right bag. Measures 8 1/2" x 11" x 1" empty. Fully loaded it will expand out to 8 1/2" wide!

FLYBOYS MISSION PUBS - BAG

Longer and wider than the FB1020 Regular PubsBag, but not as tall. Fits everything you will ever need for your mission plus some! Three main compartments comprise this model. Two large compartments and the third is divided in the middle. No external pockets on this model, however the internal capacity is awesome. Favored by F-15E, B-1, B-2, and C-130 aircrew. It's also popular in the USAF/USN pilot training environment. Outside dimensions are 9" x 11" x 1" empty, and fully loaded it will expand to 6 1/2" wide.

FLYBOYS CREW BAG

Slightly smaller than Fly Boys Large Crew Bag but with all of the features you will need to get the mission accomplished, and lots of value. Double stitching and heavy duty zippers will make this bag last a long time. Removeable shoulder strap with a rubberized pad which keeps this bag from slipping off of military flight jackets. Exterior Dimensions: 17" x 11" x 11" Interior Compartment Dimensions: 13" x 7" x 9"

FLYBOYS LARGE CREW BAG

Lightweight but heavy duty bag at a fair price. Double stitching and reinforced seams are standard. Silent rubber zipper pulls. The awesome nylon zippers are self repairing and provide a significant level of water resistance. The removeable shoulder strap has a pebbled shoulder pad unique only to Fly Boys. This keeps the bag from slipping off of slick nylon shell flight jackets. All new gray interior which provides high visibility for finding items inside the bag in low light conditions. Sturdy the moveable/ removeable interior dividers are built. New retention sleeve for flashlights has been incorporated. Super tough PVC armoring incorporated into the bottom of the bag. Virtually waterproof along the bottom and provides additional protection and structure to the unit. Exterior Dimensions: 22" x 14" x 12" Main Compartment Dimensions: 16" x 11" x 11"

FLYBOYS HELMET BAG

420 Denier Cordura Nylon with 1/2" cloth poly-fill to cushion your helmet. Heavy duty nylon zipper - resists snags. Two interior pockets WITH VELCRO CLOSURE that fit your DTC, VTR tapes, sunglasses or water bottle without having them fall into the main compartment when you put it down! This super tight knit nylon shell is extremely water resistant and provides superior protection for YOUR expensive equipment - and the interior lining is extremely soft. It will not scratch your visor. Oversized from standard issue versions, it is superior for helmets with with NVG or HMS mounts! Two NEW pockets for smaller items. Comes with an exact color matched, adjustable shoulder strap fitted with a gripping contouring rubber shoulder pad for hands off carrying if necessary - It won't slip off of your shoulder. Inside Dimensions (FLAT): 19 1/2" Wide 20" Tall.

- Black..... P/N 13-05569
- Green..... P/N 13-05570

FLYBOYS CHECKLIST PAGES

Heavy duty plastic FlightCrew checklist pages. Sturdy construction equals long life. Easy to use, with thickness that resists getting brittle or tearing in cold environments. Pages are top loading and are excellent for protecting your local approaches or condensed aircraft checklist.

- Sheet Size: 8" X 5" PN 13-05627
- Bulk back (25 Pk.) PN 13-05629

OVERSIZED CHECKLIST PAGES

These are great if you are ready to start putting originals in the pages instead of shrunken copies! As you can see, a full size Jeppesen chart slides right in! Now your mission data cards fit, your target photos can get more detail in them, and your attack cards slide right in without making a trip to the copier to shrink or the paper cutter to trim! These are the same construction as the regular, just bigger. Great in extreme temperatures and long lasting. Spacing on the holes matches up with the FlyBoys KneeBoard with Eyelets and Jeppesen charts. Size is 5 1/2" X 8 1/2" - really makes a difference.

- Sheet Size: 8-1/2" X 5-1/2" PN 13-05628

EXTRA TALL PAGES FOR BIG CHECKLIST

Heavy duty plastic FlightCrew checklist pages. Sturdy construction leads to a long life. Easy to use but heavy enough to not get brittle or tear in extremely cold environments. Pages are top loading and are excellent for protecting your local approaches or condensed aircraft checklist. USABLE interior dimensions: 5"x11", overall width including checklist ring holes 5 7/8"

- Sheet Size: 5" X 11" PN 13-05630
- Bulk Pack (25 Pk.) PN 13-05631

FLYBOYS HARD PLASTIC COVER SET FOR EXTRA PAGES

The new Cover Set for the FB2203 pages are great. They are perfect for protection of the pages as well as providing structure for these tall pages. Without these covers, they tend to sag due to their height. Buy as many pages as you need, as many cover sets as you need. Sheet Size: 5" X 11"

- PN 13-05632

OVER SIZED FLIP CHART PAGES

Over sized top loading pages with three ring holes in the top for those checklists and situations that flow better than the normal "book format." Dimensions: 9.25" x 6".

- Sheet Size: 8" X 5" PN 13-05633
- Bulk Pack (25 Pk.) PN 13-05634

FLYBOYS CHECKLIST RINGS

Durable. Unbreakable. Multi-Purpose. Safe. Opaque nylon ring to hold your checklists and in-flight guides. Or use them for outdoor use where metal rings would rust or wear out. Patented ball-lock design to prevent FOD out on the flight line. The nylon ring is very low resistance as well. Once they are closed, they stay closed. When closed, they are a 2.5" diameter ring. Opened, they stretch to 5.25". For most applications 4 rings is plenty for keeping your checklists or inflight guides secure. Pack includes 10pieces. Color is clear/opaque. P/N 13-05621

FLYBOYS PILOT LOGBOOK

Represents a comprehensive look at your military flying career. Special considerations were made for this book that no other logbook will provide. If you are serious about keeping track of your flight time, and operate Army or USAF rotary aircraft - this is the book you need with no question. Record your own flying history of missions, upgrades, checkrides and awards right in this beautiful and durable logbook. This book will hold at least 10 years worth of flight history. Dimensions: 9" tall x 7 7/8" wide x 1" thick

- Airforce Pilots Fly Logbook..... P/N 13-05625

ASA IFR TRI-FOLD KNEEBOARD

Strong aluminum tooled clipboard silkscreened with important IFR information fits into black 3-panel jacket. Has room for charts, books, flight computers, etc. P/N 13-05840

ASA VFR TRI-FOLD KNEEBOARD

This kneeboard uses the VFR Kneeboard in a three-panel jacket. The left panel has ample room for small books, papers and oddly-shaped items. The center panel holds the kneeboard under clear plastic with a pen/pencil holder and buttonholes on either side.. The right-hand panel contains a clear pocket for easy map viewing, and the elastic leg band's Velcro closures fit any leg size comfortably. Black nylon with embroidered silver wings logo. Kneeboard is 6-1/2" wide x 9-1/2" high. P/N 13-02712

BLOCKALLS TRAINING GLASSES

Designed by pilots for pilots. Blockalls™ resolve problems with existing view limiting devices. Weighing in at just under 1oz, it's easy to forget you are wearing them. Engineered to easily penetrate the seal of your headset eliminating the hassle of having to remove it first and

can be worn for extended periods of time without discomfort, thanks to the soft rubber nose piece and streamlined temple tips. Tailored off center viewing also keeps more of your time inside the flight deck rather than outside. Recommended by AOPA/ Flight Training.

JIFFYHOOD

A lightweight plastic hood that does the job inexpensively, Jiffyhood stows rolled up in a flight case, or even in your pocket. Has an adjustable elastic headband for comfortable fit. P/N 13-03457

FRANCIS IFR HOOD

The Francis hood restricts your vision totally to your instruments and because it's so small, it won't block any part of an instructor's vision. It's made of lightweight but shock-resistant plastic, and has a cushioned face pad for comfort, Adjustable elastic headband. P/N 3362

JEPP SHADES

Replaces bulky, hard-to-use instrument training hoods. The improved design allows better student/instructor interaction. The Cockpit proven design works conveniently under headsets and the universal adjusting strap reduces pressure on the ears and temple. The Velcro™ strap fits comfortably and flip-up lens allows convenient IFR/VFR flight transition. The high quality polycarbonate lens is impact resistant. P/N 13-404311

FOGGLES

A creative solution to the problems caused by wearing a large hood on your head. Foggles fit and feel like glasses, but the opaque frosting on the top and sides let you see only the instrument panel. Your out the window view is always foggy. Wear them with headsets and microphone with no interference or discomfort. They come with a protective carrying case and weigh only two ounces. P/N 13-06500

SUPER HOOD

This Super Hood is one of the safest, most comfortable and best made instrument training hoods we've found anywhere. Ideal with eye glasses or headsets it slides in under the headset without relinquishing control of the aircraft and it can be instantly removed at any time for a safe approach or landing. Blocks outside reference but provides a full panel view to reduce vertigo. Light weight (3 oz.) and comfortable. P/N 13-30200

VIBAN IFR TRAINING HOOD

Pilots prefer ViBAN over other view-limiting devices because it weighs only 2 oz., making it easy to put on and take off during flight. Its eye-catching design is skillfully engineered to provide a perfect view of the instrument panel while providing complete occlusion forward and to the side. Even more, ViBAN folds compactly to fit in its own durable case and is easily stored in your flight bag.

Without Nosepiece.....P/N 13-02022

With Nosepiece.....P/N 13-02023

OVERCASTERS

Overcasters is a unique IFR training tool which clips to glasses (sunglasses or RX) in seconds. Flip-up in one easy motion for easy transition. Feather light with no straps, helmets, or hoods. Accepted by IFR examiners for checkriders. P/N 13-33799

ASA HOODWINK IFR TRAINING HOOD

Unique design easily and automatically springs open when removed from its pouch and packs away for storage with just a simple twist. Lightweight, yet durable enough to withstand the rigors of daily use. 4"x4" slim pouch is small enough to fit in a shirt pocket or in almost any flight bag compartment. Can be used with or without headsets. One size fits all. P/N 13-05620

CLOUD-EEZE™ IFR TRAINING GLASSES

IFR Glasses' Old Foggies™ brand view limiting device was developed in order to balance the training value of a view limiting device without further limiting the pilot from being able to read his/her charts. Old Foggies™blend of precision fogging and custom powered corrective lenses allows for the precise amount of the instrument panel viewing without any view of the horizon. Old Foggies™ are available in customizable powers with no need for a prescription. ASA AIRCRAFT FLIGHT LOG/ LOGBOOK (SP-FLT)

Spiral-bound and perfectly sized to fit in an aircraft glove box or chart pocket, this logbook is a quick reference to the recent history of the airplane so pilots have immediate access to the airplane's records without needing to dig through logbooks usually kept in the maintenance hangar. The Aircraft Flight Log fills a gap in aircraft records for pilots, and instantly allows them to know the status of the aircraft they are about to fly. P/N 13-03163.....

PLANEVIEW AIRCRAFT FLIGHT LOGS

There are several things that make this flight log useful to so many owners and operators. Its size is compact and can be easily stored in a glove box or side pocket. You only have to use the categories that are important to you. The owner of a Piper Cub would not use the logbook to the extent that a Piper Mirage owner/operator would, but it can easily accommodate the needs of both aircraft. Multiple pilots can use the book, so it can be used in an aircraft that is used in partnerships, flight schools, charter and many other operations where there are a number of different pilots flying the aircraft. A flight school or aircraft rental company could track how their aircraft is being utilized.

Single engine log.....P/N 13-01946

Multi-engine log.....P/N 13-01947

INTERNATIONAL PILOT LOGBOOK

In addition to complying with all the FAA regulations, the international logbooks follow all ICAO and JAA recordkeeping requirements pertaining to pilots. These are the two governing bodies regulating the aviation industry outside the US.

The International Pilot Master Log is perfect for professional aviators, or those who fly frequently. Hardcover: 11"x6.5", 278 pgs. Includes green summary pages. P/N 13-02554

The International Pilot Log is a slightly smaller version of the Master Log. Hardcover: 7.75"x4", 68 pgs. P/N 13-02553

AIRCRAFT EXPENSE & USAGE JOURNAL

This product is a compact 32 page journal, measures 4 1/4" tall by 2 3/4" wide, is assembled with 2 staples, and can easily fit into aircraft glove box or shirt pocket. Weight is approximately 1/2 oz. Printing is black on cover of white 67 lb cover stock paper and on pages of white 20 lb paper. Journal covers a full one year period, contains spaces for 20 transactions per month, and includes

a monthly/yearly summary.

Aircraft Log.....P/N 13-16500

Engine Log.....P/N 13-02253

Propeller Log.....P/N 13-02255

ASA AIRCRAFT FLIGHT LOG

The ASA Flight Log is the perfect tool for aircraft owners and aircraft flown by multiple pilots to keep track of the care and use of an individual aircraft. Spiral bound and perfectly sized to fit in an aircraft glove box or chart pocket. Logbook pilots will have quick reference to the recent history of the airframe without digging through those usually kept in the maintenance hangar. P/N 13-03163

ASA PROPELLER LOGBOOK

Record data for hub & blade inspections, repairs and alterations, airworthiness directives, & factory bulletins. Soft cover, Black, 7-1/4" x 4", 20 pages.

P/N 13-32370

ASA AVIONICS LOG BOOK

Includes entries for avionics equipment, VOR accuracy, transponder & ELT checks, AD & SB compliance, maintenance records. Soft cover, blue/gray, 7.25"x4", 64 pgs.

P/N 13-02315

ASA AMT LOG BOOK

Designed for Maintenance Technicians, IA-qualified mechanics, and students to log training and educational requirements, work performed, and experience for the purpose of tracking for future certification, recurrence, employment applications, school records, or insurance applications. Plastic coil binding stays open on current page.

Soft cover, 6 1/2" X 11", 192 pages. P/N 13-02313

FLIGHT SCHEDULE LOG

Essential to smooth dispatching, features include: a replaceable perpetual aircraft/ instructor entry panel; standby request section; and time in 15-minute blocks. Charcoal Gray binder is 17-1/4" x 13-5/8" with 15" x 12" pages for easy viewing. 60 pages included, refill packs available.

P/N 13-02308

FLIGHT SCHEDULE REFILL PACK - Can be used over and over with this 60-day refill. P/N 13-02309

PS

PILOT LOG BOOKS

JEPPESEN PROFESSIONAL LOGBOOK

This professional log book from Jeppesen, measuring 6-1/2" x 11" is constructed of sturdy, easy-to-read ledger paper & includes an elegant cover with a gold sticker in which you can write your name on.

P/N 13-21728

JEPPESEN PROFESSIONAL EUROPEAN LOGBOOK

Complies with JAR 1.080 regulations for logging flight time in Europe. handles 10 years of data. Size: 17.1 x 28.6 cm

P/N 13-02212

JEPPESEN PILOT LOGBOOK

Our 96-page permanent record offers large flight time category spaces, arranged according to FAA regulations. Printed on "easy-eye" green pages that resist "bleed through". Size: 8-5/16" x 5-5/16"

P/N 13-21732

LEATHER LOGBOOKS

Inside the cover is an inserted loose-leaf book that will allow replacement pages when required. The 6-ring binder is designed so it can be replaced if damaged. All metal parts of the book are 24K gold plated for endurance and lasting looks. The pages are made of special hand picked quality paper with follow through lines. Has memorandum pages, annual flight totals, flight summary pages, notes, endorsement pages, vinyl document savers, and vinyl picture savers. The Old World Leather Logbook has naturally embossed lettering. The Premier Leather Logbook has gold lettering. Size: 10" x 7".

POWDER PUFF PINK LOGBOOK

The Powder Puff Pilot standard logbook has a pink, protective hard cover with the Powder Puff Pilot logo on the front. It's standard size (8 1/4 by 6 1/4 inches) with 52 pages of all the record keeping, endorsements, and flight log information that every pilot needs. Inspirational quotes from the famous pioneers of women aviation sprinkled throughout to keep you motivated, inspired, and flying high.

P/N 13-06342

CLASSIC BLUE AERLOG® TRIP & EXPENSE RECORD

The Classic Blue Aerlog® is the original pocket sized, permanently sewn-bound book, much like a traditional Master Log book, only smaller. The Aerlog® Classic makes transcribing to another Master log book unnecessary. The Classic Blue Aerlog® has a separate "pay section" that is preferred by pilots who like to keep their pay time right next to their flying time.

P/N 13-20155

THE LITTLE MAROON AERLOG®

Designed for all pilots who record only their flying time and expenses. The Little Maroon Aerlog® has 224 loose pages that have a semi-concealed black wire binding. Water resistant vinyl cover. Has the same proportional spacing and the convenient look and feel as the Classic Aerlog.

P/N 13-04431

LIGHTER LOG

Plugs into your aircraft's lighter receptacle and tracks each flight effortlessly. Monitors the system voltage and warns of possible generator or electrical problems. Plug it in to any 12 or 24-volt system and forget it. Up to 500 flights may be recorded and stored in the internal memory for 10 years. Attach the LighterLog to any Windows 95/98/2000/Me personal computer using the included serial cable and download the flight records to the included Lighter Logbook software. Optionally attach the LighterLog to any industry compatible GPS or LORAN digital port and the LighterLog will record departure and destination information. If no GPS/LORAN is available, the Lighter Logbook software will list all airports within cruising range of the recorded flight time. Just point and click on the destination airport. Print familiar style logbooks from the computer whenever you like.

P/N 13-03299

STANDARD PILOT MASTER LOG BLACK

Hard cover, 6.5"x 11", 278 pages.

P/N 13-32392

PILOT LOGBOOK (ASA-SP-10)

This new introductory logbook is perfect for flight instructors and flight schools to start students out with an inexpensive logbook. With space for 16 separate flight entries, a ground instruction log, several solo endorsements, and a separate log for each type of aircraft flown, this logbook is great for introductory flights, first flight lessons, promotional give-aways and more.

P/N 13-05670.....

PROFESSIONAL PILOT LEATHER LOGBOOKS

These Professional Pilot Logbooks are the highest quality logbooks we have seen, and we are proud to make them available to Aircraft Spruce customers. They are designed and made to last a lifetime. Available in Aviation leather and brown leather which are styled to look like a log book dating back to the early days of aviation, as well as black leather which is standard in modern log books. Most are bound from cloth over cardboard or from patent or genuine patent leather. Both are substitutes for what we're looking for. In fact, the genuine patent leathers are simply 'paper' leather glued onto cardboard. This logbook is bound from true leather. The log pages are designed to keep traditional logging info but to provide more flexibility. It has customary Date, Aircraft, Pilots, Route & Remarks sections. Each page is 8.5"x 9"; 20 entries per page; 288 pages which allows for 2600 entries. ..Aviation - Brown leather.....P/N 13-02139

Antique - Brown leather.....P/N 13-02141

Black leather.....P/N 13-02140

STANDARD PILOT LOG BLACK

STANDARD PILOT LOG BURGUNDY

Hard cover, 8" x 4-1/2", 100 pages.

P/N 13-32360

STANDARD PILOT LOG NAVY BLUE

Hard cover, 5.5" x 8.5", 110 pages. P/N 13-32355

FLIGHT CREW LOGBOOK

Created with the input of airline pilots & instructors, these shirt-pocket size logs are designed for long lasting and comprehensive recordkeeping on the road. Options are provided for tracking flight time, currency requirements, expenses, duty times, layovers, and much more. Soft cover, 108 pgs.

P/N 13-04432

CREW FLIGHT LOG TIME & EXPENSE RECORD

With a durable high quality vinyl cover, this book is the world's most usable flight crew log. Including an upgraded calendar and unique guide to aviation info sources, Crew Flight Log meets both FAA & IRS record-keeping requirements.

P/N 13-04573

MASTER LOGBOOK CASE

Durable nylon logbook cover sized to hold master logbook, charts, and other aviation essentials. Loop for pen or pencil, hook and loop closure, clear pockets for license and medical certificate. 7.5"x12"; hold logbooks up to 6.5"x11".

P/N 13-02311

LOGBOOK ENDORSEMENT STICKERS

Can be used for Flight Reviews and Instrument Proficiency Checks, and comply with FAR 61.56 and FAR 61.57 on PIC recent flight experience and flight reviews. Each sticker measures 2" H x 4"L. 10 stickers per sheet on white paper.

P/N 13-06585

LOG BOOK COVERS

These nylon logbook covers are very light weight but cover and protect your logbook very effectively. The nylon material is extremely durable and is washable. The cover features a holder for two pens and a velcro pocket on the back for licenses, gas receipt, and other documents.

PS

SCOTT FLIGHT BAGS

It all started back in California in 1957 when Bob Scott ("Scotty") began making saddles. Many of his saddles are on display at the Cowboy Hall of Fame and many more are still being ridden by world champion cowboys. Then in 1967, Scotty became a pilot with Northwest Airlines. He retired from Northwest after 30 years, but Scotty still enjoys flying his Cessna 310. He made his first flight bag in 1977. The next year saw Scotty selling 2 or 3 flight bags a month to fellow pilots. Scott Leather has continually grown since those early times, but the workmanship, quality and guarantee of each bag remains the best in the business.

EMBOSS ANY SCOTT FLIGHT BAG WITH 3 INITIALS (SPECIFY).....\$9.95

BISON MOUNTAIN RV FLIGHT BAG

A practical solution to organizing the cargo area of your RV-6, RV-7 or RV-9. Also makes a great overnight bag! Our RV Flight Bag was designed to fit behind the pilots and co-pilots seat of the RV-6/7/9. It fits over the flap actuator bar and makes maximum use of the area behind your seat. This keeps the CG as far forward as possible and maximizes remaining cargo space. The RV Flight Bag is 18 inches high and 12.5 inches wide. It has a very large main cargo area easily accessible with a large zipper flap. There are two side pockets, one 10" x 4" and a 7" x 5.5" map pocket. The rear side of the bag has a pencil / flashlight/fuel tester pocket, a 10 inch x 7 inch headset pocket, and a 6" x 5 1/4" pocket for small tools. The material and zippers are heavy duty and will last a long time. The bag is made of durable Curdura and is resistant to liquids. It has a nice carrying handle and comes with two straps that can be attached to your seat back to clip the bag to your seat to minimize movement. It also comes with a removable shoulder strap.

SKY HIGH & NORAL FLIGHT BAGS

Sky High Gear Flight Bag Systems are integrated with cutting edge STYLE for today's pilots. Each bag is loaded with patent pending design work to maximize packing UTILITY for all activities. Designed by Pilots for Pilots.

APOLLO FLIGHT ATTACHE

The Apollo messenger bag was designed for the business pilot who does not want to carry multiple bags as they visit on and off field customers. Their integrated file dividers will hold file folders, note pads, brochures, catalogs, forms, and more. They have also integrated our CoPilot feature which allows the document and map section of the bag to lay open on the seat next to you

for easy access to your important nav charts, approach plates, markers, flashlight, batteries, etc. P/N 13-03279

DISCOVERY DUFFLE BAG

The Discovery flight duffel is a fully padded duffel designed to protect all of your important gear. The Discovery is designed with full sized compartment flaps to allow easy access to all of your gear, before, during and after flight. The spacious end compartments and innovative closure flaps make putting away or getting out your ANR headsets and other gear a breeze. The center compartment has a double zipper opening with a padded divider to segment the compartment for easy access and storage. P/N 13-03280

FREEDOM VII DAY DUFFLE BAG

Freedom VII is the flight bag for those who want to pack light for a short day flight or a CFI who needs just the minimum requirements for a lesson. This flight bag comes with their patent pending CoPilot feature. This allows you to organize 4 sectionals, extra batteries and other miscellaneous equipment. The main compartment has plenty of room for a headset or two 2" Jepp Chart binders with a pocket on the back for your kneboard, A/FD or other materials. If you need a small flight bag this is the bag for you.

Blue..... P/N 13-03277

Green..... P/N 13-03350

Red..... P/N 13-03351

SKY HIGH GEMINI

The Gemini flight bag is a fully padded duffel designed to protect the pilot's important gear. It is made with full sized compartment flaps, allowing easy organization of flight materials and access during flight - there is even a special stow-a-way pocket designed to hold most kneboards. Everything is right where it should be - especially important during IFR flights. The center compartment has a double zipper opening with a padded quad-modular divider to segment the compartment for custom organization and easy access. P/N 13-04254

VOYAGER FLIGHT ATTACHE

The Voyager Attaché flight bag gives you the ability and convenience of being able to carry charts, sectionals and all the necessities without carrying around a larger flight bag. The CoPilot feature allows you to organize up to 6 sectionals and essential equipment. The main compartment can hold a single headset, Jepp chart binders and/or Air Charts. A kneboard pocket is on the back for added convenience. The Voyager is made of ballistic nylon for extra durability.

Blue..... P/N 13-03278

Red..... P/N 13-03348

EXPLORER PRE FLIGHT POUCH

Our preflight pouch is made of durable 600D Polyester. It is designed to organize and hold your basic items for your preflight - Mini Mag size flashlight, fuel tester, pen/pencil, tire pressure gauge, and pliers or wrench. We have also included a grommet on the corner so you can attach a towel for wiping your hands clean. The Explorer will fit easily into any bag and has a Velcro strap to attach to your waist belt for convenience during the preflight. P/N 13-03276

NORAL AIRCRAFT DOCUMENT HOLDER

This durable document holder is made of strong fabric with two clear pockets to hold your aircraft document secure and visible. It comes with two inches of velcro to be placed anywhere that velcro can be applied to..... P/N 13-01134.....

NORAL SINGLE HEADSET BAG

This bag is ideal for the pilot that wants to carry a passenger headset or his own, separate from his flying bag. It is constructed with genuine DuPont® Cordura® 1000 Deniers, water resistant, fully padded with a 1/4" foam and backed with a layer of tricot. Features separate zippered compartment along with an extra side pocket.

ASA AVIATOR FLIGHT BAGS

P/N 13-04057
Pilot Flight Bag
11" tall x 10" wide x 8" deep

P/N 13-04058
Trip Bag
11" tall x 16" wide x 8.5" deep

The Pilot Flight Bag and the Trip Bag, are made of fully padded nylon for extreme durability. They feature wraparound carry straps for strength, a non-slip detachable shoulder strap, and high-quality zippers on the main compartments.

Pilot Bag.....P/N 13-04057
Trip Flight Bag.....P/N 13-04058

ASA TECH FLIGHT BAG

ASA pilot gear bags are well known for their supreme functionality, rugged construction and professional style. The Tech Bag is ideal for the computer-toting pilot. It includes a padded laptop sleeve for safe storage of your computer or favorite EFB (up to 15" x 11") and has plenty of pockets for carrying everything from headsets to sticky notes. It's a mobile

office/flight planning room in a bag! Count on your ASA Tech Bag to bring you many years of utility and pride.

Dimensions: 19" wide x 8" tall x 12 1/2" deep

- * Made of 600D polyester with PVC backing for extreme durability
- * Non-slip removable shoulder strap
- * Molded carry handle for strength and comfort
- * Rugged zippers
- * Outside ID pocket
- * Padded interior divider panels with numerous compartments
- * Padded interior laptop/EFB sleeve

P/N 13-06260.....

ASA CRM FLIGHT BAG

This "copilot in a bag" not only keeps your gear organized on the go, but in the cockpit as well. Its functional design serves double duty as a great storage apparatus and ultimate cockpit organizer. Numerous compartments and pockets keep everything secure and easily accessible in flight. There are even "hideaway" stretch mesh side pockets for water bottles. It's large enough to hold everything you need yet compact enough to easily bring along on shorter excursions. Count on your ASA CRM Bag to bring

you many years of utility and pride.

Dimensions: 14" wide x 12 1/2" tall x 9" deep

- * Made of 600D polyester with PVC backing for extreme durability
- * Non-slip removable shoulder strap
- * Padded carry handle
- * Rugged zippers
- * Interior organizer with multiple pockets
- * Large interior mesh pocket with toggle closure
- * Side zippered pocket with stretch mesh for water bottle

AEROCOAST FLIGHT CASES

PRO I FLIGHT CASE - This professional grade flight case includes many added features not present on today's flight cases. Features such as multi access folders, flashlight holder, multiple pockets, business card sleeve, and a protective base plate.

- * Waterproof ballistic material
- * Metal piano hinge for added strength
- * Protective plastic plate

- * Multi access folder compartments
- * Multiple storage compartments
- * Flashlight holder
- * Leather wrapped handle
- * Side pocket compartment
- * Name card holder with clear cover
- * Embroidered gold logo
- * Added Velcro to both inside flaps
- * Outside dimensions 18 x 13 x 8 inches.

P/N 13-06041.....

PRO II FLIGHT CASE - The Pro II flight case offers the same features as the Pro I. However the primary differences you will notice with the Pro II is the sturdy Saddle style handle belts and the absence of the front pocket access.

- * Sturdy saddle style handle wrap
- * Waterproof ballistic material
- * Metal piano hinge for added strength

- * Protective plastic plate
- * Inside access folder compartments
- * Multiple storage compartments
- * Flashlight holder
- * Leather wrapped handle
- * Side pocket compartment
- * Name card holder with clear cover
- * Embroidered gold logo
- * Added Velcro to both inside flaps
- * Outside dimensions 18 x 13 x 8 inches.

P/N 13-06042.....

PRO III FLIGHT CASE - This professional grade flight case includes many added features not present on today's flight cases. The visible difference between the Pro I and the Pro III is the absence of the front compartment lock. Features such as:

- * Waterproof ballistic material
- * Matched Stitching for added strength
- * Metal piano hinge for added strength

- * Protective plastic plate
- * Added Velcro on both inside flaps
- * Riveted pressure points
- * Multi access folder compartments
- * Multiple storage compartments
- * Flashlight and pen holster
- * Leather wrapped handle
- * Side pocket compartment
- * Name card holder with clear cover
- * Embroidered gold logo
- * Outside dimensions
- * 8 x 13 x 8 inches

CHART CLIPS - TOOL BAGS

PUT-IT SUCTION CLIP

This clip is strong enough to hold an approach plate, chart, or checklist. Attaches by a suction cup to the instrument panel, yoke or any other nonporous surface. P/N 8197

NO CLUTTER CLIPS

No Clutter Clips * Holds checklists, approach plates, charts, etc. * Stick on most slick surfaces * UV Resistant
 1 Small Clip per Package P/N 13-06636
 2 Small Clips per Package P/N 13-06408
 1 Large Clip per Package P/N 13-06409

WATCH-IT ACCESSORY HOLDER

"World's most versatile holding device". Lets you mount time pieces and calculators exactly where you want-on the wheel, the yoke tube of clipboard. An ingenious bracket, an adjustable holding loop, and a little Velcro is all it takes. Once positioned, can be mounted & removed repeatedly. Non-reflecting, black materials, weighs less than 1oz.
 P/N 8265

YOKE CHART CLIP

When you want the chart or approach plate right in front of you - this clip will hold it on the yoke. Adjustable band wraps around the yoke and holds the clip firmly. Fits all general aviation aircraft controls. Non-reflective black finish.
 P/N 8135

IFR CHART CLIP

Make IFR flying simpler by keeping vital instrument approach plates and charts in place. Attached to the yoke rather than in your lap or on the floor, this chart clip comes in various models designed to install easily on the yoke of your aircraft. Insures that your navigational charts stay in front of your eyes when you need them most. Handy for VFR charts as well. We'll be happy to assist you in determining what model chart clip will best

fit your aircraft.

AIRCRAFT FOR SALE BANNERS

Designed specifically for aircraft use, these banners slip right over your prop blades, moving in the breeze to attract attention-but will not rub against painted surfaces. Each banner is 9" x 23", made of heavyweight rubberized Nylon that is weather-repellent and resists tearing. Sold as a set of 2. P/N 5412.....

PROPELLER MOUNTED BANNERS

Two 28" x 8", white printing on red reinforced vinyl with business card pouch. Yellow, blue and white pennants, slides over prop, fastens with velcro.
For SaleP/N 13-06402
For Rent.....P/N 13-06635.....

FOR SALE PROP BANNER

Consists of three pieces. Each prop banner is 11" high X 22" long when mounted. Made of RED vinylized polyester with BOLD WHITE lettering. Unlike prop banners that are a sleeve which must be slipped over the prop blade only, these banners are split at the bottom and are held together with velcro. This allows the banner to be opened up and then wrapped around virtually ANY structural member of the aircraft
P/N 13-06014

PILOTS FREQUENCY REMINDERS

This little prompter is designed to allow the pilot (especially students) to pre-plan which frequencies will be used during a flight and hang this handy item close at hand in the cockpit. This is ideal when operating in a high density airport area. Helps eliminate cockpit clutter and searching for often used frequencies. P/N 13-04391.....

YOKE CLIPS

Clip this yoke on your aircraft so it does not interfere with movement of controls. Spring may be adjusted for smaller diameter shafts by pinching with pliers.

PS

SEAT FOAM - FLIGHT SEATS

BACKSAVER FOAM

Backsaver foam is temperature sensitive, softening when it comes in contact with a warm surface; thus, in a seat cushion, the foam softens and conforms to the persons body. This provides even pressure distribution and unconstricted blood circulation, significantly reducing discomfort, even over long periods. In addition, Backsaver foam has excellent energy absorption properties, which have made it excellent for use in the U. S. space shuttle program and in military aircraft and helicopters. Pilots find that Backsaver cushions reduce their discomfort and fatigue, even on missions of 8 hours or more. Aircraft Spruce now makes Backsaver foam available to

the homebuilt and general aviation market.
 BACKSAVER FOAM 16" X 18" P/N 01-09325
 BACKSAVER 36" X 80" FOAM P/N 01-09330

CONFOR FOAM SEAT CUSHION

Temperfoam is the conforming foam cushion that was developed for the "Astronaut's Couch" back in the Apollo space program. Seat foam has the capability of

absorbing a tremendous amount of impact shock compared to common polyfoam and it is flame resistant. It is an excellent product that will give your seats enduring comfort that you never thought possible. It is not a soft seat, but it adapts to you for pressure- point-free comfort that is really incredible. The best universal cushion for aircraft use is a 3" T/38/T41/T47 laminate. Temperfoam is not currently FAA approved for certificated aircraft but is excellent for homebuilts. Some special sizes in 1", 2" or 3" thicknesses are available on special request.

1" x 16" x 18" P/N 01-09310 ea.
 2" x 16" x 18" P/N 01-09320 ea.
 3" x 16" x 18" P/N 01-09300 ea.

INFLATABLE LUMBAR SUPPORT

This inflatable air pillow can be installed just under the seat material and will give you the customized support just where you need it. A convenient palmsize pump and a release valve control the firmness of the lumbar support. The In-Flight Back Support is made of a heavy duty self-extinguishing neoprene rubber, specially designed to pass FAR 23.853 flame-test requirements.

SKWOOSH PILOT SEAT

Fly with SKWOOSH™ and say goodbye to numbness in your legs and rear. TekPad® gel technology delivers pressure relief for long flight comfort. The compact SKWOOSH™ Pilots's seat is designed specifically for flight personnel. It folds to fit in a chart case, carry on or just hang it from a roll-on. It has a durable 300 denier top fabric for comfort and convenient attached cord loops for hanging. The non-skid bottom makes SKWOOSH™ stay put, insuring no movement during

use, while it's low profile allows you to maintain normal seat position. So when you have to sit for a long time, in the cockpit or passenger cabin, count on SKWOOSH™ for comfort.

Specifications: • Model# P5544 • Weight: 8 oz. • Open Dimensions: 15" x 10½" x 1½" • Folded Dimensions: 7½" x 10½" x 1" • Color: Black • Non-Skid bottom • Convenient cord loops for hanging • Made in USA - Guaranteed Performance and Guaranteed Workmanship.

SEAT COVERS - AIRCRAFT SPRUCE APPAREL

AEROSHEEP AUSTRALIAN SHEEPSKIN SEAT COVERS

Aerosheep seat covers are manufactured from genuine Australian Merino sheepskins. Each cover is hand tailored to fit the particular aircraft seat and comes with a 5 yr warranty. The dense 1" fleece will not shed on clothing, and the snug fit allows for no slippage. Aerosheep seat covers are cool in the summer and warm in the winter, and protect seats from sun and wear. Fully lined, they are attractive, durable, and very comfortable. Easy to install without

removing the seat. Available in tan, pearl, regal, silver, bone, smoke, navy, and burgundy; free color swatches available on request. Furnished with FAA form 8110-3 (flammability compliance certification) and shipped Fed-Ex 3-day service from the factory within one week (Add \$15.00 for shipping). To order, specify aircraft year, make, model, and color choice. For reupholstered or non-standard seats, request special order form to measure seats.

P/N 13-01005 /pr.
Aerosheep Sample - Order a sample then return it for a full credit after you have selected a color and ordered your seat cover.

P/N 13-06584

AEROSHEEP SEAT CUSHION COVER ONLY

The new sheepskin product designed to appeal to pilots who may not be ready to invest in the fully fitted sheepskin seat covers. It is a sheepskin pad designed to fit on the seat cushion surface only. Available in tan, pearl, regal, silver, bone, smoke, navy, and burgundy; free color swatches available on request.

P/N 13-05604

WARMSEATS SEATS HEATERS

This do-it-yourself seat heater kit features dual zone heating (back and seat) with a built-in thermostat and high/low settings. Made by an OEM auto supplier, the kit uses carbon fiber (not wire) to provide quick and even flow heat. Universal fit and easy installation. Instructions included. Not FAA approved. P/N 13-03195..... ea

SPRUCE POLO SHIRT

SPRUCE POLO SHIRT - These are the same high quality polo shirts worn by the Aircraft Spruce Staff at Oshkosh, Sun 'N Fun and other airshows. Made from Dry-Excel™ close-hole Micromesh, polyester knit, with a fine gauge rib-trim collar. Three button front, open hem sleeves, and split side welts make these polos great for everyone. These polos feature the Aircraft Spruce logo on the left chest. Machine washable.

BLUE RIBBON SHEEPSKIN SEAT COVERS: NATURES OWN THERMOSTAT

The magic of 100% genuine sheepskin is quite simply that it will keep you cool in summer and warm in winter. No other natural or man-made fiber possesses the qualities of sheepskin. Whatever the temperature in your cockpit, sheepskin covers remain almost the identical temperature. Additionally, each hollow fiber absorbs up to 30% of its own weight in moisture. It keeps you dry, yet never feels wet itself. You avoid the heat and clamminess of vinyl, or even leather, because there's free flow of air between you and seat. Every cover is hand-made by master craftsmen from the finest chrome-tanned pelts, in colors to match or coordinate with any interior. Sold in pairs only, in 11 colors (request color samples when ordering). FAA Approved.

Available for the following planes: Beechcraft: Baron B-55, E-55, B-58, Bonanza V-35 (A or B), A-33, A-36, F-33A, A36TC. Cessna: 150, 152, 172, 177, 180, 182, 185, 210, 310, 340, 402, 414, 421. Aero Commander: 500, 600, 900, Piper: Archer, Cherokee, Warrior Tomahawk.

Specify year, make model and color choice when ordering. Car seat covers also available in same colors. Call for a price.

SUN VISORS - PITOT TUBE COVERS

ROSEN SUN VISOR SYSTEM

Don't fly blind! Give yourself and your passengers that extra margin of safety. These transparent sun visors rotate and extend to offer complete cockpit protection from the sun. The oversize, tinted lens filters out 95% of the ultraviolet rays, reduces glare by 94% and heat by 86%. Distortion free. Fully STC'd and PMA'd. The system, which includes pilot and co-pilot visors, installs in minutes. (Exceptions: C-210 non-pressurized requires 1.5 hrs, C-152 requires rivnut installation by an A&P, C-177 req. 6-8 hrs.). Available for these aircraft. Visit our website for specs., installation, and application data.

PITOT TUBE COVERS

Spruce's own pitot covers feature an authentic, soft, bright red vinyl - will not fade, mildew resistant, made to Mil-C-20696. Remove Before Flight streamer. The durable leather-like bootie attaches simply with a Velcro strap and offers optimum protection from insects and weather. slip-fits over 5/8" or 11/16" dia. pitot tubes. P/N 15210

SLIP ON PITOT COVER - This high quality pitot tube cover also features the "Remove Before Flight" bright red streamer, but slip-fits over 1/4" or 1/2" dia. pitot tubes. Great looks & great protection! P/N 15220

ROUND CESSNA PITOT COVER - This yellow urethane pitot cover fits round, high-wing Cessna pitot tubes. Grooved fitting releases air pressure as the barometer changes. P/N 5139

PIPER PITOT COVER - This pitot cover is designed to fit the blade style pitot commonly found on piper aircraft. Small vent hole prevents pressurizing system. P/N 5740

REMOVE BEFORE FLIGHT RIBBON

This 3"x24" bright orange streamer with black letters features a grommet for a C ring to attach to anywhere on the aircraft. High visibility, fire resistant material. P/N 15200

DO NOT TOW STREAMER

17" Streamer, attach with Velcro, Color international orange. P/N 13-02004

ASA PITOT TUBE COVERS

Fit snugly over standard aircraft pitot tubes, and are vented to avoid pressurizing the pitot static system. Critical to safe operations, the cover keeps dirt, contamination, and insects from entering the pitot tube. A "remove before flight" streamer hangs off the cover as a prominent preflight reminder to pilots. Molded in the United States, the cover uses a heavy duty plastic material. Pitot Tube Cover 5/8" (small)..... P/N 13-02378
 (Fits: Cessna 300/400 series, Citation & Conquest, Beech singles & twins, Piper Navajo & Cheyenne, Mooneys, Mitsubishi, Lear Jets & Cirrus)
 Pitot Tube Cover 3/4" (large)..... P/N 13-02377
 (Fits: Cessna 150, 152, 172, 177, 182, 200 series, Skymaster & the Falcon Jet)

FUEL CAP COVER

The STAY SEALED cap is a patented fuel cap cover that locks onto the existing factory cap and seals to the surface of the wing. Designed and tested against heavy rains, strong winds, high temperatures, and extreme cold. It sealed out melting snow and ice, blowing rain and water from aircraft washing. *To be used anytime the aircraft is stored outside. The device MUST be REMOVED BEFORE FLIGHT.

| |

SUN SHIELDS – CANOPY COVERS

KENNON SUPER SUN SHIELDS

The most durable sun shield on the market has a clear polyester coating to protect the plexiglass windows. Heat can permanently damage the interior and avionics in your aircraft. The secret is a material with two surfaces of aluminum separated by trapped air. This combination reflects 97% of radiant heat, an insulation value of R-9 equivalent to two inches of fiberglass. Kennon Extra Firm shields fit snugly, and maintain their shape for a tight fit. They install in no time, and roll up for storage in compact, water-repellent bags. Weight is 1Lb. Available for most aircraft, specify year, make and model. For custom shields, specify exact size of windshield & windows. Also available for cars. Fabric edging insures snug fit & durability.

P/N 7672.....

BONANZA/BARON ADJUSTABLE SUN VISORS

Aerospace construction means they work flawlessly, plus they are very adjustable. Rotate them up and down, turn to cover the side windows and slide them in and out for coverage where you want.

P/N 05-03434.....

KENNON COWL PLUGS

Kennon cowl plugs are constructed from red Aqualon over 2" thick foam and feature a binding around the outer edge of each plug so there is a tight seal which fits snugly in the cowl. This lip prevents the plugs from slipping inside the opening. A safety strap goes around the prop so if by chance you forget to remove the plugs, the prop will remove them for you. These cowl plugs install easily and comes with their own storage bag. Specify aircraft make, model & year when ordering. Include aircraft registration number to be printed on plugs at no extra charge.

Single engine plugs..... P/N 13-14111.....
Twin engines plugs..... P/N 13-06212.....

KENNON HEATED COWL PLUGS

Kennon builds an electric heater attachment into its engine cowl plugs to provide the heat you need on those cold winter nights. Simply install the cowl plugs and plug in the heaters then bundle up your cowling with a Kennon insulated Engine Blanket and your engine will stay toasty until you are ready to fly again. The 50W heaters are energy efficient. Plus, you can remove the heater(s) and use the cowl plugs year-round to keep your air intakes clean and bird free. Keeps the air intakes clean and preheated. As with any preheat system, an insulated engine cover is recommended.

Single heater (Temps. down to 15°F)..... P/N 13-03171.....
Double heater (Temps. below 15°F)..... P/N 13-03172.....

CUSTOM FIT COWL PLUGS

These cowl plugs are tailored to fit popular Cessna and Beech single engine aircraft. High visibility yellow closed cell foam will not retain moisture. Printed on one side is "Remove Before Starting Engine", and the other is blank for the N#. They are joined by a nylon strap with a fluorescent orange Remove Before Flight flag. Please use following part no's. to specify aircraft.

KENNON WIND SPOILERS

Kennon Wind Spoilers are a strip of soft fiber filled tubes that attach to the wing to slow airflow over the top and to prevent lift. An airplane was built to fly, given a strong wind, the plane will fly without you and no tie down will restrain a flying airplane for long. During the stormy winter of 1998, over 200 airplanes were picked up and destroyed by strong winds. Kennon Wind Spoilers could have saved many of these aircraft. The wind spoilers cover the leading edge of the wings but not the tips, and most are about 14.5 ft long (per wing). Specify aircraft make, model, year when ordering.

P/N 13-14180...../pr

LANCAIR & ZENAIR CANOPY COVERS

These custom designed covers for the Lancair 235/320 and the Zenair Zodiac canopy are made of acrylic "Sunbrella" fabric and are available in blue, grey, or white. The 100% acrylic fabric won't shrink, fade, or rot. Nylon webbing straps assure secure fit while snap together buckles permit fast adjustment, fastening, and release. Side adjustments provide tight fit. These covers will protect your avionics and interior from sunlight and heat damage.

Lancair Blue Canopy Cover..... P/N 13-14110.....
Kennon ZenairBlue Canopy Cover..... P/N 13-14140.....

ENGINE INTAKE COVER

Kennon's Low Wing Cabin Cover covers the top of the cabin, the antennae and the entire window area. Kennon Cabin Covers are made from Sunbrella which is designed to withstand the sun's ultra violet rays. Sunbrella is the award winning UV resistant outdoor fabric. It is very soft and breathable so it is safe to use as a year round cover on any aircraft. It is a must for fabric covered wings and tails. Each cover is custom built for the specific year, make and model of aircraft. You will be asked for aircraft year, make, model, and registration number when ordering this item. There is an additional cost for the microfiber lining, and the cost varies based on aircraft.

Engine Intake Cover..... P/N 13-04047.....

KENNON DUST COVERS

The Kennon Dust Covers keeps dust, birds, and bird droppings off aircraft stored in hangars. Made from 210 Denier Nylon, the cover is soft, lightweight, and machine washable. Will not scratch the aircraft. It is easy to put on, with the elastic hem fitting around the nose, wing, and tail. Stores in its own storage bag and weighs only 10lbs. Available in sizes to fit any aircraft from homebuilt to military. Specify year, make & model of aircraft when ordering. Color: Black or Blue. **Stock**

Color is Black. For Special order color (blue or red) add .

KENNON SUN BLOCKER AIRCRAFT COVERS

Kennon's Standard canopy cover is constructed from Sunbrella, an acrylic woven canvas in your choice of colors. Off white or light gray are the best choices as they absorb less heat. Provide Kennon with antenna measurements and we will tailor the cover so it fits neatly around antenna, OAT boot and ADF wires at no additional charge. Kennon's deluxe canopy cover is constructed from Sunbrella in your choice of colors and adds a satin lining to prevent sand and dirt from adhering to the fabric, which could later scratch your windows. Satin is superior to fleece and flannel liners because the satin is slippery and nothing sticks to it. Constructed from a woven acrylic canvas, Kennon Sun Blocker Aircraft Covers are guaranteed not to become unserviceable due to loss of color, strength from normal conditions, including sunlight, mildew, rot, or atmospheric chemicals. These covers repel water yet breathe so that they don't trap moisture. Specify aircraft make, model, and year, and number of side windows. Include aircraft registration number to be printed on cover at no extra charge.

HIGH WING WRAP-AROUND COVER – Cessna120-210, Cessna 337; L-19; PA10, PA22 including Pacer, Tripacer, Cub, Super Cub, Colt, Luscombe, Stinson 108, Aeronca, Citabria, Maule, Rockwell 685/690/980, Aviat, Christian Husky, Lake Renegade

COWL PLUGS - AIRCRAFT COVERS

COWL PLUGS

Cowl Plugs with attached "remove before flight" streamer for general aviation aircraft. Prevents bird and foreign objects from entering through the cowl. Comes complete with a linking lanyard and remove before flight streamer. Heavy duty cross linked construction and durable nylon hand sewn stitching

complete the set. Please specify aircraft make, model, & serial number when ordering. Single engine plugs are furnished with free embroidery and pitot tube cover. Twin cowl plugs include only the cowl plug and embroidery is available for an additional \$10.00

Single engine.....P/N 13-01742.....
Twin engine.....P/N 13-01743.....

PROPELLER SLINGS EXHAUST COVERS

Propeller Slings & Exhaust Covers keep your propeller secure and in place, eliminating any bearing damage caused by a free-spinning propeller with no lubrication. The integral exhaust covers protect the costly turbine wheel from debris & birds. Simple, quick one man operation. Please specify aircraft make, model, serial no. when ordering.

P/N 13-01744.....

INLET PLUGS

These protect your engine from foreign object damage, blowing dust and sand, birds and debris. Complete with remove before flight flag and easy pull handle for insertion and removal. Please specify aircraft make, model, & serial no. when ordering.

P/N 13-01745..... /eng

JET ENGINE COVERS

Made of extremely durable, water-proof and fire resistant Herculite, our covers are guaranteed for 10 yrs. Each set is hand crafted and sewn to order. Complete with storage bag and remove before flight flags. Please specify aircraft make, model, & serial no. when ordering.

P/N 05-04077.....CALL FOR QUOTE

ENGINE INTAKE COVER

Protect your engine from natural hazards which could cause serious in-flight problems. This economical design fits practically every single or twin, even homebuilts. The lightweight, fire-retardant mesh fabric will not blister or melt. After simple one-time installation of mounting hardware, cover snaps into place and secured with Velcro. Folds for easy storage. Complete with mounting hardware & "Remove Before Starting Engine" streamers. Also available: Bib that allows you to cover additional intakes.

KUVR**IT WHEEL COVERS

The KUVR**IT II Wheel Cover is designed to cover that precious investment, "your tires", on your airplane. The fabric is a vinyl-coated polyester that is fade resistant and California State Fire Marshall approved (#F-2310).

The weave breathes and yet provides 85% shade factor from the suns damaging ultra violet rays. It is easy to care for. Simply machine wash and just hang it to dry. The KUVR**IT II Wheel Cover is easy to use. Simply place the cover over your tires and adjust the strap to the desired tightness and lock into place. There are 3 sizes for your convenience:

Small fits tire size: 5.00 - 5/15 x 00-6.....P/N 13-03158.....
Medium fits tire size: 6.00 - 6/7.00-6.....P/N 13-03159.....
Large fits tire size: 6.50 - 8/8.50-10.....P/N 13-03160.....

REDWING TRAILING EDGE PROTECTIVE FOAM

RedWing helps prevent aircraft damage and head injuries. Just slide the foam onto the trailing edges of ailerons, elevators, rudders or flaps to protect these surfaces while tied down or in the hangar.. RedWing is also ideal for proecting landing gear doors, avionics

antennas, and winglets. The bright red color reminds the pilot to remove RedWing before flight, and RedWing is reuseable and unaffected by UV, water, or oils. Furnished in 3ft. sections which can be easily cut to smaller sections.

P/N 13-02566.....

BRUCE'S CUSTOM COVERS

Canopy Covers protect the glass, upholstery and avionics from the elements, stop leaky seals and keep the cabin cool. Canopy Covers also prevent vandalism and theft.

Bruce's Custom Covers makes canopy/cabin, engine, empen-

nage, propeller, wing and pitot covers as well as engine inlet plugs for virtually every model jet, airplane and helicopter. Covers generally cost \$350 - \$425, are 100% lined, and can be imprinted with your aircraft tail number. Each cover is custom made to order and lead time is generally three weeks.

For a complete technical sheet including prices, photos and information about covers for your aircraft, please call us at 1-877-477-7823.

KOGER SUNSHADES

The Koger Sunshade was developed to provide protection from the sun while flying an airplane that has a large bubble plastic canopy like the RV-6, RV-7, RV-8, RV-9 and many other types of aircraft.

Key Benefits

- Retractable to front or rear.
- Lightweight (9oz. for side by side RV models)
- Install in 1/2 to 1-1/2 hours depending on the model.
- Makes instruments more visible, and the cockpit more comfortable.

| Fits | Description | Part No. | Price |
|---|---|----------|-------|
| RV-8 | Size of shade: 15" wide by 46" long | 13-05657 | . |
| RV-6, 6A, 7, 7A, 9, 9A | Standard TIP-UP model Size of shade: 30" wide by 25" long | 13-05658 | . |
| RV-6, 6A, 7, 7A, 9, 9A | Standard SLIDER model Size of shade: 30" wide by 25" long | 13-05659 | . |
| Zodiac 600XL, Legacy, Cirrus SRS, Falco, Sport Crusier, EuroStar, Sting, Europa, etc. | LARGE TIP-UP model for larger bubble canopies | 13-05660 | . |
| Built to Order | LARGE SLIDER model with top center structure canopies are built to order. Size of shade: 34" wide by 35" long | 13-05661 | . |

TRISOFT WINGTIP/PROP TIP COVERS

* Avoid Accidents * Protect Employees and Aircraft * Reduce Insurance Claims * Remain In Compliance Trisoft Aircraft Covers Can Be Used As a Safety and Warning Device on Prop Tips The prop tips of an aircraft have proven to be a very dangerous area for aircraft personnel. Just place the aircraft covers on the prop tips to warn and protect personnel working or walking around an aircraft. Trisoft is a simple foam triangular cover that slips onto the corners of the prop tips, gear doors, wing flaps (in the lowered position), wing tips, and dorsal antennas, protecting aircraft personnel and aircraft during maintenance, pre-flight checks, cleaning, etc. Trisoft can be used on personal aircraft, corporate aircraft, commercial aircraft, military aircraft and helicopters. P/N 13-06003.....

SAFETY PROP TIPS

Reduce the risk of injury from a stationary aircraft prop by covering the tips with the Safe Prop Tip. This new safety device is made of thick foam covered in a bright red fabric. While the bright color calls attention to the prop to help prevent an accident bump, the thick padding adds protection in case someone does walk into the prop. Reflective tape on the front of the guard improves awareness at night, and an elastic ribbon, which holds the unit together, is a perfect place to hang the "Remove Before Starting Engine" streamer.

PLANE SIGHTS REMOVE BEFORE FLIGHT

PLANE SIGHTS PITOT TUBE COVERS

Extremely obvious, very durable, and weather resistant pitot tube covers for every aircraft.

ANGLED PITOT TUBE COVER - Aircraft Type: Piston Powered Plane This durable, weather-resistant orange and yellow reflective cover fits virtually any size pitot tube. It stands out in daylight or darkness under all weather conditions, so it can't be missed. Large sewn-on Velcro tabs keep it securely in place under all conditions. Weight: 0.14 kg If length of the tube exceeds 6.75" and the diameter exceeds 7/8", then the Universal Pitot tube cover would be a better choice. As seen on the 2009 AOPA 'Let's Go Flying' Cirrus SR22 P/N 13-05611

UNIVERSAL PITOT TUBE COVER - Aircraft Type: Piston Powered Plane. This durable, weather-resistant orange and yellow reflective cover fits virtually any size pitot tube. It stands out in daylight or darkness under all weather conditions, so it can't be missed. Universal covers fit any length of tube from the smallest home built 1/4" tubes up to 7/8" jet probes. The versatile hook/loop Velcro strap with sewn-in rubberized trim allows the cover to be quickly and securely fastened to the pitot tube. Weight: 0.00 kg The inside diameter of the cover is 7/8". Guaranteed to work on any Cessna, Beechcraft, Cirrus, Diamond, Grumman or Mooney aircraft, as well as most Pipers and many light sport aircraft. P/N 13-05610.....

BLADE PITOT COVER - Aircraft Type: Piston Powered Plane Forgetting to remove a faded, dull and worn-out pitot tube cover can jeopardize the safety of you and your passengers. And when cold weather prevents you from installing your pinch-and-insert style blade pitot cover, ice and snow can contaminate your pitot system. Some blade pitot covers also cause damage to paint when the sleeve is being forced on and off. The highly conspicuous and very durable Plane Sights Blade Pitot Cover is a perfect fit for any aircraft with a blade-type pitot tube or piper gear extension mast. Properly installed, it's guaranteed not to blow off, fade in the sun or wear out for at least two years. Fits Piper, Katana, some Rockwell, late Grumman, Lake 250, and all other aircraft with a blade-type pitot tube. (As seen on the 2008 AOPA "Get Your Glass" sweepstakes aircraft) Weight: 0.15 kg Fits Piper, Katana, some Rockwell, late Grumman, Lake 250, and most other aircraft with a blade type of pitot tube. P/N 13-06016.....

PITOT TUBE PLUG (5/8") - Aircraft Type: Piston Powered Plane 5/8" inside diameter vented pitot plug with its unmistakably conspicuous Remove-before-Flight Streamer. ANSI-compliant and weather-resistant reflective streamer stands out equally well in daylight or darkness under all weather conditions. The plug is attached to the streamer's rugged black oxide coated zinc grommet with a galvanized steel ring, and is vented to prevent pressurization damage. This 5/8" Plug Fits Aero Commander, Twin Beach, Bonanza, Cessna 300/400/500, Conquest Series, Grumman, Lear, Mooney, Piper Cheyenne and Navajo aircraft. Weight: 0.04 kg 5/8"/0.625" (15.875mm) ID x 1.85" (38.10mm) P/N 13-06019

PITOT TUBE PLUG (3/4") - Aircraft Type: Piston Powered Plane. 3/4" inside diameter vented plug with its unmistakable Remove-before-Flight Streamer provides a perfect easy-on, easy-off solution. ANSI-compliant and weather-resistant reflective streamer stands out equally well in daylight or darkness under all weather conditions. The poly plug is attached to the streamer's rugged black oxide coated zinc eyelet with a stainless steel ring. This 3/4" plug Fits Cessna 150, 152, 172, 177, 182, 200 series, and 337 models. Weight: 0.04 kg 3/4"/0.75" (19.05mm) ID x 2" (50.80mm) useable length P/N 13-06018.....

LIGHT SPORT PITOT PLUG KIT - Aircraft Type: Piston Powered Plane. Light Sport/Homebuilt Pitot Plug Kit provides a perfect fit for many homebuilt pitot tubes, light sport pitot tubes, and aircraft fuel vents. The kit includes several vented plugs so it even works with double-tube systems and is guaranteed not to pressurize your pitot static system. ANSI-compliant and weather-resistant reflective remove-before-flight streamer stands out equally well in daylight or darkness under all weather conditions. The kit comes complete with three different-sized pitot tube plugs, a unique streamer, and two rust-resistant coated triangle rings. **WARNING: CHECK WITH YOUR AME AND CONSULT YOUR OWNER'S MANUAL BEFORE USING A FUEL VENT PLUG.** P/N 13-06020.....

PLANE SIGHTS AIRCRAFT MARKERS & STATIC WICK COVERS

Prevent hangar rash and broken static wicks

STATIC WICK COVER SET (TUBE STYLE 7") - Aircraft Type: Jet. A lower priced alternative to Static Wick Markers. They protect static wicks from damage on the ground and make wing/elevator tips more obvious, preventing hangar rash. Slide these round style covers on for a tight weather resistant fit on Citations and other jets. Weight: 0.04 kg Round, tubular poly cover, 0.310" x 0.450" x 7.000" Long. *Shock cord lanyard not included P/N 13-06775.....

STATIC WICK COVERS (SMALL ID X7") - Aircraft Type: Jet. Installed and removed in seconds, Static Wick Covers help prevent delays and inconvenience due to hangar rash. Extremely obvious and very durable Static Wick Covers make these vulnerable parts highly visible by day or night. Slide these round style covers on for a tight weather resistant fit on your Bombardier (Challenger & Global Express) or Hawker/Beechcraft and many other jets. If necessary cut with scissors to desired length. Weight: 0.20 kg Fit's over static wick part #'s: Chelton 2-17SC-1, Chelton 2-11SC-1, MIL-9129D, DG17770. Fits Bombardier, Hawker/Beachcraft and others P/N 13-06777.....

STATIC WICK COVER (SQUARE STYLE) - Aircraft Type: Jet These Square Style Static Wick Covers protect, usually yellow pronged static wicks from damage on the ground and make wing/elevator tips more obvious, thereby preventing hangar/ramp rash. Slide these rectangle covers on for a tight weather resistant fit on Falcon, Hawker, Beechjet, older Lear Jet and many other static wicks. Weight: 0.21 kg Includes three (3) Static Wick Covers per package Square Poly, 0.75"x0.25"ID x 3.50" Long, (in stock) (also available by special request, 5.25" length sleeves) Standard two year warranty applies. *Shock cord lanyard not included P/N 13-06775.....

UNIVERSAL AIRCRAFT MARKER - Aircraft Type: Piston Powered Plane. Highly reflective markers make vulnerable wing and elevator tips clearly visible under all conditions, and their projecting "proximity fuses" warn that something is too close before damage occurs. Fit all aircraft from Airliners to light sport aircraft, including models with static wicks and strobe lights. For aircraft with tip tanks, the wing marker opening fits over one end of the tank. A full set stows easily under most aircraft seats. Once initial fitting is done, the markers can be installed and removed in seconds during routine pre- and post-flight walk-arounds. Weight: 0.08 kg Package Contents: Two (2) corner marker pieces, two (2) harness pieces, two (2) marker fuses, four (4) 54" lengths of shock cord with cord hook ends, and four shock cord hook ends for assembly. P/N 13-05603.....

PROP MARKER, 3 BLADE - Aircraft Type: Piston Powered Plane. Featuring light reactive trims and tapes, these highly reflective Prop Markers are made to improve the visibility of your prop and aircraft day or night, helping you prevent the unexpected depreciation of your plane. Easily installed and removed in just seconds, adding virtually no additional time to your walk around. This prop marker fits aircraft such as a Cirrus SR22, Cessna 206, Cessna 182, Piper Malibu, Beech Bonanza, Beech Barron or similar three blade aircraft with medium size nose cone. Weight: 2.60 kg. Medium Cone P/N 13-05607..... Large Cone P/N 13-05608.....

PROP MARKER 2 BLADE - Aircraft Type: Piston Powered Plane. Made to improve the visibility of your prop and aircraft day or night. Prop Markers are easily installed and removed in just seconds, adding virtually no additional time to your walk around. Made from UV resistant Sunbrella, custom bonded with a soft, non-abrasive inner fabric. Quick and easy storage without tangling. Weight: 0.30 kg Small..... P/N 13-05605..... Medium..... P/N 13-05606..... Large P/N 13-05681.....

TURBO PROP TIE - Aircraft Type: Turboprop. Fits most Turbo Props including Caravans, Beech 1900s, King Airs and others. An adjustable heavy duty 1/2" shock cord and metal hook allows the versatile design to work on so many turbo prop aircraft. Also allows our Prop Tie to Integrate with existing cowl plugs and exhaust covers. For any Turbo-Prop up with to 10" wide blade. Comes with 36" of HD 1/2" size adjustable shock cord and two stainless clips. P/N 13-06778.....

REMOVE BEFORE FLIGHT STREAMER - Aircraft Type: Piston Powered Plane. ANSI-compliant and weather-resistant reflective streamer stands out equally well in daylight or darkness under all weather conditions. The cord is attached to the streamer with a rugged black oxide coated zinc eyelet. T Package Contents: Streamer - 12.25" long x 2" wide, Comes with two metal rings included) P/N 13-05612.....

DIAMOND STALL WARNING PLUG - Aircraft Type: Piston Powered Plane Diamond recommends that operators of their DA40 and DA20 aircraft plug the stall warning air inlet holes on these aircraft while they're parked on the ground. Fits any Diamond DA40 or DA20, one way or the other. ANSI-compliant and weather-resistant reflective remove-before-flight streamer stands out equally well in daylight or darkness under all weather conditions. P/N 13-06830.....

UNIVERSAL STATIC PORT COVERS

The SPC101 and SPC102 are essentially the same product, built on the same platform. The SPC102 has two protective covers in line rather than one, for applications where redundant static ports are installed in line. Features: * An inexpensive, yet very effective alternative to other covers and plugs * Universal design to fit most aircraft * Lightweight entire assembly weighs less than 1/2 pound * Attaches with heavy duty lever cups designed to lift 40 lbs. each * No fuselage modification required * Prevents the possibility of any damage to static ports by being an externally mounted cover * Malleable light gauge aluminum easily conforms to virtually any surface contour * Adjustable to allow for attaching lever cups on or around decals and pin striping * Installed at temperatures from -20°F to 110°F * TESTED AND APPROVED!
SPC-101.....P/N 13-06723.....
SPC-102.....P/N 13-06724.....

PITOT COVERS

Avoid costly damage to your pitot-static system. Protects from dust, insects, wind and other foreign matter. Will not pressurize pitot-static system.

MODEL 4602 - Fits Piper. Katana. some Rockwell, and late Grumman aircraft. **REMOVE BEFORE FLIGHT** P/N 13-06395.....

PITOT TUBE INSTALL TOOL

This tool was developed, in response to fleet owner and FBO requests. They were having experienced difficulty installing Covers onto high wing Pitot Probe locations, e.g., Cessna Caravans, Bush aircraft with Tundra tires, float planes and amphibians. In field trials it was found that this tool is also very useful to install-remove the same Covers onto over-the-nose Pitot Probes, of Very Lite and commercial jet aircraft! Features: * View-Through cover grippers for easy install * Low mass for control in windy conditions * Ergonomic shape to reach high wing, and most over-the-nose mounted probes * All weather non-slip handle gripP/N 13-06672.....

AIRCRAFT WINDLOCK

The Wind-Lock is designed to attach to an aircraft's controls inside the cockpit. The non-ridged mechanism keeps tension on the Elevators, holding them in the full down position. This position also allows moisture to drain from inside the control surface. It also holds the Ailerons in a streamlined position. As the wind gusts, resistance is applied. The harder the wind blows, the more resistance is applied to the controls. When the wind dies down, the Wind-Lock allows the Ailerons to return to their normal position. As the load is reduced, the tensioning mechanism reduces pressure on the control yoke. P/N 05-04044.....

AMC AIRPLANE CONTROL LOCK

Rather than tying your seat belt to your controls, try AMC's new Airplane Control Lock. This lightweight control lock will stop your control surfaces from moving with the winds and will also prevent damage to your controls such as bending. This new Control Lock is lightweight and easily stored.

AIRCRAFT LOCKS

PROP LOCK CHAIN

The THEX50 is a "T-HEX" maximum security chain 5 ft in length with hardened 10mm hexagon shaped links. Hexagon shaped case hardened trip heat treated super chain. This heavy duty Prop Lock Chain is the perfect way to insure the security of your aircraft, particularly at remote or foreign airports. The hexagon shaped, heat treated heavy duty chain can endure over 10 tons of cutting force, insuring your aircraft against theft. A black nylon cover over the chain protects your aircraft from the chain when in place. The Prop Lock Chain is 5 feet long and weighs 121lbs. P/N 13-05182.....

WHEEL CHOCK LOCK

This innovative aircraft security device clamps to the wheel which prevents theft of the aircraft, while the built-in chock prevents the wheel from rolling forward when parked. The lock and chock are yellow, while the red rubber coated arms protect the finish of the wheel. Fits any type of wheel up to 12" wide. Lifetime warranty. P/N 13-06141.....

YORK GUST-LOK™

The York Gust Loks the ultimate protection for your plane from wind and theft. It locks in the control surfaces in a neutral position and prevents damage to control surfaces and tail caused by wind gust loads. It is welded steel, fully adjustable, is lightweight, and features a powder coat finish. The York Gust Lok is compact for easy storage and is quick and easy to use. Wt: 2.2 lbs.

AIRGIZMO UNIVERSAL GUST LOCK

If you fly for very long you will quickly realize the importance of locking your control surfaces when leaving the plane outdoors. Finally we have a solution. The AirGizmos Gust Locks are designed to quickly lock virtually any control surface securely. Its bright color and integrated flag reminds you to remove before flight. The rubber cushions ensure that your finish will be protected. They are lightweight and portable. Perfect for carrying in the plane wherever you go.

P/N 13-06139.....

AVIATION PROP LOCK

The Prop Club® inhibits flight by creating an out-of-balance condition. Made of tempered steel, The Prop Club® is an anti-theft device that locks securely onto the propeller at the hub via a four-digit combination. The small Prop Club® has a compressed opening range of 4-1/4" to 5-1/2" (wt: 2.4 lbs) and the large Prop Club® has a compressed opening range of 6" to 8" (wt: 2.8 lbs). As long as the Prop Club® can attach to the base of the prop within this range, and the closed dimensions are smaller than the widest part of the prop, The Prop Club® will remain securely attached to the propeller hub. It will not work on props that maintain the same width from base to tip.

Small Prop Club P/N 13-03378
Large Prop Club P/N 13-03379

THE ALPHA WHEEL LOCK 2000

The Alpha Lock 2000 adjusts to virtually any wheel size in seconds and completely immobilizes the aircraft or vehicle wheel from rotating or turning. The lock is pick and drill resistant and cannot be frozen with freon. Soft, coated arms will not mar or scratch wheels and rims. Furnished in bright red color to warn thieves, weather resistant, and carries a 2-year warranty. Excellent for locking aircraft, autos, trucks, trailers, boat trailers, motorcycles, RV's, etc. Locks anything on wheels! Wt: 8 lbs.

P/N 13-00436

THE PLANE LOCK

For Cessna C-172-210s, except for the C-177. Prevents the wind from popping your doors open and provides an added measure of security against break-ins. No tools or STC required. From outside the aircraft, the pilots door is locked by reaching through the window (prior to closing it) and pushing down the door safety handle. Then, slip the Plane Lock over the window sill and lock the window shut. P/N 13-03386

AIRCRAFT THROTTLE LOCK

Protect your aircraft from theft! This throttle lock is recommended by the International Aviation Theft Bureau, Avemco Insurance Co., AOPA and other insurance companies. Available for vernier or non-vernier throttle. Vernier Lock.....P/N 13-08000
Non-Vernier Lock.....P/N 13-08100

SKYLOK

Skylock is an inexpensive throttle lock for aircraft with Cessna type push-pull throttles. The device will accept shafts up to .375" diameter, and is made of heavy-gauge cadmium plated steel. Skylock affords great peace of mind to aircraft owners at very little cost. Just put in place after every flight, secure with your own favorite padlock, and your throttle cannot be moved! Simple, but it works. P/N 13-18500

ANTI-THEFT LOCK FOR BONANZAS

Built for those incomparable Beechcraft. All have FAA STC/PMA as applicable. The rugged, locksmith quality key lock combines forces with hardened steel pins embedded in the lock body that roll to defeat cutting. Bright red color, easy to use, installs in just seconds. Patent Pending.

P/N 05-03435

PIPER THROTTLE LOCKS

Don't damage your aircraft by using a propeller lock. It happens more often than you think. Someone accidentally turns the key with a propeller lock installed. Usually it something innocent like taxiing the plane to the maintenance hangar or to the wash down area.

The owner or lineman jumps in the plane without doing a pre-flight, after all you're not planning on flying, you just want to move the plane...but all it takes is a turn of the key to damage a propeller, cowl or bent the crankshaft on the engine. FEATURES: •Prevents unauthorized use of your aircraft •Locks the throttle, mixture & propeller controls •You cannot start or operate the engine & propeller with the lock installed •Key lock, includes two keys •Installs and removes in seconds •No holes to drill, no modifications to aircraft •Strong steel construction •Safety yellow color •Available in three sizes for Piper aircraft •Fits aircraft having a throttle quadrant with a tubular horizontal throttle knob (does not fit aircraft having a round throttle knob).

| Description | Part No. | Price |
|---|----------|-------|
| Model #7700 Fits four seat, single engine Piper aircraft with a throttle quadrant | 13-04240 | . |
| Model #7710 Fits six seat, single engine Piper aircraft with a throttle quadrant. Does not fit all Malibu aircraft. | 13-04241 | . |
| Model #7720 Fits Piper Seneca & Seminole twin engine aircraft | 13-04242 | . |

IMPORTANT: The #7720 does not fit: Apache, Aztec, Twin Comanche, Navajo, Aerostar. The lock fits aircraft having a throttle quadrant with a tubular horizontal throttle knob. The lock does NOT fit aircraft having a round throttle knob or ball.

FIRE EXTINGUISHERS – RESCUE EQUIPMENT

H3R AVIATION FIRE EXTINGUISHERS

The FAA recommends and/or requires Halon fire extinguishers on aircraft. H3Rs Halon fire extinguishers are the extinguishers of choice in the aviation industry. They cause no mess or damage, and do not require taking a plane out of service for clean-up; a costly process for both the aircraft owner and insurance carrier. The heat-seeking quality of the Halon gas makes it a superior fire fighting agent.

DISPOSABLE, LOW-MAINTENANCE HALON 1211-1301 BLEND -

Contain a proprietary blend of the "liquid streaming agent," Halon 1211, and the gaseous "total flooding agent," Halon 1301. The blend's power lies in the Halon 1301, which is both a firefighting agent and a propellant. Low maintenance and non-rechargeable. Lightweight aluminum canister Disposable. Tested to ANSI/UL 711 and UL 1093. Meets DOT requirements Meets the requirements in Advisory Circular 20-42C, "Hand Held Extinguishers for Aircraft" and/or NFPA 408, "Standard for Aircraft Hand Portable Fire Extinguishers" 12-year shelf life

RECHARGEABLE, STURDY INDUSTRY-STANDARD HALON 1211 -

Required on commercial transport aircraft. Although classified a "liquid streaming agent," Halon 1211 also performs remarkably well as a "total flooding agent," seeking out and extinguishing fires in inaccessible places. A 6-year maintenance and 12-year hydrostatic test are required. Rugged steel cylinder. Pressure gauge enables easy confirmation of charge. Tested to ANSI/UL 711 and UL 1093. Meets DOT requirements. Meets the requirements in Advisory Circular 20-42C, "Hand Held Extinguishers for Aircraft" and/or NFPA 408, "Standard for Aircraft Hand Portable Fire Extinguishers"

RECHARGEABLE, DURABLE EPA-APPROVED HALOTRON 1™

While it is less powerful pound for pound than Halon 1211, Halotron 1 offers all of Halon 1211's clean agent benefits, and Halotron 1 is less damaging to the ozone layer. H3R Aviation offers two Halotron 1 fire extinguishers: one FAA-approved unit for aircraft use and one wheeled unit for the flight line/ramp. These rechargeable extinguishers have pressure gauges and require a 6-year maintenance and a 12-year hydrostatic test. P/N 13-02562

FIREFLY PLUS FLASHLIGHT/STROBE

The Firefly Plus is a flashlight/emergency locator strobe which is visible for over one mile. The operating life of the strobe is 10 hours, and 2 hours for the flashlight (continuous). Firefly Plus operates on 2 AA batteries (not included) and made of durable ABS plastic. Waterproof & weighs 4 oz. Size: 2" dia. x 5-3/8"h. Excellent addition to any aircraft or home emergency kit. P/N 13-54050

C-STROBE LIGHT

The C-Strobe Light is a life preserver signaling emergency strobe which attaches to a life jacket or life vest with a steel pin or Velcro straps. The omni-directional strobe light is visible up to 2 miles. C-Strobe features a slim, lightweight, waterproof case and operates more than 8 hrs (continuous). Operates on 2 AA alkaline batteries (not included). P/N 13-54020

C LIGHT

The C Light is a life preserver signaling emergency light which attaches easily to a life vest or jacket with a stainless steel pin or Velcro strap. The intense incandescent light is visible for up to 2 miles depending on conditions. The lens intensifies light 20 times brighter than comparable products. Operates on 2 AA alkaline batteries (not included). Operates more than 8 hours (continuous). P/N13-54030

RAPIDFIRE VEST LIGHT

RapidFire Vest Light is a self-contained emergency rescue lamp. It's small, compact, rugged, and waterproof and attaches to a standard life vest. It automatically lights when vest is inflated or on manual pull-pin activation. Provides 8 hours continuous light output once activated. Single use light. P/N 13-54040

MINI B 300 PERSONAL RESCUE TRANSMITTER

- In-line speaker emits audio warble to confirm activation and transmission of distress signal or to notify of accidental activation
- Exclusive ACR audio indication of transmission allows effective self-test
- User-replaceable battery; unit uses inexpensive, easy-to-obtain common lithium camera battery, Duracell DL223A (or equivalent)
- Frequency stability exceeds ETS 300 152 standard; meets rules for satellite detection
- Perfect for use as Crew-Overboard system when combined with Vecta2™ Direction Finder
- Floats if dropped overboard • 121.5 MHz (SAR frequency) provides rescue forces with pinpoint homing
- Antenna maximizes peak effective radiating power when fully extended. Compact size with antenna folded; durable double-braided antenna resists distortion when packed for extended periods
- LED indicator confirms transmission
- Battery installation instructions included

Operating life: 24 hours @ -20°C (-4°F) P/N 13-02416

RESCUE LASER FLARE MAGNUM™

Ahand-held nighttime laser signaling device that provides a convenient, effective way to signal a rescue party up to 20 miles (32 km) away, depending on atmospheric conditions. It's ease of operation, long life and waterproof design makes it the perfect survival signaling device. Unlike conventional pyrotechnic flares, the Rescue Laser Flare™ is non-flammable, non-hazardous and can operate continuously for 72 hours on two replaceable AA batteries.

72 Hour P/N 13-01924.....

15 Hour P/N 13-01923.....

ACTIVE EXTINGUISHING LINE

Active Extinguishing Line is totally independent, 1kg, fire extinguishing system from any power source. Its main secret lies in the heat detector in a form of a line made out of special laser predriller polymer, which will react instantly to any source of heat or fire. This line (heat detector) is connected to reservoir containing fire-extinguishing agent: hexafluoropropane FE-36. Inside of the protected device (equipment) a loop made out of the heat detector breaks, creating a mini sprinkler, directly over source of fire or heat, extinguishing it instantly. In a moment of activation the system closed circuit switch collapses sending a signal informing of fire. For experimental aircraft only. Ask for status of pending STCs.....P/N 13-03266

SMOKE HOODS - LIFE VESTS

PARAT C EMERGENCY SMOKE HOOD

The PARAT C is a lightweight, portable easy to don smoke escape hood designed for selfrescue in the event of a fire. The PARAT C protects the wearer for a minimum of 15 minutes from smoke, carbon monoxide and toxic gases normally present during a fire. It is ideal as a personal escape device which can be used in emergency situations occurring in homes, office or apartment buildings, schools, hospitals, plant facilities and hotels.

FEATURES:Hood made from flame-retardant, selfextinguishing PVC material. Bright orange hood with high visibility and excellent reflective properties. One universal size. Can be worn with glasses, long hair and beards. Large visor treated with anti-misting agent provides wide range of vision for quick escape. Elastic collar makes hood easy to don and adjust. Comfortable, soft, inner mask allows wearer to breath normally through nose or mouth, Perfect for frequent travelers.

Parat C Wall Holder P/N 13-06642.....

PEACE OF MIND SMOKE HOODS

Peace of Mind hoods are emergency respiratory aids that give you the necessary protection to evacuate any area where toxic fumes or smoke could indispose a victim. Also provides protection for eyes, hair, & free against flames, toxic fumes, dust, and sparks. In their vacuum-sealed package, the Peace of Mind hoods are lightweight (3.5 oz) and compact (7.5" x 4.5" x 0.75"). In a few, fast, easy steps, you can slip on the hood and evacuate. Assures peripheral vision, hands free usage & unimpeded communication. You can hear, see,

and talk while wearing the Peace of Mind hood. Its use of filters instead of a mouthpiece and/or breathing apparatus makes Peace of Mind hood easier to use than other devices; Just pull it over your head and evacuate. Excellent for use in general aviation aircraft as well as for travel on commercial airlines. The transparent wall case holds two hoods and two light sticks for use in home or office. The 6-inch light stick diffuses 30 minutes of intense light without heat or flame. Non-toxic and easy to use.

P/N 13-02731

COMFORT MAX INFLATABLE LIFE-VEST

Features: •USCG approved for persons at least 16 years of age weighing 80 lbs. and above with a chest size between 30" and 52" •Dual waist belt stainless steel adjusters. Provides for easy adjustment with both hands and a more custom fit •Exterior inflation system access flap. Allows for clear, direct access to the CO2 cylinder for rearming. CO2 cylinder

can be replaced without opening and unfolding the entire PFD •Waist strap and back strap attachment points fully connected and reinforced from inside for added strength •Heavy duty 420 denier nylon packcloth outer cover •Twin 2" wide back straps for comfort and security •Comfortable neck. The neck area has no Velcro or edge binding to cause chafing or abrasion for all-day comfort .

SMILEVIEW MIRROR™

With the introduction of the SmileView Mirror, a major drawback of high wing tandem seat aircraft has been solved! Even with an intercom, in flight communication has been lacking. Facial expressions can say so much more than just words over an intercom. Instructors, Young Eagle Pilots or anyone flying with a friend need to see the face of their

passenger to gauge what they are feeling. The SmileView Mirror has a 4" x 4" acrylic mirror that mounts securely to avoid vibration, giving a great view. Total weight is 7 oz. and it clamps onto the overhead structural tubing with a socket wrench. It's easily removed, if necessary.

Which of the two versions you use depends on whether your aircraft has a short tube running from the V structure in the windscreen to the wing root or not. The American Champion family of aircraft has this short tube and uses the Rear Mount version. Cubs and many LSA use the End Mount as they have the V structure, alone.

Rear Mount..... P/N 13-05707
Universal End Mount P/N 13-05708.....

SURVIVAL PRODUCTS LIFE RAFTS

Perfect for general aviation. Small and compact it fits in a lightweight valise 4" x 12" x 14" and weighs only 12 lbs. But don't be fooled by its size, price or weight. This raft will do the job for you under the most adverse condition. It provides a fresh water buoyancy of 190 lbs. per person and a deck area of 3.6' per person which exceeds all Govt. standards. Inflated, the raft is 46' inside and 68' outside and every square inch has

been meticulously made from raw materials and components tested for their durability and life expectancy. Every raft is pressure tested and all seams and adhesive bonds rigorously checked prior to release. Raft includes sea anchor, bailing bucket, hand inflation pump, and CO inflation system. Optional survival equipment shown below. 6-13 person raft is 5' x 12' x 14' and weighs 18 lbs. Available in non-TSO'd and TSO'd versions.

WORK SUITS

CONSTANT WEAR AVIATION COVERALL

The MAC10 is a close fitting, anti-exposure suit for pilots and passengers flying over marine environments. Designed to replace multiple garments used to protect aircrew from individual operational hazards, the integrated three layer suit offers protection from fire and its radiant heat, cold exposure, cold water immersion and drowning. A durable, flame resistant Nomex® anti-static outer layer provides protection for the inherently buoyant, thermal protective wetsuit. An inner layer of Nomex® provides further fire protection and comfort. Even after being significantly marred by fire or puncture, the suit maintains its flotation and hypothermia protection. Rugged leather abrasion panels are integrated into the knees and seat offering protection from petroleum, fuel oils and soiling. Multiple pockets provide storage for notepads, pens and survival equipment. An insulated thermal protective hood, stored in the right leg pocket, minimizes heat loss and provides additional fire protection for the head.

The MSF300 comes ready to wear with included universally sized dry socks, trim to fit wrist seals and CCS™ adjustable neck seal.

Sizes: 13, 10, 7, 4, 1, 15, 12, 9, 6, 3, 14, 11, 8, 5, 2, 12A, 9A

Colors: ORANGE, ROYAL BLUE, SAGE GREEN

P/N 13-06378.....

BREATHABLE CONSTANT WEAR AVIATION COVERALL

The MAC100 is a breathable flight coverall that provides anti-exposure protection without sacrificing comfort during prolonged missions. Engineered for maximum mobility during marine aircraft operations, this three layer integrated suit provides protection against fire, radiant heat, cold weather, cold-water immersion and drowning. The breathable foam liner features a moisture permeable membrane that allows excess moisture to escape while providing a thermal barrier against the dangers of outside elements. Durable, flame-resistant Nomex aramid, anti-static fabric provides external protection for the inherently buoyant, flame resistant, thermally protective, integral wetsuit. Even after being significantly marred by fire or puncture, the suit maintains its flotation and hypothermia protection. Rugged leather abrasion panels are integrated into the knees and seat offering protection from petroleum, fuel oils and soiling. Multiple pockets provide storage for notepads, pens and survival equipment. An insulated thermal protective hood and inflatable mitts are stored in the ankle pockets. Sizes: 7, 6, 5, 4, 15, 14, 13, 12A, 12, 11, 10, 9A, 9, 8, 3, 2, 1 Colors: ORANGE, ROYAL BLUE, SAGE GREEN

P/N 13-06377.....

AVIATION DRY SUIT

CONSTANT WEAR AVIATION DRY SUIT SYSTEM (2 LAYER)

The MSF300 is a two-layer Aircrew Dry Suit that combines the performance of the 3 layer MAC300 into two layers allowing greater mobility with reduced bulk and lower thermal burden. The outer shell uses a blended GORE-TEX®/NOMEX® fabric that is waterproof, breathable, flame-retardant and anti-static. High-wear areas are strategically reinforced to enhance the suit's durability and prevent abrasion damage that could compromise the suit's integrity. The breathable thermal liner provides both insulation and emergency flotation and

features Mustang's aerated closed-cell foam quilted with a wicking fabric that pulls excess moisture away from the body. An adjustable neck seal using Mustang's patented Closed Comfort System (CCS™) can be worn loose to provide comfort out of the water and can quickly be drawn tight to keep the water out and trim to fit neoprene wrist seals provide water-tight integrity. The thermal liner can be easily removed from the outer shell to reduce thermal protection where not operationally required. An ergonomically designed rear entry allows for self donning and doffing. Integral pockets are designed for a variety of uses and facilitate access even when wearing a survival vest over the suit. The MSF300 comes ready to wear with included universally sized dry socks, trim to fit wrist seals and CCS™ adjustable neck seal. Sizes: XXL, XXXL, M, S, SX, L, XL Colors: ORANGE, SAGE GREEN

SURVIVAL KITS - FIRST AID KITS

TWO-MAN V.I.P. SURVIVAL PACK

It's staggering just how much useful equipment comes out of this 10" x 11" w x 4" d backpack. Everything arranged logically and available the way you'd want it. Organized into 6 major divisions: medical/first aid, food & water, shelter & protection, fire & cooking, signals & lights, & "emergency devices." Wt: 20 lbs P/N 9217

NYLON CASE FIRST AID KITS

Be sure to carry a first aid kit on all flights, particularly over desolate terrain. Model A: First Aid Kit - Packed in a nylon case for easy storage. The same type used on commercial air carries with contents in smaller quantities. Ideal for general aviation. Includes all basic necessities in a compact lightweight package. P/N 13-02944

MODEL B: FIRST AID KIT - In addition to all of the first aid products in the Model A kit, Model B also includes a strobe light to aid searches in locating downed aircraft and survival blanket. (Battery not included). P/N 13-02945

MOTION EAZE

Motion Eaze is the most effective motion sickness treatment on the market today. Whether you want to prevent occasional motion sickness or relieve its symptoms, after the fact, Motion Eaze does the job. No matter, if it's sea sickness, car sickness, air sickness or any activity where motion sickness poses a problem, Motion Eaze really works. Contains no drugs, artificial additives, or stimulants of any kind. Only the freshest, highest quality, natural oils are used in its production. Motion Eaze is an oil that is applied to, and absorbed through, the skin, just behind the ear. Relief arrives in minutes and lasts for hours. It's perfect for children that have trouble taking pills. Motion Eaze is safe, having no known side effects. P/N 13-02732

ACUPRESSURE WRIST BAND

Fast, effective motion sickness control without drugs, drowsiness, or other side effects. Can be used by adults or children. Exerts a carefully-controlled pressure on acupressure point of both wrists. Takes 2 to 5 minutes to become effective. Used successfully by physicians & the military. P/N 9411

MOTION SICKNESS RELIEF BAND

Take the ReliefBand® Medical Device along to help relieve that awful feeling of nausea caused by motion sickness. It's drug-free, non-invasive, comfortable to wear and east-to-use. Worn similar to a sports watch, but placed on the underside of your wrist, the ReliefBand® Medical Device works using gentle electronic signals to stimulate nerves in the wrist. A tingling sensation lets you know the ReliefBand® Medical Device is working. This helps normalize stomach rhythm, helping to relieve nausea. P/N 13-05700

SIC-SAC™

Use these for air sickness emergencies. Moisture proof and tear resistant even under extreme temperature changes. 10 sacks, individually packaged, each with attached tie band. Pack of 10 P/N 9296

PUMA METHOD FOR PREVENTION OF MOTION SICKNESS

PS

Take Control of your Life!

Imagine the Possibilities!

The Puma Method is a series of simple conditioning exercises, taught on VHS or interactive DVD, that effectively prevents the nausea, vomiting, lightheadedness and other unpleasant symptoms experienced by over 50% of the population while traveling. Sam C. Puma MD, president of Puma Applied Science and former Air Force Flight Surgeon at NASA, developed these revolutionary new exercises to totally eliminate carsickness, seasickness, airsickness, and even spacesickness. The Puma Method is unique in that it uses the body's own mechanism to actually master motion sickness, so there is never a need for drugs, devices or herbs. This means no unexpected or unpleasant side effects. The mild head, neck and upper body exercises take only about 15 minutes a day to do. DVD P/N 13-03675 VHS..... P/N 13-03676

ACR SIGNAL MIRROR

Sighted signaling mirror with float and whistle. Designed to provide optimum sighting "spot" with holographic red dot viewing window. When target image, mirror & sun are in proper alignment, red dot on target ensures mirror reflection is on target. Telescope quality second surface reflective mirror is bright, provides focused image. Buoyant float for easy recovery if dropped overboard. Patented whistle (meets USCG) for audible alerting in low visibility conditions. Signal Mirror has lanyard for securing to person or liferaft. Size: 4.25x2.75x0.19 in. (10.8x7x0.5cm); Wt: 1.8 oz (51 g) P/N 13-03177

SURVIVAL BLANKET

Often called the "space blanket." NASA thought of everything when they came up with this metal-coated nylon design. Waterproof and windproof, it retains 80% of body heat, it's colored to be seen from more than 4 miles away (although it measures just 4' x 7'), it's radar-reflective, and it folds down into a water-proof pouch 8.5"x9"; wt:10 oz. P/N 9145

LAND/SHARK INSTANT SURVIVAL SHELTER LS-1300

Stored in its water, vapor and grease-proof vacuum sealed pouch, it measures only 6" x 8" x 1" and weighs a mere 18 oz. (0.5 kg.). When needed, it opens to a windproof, waterproof, heat-retaining roomy 36" x 84" (91.4 cm x 213.4 cm) thermal cocoon that provides full body coverage, even over heavy outerwear and boots. It then protects you from exposure and helps you maintain a life-sustaining core body temperature until help arrives. In the open water, the waterproof bag serves to slow the drain of vital body heat and provides protection from chilling sea spray and breaking waves. The aluminized (International Orange) material is radar reflective for search aircraft and high speed vessels moving at night. In warmer waters where the sun is a danger to exposed skin above the water, the bag can be configured to provide for shade and ventilation. P/N 13-05691

LIGHTED LINEMAN WANDS

Used by US Air force • Up to 400 hours operation • 21" long • Waterproof • Uses 2 D batteries (not incl.) • Fluorescent coated diffuser enhances red light output. P/N 13-08959

PELTOR FIRST AID KIT

This 90 piece first aid kit from Peltor was designed for aviation use and includes bandages, iodine pads, butterfly wound closures, alcohol prep pads, adhesive pads, sting relief pads, latex gloves, eye pads, tape, splint, eyewash, tweezers, scissors, cold pack, first aid handbook, and more. In plastic case with gasket. P/N 13-94535

AIRCRAFT EMERGENCY SURVIVAL KIT

This is an ideal emergency support kit for plane, boat, home, office or school. This kit will sustain a person for 3 days. Includes: 2400 calories of ready-to-eat US Coast Guard approved food, sterile Coast Guard approved water, a lightweight (54" x 48") durable, waterproof blanket, & assorted first aid supplies, matches etc. P/N 9641

3M™ ULTRATHON INSECT REPELLANT

Unique, time-release technology allows you to enjoy the outdoors longer. Provides lasting protection — up to eight hours against mosquitoes, gnats, chiggers, biting flies and ticks. Helps reduce the risk of contracting West Nile Virus and Lyme Disease. 2 oz. Lotion..... P/N 09-01723..... 6 oz. Aerosol..... P/N 09-01724.....

SURVIVAL KITS – FIRST AID KITS

CANADIAN-ALASKAN SURVIVOR PAK

Originally designed for pilots flying within Alaskan and Canadian airspace, the CA-20 offers protection against harsh climates in the event of an emergency. It contains over 150 medical and general supply items to help sustain two people for up to 14 days. The space saving design combined with its ample supply of food and water makes the CA-20 a popular

choice on board fixed wing, rotor craft, and corporate jets. It's also used extensively by Search & Rescue units! P/N 13-03596.....

EMERGENCY SURVIVAL KIT

Specially designed by a focus group, the ESK-02 makes it easy to be prepared for life's little surprises. Each kit contains over 40 medical and general supply items including a guidebook that offers survival tips and basic information. Designed to support one person for up to three days, the ESK-02 carries a five-year shelf life on food and water. Its affordable price makes it a great choice as a premium/incentive

item, corporate gift, or employee award. P/N 13-03606.....

THE TRAVELER KIT

The Traveler Kit - Personal Care Package is appreciated by everyone from busy executives to sports enthusiasts. It's the perfect addition to any car as the "other spare" to have on hand for life's unexpected moments. Designed to support one person for up to three days, it contains over 50 support items in a custom nylon carrying bag with reinforced straps. "The Traveler" is

ready to go anywhere P/N 13-03607.....

2-PERSON EMERGENCY SURVIVAL KIT

This deluxe 2 PERSON EMERGENCY SURVIVOR KIT could mean the difference between disaster and survival in an emergency situation. It contains a complete 3-day supply of food, water, medical & other emergency supplies for 2 people.

Over 60 Emergency Items! • Emergency Drinking Water Metallic Sachets • 2400 Calorie Emergency Food Rations • Instant Cold Pack • Medical Kit • Disposable Flashlights • Thermal Blankets • AM/FM Portable Radio w/ Batteries • The Wallace Emergency Guidebook P/N 13-03608.....

EMERGENCY BLANKET

This Emergency Blanket (52" x 82.5", 1.5 oz.) provides personal protection from rain, wind, heat, and cold. It's manufactured from extremely lightweight, flexible, space-age material, and retains up to 90% body heat in cold weather. It even deflects heat in hot climates and can be used to offset hypothermic reactions. The Emergency Blanket is waterproof, reusable,

and portable. It's perfect for camping trips and sporting events in addition to emergencies. Keep several on hand for the unexpected! P/N 13-03604.....

SNOW BROOM

The SNO BRuM offers pilots a way to quickly sweep snow off aircraft wings and away from the user. Great for high wing aircraft. The durable molded polyethylene foam head has been lab-tested for non-abrasiveness, freeze resistance, center

load stress and durability to achieve the highest ratings in all tests. The oversized head (6" x 17") is the largest snow remover available. The high-impact plastic face plate is recessed into the foam to prevent contact with the aircraft. The aluminum telescoping handle has special cold resistant nylon threads and extends from 27" to 46". Also great for cars, trucks, SUV's, and awnings. P/N13-04055.....

FIRST AID 'N TRAVEL KIT

Finally—a compact, complete travel unit for the person on the go! This kit fits perfectly in a purse, briefcase, or glove compartment, and is ready when you need it in first aid situations. This kit is very special because it's the only one of its kind to include a 4 oz. sterile water packet with a five-year shelf life. Ask us about using this kit for fundraisers or corporate promotions! We can customize the kit to include your company's logo.

P/N 13-03605.....

COCOON SLEEPING BAG

The All Weather Pocket Size Sleeping Bag The Cocoon Sleeping Bag (84" x 36") provides personal protection from rain, wind, heat, and cold. It's manufactured from extremely lightweight, flexible, space-age material, and retains up to 90% body heat in cold weather. It even deflects heat in hot climates and can be used to offset hypothermic reactions. The Cocoon is waterproof, reusable, and portable. Keep several on hand for the unexpected!. P/N 13-03603.....

EMERGENCY FOOD RATIONS

MAINSTAY™ FOOD PACKAGE - Mainstay™ has emerged as a food product unlike any other. Before it came into the picture, emergency food bars were only being made for short-term use. Survivor Industries changed all that when it created a great-tasting, non-thirst provoking product with an extraordinary five-year shelf life. Mainstay™ is specially formulated for land-based high stress situations. Each package contains 9 pre-measured 400 calorie meals, which allows a person to get their full nutrition in a challenging situation. Mainstay™ is Kosher and it meets the dictates for Halal.

Mainstay™ 3600 P/N 13-03599.....
Mainstay™ 2400 P/N 13-03601.....
Mainstay™ 1200 P/N 13-03602.....

EMERGENCY WATER PACKETS

Mainstay™ Water Packets - All water is not created equal! Here at Survivor Industries we have spent years perfecting our Mainstay™ Water Packets. The final result is a portable product with a 5-year shelf life. Other Key Benefits: • U.S. Coast Guard approved • No Oxygen Transfer (In other words, no chance of bacterial contamination) • Pre-Measured Packets make the water easy to dispense, and potential for loss is minimized. If a packet is destroyed, only 4.224 ounces (125 ml) would be lost. • Easy to Transport - just 18 lbs. (8.17 kg) per case of 60 packets. • No special storage required - it can withstand temperatures from (-40°F to 210°F) (-40°C to 99°C) • Very Low Cost. • No Cups Needed!

P/N 13-03598.....

THE WALLACE GUIDEBOOK

For Emergency Care & Survival - When you're faced with a disaster, you can often face physical and psychological strain. It's often hard to remember what to do in an emergency situation, and this is exactly why we've written the Wallace Guidebook. This book is specifically designed to present the basics of survival in an extremely easy-to-understand manner. This book discusses the following topics, plus many more: Choking, Heart Attack, CPR, Shock, Burns, Emotional Trauma, Bleeding, Fainting, Wounds, Broken Bones, Fractured Bones, Back Injury, Childbirth, Auto Breakdown, Temperature Extremes, and the 1st and 2nd Rules of Survival. It's not fun to be in one of these situations, but having a book like this nearby gives you a better chance of a happy ending.

P/N 13-03597.....

CANOPY BREAKER TOOL

The Piranha Canopy Breaker Tool is a robust device with a sharp edge on one end. The tool is secured inside the aircraft cockpit to a frame member or seat frame, within easy reach of the pilot. A plastic cover is over the blade end for tactile and visual identification and protects the pilot from the blade end. In an emergency situation the pilot locates the Canopy Breaker Tool,

removes the safety pin / lanyard which secures the tool to the aircraft and the red cap. The pilot firmly grasps the tool with one hand and places the other hand underneath the tool, then positions the blade parallel to the canopy side frame, near the frame and uses very strong upward thrusts aiming one of the blade points at the Plexiglas. The unit is made from industrial strength aluminum, weights 10 oz and the lanyard has a 35# break strength. P/N 12-02269.....

PS

SURVIVAL KITS

Crashkit Personal and Professional Flight Line Series aviation survival kits are quickly becoming an industry leader in top quality aviation survival kits. Numerous kits are available to suit you piloting and survival needs.

CRASHKIT ALPHA SURVIVAL KIT

The "Alpha" personal aviation survival kit is designed for the pilot with general knowledge of survival techniques. This kit should only be purchased by experienced and skilled individuals. This kit includes 24 of the most essential items packed into the smallest kit practical. Weighing in at only 1.54lbs, the general kit is small enough to fit in any flight bag, purse, glove compartment, map pouch or cargo pocket.

Every item included in this kit has been thoroughly tested and approved to insure it performs flawlessly when needed (we've even sharpened the knife!) and meets or exceeds Transport Canada's Canadian Aviation

Regulations to facilitate survival and rescue. Dimensions : 6.37" x 4.75" x 2.12"(16.9 x 12.06 x 5.4 cm) Weight : 1.54 lbs Contents : 24 items covering food, fire, water, shelter, and first aid Case : Pelican 1020 case - yellow - tough, watertight, polycarbonate case Optional Acc's : Parachute deployment system; Aircraft Mounting Bracket Warranty : Lifetime P/N 13-04684

CRASHKIT BRAVO SURVIVAL KIT

The 'Bravo' personal aviation survival kit is designed for the pilot with some basic knowledge of survival techniques. Containing 51 of the most essential items, this kit remains small and lightweight. At only 2.20lbs, it is compact enough to fit in any flight bag, purse, glove compartment, map pouch or cargo pocket.

Each item in this kit has been thoroughly tested and approved to ensure flawless performance when needed, and meets or exceeds Transport Canada's Canadian Aviation Regulations to facilitate survival and rescue. Dimensions : 7.50" x 5.06" x 3.13"(19.05 x 12.86 x 7.94 cm) Weight : 2.20 lbs Contents : 51 items covering food, fire, water, shelter, and first aid Case : Pelican 1050

case - tough, watertight, polycarbonate case Optional Acc's : Parachute deployment system; Aircraft Mounting Bracket. Warranty : Lifetime P/N 13-04685

CRASHKIT CHARLIE SURVIVAL KIT

The 'Charlie' personal aviation survival kit is designed for the pilot with minimal knowledge of survival techniques. Including 71 of the most essential items, this kit is extensive in its coverage of necessary tools and supplies. Packaged in a Pelican 1120 case, 'Charlie' is still compact and lightweight enough for easy transport and storage.

Every item in this kit has been thoroughly tested and approved to ensure it performs flawlessly when needed, as well as to ensure the ease of use for each individual piece. This kit meets or exceeds Transport Canada's Canadian Aviation Regulations to facilitate

survival and rescue. Dimensions : 8.12" x 6.56" x 3.56" (20.9 x 16.6 x 9.0 cm) Weight : 2.81 lbs Contents : 71 items covering food, fire, water, shelter, and first aid Case : Pelican 1120 case - tough, watertight, polycarbonate case Optional Acc's : Parachute deployment system; Aircraft Mounting Bracket Warranty : Lifetime. P/N 13-04686

CRASHKIT 2-7 SURVIVAL KIT

Designed for use in typical GA light aircraft, specifically those used in flight schools or clubs, this crashkit has the materials necessary to sustain two people for seven days in the event of a crash. Redundancy in the items within the kit allows for multiple options for food, fire, water and shelter; for example, the kit contains four items capable of starting a fire. Containing 165 of the most essential items needed in a survival situation, this kit is packaged in a Pelican 1200 case, and remains lightweight and compact for easy transport and storage on a craft. Every item included in this kit has been thoroughly tested and approved to ensure it performs flawlessly when needed, and meets or

exceeds Transport Canada's Canadian Aviation Regulations to facilitate survival and rescue. Dimensions : 10.63" x 9.69" x 4.88" (20.9 x 16.6 x 9.0 cm) Weight : 7.15 lbs Contents : 165 items covering food, fire, water, shelter, and first aid Case : Pelican 1200 case - tough, watertight, polycarbonate case Kit Coverage: 2 people for 7 days (or longer dependent on situation) Optional Acc's : Parachute deployment system; Aircraft Mounting Bracket Warranty : Lifetime. P/N 13-04690

CRASHKIT 4-7 SURVIVAL KIT

The Crashkit 4-7, designed for use in typical GA light aircraft and commercial aircraft, contains the materials necessary to sustain four people for seven days in the event of a crash. The variation of items within the kit allows for multiple options for food, fire, water and shelter; for example, in addition to the Mainstay packaged food, a fishing kit and snare are also included. This kit contains 232 of the most essential items needed in a survival situation, packaged within an indestructible Pelican 1400 case.

Every item included in this kit has been thoroughly tested and approved to ensure it performs flawlessly when needed, and meets or exceeds Transport

Canada's Canadian Aviation Regulations to facilitate survival and rescue. Dimensions : 13.37" x 11.62" x 6.00" (34 x 29.5 x 15.2 cm) Weight : 17.55lbs Contents : 232 items covering food, fire, water, shelter, and first aid Case : Pelican 1400 case - tough, watertight, polycarbonate case Kit Coverage : 4 people for 7 days (or longer dependent on situation) Optional Acc's : Parachute deployment system; aircraft mounting bracket Warranty : Lifetime. P/N 13-04691

CRASHKIT 6-7 SURVIVAL KIT

Intended for commercial aircrafts, our Crashkit 6-7 has enough materials to sustain six people for seven days in the event of a crash. Various means of food, fire, water and shelter allow for multiple options; for example, this kit includes not only Mainstay water, but the means for purification, as well as hot chocolate or tea. Within this indestructible, crushproof and waterproof Pelican 1450 case, 261 of the most essential items needed in a survival situation are packaged and ready for easy use. Every item included in this kit has been

thoroughly tested and approved to ensure it performs flawlessly when needed, and meets or exceeds Transport Canada's Canadian Aviation Regulations to facilitate survival and rescue. Dimensions : 16" x 13" x 6.88" (40.6 x 33 x 17.5 cm) Weight : 22.80lbs Contents : 261 items covering food, fire, water, shelter, and first aid Case : Pelican 1450 case - tough, watertight, polycarbonate case Kit Coverage : 6 people for 7 days (or longer dependent on situation) Optional Acc's : Parachute deployment system; aircraft mounting bracket Warranty : Lifetime. P/N 13-04692

MILITARY PILOT SURVIVAL KITS

SURVIVAL TOOL KIT - Total weight is 3 lbs. Custom designed, adjustable carrier pouch holds equipment. Can be worn around waist, used as tourniquet or with wooden dowels as splint. Dowels help with fire-starting. Blunt-tipped Meyerco Rescue One knife prevents injury, cuts seat belts and harnesses. Handle includes carbide

glass breaker. Two emergency blankets. Emergency signaling mirror. Victorinox SwissTool includes: pliers, screwdrivers, wire cutter, cap lifter, blades, metal file and saw, wood saw, reamer and punch, chisel/scraper, crate opener, wire bender, stripper and scraper, can opener, ruler, electrical crimper. Two-sided screw bit holder with six bits and belt holder. Whistle. MINI MAG-LIGHT® flashlight. Knipex adjustable plier wrench. Magnesium fire-starting tool from Doan Machinery and Equipment. AIRSOFT REUSABLE EARPLUGS

AIRSoft earplugs feature a shell of soft attenuating material around a pocket of air that is the highest rated reusable earplug available with a noise reduction rating NRR 27..... P/N 13-02194.....

ULTRA FIT E-A-R PLUGS

You get the best noise protection possible with a premolded ear plug. Triple flange design gives you a perfect fit and a noise reduction rating of 27 db. Conversations can still be heard while harmful noises are reduced to a safe level. Comes with carrying case and chain for hanging in a convenient place.
One Pair.....P/N 9821.....

E-A-R NOISE FILTERS

Soft polymer foam fits inside ear canal and expands to block sound and filter out damaging noises. Provides up to 35 db noise reduction. Washable and reusable.
P/N 9134...../pair

PELTOR 30 CALIBER EAR PLUGS (CASE OF 10)

The unique shape of the Peltor 30 Caliber Plugs is concave at the base to help wearers achieve easy, deep insertions for optimum protection. The Easy-Grip Handles on each plug allows for quick and easy removal. The Peltor 30 Caliber plugs are packaged in a 10 pair ammo case like actual bullets.
P/N 13-04287.....

LITTLE JOHN

Positively the least expensive accessory you can buy to extend your range. One authenticated case reports a Piper Malibu's range extended by 500 miles. Durable plastic, won't crack under any normal handling and temperature conditions. A tight screw-on cap makes it spill proof. Standard issue in hospitals for years.
P/N 9741.....

LADY J ADAPTER

The anatomically designed funnel snaps in and out of the little John. It can be used sitting or even standing. Clean white plastic.
P/N 9745.....

G FUNNEL ADAPTER

The G-Funnel is a portable urinal adapter which simply screws on to any plastic pop or water bottle that will be used as a container for those situations where a washroom facility is not available. The appeal to this adapter is that it can be attached and used together with any sized plastic pop or water bottle that most people have on hand. The plastic pop or water bottle is to be used as liquid container and then can later be emptied for reuse or just thrown in the trash when available. We think you'll agree that this is a very useful relief device for those emergency situations.
P/N 13-01974.....

RESTOP DISPOSABLE URINAL

The anatomically designed Restop is the disposable urine bag that combines a unique blend of polymers, enzymes, & deodorizer to turn urine into an odorless gel on contact. The funnel design prevents accidental spills. Restop is sanitary, non-toxic, spillproof & odorless, safe and convenient, trash container safe, and small enough to fit in pocket. Easy to use by men & women. 2 pack.
P/N 13-00794.....

TRAVEL JOHN

Absorbent pouch turns urine into gel instantly while destroying bacteria and odor. Specially designed collar works for men women and children; spill guard prevents back guard during use. Convenient, sanitary and compact. TravelJohn is easy to use while sitting or standing. Will not leak or spill, even if punctured. Holds 28 fl. oz. Includes antiseptic hand wipe.
3-pack.....P/N 13-00894.....

IPEE - DISPOSABLE URINE COLLECTION DEVICE

The SuperSlab 100® device is biodegrade and disposable urine collection device designed for men & women. Every SuperSlab 100 device includes a female adapter which enables women to urinate easily while standing. The SuperSlab 100® converts the liquid urine into a solid in less than one minute with an absorbent. The absorbent ITBX5®, is a biodegradable, 100% organic compound. After the SuperSlab 100® transforms the liquid into a solid, the device is easily stored for proper disposal at a later time.

6 Pack.....P/N 13-05577.....

RESCUE STREAMER™ DISTRESS SIGNAL

This bright orange streamer, visible from 1.3 miles away at 1,500 ft. altitude, leads Search & Rescue teams right to you. The patented high-strength polyethylene Streamer design, tested and used by the U.S. Military and Coast Guard, is marked with the international distress symbol. Features sealed air-filled struts that keep it afloat on water and open on land to pinpoint your exact location to rescuers. RescueStreamers™ start at the size of a cell phone when stored and unroll in seconds. Always ready for use anywhere; land, water, and snow. Does not require chemicals, batteries, or electronics to signal continuously. Patented design approved for US Military & Coast Guard use. Furnished in a mesh bag for storage in a 1-2 person raft. Weight: 6.7 oz. Display size: 6" x 40 ft. Stored size: 3.5" x 7.5"
P/N 13-03767...../ea.

CO DETECTORS

CO GUARDIAN CARBON MONOXIDE DETECTORS

CO Guardian uses a patent-pending technology to compensate for changes in an airplane due to temperature and humidity. The detector has three (3) warning systems: audio, digital, and numeric warnings for escalating or dangerous levels of carbon monoxide in the cabin. CO Guardian can also be used in vehicles, motor homes, emergency vehicles, etc., as it plugs into any 12/24V adapter. All models have 3 Year Limited Warranty.

MODEL AERO-152A - Features: • Max power consumption = Less than 1W • Weight: approx. 2.5 oz • Works from 10V to 30V sys. • Product shielded to prevent RMI (Radio Magnetic Interference) with Aircraft systems • Audible alarm with varying pitch at 85DB • Digital CO Level Readout • Front panel lighting (Green, Amber & Red) • CO Sensor tested to 13,500ft • Built in Temperature compensating circuit • Built in Humidity compensating circuit. P/N 13-01639.....

MODEL AERO-152WD - Features: • Max power consumption = Less than 1W • Wt: approx. 2.5 oz • Works from 10V to 30V sys. • Product shielded to prevent RMI (Radio Magnetic Interference) with Aircraft systems • Audible alarm with varying pitch depending at 85DB • Front panel lighting (Green, Amber and Red) • CO Sensor tested to 13,500 ft • Built in temperature compensating circuit • Built in Humidity compensating circuit. P/N 13-01640.....

MODEL AERO-353 - CO Guardian upgrades its best selling model 352 to the 353. Model 353 has a brand new sensor that can detect CO as low as 1 Part Per Million (PPM) to 999 PPM. This unit now comes standard for interfacing CO levels display on the G1000, GNS480 and other Multi- function displays. The 353 now has a built in pressure sensor that compensates for altitude. These units can be mounted on the panel or remotely. The 353P now has a built in pressure sensor which compensates for altitude up to 25,000 feet. Similar to hypoxia, this becomes more critical as altitude increases and the body's tolerance to CO decreases. 353P/N 13-01642.....
353PP/N 13-05733.....

MODEL AERO 552 - This unit is a replacement for the 2.25" clock and provides the latest CO protection that displays 30 to 999 ppm in the cockpit, as well as aircraft high and low voltage alarms, pressure density altitude readout for takeoff. Cabin altitude alerts to remind you to go on oxygen. An RS232 output that allows the parameters for CO level, cabin pressure and temperature to be displayed on the UPS AT CNX80. P/N 13-02569.....

DIGITAL CO2 DETECTOR

• Super large 3-1/2 digital LCD display with backlight • Pocket-sized and easy to use • Fast sampling time • Max hold and data hold • Audible beep from 35 to 200 ppm • Continuous beep after 200 ppm • Auto power off - 15 min. inactive • Protective rubber boot Specifications: • Range: 0 to 1,000 ppm • Resolution: 1 ppm • Accuracy: 5% or 10 ppm • Power source: (1) 9 volt battery • Dimensions: 6.3" x 2.2" x 1.6" P/N 12-01896.....

DIGITAL CO2 DETECTOR

The extremely affordable DCO 1001 has a measuring range of 0-1000 ppm and comes complete with a soft case, a wrist strap, 3 "AAA" batteries and an instruction manual. Features: • Adjustable co warning level • LCD dual digital display • Bright backlight • self test • Low battery indication • °F/°C selectable • Auto power off • Auto zero • Co range: 0~999ppm • Resolution: 1ppm • Battery life is 250 hours when the backlight is off and 35 hours with the backlight on. P/N 12-01895.....

MODEL 300 POCKET CO

The Model 300, with LOUD buzzer, vibrator, and LED alarms, the most versatile one-ounce full feature carbon monoxide dosimeter on the market today is now the only aviation carbon monoxide detector a pilot can attach to their key chain for travel, home, and a multitude of other life saving uses. Pocket CO Model 300 features nanotechnology enabled low-level carbon monoxide readings displayed every 5 seconds from 0 to 500ppm. Weighing less than one ounce, the wearable key-fob sized dosimeter calculates TWA, TE, MAX ppm, and time of max reading. Complete with replaceable battery, two-year instrument and sensor warranty, Pocket CO 300 provides maintenance-free protection in a durable, weather-resistant, single button package.

HONEYWELL LUMIDOR XT, XP

THE LUMIDOR MINIMAX XT - Personal detector is able to monitor a single as from a choice of oxygen, carbon monoxide and hydrogen sulfide gases. Utilizing patented Surecell™ and Reflex technology, the Minimax XT achieves 24 months continuous, maintenance free operation. Audible, visual and vibrating alarms are standard. New Real-Time display versions available. All Lumidor Minimax XT instruments are supplied with a case clip, test adaptor and manual. An optional interactive product guide CD is available. Shelf life is 12 months on CO and H2S versions. IP67 water ingress protection.

LUMIDOR MINIMAX XP - The Lumidor Minimax XP personal detector is able to monitor a single gas from a range of oxygen and toxic gases. Utilizing cell output delay compensation, in conjunction with patented sensor technology the Minimax XP ensure accuracy and reliability while providing a cost effective instrument. User flexibility is achieved with built-in menus, and the on/off operation of the instrument provides up to 3 years of battery life under typical use. All Lumidor Minimax XP instruments provide 2 levels of instantaneous alarm, STEL and TWA alarms, and have audible, visual and vibrating as standard. All Lumidor Minimax XP instruments are supplied with a case clip, test adaptor, manual and an optional interactive product guide CD is available. Designed to meet IP54 water ingress protection.

LONG LIFE CARBON MONOXIDE DETECTOR

No longer do you have to replace that Carbon Monoxide Detector every 28 days, the new Quantum Eye Carbon monoxide detector offers a minimum 18 months of sensor life. P/N 09-35601.....

STANDARD CARBON MONOXIDE DETECTOR

Carbon monoxide is odorless and colorless, but this economical little stick-up pad gives you a visible warning if it's present in the cockpit (or car or garage). A little graying of the color spot means a little gas: if it turns black, the concentration is dangerous. Adhesive backed. Spot returns to normal color after being exposed to fresh air. P/N 09-35600.....
5 or more...../ea.

ASA CARBON MONOXIDE DETECTOR

Carbon Monoxide (CO) is a toxic, odorless, and tasteless gas produced by the incomplete combustion of gasoline, kerosene, natural gas, butane, propane, fuel oil, wood, coal, and other fossil fuels. Dangerous levels of CO can be produced by internal combustion engines or from any poorly vented or improperly adjusted fuel-burning appliance. Exposure to CO may cause sickness, headaches, or even death. P/N 13-05755.....

WINDMETERS - WEATHER STATIONS

WINDSCRIBE HANDHELD WIND METER

WindScribe is a precise, handheld wind meter (anemometer). In addition to registering the current wind speed, the WindScribe also measures maximum headwind, maximum tailwind, a five-second average wind, and a running average wind. Speeds can be displayed in both U.S. and metric units, and the unit also records temperature - useful for figuring out whether fog may form soon - and wind chill. The WindScribe weighs 3.5 ounces and comes with a lanyard. A velcro strap and mounting bracket are included. P/N 13-04019.....

WIND WIZARD WIND SPEED INDICATOR ECONOMY MODEL - ACCURATE & COMPACT

A single scale eliminates the need to shift back and forth between two scales when wind conditions are variable or gusty. Conveniently calibrated in miles/hour, meters/second and Beaufort. Expanded in the lower wind speed range of 0-20 MPH (0-8.9 meters/sec). Slips easily into a shirt or coat pocket. Safety wrist strap gives added security in stronger winds, and stores out of the way in the folding handle. Constructed of high impact plastic and corrosion resistant metals. It comes with leather-like carrying case. No Batteries needed. P/N 13-18520.....

SKYWATCH GEOS 11 HANDHELD WEATHER STATION

With features never before found on a handheld weather instrument, the GEOS 11 was designed specifically for the demanding needs of many markets: Aviation; reading of the Flight Level, height, finesse, pressure, altitude, altitude variation, etc.. Features: Electronic Compass: • analogical and digital Three Data Recording Modes: • manual recording by pressing two buttons • automatic recording at selected intervals, when unit is off or on • automatic recording at selected intervals, when unit is on only. Bright LED Light: • operates on separate battery. Replaceable Ball Impeller: • rotates to protect impeller blades. Exposed Sensors for instant readings P/N 13-04757.....

SKYWATCH HANDHELD WIND METERS

Designed for consumer and professional use, the Xplorer does not include complicated and seldom-used features such as downloading and storing. Press one button, and instant readings are at your fingertips. Dimension: 3.5 x 1.5 x 0.75 in, 2 oz. (41 x 93 x 17 mm, 50 g) One button operation, EL Backlight Completely sealed; internal sensors, Weatherproof (can be submerged 6 feet), Replaceable Lithium battery (included and installed), Stainless steel back, Auto-off after one minute (can be disabled to remain on), Included lanyard One year warranty. SKYMATE WINDMETER - Convenient pocket-knife design, accuracy, features, and price make this the best value in handheld wind meters! It is water resistant, it floats, and it has a high visibility case. Average wind speed over 5, 10, or 13 seconds. Current temp & wind chill. Choose any measurement unit. Reads in tenths. Replaceable 400 hour lithium battery. Data lock feature. Replaceable plastic impeller won't corrode. Easy to read LCD. Threaded for tripod mounting. Unique pocket-knife design to protect unit when not in use. Water resistant to 3 ft. High visibility case. One year warranty. Features: • Windspeed • Temperature • Windchill • Water Resistant to 3 Feet. • Floats • Safety Yellow case P/N 13-00086.....

WM-100 WINDMATE 100 - Current, Average (5,10,13 secs) Maximum wind speed all use a wind vane to ensure most accurate measurements. For long-range shooting, use the tripod fitting and add the optional wind tunnel accessory. All wind functions in user selected units * Reads in tenths * Backlight * Tripod fitting * Rugged water-resistant case * Comes with adjustable lanyard. Features: Current wind speed • Average wind speed (5, 10, 13 seconds) • Maximum wind speed Mph, Kt, Kp/h, BF, FPM, M/Sec. Wind vane assures you are on the wind's axis • Tripod fitting • Fits wind tunnel accessory • Rugged water-resistant case meets U.S. military specifications • Auto shutoff • Comes with adjustable lanyard P/N 13-04292.....

WM-200 WINDMATE 200 - Offers the most popular features in a handheld device, wind speed and temperature, with wind chill calculation. Single button operation, easy measurements, and the display has a backlight; handy for lowlight conditions. Each unit is water resistant, and has a tripod fitting. Features: * Digital wind direction in degree & compass points * Cross and head/tail wind readings * Temperature * Windchill * Backlight Specifications: * Windspeed accuracy +/- 3% from 8-89Mph * Wind speed range to 135Mph * Digital compass/wind direction accuracy +/- 2° * Temp/Windchill accuracy +/- 1.8° F * Optional Units: Mph, km/h, kt, ft/min, m/s, BF (Beaufort) * F or C * Avg windspeed over 10 secs * Max windspeed 2 sec gust since power on * Auto shutdown * POWER: CR2032 replaceable Lithium battery (included) * Measures: 5.5" x 1.75" x .75" closed * Weighs 3.2oz with battery * 2-yr warranty P/N 13-04293.....

WM-300 WINDMATE 300 - Wind speed and digital wind direction, relative humidity, dewpoint, wet bulb & Delta T make this a comprehensive tool for forestry, agriculture and emergency management professionals. Humidity sensor does NOT require adjustment; it is self-calibrating. This unit is equipped with a backlight. Accuweather.com® patented Comfort Index™ gives the effect of temp, relative humidity, wind speed, & sun intensity on the human body. Unit can be tripod mounted. Features: * Relative Humidity (self-calibrating sensor) * Dewpoint * Delta T * Accuweather.com patented * Jackknife case allows most accurate temp & RH readings * Wind speed range to 135Mph * Optional Units: Mph, km/h, ft/min, m/s, BF (Beaufort) * F or C * Avg wind speed over 10 secs * Max wind speed 2 sec gust since power on * Auto shutdown * POWER: CR2032 (400-Hr) replaceable Lithium battery (included) * Measures: 5.5" x 1.75" x .75" closed * Weighs 3.2 oz with battery * Comes with breakaway lanyard * 2-yr warranty. WEATHER STATIONS – FLASHLIGHTS

WIRELESS VANTAGE PRO2 WEATHER STATION

Uses frequency hopping spread spectrum radio technology to transmit data wirelessly up to 1000' (300 m). Console/receiver, integrated sensor suite, and mounting hardware. Integrated sensor suite includes rain collector, temperature and humidity sensors, anemometer, 40' (12 m) anemometer cable, and solar panel. Sensor suite is solar powered. AC-power adapter included for console, or use with three C batteries (not included). Wireless range is up to 1000' outdoors, line of sight. Typical range through walls 200' to 400'. Add wireless repeaters for distances up to 1.7 miles.

MAGLITE LED FLASHLIGHTS

MAG-LED™ Technology known for their obsession with precision engineering, craftsmanship and commitment to perfection, was not satisfied with the performance of a "regular" LED as a usable light source. They set their sights on producing a light source that would not only incorporate longer battery life, but would also have the kind of durability, reliability, and performance Maglite®

flashlights are known for. With an emphasis on uncompromising performance, MAG-LED™ Technology is the result of that quest.

ASA LED FLIGHTLIGHT

This AirClassics™ LED Flightlight is durable, compact, and bright -- ideal for the flight bag where space and convenience are priority. The flashlight has both white and green bulbs, making this an effective tool for preflight, night flying and chart reading. ASA wings logo imprinted in silver. Typical battery life is a solid 10 hours. P/N 13-06426

THE ASHLIGHT

13-04347

13-04348

13-04349

The ASHLIGHT has been designed and tested by pilots. The super-bright red LED light provides the ultimate in hands-free cockpit lighting with a flip of the switch. The ASHLIGHT is designed with a stainless steel spring that duplicates the original ashtray clip for easy snap-in installation! The majority of aircraft manufacturers (Cessna, Beech, Bellanca, Grumman, Mooney, Piper, etc.) all used a standard ashtray opening of 1.5h x 2.125w or 1.6h x 4.7h side panel mounted ashtray. Smaller planes used the Standard Size while larger planes such as KingAir, Chiefian, later model Barons and Bonanzas, etc. use the Large size. If your aircraft does not have an ashtray, the Visor Clip Model is an excellent alternative!

Standard Ashlight P/N 13-04347

FLIGHTLIGHT™ - PILOT FLASHLIGHT

This AirClassics™ flashlight has both white and red lenses for preflight and night flying, extra Krypton bulb stored within, is water-tight, corrosion resistant, and features a clicking ON/OFF for maximum battery life. Focuses from spot to flood light. Black machined aluminum with ASA wings logo. Two AA batteries and PR-1 bulb included.

Flashlight: P/N 13-01067
 Bulb: P/N 13-02320

FLIGHT LIGHT PEN

See what you write — even at night! Saves pilots from using an overhead light when writing in a low-light situation, and the green LED light will maintain a pilot's night vision — LED lasts a lifetime! The flashlight cap enables pilots to look for items nearby, serving as a temporary illuminant. The clip on the cap allows for easy storage. Includes 2 LED lights, and 2 button cell batteries. 5 1/4" x 3/4".
 P/N 13-01099

BEND-A-LIGHT

Bend to any configuration and illuminate hard-to-reach areas where conventional lighting cannot go. The incredibly brilliant light beam penetrates anywhere! A must for electronics, automotive, maintenance, repairs, locksmiths, industrial, hobbies, around the house and more. The only complete line of professional quality high intensity flexible light tools. Available in 3 lengths and 3 different lamps to choose from. Made in USA and come with batteries installed.

PILOT FLASHLIGHTS

SUREFIRE AVIATION FLASHLIGHTS

Long known as a major supplier of quality flashlights to law enforcement and the military, Surefire has just made available a new flashlight built for aviators that combines two widely different light sources in a single compact illumination tool providing dual power and variable output. Surefire flashlights feature the finest beams, reflectors, switches and powerful tungsten lamps available on the market today. They are not inexpensive but for the pilot looking for a truly unique, high quality, reliable flashlight, Surefire is the answer. Surefire flashlights carry a lifetime warranty (excluding batteries and lamps).

The **A2 Aviator** features a high-output incandescent lamp producing 50 lumens surrounded by 35mm LED's set in a specially designed parabolic reflector. The Aviator's digitally controlled two-stage switch allows the pilot to choose LED's for soft light illumination in the cockpit or high output lamp for bright illumination during preflight inspection of your aircraft. The high beam on the A2 Aviator can illuminate the tail of a 747 from the ground. That's over 63 ft high! Not bad for a flashlight that measures only 5.6" in length and weighs only 4 oz. The A2 Aviator comes standard with a gray-green super-tough Type III hard anodized finish to military specifications, because it is the best and the toughest. It is powered by 2 lithium batteries, is shock-proof, water-resistant and comes with a lifetime guarantee (excluding batteries and lamps). Length: 5.9"

The **L1 Lumamax** features a 1W Luxeon LED which produces 15 lumens from one Surefire 3V lithium battery, which is three times brighter than a conventional mini light running on two AA alkaline. For the pilot needing only the soft light of LED lighting for cockpit illumination, the L1 Lumimax is an excellent choice. Length: 4.6"

The **G2 Nitrolon** is Surefire's most economical flashlight, and uses 2 lithium batteries to produce 65 lumens of diamond bright light for 60 minutes. The G2 is constructed of Black Nitrolon, a polymer compound that is lightweight, corrosion-proof, and non-conductive. Depress the tailcap on the G2 for momentary illumination or rotate fully inward for constant-on illumination. Length: 4.9"

The **E2d Defender** is constructed from aerospace-grade aluminum coated in a super rugged military-specification finish, the pocket-size E2D Defender also features an optically-coated Pyrex® lens; high-energy, ten-year shelf-life lithium batteries; a stainless steel pocket clip, and law enforcement-style click-on/off momentary switching for blinding flashes or emergency signaling.

SUREFIRE ULTRA U2 FLASHLIGHT

Compact (palm size) high-intensity variable-output LED flashlight for tactical, duty, and general use. Uses a virtually indestructible light-emitting diode (LED) to provide six output levels, from a long-running low beam to a brilliant white tactical-level high beam almost seven times the light of a big two D-cell flashlight. Ring selector provides instant output control. Electronic current regulation maintains a more consistent level of light output for the useable life of the batteries. Variable output, compact size, extended-runtime low beam and high-output beam capability, and 10-year battery shelf life also make it perfect for backpacking or camping and for disaster preparedness kits. P/N 13-04710

123 Lithium Battery for the U2 Ultra..... P/N 13-04711

SUREFIRE REPLACEMENT BULB MA02

The MA02 lamp assembly fits A2 Aviator flashlights and produces 50 lumens of light for 1 hour. P/N 13-04438

STREAMLIGHT FLEXIBLE FLASHLIGHT

The Streamlight has a 6.21" flexible, insulated cable extension allows 14 inches for hard-to-reach areas. Made of silver aircraft aluminum casing and a tough PVC shielded cable. Unbreakable, 100,000-hour white LED that never needs replacing. It has a runtime of up to 60 hours. (4) AAA batteries included. Wt: 1.1 oz. P/N 13-03142

PELICAN AVIATION LIGHTS VERSABRITE

This is the world's brightest swivel head pocket flashlight. The adjustable head swivels 180 degrees, enabling the pilot to direct the beam where he needs it. It is water resistant and mounts directly on the adhesive pad of yoke chart holders. Provides 6000 candlepower Xenon laser beam spot beam, and comes standard with clear, red, and blue-green lenses. Clips easily on shirts, belts, and caps for hands free use. Comes with multi-use velcro fasteners and 2 AA batteries.

P/N 13-00561

Versabrite mounting clips (1 top, 1 side mount)

MICRO ONE WATT LED FLASHLIGHT

The new Micro FlashLED is more powerful than most LED flashlights on the market today. It has a 1-Watt, 80-Lumen LED chip that emits over 4,300 End-foot candles (4300cd) of bright, cool white (8000 Kelvin) light that's powerful enough and lasts long enough to light your way — all the way home. Features: * One Year Warranty * One Watt, 80 Lumen LED Chip * Focussable Lens: Narrow and Wide Beam * Puts out over 4,300 End-Foot Candles of light * Retains 50% of its light output after 1 hour of continuous use * Visibility approx. 2 miles, depending on atmospheric conditions and line of sight * Lights for 4 days (96 hours) at a diminishing light output rate * Micro FlashLED High Brightness Light can induce dizziness in criminals' eyes in a few seconds. * Uses 3 standard AAA batteries * Rugged Anodized Aluminum Body Finish * Push button on/off switch * Weight: 3.5 oz. without batteries, 4.8 oz. with batteries P/N 13-06456

SUPER MITYLITE WITH PELIKNIFE
This handy light features a 6000 candlepower pocket light with a laser sharp pre-focused beam. Only 4.5" long, this light is virtually unbreakable and is submersible to 600 ft. Includes a lock back pocket knife which is 3" long when folded and features a 2" long stainless steel blade. Incl. 2 AA batteries, key chain ring, pocket clip. P/N 13-00567

PILOT'S HANDY LANYARD LIGHT

This emergency light with a break-away neck lanyard is great for use around any aircraft. Ideal for pre-flight inspections after dark, providing you with a small, powerful flashlight which you can simply hang around your neck as you preflight the aircraft. Also makes the perfect cockpit light in an emergency. Furnished with blue-green and red lenses for night flying as well as a standard clear lens. Includes lanyard & 1 AAA battery. P/N 13-00571

MINI LED FLASHLIGHTS

Our original astro flashlights, much imitated but never duplicated, are back! More compact at only 3.5 inches long, 2 inches shorter than water resistant version, and for a tiny price! NOT water resistant (sorry there's only so much we could squeeze in), but all the other great features in a smaller, lighter case. Features: •DUAL Ultra-bright LEDs -- The best and the brightest with lifetimes of 100,000+ hours, never break, and provide smooth illumination. •Thumbwheel Brightness Control -- Dial up just the right amount of light and extend battery life. •Energy Efficient -- Up to 320+ hours at the dimmest setting, 12+ hours at the brightest, from one 9V Alkaline. •Exclusive brightness regulation circuitry -- keeps the LEDs shining bright as batteries age, unlike competitors LED flashlights which start bright but quickly fade. •9 Volt Battery & 20 inch neck strap included

MYGRIPLIGHT (LED)

Multi purpose product that performs as an organizational tool as well as a multi purpose light. The organizational tool organizes writing instruments, cell phones, eyeglasses, flight charts and other documents by means of a patented polyester snap-in-lock structure to secure these items. The patented multi purpose light is connected to the organizational tool by means of a flex-arm. The light has 360 degree rotation and can be removed from the organizer to act as an independent lighting instrument. The light offers both white and red light illumination on demand. MyGripLight mounts to most any surface by use of Velcro® fasteners that is supplied with the product. It can be mounted permanently by the use of screws through the mounting slots built into the organizational tool. P/N 11-07540

FLASHLIGHTS

XEVISION PERSONAL LED FLASHLIGHTS

The compact LED flashlights are so small that they fit in the palm of a hand comfortably. They are so bright, even die-hard HID Xenon lighting technology purists can not resist.

Super-bright white light from one small but powerful LED

Our LED flashlights feature the latest commercial Cree LED 7090 XR-E, which delivers unprecedented levels of bright white light. The legendary 7090 XR-E is tested to the

highest standards in the LED industry. The white light generated is as cool as HID with around 4000°K to 5000°K. The current draw is quite small while the LED is very efficient with a luminous flux of up to 100 lm min. @ 350 mA, and a luminous efficacy up to 75 lumens/watt.

XeVision personal LED flashlight models

The compact LED flashlights are so small that they fit in the palm of a hand comfortably. They are so bright, even die-hard HID Xenon lighting technology purists can not resist.

XV-C1C - Is their most compact LED flashlight using one long-lasting 3 VDC Lithium CR123A battery. The XV-C1C features six settings, 4 of them being output levels. This flexibility not only allows the user to select the best compromise between brightness and runtime for any given task but also has the ability to aid in an emergency. The XV-C1C offers a remarkably compact size and is extremely solid and reliable with its digitally regulated brightness. One 3 VDC CR123A Lithium battery

THE LIGHTED PILOT PEN

Professional LED Writing Instrument for Pilots, Flight Crews, Law Enforcement and Military Use. Features: • Aircraft aluminum housing with on/off LED lighting and rotating top cap ink cartridge retraction. • Works as either a standard pen or for writing in low light or dark conditions. • Uses one

common AAA cell for up to 20 hours of illumination • Gift box packaged with an extra ink cartridge and extra AAA cell • Two extra-bright White LEDs with a life of over 100,000 hours P/N 13-05278.....

PILOT'S COCKPIT UTILITY & EMERGENCY LIGHT

See all your panel control settings, maps, charts, compass, and log books. Choose red light for night vision, or bright white light. Designed to travel anywhere, the Navigation Light can be clipped to most surfaces or used free-standing. Uses: * Aviation * Marine * Automotive * Trucking * RV * Emergency Response Vehicles Features: * Four different light level options * Two red LEDs in one head and two white LEDs in a second

allow for lighting versatility * Dual flexible arms provide infinite maneuverability * Sensor switches on each lighting head require just a tap to turn on one or both LEDs * Optical grade lens provides evenly distributed light with no hot spots * Easily bends to compact position for storage * Offers 20 hours of continuous use on 3 AAA batteries * Extra strong clip grips almost anything * Uses 3 AAA batteries (included) or available AC Adapter (110-240 Volts) (not included) P/N 11-05821.....

ASA TRI-LITE NAVIGATOR

The Tri-Lite flashlight is equipped with red, green, and white LEDs providing maximum flexibility and everything the pilot needs to

maintain night vision while also providing the true-color options necessary for accurate chart, fuel, and oil color interpretation. Hands-free operation is made possible by 3 Velcro®-like (3M Dual Lock) mounting strips. The light can be snapped onto headsets, kneeboards or other flat surfaces, and can be quickly removed and re-attached. When attached to a headset, a focused beam of light is directed wherever the pilot looks. P/N 13-05753.....

PETZL HEADLAMPS

PETZL HEADLAMPS

In 1972, when Petzl invented the first headlamp, the idea of attaching a light and its battery case to a headband was quite innovative. A hands free light source that can be directed where needed, allows the user to perform almost any activity. Headlamps have now become an important factor in safety and efficiency. Thought innovative use of technology (LED's and current regulators), impact-resistant of headlamps that can be used in many situations...from the simplest tasks to the most demanding work and rescue applications. All headlamps include batteries.

TACTIKKA PLUS/FLIP FILTER RED (E49P)

TacTikka Plus 4 LED Headlamp with Red or White Light, 3 Power Settings & Flash, Alternates easily between white and red light simply by moving the pivoting filter over the reflector. Features: •3 Power Settings & Flash •Tilt Focus •Long battery life up to 110 hours •Lightweight and comfortable to wear: ergonomically designed elastic headband. •Water-resistant for all-weather use •Operates with three AAA-LR03 batteries (supplied) •Weighs 78g •Includes Batteries.
P/N 11-05096

TIKKA LED TILT HEAD LAMP

46P2- LED headlamp with red flip down filter, and tilting head. 3 LED array produces long-lasting and even light. Features: •Produces diffuse, proximity lighting. •Red filter for discrete light and preservation of user's night vision. •Flip-down filter makes it easy to switch between red and white light. •Light beam can be easily aimed where desired. •Adjustable and comfortable elastic headband. •Water resistant for all-weather use. •Black lamp and headband.
P/N 11-04990

TACTIKKA CAMO BAND RED FLIP UP E46PC

TacTikka LED Alternates easily between white and red light simply by moving the pivoting filter over the reflector. Long battery life up to 110 hours. Lightweight and comfortable to wear: ergonomically designed elastic headband. Water-resistant for all-weather use. Also available in CAMOUFLAGE version: elastic headband and lamp head in camouflage color.
P/N 11-04988

TIKKA LED TILTING HEAD LIGHT (E43P2)

Ultra-light 3 LED headlamp with elastic headband. The Tikka is the most compact and lightest headlamp of our range. With a 150 hour burn time, it is ideal for long term close-up work, as it gives a very white light. The reliability and long life of the LED makes it very safe. It has an on/off switch.
P/N 11-05094

MYO HEADLAMP 3 BLACK 3 LED 1 HALOGEN E27PN

Features: •4 hour burn time Xenon bulb - 180 hour burn time for the 3 LEDs •Lightweight, compact, and extremely versatile this one light can do it all. •Switch lock mechanism prevents the light from draining your batteries when stored •Tilting head mechanism allows you aim the light where it is needed most •Spare Xenon Halogen bulb included with headlamp. Water resistant - won't short out even if submerged
P/N 11-05099

MYO 5 HEADLAMP LED/HALOGEN E28P

bulb included with headlamp. Water resistant - won't short out even if submerged

P/N 11-04994

MYO HEADLAMP XENON HALOGEN E32P

The Myo is Petzl's simplest headlamp, featuring a super bright Xenon halogen bulb. Its compact design has a tilt features as well as focusable beam. An ideal light for times when you need a bright light with your hands free. Features: •Maximum range 100 m •Supplied with spare 6 V standard bulb •Operates with 4 AA alkaline batteries (included) •LEDs available, providing brilliant white light for over 100,000 hours of continuous burn time - they will never need to be replaced.
P/N 11-04992

DUO 5 HEADLAMP PETZL LIGHTS E69

The DUO lamps are ideal for use in wet environments, but are not designed for prolonged submersion (i.e. diving). Features: • Waterproof with dual light source: focusable halogen bulb and an LED module. • Switching on & off, brightness selection, zooming • The DUO lamps allow the light to be optimized (distance, duration) according to your needs. • Simultaneous use of both bulbs is not possible. • Unlocking/locking the bezel
P/N 11-04996

ZIPKA PLUS/PUSH BUTTON SWITCH E48P

Ultra-light 4-LED headlamp with 3 lighting levels and retractable cord. Retractable cord can be used to attach lamp to the head, the wrist, wrapped around a pipe, etc. Features; •Very lightweight. •Three lighting levels (maximum, optimum, economy) and a blinking mode. •Long light duration up to 150 hours. •Water-resistant for all-weather use.
P/N 11-04989

PILOT LED HEADLAMP

The Pilot LED Headlamp is designed specifically for pilots operating in nighttime conditions, and offers reliable, convenient, hands-free illumination. The triple 10,000+ hr LED bulbs and 50 to 160+ hr battery life (vs. approx. 6 hours for a Mini Mag-Lite) promise reliability far in excess of normal flashlights, and practically eliminate burned-out bulbs and dead batteries. The Pilot is a compact, ultra-lightweight, waterproof, hands-free lighting system that's comfortable to wear (even with headphones), is furnished with a hard clamshell case, and comes with a 3yr warranty.
P/N 12-00719

BELT BATTERY PACK MYO 5 E33P

Belt Mounted Battery Pack for MYOSB5. Features: •Maximum level: ideal for climbing or moving quickly on technical ground •Economy level: ideal for reading maps, setting up a tent.
P/N 11-04991

CLIPSTICK

The Clipstick features a flexible Loc-line that provides sturdy support, allowing a product to be positioned in numerous angles while maintaining its shape. With 3" oversized spring-loaded clips fastened to each end of the connectors, the Clipstick firmly holds many of the standard items a pilot will utilize during a flight. P/N 13-03430.....

THE SNAKE CLIP

Introducing the SnakeClip™, a unique aviation cradle which holds a variety of personal electronic items such as cell phones, PDA's and iPods. Attaching and detaching in seconds, the portable SnakeClip™ can be transferred between planes and automobiles for maximum utility. Like its predecessor, the ClipStick, it can be attached to multiple surfaces in the cockpit and won't sag or lose its surface grip over time. No installation necessary - simply clamp the SnakeClip™ onto a suitable surface and it's ready to "bite". The padded adjustable arm on the cradle expands to hold items up to 2.5" wide, and features a quick-release button for easy device removal. Clip under cradle can hold numerous items such as pens, notepads and most GPS units. Mounting arm is composed of industrial-grade flexible connectors which provide rigid support, yet allows the unit to swivel & bend in hundreds of angles maintaining its shape. The versatile clips contain rubber pads for surface protection & have 3.25" clamping area. The SnakeClip™ measures 12" fully extended.. One-year warranty. P/N 13-05549.....

THE PORTABLE ARMREST FOR PILOTS

Introducing the 100% portable center armrest for airplanes that makes flying comfortable. An ongoing problem for general aviation aircraft has been the absence of a center armrest for the pilot and co-pilot which leads to fatigue. Instant Armrest has finally solved this problem. Other armrest products are airplane specific and require drilling, bolting, and mounting hardware. Professional pilots, renters, and student pilots can now own an affordable armrest that they can take with them on every flight, even when they change planes. * Fits any aircraft * Fits flat or bucket seats *Fits right and left seats * Ready to use in 1 second * Adjustable *Fits in flight bag * Lightweight aluminum P/N 13-03154.....

SIDESTICK CONTROL ARM RESTS

The side stick control arm rests will steady the hand, which improves flying and reduces wrist and arm fatigue. The arm rests were designed by an orthopedic specialist to reduce wrist and hand carpal tunnel syndrome. They can also be used for throttle rests. Color: Black. ABS plastic. Furnished as right/left set. P/N 13-03265.....

COCKPIT COMPANION ORGANIZERS

The Cockpit Companion provides a convenient organizer for the loose items pilots shuffle in the cockpit. It is easily installed with Velcro between the front seats and features clean out windows at bottom of the storage areas. Holds fire extinguisher, charts, books, transceiver, headsets, glasses, wallet, fuel strainer, flashlight, pens, highlighters, and more. Attractive and durable, the Cockpit Companion is built from top-grade smoked acrylic. Made in USA.

CHARGE AL

Charge® AL includes scissors that slice through just about anything with beveled edges that allow them to get close to whatever you're cutting, for a clean trim every time. Bit drivers for versatility, diamond-coated files for fine-point work and a 154CM clip-point knife are all housed in 6061-T6, hard-anodized aluminum alloy handles. Rounded edges for grip comfort and a stainless steel badge make this a Leatherman that's really earned its name.
PN 13-04515.....

CHARGE ALX

Take the Charge AL and replace the scissors with an aggressive cutting hook on the back of the serrated blade and you've got the Charge® ALX. Rip through tough materials like seatbelts, linoleum and leather with no problem. Get your hands around the same unbeatable ergonomic grip, outside-accessible blades and premium materials like 154CM and 6061-T6, heat-treated, alloy aluminum.

VIBRALITE3 VIBRATION WATCHES

Great for Private and Confidential Reminders! Has auto-reset countdown timer. The vibration on your wrist from VibraLITE3 will remind you to do any important thing without annoying others. What's really great is that you don't have to hear the alarm to know that it's signalling you.

This watch is especially nice for pilots, students (taking exams), and of course the deaf and hard of hearing. Since the watch also features an Auto Reload Countdown Timer, it can be the ideal answer for those who need reminding of times to take medicine, scheduled daily activities and more.

With stainless steel band P/N 13-02541

With leather band P/N 13-02542

REVUE THOMMEN WATCHES

At the beginning of the 1920s, the company Revue Thommen started manufacturing aircraft instruments. It is for this reason that it has more familiar with special needs of pilots than any other watch manufacturer. The Airspeed Classic self-winding wrist-watches and chronographs were inspired by the instrument panels of commercial and military aircraft that are equipped with Revue Thommen precision instruments. These instruments are characterized by clear, easy-to-read numerals, hands and displays and are fitted with a self-winding mechanical movement or with a quartz movement. The casing is made from stainless steel or titanium, a material favoured by the aerospace industry.

REVUE THOMMEN SWISS A/S WATCH - Airspeed Line Classic. Calibre ETA 2836-2 (automatic watch with date hand). All stainless steel case, screw-in steel case back, anti-reflective double-faced sapphire crystal, water-resistant to 100 m / 330 feet. Assorted dials. Diameter 37.5 mm / 32.5 mm.

VEDALOHD™ PERFORMANCE SUNGLASSES

FRAME STYLES

High-Definition Lens Technology (HDL-3C™), built into new sunglasses offer improved sight definition for pilots, using color, clarity and comfort. These lenses filter the visible spectrum to improve color contrasts; decentered lenses increase visibility and eliminate distortion; visual health is improved and eye fatigue is reduced thanks to lightweight frames. Visibility is said to be increased through tristimulus color contrast enhancing techniques; other color tinting techniques improve color simulation but only improves one basic color type in the color spectrum.

These non-polarized (important for pilots!) lenses come in two lens types: rose (for low light conditions), and smoke (for bright light conditions). The sunglasses are very lightweight and comfortable. We offer a 30-day money back guarantee if you're not satisfied. Several choices for frames are available.

SUNGLASSES

Randolph Engineering has been a leading supplier of military sunglasses to the U.S. Armed Forces since 1982. These sunglasses are the choice of America's Top Gun pilots and NASA astronauts. They meet demanding U.S. military specifications, provide superior glare protection and UV absorption and can be converted to prescription lenses. All of the sunglasses below feature 23K gold plated, hand polished frames and come with a crush resistant case.

AVIATOR - Standard issue for military pilots worldwide. (MIL.SPEC. 25948). These lenses sharpen detail and show colors evenly, making them ideal for flying. Bayonet temples provide optimum fit for use with a headset or helmet.

POLAR EYES PREMIUM POLARIZED SUNWEAR

PolarEyes® Sport Collection - PolarEyes sport sunwear provides Advanced UV Protection™. The patented designs utilize flexible hypoallergenic nylon Weightless

Frames™ (average weight 21 grams) paired with PolarPC polarized lenses to give the wearer not only maximum protection from glare and damaging ultra-violet light, but also an unsurpassed fit that is both comfortable and secure. Developed from 25 years of polarized sunglass manufacturing experience, PolarEyes offer protection like no other sunglass. Thermal ports eliminate moisture build up on the lens surface.

CASE AND CLOTH - All PolarEyes® sunglasses include a case and a large micro-fiber lens cloth.

PolarPC® Lens System - All Frames feature polarized UV400 PolarPC lenses that completely protect the

eyes from damaging UV light and eliminate harsh surface glare. Made from impact-resistant polycarbonate with a bonded hard-coat to resist scratching. Lenses are available in gray or copper tints.

SCHEYDEN FLIP-UP SUNGLASSES

Scheyden Precision Eyewear is simply Aviation's Finest Eyewear. With the Scheyden patented flip system & locking mechanism, pilots can instantly adapt to constantly changing light conditions with the flip of a finger. This unique function puts an end to fumbling around with glasses and headsets forever. Effortlessly FlipUp in lowlight conditions and FlipDown when the sun is bright.

The frames are fabricated in Titanium for incredible strength while weighing mere ounces. The manufacturing tolerances are extremely strict, rivaling those of the aerospace industry. Most importantly, all Scheyden Precision Eyewear offers 100% UVA and UVB protection for your most valuable resource - your eyes. Lenses are available in High Contrast Bronze and Neutral Gray.

Dual Rx options enable pilots to lighten their load to one eyeglass frame for all cockpit vision requirements.

All Scheyden Eyewear comes packaged in a luxurious Bubinga Rosewood case which

can be custom engraved with your name, tail number and/or company logo.

Scheyden Precision Eyewear offers a Lifetime Warranty on their frames and has the best lens replacement warranty in the eyewear industry.

Demand Precision. Demand Scheyden.

SUNGLASSES

SERENGETI AVIATOR SUNGLASSES

Serengeti Aviators protect your vision while eliminating glare and sharpening details better than other sunglasses. Cloud boundaries are more easily delineated and oncoming traffic is more visible. Unique photochromic spectral controls improve your ability to see in marginal VFR and IFR conditions. In bright sunlight, you'll see the instruments better and ghost images will be eliminated from the cockpit. Wear them late in the day or at sunset to preserve your night vision.

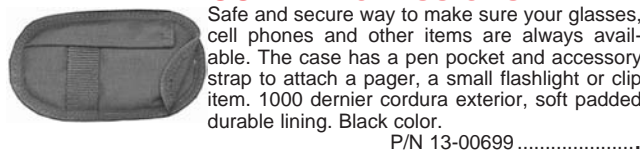

AMERICAN OPTICAL SUNGLASSES

Performance-tested sunglasses with classic aviator styling. The Original Pilot Sunglass® has been a favorite of US military pilots for more than 40 years. Engineered to rigid military specifications and issued to millions of US soldiers, sailors, marines and airmen since 1958. The rugged and sturdy structure and high quality finishing of the steel alloy frame coupled with distortion free, toughened and polished True Color® glass lens have made the AO Flight Gear® Collection the standard bearer of all fine military sunglasses.

BELT LOOP EYE GLASS CASE

OPTX 20/20 HYDROTAC STICK-ON READING LENSES

These stick-on lenses instantly turn any brand of sunglasses into sharp, clear reading glasses! They can be cut to the shape of any sunglass lens, and are removable & reusable; they adhere to the sunglass lenses by molecular attraction. Excellent for pilots using Ray Ban, Serengeti, Randolph and other aviator sun glasses, as well as outdoorsmen and anyone needing inexpensive corrected sunglasses. Available from 1.25 to 3.0 diopters in .25 diopter increments. Please specify magnification at time of order.

LIVE EYEWEAR COCOONS SUNGLASSES

Cocoons were designed to fit over glasses; however our smaller styles make them extremely popular as solo sunglasses. Cocoons feature PolarTx® polarized lenses to eliminate harsh glare, allowing your eyes to remain focused on the task at hand. The optical grade lenses and side shields precisely regulate light transmission, reducing eye fatigue and strain. They block 100% of damaging UV A&B light, providing 40% more protection than conventional sunglasses. Cocoons offer a virtually unbreakable frame with soft touch finish, adjustable temples, lifetime warranty, 3 contemporary shapes and sizes, and are accessorized with floating neoprene case and lens cloth. Color: Black.

Sizing Guide: Measure the width (w) and height (h) of your prescription eyewear to determine which Cocoons sunglasses will fit best.

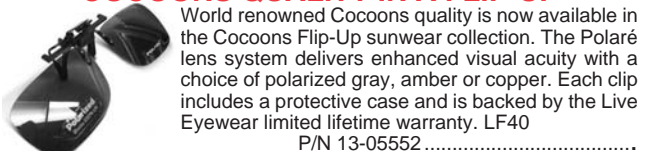

eyewear or as conventional sunglasses. After wearing Cocoons for a short period of time, your eyes will begin to relax. The polarized UV400 front and side lenses treat incoming light, eliminating distracting glare and allowing you to focus on the task at hand. The patented frames protect your eyes from all angles, blocking sunlight, UV, glare, wind, rain and airborne debris. C427C
Features: • Polarized UV400 • Scratch Resistant • Flex2fit® Temples • Soft Touch Finish • 360° of UV Protection • Ultra Lightweight • Case and Cloth • Lifetime Warranty

section of frame that separates the front and side lenses. Vistana's patented designs use continuous full wrap lenses that eliminate the section frame between the front and side lenses, creating a more open and uninterrupted view. Encourage your customer a traditional over prescription sunglass to the evolutionary Vistana design and they will immediately notice the difference in both performance and style. W412G

WHY WOMEN PREFER AIRPLANES T-SHIRT

You may have seen the "Why Men Prefer Airplanes" T-shirt; well turn-about is fair play! From the front, this 100% preshrunk cotton T looks like just another mild-mannered Powder Puff Pilot product. But from the back, it tells the world ten reasons why airplanes are better than men. It's available in white with fuchsia trim, in M (4-6), L (8-10), XL (12-14), and XXL (16-18)

RED CANOE APPAREL

RED CANOE CAPS

The classic and unparalleled fit is the cornerstone of every Red Canoe cap. Perfect vintage colours and appliqué techniques make each design a potential heirloom (as long as one of your friends doesn't 'borrow it indefinitely' - we recommend buying two!). 100% brushed cotton with fully adjustable velcro closure.

AMERICAN AIRLINES 50 CAP - From a melting pot of fledgling carriers in the early 1930's American Airlines has become a global leader in Air Transportation. Our AA Vintage Reissue Licensed Products feature the historic icons, colours and logo application techniques like layered cut felt. SIZE: One Size COLOUR: Navy PN 13-05343.....

BELL HELICOPTER - Larry Bell jump-started his company's foray into helicopters when he hired Arthur M. Young, a talented inventor, to provide expertise for helicopter research and development. It was the foundation for what Bell hoped would be a broader economic base for his company that wasn't dependent on government contracts. Bell Aircraft Corporation had originally only produced airplanes, including the famous Bell X-1. The Bell Model 47 became the first helicopter rated by a civil aviation authority in the world and would become a civilian and military success. SIZE: One Size COLOUR: Burnt Yellow PN 13-05344.....

CESSNA CHEVRON CAP - When Clyde Cessna taught himself to fly in 1911 it was the start of a unique relationship between man and machine. To thousands of air men and women today the name "Cessna" has come to symbolize flying itself. Our CESSNA Vintage Reissue Licensed Products are a salute to this legendary icon of aviation. SIZE: One Size COLOUR: Stone PN 13-05345.....

CESSNA PLANE CAP - When Clyde Cessna taught himself to fly in 1911 it was the start of a unique relationship between man and machine. To thousands of air men and women today the name "Cessna" has come to symbolize flying itself. Our CESSNA Vintage Reissue Licensed Products are a salute to this legendary icon of aviation. SIZE: One Size COLOUR: Heritage Red PN 13-05346.....

STEARMAN C CAP - The Boeing Stearman model 75 series aircraft were built between 1936 and 1945 as military trainers. 8500 of these classic, lusty biplane warriors were produced with around 2000 still flying today. After WWII hundreds of Stearmans were sold as surplus for between \$200 and \$500 each. The stearman remains an enduring icon of US aviation heritage. SIZE: One Size COLOUR: Navy PN 13-05347.....

US AIR SERVICE - As a pilot you have joined the ranks of those less bound by conventional limits on time, distance and personal freedom. The US Air Service logo signifies this and reminds us that with this 'gift of flight' comes a responsibility to serve others should an emergency we can help with call us to duty. SIZE: One Size COLOUR: Tan PN 13-05348.....

CUSTOM AIRCRAFT MODELS

Recreate your airplane into a beautifully detailed desktop replica. Our premium custom made models are built to your exact specifications – no detail will be spared. You can have ANY aircraft recreated into a museum quality desktop model with your paint scheme, logos, registration number or any other details and markings. Complete your model with a fully customized stand including your choice of logo and a personalized inscription plaque. We offer over 3,000 different models – both military and civilian. Our desktop models are a maximum of 17" in either wingspan or length. Please allow approximately 6-8 weeks for delivery. 100% satisfaction guaranteed. When ordering please provide: aircraft specifications, propeller description, aircraft colors, and registration information. You will also need to specify the logo and inscription plate text.

PS

COCKPIT COOLERS - LICENSE PLATE FRAMES

COCKPIT COOLERS

Heat getting you down? Have you been wishing there were a way to efficiently and quickly cool your airplane's cabin? If you answered "yes" to either of those questions, then you need the Cockpit Cooler to make your trips comfortable!

MODEL AP - 100 14V/28V

For the cooling process, the unit creates ice-chilled air, followed by evaporated water, drawn through a saturated media filter. The high-volume, high-velocity air is drawn in through and around the ice. As the ice melts, it absorbs heat and creates chilled water. The chilled water evaporates and absorbs heat further. The cool air is circulated in the cabin by the high-volume blower at 250 cfm.

- * The model is small. It cools with a high-volume blower at 250 cfm.
- * 7.5" by 16.5" by 18.5" and is a mere 9.5lbs
- * Provides plenty of cool time for most general aviation aircraft at taxi, takeoff and landing.
- * In arid climates, there was a measured drop of nearly 18 degrees inside the cabin.
- * Being so small, there is still plenty of cargo space and useful load.

MODEL AP - 200 14V/28V

The model AP 200 utilizes the same ice chilled refrigerated air conditioning system as used in many commercial buildings, only on a micro scale. Stored coolant pumps through a high efficiency heat exchanger. A high-volume blower moves air throughout the cabin. Condensation of moisture from cabin air on the exchanger coils is retained in the unit reservoir. This unit reduces moisture levels since it relies on refrigerated air conditioning instead of evaporative cooling.

- * The model cools with a high-volume blower at 250 cfm for a comfortable dry chilled flow.
- * 7.5" by 16.5" by 18.5" and is a mere 10.2lbs
- * Provides even more cool air time than Model 100 due to its more efficient use of air conditioning
- * A larger reservoir may be purchased to increase cooling time by several hours.
- * Being so small, there is still plenty of cargo space and useful load.

POL-AIR B310 PORTABLE AIR CHILLER SYSTEM

Four years of research by Pol-Air has resulted in the patented proprietary turbine pump for the B310 and is the heart of the new technology. This pump is powered by an ultra-efficient high speed DC brushless motor and can produce up to 3.5 inches of water pressure at 14.3 CFM in the 12vDC units, and 4.5 inches of water pressure at 20.5 CFM in the 24vDC units. This pressure delivers cool dry airflow through 1.25" diameter featherweight EPE hoses

to the front edge of passenger seats or directly under your shirt, making microenvironmental cooling possible for up to four people.

Why you get 70° F (or cooler) dry air with half the humidity of outside air? We draw air through ice alone (no water). When you draw air through ice you lower humidity. When you blow air through water, like a swamp cooler, you increase humidity. This is not a swamp cooler. Water is eliminated from the system.

As humid air passes through ice, water vapor will condense and plate out on the ice and drips out of the system through the drain with the liquid ice melt. Thus the air produced has usually half (or less) of the humidity of the ambient air. Instinctively, you know this, as the driest place on earth is Antarctica. Water vapor there can only exist as ice crystals in the air. Humidity is usually 0.5% to 1.5%!

TANA WIRE MARKERS

Tana Wire Markers are large fiberglass balls which can be attached to power lines to warn aircraft of the location of the wires. They meet FAA specifications, feature easy installation and universal attachment, withstand elements for over 10 years, require no maintenance, do not slip, chafe, oscillate, or cause electrolysis or vibration. Stocked in 9", 12", and 24" sizes. Larger sizes available on request. Color: international orange. Stocked in Tana marker style JX.

WIRE MARKERS

CSP-S STANDARD MOUNTING MARKER - The Standard power line Marker is made of ABS plastic & fits wires up to 1" using two neoprene bushings

CSP-EZS RECESSED MOUNTING AREA & CSP-EZC RECESSED MOUNTING AREA W/ CLAMP - The EZ line of Markers is made of ABS plastic & is new & improved with a larger recessed area around the four bolts making it easier to install with linemen gloves. The EZ-S still uses

two neoprene bushings & fits wires up to 1". The CSP-EZC comes with an aluminum clamp with stainless steel bolts & fits wires up to 1". Both of these styles use 1" nuts.

CSP-SAR STANDARD MARKER WITH ARMOR ROD - This marker is equipped with two sets of armor rod set into a bracket & can be bolted to the inside or outside of the marker. All Markers can be made to fit larger diameter wires.

FOLDING AIRCRAFT STEP STOOL

This sturdy step stool is made of oak veneer over hardwood and provides a spacious 11"x11" square standing area. The stool is 16" high and features non-skid strips on the standing area. The precision crafted stool opens and closes easily and measures only 2"D x 12"W x 19"L when folded for storage in baggage compartment or under the seat of your aircraft. Weighs only 4lbs. Lightweight, compact, and very strong, this stool is idea for use around general aviation aircraft. P/N -13-04281

SUPERLITE FOLDING HAND TRUCK

The Superlite Folding hand truck is great for use in general aviation aircraft, airline travel, office, sports, and more. It's push-of-a-button fold-up frame and aluminum construction allows for easy storage and transportation. The large 19"W x 12"D nose and elastic straps allow for moving heavy and bulky objects. Strong enough to handle 175 lbs. Fits easily in an aircraft baggage compartment or a car trunk. Extended dims: 42"x19"x19". Folds to 29.5"x19"x2". P/N 13-00893

BIRD DETERRENT BIRDXPPELLER PRO VOL.1

The BirdXPeller Pro uses actual species-specific distress cries and can be set for any or all of a variety of birds including pigeons, sparrows, starlings and gulls. Volume, time-off periods, and random calls can be varied to keep the birds away. The unit measures 10" x 3" x 10" and weighs 4 lbs. The directional speakers cover up to an acre in an oval pattern. The unit comes with an AC adapter cord but can run off a 12 volt DC battery if needed. NOTE: Vol.1 is only for pigeons, starlings, sparrows and gulls. P/N 13-00091

REPLICA PROPELLER LETTER OPENER

Own a bit of aviation history with our unique letter opener. A mini replica of the Hamilton Standard steel propeller used on Charles Lindberghs "Spirit of St. Louis". 9" long, it has a chromed hand polished handle, is cast to highest quality metal standards with authentic Hamilton Standard decals on the blade. Shipped in elegant gift box P/N 9925

PEDAL PLANES - SCOOTERS

R V SPORT – PEDAL PLANE KIT

The RV-Sport is a miniature homebuilt airplane which is a great learning experience for parents and children and when completed is a unique pedal powered toy for kids. It was engineered with the builder and the youngster in mind. The simple construction will exercise your skills in basic woodworking, sheet metal, fitting and gluing plastic, finish painting, and detailing. Your completed RV-Sport will be a rugged, realistic toy that is sure to be a hit with every kid on the block. The RV-Sport is built using basic shop tools, and is the ideal "mini-homebuilt" for homebuilders and pilots of all ages! Purchase just the plan set with assembly manual and information updates or the complete kit which includes these items plus hardware, plastic items, & finish decal set.

fitting and gluing plastic, finish painting, and detailing. Your completed RV-Sport will be a rugged, realistic toy that is sure to be a hit with every kid on the block. The RV-Sport is built using basic shop tools, and is the ideal "mini-homebuilt" for homebuilders and pilots of all ages! Complete Plans Set P/N 13-30715

F4U-1 CORSAIR JR. PEDAL PLANE KIT FOR KIDS

The F4U-1 Corsair Jr. is a miniature homebuilt airplane which is a great learning experience for parents and children and when completed is a unique pedal

powered toy for kids. The Corsair Jr. is built using basic shop tools and is sure to be the hit with every kid on the block. The simple construction will exercise your skills in basic woodworking, sheet metal, fitting & gluing plastic, finish painting, & detailing. The F4U-1 Corsair Jr. is available in following kits:

- Plans and Patterns only P/N 13-30730
- Plastic Kit only P/N 13-30735
- Hardware, landing gear, steering, folding with hinges, fasteners
P/N 13-30740
- Complete Construction Kit P/N 13-30745

Note: The plastic Kit Only is highly recommended when you order the plans due to the great amount of detail required to achieve the real F4U look. The plane can be built without the Plastic Kit but it will take longer.

GO-PED LIGHTWEIGHT MOTORIZED SCOOTER

The patented Go-Ped design combines a strong chromoly frame with a lightweight folding handle system to achieve maximum strength along with portability. The sturdy frame has an electrostatic powder coat finish. Go-Ped weighs only 20lbs but can support up to 400lbs. Powered by a precision 2-stroke engine that quietly propels itself at speeds of up to 20 mph, the Go-Ped has the ability to conquer steep hills. Its tires are fabricated of a very resilient natural rubber which will never go flat. The Go-Ped averages well over 100

MPG on pre-mixed unleaded gas. Due to a very low center of gravity, riding the Go-Ped is easier than riding bicycle. To start your Go-Ped just step on and push or pull forward. The Liquidmatic Go-Ped is ideal for the crowd that appreciates or needs a unique ultra-smooth hydraulic automatic transmission. The Liquidmatic is available in Yellow with Purple accents. The Go-Ped folds as quickly and as easily an umbrella for storage and fits in the optional carry bag, which doubles as a cargo carrying backpack. With a space displacement of only 2.5 cubic feet, the Go-Ped can be easily stored in your car, boat, motorhome or airplane. Features:
* Engine Model: GPL290 * Engine Description: Single Cylinder, Two Stroke, Air Cooled * Engine Displacement: 29cc * Engine Power: 2.5 HP * Engine Ignition: Electronic * Engine Cutoff: Handlebar Kill Switch * Carburetion: Walbro * Transmission: Direct Drive * Fuel Gas: & 2 Cycle oil @ 40:1 * Fuel Capacity: 1 Liter * Fuel Economy: 100 mpg * Max Speed 20 mpg * Dimensions: L-34" W-13" H-42", Folded L-34" W-13" H-14" * Handlebar: 6061-T6 aircraft aluminum * Frame Aircraft quality: 4130 Chromyl frame * Fork Patented: cantilevered aircraft quality 4130 Chromyl fork * Dry Weight 20 lbs * Max Load: 400 lbs * Wheel Type: 6" Solid Go-Active™ Rubber replaceable tire * Rims Mach: 12 reinforced high impact polymer * Folding Effortless folding feature for easy storage and carrying * Suggested Useage: City / Cruising

PRO PILOT LANYARD KIT

* Lanyard: The all black heavy duty detachable nylon lanyard is 20 inches in length from the top of the lanyard to the bottom of the J-hook. The detachable portion is short in length (approximately 2 ½ inches)

* Flashlight: The black and silver Garrity Lithium L.E.D. is the brightest, whitest single light available. It features an L.E.D. light. It provides years of intermittent light or more than 23 hours of continuous light. The Diode lasts 100,000 hours. It has an

on-off switch or simply press down on the center of the "on-off switch" for intermittent lighting. 2 lithium button-cell batteries are included. The flashlight attaches to the J-hook.

* Badge clip/ universal grabber: The alligator-type badge clip has a black strap (snaps open and closed) permanently fixed to it that swivels. Connected to the strap is an optional black universal grabber (included) for badges without a slot hole, withstanding up to 5 pounds of vertical force and more than 5 pounds of horizontal force.

* Earplugs: The Howard Leights NRR (Noise Reduction Rate) is 33 decibels. Highest rated disposable ear plugs on the market Tie it to the top portion of the lanyard to always have instant access to the earplugs.

PROPELLER CEILING FANS

This propeller ceiling fan is fitted with a custom made propeller especially crafted to work as a nostalgic and functional unit...they sound great too. The three speed fan with a light, will run in both forward and reverse and comes in gloss white with a white glass globe. The propeller is available in two shapes, the simple standard as well as in a scimitar shape (my favorite), both are dark stained and finished in a gloss urethane. The fan motor unit is a complete package inclusive of the typical four paddle blades. Includes simple instructions on how to mount and balance the custom hand made propeller in place of the four paddle blades.

2009 PRO-FLIGHT LIBRARY CD

ASA provides the aviation community with the most accurate and reliable publications available. The 2009 Pro-Flight Library CD-ROM makes it even easier to access the world of aviation information with just the click of a mouse. This is the most comprehensive electronic aviation reference library available—all on a single CD-ROM—at a huge savings over the purchase of the individual books. The Pro-Flight Library CD lets aviators: * View the full text of all publications * Print text and graphics—from a single phrase to an entire publication * Find all newly-revised passages and view both the old and new text * Simultaneously search multiple publications * Instantly find any combination of words or phrases * Place electronic bookmarks for instant reference * Mark and save personalized notes—just as you would in a paper book
 System Requirements: Windows 2000, NT, XP, Vista (Home Premium 32bit).

GPS TRAINING SOFTWARE FROM ASA

GPS Trainer Version 2 is a tutorial to help pilots master GPS from their desktop. For the renter confronted with one brand of GPS one day and another the next; for the instructor who teaches in multiple aircraft; for the aircraft owner who is trying to master the nuances of a favorite navigational tool; for the consumer wanting to search the options before making the buying decision; for fleet and Part 135 & 121 of operators

who are required to provide GPS instruction to their pilots. GPS Trainer makes time spent in the Aircraft more effective by providing the appropriate tools to learn the GPS receiver on the ground. • The most popular GPS units are included, pilot scan learn the Bendix/King KLN 89B by AlliedSignal, Garmin GNS530, GPSMap 430, 295 or Apollo GX50/60 all on a single CD • Manufacturers' simulators and operating manuals included • FAA GPS reference materials included • Tutorial runs on both PC & Macintosh systems.

MY KIT AIRPLANE SOFTWARE CD

Written for XP and VISTA

This is a complete new program written with Microsoft Visual Studio. A Real Windows Program! Fully tested in XP and VISTA! Does require XP to have SP2 installed.

Consists of several modules for individual functions. These modules include the Main Menu, Project Entry, Primary Project Selection, Construction Information Entry, Expense Entry, Flight Information Entry, Maintenance Information Entry, and Weight & Balance Tool. Also included are forms for entering Advisor and Category Information. The unique Suppliers Information form contains fields for just about any information you wish to keep track of. There is also a very complete FAA page that contains all the FAA information necessary for you to build, certify, and get your FAA Airworthiness Certificate for your Experimental or Light Sport Aircraft. In addition there is a very comprehensive file of information on Light Sport Aircraft and their construction and operation.

THE NAVIGATION CD-ROM

The Navigation CD ROM teaches you VOR Navigation, NDB Navigation, HSI & RMI, GPS Navigation, & Airspace. You'll be prepared for action in the cockpit. Animation, sounds, quizzes and interactivity allow you to visualize navigation concepts while using simulations of actual aircraft equipment.

To make learning easy, each tutorial features an easy-to-use, point-and-click environment. If you can click a mouse, you can use these tutorials. No computer experience necessary. During each tutorial, your prompted where to click, when to proceed and what information to provide during quizzes. If you need more time learning a concept, it is easy as reviewing the section at hand. This CD-ROM features clearly written lessons, logical progression, quizzes, interactive equipment simulation, colorful graphics and animation. Navigation CD-ROM includes: • 5 interactive Multimedia Tutorials • 10 Hours of Narrated Instruction • 37 Instructional sections • 250 Original Graphics & Animations • 12 quizzes
 P/N 13-00892

VOR/NDB SIMULATOR V2.0

Enables you to practice real time VOR & NDB navigation on your computer! You don't have to worry about altitude control, radio communication, airspace, traffic or other major task as you would in real flight. Aircraft are expensive to operate and they make poor classrooms. With VOR/NDB Simulator, you're able to

learn navigation techniques on your computer, in an inexpensive non distracting environment. The screen consists of several components: An airplane flying across the screen, VOR and NDBs, navigation and flight instruments and controls that enable you to specify aircraft direction, airspeed, wind component and other options. Your objective is to set the navigation instruments accordingly, and then turn the aircraft as needed to intercept and track VOR radials and NDB bearings. You can practice position finding, interception and tracking skills such as DME arcs & holding. Best of all you can create custom navigation scenarios by dragging the VORs, NDBs & airplane around the screen wherever you wish. Its all point & click!
 P/N 13-01437

GETTING AROUND ON THE GROUND

Teaches types of airport markings, signage and lighting. Goes beyond simple technical knowledge by outlining hazards, safety tips & procedures that will help keep you aware, knowledgeable & safe on the ground. Features:
 • Full sound narration to make learning easy. Graphics

that show the airport environment from ground view • Skills for preventing runway incursions • Complete descriptions and visuals of airport markings, signs, and lighting • Methods of incorporating knowledge of markings, signs, and lighting in your flight operations • Ground procedures • Safety "Quick Tips" that you can use immediately • Case Studies of real-world runway incursion incidents and accidents • Printable documents from NASA and the FAA. Contains: • 3 hrs of narrated instruction • 15 instructional sections • 125 original 3D graphics & animations • 40 quiz questions • 17 "Quick Tips"
 P/N 13-01438

FLIGHT OF VOYAGER CD (DICK RUTAN)

This is a recount of the horrific, horrendous, heroic & humorous moments of the Voyager project through the eyes of the pilot Dick Rutan. On Dec. 14, 1986 Voyager took off from Edwards AFB in California and 9 days later landed at the Edwards, completing the first ever non-stop, unrefueled world flight. This 3-CD set (3.5 hrs) includes a mini journal map of the flight, historic photos, fun facts, & more.

COMPUTER SOFTWARE

PANEL PLANNER INSTRUMENT PANEL DESIGN SOFTWARE

Panel Planner software gives you the power to design and build instrument panels in record time. Simply drag full-color, photo-realistic instruments, avionics, and cockpit controls into place on an aircraft panel template or photograph. Panel Planner tracks total cost, total weight, and peak current, generates an equipment list, and even prints actual-size hole-cutting templates and color mock-ups. Panel Planner is easy to install and use with its continuous context-sensitive help to guide you every step of the way. The updatable database includes equipment from King, Narco, Sigma-Tek, David Clark, P.S. Engineering, Insight, Garmin, IFR, II Morrow, UMA, Mitchell, Trimble, Arnav, S-Tek, Century, Vision Microsystems, Avidyne, Digify, Skyforce, and many more; PLUS switches, lights, control cables, vents, circuit breakers, trim indicators, etc. Create labels, color-coded annunciators, or placards.

PANEL PLANNER PRO (2.9 VERSION)

Our largest update yet! Over 120 megabytes of updated instruments and panels. Panel Planner Pro is designed for the aircraft owner and the homebuilder. Panel Planner gives you the power to design and build instrument panels in record time. Simply drag full-color, photo-realistic instruments, avionics, and cockpit controls into place on an aircraft panel template or scanned photograph. Panel Planner tracks total cost, total weight, and peak current, generates an equipment list, and even prints actual-size hole-cutting templates and color mock-ups with your desktop printer. JEPPESEN FLITESTAR FLIGHT PLANNING SOFTWARE

The current version of FliteStar calculates the optimum altitude based on total distance, winds aloft and your aircraft's performance. Experiment with different temperatures, power settings & altitudes and see their effects on performance. Comes with many popular aircraft already installed, including light piston, turbo-prop and jet aircraft. Do "what if" simulations, calculate weight & balance with graphic feedback. The only flight planner with the accuracy of a Jeppesen NavData database. You get every navigational chart at your fingertips. Zoom from continent-wide overviews down to half mile details. Roam across charts with a mouse, select way points by pointing and clicking. View victor airways, VORs, NDBs, intersections, airports, and frequencies. Enter winds for each flight leg, or retrieve them over your modem from Jeppesen. Do weight and balance, speeds, performance, and fuel burn with graphic feedback. Exclusive flight engineer module lets you do "what if" aircraft performance analysis. Optional subscriptions database updates from Jeppesen Sanderson. Change your route by "stretching" it to any other waypoints on the chart. Create user waypoints on the fly by just pointing at the area of the chart and holding Atl key. Find distance and radial from any point on chart to another point by simply pointing at each point on chart. Compute airway and MEAs between VORs for any route manually or automatically. Find common airways between any VOR and/or intersection. Enter winds for each flight leg, or retrieve them over your modem from Jeppesen.

COMM 1 VFR/IFR RADIO SIMULATOR

The closest thing to talking on the radio in the cockpit. Comm1 has over 6 linear hours of interactive communication training - but you can practice for days & weeks. Learn where to locate frequencies quickly. By mastering radio management skills with Comm1, you'll always be one step ahead of the next radio call. Comm1's instructionally-sound curriculum takes you through progressively more complex airspace so that you can feel confident in any environment. Being prepared with what to say, when, and in what order, is half the battle when mastering radio communication skills. Practice selecting and saying the correct radio announcements & responses in all types of flight settings. With Audio pilot adapter, pilots can link their computer to an aviation headset to create a virtual cockpit. (9V battery)

MAX TRESCOTT'S G1000 CD-ROM COURSE

There is a revolution sweeping through general aviation. All new aircraft ship with advanced glass cockpits and pilots are faced with the challenge of transitioning to these new systems. The most popular system is the Garmin G1000, and now you can master the system yourself with this new CD-ROM set produced by the author of the popular Max Trescott's G1000 Glass Cockpit Handbook. This course includes: More than six hours on two CD-ROM's, Large, full screen views of displays, Movie screen captures of operating knobs, Printable G1000 front panel displays, Tips from factory and Master CFI's, Narration by two CFI's for easy listening, Keyword searchable slides and transcripts, Optional quizzes to reinforce key points, Files that run on Windows, Macintosh and Linux. PN 13-05534

GARMIN G1000 GLASS COCKPIT BOOK - Learn about all Garmin G1000 features & differences Get the single source of information that educates pilots about all of the features and benefits of flying the Garmin G1000, and how features vary among aircraft manufacturers. Whether you fly a Beechcraft, Cessna, Columbia, Diamond, or Mooney, you'll learn which Garmin G1000 features apply to your particular aircraft. Or, if you're planning to buy a new Very Light Jet (VLJ) like the Cessna Mustang or Diamond D-Jet, this book will help you prepare while you wait for delivery. PN 13-05533

MAX TRESCOTT CD-ROM COURSE

Makes it easy to learn all of the details of flying with WAAS. Designed for the Garmin 430W, 530W, 480, G900X and G1000, the course leads you step-by-step through flying these approaches. Videos demonstrate the flying of actual approaches, and software simulators let you practice loading and flying these approaches. The course is taught by Master CFIs Max Trescott and Susan Parson, who say it covers the "gotchas" that can trick even experienced GPS pilots. PN 13-05067

KITLOG PRO SOFTWARE

KitLog Pro is an organizational tool that allows the builder of any type of aircraft to create, archive, maintain, and display the entire building process. Whether your experimental aircraft is a plans-built EAA bi-plane, a Van's RV, a Glastar, or even a Lancair IV-P, KitLog Pro is the most efficient way to ensure that you meet the requirements of a builder's log for the certification of your homebuilt aircraft.

Features: • Complete Builder's log to satisfy FAA requirements
Detailed Expense Log • Test Flight Log • Maintenance Log • Weight & Balance Calculator PN 13-03705

MULTIMEDIA SOFTWARE FLITESCHOOL

In terms of speed, graphics, clarity, and learning value, FliteSchool from Jeppesen Software is unequaled in its class. Much more than a series of "flash cards" that help you memorize the answers to FAA exams, FliteSchool provides programmed learning modules and Hypertext referencing that leads through a series of associated references to learn more, faster! Flite School's Dynamic Cybernetic Learning enhances your training by analyzing your responses and leading you to new subject areas. You'll find studying with FliteSchool to be more interesting and more effective than other software programs and many video tapes. Material is organized into 20 categories and monitored by topic. The software takes you step-by-step through each subject area and returns to areas where you need more work. When you've mastered enough material to pass the FAA exam, you receive a graduation certificate for your instructor to sign off.

CHARTCASE ELECTRONIC SOFTWARE

When connected to the internet, Chartcase provides access to FlightPrep, the multifunction graphical flight planning engine with approach charts and on-course overlays of TFRUs, SUAUs, and Nexrad weather shown in a single pass high speed web image. Chart Case brings new functionality and complete paperless cockpit data to general aviation pilots at a fraction of the cost of various products that would be needed to match Chart Case. Off-line, Chart Case has complete FAA instrument approach charts in PDF (printable) format for the entire United States. They are accessed using Chartcase's graphical search engine. The charts are updated every 56 days via CD-ROM.

ChartCase W/ Subscription..... P/N 13-04351

AVIATION SOFTWARE

VFLITE WEIGHT & BALANCE VISUAL

With our easy to use system, pilots can learn to quickly calculate the weight and balance of their favorite aircraft and save configurations for later use. The system allows pilots to visualize the loading condition from a unique profile view, arm, and moment charts. The intuitive software uses easy input boxes to select exact weights, and includes weight and balance references and training tutorial. Perfect for all pilots from student to seasoned professional. The unique "My Presets" feature allows you to store weights for passengers, baggage, and favorite fuel levels. Once they're stored, simply drag them from the list and drop them on the seats or fuel slider. Will a spreadsheet do that?

Expandable! Purchase additional aircraft modules for all of the aircraft that you fly! Contact us if you do not see your aircraft. This is it! The easiest to use weight and balance application available. The program comes with a free weight and balance tutorial to help you master the fundamentals. This tutorial makes it easy to use the program. Simply enter the aircraft data using intuitive input buttons or typed text, and the program provides: Total Weight, Moment View, Arm View, and Aircraft Profile View. If the aircraft is out of limits simply click on the fields to change the weights. Unlike other programs, there are no complicated instructions or data points to build. The chart of aircraft arm or moment is graphically displayed.

SEE www.aircraftspruce.com for a list of supported aircraft.

GARMIN G1000 TRAINING: IFR PROCEDURES

The Jeppesen Garmin G1000 - IFR Procedures training is a new and advanced, extensive computer-based training program developed with input from Garmin that teaches the skills required to master the operation and confidently fly the G1000 in IFR conditions. Learn how to pull up and fly instrument procedures, load and activate approaches including RNAV and GPS approaches, new WAAS-enabled approaches such as LNAV, LNAV/VNAV, and LPV approaches, departures and arrivals, as well as performing course reversals, holding patterns, and executing missed approaches. The Jeppesen scenario-based, guided simulation system provides complete and comprehensive training allowing the pilot to become proficient in all advanced functions and tasks required for IFR flight and greatly facilitates the transition to flying the Technically Advance Aircraft and the Garmin glass cockpit. A PRIVATE PILOT'S DIGITAL AVIATION LIBRARY

The 'Private Pilot's Digital Aviation Library' is a CD-ROM with all the FAA publications related to the Private Pilot certificate. Great for Students and Pilots of all experience level. The CD includes the following FAA publications: • Pilot's Handbook of Aeronautical Knowledge, • Airplane Flying Handbook, • Aviation Weather & Weather Services, • Private Pilot Knowledge Test Guide, • Private Practical Test Standards, • Private Question Test Bank, • Rotorcraft Flying Handbook, • Plus Float, Skiplane supplements. P/N 13-05018.....

WEATHER STATEMENT GROUND SCHOOL

Weather Statement Groundschool is a CD-ROM-based course on METAR's and TAF's. Nearly 2 hours of stunning, interactive training is provided. This tutorial on METAR's and TAF's is unlike any other such training. It not only teaches the most basic aspects of METAR's and TAF's, but also provides training on components that most pilots are unaware of. Still, learning is made easy and fun, through full voice narration and easy-to-use controls. **Where this tutorial truly shines** Weather Statement Groundschool promotes learning through human interaction—not just rote memorization. A remarkable feature is the interactive weather controls, which enable the user to "control the weather." For example, the user can specify wind speed, gust factor, direction, and other variables, and can then view how the weather statement displays this information. Since weather codes are confusing to interpret, the user can click the "Speak-It" button to hear a verbal translation. This allows the user to correlate codes with a true, visual picture and understanding of the weather. This tutorial CD is perfect for all pilots, from students to rated pilots who wish to remain sharp and proficient. It's also ideal for airport personnel, dispatchers, and anyone else who needs to view aviation weather information. Specifications: Windows Vista, Windows XP, Windows 98, or Windows 95 32MB recommended CD-ROM drive 10MB hard drive space Video supporting 256-color mode (minimum) Sound card (not required, but recommended) P/N 13-05575.....

WINN BALANCE

This software was originally designed for the Ultralight / Experimental aircraft builder/designer to assist in weight and balance calculations, it also works well on conventional aircraft. It is Great everyday flight planning as well. It will run on Win95/98/Me/2000/XP. The program interface is designed so that the CG and weight of your aircraft is automatically calculated with a minimum of effort.

MAIN SCREEN - This main screen contains all calculation input and dynamically displays real-time results. Hint screens are also of valuable assistance on this screen.

HELP SCREEN - Help is never far away, This help screen gives you all the information you will need to perform an initial weight and balance. It describes the entire process of how to weigh your qaircraft and some of the formulas to help you along the way.

SECONDARY INFORMATION SCREEN - This screen stores all your aircraft's installed equipment which forms a portion of your empty weight. This information is retained until you remove each item. It serves as a reminder as to what exactly was installed in the aircraft at the time of weighing. P/N 13-05599.....

JEPPESEN AVIONICS KNOWLEDGE LIBRARY

Master you GPS unit with Jeppesen's interactive e-learning for Garmin® GPS systems and Lowrance® Handheld GPS Systems. Jeppesen's advanced, self-paced digital learning programs provide training on all operational aspects of you GPS unit. It's the easy, proven way to get confident with all that you GPS has to offer. Key Features include: • Scenario-based, guided simulation • Realistic Emulator • Detailed, narrated demonstrations. • O-screen help and feedback systems. Discover the best way to use the full power of your avionics system compared to heads-down, in cock-pit training

ASA INSPECTION AUTHORIZATION PREPWARE

This software incorporates the material from the Inspection Authorization Test Prep by Dale Crane, and also includes a PDF of the Inspection Authorization Computer Testing Supplement (CT-8080-8D). All Inspection Authorization candidates must take and pass the FAA's IA Knowledge Exam. This IA Prepware provides all the information needed to pass the IA Knowledge test, and helps candidates become familiar with the privileges and limitations of this highest level of maintenance certification. Includes an overview of the Inspection Authorization certificate, insights into the function of an IA (the inspections, authorizations, and paperwork that accompany the privileges), and excerpts of the FAA documents IAs rely on in their work. Inspection Authorization Prepware has the same great features found in all Prepware titles. Numerous study, preparation, practice and evaluation tools are available to help applicants obtain a confident edge before taking the FAA Knowledge Exam. Prepware brings the accuracy and reliability of ASA's industry-leading Test Prep books to your PC or Macintosh computer.

The software includes more than 400 example FAA questions and answer choices, supported with comprehensive explanations. The same reference material applicants will have access to during the actual test is included as a PDF (the "CT-8080-8D"). This way applicants can become familiar with these documents and learn how to glean the information they need to answer the questions, from such FAA publications as the Airworthiness Directives, Advisory Circulars, Type Certificate Data Sheets, FAA Order 8130.21D, and FAA Form 8130-3. System Requirements: Internet connection is required for product registration and updates.

IBM compatible PC with Pentium-class processor, Windows 2000, XP with Service Pack 2, or Vista. 128 MB RAM minimum for Windows 2000 and XP (512 MB for Vista). 150 MB available hard drive space, 1024 x 768 SVGA compatible display, CD-ROM drive, mouse or other compatible pointing device.

Macintosh computer with PowerPC G3, G4, G5, or Intel-Mac processor, OS X Tiger (10.4 or higher), 128 MB Ram minimum, 150 MB available hard drive space, 1024 x 768 SVGA compatible display, CD-ROM drive, mouse or other compatible pointing device.

For both Windows and Macintosh, Adobe Acrobat Reader is required.

ASA IFR SIMULATORS

IP TRAINER VERSION 7.0 IFR Procedures Course

IP Trainer is the only IFR simulator with a foundation of artificial intelligence in the form of a virtual instrument flight instructor (CFII), the only interactive courseware designed exclusively for instrument students, and the only program that can compare its knowledge of the Instrument Practical Test Standards

against a student's real-time flight simulation performance. Most importantly, while you're using IP Trainer to build a solid foundation of instrument skills, you'll also be saving money. IP Trainer users consistently attain their Instrument Rating with less dual time and with less expense than students who rely on traditional methods alone, saving an average of \$1,000 in their total training costs for the rating. With a built-in CFII, spoken ATC guidance, the comprehensive Instrument Flying textbook by Trevor Thom, and a full complement of IFR lessons, IP Trainer is the single best way to bring instrument training home.

- Demo On top/IP Trainer, prepware, GPS Trainer, Flight Library & CX-2

ON TOP™ IFR PROFICIENCY SIMULATOR

Inside On Top you'll find five of the most popular aircraft ever built. There's a Cessna C172, C182 and C182RG, and Piper's Warrior and Arrow. Also included are the Lancair Columbia 300, the Mooney MSE, and Beechcraft's Bonanza V-35, Beechcraft Baron 58, and Beech's 1900D twin-turboprop. Each model utilizes precise flight dynamics algorithms, right down to the deadly asymmetrical thrust you'll experience should you lose an engine in the Baron. Now, you can test your skills

against the reality of single-engine IMC in a light twin, or a twin-engine turboprop. This and other aircraft setup parameters are available for all aircraft. Each aircraft panel is rendered with a next-generation graphics technology that makes every gauge, pointer, tick-mark and knob on your panel as true-to-life as a computer can create. Couple the "Photo-realistic" graphics effect with On Top's precise mimicry of real aircraft instrumentation and you're as immersed in your simulated flights as you are in your actual flights. There's realistic sound effects, like radio idents, marker beacons, gear and flap extension, and tire sounds. You'll find panoramic out-the-window views, accurate runway lighting and haze layering. You'll even see the rivets across your wings as you look right or left on a circling approach, all with enough realism to make you sweat. Full instrumentation, like programmable GPS, HSI, RMI, Moving Map and auto pilot is just half of it. In On Top, you decide what instruments you fly with, and you decide where they'll go. Some IFR sim makers decide years before you ever get your copy what kind of equipment you'll fly with and where it will go in your panel, but in On Top you can change it every time. On Top's Real-World Weather is as variable as tomorrow's weather. Define winds aloft and then surface winds, then dial in degree of swing and speed of gusts. Create turbulence, cloud bases and visibility with as much variability as you can handle, so you'll never know if you'll have to fly the missed approach until you get to the bottom of the funnel. And best of all, make your virtual conditions stable, deteriorating, improving or randomly changing, over any given time frame. In the real world, getting your procedures down pat with a methodical and practiced scan is just the beginning, and there's always more to learn.

THE COMPLETE G1000 COURSE FROM ASA

The Complete G1000 Course will help you transition from steam-gauge "round dials" to the Technically Advanced Aircraft (TAA) glass cockpit environment. This interactive software allows you to practice becoming proficient in operating the G1000 from the safety and privacy of your home or office computer.

The intuitive software interface makes this as easy to use as reading a book. Computer learning tools in the form of cockpit representations and demonstrations of the tasks combine with a Part 141 and and FITS-compliant G1000 course, which is given by Skyline Aeronautics and in forums around the country. In this way the software teaches you how to safely and efficiently use the G1000 without running up the Hobbs!

MICROSOFT FLIGHT SIMULATOR AS A TRAINING AID

Microsoft® Flight Simulator has inspired many thousands of young "gamers" to pursue flight training in real life and has provided certificated pilots with countless hours of entertainment.

And even though there is an awareness that PC-based simulations—and Microsoft Flight Simulator in particular—are helpful as aids in flight training and pilot proficiency, for many it is still unclear how best to benefit from the experience of virtual flying. P/N 13-04937.....

MICROSOFT FLIGHT SIMULATOR X DELUXE EDITION

"Flight Simulator X" is the culmination of nearly 25 years of the landmark "Flight Simulator" franchise and the most significant addition to date. The 10th addition to the highly successful "Flight Simulator" franchise, this newest addition will immerse players in a beautifully rich and realistic world, offering a completely new and innovative gaming experience with dozens of new aircrafts to choose from, including the AirCreations Kiss Ultralight and Maule M7-260C Orion with wheels and skis. Gamers of all ages, types and skills levels will experience firsthand what it's like to be an aviator traveling the globe either alone or online with others. FEATURES: Immersive World., Mission-based Gameplay, New Aircraft, Connected World, Interactive Airports. DVD-ROM for the Microsoft® Windows® 98, Windows 2000, Windows Millennium Edition (Windows Me), Windows XP and Windows Vista™ operating systems P/N 13-04958.....

VTS MULTIMEDIA TRAINING SOFTWARE

VTS training tools are priced affordably to allow each student to own a personal copy of the software. Each aircrafts systems are covered in detail far surpassing the general information provided in Pilots Information Manual. For example, the electrical schematic is presented on-screen just as it appears in the information manual. But instead of just sitting there looking mysterious and intimidating, this virtual schematic comes to life with a click of the mouse. Controls and indicators from the cockpit are also available on-screen, creating an animated simulation of the entire system.

JEPPESEN AIRWAY ACCESSORIES

JOG-15/JOG-30 CHART ORGANIZER

Transparent Pockets are ideal for holding trip charts, flight plans, aircraft checklists, etc. Index tabs & spiral binding make it easy to access the chart you want.
15 pocket..... P/N 13-62116-5.....
30 pocket..... P/N 13-62116-6.....

CHART POCKET

Transparent durable vinyl pocket holds two enroute charts. 7-hole punched for binder.
P/N 8063

APPROACH CHART PROTECTOR

Protection plus. Transparent plastic envelopes protect your most frequently used approach charts, while accepting marks from almost any writing instrument. Easy Erase. Set of 10.
P/N 13-21748

MULTI PURPOSE PRINTER PAPER FOR JEPPESEN BINDERS

Perforated, 7 hole (center & edge) • 500 Letter size sheets • Print up to 1,000 Jeppesen size sheets (5.5"x 8.5") • Create print from your software • Checklist/Procedures • Schedule/itinerary • Phone/address • Pilot Notes • Flight time/ Expense Log • Approach Charts P/N 13-33003

JEPPE VIEW PRINTER PAPER FOR JEPPESEN BINDERS

Perforated, 7 hole (edge only) • 500 Letter Size sheets • Prints 1,000 Jeppesen size sheets (5.5"x8.5") • Create & print from your software – area charts & approach charts P/N 13-33002

JEPPESEN BINDERS

Functional, durable, protects & lasts. Jeppesen's leather binders are made from top-grain cowhide and include steel hinges and safety locks to secure the rings. The sturdy Duraflo binder has the look and the feel of our leather binders. The flo-mold process laminates and binds sturdy, ethylene acetate with a clear tough surlyn outer surface. Available in brown and black.

CHARTTABS

Quick reference tabs labeled, "Departure, Destination and Alternate" help you find your place fast. Plastic color coded.
Set of 3..... P/N 13-21752.....

CHART WALLET

Keeps up to 10 enroute charts at your finger tips. Space saving accordion-fold. Made of durable blue vinyl.
P/N 13-21746.....

MULTI-TABS

Make your binder work like you do. Write your own labels to separate your contents. Erasable, reusable. Lines for notes. Set/13.
P/N 8455.....

BINDER IDENTIFIERS

Pick up the right binder the first time. Easy to read self-adhesive labels for top and spine of 2" binders.
United States, 2 sets
P/N 13-63000-2.....

INDEX TABS

Simplify Location of desired charts and index sections in your airway manual or trip kit.
Set of Alphabetical Tabs..... P/N 13-62541-5

Set of Sectional Tabs..... P/N 13-62513-5

AIRWAY MANUAL ACCESSORY PACK

Each pkg Contains: • Charttabs (set of 3) • Approach chart protectors (set of 10) • NavLog/Flight Plan Forms (set of 50) • Multi-tabs (set of 13) • Pilot Notes (set of 25 lined)
P/N 13-62604-6.....

VFR/NAVIGATION LOG PAD

Record all of your flight information in a single convenient log. 50 sheets. Size: 11"x 8.5"
P/N 8846

NAVIGATION LOG / VFR FLIGHT PLAN FORM

Perfect Flight Planning partner. Features a weather log. Two sided fits into Jeppesen binders for easy in flight reference. Package of 100. Size: 5.5" x 8.5"
P/N 13-21754

IFR NAVIGATION LOG

Conforms to ICAO standards and recommendations. Standard Jeppesen format. Fits neatly into the Airway Manual Binder.
P/N 13-33005

REFERENCE MAPS – AIR MAPS

MEXICO VFR WAC CHARTS

Published by INEGI - Mexico's National Institute of Statistics, Information & Geography. These World Aeronautical Charts (WAC) were released in 2008 and contain topographical, airport and navaid information. Mexico is divided into 12 regions and 2 regions are printed on each chart for a total of 6 individual charts. Updated every 4 years. SCALE 1:1,000,000. Note that aircraft landing in Mexico that departed from Central America, South America or the Caribbean are subject to special AOE requirements and can only use the Cozumel and Tapachula airports as AOE's. Detailed airport information and fuel availability can be found in the Pilot's Guide.

AVIATOR'S QUICK REFERENCE MAPS

Flight Case Map - US 5th Edition

This is the map that actually started it all and launched our business in 1988. The Aviators' Quick Reference Map has become standard equipment in the flight bags of thousands of professional pilots all over the world and is standard issue to the pilots of several major airlines.

Colorful and accurate, these maps clearly depict state boundaries, time zones, major cities and towns, rivers, lakes, mountain ranges, national parks and points of interest. Also listed are major airports and VOR's (with frequencies for easy identification). Hundreds of interesting state by state facts and figures are listed on the back side. Two finishes: laminated or tearproof. The laminated version has a write-on/wipe-off surface. Either is durable enough to with stand years of use. A great aid for making more interesting PA's. When folded, laminated map measures 10.5" x 16" and tearproof is 8" x 10.75". Both fit perfectly in a flight case. Scale 1"= 90 miles.

Flight Case Map Laminated U.S. P/N 13-05677
 Flight Case Map Tearproof U.S. P/N 13-05678
 Flight Case Map Canada/Alaska P/N 13-05687

U.S. QUICK REFERENCE WALL MAP

Due to popular demand, we have come up with an extra large version of our popular Aviators' Quick Reference Map and made it wall-size. Perfect for use at home, office, hangar, briefing room, etc.

This map depicts state boundaries, time zones, major cities and towns, rivers, lakes, mountain ranges, national parks and other points of interest. Also listed are major airports and VOR's (with frequencies for easy identification).

It is ideal for flight planning or "pinning" your favorite destinations. Measures 33" x 23" or 52" x 36" and is laminated so that you can write on it and just wipe it off. Makes for an attractive wall mount anywhere! Shipped to you rolled with no creases. Scale: 1"= 55 miles.
 Wall Map U.S. Expanded P/N 13-05688
 Wall Map U.S. Map Standard P/N 13-05689

SKYCLOPEDIA OF THE US

As a passenger, did you ever hear another pilot make an exceptionally interesting PA and wonder where he or she picked up such interesting trivia? Well here's their secret.....the Skylopedia of the USA.

A perfect companion to our Aviator's Quick Reference Maps is the Skylopedia, written by veteran airline pilot Milt

Jines. Jines used his many years of line flying and personal traveling experience to put together a comprehensive collection of sights commonly seen from the air into one convenient spiral-bound book.

Contains literally thousands of listings of geological, historical and statistical points of interest in a state-by-state format.

Now it's your turn to make better PA's and entertain your passengers with this interesting information! Contains 359 information-packed pages. Measures 8 1/2" x 11" x 3/4"..... PN 13-05692

AVIATOR'S QUICK REFERENCE DESK MAP - US 5TH EDITION

The same map as the US Flight Case Map, without the folds and a 1 inch border added with latitudes and longitudes. Heavy map paper and laminate. Full map size: 33 1/2" x 23"

PN 13-05690

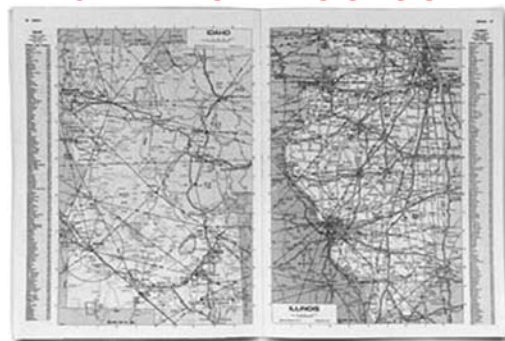

AVIATOR'S QUICK REFERENCE FLIGHT CASE MAP - EUROPE

Designed exactly with the same detail and colors as our U.S. Map, this Aviator's Quick Reference Map of Europe clearly depicts national boundaries, time zones, major cities and towns, rivers, lakes, mountain ranges, national parks as well as other points of interest. Listed are major airports as well as VOR's with names, frequencies and identifier codes. The tear-proof flight case-size maps measure 32.5" x 25" when unfolded and only 8" x 11" when folded. For mounting on a wall, we have a wall-sized laminated version that has a write-on/wipe-off surface and measures 35" x 27.5". Scale: 1" = 80 miles.

PN 13-05679

CAPTAIN'S ATLAS OF U.S.

Intended for the airline or business jet passenger, this flight reference map is designed primarily for trip planning and referencing landmarks of the USA while in flight.

Two versions of the map are offered: folded and a wall map. They are both packed with useful information on cities, parks, highways, and other points of interest from California to Maine.

The folded flight map is printed on durable tear-proof paper and fits perfectly in a seat pocket or briefcase, making it a great gift for the "Frequent Flyer"! The wall map is shipped to you rolled, has no folds and has a write-on/wipe-off surface. Flight Map measures

8 1/2" x 11" when folded and the Wall Map is 34" wide x 23" high.

PN 13-05691

MAPS – CHARTS

WEATHERCYCLER WEATHER KIT

This slide chart gives pilots easy-to-understand explanations of weather systems including highs, lows, cold fronts, & warm fronts. The chart shows various weather symbols and provides a guide to become very familiar with aviation weather maps. Laminated for long life. Includes instruction booklet & study guide. Size: 8.5" x 11".
P/N 13-29949.....

FULL-COLOR CLOUD CHART

"Clouds: A Guide to the Sky" shows full-color photos of 30 different cloud formations, (with descriptions) and the weather associated with each. 25" x 37" on heavy stock.
P/N 3591.....

ICE ADVICE™

ICE ADVICE™ provides the pilot a handy reference for avoiding, detecting and escaping icing conditions...one of the top concerns of general aviation instruments pilots. This chart, when employed with the icing risk chart on the front side, can help the pilot decide an altitude change that will lower the icing risk. ICE ADVICE™ is laminated in a durable 10 mil, satin matte finish, and is 8.0" x 5.5"
P/N 13-04220.....

SCENIC FLIGHT MAPS

The Scenic Flight Maps give you many different routes for sightseeing to the major landmarks, famous places in Los Angeles and Orange County or San Diego area. The multiple color graphs and route pointers are really easy to read and follow. The map is laminated to keep from daily tears and protects from liquid spill. On the back side, it shows

three columns: Route, Need to Know and Sightseeing sections, to better guide you in your travel without confusion or time lost.

CANADA FLIGHT SUPPLEMENT IFR CHART

The Canada Flight Supplement is a joint civil/military publication. It contains information on Canadian and North Atlantic aerodromes and is used as a reference for the planning and safe conduct of air operations. Features: •General: Tables, legends and associated information pertinent to interpretation of the supplement. •Aerodrome Directory: Data and sketches for Canadian aerodromes and heliports and selected aerodromes in the North Atlantic. •Planning: Information for flight planning, characteristics of airspace, chart updating,

flight restrictions, IFR routes, airway intersections and chart distributors. •Radio Navigation and Communications: Data for radio navigation aids and communication facilities. •Military: Flight procedures and data, including sections on procedures for flight in the USA, North Atlantic and Alaska, air/ground communications and military training routes/areas. •Emergency: Emergency procedures. •The Canada Flight Supplement, measuring 5 1/4 by 8 1/4 inches, is available in English or a bilingual format. Data for the province of Quebec and the National Capital Region are presented in French in the bilingual edition.
P/N 13-04424.....

AIR CHARTS: IFR ENROUTE CHARTS IN A BOUND VOLUME

IFR charts for the 48 contiguous states presented in one 11"x 11" spiral-bound volume. Charts are easier to locate when you need them, and easier to read in their large presentation. Meets FAA/IFR requirements. Included all 13 NOS are charts shown in full size, every frequency servicing every IFR airport, all VORs plotted in position on flight plan chart, Military training routes, planning charts showing major airways, airports, and topographical features for visual or checking. Includes a coupon to receive 1yr of 56-day updates from the publisher at no extra cost.
48 States..... P/N 8339.....

VFR SECTIONAL ATLAS

Full-scale, Full-color reproductions of FAA/NACO Sectional Charts. No more hassle of finding charts or worrying about FAA ramp checks. Atlas format with convenient page numbering system eliminates the aggravation of folding and unfolding charts in the cockpit. With Air Chart's exclusive update service, you'll always have current, updated VFR Charts. (see E-Z Updater on reverse) Aeronautical data on Sectional Charts includes all NAV/Comm frequencies, controlled airspace, airport identifiers and restricted areas. Only \$99 per year including update service! Eastern U.S. Atlas covers area east of the 97th meridian. Coverage extends westward to include area around Dallas, TX. Eastern VFR atlas.

EASTERN..... P/N 13-02478.....
WESTERN..... P/N 13-03170.....
EAST/WEST..... P/N 13-04382.....

AVIATION TOPOGRAPHIC ATLAS

Aviations first full-color chart atlas contains WAC scale charts for the 48 contiguous US states. In addition, all 30 class B Airspace and 130 Class C Airspace are reproduced from Sectional Scale charts. With Air Chart's exclusive NOTAM update service, you'll have current and legal VFR charts for the whole country. Easy to use key chart and page numbering makes navigation within the Atlas simple. You'd have to spend over \$400 to get all the charts contained in the

Aviation Topographic Atlas. Comes with coupon for 1-yr of 56 day updates from the publisher at no extra cost. P/N 13-01144.....

V SPEEDERS PILOT CARDS

Set of 5. Provide a quick reference for aircraft data such as useful load, fuel capacity, and all V speeds. These are durable write-on cards. (2"x3.5") which are excellent for instructors and students. Prepare a card for each aircraft you fly and keep them in your pocket.
P/N 13-00463.....

IFR FLIGHT FILE

This handy chart planner and organizer holds NOS or Jeppesen approach plates, SIDs and STARs, and airport diagrams. Features easy to load static-hold chart protectors, and fits yoke clips & keyboards. Contains a wealth of important reference information relating to IFR departure, enroute, approach, and alternates.
P/N 13-55016.....

P/N 13-00773.....

VISUAL NAVIGATION CHARTS

FAA SECTIONAL CHARTS

Sectional aeronautical charts are designed for visual navigation of slow to medium speed aircraft. The topographic information featured consists of the relief and a judicious selection of visual checkpoints used for flight under visual flight rules. The checkpoints include populated places, drainage patterns, roads, railroads, and other distinctive landmarks. The aeronautical info on Sectional Charts includes visual and radio aids to navigation, airports, controlled airspace, restricted areas, obstructions, & related data. (Scale 1"=6.86 nm/ 1:500,000. 60"x20" folded to 5"x10") Revised semi-annually, except most Alaskan charts are revised annually.

Sectional Charts P/N 8403
Set of 37 charts (w/o AK & HI) P/N 8557

NOTE: When ordering charts, complete part no. with first 3 letters of chart title. Ex.: Seattle sectional is P/N 8403SEA.

For Subscription service: Add -SUB (example: 8403SEA-SUB) and a new chart will be shipped & billed to you automatically at every revision until you cancel the subscription. Subscription chart orders require credit card no. on file.

Sectional & VFR Terminal Charts for conterminous United States, Hawaii, Puerto Rico and Virgin Islands

CHART MASTER

Chart Master is Aircraft Spruce's online chart selection program designed to tell you exactly which aviation charts you will need for the route you intend to fly. Just plug in the 3 letter airport identifiers for your departure and destination airports, and Chart Master will provide you with a list of all of the charts needed for your route. Select VFR (sectional, terminal, WAC, AFD, or IFR (Low altitude enroute) or both and order any or all of the charts listed by Chart Master. This program is available on line at www.aircraftspruce.com.

FAA VFR TERMINAL AREA CHARTS

Terminal Area Charts depict the airspace designated as Class B Airspace. The information found on these charts, while similar to that found on Sectional Charts, is shown in much more detail because of the larger scale. These charts should be used by pilots intending to operate from airfield within or near a Terminal Control Area or an Airport Radar Service Area. Locations of Terminal Area Charts are indicated by a • on the Sectional Chart indexes. (Scale 1 inch = 3.43nm/1:250,000. 25 x 20 inches folded to 5 x 10 inches.) Revised semi-annually, except Puerto Rico/Virgin Islands is revised annually.

Terminal Area Charts P/N 8064
Set of 28 Terminal Charts P/N 8524

NOTE: When ordering charts, complete part number with first 3 letters of chart title. Ex: Los Angeles terminal chart is P/N 8064LOS.

For SUBSCRIPTION service: Add -SUB (example: 8064LOS-SUB) and a new chart will be shipped and billed to you automatically at every revision until you cancel the subscription. Subscription chart orders require credit card number on file.

AIRPORT / FACILITY DIRECTORY

The Airport/Facility directory is a pilot's manual which contains data on public and joint use airports, seaplane bases, heliports, VFR airport sketches, NAVAIDS, communications data, weather data sources, airspace, special notices, VFR waypoints and operational procedures. The seven volumes cover the conterminous United States, Puerto Rico, and the Virgin Islands. Includes data that cannot be readily depicted in graphic form; e.g., airport hours of operation, types of fuel available, runway data, lighting codes, etc.

| Northeast U.S. | AFD-NE |

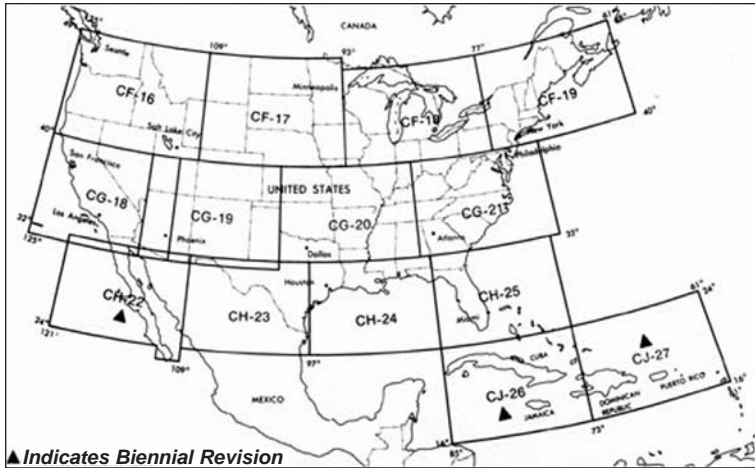

PS

LARGE-FORMAT CHART WALLET

This chart wallet helps pilots organize, hold, carry, and display 22 standard NOS charts conveniently. The black padded cover features the silver wings logo. There are ten double-sided, clear vinyl organizer pockets riveted to the cover. Along with the pockets in the front and back covers, these pages hold the charts so you can easily find them in a busy or turbulent cockpit environment. Measures 6.5"x 11.5" w/ 2.5" spine.

Large Book-Style Chart Wallet P/N 13-00412

VISUAL NAVIGATION CHARTS

WORLD AERONAUTICAL CHARTS

World Aeronautical Charts by NOS are designed to provide standard for the land areas of the world in a size and scale convenient for navigation by moderate-speed aircraft. Topographic information includes cities and towns, principle roads, railroads, distinctive landmarks, drainage, and relief. Aeronautical information includes visual and radio aids to navigation, airports, airways, restricted areas, obstructions, and other data considered pertinent. Scale 1:1,000,000 or 1" to 13.7 nautical miles, less detailed than Sectional & Terminal Area Charts, but useful for longer distance planning. Revised annually. 12 charts cover the US

WAC Charts P/N 8567 ea
Set of 12 U.S. WAC charts..... P/N 8805

CHART MASTER

Chart Master is Aircraft Spruce's new online chart selection program designed to tell you exactly which aviation charts you will need for the route you intend to fly. Just plug in the 3 letter airport identifiers for your departure and destination airports, and Chart Master will provide you with a list of all of the charts needed for your route. Select VFR (sectional, terminal, WAC, AFD, or IFR (Low altitude enroute) or both and order any or all of the charts listed by Chart Master. This program is available online at www.aircraftspruce.com.

TERMINAL PROCEDURES COVERAGE OF THE CONTERMINOUS U.S.

Includes: • Instrument Approach Procedure (IAP) Charts • Departure Procedure (DP) Charts • Standard Terminal Arrival (STAR) Charts • Charted Visual Flight Procedures (CVFP) • Airport Diagrams
IAP Charts are designed to provide an IFR descent from the enroute environment to a point where a safe landing can be made. DP charts are Air Traffic Control (ATC)-coded departure procedures which have been established at certain airports to simplify clearance delivery procedures. STAR charts are ATC-coded IFR arrival routes established for certain airports to simplify clearance delivery procedures. CVFPs are an operational technique designed to move air traffic safely and expeditiously. In addition to conventional visual approach procedures, it has been necessary to specify routes/altitudes to enhance noise abatement at some locations. CVFPs have been developed to provide a pictorial display of these visual arrival routes. Airport Diagrams are specifically designed to assist in the movement of ground traffic at locations with complex runway/taxiway configurations and provide information for updating geodetic position navigational systems aboard aircraft.

CALIFORNIA AERONAUTICAL CHART

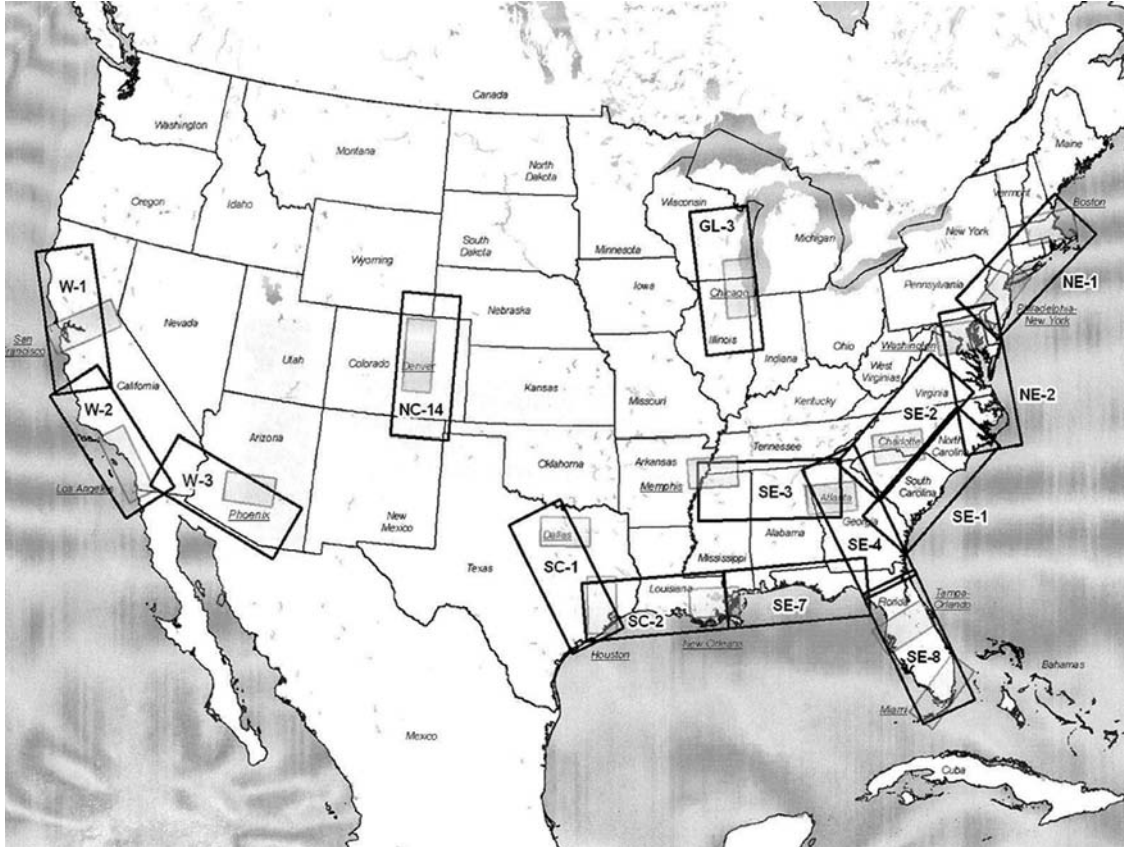

If you are planning a flight within the state of California, check out the 2002-2003 California Aeronautical Chart, which covers the entire state on one page and also include 5 sectional charts (Klamath Falls, San Francisco, Los Angeles, Phoenix and Las Vegas) The chart is designed for planning purposes, not for navigation.

P/N 13-30800.....

JEPPESEN VFR+GPS CHARTS

Jeppesen's new VFR+GPS Charts offer a fresh perspective on what a VFR chart should be with better use of color and contrast, coverage areas based on the way you fly, intuitive symbols for easier interpretation, and Space Shuttle radar data to more accurately depict terrain. Jeppesen VFR+GPS Charts are easier to use in the cockpit or at the kitchen table, they're designed to help you get more from your GPS, and they come from one of the most trusted names in aviation.

A VFR chart is only as good as your trust in the information provided and your ability to quickly interpret and act upon it. For students learning to fly, Jeppesen VFR+GPS Charts are easier to use and read, thanks to a more simplified layout. For instructors, they are easier to use as a teaching aid. And for all aviators, Jeppesen VFR+GPS Charts makes your VFR chart a more effective tool for flight planning, and you a more effective pilot, through enhancements like: Clear Airspace Boundaries—Easier recognition of controlled airspace with color-coding and clear labels to show airspace class and altitude segments. Streamlined Airport Symbolology—Jeppesen has updated familiar VFR chart symbolology, making it easier to understand. This is especially important when approaching a busy unfamiliar airspace. GPS Waypoints—Jeppesen has updated familiar VFR chart symbolology, making it easier to understand. This is especially important when approaching a busy unfamiliar airspace. JeppGuide® Airport Diagrams – With airport diagrams on the back, your VFR chart can be a useful guide from engine start-up to shut-down.

INSTRUMENT NAVIGATION CHARTS

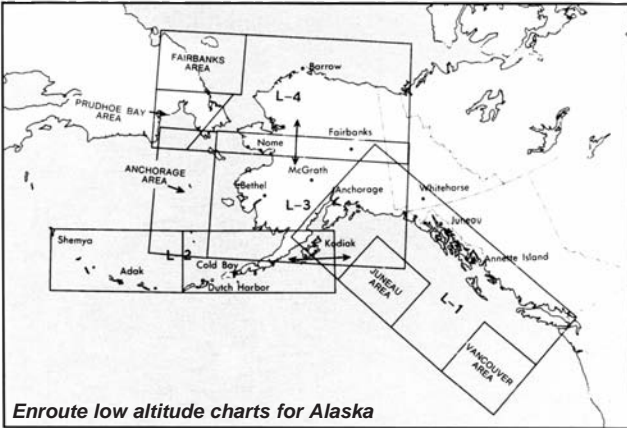

ENROUTE LOW ALTITUDE CHARTS

Enroute low altitude charts for conterminous U.S. (includes area charts)

Enroute Low Altitude charts (Conterminous U.S. and Alaska) provide aeronautical information for navigation under instrument flight rules below 18,000 feet MSL. Information includes: airways; limits of controlled airspace; position, identification, and frequencies of radio aids to navigation (Alaska 4-color series includes geographic coordinates); airports with terminal air/ground communications; minimum enroute and obstruction clearance altitudes; airway distances; reporting points; special use airspace areas; military training routes. Scales vary from 1 inch = 5nm to 1 inch = 20nm. 50 x 20 inches folded to 5 x 10 inches. Revised every 8 weeks. Area charts, which show congested terminal areas at a large scale, are included with subscriptions to any conterminous U.S. Set Low (Full set, East or West sets). Chart L-28 covers the Washington-Boston corridor at a scale similar to an Area Chart. Charts are revised every 8 weeks.

- Enroute Low Altitude Charts..... P/N 8070L..... *Jea.*
 Full Set (L1/2-L27/28 & Area Chart)
 Western U.S. Set (L1/2-L15/16 & Area Chart) P/N 13-30714
 Eastern U.S. Set (L11/12, L13/14, L17/18-L27/28 & Area Chart) P/N 13-30716
 Alaskan Set (Alaskan L1/2-Alaskan L3/4)..... P/N 13-30717
 Alaskan Set (Alaskan L1/2-Alaskan L3/4)..... P/N 13-30718
For individual charts please call 877-4-SPRUCE or visit our website at: www.aircraftspruce.com

Enroute low altitude charts for Alaska

IFR GULF OF MEXICO VERTICAL FLIGHT REFERENCE CHART (HELICOPTERS)

THIS Chart features: IFR GPS waypoint grid system for direct routing to and from offshore platforms; Oil lease block information; NAVAID data, Airport data; Chart scale of 1:500,000; Two-sided printing; Available folded (5" x 9") or flat (45" x 36").

Area of coverage: From latitude 26° 20' north to the U.S. Gulf Coast. From approximately longitude 87° 30' west to the Texas Coast.
 P/N 13-30721.....

NOTE: When ordering individual charts, complete part number with the chart number. Example: Enroute Low Altitude Chart L-10 is P/N 8070L-10. For SUBSCRIPTION service, add -SUB (example: 8070L-10-SUB) and a new chart will be shipped and billed to you automatically at every revision until you cancel the subscription. Subscription chart orders require a credit card number on file.

CHART MASTER

Chart Master is Aircraft Spruce's online chart selection program designed to tell you exactly which aviation charts you will need for the route you intend to fly. Just plug in the 3 letter airport identifiers for your departure and destination airports, and Chart Master will provide you with a list of all of the charts needed for your route. Select VFR (sectional, terminal, WAC, AFD, or IFR (Low altitude enroute) or both and order any or all of the charts listed by Chart Master. This program is available on line at www.aircraftspruce.com.

IFR ENROUTE HIGH ALTITUDE CHARTS

IFR Enroute High Altitude Charts (Conterminous U.S. and Alaska) are designed for navigation at or above 18,000 feet MSL. This four color chart series includes: Jet route structure; VHF radio aid to navigation (frequency, ID, channel, geographic coordinates); selected airports; reporting points. (Scales vary from 1" = 78nm to 1" = 30nm. 55 x 20" folded to 5 x 10".) Revised every 8 weeks.

NOTE: When ordering individual charts, complete part no. with the chart no. Ex: Enroute High Altitude Chart H1/2 is P/N 8075-H1/2.

Full Set (H1/H2, H3/H4, H5/6, H9/H10, H11), (H3/H4, H5/H6, H7/H8-very small area, H9/H10), (H3/H4-very small area, H5/H6, H7/H8, H9/H10, H11) P/N 8075-1

For SUBSCRIPTION service: Add -SUB (example: 8075-H1/2-SUB) and a new chart will be shipped and billed to you automatically at every revision until you cancel the subscription. Subscription chart orders require a credit card number on file.

CANADIAN AIA CHARTS

CANADIAN VNC (VFR) CHARTS

The VNC is used by VFR pilots on short to extended cross-country flight at medium altitudes and at low to medium airspeeds. These charts show aerodrome data, airspace information, radio aids to navigation, air/ground communications, and elevation with contour lines, tints and shaded relief.

LOW ALTITUDE ENROUTE CHARTS

Enroute Low and High Altitude charts provide aeronautical information for instrument navigation in the low and high airway structure of the Canadian Domestic Airspace. The airspace over foreign territory and international waters in which Canada accepts responsibility for the provision of air traffic services, and other areas required for military use. The primary purpose of Enroute charts is to depict radio navigation data to provide rapid and precise location and identification of information requisite to radio instrument navigation.

JEPPESEN FLIGHT TRAINING

GFD PRIVATE PILOT MANUAL

Jeppesen's Guided Flight Discovery Private Pilot Manual is an integral component within the GFD Pilot Training System. The organization and colorful presentation of the text helps students learn quickly from the start. Discovery insets expand on important ideas and concepts in the text. The information ties in references from the world of aviation, including NTSB investigations and aviation history. Human Element insets introduce pilots to the human factors aspect of flight.

Private Pilot Manual P/N 13-17521
 Private Pilot Manual (w/ FAR/AIM text) P/N 13-17522

PRIVATE PILOT MANEUVERS MANUAL

Each maneuver is presented using colorful graphics, step-by-step procedure descriptions, helpful hints, PTS references and study exercises to help you visualize and understand each maneuver you will perform in the airplane. P/N 13-21770

PRIVATE PILOT SYLLABUS

Now spiral bound! Features a step-by-step description of course contents. Ideal for Part 141 flight training programs and may be adapted for Part 61 training. Includes: • Lesson objectives • Flight & ground time allocations for all lessons • Coordination of academic support materials with flight training • Enrollment notice & Graduation Certificate. P/N 13-04223

PRIVATE PILOT RECORD FOLDER

From your ground lessons and written exams, to flight maneuvers and flight checks, this record folder effectively tracks all the details during your pilot training - both FAR Part 141 and FAR Part 61. Set of ten. Single P/N 13-01206-1
 Set of 10 P/N 13-01206

JEPPESEN RECORD FOLDERS

Effectively track all the details during your multi-engine training.

I/C Record Folder P/N 13-06245
 CFI Record Holder P/N 13-06246
 Private Pilot Student Record P/N 13-01206
 Multi-Engine Record Folder P/N 13-06252

JEPPESEN AVIATION INSTRUCTOR'S HANDBOOK

A flight instructor's essential resource, the Aviation Instructor's Handbook details the fundamentals of instructing rules and techniques. A flight instructor's essential resource, this handbook details the fundamentals of instructing rules and techniques. It was rewritten in 1999 and is the successor to FAA AC60-14. P/N 13-06247

JEPPESEN INSTRUCTOR'S GUIDE CD

Includes all four instructor's guides: Private, Instrument/Commercial, Multi-Engine, and Flight Instructor and bonus materials consisting of lesson plan templates and instructor endorsements. Features: * Our philosophy of instruction * Covers the process of getting FAR Part 141 school approval * Provides pilot briefings to use in your student training * Answers and critiques for stage exams * Answer keys at the end-of-course exams P/N 13-06248

FLIGHT MANEUVERS ILLUSTRATOR

Excellent visual aids for instructors & students. Designed for pilots as a quick reference aid. Features private & commercial maneuvers. Size: 6"x 3.25". P/N 13-01208

ATC CLEARS CASSETTE

Now you can learn or refresh your IFR skills, work on your clearance familiarization and clearance shorthand, and/or practice copying clearances by using this unique training aid. P/N 13-01209

GFD INSTRUMENT/COMMERCIAL MANUAL

Jeppesen's Guided Flight Discovery Instrument/Commercial Manual provides the most complete explanations of aeronautical concepts for professional pilots through the use of colorful illustrations and full-color photos. This primary source for initial study and review includes Principles of Instrument Flight, The Flight Environment, Instrument Charts and Procedures, Aviation Weather and IFR Flight operations and Commercial Pilot Operations, as well as an introductory look at Building Professional Experience. The most comprehensive and visually appealing Instrument/ Commercial manual ever.

Instrument/Commercial Manual P/N 13-21760
 Manual w/ FAR/AIM Text P/N 13-01217

GFD INSTRUMENT/COMMERCIAL SYLLABUS PKG.

This training syllabus covers the learning objectives and time allocations for both Instrument Rating and Commercial Certificate. The syllabus also contains an option for a Multi-Engine Rating. In addition to the syllabus, this package also contains enrollment notices. P/N 13-21740

GFD PRIVATE/INSTRUMENT FLITESCHOOL SOFTWARE

FliteSchool Multimedia Software is a complete, interactive home study course for passing the FAA airman knowledge exams. FliteSchool Multimedia Software makes it easy, fast and fun to get a great score on your exam. You learn the material thoroughly and get the highest possible score on your exam while retaining what you learn. Only FliteSchool Multimedia software integrates the complete textual references to the GFD Private and Instrument/Commercial Manual, allowing you easy access to expanded information. Carefully selected graphics and computer animation are combined to help you understand difficult concepts. In addition, all FAA figures are contained on the CD-ROM for easy reference.

JEPPESEN PRACTICAL TEST STANDARDS

Knowing that the FAA computer exam is only part of the certification process, prepare yourself for the FAA checkride with Jeppesen Practical Test Standards. Jeppesen FAA Practical Test Standards reprints are valuable training aids for students, examiners & instructors. The following topics are available:

Private Pilot Airplane (single-engine land) P/N 13-01221
 Private Pilot Airplane (multi-engine land) P/N 13-01222
 Commercial Pilot Airplane (single-engine land) .. P/N 13-01224
 Commercial Pilot Airplane (multi-engine land) P/N 13-01225
 Instrument Rating (Airplane, Helicopter Airship). P/N 13-01223
 Flight Instructor Package (single & multi-engine land, instrument) P/N 13-01226

JEPPESEN GFD MULTI-ENGINE STAGE AND EOC EXAMS BOOKLET

Test your understanding of material covered in the Multi-Engine Manual. **Stage I Exam** - Cover multi-engine procedures, maneuvers, systems, aerodynamics, and performance, as well as weight and balance information. **Stage II Exam** - Examines engine-out aerodynamics, maneuvers, and procedures. **Stage III Exam** - Challenge yourself with questions about instrument operations in multi-engine airplanes. P/N 13-06251

FAA COMPUTER TESTING SUPPLEMENTS & AIRMEN KNOWLEDGE TEST QUESTIONS

Contains questions, answers, explanations, and references. Includes airplane and recreational pilot questions and is coordinated with Jeppesen Private Pilot Manual. Organized by topic, full-color charts, and unique sliding mask for self-testing. Instrument Rating and Flight Instructor

Instrument Pilot FAA Exam Package P/N 3067
 Commercial Pilot Airplane and Commercial Pilot Helicopter FAA Exam Package P/N 13-01227
 Instrument/Commercial Pilot FAA Exam Combo Package P/N 13-01228
 CFI and ground Instructor, CFI & MEI Pilot FAA Exam Package P/N 13-01229
 CFI and ground Instructor, CFI & MEI Pilot FAA Exam Package P/N 13-01230

JEPPESEN FLIGHT TRAINING

JEPPESEN - GFD PRIVATE PILOT VIDEO SERIES ON DVD

The Jeppesen GFD Integrated Ground School DVD Series is a great resource for students & instructors alike. The Private Pilot, Instrument/Commercial Flight Instructor, & Multi-Engine DVD's augment the written materials by providing visual reinforcement of topics. The state-of-the-art graphics, animation, and aerial photography help students grasp complex concepts. The GFD Private Pilot Integrated Ground School on three DVD is a great resource for students and instructors alike. These DVD's contain 10 hours of informative and entertaining video that augment the written materials by providing visual reinforcement on a variety of topics.

JEPPESEN - A&P TECHNICIAN GENERAL WORKBOOK

Contains questions covering the general section of aviation technician training. It is designed to be used with the A&P technician general textbook by chapter and subsection. 204 pages.

P/N 13-01189.....

JEPPESEN GFD FLIGHT INSTRUCTOR VIDEO SERIES ON DVD

The Jeppesen GFD Integrated Ground School DVD Series is a great resource for students & instructors alike. The Private Pilot, Instrument/Commercial Flight Instructor, & Multi-Engine DVD's augment the written materials by providing visual reinforcement of topics. The state-of-the-art graphics, animation, and aerial photography help students grasp complex concepts. The GFD Flight Instructor Video Series on DVD is a great supplement to GFD Flight Instructor Textbook and contains nine hours of instruction critical to the CFI applicant. Many important topics are discussed, including fundamentals of instruction, instructing the private pilot student, instructing the instrument student and instructing the commercial student.

P/N 13-02453.....

JEPPESEN AIRCRAFT SYSTEMS & COMPONENTS

This book by Don Garrett is written in a direct, easy-to-understand style. Designed principally for A&P technician and Airway Science programs, it works equally well as a basic text for any course of study that requires a knowledge of aircraft systems. Starting with a background in electricity, the content brings the reader through complex systems and helps develop a high degree of understanding. 324 pages.

P/N 13-312685.....

JEPPESEN PILOT TRAINING KITS

PRIVATE PILOT KITS

Guided Flight Discovery from Jeppesen provides the most complete training package available. Whether you are a chief flight instructor at a flight school or a student pilot working towards your first pilot's license, you can choose from a variety of integrated training materials. GFD has been developed for the finest flight schools, colleges and universities in the U.S. With Guided Flight Discovery, students will build a solid foundation of knowledge to take with them wherever they go. The GFD Pilot Training System puts schools and students on the leading edge of learning and builds better pilots. Call for a detailed list of kit components.

Part 61 Kit.....P/N 13-02425
Part 141 Kit.....P/N 13-02428

PRE-SOLO WRITTEN EXAM - Covers general info, Training Aircraft, Airport and Local Airspace Questions. P/N 13-01169

GFD PRIVATE PILOT STAGE EXAM BOOKLET - Includes private stage (1-3), and 6 blank exam answer forms. P/N 13-01170

INSTRUMENT/COMMERCIAL KITS

New GFD Instrument/Commercial Kits are available for both Part 61 and Part 141 training. The core component of GFD Kit is the Instrument/ Commercial Manual. Call for a detailed list of kit components.

| Part No. | Kit Description | Price |
|----------|--|-------|
| 13-02426 | Instrument/Commercial Part 61 Basic Kit | . |
| 13-02431 | Instrument/Commercial Part 141 Basic Kit | . |
| 13-01775 | Ultimate Kit | . |

GFD INSTRUMENT/COMMERCIAL/MULTI-ENGINE STAGE EXAM BOOKLET - Includes Instrument/Commercial Stage and 12 blank exam answer forms. P/N 13-01171

FLIGHT INSTRUCTOR KITS

GFD Flight Instructor Kits are available for both Part 61 and Part 141 training. The core component for each GFD Kit is the Flight Instructor Manual. Call for detailed list of kit components. The Part 41 Flight Instructor Kit is designed for the pilot

with a Commercial Certificate & Instrument Rating seeking a Flight Instructor Certificate. Suitable for the pilot seeking all 3 CFI ratings, or the basic certificated instructor seeking additional ratings. Kit Includes: •GFD Flight Instructor Manual •CFI Training Syllabus •Stage Exams •End-of-course Exams •File Folder Record •Enrollment Notices and Graduation Certificates •Private Maneuvers Manual •FAR/AIM •FAA Aviation Instructors handbook • CFI PTS Booklet • Kit bag.

CFI Kit Part 61.....P/N 13-01175.....
CFI Kit Part 141.....P/N 13-01176.....

GFD FLIGHT INSTRUCTOR MANUAL - Prepares CFI applicants for Flight Instructor-Airplane certificate, Instrument-Airplane and multi-Engine-Airplane Instructor ratings. This 560-page, full-color text includes over 1,000 photos and illustrations, workbook exercises, instructor endorsements and a comprehensive glossary and index are included. P/N 13-01178

HELICOPTER TRAINING KITS

Schweizer helicopter training program meets the requirements of FAR Part 141. Can be used in any helicopter training program. Covers principles of flight, the flight environment, helicopter systems and performance, meteorology, navigation, physiology and maneuvers. Standard kit includes a comprehensive textbook, workbook, FAR Part 141 training syllabus, file folder, FAA testing materials, FAR/AIM, and a Schweizer 300CB Information Manual. Student Kit components are packaged in an attractive cloth bag. Deluxe student kit includes Standard Student Kit plus Pilot logbook, metal CSG computer, & navigation plotter.

Private/Commercial Standard student kit..... P/N 13-01179.....

FAR/AIM 2009

* Includes FARs Parts 1, 2,3, 43, 61, 67, 71,73, 91, 97, 103, 105, 119, 133, 135, 136, 137, 141, 142, and applicable SFARs: NTSB 830, HMR175, TSR 1540, TSR 1544, TSR 1550, and TSR 1552 * Free TSR Part 1562 (Washington D.C. Operations) on Jeppesen.com * Includes all the AIM and Pilot/Controller Glossary with enhanced full-color graphics * Easy-to-read text on high-quality paper * Reference tabs help you easily locate regulations and AIM chapters * Jeppesen-recommended study lists direct you to the regulations pertinent to the certificate or rating you are working on * FAR exercises (with answers) provide real-world scenarios to enable you to understand the regulations for Private, Instrument, Commercial and Sport Pilot Exclusive AIM Supplement providing information on Jeppesen IFR Charts * Exclusive AIM Supplement providing information on Jeppesen IFR charts P/N 13-15450

MULTI-ENGINE KITS

Guided Flight Discovery Multi-Engine Pilot Kit with Video - Designed to support Private & Commercial Pilots in adding a Multi-Engine Rating to their certificates. Kit consists of: • Multi-engine manual (w/work book questions) • Multi-engine video • Stage exams • End-of-course exams • Multi-engine syllabus record folder • Enrollment notices and graduation certificate. P/N 13-01776

MULTI-ENGINE PROGRAM - Covers multi-engine aerodynamics, systems & performance, engine-out operations and instrument flight through actual airborne and graphic sequences. Available with or without Jeppesen's Multi-Engine Manual. w/ Manual P/N 3195

GFD MULTI-ENGINE MANUAL - This text illustrates important aerodynamic concepts and complex systems using 375 full-color graphics. One of the strong points of the GFD series is that it maintains student interest through sometimes dry material by using sidebars to illuminate the text, presented as Discovery and Human Element insets. The Multi-Engine Manual builds on this practice with 2 new types of insets, one highlights flying careers and another that discusses in-flight situations that bring together critical points made in the text. Quotes also liven things up—the Multi-Engine Manual manages to take inspiration from sources as diverse as Anne Morrow Lindbergh & Monty Python. P/N 13-01644

MULTI-ENGINE SYLLABUS- A 36-page guide to both ground & flight training for the Multi-Engine Rating. Describes schedules, lesson objectives, content and completion standards for 2 stages of flight training & 2 stages of ground training. Required for FAR Part 141 flight schools. P/N 13-01173

AVIATION MAINTENANCE TRAINING KITS

Jeppesen's General Airframe & Powerplant training materials come in complete kit form. Comprehensive, developed by respected experts in the field, these kits give students the info they need to succeed in obtaining their Airframe and Powerplant license. Whether you're a veteran, building your own plane, or just learning, you can count on Jeppesen to help you get where you want to go. Jeppesen Maintenance products help you master the topic & realize success!

GENERAL A&P KIT INCLUDES - A&P Technician General textbook, workbook, and study guide • Acceptable methods, techniques and practices/aircraft alterations (AC43.13-1B/2A) •FAR handbook for aviation maintenance technicians • Student kit bag. P/N 13-01186

A&P TECHNICIAN GENERAL TEXTBOOK - The most current general aviation textbook available. Written to the new FAR part 147 standards. Expanded to include a complete section on electrical generators & motors, new hardware, and non-metallic components. Also includes current & comprehensive coverage on those items found in the previous version. Many new tables, charts and illustrations, including abrasives, corrosion removal & treatment, corrosion points, and helicopter weight & balance and others. General Textbook.....P/N 13-01187

General Study GuideP/N 13-01188

General WorkbookP/N 13-01189

AIRFRAME A&P KIT - Includes A&P Technician Airframe textbook, workbook & study guide and Student Kit bag.....P/N 13-01190

A&P TECHNICIAN AIRFRAME TEXTBOOK - The most up-to-date airframe textbook available. Written to meet FAR part 147 standards. Updated info includes rotorcrafts structures, winglets, T-tails, composites, expanded hydraulic and pneumatic system sections, landing gear safety devices and maintenance, nose wheel steering system, fire detection systems, electronic instruments, electronic systems monitoring displays, storm scope systems, and installation of communication and navigation equipment. More than 100 color illustrations, charts and diagrams.

Airframe TextbookP/N EA-ITP-A

Airframe Workbook.....P/N 13-01192

POWERPLANT A&P KIT - Includes A&P Technician Powerplant textbook, workbook & study guide. Exam package & Student Kit bag.....P/N 13-01193

A&P TECHNICIAN POWERPLANT TEXTBOOK - This is a major revision of our previous version, and is the most comprehensive aviation powerplant textbook available. It is written to meet, and even exceed, FAR part 147 standards. Includes over 120 color illustrations of engine cross-sections, turbine and reciprocating, instruments and control systems. Subject matter is arranged in a logical, practical order, with more emphasis on 'hands on' learning. 550 pages.

JEPPESEN AVIATION VIDEOS/DVDS/BOOKS

JEPPESEN FLIGHTIME VIDEOS

Weather, Emergencies, Air Safety

WEATHER HAZARDS: Provides a review of conditions for thunderstorms; in-depth look at the internal forces of thunderstorms; overview and causes/ effects of wind shear; special look at microbursts; & tips on avoiding these hazards.
P/N 3543

AIRCRAFT ICING: Includes pre-flight planning considerations; operational considerations on the ground; flight effects on aerodynamics performance; conditions conducive to ice formation; and recognition/prevention of induction system icing.
P/N 3028

BASIC AVIATION PHYSIOLOGY: Covers avoiding/recognizing danger; vision in flight; spatial disorientation (vertigo); respiration and altitude; alcohol, drugs and performance.
P/N 3953

MOUNTAIN FLYING: Provides information and techniques for flying in the mountains and how to avoid the associated hazards.
P/N 13-22806

GPS/LORAN: Covers the operating principles of GPS & LORAN and discusses their benefits over conventional navigational equipment. Addresses filing a GPS or LORAN flight plan. Gives practical tips for using both systems.
P/N 13-22815

METAR/TAF: With implementation of METAR/TAF, the U.S. will utilize a common worldwide format for surface observations and forecasts. This video answers your questions and show you how to interpret current and forecast weather. Also includes 24-pg supplement providing comprehensive information on new formats (VHS).
P/N 13-01197

FLIGHT REVIEW: Follows a pilot through a typical flight review, stressing the topics and maneuvers that may be covered. (VHS)
P/N 13-01201

JEPPESEN TRAINING DVDS

JEPPESEN CHART TRAINING (DVD) - This exciting training tool enhances your knowledge of Approach Charts, Enroute Charts, and Arrival/Departure Charts. All are included on one convenient DVD! Interactive quizzes are also included to reinforce important concepts.
P/N 3076

AERODYNAMIC PRINCIPLES (DVD) - Get a complete look at the forces that keep an aircraft flying and those that work counter to it. By studying the four forces of flight - lift, weight, thrust and drag - you will learn how each force affects flight.
P/N 13-06214

FITS FAA INDUSTRY TRAINING STANDARDS (DVD) - FAA Industry Training Standards (FITS) was designed by the FAA to better prepare pilots for the challenges of flying technically advanced aircraft. FITS teaches pilots to think and respond using real-flight scenarios.
PN 13-06215

JEPPESEN GARMIN G1000 TRAINING CORE & VFR PROCEDURES

Teaches the skills required to master the operation and confidently fly the G1000. Includes a multi-mode methodology that includes a "Demo Mode" demonstrating the selected topic using narration, text, and animated graphics. A "Training Mode" that guides you through the required steps to accomplish the task, and a "Solo Mode" enabling the assessment of the user's performance. Over 60 topics taught in eight categories emulating the phases of flight including Abnormal and Emergency Operations, the use of the GFC700 autopilot, and Quick Tips. The program begins with the Start-Up category (product orientation) followed by typical Pre-Takeoff operations. It then progresses to Departure, Enroute, Arrival, Autopilot Operations and Emergency Procedures. An additional category called Quick Tips contains timesaving techniques to improve operational efficiency and product knowledge.
Garmin G1000 PDF&MFD Basic..... P/N 13-05787

G1000 Garmin PFD&MF Advanced P/N 13-05788

JEPPESEN CHART TRAINING DVD

Supplement your aviation knowledge with Jeppesen's FlightTime Videos and DVDs training topics. Each subject gives you a more detailed look at important aviation topics. This exciting training tool will enhance your knowledge of Approach Charts, Enroute Charts and Arrival/Departure Charts. All are included on one convenient DVD! Interactive quizzes are also included to reinforce important concepts. Material is suitable for students and experienced pilots alike.
P/N 3076

JEPPESEN INTRODUCTION TO NAVIGATION CHARTS

The chart training guide is published as a service for pilots training with Jeppesen charts. It is intended for reference only and includes some of the most commonly used symbolism. This guide is revised regularly; however some variance may exist between this guide and current chart services. These may be the result of one or more of the following; chart issuance dates, timely application of changes received from governing agencies, and/or the method of representing such information. The chart training guide has been designed as a supplementary training material and is not intended for navigation.
P/N 13-06253

GLOBAL POSITIONING SYSTEM

The Next Generation of Navigation - Provides the latest information available on GPS' rapidly changing technology, tools, rules, and procedures. You'll learn how to use GPS in VFR and IFR operations, and see how three different GPS approaches are flown. This fast-paced, 30 minute video includes 16-page GPS Reference Guide summarizing key requirements for GPS flight. (VHS)
P/N 13-22815

JEPPESEN CFI RENEWAL DVD COURSE

Renew your CFI certificate at home - on YOUR schedule - using this Jeppesen comprehensive and flexible FAA-approved program in a 16-hour format. You will receive eight specially produced, high quality videos and eight chapters of comprehensive text material. Our flexible enrollment allows you to enroll as close as 30 days prior to your expiration date. And Jeppesen can now issue your temporary CFI certificate directly to you. What could be more convenient!
P/N 13-04898

JEPPESEN GFD DVD SERIES

The jeppesen GFD DVD Series is a great resource for students and instructors alike. These DVD's contain many hours of informative and entertaining video that augment the written materials by providing visual reinforcement on a variety of topics. The state-of-the-art graphics, animation, and aerial photography help students grasp complex concepts.

ASA FLIGHT TRAINING

TESTPREP SERIES 2009 BOOKS

These books are a pilot's best bet. Included with every FAA question are the answers, explanations, subject codes and references, as well as explanations for incorrect answers. All of the questions in the particular FAA test question database are included here and have been arranged into chapters based on subject matter. Topical study, in which similar material is covered under a common subject heading, promotes better understanding, aids recall, and thus provides a more efficient study guide.

- Private/Recreational Pilot P/N 13-00984
- Instrument Rating P/N 13-00974
- Commercial Pilot P/N 13-01298
- Airline Transport Pilot P/N 13-01301
- Certified Flight Instructor P/N 13-32311

COMPUTER TESTING SUPPLEMENTS

Also known as the test figures books, these are the same books issued during FAA Knowledge Exams at the computerized testing centers. They come bundled with our test preps, but they are also available individually. Maps are reproduced with full color, exactly as printed by the FAA.

- Private & Recreational Pilot .. P/N 13-01828
- Instrument Rating P/N 13-01829
- Commercial Pilot P/N 13-01830
- Aviation Maintenance Technician/ Parachute Rigger Flight & Ground Instructor P/N 13-01296
- Flight Engineer #ASA-CT-8080-6A\ P/N 13-01293
- Airline Transport Pilot/Aircraft Dispatcher ... P/N 13-01295
- Inspection Authorization P/N 13-02262

INSPECTION AUTHORIZATION TEST PREP

This book is an important reference source for all Aviation Maintenance Technicians (AMTs) seeking to add Inspection Authorization to his or her qualifications, as well as AMT schools preparing students for this test. All Inspection Authorization candidates must take and pass the FAA's IA Knowledge Test. The IA Test Prep provides readers with all the information needed to pass the IA Knowledge Test and helps candidates become familiar with the privileges and limitations of the highest level of maintenance certification. This book provides more than 350 sample questions, all of which are based on history and experience with the IA testing process. Example FAA questions and answer choices are supported with explanations, and FAA references from which the questions are derived are identified for students who wish to study them further. The IA Test Prep conveniently compiles the reference materials necessary to prepare for the IA Knowledge Exam into one volume, for an organized study program that AMT schools, instructors, and individuals alike can use to streamline their studies. P/N 13-01297

CERTIFIED FLIGHT INSTRUCTOR DVD COURSE-VIRTUAL TEST PREP

More than 10 hrs of high-quality DVD presentation meets all FAA Part 61 home study requirements. All the information needed to ace the FOI, CFI, BGI and AGI exams through exciting in-flight video and dynamic instructional aids and interactive quizzes. Includes 2004 Test Prep book and Computer Testing Supplement. A bonus DVD, Flight Review is included which covers the required specifics for a Biennial Flight Review. P/N 13-01081

ORAL & PRACTICAL EXAM GUIDE

This book prepares the AMT for the general, airframe, and powerplant exams with information on the certification process, typical projects and required skill levels, practical knowledge requirements in a question and answer format, and reference materials for further study. P/N 13-50165

AIR TRAFFIC CONTROL TESTPREP STUDY GUIDE

Prepares reader for the Air Traffic Control test, and includes questions, answers, explanations, application procedures, employment and training information, and test-taking strategies. P/N 13-02263

FAST TRACK TEST GUIDES 2009

BOOKS FOR AVIATION MAINTENANCE

To prepare students for the FAA knowledge exams required for A&P certification, each guide contains exact FAA questions with answers, explanations and references in the "Fast-Track" format to promote increased learning comprehension and retention. Prepared by industry expert Dale Crane, the Fast-Tracks also include a helpful guide to the Practical & Oral Tests.

- General (152 pages) P/N 13-32323
- Airframe (200 pages)..... P/N 13-32321
- Power Plant (200 pgs)..... P/N 13-32322

THE PILOT'S MANUAL SERIES

FLIGHT SCHOOL THIRD EDITION - covers all the tasks from the FAA Practical Test Standards for the Private and Commercial certificates. The textual descriptions are supported with full-color illustrations and photographs. Prepares readers for the student pilot milestones: first solo, cross-country flying, instrument flight, and night flying. Comprehensive airplane checkout review in the appendix which readers can use to prepare for transitioning to a new airplane type, insurance applications, or the Flight Review (BFR) ground lesson. P/N 13-00982

PRIVATE & COMMERCIAL - Prepares the reader for the Private and Commercial FAA Knowledge exams, covering all of the aerodynamic knowledge required by both certificates. A flight and ground training syllabus is available. P/N 13-00978

INSTRUMENT FLYING - A step-by-step course covering all the knowledge requirements to pass the Instrument FAA Knowledge and oral exams, as well as an instrument check-ride. A flight and ground training syllabus is available. P/N 13-00979

VISUALIZED FLIGHT MANEUVERS

Excellent learning and teaching aids for instructors and students, these handbooks comply with current practical test standards and regulations. Fold-out pages allow each maneuver to be complete on a 1-page spread, so the reader absorbs all the visual/textual information at once. Covers Private, Commercial and Flight Instructor maneuvers.

- For High-Wing aircraft P/N 13-02289
- For Low-Wing aircraft P/N 13-02290
- For Katana aircraft P/N 13-02291

THE PILOT'S MANUAL SYLLABUS SERIES

These syllabi meet all Part 141 requirements and supplement The Pilot's Manual Series textbooks: "Flight Training," "Private & Commercial," & "Instrument Flying." The syllabi have been reviewed by the FAA, present a fresh approach, and offer the most integrated, comprehensive, simple flight and ground training programs available. Flight lessons are presented side-by-side with their coordinating ground lessons for a completely integrated program. Each syllabus comes with appropriate Stage Exams.

- Private Pilot Syllabus P/N 13-02264
- Instrument Rating Syllabus P/N 13-02265

FROM THE GROUND UP

From the Ground Up offers them a comprehensive package of aeronautical information in one extensive and award-winning form. Often referred to as the "Bible" for ground school flight training—and required reading for student pilots in many countries—From the Ground Up delves deeply into the full range of aviation topics incl.: Theory of Flight, Engines, Airports and Airspace, Regulations, Navigation, Weather, Communications, Airmanship, Human Factors, and Air Safety. P/N 13-02266

ASA ADVANCED AVIONICS HANDBOOK

This handbook is designed as a technical reference for pilots who operate aircraft with advanced avionics systems. Whether flying a conventional aircraft that features a global positioning system (GPS) navigation receiver or a new aircraft with the latest integrated "glass cockpit" advanced avionics system, you should find this handbook helpful in getting started. The arrival of new technology to general aviation aircraft has generated noticeable changes in three areas: information, automation, and options. P/N 13-06670

ASA RISK MANAGEMENT HANDBOOK

Designed to help recognize and manage risk. It provides a higher level of training to the pilot in command (PIC) who wishes to aspire to a greater understanding of the aviation environment and become a better pilot. This handbook is for pilots of all aircraft P/N 13-06667

ASA FLIGHT TRAINING

THE COMPLETE PILOT SERIES

Bob Gardner's series of textbooks has been in publication since 1985 and is continually updated and expanded. Mr. Gardner writes in a conversational manner that is readable, comprehensive, and more importantly, will lead the reader to a greater understanding of the material. All his books are reinforced by the caliber of personal experience that integrates "technique" and "procedures" with mastery.

THE COMPLETE MULTI-ENGINE PILOT (3RD EDITION) - The best textbook available for learning multi-engine flying! Learn the fundamentals of flying multi-engine aircraft and aerodynamic laws that govern multi-engine flight under Bob Gardner's experienced and energetic tutoring.

P/N 13-06661

THE COMPLETE ADVANCED PILOT (3RD EDITION) -

Many students prepare for the Commercial certificate and Instrument rating simultaneously, as a method to train efficiently, cut expenses, and expedite the process. This book combines these two phases in flight training to produce the most effective program towards completion. Review questions follow each chapter.

P/N 13-01714

THE COMPLETE PRIVATE PILOT (10th EDITION)

- For anyone interested in pursuing a Private Pilot or Recreational Pilot certificate, this book prepares the student with a thorough conceptual and practical understanding of the flying fundamentals. Several chapters refer to aeronautical charts, and a full-color example of a sectional chart is provided for use with exercises throughout the text.

P/N 3356

THE COMPLETE PRIVATE PILOT SYLLABUS (3RD EDITION) -

A comprehensive guide that stresses the importance of integrated flight training -- providing both flight and ground training for more complete preparedness. It is written to satisfy both Part 141 and Part 61 requirements. 126 pages.

P/N 13-02268

ORAL EXAM GUIDES BY MICHAEL D. HAYES

These exam guides are written to help prepare applicants for their oral exams with FAA examiners. Using a question and answer format, each guide takes the questions most likely to be asked by examiners and provides easy to follow responses. Pilots will find these guides indispensable tools in both planning for what to expect and mastering the subject matter. Instructors rate these as excellent preparation for students, as well as preps for Instrument Proficiency Checks (IPCs), aircraft transitions, and as general refresher material.

AIRCRAFT PILOT GUIDES

Pilots will find each guide in the series an invaluable companion to the Pilot's Operating Handbook/Airplane Flight Manual. Each guide gives overall description of the aircraft, limitations, handling characteristics, & loading/performance data. All data is result of flight testing done by experts in the industry. Perfect for new transitioning pilots.

STUDENT KITS

Complete, comprehensive packages for pilot training. Flexibility will always be the best feature of ASA Student Kits. If a school or training program needs to swap out the fiberboard flight computer in The Complete Private Kit for our aluminum E6-B, that's okay! If everything in The Aviator Commercial Kit is just right for your school's curriculum, but you're using the commercial syllabus you created, that's alright, too. Your ASA Distributor can create a Personalized Aviation Custom Kit for you that leaves out our Syllabus, but still guarantees easy ordering, easy shipping, and easy delivery.

THE COMPLETE PRIVATE PILOT

- PPT-9, The Complete Private Pilot, by Bob Gardner, a comprehensive textbook
- PPT-S, The Complete Private Pilot Syllabus, for both ground and flight school
- SFR-P2, Student Flight Record for Private Pilots, to track progress
- VFM-HI, Visualized Flight Maneuvers for High-Wing Aircraft, a comprehensive maneuvers guide (VFM for Low-Wing is available by special request)
- SP-30, Standard Pilot Logbook in black
- CP-RLX, the Ultimate Rotating Plotter
- E6B-P, fiberboard flight computer
- OEG-P, Private Oral Exam Guide, by Michael Hayes, for checkride preparedness
- 8081-14AS, Practical Test Standards for Private Pilot Single-Engine Land, so pilots know what to expect on the checkride
- BAG-AT, black attaché bag

P/N 13-02271

AVIATOR INSTRUMENT KIT

Includes:

- PM-3, The Pilot's Manual: Instrument Flying, by Trevor Thom
- PM-S-1, Instrument Rating Syllabus (The Pilot's Manual Series)
- SFR-I2, Student Flight Record for Instrument students
- OEG-I4, Instrument Oral Exam Guide, by Michael Hayes
- 8081-4B, Practical Test Standards for Instrument Rating
- CP-IFR, Instrument Plotter for enroute charts.

P/N 13-02273

THE KATANA PRIVATE PILOT KIT

ASA has teamed up with Diamond Aircraft to produce an efficient training kit to prepare candidates for their Private Pilot Certificate. Based on Bob Gardner's The Complete Private Pilot and The Complete Private Pilot Syllabus, the kit also includes a Student Flight Record Folder, Visualized Flight Maneuvers Handbook, the Diamond Katana DA-20 Pilot's Operating Handbook, Pilot Log, Fixed Azimuth Plotter, and E6-B Paper Flight Computer...all to fit neatly into the Katana Flight Attaché.

P/N 13-02282

ASA PART 61 STUDENT PILOT KIT

Packaged in the ASA Pilot Briefcase. The Complete Private Pilot by Bob Gardner is the primary textbook for this kit, ASA FAR/AIM and Private Pilot Test Prep books The Practical Test Standards, Private Oral Exam Guide, and Visualized Flight Maneuvers for High-Wing Aircraft help take students through their Oral and Practical exams. E6-B flight computer and Ultimate Rotating Plotter for all flight planning, and a Standard Pilot Logbook.

P/N 13-03127

ASA PART 141 STUDENT PILOT KIT

Includes everything they'll need, packaged in the ASA Pilot Briefcase. The Pilot's Manual: Flight School and The Pilot's Manual: Ground School, \ ASA FAR/AIM and Private Pilot Test Prep books are also included. The Practical Test Standards, and the Private Oral Exam Guide. An aluminum E6-B flight computer and Ultimate Rotating Plotter are included for flight planning, a Standard Pilot Logbook, also ASA Short Fuel Tester to help with preflights.

P/N 13-03128

FAA STUDENT PILOT GUIDE

The Student Pilot Guide lays out (for prospective student pilots and those already engaged in flight training) in "how to" fashion, the general procedures for obtaining FAA student pilot, sport pilot, recreational pilot, and private pilot certificates.

P/N 13-04565

AVIATION RADIO COMMUNICATIONS MADE EASY

The 272-page spiral-bound workbook includes 32 different templates ranging from operations at nontowered fields to initial call-up of an approach control facility to requesting VFR traffic advisories, also known as flight following. You complete these templates - literally filling in the blanks-and take them along-they're sized to fit a standard pilot's kneeboard. Four copies of each template are included.

FLIGHT TRAINING

PRACTICAL TEST STANDARDS

ASA reprints the most current FAA Practical Test Standards in this series of handy cockpit-sized guides. These are fundamental to a successful checkride and include the skills and knowledge required for each certificate or rating. Instructors, students, and examiners use these books to prepare, review, take, or issue the checkride.

2009 FAR/AIM SERIES

ASA has built a reputation for providing the aviation community with the most accurate and reliable FAR/AIM products available. The 2009 FAR/AIM book continues this tradition, containing complete and up-to-date information from Titles 14 and 49 of the Code of Federal Regulations (14 and 49 CFR) pertinent to General Aviation, Sport Pilots and Flight Instructors, combined with the Aeronautical Information Manual (AIM) (includes Change 1, effective 7/31/2008), and a free email subscription service for you to receive updated information as it is released by the FAA.

P/N 13-15200.....

GUIDE TO THE FLIGHT REVIEW

BY JACKIE SPANITZ - Complete preparation for taking or issuing a Flight Review. Most commonly asked questions with answers regarding the Flight Review, appropriate references for further study, relevant advisory Circulars, and a checklist. All information is useful to both Flight Review candidates & issuing CFIs. The new fifth edition reflects important updates.

P/N 13-00973.....

ASA AIRLINE

PILOT TECH INTERVIEW

Author Ron McElroy provides an abundance of exercises in the areas of mental math, approach plates, regulations and procedures, weather, systems and aerodynamics, and cockpit situations to analyze and resolve. Soft cover, illustrated, glossary and index included, 6" x 9", 144 pgs

P/N 13-03443

ASA AIRCRAFT WEIGHT AND BALANCE HANDBOOK

This book explains in detail the process to determine the weight and balance of any aircraft. This new edition, effective March 2007, has been updated to include information on new Light Sport Aircraft (LSA) and Very Light Jet (VLJ) categories. Applicable to both airplanes and helicopters, this book is a primary reference for all FAA Knowledge Exams for both pilots and mechanics. Soft cover, glossary, indexed, full-color illustrations, 8-3/8" x 10-7/8" format, 96 pages.

P/N 13-01059

PILOT'S LIBRARY CD 2009

14 publications on one searchable, printable CD! Its perfect as a convenient easy to handle reference or as complete economical curriculum for an aviation student. Included Publications: FAR/AIM 2009 • Airplane Flying Handbook • Pilot's Handbook of Aeronautical Knowledge Instrument Flying Handbook • Instrument Procedures Handbook • Aviation Instructor Handbook • Seaplane/Skiplane Operator's Handbook • Rotorcraft Flying Handbook • Aviation Weather • Aviation Weather Services • Aeronautical Chart Users Guide • Practical Test Standards - Private Pilot • Practical Test Standards - Instrument Pilot • Aerodynamics for Naval Aviators

P/N 13-05132.....

MAINTENANCE LIBRARY CD 2009

14 publications on one searchable, printable CD! Its perfect as a convenient easy to handle reference to this everyday material or as complete economical curriculum for an A&P student. Publications included: • 2009 FARs for Maintenance Technicians • AC 43.13 1B, 2B (new 2008 edition) • General Handbook, AC 65-9A • Airframe Handbook, AC 65-15A • Powerplant Handbook, AC 65-12A • 2009 FAA General Test Questions & Answers • 2009 FAA Airframe Test Questions & Answers • 2009 FAA Powerplant Test Questions & Answers • A&P Computer Testing Supplement • A&P Practical Test Standards • Weight & Balance Handbook • Corrosion Control • Nondestructive Testing for Aircraft • Ultrasonic Testing for Aircraft

AMT CURRICULUM GUIDE

Instructors and educators can borrow from extensive course outlines, graphics, color transparencies, and tests to create an efficient and engaging training curriculum for their AMT students. Based on the core curriculum from 14 CFR Part 147 Appendices B, C, and D, and covers every topic of the AMT Series. Comes with the AMT Prepware CD. Also includes the AMT Graphics—Textbook Images CD-ROM, now in full color, which contains all the illustrations, tables and photographs from the AMT Series as PowerPoint® slides. Suggested reference materials and study questions are also included for further lesson and quiz planning. 482 pages. P/N 13-06664

ASA AMT GRAPHICS CD

AMT Graphics Textbook Images CD-ROM contains all the illustrations and figures from the Aviation Maintenance Technician Series of textbooks by Dale Crane, for instructors' use in the classroom. The new PowerPoint® slides make it easy for instructors to create their own custom multi-media presentations to teach the principles the students are reading in the texts. P/N 13-06660

HOME STUDY FLIGHT INSTRUCTION

Useful at any level of experience, the Home Study Flight Instruction Program is excellent as a preflight instructional tool and as a refresher course. Compromising approximately two hours of professionally narrated, efficiently organized instruction, the course moves from an introduction, to the controls, to straight and level flight, through turns, climbs, takeoffs, emergency landings, approach procedures & emergency procedures CD P/N 13-02085..... Cassettes P/N 13-02086.....

THE RIGHT SEAT

The Right Seat is an excellent introduction to flying for pilots' companions and would-be pilots. Clearly explains in easy-to-understand text with illustrations: how the airplane flies, how the instruments work and how to read them, how to navigate, communicate, assist the pilot and what to do if anything should happen to the pilot. A perfect gift for your flying companion.P/N 13-02083

FLIGHT / WEATHER LOG

These flight and weather logs are Airguides exclusive form. Complete enroute flight log and space for copying clearances, a flight time record and a fuel management log. Space on the back to copy current weather in the same order given by Flight Service. Comes complete with instructions. P/N 13-02079

FLIGHT TIME PUBLISHING

A COMPLETE FLIGHT HANDBOOK FOR STUDENT PILOTS!

- Illustrated Flight Maneuvers
- Communications Guide
- Flight Planning Charts
- Emergency Procedures
- Step-by-step Cockpit Procedures
- Pilot/Controller Glossary
- Pre-Solo Written Exam
- Check Ride Preparation
- Complete Training Syllabus Included!

P/N 13-05738

BIENNIAL FLIGHT REVIEW - Complete BFR in one small package! This is by far the most concise and well organized flight review book on the market. It is full of checklists and handy procedures as well. Targeted for the aviator who wants to brush up on the rules and regs and get up in the air and have some fun! P/N 13-05739

INSTRUMENT FLIGHT REVIEW - A new shortcut to IFR Review! You can't beat this. This is the most incredible organization of IFR rules, regulations, tips and information available. Includes fully illustrated flight maneuvers and procedures, clearances, approaches, flight planning and more! P/N 13-05740

PILOT'S POCKET HANDBOOK - The next best thing to having that brain chip implant! An extremely useful collection of everyday aviation facts, figures and neat stuff! Includes a world time chart, aircraft country codes, math and conversions, standard and emergency checklist, abbreviations, ... get the idea? P/N 13-05741

PILOT'S RULES OF THUMB - Don't fly by the seat of your pants, use your Thumbs! Here is the only book of it's kind. This collection of helpful rules and tips is useful to barnstormer and jet fighter pilot alike. (I have personal second hand knowledge of a Northwest Airlines pilot that carries this book in her flight bag!) P/N 13-05742

PILOT TRAINING COURSES

PILOT TRAINING COURSES

PRIVATE PILOT COURSE - The experienced flight instructors at MS Aviation believe that the process of learning to fly should be engaging, easy to understand, entertaining as well as educational. The moment you begin the MS Aviation course, you'll discover what makes it better. Rather than reading and memorizing, all you do is watch, listen and learn. * 49 fully narrated lessons * 19 hours of entertaining course instruction * Instructional Flash animations throughout * Engaging 3D dynamic renderings * Weblinks, sample tests and exam study questions P/N 13-05764.....

INSTRUMENT RATING COURSE - When you're ready to upgrade to the Instrument Rating, MS Aviation has the course for you. Instrument Flying is serious business and getting the right training is important. The Instrument Rating Course takes you through 33 fully narrated lessons that use animations to better understand things like GPS theory and Use, ADF, VOR and Holding procedures. Preparing you for ALL of the ground knowledge, FAA written test and Checkride is what this course delivers. * 33 Fully Narrated Interactive Lessons * Over 40 Custom Animations * Video Tutorials make Holding and GPS easier to understand * Complete FAA Written Test Preparation * Checkride Preparation P/N 13-05765.....

COMMERCIAL PILOT COURSE - Becoming a Commercial Pilot is the first step in taking flying from a hobby to a career. Getting paid to fly gives a great sense of accomplishment. Completing your training with the Commercial Pilot Course will prepare you for all ground aspects of Commercial Pilot Training. 46 lessons will guide you through a structured learning environment that includes individual lessons, automatic reading assignments and integrated written exam preparation. In the last module of the course you'll be prepared for the oral portion of your checkride. In addition to the learning environment, you'll also have a complete Digital Library where you have a large assortment of training handbooks and advisory circulars complete with a FAR/AIM. Complete Pilot Training is what this course is all about. * 46 fully narrated lessons * Custom animations for you to use as part of the lessons * Quizzes and Stage Exams * FAA Knowledge Test Preparation * Checkride Preparation * Every book you'll need in our Digital Library * Advisory Circulars, Practical Test Standards and the Test Supplement Booklet * A complete course for the Commercial Pilot Student on a Single DVD-ROM P/N 13-05766.....

SPORT PILOT AIRPLANE COURSE - This course is designed to take you from zero through completing the sport pilot certificate. We made this course complete with all the ground training, FAA written test preparation and checkride preparation in a single package. Everything you need is included to be successful with all of the ground training for the sport pilot. This is the most complete course for the sport pilot available anywhere. 50 fully narrated lessons complete with our own custom animations, and automatic reading assignments make learning to be a sport pilot interesting and fun. Filled with lots of Flash Animations and Video Tutorials, this course prepares you to be a sport pilot! * 50 fully narrated lessons * Over 40 custom animations * Over 5 video tutorials making the E6B easy to understand * FAA written and checkride preparation P/N 13-05767.....

SPORT PILOT AIRPLANE TRANSITION COURSE - If you are transitioning from private to sport pilot then this course is for you. We cover all of the differences in rules and regulations, medical issues, light sport airplanes, systems and more all in an easy to follow format with our own custom animations. This course is fully narrated and makes understanding the sport pilot license easy. * Fully narrated lessons * Custom animations * Understanding the sport pilot privileges and limitations * A special lesson all about medical issues for sport pilots P/N 13-05768.....

USING THE GARMIN 530/430 - Learning using MS Aviation's 530/430 course makes it a snap. They've created a full course for VFR and IFR. They've also included reference material like the Pilot's manual, Syllabus, Quick reference and even the Garmin 530 simulator. All on a single CD-Rom. You'll watch over the shoulder of an experienced flight instructor as he shows you not only what buttons to press but the ideas and strategies behind them. They break down the GPS into simple to understand blocks of material so you can learn better, faster and get to really flying the GNS 530/430 as quickly as possible. You can even follow along button by button using the included 530 simulator. Just like all of our products this course is complete, using state of the art technology and preparing you for the real world of flight. P/N 13-05769.....

WEATHER FOR PILOTS - The subject of weather is usually a "weak link" in most pilots training so they made a course just on weather. This course includes weather theory and practical weather for pilots. Each lesson is fully narrated and most include great animations that you can interact with and use to see it all come together. For the pilot who really wants to gain a great understanding of weather this is your course. P/N 13-05770.....

FLASH ANIMATIONS FOR PILOTS AND CFIS - Tired of trying to be an artist but still want to create easy to understand illustrations of things like Engines, Weather, Airspace? What if you could make them interactive too. Maybe you want to show how a constant speed propeller works, or how to visualize holding entries. The package allows you to see thumbnail images of all of the 60 plus animations in a clean user interface. You just pick a main topic like Systems and mouse over all of the choices. A thumbnail appears to show you what the animation looks like. Click on the title and the animation loads complete with instructions on how to use it. You can resize the animations to anything you want. So it's ideal for teaching a ground school with the animation playing full screen or in a window with your presentation running with it. Pilots will find the animations engaging and will help them understand how things really work by seeing them work! The Virtual E6B and Virtual Plotter allow Flight Instructors to project these on a wall with the aid of a presentation projector (not included) to show students how to use them in real time. Ground schools will never be the same when you add our animations to your content! Those include: * ADF - How to use it * DME - Principle of Operation * VOR - Principle of Operation * Holding Patterns * GPS - Principle of Operation * Pitot Static System - Complete with System Failures * Heading Indicator * Attitude Indicator - 3D fully interactive * Turn Indicator - 3D P/N 13-05772.....

POWERFUL LEARNING: LEARNING & TEST PREP SOFTWARE

The only Learning and Test Prep software on the market that includes an integrated Aviation Library which can be updated online!

PRIVATE PILOT STUDY SYSTEM - For any pilot studying for his or her Private Pilot Certificate. This software has all of the tools you will need to learn what you need to know for your Private Pilot flight test and FAA Knowledge Test (airplane only). This software should be used from Day 1 of your flight and ground training right up until taking both your flight test and written exam. **Includes:** • The FAA Knowledge Test database. 12 additional question and answer databanks designed by Powerful Learning. • Online Updates for all question and answer databanks for the entire library. • Additional learning tools such as an Electronic Flashcard Mode. • All required chart files are included. In addition, paper charts can be ordered directly from Powerful Learning in the form of a Private Pilot/VFR Pilot Chart Kit. P/N 13-06074.....

VFR PILOT REVIEW SYSTEM - For any pilot who already has a Private Pilot Certificate. This software is designed specifically for pilots who already have their certificates and need to review important concepts. Whether you are preparing for a biennial flight review, don't fly too often, or haven't flown in a while; this software is just what you need. **Includes:** • 12 question and answer databanks that cover all of the areas you need to continue learning and prepare for a Flight Review. • A comprehensive, easy-to-navigate Aviation ReferenceLibrary. • Online Updates for all question and answer databanks and for the entire library. • Online courses delivered inside the learning environment! • All required chart files are included. P/N 13-06075.....

IFR PILOT REVIEW SYSTEM - This software is designed specifically for pilots who already have their instrument rating and need to continue learning and review important concepts. **Includes:** • 2 very comprehensive question and answer databanks. • A comprehensive, easy-to-navigate Aviation Library • Online Updates for all question and answer databanks and for the entire library. • Online courses delivered inside the learning environment! • Online courses delivered inside the learning environment! P/N 13-06243.....

INSTRUMENT PILOT STUDY SYSTEM - For any pilot studying for his or her Instrument Rating. This software has all of the tools you will need to learn what you need to know for your Instrument Rating flight test and FAA Knowledge Test (airplane only). **Includes:** • The FAA Knowledge Test database. • 9 additional question and answer databanks designed by Powerful Learning. • A comprehensive, easy-to-navigate Aviation ReferenceLibrary. • Online Updates for all question and answer databanks and for the entire library. • Additional learning tools such as an Electronic Flashcard Mode will make learning easy and help you pass your written test and oral with flying colors! P/N 13-06076.....

ASA FLIGHT TRAINING

ASA'S PRIVATE PILOT VIRTUAL TEST PREP

Brings the classroom to any home TV or computer Blu-ray player. Watch the Blu-ray disk material to learn the subjects, then use the included ASA Prepware Software to work through the questions, for a comprehensive aviation ground school. Graduation certificate and instructor endorsement (sign-off) available from ASA for no additional cost upon completion of the course.

Package also includes a bonus disk with over 2 hours of interviews, insights, and inspiration from some of the industry's leaders in aviation education, including Tom Horne, Barry Schiff, Bob Gardner, Paul Hamilton, Laurel Lippert, Steve Casner, Dorothy Schick, and Bruce Williams. These experienced aviators and notable subject experts also discuss their hard-learned lessons throughout the course, providing a very entertaining perspective and rare opportunity to watch and listen to these consummate aviators share their knowledge, wealth of experience and invaluable wisdom.

ASA VTP Ground School Widescreen P/N 13-06051
 ASA VTP Ground School Blu-Ray P/N 13-06052

ASA VIRTUAL TEST PREP SERIES IMAGES

Instructors, flight, and ground schools can add professionalism, organization, and clarity to the classroom with these PowerPoint® slideshows and animated graphics. The slides are categorized and labeled to make them easy to identify for the course and lesson instructors want to use. The graphics can be viewed as a slideshow presentation, or instructors can use individual slides in their own presentation. Over 3,500 slides are included from the Private (with brand-new slides included from the new Widescreen/Blu-ray editions of the Private DVDs), Instrument, Commercial, CFI, and Flight Instructor Refresher Clinic Virtual Test Prep courses, covering all these subjects: * Aerodynamics * Systems * Flight instruments * Regulations * Procedures and airport operations * Weather and weather services * Aircraft performance * Enroute and airspace * Navigation * Communication * Arrival and approach * Instruction fundamentals * Maneuvers * Physiology P/N 13-06413

ASA INSTRUMENT PROCEDURES TUTORIAL

Visualization simulator and instrument procedures tutorial (software plus manual). Gain a mind's-eye perspective by viewing cockpit instrumentation, approach plate, and overhead map simultaneously! 1. to form a mental image of 2. to make perceptible to the mind or imagination 3. the act of creating a mental image that is similar to a visual perception. A complete how-to system on instrument flight, navigation, procedures, emergencies, and more, featuring a comprehensive 4-hour software tutorial and a full-color manual. It's the perfect complement to any instrument training curriculum or refresher for instrument-rated pilots. Students, instructors, virtual aviators, and even experienced pilots. P/N 11-06625

ASA CHECKLIST FOR SUCCESS CD -
 VIRTUAL INTERVIEW PREPARATION

Interactive training program provides examples of common interviewing mistakes along with the correct presentation scenarios; guides you through self-evaluation, offers extensive explanation on handling problem areas; provides examples of interview attire and paperwork presentation. Macintosh and Windows compatible. (Please note: This is a training companion to Checklist for Success. This is not Checklist for Success in CD-ROM form.) P/N 13-05842

ASA FLIGHT INSTRUCTOR REFRESHER CLINIC DVD

ASA FLIGHT INSTRUCTOR REFRESHER CLINIC DVD

An FAA-approved flight instructor renewal program, featuring DVD lectures and internet evaluation for an engaging, comprehensive and innovative learning experience. This course includes these important features: * Experienced instructors provide engaging lectures that coach participants in scenario-based instruction with real-world examples. * 3D graphics, animations and inflight footage ensure participants understand the information and can teach it effectively. * Convenient at-distance course brings the classroom to the home or office and lets instructors renew their certificate at their own pace, and in the comfort and privacy of their own place. * DVD instantaneous control lets participants pause, back up, or navigate directly to a specific discussion within a lesson. P/N 13-05831

ASA HELICOPTER FUNDAMENTALS-DVD

The Virtual Test Prep DVD Series provides a comprehensive aviation ground school to prepare pilots for the FAA Knowledge Exam and help them become better, safer pilots. Makes explanations come to life with in-flight demonstrations and the latest 3D animated graphics. Supplements the airplane Virtual Test Prep ground school courses. Complete both the airplane and helicopter courses to prepare for private pilot, instrument rating, commercial pilot, or flight instructor (CFI) FAA Knowledge Exams. Used together, the courses provide everything needed to ace the Helicopter FAA Knowledge Exam. P/N 13-05828

TRAIN LIKE YOU FLY: A FLIGHT INSTRUCTORS GUIDE TO SCENARIO-BASED TRAINING

Trains pilots based on scenarios instead of tasks. The book covers a broad range of topics in its 200-plus pages. These include an introduction and definition of scenario-based training, how to redesign a syllabus to include this method of instructing, how debriefing and evaluation differ with SBT, using weather in SBT, and a step-by-step guide to how SBT can be incorporated into training. There are chapters on instrument training, advanced training, and CFI training using scenarios. Throughout the book are useful tools, such as risk assessment checklists, debriefing forms, and syllabus suggestion is. McMahon also recognizes the abundance of advanced technology in today's training fleet Aden suggests ideas on how to incorporate those tools into training. Autopilots, for example, are presented as an aid, and not just a piece of dead weight through private training. P/N 13-06237

ASA FLASHCARDS

Flashcard Study Guides help to develop and maintain a solid core-knowledge of the rules and regulations that are a part of a pilot's daily life. Designed to be easy to pack and carry, flashcards provide pertinent regulatory questions with detailed answers and references for further study.

FLASHCARDS FOR FAR - A Useful Study Aid. Keep your cockpit skills sharp and prepare for that important test, checkride or interview! Updated to include the latest rules and operating procedures as well as Sport Pilot and Light-Sport Aircraft questions. The FAR Flashcards set provides 112 practice questions from FAR Parts 1, 61, and 91. P/N 13-05850

FLASHCARDS FOR AIM - A Useful Study Aid. Keep your cockpit skills sharp and prepare for that important test, checkride or interview! The AIM Flashcards set contains 92 practice questions from the Aeronautical Information Manual (AIM). P/N 13-05851

FLASHCARDS FOR ATP - Prepare for exams, checkrides, and interviews! Questions for Parts 119, 121, and 135 operations. Updated to include the latest rules and operating procedures for airline operations. The Flashcards for ATP set provides 80 practice questions from 14 CFR Parts 119, 121, and 135. P/N 13-05852

ASA HELICOPTER ORAL EXAM GUIDE

A supplement for helicopter pilots; requires corresponding Oral Exam Guide for proper study. This book prepares pilots for the oral portion of their Helicopter Checkride for Private, Instrument, Commercial, Flight Instructor, and ATP. Helicopter pilots can now use this guide and the corresponding OEG book to get the rotary-wing knowledge specific to their training needs. Softcover, 184 pages. Prepares applicants for their oral exams with FAA examiners. Using a question-and-answer format, each guide lists the questions most likely to be asked by examiners and provides succinct, ready responses. P/N 13-05853

ASA VISUALIZED FLIGHT MANEUVERS HANDBOOKS LOW WING

Traditionally known as the "red maneuvers book," this handbook is one of a series that has been the standard of the industry for more than 40 years, and complies with current practical test standards and regulations. This Second Edition of ASA's Low-Wing version of the Visualized Flight Maneuvers series is an excellent learning and teaching aid for instructors and students. It covers all maneuvers for Private, Commercial, and Flight Instructor Certificates — including the new maneuvers from the 2002 Practical Test Standards: steep spirals, and the 180-degree power-off approach. P/N 13-05854

ASA HELICOPTER STUDENT PILOT KIT

Helicopter Student Pilot Kit Includes: * Rotorcraft Flying Handbook * Principles of Helicopter Flight, by Wal Wagendonk * Principles of Helicopter Flight Syllabus * Private Pilot Test Prep * FAR/AIM book * Private Rotorcraft Practical Test Standards * Private Oral Exam Guide, by Michael Hayes * Helicopter Oral Exam Guide, by Ryan Dale * Standard Pilot Logbook in black * Ultimate Rotating Plotter * Fiberboard E6-B Flight Computer * ASA Briefcase P/N 13-06414

SPORT PILOT TEST PREP

In the book you get the information you need so you come into the checkride prepared: the required training, experience, and instructor endorsements. The questions most likely to be asked during the oral portion of the exam, supporting them with succinct, easy-to-grasp answers. He provides practical checklists and techniques to use when demonstrating your skills to the examiner. The DVD compresses a typical four-hour practical test into an engaging 78-minute presentation. Recommendations you can use during your own checkride. When the book and DVD are used together, pilots will find these products indispensable for mastering the Sport Pilot Checkride.

Accelerated Aviation Training, was founded in 1986 to help Canada's pilots at all levels of licences and ratings prepare for their written exams with our accelerated exam prep seminars held at our YVR airport pilot training centre. We have been continuously publishing Culhane training manuals and supplying Canada's aviation training industry with our aviation texts and exam guides since 1988.

Culhane aviation training books are currently used nationwide by aviation students at most flying schools and clubs in Canada, and at Canadian aviation colleges and universities, for ground school and flight training courses and seminars for the Private Pilot Licence, Recreational Pilot Permit, Night Rating, Commercial Pilot Licence, Integrated Commercial Pilot Licence, Instrument Rating, Flight Instructor Rating, IATRA Type Rating, Airline Transport Licence - Aeroplane, Private Pilot Licence - Helicopter, Commercial Pilot Licence - Helicopter, Instrument Rating - Helicopter, and Airline Transport Licence - Helicopter. Our ownership of Culhane manuals has permitted us to become the leading Canadian publishers of aviation self study training courses and referenced simulated exams, for both fixed wing and rotary wing pilots. We also offer training products and courses for Canadian Aircraft Maintenance Engineers and Flight Dispatchers.

JEPPIGUIDE AIRPORT MANUALS

The JeppGuide manuals offer several features not found in other airport manuals. Each features only one airport so the airport diagram is larger and easier to read. Included for each airport are taxiway names, FBO and restaurant locations, exact placement of windsocks and pay phones, FSS frequencies, FBO services, car rental and lodging information, and distances and radials from surrounding VORs. Each manual is over 640 pages and comes in a handsome binder. Includes 2 free updates. JeppGuide pages fit Jeppesen binders perfectly. The following JeppGuides are available:

| Description | Part No. | Price |
|------------------------------|----------|-------|
| Jepp Guide Western | 3927 | . |
| Jepp Guide For Southeast | 13-17501 | . |
| Jepp Guide For South Central | 13-17502 | . |
| Jepp Guide For North Central | 13-17500 | . |
| Jepp Guide For N.E. Ausrad40 | 13-17503 | . |
| Jepp Guide For Great Lakes | 13-17504 | . |

FLIGHT GUIDES

Flight Guide is the nation's leading VFR airport and frequency manual providing detailed airport diagrams showing, runway direction & length, taxiways & their identifiers, FBO locations, fuel, & parking areas. Its useful-at-a-glance format lists, navigational & communication frequencies, flight operational information, FBO hours & services, restaurants, lodging, transportation, recreational information, pertinent phone numbers and even free pickups and discounts. Flight Guide also provides a handy detailed graphic for every Class B, C and selected D areas, showing boundaries, altitudes, visual checkpoints, cities, roads, terrain, bodies of water, tower instructions, Nav aids, VFR corridors, flyways and transition routes. Three loose-leaf compact manuals (5 fl x 5 1/2) cover 48 states and contain nearly 5000 airports. Includes two free semi-annual standard revisions.

Western Manual covers 11 states P/N 13-07700.....

Central Manual covers 15 states P/N 13-07750.....

Eastern Manual covers 23 states P/N 13-07800.....

PAGE MARKERS

Instantly locate a desired airport. Tough multi-colored vinyl page markers snap easily into Vol I, Vol II, & Vol III Flight Guide books to mark desired pages and allow you to flip to them quickly during flight. Set of 3 (different colors) P/N 13-02078

PAGE PROTECTORS

Now available for your Flight Guide: transparent vinyl page protectors, custom-made to fit Flight Guide pages. Just insert an airport page into one of these sturdy page protectors to prevent wear and especially tear-on frequently used pages.

4-1/2 x 5-1/4, (set of four) P/N 13-02077

BLANK & NOTE SHEETS

Handy blank sheets and lined note sheets, cut and drilled to fit your Flight Guide binder. Now you can keep your notes or other pertinent information right in your Flight Guide for easy reference. Space in your binder is tight, so we suggest you consider the purchase of an additional binder for states you don't use; this will free up room in your primary binder for blank & note sheets. Pads of 200 sheets.

Blank P/N 13-02089

Note P/N 13-02090

GPS & ROUTE LOGS

Custom-Made for Flight Guide Now available, handy pre-printed log sheets for entering GPS way points and frequently used routes. These useful log sheets are especially cut and drilled to fit in your Flight Guide binder. Pads of 200 sheets

GPS P/N 13-02087

ROUTE P/N 13-02088

OSHKOSH TOWER/AIRCRAFT RADIO COMMUNICATIONS

The audio tape/CD depicts the Oshkosh tower/aircraft radio communications with 28 aircraft per minute landing at the Oshkosh annual fly in. These tower communications were made from official FAA recordings back in the days when incoming aircraft were landing simultaneously with the experimental aircraft taking off and landing in a tight pattern by airport. A practice that has been used for many years. Therefore these tower/aircraft conversations probably represent one of the most exciting 45 minutes of aircraft tower communications ever made.

Cassette P/N 13-04247

CD-ROM P/N 13-04248

PILOT GUIDES & BOOKS

PILOT GUIDES

PILOTS GUIDE TO CALIFORNIA AIRPORTS - Pilot's Guide to California Airports may be the most helpful airport directory available. It contains very complete information on airports and their areas, and includes aerial photos of "tower" airports, with outstanding illustrations of each area. Comes in a 3-ring binder. Measures 6"x9". Revised three times a year. P/N 8853.....

PILOT'S GUIDE TO S. WESTERN AIRPORTS - A complete guide with airport diagrams, aerial photographs, businesses, services, lodging, points of interest and much more for tower and uncontrolled airports in AZ, CO, NV, NM, and UT. An excellent guide for all pilots flying in the Southwest. Revised 3 times a year. P/N 8648

PILOT'S GUIDE TO N. WESTERN AIRPORTS - Pilots Guide features all public-use airports in Idaho, Montana, Oregon, Washington and Wyoming. 5 pages for each tower airport include an airport photo, a fold-out approach map showing VFR reporting points, airspace, and terrain features, and a detailed airport surface map. Non-tower airports have a half page with similar comprehensive detail. The Northwest Guide has more than 400 pages with over 800 photographs, maps and diagrams. 5.5" x 8.5" pages, 7.5" x 9"x1.75" green vinyl binder. Price includes first year of revision service. Revised 3 times a year. P/N 13-08648.....

PILOT GUIDE NYLON CASES
Here's the perfect way to keep all your important flying aids together in one place: charts, plotter, pens, pencils, notes, and of course - Pilots Guide protected in a durable nylon binder with a zipper closure all the way around. A handy pull strap makes it easy to grasp the zipper. Colored pull-straps are available to help identify which Pilots Guide is inside: blue for California, green for Northwest or orange for Southwest. Attractive and durable ballistic nylon cover. Its textured surface will help prevent your Guide from sliding off your lap while in flight. Pocket on the outside back cover that holds up to four charts. Also two pen sleeves and pockets for notes or other papers on the inside. A rugged 7-ring metal holds pages tight and prevents hole tear-outs. Note: Pilot Guides not included. Case Only.

PILOT GUIDE PLASTIC INDEX TABS

Each set has five tabs, every one a different color. The tabs fit Pilots Guide to California Airports, Pilots Guide to Southwestern Airports, and also Jeppesen Airway Manuals. They fit into your Pilots Guide without needing to open the rings. P/N 13-04970

PILOT GUIDE VFR CHART RULER

Features scales for Sectionals, WACs and Terminal Area Charts. See through the ruler to local important points along your route. VFR cruising altitudes (Hemispheric Rule) and conversion tables for Nautical to Statute miles and Celsius to Fahrenheit temperatures. 9 3/8" x 2" clear plastic. Scales: Terminal Area: 30nm, Sectional: 60nm, WAC: 120nm. P/N 13-04971

SEAPLANE, SKIPLANE, & FLOAT/SKI EQUIPPED HELICOPTER OPERATIONS HANDBOOK - This operational handbook introduces the basic skills necessary for piloting seaplanes, skiplanes, and helicopters equipped with float or skis. It is primarily intended to assist pilots who already hold private or commercial certificates and who are learning to fly these aircraft types. Also beneficial to rated seaplane pilots who wish to improve their proficiency, pilots preparing for flights using ski-equipped aircraft, and flight instructors engaged in the instruction of both students and transitioning pilots. The book introduces the future seaplane or skiplane to the realm of water operations and cold weather operations, and provides information on the performance of procedures required for the addition of a sea class rating in airplanes. P/N 13-03470

A PILOT'S GUIDE TO AIRCRAFT & THEIR SYSTEMS
- Pilots must understand what each handle or knob controls and what he or she can expect from each system. This book furnishes pilots and armchair aviators with explanation and insight into what the aircraft powerplant and each of the system do. Soft Cover, illustrated, 320 pages, indexed. P/N 13-02422

WESTERN U.S. PILOTS GUIDE - This beautiful directory is the aviation travel guide to must see destinations in the 11 western states. Over 223 airports in the 11 Western states are included each with color aerial airport photographs. There are more than 400 pages of airport travel photos, hotels, recreations, maps, & more. Covers Arizona, California, Colorado, Idaho, Oregon, Montana, Nevada, New Mexico, Washington & Wyoming. P/N 13-00765

BAHAMAS & CARIBBEAN PILOT'S GUIDE 2007 - The 2007 Bahamas & Caribbean Pilot's Guide has color photographs of every airport, maps, pilot information, customs and immigration, hotel and recreation phone numbers, a survival section, approach plates, U.S. section...don't fly the islands without a current copy! P/N 13-00397

BAHAMAS/CARIBBEAN VFR CHARTS - The Bahamas Chart includes U.S. data as well as points of interest, high and low water, and a Caribbean Planner. The Caribbean Chart covers Puerto Rico south to Aruba, Bonaire and Curacao (the U.S. charts end at Guadeloupe). The FIR boundaries are shown - a must for travelling to the Caribbean!
Bahamas VFR chart.....P/N 13-02216

PAD OF DECLARATION FORMS - If your itinerary includes more than a few Caribbean islands, you'll want a pad of General Declaration forms. All white no-carbon-required forms make it convenient to complete as many Gen Dec's as you want, quickly.
Pad of 100.....P/N 13-02219

FORMS KIT - Be prepared. Get copies of all the US forms and all the Bahamian forms, including Immigration cards. Make copies and you'll never run out. Save time and fill out your name & address, etc. before making copies.P/N 13-02221

ACUKWIK NORTH AMERICAN AIRPORT/FBO DIRECTORY

The industry's original directory for connecting flight planners to aviation service providers for over 25 years. This annual publication provides airport, FBO, ground transportation, charter, caterer, handlers, and maintenance listings for the United States, Canada, Mexico and the Caribbean.

| Description | Part No. | Price |
|--------------------------------|----------|-------|
| Acukwik North American Edition | 13-06384 | .. |

| Acukwik International Edition | 13-06385 | .. |

FLIGHT OF VOYAGER CD (DICK RUTAN) - This is a recount of the horrific, horrendous, heroic and humorous moments of the Voyager project through the eyes of the pilot Dick Rutan. On December 14, 1986 Voyager took off from Edwards AFB in California and 9 days later landed at the Edwards, completing the first ever non-stop, unrefueled world flight. This 3-CD set (3.5 hrs) includes a mini journal map of the flight, historic photos, fun facts, and more. P/N 13-01163

AIRPORTS OF MEXICO - First compiled by Baja Bush Pilot founder Arnold Senterfitt, Airports of Mexico is based on hundreds of hours of flying throughout Mexico. Rewritten by Jack McCormick, this new 20th edition includes both Baja and mainland Mexico, features over 1100 airports/airstrips, all seaports and heliports, border crossing information, all international airports, information on flying in Mexico, discounts on hotels, Mexican insurance, group trips and fees. Over 150 airports are fully diagrammed and are listed alphabetically. All in a convenient light weight, smaller, snap-ring binder designed for easy to use in the cockpit. A must for every pilot flying trips to Mexico. P/N 13-01028.....

PILOT'S GUIDE TO MEXICO'S YUCATAN PENINSULA

Obtaining verified and accurate information on procedures for flying private, general aviation aircraft and on airports in Mexico can be a challenge. Therefore, with the support of Mexico's Civil Aviation Department, this Pilot's Guide will provide you with an additional source of information to supplement official navigation sources. The data in the guide was obtained from years of meetings with Mexico's Civil Aviation Department, Mexico's Aeronautical Information Publication (AIP), meetings with local aviation and government officials and from 15 years of experience in Mexico and visits to each airport in the guide. The 2008 Pilot's Guide compiles applicable and current information on U.S. and Mexican regulations and guidelines that apply to U.S. aircraft on private, and international flights from the USA to Mexico. P/N 13-06078

SPORT PILOT TRAINING

ASA SPORT PILOT KIT

Sport Pilot Kit Includes: * Pilot's Handbook of Aeronautical Knowledge * Airplane Flying Handbook * Sport Pilot Syllabus * Sport Pilot Test Prep * Sport Pilot Practical Test Standards * Sport Pilot Checkride book * Sport Pilot Logbook * Ultimate Rotating Plotter * Fiberboard E6-B Flight Computer * ASA Briefcase
P/N 13-06416.....

ASA

SPORT PILOT: CHOOSING THE LIGHT-SPORT AIRCRAFT THAT'S RIGHT FOR YOU - This DVD production and booklet compare the LSA types as well as their ultralight cousins to help pilots make a truly informed decision on which light-sport aircraft is right for them. It explains what ultralights and LSA are, provides parameters to evaluate the viewer's situation and factors to consider (including cost, athletic ability, previous aviation experience, time to learn, transportation, storage, and airfield options), and provides an overview and introduction to each of the light-sport aircraft types. Includes beautiful full-color booklet with aircraft photo and comparison tables. Total running time 00:41:00.....P/N 13-03467.....

PRACTICAL TEST STANDARDS: SPORT PILOT - This is ASA's Sport Pilot Practical Test Standards for Airplane, Weight-Shift Control, Powered Parachute and Flight Instructor. The FAA Practical Test Standards are used by instructors, students, and examiners to prepare for, review, take, or issue the checkride. Includes both the FAA-S-8081-29 for Airplane and FAA-S-8081-31 for Weight-Shift Control and Powered Parachute (effective December 2004), applicable to both Sport Pilots and Sport Instructors. 296 pages.
P/N 13-05855.....

SPORT PILOT DVDS FROM ASA - Two new DVDs by sport pilot expert Paul Hamilton are available that explore the flying of light sport aircraft. Preflight a Fixed-Wing Light-Sport Aircraft for Sport Pilots takes pilots through the preflight inspection of a light sport aircraft (LSA). Be a Sport Pilot: Learning to Fly a Fixed-Wing Light-Sport Aircraft takes the lessons a step further by introducing the pilot to what it takes to obtain a sport pilot certificate. Hamilton and instructor Jeff Reynolds discuss pilot training, from first flight to solo to sign-off. The two DVDs are available separately or in a kit that also includes Weather to Fly for Sport Pilots and the Sport Pilot Logbook
Learn to Fly DVD..... P/N 13-04191.....
Preflight Fixed Wing DVD..... P/N 13-04192.....
Fixed Wing Sport Pilot..... P/N 13-04193.....

WEATHER TO FLY FOR SPORT PILOTS WITH PAUL HAMILTON - Sport pilots fly lower and slower than General Aviation pilots. As a result, weather plays a critical factor in flying. The straightforward and beautiful presentation features time-lapsed cinematography of cloud formations, in-air footage, and animations. This DVD simplifies complex weather concepts as well as illustrates consequences of pilot judgment, in a 5-step system specific to Sport Pilots and light-sport aircraft operations. Pilots will learn to forecast local conditions, interpret weather information accurately, make better decisions about "whether to fly", and learn to recognize trends. Includes booklet with worksheets for an interactive learning experience. Companion product to ASA's Sport Pilot Logbook (ASA-F2F-LOG). Total running time 01:20:12.P/N 13-03468.....

SPORT PILOT TEST PREP 2009 - includes all the FAA questions and answer stems, supported with explanations, references, and FAA subject codes. Chapters are organized by subject with introductory text and clarifying illustrations for efficient study. Also features Sport Pilot Certificate requirements, test-taking tips, and cross-references to aid further study in the source material. The FAA Computer Testing Supplement is bundled with every test book.
Sport Pilot TestPrep..... P/N 13-03450.....
CFI Test Prep..... P/N 13-03435.....

SPORT PILOT CERT. MATERIAL 2009 - Questions are supported by study guides and comprehensive explanations for correct and incorrect answers. Instructors can create pop quizzes of any length, on any subject matter, to supplement the study sessions. Each Prepware title includes all aircraft categories (airplane, rotorcraft, glider, lighter-than-air, powered parachute, weight-shift control). You tell the software which test you're preparing for, and it generates your study sessions and practice tests accordingly. Version 10 includes the new FAA Knowledge Exams released June 25, 2007.
Sport Pilot Prepware..... P/N 13-03451.....
CFI Prepware..... P/N 13-03436.....

SPORT PILOT LOGBOOK - Specifically designed for all Sport Pilots who fly ultralights and light-sport aircraft including hang gliders, paragliders, powered parachutes, trikes (weight-shift control), and fixed wing (three-axis control) aircraft. 7.25" x 5.25", 98 pages.
P/N13-03385.....

GLEIM

SPORT PILOT FAA KNOWLEDGE TEST - Questions, Answers and explanations.....P/N 13-03445.....

SPORT FLIGHT MANEUVERS - Standards and Oral Exam Guide..... P/N 13-03446.....

SPORT SYLLABUS - Complies with both Part 61 and Part 141 training requirements. Complete ground and flight training with step-by-step lesson plans
P/N 13-03447.....

SPORT PILOT FAA KNOWLEDGE TEST PREP SOFTWARE -P/N 13-03448.....

SPORT PILOT KIT - Gleim's Sport Pilot Kit is designed to help expedite training for the sport pilot certificate. Contains everything you need (except airplane and instructor) Offers an all-in-one package at an affordable price. Save money by purchasing all required materials together..
P/N 13-03449.....

SPORT PILOT AIRPLANE GUIDE

SPORT PILOT Airplane: A Complete Guide provides an in-depth understanding of light-sport aviation complexities. Clarifies points commonly misunderstood, provides a wealth of information on subject such as Selecting an Aircraft, Pilot and Aircraft Certification, Weather, Flight Principles, and more. Includes 256 pages with illustrations, photos, or graphs on nearly every page. The material presents the experience of thousands of flight hours and contains valuable lessons for all pilots and would-be pilots..... P/N 13-03798.....

ASA ROTAX 912 ENGINE INTRODUCTION

This DVD by Paul Hamilton introduces the use and maintenance on Light-Sport Aircraft (LSA) of the ROTAX 912 engine. Many engine problems seen in the field are preventable with proper operation and maintenance and the 912 is no exception. This DVD is particularly useful to maintenance professionals, pilots and flight instructors operating ROTAX-powered Light Sport Aircraft. Answers frequently asked questions based on years of operational and maintenance experience and outlines typical procedures every owner, operator and mechanic should know. This DVD is the only one of its kind in the rapidly growing LSA market, and it caters to the do-it-yourself experience of flying this category of aircraft..P/N 13-04747.....

COMPLETE IDIOT'S GUIDE TO SPORT FLYING

The Complete Idiot's Guide to Sport Flying is categorized into four parts; on-the-ground basics (ground school, federal aviation regulations, aerodynamics); into the wild blue yonder (what you will learn during flight instruction, tips for passing the knowledge test); expanding your horizons (what you can and cannot do with a sport pilot certificate, and how to add privileges); and choosing your sport plane. This last section is particularly helpful for those of us still puzzling over the differences among new light-sport aircraft, classic production aircraft that qualify under the LSA category, experimental, and homebuilt.
P/N 13-03740.....

SPORT PILOT ENCYCLOPEDIA

Can be used three ways: 1) SP Prep = full immersion rapid prep for the written, 2) SP Encyclopedia = thorough review of relevant FAA publications essential to both the written and the oral exams, and/or 3) both as entertaining and informative leisure reading. The narrative is laced with humor, personal anecdotes, and frank sometimes blunt language that keeps the reader alert and involved while feeling secure and comfortable as if in the company of an experienced friend and mentor. Actual NTSB accident reports are woven into the discussion. P/N13-03706.....

ASA START FLYING! DVD

Understand what's involved in learning to fly with this informational DVD. Encourages would-be fliers by providing answers to frequently asked questions about flight training. Perfect for anyone interested in earning a pilot's license, student pilots, and pilots who are upgrading to advanced ratings.
P/N 13-05758.....

FLIGHT TRAINING MATERIAL

FLIGHTPREP VIDEO COURSES FOR FAA KNOWLEDGE TESTS

Each FlightPrep video course has everything you need to ace your FAA Knowledge Test. Each course contains from 5-10 hrs of video, a course book, practice exams, all current FAA questions along with explanations and correct answers, an instructor sign-off, and a graduation certificate suitable for framing. FlightPrep courses are organized in concise easy-to-follow lessons. Each concept is explained in detail using actual FAA knowledge test questions. All lessons contain 'watermarks' allowing for a quick review and a recap with recommended FAA practice questions ensuring that you have mastered the important subject matter. The instructor team, with more than 95 years of combined experience, is headed by Dr. Roger M. Stenbock CFII. Concepts are explained on-screen, employing the renowned 'chroma key' technique using large 3D graphics and special effects. This personal approach results in an exciting and interesting course which ensures you'll not only learn the required material, but have fun in the process. The real world air-to-air video, shot in & out of the cockpit, gives you a pilot's eye point of view. You'll not only gain complete and thorough knowledge of what the FAA wants you to know, but also the insight you need to be a better prepared pilot. Each course includes 90-day access to the interactive flightprep.com internet ground school for the particular rating which you are studying. This interactive ground school assures you will always study with all the latest FAA questions, answers, explanations, & graphics.

Instrument Pilot Course - Includes five 120 minute VHS tapes, plus 90-day flightprep.com access P/N 13-01325

Commercial Pilot Course - Includes four 120 minute VHS tapes, plus 90-day flightprep.com access P/N 13-01326

Flight Instructor Course - Includes six 120 minute VHS tapes, plus 90-day flightprep.com access P/N 13-01327

AIRBORNE WEATHER RADAR TRAINING VIDEO SET

This video program was originally developed by Archie Trammell for American Airlines, and since 1979 has been used by most US based major airlines, US Military, corporate flight departments, and FAA & NASA. The 4 part single video cassette discussion is backed up with photos of actual weather as seen on radar, plus charts, graphs & illustrations. Also included is a 137pg course guide, weather books, and an Airborne weather radar pilot's operating guide. If you want to know how to effectively interpret your airborne weather radar data, this course is for you. P/N 13-00156

ASA VIRTUAL TEST PREP

Aviations most exciting new aviation ground school for DVD-Virtual Test Prep. Now students can learn the material they need right from their TV or RC DVD player by taking advantage of these latest developments in video production education • Up to 10 hours of quality video instruction on 5 disks • Works on TV and computer DVD players, take interactive quizzes by using your TV remote! • Excellent air to air video footage • Meets 14 CFR Part 61 home study requirements • Includes Test Prep book and Computer Testing Supplement with all FAA questions, answers, explanations, & figures • Instructor sign off available.

Instrument Pilot Course..... P/N 13-01961
Complete Advanced Pilot..... P/N 13-01714

ASA COMMUNICATION TRAINER SOFTWARE

Say Again, Please is an invaluable tool for students who want to practice before their flights, pilots with rusty communications skills, those who rarely fly into heavy airspace, and those who want to sound like a pro! Learn how ATC and your radio equipment works, and learn what to say and what to expect to hear and how to interpret clearances and instructions. P/N 13-02054

GLEIM FLIGHT ENGINEER TEST CD

Gleim's FAA Test Prep contains everything you need to study for the Flight Engineer (FEX) FAA knowledge tests in one unique, easy-to-use program. Create customized study and test sessions using the actual FAA airmen knowledge test questions to enhance your learning process. The Performance Analysis feature allows you to track your progress and focus on specific areas needing further study.

FLIGHT TRAINING – MAINTENANCE DVDS

KING VIDEO TUTORIALS - DVD

THE COMPLETE AIRSPACE REVIEW - DVD - Thoroughly covers the FAA's international alphabet soup of airspace requirements—classes A through G, plus TRSAs, etc.—and converts it to easy-to-understand information. You'll actually see on-screen how the alphabet airspace system is designed—and what each class means to you. You'll learn a foolproof, fun way to remember specifics about each class of airspace. You'll also review other kinds of airspace you should know about—Special Use Airspace, Controlled Firing Areas, Military Training Routes, Temporary Flight Restrictions, Special Conservation Areas and more. P/N 13-40275

VFR FLIGHT REVIEW COURSE - DVD - Covers the most critical & the newest FAA regs. Insider tips on how to avoid being in violation (maybe you already are), & the best way to avoid a penalty, even if you're caught in violation. Communications - Demystify tower talk and feel in control on the radio. The Complete Airspace Review - Know how to use the airspace to your advantage stay safe and legal in this complex system. Thoroughly covers the FAA's international alphabet soup of airspace requirements classes A through G, plus TRSAs, etc. and converts it to easy-to-understand information. P/N 13-40236

VFR REGULATIONS REFRESHER - DVD - KING's Regulation Refresher courses get you up to speed on the latest FAA regulations before your BFR! Sorts through the FAA regulations arsenal for you, reviews all of the critical IFR regs, covers key potential penalty areas and ways to avoid violating them. P/N 13-40216

MANEUVERS FOR THE COM/CFI - DVD - Maneuvers for COM / CFI Pilots point-of-view video and animated graphics combine to teach you lazy-eights, chandelles, eights-on-pylons, and other advanced maneuvers. Step-by-step, you'll learn how to set up optimally for each maneuver, properly coordinate pitch, power, bank angle and rudder ... and how to avoid or correct common errors—techniques that will help make you the obvious master of your aircraft. P/N 13-40185

TAKEOFFS & LANDINGS MADE EASY - DVD - Takeoffs and Landings Made Easy With this course you'll change takeoffs and landings from a trial to a joy. You'll impress your passengers (and yourself) with flawless takeoffs and landings even in stiff crosswinds. You learn how to see at a glance whether you're too high, too low or off to one side and you'll gain the tools you need to put yourself right back on the rail. You'll even learn how to recover gracefully from the rare botched flare or touchdown. When you're done you'll be one of the countless KING students who say, "I learned to land by watching your course." P/N 13-40175

TAMING STALLS & SPINS - DVD - You'll quickly learn what causes a stall ... how it can transition to a spin ... how to instantly recognize & avoid situations that might result in loss of control ... & steps to take in the event you find yourself in a stalled condition. Dramatic in-flight video compellingly demonstrates the aerodynamics of stalls & spins during everyday flight. A "must" for every pilot—regardless of your experience. P/N 13-40164

IFR WITH CONFIDENCE - DVD - This course is jam-packed with solid information for your Instrument rating. Learn how to deal with the most difficult IFR conditions—and how to avoid the pitfalls for the unsuspecting pilot. Invaluable tips about when to be especially suspicious about the weather. The smart way to pick your IFR alternate airport ... and why you may not be getting the terrain clearance you think you are on many IFR departures. Includes hints every pilot can use for that tricky transition back to visual flight references after a tight approach. P/N 13-40155

WEATHER WISE - DVD - Learn how to make practical, real-world use of weather information to interpret weather data accurately & form a mental picture of the conditions affecting your flight. Understand the dynamics of fog, ice, thunderstorms, pressure patterns, and frontal systems. Know how to accurately plan your fuel. Know when to trust the forecast ... and when not to and how to make smarter decisions in the toughest IFR conditions. P/N 13-40130

COMMUNICATIONS - DVD - Demystify "tower talk" & feel in control on the radio. Through real-world communications with actual controllers you'll learn first-hand proper communication procedures, techniques to use in every class of airspace, & how to get the cooperation you deserve from ATC. Radio call-up procedures, correct radio terminology, and how to use your radio for increased safety and utility are all there. A wealth of pointers on issuing clear and professional communications. P/N 13-40125

AIRFRAME TOPICS

| Airframe Topic | Part No. | Price |
|--|----------|-------|
| Aircraft Corrosion Control Parts 1 & 2 Identification, treatment, and prevention of 8 types of corrosion and a corrosion control program | 13-03871 | . |
| Non-Destructive Inspection - An introduction to NDT, six processes discussed and demonstrated | 13-03872 | . |
| Aircraft Wheels and Brakes - Introduction to large aircraft wheels and brake systems, plus FAA approval process | 13-03873 | . |
| Advanced Composites - Characteristics and use of advanced materials such as kevlar, carbon fiber, graphite, boron, etc. | 13-03874 | . |
| Fiberglass 101 - Basic layouts and molded fairings demonstrated on an experimental RV-4 aircraft | 13-03875 | . |
| Composite Structure Awareness - By Boeing - handling procedures of composite aircraft parts, damage scenarios, damage tolerance | 13-03876 | . |
| Eyes of Flight - Plexiglass - 1950's training film, but still good info on the repair and maintenance of canopies and windscreens | 13-03877 | . |
| Repairing Structural Tubing - 1950's training film, bending, splicing, and welding to repair fuselage damage | 13-03878 | . |
| Aircraft Painting 101 - Painting techniques on metal and fiberglass - emphasis on prep work and paint booth construction. VHS ONLY | 13-40369 | . |
| Aviation Grease - By Shell Oil - how grease works, different greases for different applications, handling of greases | 13-03879 | . |
| Damage Tolerance - How aircraft structures are built to withstand aging, and how sloppy maintenance degrades that ability | 13-03880 | . |
| Inspection of Ultralights - Demonstration on extensive pre-flight inspection of a Quicksilver ultralight | 13-03881 | . |

POWERPLANT TOPICS

| Powerplant Topic | P/N | Price |
|---|----------|-------|
| The Annual Inspection - Powerplant Detailed Demonstration of a annual/100 hour inspection of a Lycoming engine and accessories | 13-03883 | . |
| Care and Lubrication of Engines - By Shell Oil - installation, break-in, maintenance, and operation of newly overhauled engines | 13-03884 | . |
| Aviation Oil - By Shell Oil - what oil does, and steps to increase life and performance of aircraft engines | 13-03885 | . |
| Propeller Repair - A look at the inspection and overhaul process for Hartzell propellers | 13-03886 | . |

ASSORTED TOPICS

| Assorted Topic | P/N | Price |
|---|----------|-------|
| Critical Operations - By Boeing - impresses upon a student the importance of even the most routine tasks | 13-03887 | . |
| 747/777 Put Together - By Boeing - 2 fast motion films showing the assembly process of a Boeing 747 and 777 | 13-03888 | . |
| Saving on an Annual Inspection - Owner permitted inspection and maintenance procedures described on GA aircraft plus safety wire techniques | 13-03889 | . |
| Preventative Maintenance - Maintenance and preventative maintenance tasks an owner may do on their own aircraft | 13-03890 | . |
| FAA Certified Repair Stations Regulations, standards, and procedures for obtaining Certified repair station status | 13-03891 | . |
| Flight Line Service - A job training presentation for newly hired flight line personnel | 13-03892 | . |
| Icing for Pilots - By NASA Research Center, types of icing plus techniques for avoiding and or dealing with ice | 13-03893 | . |

AVIATION VIDEOS & DVDS

MOUNTAIN FLYING BIBLE REVISED

Learn the basic, intermediate and advanced techniques of mountain flying. Arranged in the sequence of an actual flight for ease of use in finding the information you need. It covers Preflight, Take off, En route, Arrival and Landing. Move into advanced operations with ease and safety. Learn to anticipate how your airplane will perform in the mountains. Discover simple rules-of-thumb to enhance safety and simplify operations. Learn the weather information required for peace of mind and increased pleasure. 16 pages of color photos of backcountry strips covering the approach, landing and takeoff procedures. P/N 13-04035

THE SHIRT POCKET MOUNTAIN FLYING GUIDE

Let's face it. Flying in the mountains takes specialized procedures and techniques. Safety demands that you have the facts and knowledge. This pocket Guide provides you the information you need to know. This is not a rehash of the Mountain Flying Bible. It includes new material and color photos throughout. There are 129-color pages of the 208 pages. What is Covered: Section 1 - Do's and Don'ts • Section 2 - Basic Premises • Section 3 - Flying Canyons • Section 4 - Crossing Ridges • Section 5 - Turbulence & Va • Section 6 - Maximum Lift Flap Setting • Section 7 - How to Land an Airplane • Section 8 - Visual Illusions • Section 9 - Spot Method for Landing • Section 10 - Mountain Airstrip Operations • Section 11 - Mountain Weather. P/N 13-04051

WEATHER RADAR TRAINING FROM ALLIEDSIGNAL

This training DVD from AlliedSignal covers topics such as operational theory, weather mapping, antenna stabilization, weather radar interference, ground mapping, preflight, and in-flight operation of the radar system. Excellent training aid for pilots using the RDR2000/2001 radar equipment or for basic weather radar training. 50 minutes. P/N 11-04386

SEVEN NORTHERN CALIFORNIA GETAWAYS - DVD

"Seven Northern California Getaways" is a travel and recreation video featuring seven pilot getaways situated in beautiful natural settings in Northern California where ground transportation is provided or simply not needed. Beautiful scenery, useful information and aerial views of the airports make this video enjoyable and informative to pilots and non pilots alike. P/N 13-04104

PRIMARY AEROBATIC FLIGHT DVD

This entertaining and informative video presents to new student pilots, veteran pilots, prospective pilots and to Parents and Grandparents of the above, a critical phase of training completely ignored by the FAA, most flight schools and CFIs. Yet, during WWII this phase was given top priority in primary flight schools to instill confidence, mastery over the airplane and proficient and safe flying!. This prevue shows what the aerobatic phase is all about. Ground and air shots and pilot eye-views show how easily the maneuvers can be performed which lead to more confident flying by Lt. Col. Art Medore, USAFR, Ret. P/N 13-04231

FORMATION FLYING, THE ART DVD

The Art in DVD format. "Formation Flying, The Art" DVD was originally introduced to the Warbird community in 1993 as a integral part of the FAA Mandated Civilian Formation Training and Credential Program. Currently the video is now the "F.A.S.T." standard and endorsed by all major Warbird flying organizations such as the EAA / Warbirds of America, North American Trainer Association, T-34 Association and others world wide. DVD P/N 13-04572

WINGS IN FOCUS DVDS

PIPER PA-28 SERIES - First in a collection that will profile popular light aircraft. It recounts the history of the aircraft - still in production after well over 40 years, including interviews with Karl Bergey of the original design team, and key individuals at New Piper Aircraft, Inc. today. P/N 13-04291

BEECHCRAFT BONANZA - This DVD tells the story of the Bonanza, from its introduction just after the second world war, to the present day. It shows the inside Hawker Beechcraft's factory in Wichita, and hear from the people who continue to build and develop the Bonanza. P/N 13-05246

TAILDRAGGER TACTICS

The book has been structured to allow one to read from the beginning to the end much like a novel. Each chapter builds and expands upon information that was presented in the previous chapter; however, each chapter is also self-contained to allow one to read only the chapters desired. Flying a taildragger requires knowledge and skill. The knowledge is imparted in this book. The skill is something that must be developed in the airplane. P/N 13-04050

TAILWHEEL BASICS

Skip Degan, a flight instructor with airplane single-engine land, instrument, and ground instructor ratings, has developed a 15 minute video to introduce pilots to basics of tailwheel airplanes. Tailwheel Basics explores the difference between conventional and tricycle-gear aircraft and explains the basic concepts needed to earn a tailwheel endorsement. Included is a three-page booklet explaining the tailwheel transition. The video is available in DVD format. P/N 13-04283

MOUNTAIN FLIGHT VIDEO

Mountain Flight, filmed in part in the Idaho Primitive Area, includes in-flight footage of some of the most beautiful, rugged and demanding mountain terrain in the U.S. It covers flight planning, accident causes, weather, density altitude, approaches, landings, departures, and survival. The weather section includes time lapse sequences of thunderstorms, mountain waves, lenticular and rotor clouds. Graphics are used to clarify, explain and demonstrate the ground and flight procedures for safe operation in the mountains. Color, approximately 80 minutes. DVD.....P/N 13-04052

PARAGLIDER GROUND HANDLING AND THE ART OF KITING - DVD

Let's face it. Flying in the mountains takes specialized procedures and techniques. Safety demands that you have the facts and knowledge. This pocket Guide provides you the information you need to know. This is not a rehash of the Mountain Flying Bible. It includes new material and color photos throughout. There are 129-color pages of the 208 pages. P/N 13-04012

IDAHO EXPOSED DVD

Herb Millhorn, 50+ year Idaho resident and veteran bush pilot takes us on a tour of some of the most beautiful country in the world. Witness amazing flying skills as Herb lands his Cessna 185 Skywagon on risky airstrips that would make other pilots cringe. Canyons and mountain tops are the settings for this spectacular demonstration of phenomenal pilot skills. Don't miss Idaho Exposed as we get to witness culture and recreational opportunities that only exist in this remote area of Central Idaho. P/N 13-04061

ONE SIX RIGHT - THE STORY OF HISTORIC VAN NUYS AIRPORT

An exhilarating documentary film that celebrates the unsung hero of aviation - the local airport by tracing the life, history, and struggles of an airport icon: Southern California's Van Nuys Airport. Featuring thrilling aerial photography and a sweeping original score, the film dispels common misconceptions and opposes criticism of General Aviation airports. Through the love story of one airport, past to present, the film shares the timeless romance of flying with all ages.

- One Six Right DVD P/N 13-04218
- One Six Right HD DVD P/N 13-04289
- One Six Left (the companion DVD)..... P/N 13-04288
- One Six Right International Version P/N 13-04571
- One Six Right CD (soundtrack)..... P/N 13-04219
- One Six Right Piper Cub Model P/N 13-04295
- One Six Right Flex Fit Hat P/N 13-04296
- One Six Right Movie Poster P/N 13-04290

AVIATION DVDS

HOW TO LICENSE YOUR HOMEBUILT AIRCRAFT

This DVD will walk you through each step to successfully license your experimental amateur homebuilt aircraft. The actual FAA forms required are displayed on screen, and the instructor explains where to obtain them and how to fill them out. P/N 13-03609.....

HOMEBUILT HELP ELECTRICAL WIRING TUTORIAL DVD

Explains and demonstrates the common procedures, tools and components required for the basic wiring of a homebuilt aircraft. The instructor leads the viewer through demonstrations of crimping, soldering, wire selection and wiring design with simple schematics that are applicable to a homebuilt electrical system. A discussion on proper wire type and sizing, fuses and connectors is supplemented with photos of these components for easy identification. Video length is 1 hour and 20 minutes. P/N13-03578.....

AIRCRAFT PAINTING 101 DVD

An excellent 2 hour video in which Sam James takes you, in detail, through the finishing, priming, and painting of his RV-4 with the Dupont Veriprime and Chromabase systems. This video is not as finely produced as some others, but the vast quantity of practical information it contains more than makes up for it. Takes you through the complete process of working an metal wing, a fiberglass wheel pant, and detailed custom design on a horizontal stabilizer. Run Time: 120 min by Sam James P/N 13-06567.....

METALWORKING 101 INSTRUCTIONAL DVD

Metalworking 101 with rudder workshop is targeted to the beginning student of pop-riveted metal kit plane construction. The ideal audience for this video is the person who is contemplating the undertaking of a metal kit plane project (for example: Zenith, Sonex, Hummel) and wants to witness the actual skills and procedures necessary for successfully achieving this end. This very affordable DVD will take you thru the actual construction of a Zenith rudder, from start to finish. While it can be used to supplement the construction guide supplied by the manufacturer with this rudder (a CH701 or CH601), it is actually intended to demonstrate to the beginning builder just what tasks and skills are required for any similar brand of metal kit plane construction. In addition to the rudder building demonstration, general metal building procedures are explained and demon strated. P/N 13-03369.....

WEIGHT & BALANCE 101 FOR HOMEBUILT

Completing a homebuilt requires you to calculate and document the weight & balance figures for your plane and present them to the inspector...and for many homebuilders this task is confusing and complicated -- however, this video makes this task simple and easy to understand. The video makes it easy for you to understand the concepts required to perform your own weight and balance analysis on your aircraft and then document the findings for the inspection process. P/N 13-04184.....

CANARD AIRCRAFT DVD

The DVD has 3 hours of video on canard aircraft only, truly a one of a kind DVD. It covers the Cozy MkIV, LongEZ, Berkut, ERacer, StaggerEZ, Bateleur, Defiant, LongEZ Jet and a custom LongEZ. Want to know what it's like to build a Cozy aircraft? Or see what it looks like to do a high speed fly-by from the cockpit? Then you'll want to see this DVD. You'll hear not only why they choose their particular aircraft, but what kept them going through the building process as well. You'll get lot's of encouragement from every builder for you to continue on your journey to complete your canard aircraft. If you enjoy watching canard aircraft fly, then you'll be thrilled with the 60 minutes of air to air shots, high speed fly-bys, take offs and landings. With all the natural sounds as they fly right over head at more than 200 miles per hour! P/N 13-04260.....

SKYWARD TECH AIRCRAFT ENGINE REBUILDING

De-mystify the overhaul procedures on selected Continental & Lycoming engines. Tapes begin with a dismantled engine, show the crankshaft being mounted on a stand and then proceed through complete assembly. Whether you are looking for an education on engine components or considering an actual overhaul these tapes effectively present the step-by-step procedures of re-assembly.

| Description | VHS P/N | Price | DVD P/N | Price |
|---------------------|----------|-------|----------|-------|
| Cont. 0-200 Rebuild | 13-50710 | . | 13-03208 | . |
| Lyc. 0-320 Rebuild | 13-50715 | . | 13-04465 | . |
| Lyc. 0-360 Rebuild | 13-50720 | . | 13-03210 | . |
| Lyc. 10-360 Rebuild | 13-50725 | . | 13-03209 | . |

SCRATCH BUILDING BASICS FOR METAL AIRCRAFT

An excellent way to determine if building a homebuilt aircraft from scratch is right for you... you will obtain a full understanding of the trials, tribulations, joys and successes that this type of building process entails. You can't watch these guys at work and not learn something that might change the way you think about the process and people that build their own planes from scratch! Approximately 3.5 hours in length and is divided into 10 video chapters to make navigation and review of desired sections fast and easy. The DVD set includes web links to plans for building your own sheet metal brake and other tools used in this video (you can print the plans on your own printer). P/N 13-04185.....

FIBERGLASS REPAIRS MADE EASY DVD

FIBERGLASS REPAIR DVD SET - Includes: Fiberglass Repair & Gelcoat Damage & How to Repair Gelcoat. Learn all the procedures to repair gelcoat including mix matching colors, fill scratches and voids, spray gelcoat, applying new fiberglass laminate and final finishing. P/N 13-06563.....

DVD FIBERGLASS REPAIR & GELCOAT DAMAGE - Learn how to make fiberglass repairs as you look over the shoulder of a professional. Covers grinding out damaged material, applying new fiberglass laminate, shaping to original lines and finishing. 54 mins. P/N 13-06564.....

DVD FIBERGLASS REPAIR: HOW TO REPAIR GELCOAT - Learn how to make fiberglass repairs as you look over the shoulder of a professional. Learn to mix matching colors, fill scratches and voids, spray gelcoat and final finishing. 43 mins. P/N 13-06565.....

COMPLETE COMPOSITE & FIBERGLASS LIBRARY ON DVD

All five of our How-To videos on a convenient 2 DVD set. A total of 190 minutes of the most complete guide for using composite materials available anywhere! The Complete Fiberglass and Composite Library contains The Basics of Fiberglass, A Step-By-Step Guide to Molding Fiberglass, Advanced Moldmaking and Plug Construction, Vacuum Bagging and Sandwich Core Construction and The Art of Moldless Composites. P/N 13-06551.....

DEEP INSIDE YOUR ROTAX INSTRUCTIONAL DVD

You can now see and understand what procedures are involved with the 150 and 300 hour inspection/rebuild services. Alan points out the places carbon accumulates, where the common areas of wear occur, and other signs indicating the possibility of potential failures. The specialized Rotax engine tools are demonstrated as to their function in removing various internal components. Installation and maintenance tricks are also demonstrated and explained for the purpose of heading off future engine failures that can lead to disaster. And More. P/N 13-03370.....

ROTAX 912 INSTALLATION TIPS & TECHNIQUES

This presentation explains the most important details of preparing and installing the popular Rotax 912 family of four stroke engines in your experimental homebuilt aircraft. This reliable, high performance engine will only perform safely if installed properly as specified by the Rotax installation guide. The important details in this guide are often misunderstood or even ignored completely resulting in catastrophic engine failures and dangerous flying situations. DVD Running time: 1.5 hours P/N 13-04183.....

BUILDING A GLASS PANEL FOR HOMEBUILT AIRCRAFT

Mark Townsend of CanZac Aviation takes you step-by-step from the planning stages through the actual fabrication procedures and wiring for a combination glass/conventional instrument panel for an experimental aircraft. 80-minute DVD. P/N 13-04969.....

RV RUDDER WORKSHOP

This instructional video has 2 major sections: The first section contains an overview and demonstration of the tools and techniques that are required for building an RV aircraft. These specialized building techniques center around riveting with solid rivets - essential for the RV aircraft. Many specialized tools are required for this type of construction and are discussed and demonstrated. Techniques that are shown include: dimpling, countersinking, deburring, drilling, back riveting and pop riveting. A full discussion of the types of rivets that are used along with their important characteristics is included in this first section of the video. The tools for measuring proper rivet setting (rivet gauges) are shown and demonstrated. Some of the tools that are featured include: hand squeezer, pneumatic rivet gun, flush and universal rivet sets, dimple dies, back rivet sets, scotch-brite polishing wheel and deburring tools. P/N 13-04791.....

AVIATION VIDEOS & DVDS

BIG ROCKS AND LONG PROPS VOLUME I

50 thrilling minutes of water assisted landings, big rocks, big tires, and great flying in a Super Cub and Experimental Maule (A.K.A. Bushwacker) Alaska and Northwest bush pilot Loni Habersetter and Northwest bush pilot Greg Miller take you into their incredible playground of rock bars and water landings - on tires!
P/N 13-04018

BIG ROCKS & LONG PROPS - VOLUME II

You will go from Greg's training ground to the desert and on to the mountains. The main movie is 40+ minutes long and includes a commentary track. There is a section on field repair and a section on the STOL competition for the bush class in Valdez Alaska for 2006. In all, almost 90 minutes of playing time. It has Greg Miller flying "Bushwacker" and also the 5 place Sherpa, which is basically a Super Cub on steroids. It also features Doug Keller and his amazing. Husky Cub. P/N 13-04384

BIG ROCKS AND LONG PROPS VOLUME III

See the culmination of 30 years of bush flying experience as Paul flies his Turbine Otter and Super Cub in the rugged wilderness of the Wrangell-St. Elias National Park. Watch Greg as he learns the ins and outs of ski-flying in one of the most challenging places in Alaska, where the margin between life and death can be extremely thin. P/N 13-05728

BIG ROCKS & LONG PROPS VOL. 4

Join Greg Miller on his Alaskan Adventure. Greg flies his experimental Maule a.k.a. Bushwacker to Alaska in the winter of 2008. The setting for this adventure is the Wrangell-St. Elias National Park. You'll see Greg landing his ski-equipped airplane on snow, ice, rock, and water. Come along as he climbs an ice fall, skins up mountain peaks, and skis down virgin snow-covered mountains. Running Time: 121 minutes P/N 13-06275

SALUTE TO APOLLO

On Saturday evening, July 30, 1994, a once-in-a-life-time event took place at Theater in the Woods on the EAA Convention grounds. EAA welcomed 15 former Apollo astronauts (at least one member from each crew of the 11 historic missions, including all three members of Apollos 8 and 11). Join the audience as they return to the Apollo program and share their experiences. 120 min.
P/N 13-23360

MAY DAY FLY-IN & AIRSHOW 2006 & 2007 DVD

See the best short take-off and landing pilots in the nation. Witness the record breaking 19' take-off. The action continues as you enjoy events such as the Poker Run, Flour Bombing, an inside look at the Cub Crafters designed Carbon Cub, a spectacular high flying aerobatics How-To demonstration featuring Marcus Paine of Unusual Attitudes, & much more.
2006 DVD P/N 13-05743

HOW TO BUY A USED AIRPLANE DVD

Bill Cox, noted aviation authority, journalist and Senior Editor of Plane & Pilot magazine, shows you in this step-by-step DVD: •How to make the right decision in buying a used airplane •What specifically to look for and what to avoid •Gives you a checklist that dealers use in buying, selling and evaluating used airplanes .. P/N 13-03444

THINGS MY FLIGHT INSTRUCTOR NEVER TOLD ME

Topics like fuel management, flight planning, reluctant passengers, dealing with weather, the FAA, buying and owning an aircraft, as well as moving up to bigger and faster aircraft, are all discussed with humor and wit. He also discusses the people in aviation he has met that have had an influence on his flying career.
P/N 13-03381

THE 100 HOUR INSPECTION POWERPLANT

Step by step demonstration of a 100 hour inspection of the powerplant section of a Lycoming O-360 powered Piper Arrow. Explains every segment of the inspection process from an initial AD search to the final log entries. It details each procedure along with the techniques, tool and material usage, and plenty of professional hints and tips. Covers safety wiring techniques..... P/N 13-03883

THE HELICOPTER EXPERIENCE (DENNIS KENYON)

The winner of the 1992 World Freestyle Championships, and the highest scoring pilot in the 2005 Championships in Rouen, France. PRESENTS A unique combination of the top helicopter aerobatic displays at RAFA Shoreham, North Weald "Aerofair", Bury St. Edmonds "Rotors and Motors", and many more...The DVD is in NTSC format, for the United States and Canada. Not produced by Jeppesen.
P/N 13-04186

RICHARD TAYLOR ON INSTRUMENT FLYING

Here is the DVD that pilots have been waiting for. Richard Taylor, Author of the best selling book "Instrument Flying", now offers "Plain Talk About IFR Efficiency". Whether you're new to instrument flying or a seasoned professional, you'll find this video a helpful tool for making you a safer and more proficient instrument Pilot.
P/N 13-03646

PROFICIENT FLYING 3 DVD BOX SET

Disc 1 examines takeoff techniques, spins, engine failure after takeoff, control surface failures, weight & balance and measuring airspeed. Disc 2 covers rejected take off & landings, slips, power off glides, pitot static pitfalls, how to fly a taildragger and accident investigations utilization through computer generation. Disc 3 features aircraft ditching, how to swing one's compass, engine operating hints, unusual approaches, how to fly a seaplane, & how it all works.
P/N 13-03647

HAVE PLANE WILL TRAVEL

Join publisher Steve Kahn, FAA Accident Prevention Counselor Preston Westmoreland, aviation Lecturer Ross Russo, and IFR magazine editor Paul Pertorelli in this high flying video travelogue as they fly direct to some of the fascinating locations...Nova Scotia, Idaho, Cayman Islands, Mexico, Tall Timber, and Catalina. This is a tape for pilots & their families. 73:00 mins of pure flying pleasure.
P/N 13-03642

IN THEIR OWN WORDS - DVD

...this is a story of passage. And it is the story of a place.. a place where a departing generation entrusts its cultural legacy to those who will carry on. A place where they tell - in some cases for the last time - what it was really like. The stories are as countless, yet as distinctive, as snowflakes. For just a little while longer we can hear them directly from the mouths of those who wrote them. We can hear many of them here.. in a forum called "Warbirds in Review." "I smiled, I teared up, I laughed, I recalled history and friends and people lost whom I never met.. The writing is beautiful... on point, thoughtful, simple, clear, moving". P/N 13-06244

WARBIRD TRAINERS

Here is a fitting tribute to our dear friend Jeff Ethell. "The Warbird Trainers", features 3 of the training aircraft that helped train a nation of pilots to ultimately win the war. In this exciting program, Jeff flies the PT-22 affectionately known as the "Maytag Messerschmitt" because of it's takety tak engine sound, the Vultee BT-13 nicknamed the "Vibrator", and the venerable At-6. Also featured on this tape is a tribute from Jeff's family and some of his many friends. DVD..... P/N 13-04285

CHASING LEWIS & CLARK ACROSS AMERICA - DVD

Climb into the cockpit to get a different, low-altitude perspective on America. Set to stirring music, selected photographs from the Chasing Lewis & Clark Across America book provide a view of our country that will nourish one's patriotic soul. From the virgin wilderness that Lewis and Clark discovered, to cities with the creations of man, this collection of photographs is like a tightly woven tapestry of America. The other half of the DVD provides a behind the scenes look at the trip including plane construction. DVD total 45 min., Wide screen, Stereo. Book (P/N 13-04562) and Book/DVD Combo (P/N 13-04564) available.
DVD P/N 13-04563

Book P/N 13-04562

Book/DVD Combo P/N 13-04564

CUBDRIVER 749ER ALASKA DVD

Join Cubdriver749er and friends as we travel across the Alaskan frontier showcasing the off-runway capabilities of the Piper Supercub. Whether an expert aviator or novice pilot, Cubdriver: Alaska™ will certainly entertain with over 2 1/2 hours of Supercub action!
P/N 13-05736

ALASKA HIGHWAY FLIGHT- AN ADVENTURE DVD/BOOKLET

Preparing for a flight to Alaska following the Alaska Highway can be daunting for pilots not familiar with Canada flight rules, flying mountainous terrain, remote / wilderness areas and not being sure what they will encounter along their route. With proper planning, the only surprises that a pilot and companions will encounter will be the magnificent scenery. P/N 13-06002

WONDERFUL WORLD OF FLYING

Due to overwhelming request, the Wonderful World of Flying is now available on DVD. The Wonderful World of Flying is the only general aviation video magazine, featuring stories on safety, travel, warbirds, and fun places to fly.
P/N 13-03649

AVIATION VIDEOS & DVDS

INSTRUCTIONAL VIDEO TAPES

BUILDING THE RUTAN COMPOSITES - This step-by-step instructional program features Burt Rutan and Mike Melvill proceeding through the complete foam-epoxy-fiberglass composite construction procedure as used on the VariEze, Long-EZ, Quickie, Q2, Dragonfly, Sea Hawk, Polliwagen and other composite aircraft. Also included is a formation flight by the Long-EZ, Defiant and VariViggen. A must for all composite aircraft builders. 1hr, 36 mins. DVDP/N 13-04809

FIBERGLASS 101 - This tape shows aircraft builders how to make molds, fairings, and parts from fiberglass. It takes you step by step through the phases of glass work so that you can build parts yourself. Produced by fiberglass expert Sam James. 2 hrs. P/N 13-40368

BASIC AIRCRAFT SHEET METAL TECHNIQUES & TOOLS

- George Orndorff, a noted aircraft builder, demonstrates 13 sheet metal techniques and offers many helpful hints to save time and help motivate the homebuilder. Segments include shop organization and safety, cutting, polishing, deburring, drilling, dimpling, countersinking, riveting, fluting, bending, circle cutting, and more. A sample control surface is constructed using these techniques. 58 minutes. VHS P/N 13-15120

MIKE ARNOLD'S AR-5 WORLD RECORD AIRCRAFT DVDS

DVD 1, "Why it goes so fast" - Documents the efficient AR-5's record runs and clearly explains the simple drag reduction concepts used to achieve its surprising performance on such low power. With comments by aerodynamicist, Bruce Carmichael. P/N 13-15130

DVD 2, "How it's made" - Details the engine installation and the airframe's structural design, and completely demonstrates the easy moldless, hot-wired, foam and fiberglass

construction process used on the fuselage, wing and tail services. Almost 2 hours. P/N 13-15135

DVD 3, "Moldless, low drag wheelpants" - Details the engine installation and the airframe's structural design, and completely demonstrates the easy moldless, hot-wired, foam and fiberglass construction process used on the fuselage, wing and tail services. Almost 2 hours. P/N 13-06277

DVD 4, "Making Fiberglass Molds" - This DVD chronicles development of a beautiful six piece, modded fiberglass aircraft cargo pod to show the simple design and fabrication techniques used to produce low cost, professional quality, production molds. From first sketches, through master patterns, to finished parts. Over an hour. P/N 13-06278

MIKE ARNOLD'S MOLDLESS LOW DRAG WHEELPANTS

- "Moldless, low drag wheelpants", a close-up study of the design and fabrication of the AR-5's Custom Fiberglass Landing Gear Fairings. Every step is shown, from initial research, through foam carving, to final paint and installation. Over an hour. P/N 13-15124

MIKE ARNOLD'S MAKING FIBERGLASS MOLDS - "Making fiberglass mold", chronicles the design and fabrication techniques used to produce Low Cost, Professional Quality, Production Molds. From first sketches, through master patterns, to finished parts. Over an hour. P/N 13-15125

COMPOSITE MATERIALS VIDEOS

A STEP-BY-STEP GUIDE TO MOLDING FIBERGLASS - From construction of the plug, to building the mold and pulling the finished part, this 7-step guide offers guidelines and tips to make even your first molding experience a success! 35 minutes. P/N 13-40350

THE BASICS OF FIBERGLASS - For beginners in fiberglass, this video describes resins, reinforcements, tools, supplies and terminology. 20 minutes. P/N 13-40355

FIBERGLASS REPAIRS MADE EASY, VOL. II/HOW TO REPAIR GELCOAT - Learn how to mix your own matching color gelcoat, fill scratches & voids on gelcoat surface and spray gelcoat. 43 min. P/N 13-40365

ADVANCE MOLD MAKING AND PLUG CONSTRUCTION - See a complete demonstration of plug design, construction, and the finishing process as well as the complete process of building a large polyester mold. P/N 13-40340

VACUUM BAGGING AND SANDWICH CORE CONSTRUCTION - See the complete process of scheduling and laying up the graphite layers, the honeycomb sandwich core, and the vacuum bagging process. P/N 13-40345

"TIN MAN" METAL WORKING VIDEOS

These videos provide excellent instruction for the aircraft builder. Ken White, The Tin Man, is a master craftsman and instructor for the Experimental Aircraft Associations metal working workshops at Oshkosh.

BASIC DAMAGE REPAIR ON ALUMINUM - Take an axe and drive it through the nose of an RSK Porsche. Now we're ready to begin by bumping, smoothing, gas welding, planishing, and metal finishing. All work completed on camera. Complete and very detailed. Color, 63 min. DVD..... P/N 13-04377

EDGE THOSE PANELS - Learn to make flanges, hems wired edges, and flares. With just a hammer, dolly, and some simple tools you can make, you'll be able to easily edge lots of panels. Wing rib construction is also shown. Then a rotary machine (bead roller) is used to do really fancy artwork! Color, 126 min. DVD..... P/N 13-04378

AN AMERICAN'S VIEW OF THE ENGLISH WHEEL - Shrink on the wheel? You bet! Analyze frame design, tracking patterns, layering, pressure measurement, rapid high crown development, nearly flat panels, and much more. Last segment shows air hammer shaping and shrinking on the Pullmax. Color, 126 minutes. DVD..... P/N 13-40302

SHRINKING MAGIC - The art of shrinking (crimping or compression) is demonstrated using both the Lancaster machine and the torch and hammer method. Hot work demonstrations include steel, aluminum, copper, stainless, titanium, and magnesium. An excellent segment on form block work is shown as well. Color, 84 minutes. DVD..... P/N 13-04381

SHAPING ALUMINUM WHEEL PANTS-WITH 7 SIMPLE HAND TOOLS - Using a torch, mallet, stump, forming bag, slapper, dolly, and clamp you can make a really nice pair of pants (fenders or tank). This video includes buck development, pattern work, and hot shrinking. Air hammer shaping and Pullmax shrinking segment at the end. Color, 125 minutes. DVD..... P/N 13-04380

HOW TO GAS WELD ALUMINUM - Learn the professional methods of setting the torch, regulator pressures, and secrets of the flux. Filmed with two cameras through the finest eye-wear available to show tacking, distortion control, flat and vertical welds. Many 30-year veteran welders have benefited from this video. Color, 105 minutes. DVD..... P/N 13-04379

4130 CHROMOLY AIRFRAME CONSTRUCTION - This video is highly recommended for anyone considering a steel tube fuselage aircraft. It covers the whole process: Workflow, welding rod selection, jiggling, fitting, and welding. (Note: The discussions and advice are almost exclusively about oxyacetylene welding. TIG, GTAW, is mentioned only in passing.) VHS..... P/N 13-00389

BASIC AIRCRAFT PAINTING - Join a professional paint crew as they show you the detailed steps and techniques involved in painting an all-metal aircraft (60 min.). P/N 13-40775

BASIC AIRCRAFT WOODWORKING - Woodworking knowledge is essential to any homebuilding project. Power tool safety is also discussed. A great starter tape (30 min.). P/N 13-23355

BUILDING YOUR OWN AIRPLANE: HOW TO GET STARTED

This is the first of a series of videos that will give you insight into the exciting world of homebuilding. Topics of discussion include selecting the right kit for you; the definition of an experimental aircraft; Federal Aviation Regulations (FARs); insurance; how to set a realistic budget; FAA inspections and many other topics (45 min). P/N 13-40535

BV

EAA AVIATION VIDEOS & DVDS

GETTING STARTED IN AEROBATICS

An introduction to the world of aerobatics. You'll see and hear 6 of the world's top aerobatic pilots relate their years of experience and address topics that include aerobatic training options, the benefit of aerobatics and more. Contains valuable information to consider before you begin (or continue) aerobatic training (60 min). P/N 13-40505

AEROBATIC PHASE OF FLIGHT TRAINING

This information and entertaining video, by Col. Art Medore, presents a variety of primary aerobatic maneuvers from the pilot's eye view with an explanation of the execution procedure. Based on Col. Art Medore's best selling manual "primary Aerobatic Flight Training." Running time 30 minutes. VHS format only P/N 13-04231

THE EAGLES - IT'S BEEN A GREAT RUN

"It's Been A Great Run" commemorates the 25-year history of the Eagles Aerobatic Flight Team. This 30 minute video program chronicles the beginning years when Charlie Hillard, Gene Soucy and Tom Poberezny flew Pitts Specials and called themselves the Red Devils. Also included is dramatic aerial footage of the team's final performances at Oshkosh '95 and at the Daytona Skyfest. Interviews with other well-known airshow performers pay tribute to the skill, dedication and longevity that have made "The Eagles" special. Family members and friends share with us what it has meant to be associated with the longest running formation flight team in history. Spectacular air-to-air and camera mount footage photographed by EAA's award production team. P/N 13-40524

FLYING THE SUKHOI

Features interviews with the pilots who have flown this remarkable airplane, outstanding air-to-air and incredible mount camera footage of the SU-26, SU-29 & SU-31 in action. P/N 13-40575

AVIATION PHOTOGRAPHY MADE EASY

Learn basic aviation photography techniques from the award winning EAA photo staff. Topics include equipment selection, composition basics, and tips on ground-to-air and air-to-air photography. P/N 13-40580

CLEARED TO LAND
The Ultimate Aviation DVD For Kids - This children's aviation DVD is a behind-the-scenes tour of a big-city airport along with over one hour of dazzling airplanes in flight! Commercial, military, exotic aircraft and more. Incredible footage!
P/N 13-06230-1

TAILWHEEL 101 DVD

Whether you want to fly upside down, low and slow, or in the bush, the tailwheel endorsement is the place to start... And Tailwheel: 101 will help you get there. This video is the premiere study guide for all pilots wishing to get their tailwheel endorsement, or for any tailwheel pilot who'd like to learn a thing or two from the most widely recognized tailwheel expert in America, Damian DelGaizo. Ride along with Damian and his student Jill as she gets her tailwheel endorsement. Each ground segment is immediately followed by its real-world airplane demonstration to reinforce the material and make pre-flight study sessions easy and efficient. P/N 13-06023

ANDY MEETS THE BLUE ANGELS - DVD

Get ready to soar with pint-sized animated adventure boy, Andy, star of the run-away hit show Andy's Airplanes! This 30 minute, brand new, children's aviation show is perfect for the junior pilot in your life. Each episode draws to a close with real kids in a live action segment. Episode one explores the distinguished aircraft carrier the USS Midway. Kids are Andy's biggest fans, but parents and educators love him too. P/N 13-06038

SAFE HAND PROPPING DVD

Learn the step by step procedures to make hand-propping an aircraft a safe activity for you, your passengers and others. Covers essential knowledge about magnetos and impulse couplings, propeller cautions, use of chocks and helpers as well as the procedural steps of normal starting and clearing a flooded engine. Not only shows you how, in detail, to perform these procedures, but also explains the risk factors and the safety issues associated with each step of the process. DVD P/N 13-06641

THE BUILDING OF VOYAGER - This beautifully produced video follows the incredible story of Voyager from its conception and design by Burt Rutan through the construction process in Mojave and on through the flight test program culminating in the record setting flight around the world in December 1986. A fine presentation of this fantastic aircraft and the many people who made the impossible flight reality. VHS format. P/N 13-00078

EAA SPORTAIR WORKSHOP VIDEOS

All videos produced by the EAA SportAir Center

BASIC FABRIC COVERING

Aircraft Fabric Covering is a must for anyone who wants to cover their own airplane. This 2-hour comprehensive video presents every aspect of the Poly-Fiber™ fabric covering process in detail, and in easy-to-understand language. From preparing the airplane for covering to spraying on the colors, you are guided step by step through the entire process by a professional EAA SportAir fabric instructor. When used in conjunction with the Poly-Fiber manual, Aircraft Fabric Covering removes the mystery surrounding this important process in the construction or restoration of your airplane. Information covered includes: • Preparing surfaces • Attaching the fabric • Tightening the fabric • Applying the first coat of Poly-Brush • Tying rib-lacing knots • Applying finishing tapes • Spraying UV-blocking chemical, Poly-Spray • Applying the color coats. P/N 13-40428

COMPOSITE AIRCRAFT CONSTRUCTION - Information on various types of materials incl: Laminating systems, foam, fillers, fiberglass & other cloth, cutting foam simple lay-ups, joining molded parts, use of peel ply & more. P/N 13-40785

EAA AIRVENTURE VIDEO & DVDS

EAA AirVenture Oshkosh will be remembered as perhaps the best all-round convention ever, and you can preserve those memories by getting your copy of the EAA AirVenture video or DVD, produced by the EAA Television staff. The Annual videos & DVDs feature highlights from the best events at each years convention.

| Description | Part No. | Price |
|---|----------|-------|
| 2008 DVD - This DVD will feature the best of the 2008 convention, including the Dreamliner, Martin Jet Pack, the Nemesis record attempt, the new FAA tower, Rocket Racing League, the best of homebuilts, warbirds, lightplanes and vintage, an interview with John Travolta, and much more. | 13-06225 | . |
| 2007 DVD - Includes daily highlights, the F-22 Raptors, Goodyear Blimp, the seaplane base, interviews with Jim Lovell and Morgan Freeman, and much more. | 13-05650 | . |
| 2006 DVD - Highlights include: • B-1 bomber and the Blue Angels. • Burt Rutan and the future of aerospace travel. • F-22 Raptors. • 50th anniversary of the Cessna 172 Skyhawk. • C-17 Globemaster • Air show performers • World War II bomber reunion | 13-04059 | . |
| 2005 VHS - Features SpaceShipOne, Global Flyer, Glacier Girl, and countless other highlights from the World's Greatest Aviation Celebration | | |
| 2005 - DVD | 13-04059 | . |
| 2005 - VHS | 13-04060 | . |
| 2003 - Includes the air show, celebrity guests and interviews, the EAA Countdown to Kitty Hawk pavilion, the Lindbergh Museum exhibit, & more. Bonus material from the evening programs. | | |
| 2003 - DVD | 13-02539 | . |
| 2003 - VHS | 13-02540 | . |
| 2001 - includes the final flight of the Gee Bee, the F-15, C-17, Reno Racers, the CASPA competition, the kick-off to Countdown to Kitty Hawk, the WASPS and the Tuskegee Airmen, Yeager and Crossfield, a look at camping and the seaplane base, the daily airshow | | |
| 2001 - VHS | 13-01624 | . |
| 2001 - PAL Format (For Europe) | 13-01625 | . |
| 1999 VHS - Highlights include: • "Father Goose" Bill Lishman • 50th anniversary of the T-34 Mentor • 70th anniversary for the Pietenpol Air Camper & more. | 13-00434 | . |
| 1998 VHS - From homebuilts to warbirds, ultralights to vintage aircraft, it's all here, including the exciting daily airshow and the return of Concorde | 13-00597 | . |

THE HISTORY OF SEAPLANES - Ever wonder who was the first to fly on floats? This video answers that questions and many others, while chronicling the history of floatplane flying. A must for any "water-minded" pilot enthusiast. (30 min) P/N 13-23365

WORLD AEROBATICS CHAMPS 1996/78 - EAA captures the excitement of the World Aerobatics Competition like no one else can. Former Champions Gene Soucy & Tom Poberezny are your hosts for an exciting trip to the ultimate aerobatic competition. (45 min.) P/N 13-23350

RICHARD TAYLOR ON INSTRUMENT FLYING - Here is the videotape that pilots have been waiting for. Richard Taylor, Author of the best selling book "Instrument Flying" now offers "Plain Talk About IFR Efficiency". Whether you are new to instrument flying or a seasoned professional, you will find the video a helpful tool for making a safer and more proficient instrument pilot. P/N 13-01025

AVIATION VIDEOS & DVDS

THE 35 & 33 BONANZA - Covers history, safety, performance, cost, maintenance and owner comments of the legendary Bonanza. Gives details on what to look for in a new or used Bonanza. focuses on mod and the care of the Bonanza. We'll put you in the cockpit from preflight to touchdown. (40 min) P/N 13-23800

BONANZA FACTORY TOUR - See how the legendary Bonanzas and Barons are hand built. Watch the nose assembly, lower cabin assembly, upper cabin assembly, cabin mate, tail fuselage mate and final assembly come together. Plus 30th ABS convention in Wichita, Kansas. (50 min) P/N 13-23810

VISIT THE BONANZA SERVICE CLINIC - A must see video for any Bonanza owner. Watch how ABS mechanics give a Bonanza a thorough inspection. See items missed by many mechanics in the field. Focuses on landing gear, engine, hoses, wing bolts & the famous Bonanza tail. (30 min) P/N 13-23805

THE 36 SERIES BONANZA - An in depth report of the model 36 Bonanza. Covers history, safety, performance, handling, cost and maintenance of this amazing aircraft. Shows details on what to look for when purchasing a new or used turbo Bonanza. Includes owner comments. Covers all aspects of the turbo Bonanza, from preflight to touchdown. P/N 13-23815

FLY BAJA MEXICO - Explains border crossing, Mexican authorities, tipping, where to stop for the best fishing, how to get fuel, pass U.S. Customs and much more. We'll take you blue water fishing for marlin and dorado at one of the finest fishing spots anywhere - Punta Pescadero. (40 min) P/N 13-23820

HOW TO BECOME A PILOT - Perfect for student pilots, explores medical issues, needed hours, equipment and itemized costs of the whole program. Explains the best way to select your instructor, aircraft, ground and flight school, shows in-flight video, & typical flight school operations. (50 min) P/N 13-23825

FLYING THE HELICOPTER - Perfect for anyone seeking a helicopter license. Covers all the important concepts you need to know of flying a helicopter. Experience exciting in-flight demonstrations, cockpit view and classroom instruction using gain animated graphics. All pertinent aerodynamics are covered from retreating blade stall to autorotation. (90 min) P/N 13-23840

FLYING SINGLE PILOT IFR - If you fly single pilot IFR, this video is for you. Explains risks involved and how to minimize them. Explores equipment requirement, organization, getting real time weather, staying ahead of the airplane, copilot selection and situational awareness. (60 min) P/N 13-23850

HOW TO GET A FLIGHT REVIEW - Recommended for anyone preparing for a flight review. Covers the relevant areas of FAR 61.56. and what you need to know for the flight review. Includes the new airspace & weather reporting changes. (50 min) P/N 13-23860

ADVANCED FLOAT FLYING TECHNIQUES - A sequel to the popular "Wonderful World of Floats", this video takes you to the next level. Includes salt water and tidal water techniques. Produced in cooperation with EDO Floats and Brown's Seaplane Base. Features Mark Futch flying a Maule on floats and Terry Kohler's Turbo Goose (Approx. 60 min.) P/N 13-40840

ATTITUDE FLYING WITH DICK RUTAN "FLY LIKE A LEGEND" - For serious pilots only. Conceived and designed to take you above and beyond other aviation training programs, the Aviator Series captivates and educates like no other training video you've seen before. Puts you shoulder-to-shoulder with the world's foremost aviators as they share leading edge skills and techniques that made them legends. DVD P/N 13-05858

Blue Ray DVD P/N 13-05859

BUILT FOR SPEED: THE GOLDEN AGE OF AIR RACING - Traces the rapid development of air racing between 1929 and 1939. This exciting decade belonged to civilian pilots who were flying faster than the military. Air racing was one of this country's most popular spectator sports. "Built for Speed" features highlights from both the Bendix (cross-country) and Thompson Trophy (closed-course) races between 1929 and 1939; rare archival interviews; never-before-seen footage of racers in action; contemporary interviews with Harold Newman, Jimmy Doolittle, Edna Gardner Whyte and others. A great companion to the book "The Golden Age of Air Racing", (available through EAA, see our "Manual & Publications" list) this video is a MUST for every air racing fan 30 min). P/N 13-40500

FLYING THE B-17 - The second of EAA's "In The Cockpit" series, this video takes you inside the EAA Aviation Foundation's B-17 Flying Fortress "Aluminum Overcast." See the magnificent restoration and find out what it is like to fly this big four-engine bomber. Features extensive camera mount footage and in-flight cockpit video (30 min). VHS P/N 13-40552

FUN ON FLOATS - 75% of the earth is covered by water. This video features the endless opportunities afforded the world of amphibious ultralight float plane flying. Fun on Floats was filmed in Cajun Country and beautifully features the passion of flight and the tranquility of water. P/N 13-03720

FIRST FLIGHTS IN YOUR HOMEBUILT AIRCRAFT - Introduced by NASA Space Shuttle Commander, Robert "Hoot" Gibson, this video draws upon the resources of more than 40 years of EAA expertise. Learn the importance of careful planning, what to do to make a test flight go smoothly, and what to do if problems arise. The initial flights in any aircraft are a challenging & rewarding experience. Get a head start with this video. (23 min) P/N 13-23380

KEEP 'EM FLYING WARBIRD SHOW - In this special edition of EAA's Ultimate Flights journey to EAA Fly-In for the largest annual gathering of warbird in the world. See dozens of the finest warbirds in existence and some so rare that less than a dozen examples still fly. Witness them in their natural environment-in the air where they belong. Listen for the roar of the radial engines, feel the rumble along the flightline, and smell the oil and gas in the air. Join EAA and EAA's Warbirds of America for an hour long special dedicated to the preservation of all vintage military aircraft and as a flying tribute to an important era. (60 min.) P/N 13-23370

CANADIAN PRIVATE PILOT GROUND SCHOOL CD-ROM - This self-paced study program has been designed to fulfill the Transport Canada requirements of groundschool training for the issue of a Canadian Private Pilot Licence (PPL). The course allows you to study at your own pace, and without the restriction of having to attend pre-arranged classroom instruction. This course also serves as an excellent supplement to traditional classroom learning, or as a refresher course for those pilots already licensed to fly. P/N 13-06531

THE EDUCATED OWNER VIDEO SERIES

VOLUME I: PREVENTATIVE MAINTENANCE - initially details the FAA's rules concerning what maintenance tasks an owner can legally perform. It then proceeds to instruct viewers on the proper tools and supplies for common maintenance tasks and follows with detailed, step-by-step demonstrations of Engine Inspections, Landing Light Replacement, Oil Changes, Spark Plug Maintenance and Tire & Wheel servicing. The video is approx. 60 min. long. DVD P/N 13-03572

VOLUME II: THE ANNUAL INSPECTION - covers Federal Aviation Requirements, and takes viewers, step-by-step, through the Annual Inspection process. This video teaches viewers how to manage the aircraft's maintenance during the Annual Inspection and on an ongoing basis. Key topics include: The Annual Inspection and the FARs, Selecting a Maintenance Facility, The Inspection Process, Correcting Discrepancies and Aircraft Enhancements. Video is approx. 70 min VHS P/N 13-01330

VOLUME III: Teaches pilots and prospective aircraft owners all about aircraft ownership. Teaches how to analyze the costs of aircraft ownership and takes viewers, step-by-step, through the selection, pre-purchase and sales transactions. Includes detailed information on preventative maintenance, annual inspections and tips for living with your new aircraft. 90 min. VHS P/N 13-01626

AVIATION VIDEOS & DVDS

STAY ALIVE-A GUIDE TO SURVIVAL IN THE DESERT SOUTHWEST

The desert is one of nature's greatest challenges, filled with discoveries, but a wrong turn in a car or mechanical trouble in a car or aircraft can instantly put you into a survival situation. This is the first video that will teach you what you need to know with demonstration maps, and graphics. Hosted by Preston Westmoreland and featured on Paul Harvey's News.

P/N 13-15145

STAY ALIVE-A GUIDE TO SURVIVAL IN THE MOUNTAINOUS AREAS

We show how to dig a snow cave, tell weather by the clouds, how to deal with bears and other wildlife, plus expert advice on hypothermia, clothing, edible plants of the mountains, and many other areas. Taped from the White Mountains of New Hampshire to the Colorado Rockies. 2 helicopters & fixed wing aircraft were also used to gather footage. 90 Min.

P/N 13-13154

FLYING DOWN TO THE CARIBBEAN

On this tape the crew takes the viewer as far down the chain as St. Eustatius, including stops in the British and U.S. Virgin Island, the Dominican Republic, and Puerto Rico. "Flying Down to the Caribbean" also offers extensive explanation of various get-away sights once in the island chain and gives recommendations for hotels and restaurants. In a familiar format, the film flows the flight of 2 Mooneys through the islands, with plenty of in-flight footage.

P/N 13-00070

FORMATION FLYING—THE ART

This video represents a true milestone in a flight training product available to civilian pilots which parallels the comprehensive type training one would receive in a military environment. Excellent for any pilot wishing to learn formation flying taught using standardized military procedures. Recommended by EAA/Warbirds of America.

P/N 13-15150

THE WONDERFUL WORLD OF FLOATS

Jack Brown's Seaplane Base in Winter Haven, Florida is the setting for this instructional video. Covers everything from basic Cubs to Cessna 206 Turbo on floats. Learn how to fly a float-plane correctly - and safely - for the first time. Excellent air-to-air photography. (120 min.)

P/N 3727

THE 17 MOST POPULAR WAYS TO FAIL OUT OF THE SKY - DVD

Flyright Productions offers a superior series of instructional videos (now on DVD) with the facts you need in a format you'll remember. This Hollywood-quality series has high production values while providing useful information that's difficult to find elsewhere.

17 WAYS focuses on the primary causes of accidents according to NTSB statistics. This breakthrough video actually creates the flight situation and illustrates how human factors influence the decision-making process, contribute to pilot error and cause accidents. Our unique approach offers distinct advantages: the viewer becomes a participant in the flight experience, which guarantees maximum retention of this critical information. Better retention means stronger performance...and safer flights. Hosted by Bob Hoover, premier aerobatic demonstration pilot, and includes segments of his airshow performed in the Shrike Aero Commander. Written by John Lowery, renowned aviation safety writer, author of "Professional Pilot" and "Anatomy of a Spin," and instructor at Embry Riddle Aeronautical University. Features an unparalleled staff of aviation experts - test pilots, flight surgeons and instructors from both the Naval and Air Force Test Pilot Schools, the Institute of Aviation Safety at USC, and Embry Riddle University. Approx. Running Time: 2:25 Minutes Not Rated.

P/N 13-06650

EXPERIENCE THE SPIRIT OF FLIGHT

"The EAA Air Adventure Museum Video Tour" -- Experience the Spirit of Flight in one of the worlds best aviation museums. From Homebuilts and Ultralights to Antiques and Air Racers, discover the aircraft and displays that make the EAA Air Adventure Museum unique. The next best thing to being there

P/N 13-40515.....

NORTH OF THE ARCTIC CIRCLE - Even if the Arctic is not on your flight plan for now, North of the Arctic Circle is fun to watch! Take a summer dip in the iceberg-filled Arctic Ocean or follow the migrating caribou. See eskimo art unveiling and hear stories about towns, people, and airplanes. Breathtaking aerial video, extensive guide on flying and navigating in the Arctic. (120 min.)

P/N 13-00638

Vol I

Vol II

THE 17 MOST POPULAR WAYS TO FALL OUT OF THE SKY..

A breakthrough approach to aviation safety that differs from anything else you've ever seen. We examine the primary causes of accidents according to NTSB statistics - the mistakes that occur over and over again - and recreate in dramatic vignettes the action leading up to, causing or contributing to these accidents. Hosted by Bob Hoover, premier aerobatic demonstration pilot, and includes segments of his air show as performed in the Shrike Aero Commander.

BACKCOUNTRY IDAHO DVD

Pilots of all skill levels will truly enjoy the exhilaration and adventure of Idaho backcountry flying at its best with ... Backcountry Idaho. Visit some of the best backcountry airstrips in the Rocky Mountains. Explore scenic wilderness, vast pine forests, and steep canyons in search of pristine beauty and the next runway challenge. Fly right seat on the actual approaches and departures of these spectacular backcountry airstrips with Todd at the controls of his high-performance, custom designed, King Katmai.

P/N 13-06298

UTAH OUTBACK DVD

Visit some of the best backcountry airstrips of the American West. Discover ancient Anasazi cliff dwellings or squeeze through a thousand-foot-deep canyon in search of incredible beauty and the next runway challenge. Take a journey with expert pilot Todd Peterson as he explores some of the remote and beautiful country featured in Galen Hanselman's "Fly Utah" pilot's guide. Fly the actual approaches and departures of these spectacular backcountry airstrips with Todd at the controls of his King Katmai. Fasten your shoulder harness and enjoy the exhilaration and adventure of backcountry flying at its finest with Utah Outback.

P/N 13-06309

IT'S GOTTA BE A JENNY - One of America's most famous airplanes. 30 minutes of aviation magic including rare footage of the Jenny's earliest days as a military trainer and the antics of daredevil barnstormers. Witness Ken Hyde's 16-year award-winning Jenny restoration and the unprecedented gathering of six Jennies at the 1989 EAA Fly-In-Convention.

P/N 3616

CARIBBEAN FLYING ADVENTURES

The Practical Pilot's Guide to the Islands DVD Format. This is the only on-line and up-to-date Pilot's Guide for flying to the Islands. It literally contains everything a pilot needs to know and do about flying to the Caribbean - charts, documents, fees, current fuel prices, step-by-step arrival / departure procedures and more. Most of the information is not available from any other source - and it is continuously updated. Scenic, 4 Minute Approaches to 15 Major Airports in the Caribbean - Antigua, Barbados, Dominica, Nassau, Nevis, Providenciales, Santo Domingo, St Kitts, St Lucia, St Martin (Dutch and French), St Vincent, Tobago, Trinidad and Vieques, PR. BONUS Approach: St Barts - The Most Challenging Landing in the Islands. Includes the Pre-Departure Checklist - Everything You Need to Know and Do Before You Depart.

Caribbean Flying Adventures #1..... P/N 13-04182

Caribbean Flying Adventures Membership..... P/N 13-04261

FLYING THE SPIRIT

"The third of EAA's in the cockpit series" - tells the story of one of the most famous airplanes of all-time the Spirit of St. Louis. Learn about the man behind the original flight, Charles Lindbergh, through amazing historical footage. Then, fly along in two replicas of the famous craft with astronaut Hoot Gibson, the late John Denver and the man who flew over Paris for the 60th anniversary of the flight, airline pilot Verne Jobst. (25 min)

AVIATION DVDS

THE GREAT CIRCLE AIR SAFARI DVD

FLYING THE OUTBACK

Experience an exhilarating flight through the vast Australian Outback with nine vintage aircraft. In the fall of 2005, two Americans, Doug DeVries and Rob Richey, shipped their 1942 Stearman biplane all the way to Australia, joining up with their Aussie mates for a 4,000 mile flight through some of the most remote areas in the country. Stunning high definition footage by Oscar winning director of photography Eric Thiermann coupled with the story of two pilots on a quest of discovery yields a compelling film.

P/N 13-05079.....

LAST FLIGHT HOME - DVD

About the Film

The 'Last Flight Home' documents the story of Dr. Patrick Scannon's work searching for and finding missing World War II aircraft and the MIAs associated with them in Palau. A ferocious battleground nearly forgotten by history, yet more than 200 US aircraft went down on and around the islands. Almost half of those with crew now listed as

Missing In Action. Over 60 years ago all the families got was a telegram. Whereabouts unknown, *Missing In Action*. And over the generations these families have refused to forget and refused to stop waiting. For an answer, for their return, for some clue as to what happened. Surprising though it may be, hope has remained. Then, the phone call out of the blue, "Are you the nephew of Arthur Miller?", finally brings the answers. Dr. Scannon furthers his research into the MIAs of Palau by scouring the National Archives, After Action Reports, and interviews with veterans of the campaign, no stone left unturned. Scannon's small team of self funded private citizens have taken on these tasks simply as a way of thanking the MIAs and their families for the sacrifices made decades ago. Our film follows the story of three searches in Palau and the families touched by the work. Filmed over the course of nearly six years and seven expeditions to Palau, where we thought the adventure was to be found. It was our delight to discover the adventure and heart of the story here in the U.S. with the families.

Running Time: 70 minutes (approx) P/N 13-05174.....

WORLD WAR 1 AMERICAN LEGACY

World War 1 – American Legacy vividly tells the many forgotten stories of the men and women who served in the Great War, reminding Americans of their impact on our country that can still be felt today.

Charles Whittlesey of the Lost Battalion and Father Duffy of the Fighting 69th became famous for surviving against impossible odds. Pilots Victor Chapman and Quentin Roosevelt and ambulance drivers like Richard Hall made the supreme sacrifice. Writers such as e.e.cummings, Ernest Hemingway, Joyce Kilmer and Alan Seeger were inspired by the tragedy around them. African-American soldiers like James Reese

Europe and the Harlem Hell Fighters made history. Female volunteers like the "Hello Girls" and Red Cross nurses risked their lives supporting the troops and started a new era for women.

Filmed in high definition and full of period music, photographs and monuments, World War 1 – American Legacy includes rare images that have never been seen before on screen, bringing the extreme detail of the Great War to life.

FLYABOUT DVD

Flyabout tells the autobiographical story of Monika Petrillo's journey piloting a small single-engine airplane around the continent of Australia. Her father, a pilot with limited experience himself, is riding shot. As the only women pilot in a group of eleven people, Monika sets out to experience the true freedom of flight above one of the most untouched places on earth. But what impacts her most is the unexpected conflict that arises between her father and herself.

CHRIS & TED'S FLYING IN ALASKA VIDEO

When they planned their trip to Alaska, they encountered a startling lack of visual information for much of the state, in particular those areas less travelled and less well known. The prospect of flying in Alaska can be intimidating when your imagination is forced to fill in the blanks. Exactly how big are the mountains, rivers and glaciers? How bad does the weather get? Is an emergency landing a death sentence? If we camp out will we end up as bear lunch? One look at the map and you'll see that they covered a lot of ground. During 5 weeks of mostly great weather they made a lazy clockwise loop around the state, stopping for a few hours or a few days along the way. They hiked, backpacked, kayaked, fished and stalked big game with their cameras.

ASA CLASSIC AVIATION FILMS 6-DVD COLLECTORS SET

The incredible journey of Classic Aviation Films takes you from short flights across a field to the screaming hypersonic edge of space as you tour dramatic moments in the history of flight, in this 6-DVD set. Begin with the Wright Brothers in 1909, then follow a 1924 around-the-globe adventure by plane in Volume 1. American engineering takes center stage in Volume 2 and the training of future aviation support is profiled in Volume 3. Jump to shocking WWII footage of the famous and tragic raid on the Ploesti oil fields by B-24 Liberators in Volume 4. Feel the strain U.S. Air Force test pilots are subjected to in Volume 5. Strap in with Neil Armstrong in Volume 6 as he scrapes the upper edge of the atmosphere in the '50s and '60s with the cutting-edge XF and X-15 rocket planes.

AVIATION DVDS – CALENDARS

U.S. FIGHTER JETS - DVD

America's Fighter Jets has been added to the popular Topics Entertainment exclusive video products line. The 2-DVD "Doubleshot" Collector's Set includes: Jets of the U.S. Air Force Climb in the cockpit of an F-15 Eagle or an F-16 Viper and fly off into the wild blue yonder. Experience the world of the U.S. Air Force combat pilot as you fly high over the arctic tundra monitoring Russian bombers and ride along in the cockpit over the sweltering desert of Iraq. Filled with wing to wing flying, strike missions and intensive training, you'll see what it's really like to be a sky warrior. Jets of the U.S. Navy and Marines They say it's the most heart pounding flying in the world with a zero margin for error and few chances to get it right. Journey from a little known base in the Nevada desert to the hostile skies on the other side of the world as you join the real "Top Guns" and streak through the skies in an F-14 Tomcat or F/A-18 Hornet. You'll witness the intense training naval aviators endure long before ever heading to sea and the skill required to make contact with a pitching carrier deck in the middle of the ocean. Total runtime approximately 2 hours. P/N 13-06256

ASA AMERICA'S FIGHTING JETS - DVD

Exciting 4-DVD set — the definitive series on the aircraft that daily stand on guard in defense of freedom. Another title in the popular Topics Entertainment video series, America's Fighting Jets is the definitive DVD set on the aircraft that daily stand on guard in defense of freedom. Feel the G forces and the sweat on your forehead as you streak through the sky in aerial combat. Experience the world of U.S. combat pilots as you fly over the arctic tundra and desert sand in jets of the Air Force, Navy, and

Marine Corps. Watch the intense training and heart-pounding missions of the Top Guns pilots. Journey back in time and examine the amazing jets that protected North America and fought aerial battles during an era of high stakes nuclear stand off. These DVDs feature stunning, archival footage of planes, pilots and crew in action, and offer a fascinating look into the intense world of F-15 Eagles, F-14, F/A-18, Stealth Fighters, Vipers and more. Runtime approx. 180 minutes This 4-DVD box set is an \$80 value if sold separately and includes these exciting DVD titles (45 minutes each) in a beautiful printed package—ideal for gift-giving: * Jets of the Air Force * Jets of the US Navy and Marines * Jets of the Cold War * Unusual Jets P/N 13-05832

ASA FIGHTER PILOTS - DVD

See the training that today's fighter pilots need to fly these exotic aircraft. Get a detailed look at the systems and weapons on the world's most popular multi-mission fighter aircraft. Fly with Top Gun F-14 Tomcats as you're blasted off a modern day super aircraft carrier. Experience the F-16 Fighting Falcon and meet the pilots who made it a true multi-role fighter in the Gulf War. Ride along in the cockpit of the F-15 Eagle during gut-wrenching dogfights and supersonic low-level attacks. Patrol the skies over Iraq in an F/A-18 Hornet as pilots destroy real Iraqi MiGs. 4-DVD set, total runtime approx. 280 min. P/N 13-05837

GHOSTS 2010 CALENDARS

P/N 13-01318

P/N 13-06012

Renowned aviation photographer Philip Makanna has captured the essence of this era in his GHOSTS of The Great War and A Time Remembered -2010, a large-format calendar that features his stunning, air-to-air, color photographs.

Makanna has spent 32 years taking aviation photography to amazing heights. In this edition, his images depict the beginnings of military aviation with Bleriot's wing-warping Model XI, Fokker's "Spider", a web of wires and wood, and Sopwith's simple seaplane racer. The calendar continues through to the advanced aircraft that appeared at the war's end.

Stunning images and an evocative day-by-day history of the aviation (and related) events of the

period combine to describe the beauty, the romance and the tragedy of military aviation's early days.

- * 12 Magnificent Color Photographs from
- * Master Aviation Photographer Philip Makanna
- * Each Month is Suitable for Framing
- * Unique Chronological History of the Aviation Events
- * Individual Aircraft Specifications & Silhouettes
- * Each Page: 20" x 14" Opens to 20" x 28"

SUMMER THUNDER-DVD

This 4-DVD set lets you fly into the danger zone with the Thunderbirds and Blue Angels aerobatics teams. Summer Thunder on DVD: aerial artistry and death-defying demonstrations! 4 Complete Videos Get an inside look at the Thunderbirds F-16 Fighting Falcon. Ride along with the Blue Angels as they perform their aerial acrobatics and trace their history through past show footage and interviews with the pilots. Finally, take a look at the next generation of aircraft with a ride in the F/A-18 Super Hornet. Experience the legendary skill that make the Thunderbirds and Blue Angels the best of the best. Packed with non-stop aerial action, brought to you by the men and women of the U.S. Navy and U.S. Marine Corps. Runtime approx. 140 minutes on 4 DVDs. P/N 13-05834

AVIATION ACTION - DVD

Exciting DVD coverage of top air show teams from around the world packaged together on 4 DVDs. With featured maneuvers from top flight teams from the USA, Canada, France, and Brazil, Aviation Action packs excitement into this incredible high-altitude footage. Arrow Through the Heart pays tribute to the Italian Jet Team, showcasing a perfect aerial performance the day before deadly tragedy struck. And altitude meets attitude in Thunderbirds: Skies of Thunder, the exhilarating point-of-view film that puts you in the cockpit with the Air Force. Finally, The Blues & The Birds demonstrates just what it's like to accompany the Blue Angels and the Thunderbirds in air show performance. Runtime approx. 150 min. P/N 13-05833

MILITARY AIR POWER - DVD

This 4-DVD set gives you an in-depth look at some of the U.S. military's most powerful weapons. The flight action never stops in Military Air Power, a collection of military aircraft videos. Wings of Silver offers up the highs and the "lows" of United States Air Force prowess, on low-level strikes and at heights of 30,000 feet. Wings of Gold showcases high-speed aircraft carrier flight operations and a thrilling demonstration from the Blue Angels. Fly along in the world's most technologically advanced fighter aircraft as you battle an enemy MiG in Thunder from Above. Finally, Nightstalkers exposes the complete story of the U.S. government's military Stealth aircraft program. It's altitude with attitude on DVD. Runtime approx. 240 min.. P/N 13-05836

WINGS OF FREEDOM (4-DVD SET)

An in depth, real-life account of America's finest flight squads of the Air Force, Navy and Marine Corps. Climb into the cockpit with the Blue Angels and Thunderbirds and take off on a whirlwind adventure through the skies at blazing speeds. Cameras placed inside the cockpit provide a first-hand account of what it's like to be one of chosen few who maneuver these planes, as you soar through the skies with highly trained pilots. Learn the history of both teams from their inaugural flight to present day combat battles. P/N 13-06718

ULTRALIGHT VIDEOS—ROD MACHADO PRODUCTS

ULTRALIGHT POWERED HANG GLIDING/ TRIKING

STARTING TRIKING, FREEDOM TO FLY ULTRALIGHT POWERED HANG GLIDERS See how Triking can help you experience the ultimate adventure! Learn what Triking is all about! Introduces you to flying like a bird in an ultralight powered hang glider and how modern technologies and enhanced training techniques have made learning to fly an ultralight trike easier than ever before. (30 min.) P/N 13-01722

BE A PILOT, LEARN TO FLY AN ULTRALIGHT TRIKE Learn what it takes to get your ultralight trike pilot certification. Experience the thrill and excitement of becoming an ultralight trike pilot. Join Instructor John Beaman as he takes Paul Hamilton through ultralight trike training and signing off to solo. Then, join Paul as he takes you through the concepts you need to know to get your ultralight trike pilot certificate. Video covers: First Flights, Student to Solo Practical Maneuvers, Out on Your Own, Building Solo Time, Further Study. (56 min.) P/N 13-01725

HOW TO PREFLIGHT AN ULTRALIGHT TRIKE -

Instructor John Beaman takes you through a simple step-by-step process of preflight for ultralight trikes that is easy to follow. This straight-forward presentation is truly informative and educational for the beginner pilot or an experienced pilot wanting a refresher. John Beaman is an ultralight Advanced Flight Instructor (AFI) and a hang glider pilot. Flying for over 20 years, he has over 2000 hrs of logged flight time. DVD covers: The Wing, Attachment, Trike under-carriage, Trike variations. This DVD includes a wonderful flying segment with great in-air-footage & soundtrack. (56 min) P/N 13-05682

THE ULTRALIGHT TRIKE ODYSSEY, TOP TO BOTTOM

Join us on a powered hang gliding cross-country barnstorming adventure. The odyssey starts near beautiful Lake Tahoe, continues down the snow-capped High Sierra Mountains to Death Valley, then back through the Nevada desert and Sierras to return to Lake Tahoe. Accompany 4 ultralight trike pilots flying for 6 days covering 1400 air miles. You land at 16 different locations including airports, dry lakebeds, and roads. From the "Top" (Mt. Whitney) to the "Bottom" (Death Valley) (48 min.) P/N 13-01727

STARTING TRIKING, FREEDOM TO FLY POWERED HANG GLIDERS - DVD

This program is a great introduction to learning to flying a weight-shift trike, or sometimes called a powered hang glider. Filmed at the Arlington Air Show in Washington State, Monument Valley and Hawaii, "Starting Triking, Freedom to Fly Ultralight Powered Hang Gliders", covers a first scenic lesson experience and moves through a couple of flights to ultimately, expert pilots demonstrating advanced techniques, all with spectacular in-air footage and great soundtrack. P/N 13-05076

MONUMENTAL TRIKING AND FLYING LAKE POWELL - DOUBLE FEATURE DVD

Scenic and breathtaking aerial adventures. Experience the most unique views of Monument Valley and Lake Powell from the air in an ultralight weight-shift trike (powered hang glider) in these two music features - Monumental Triking and Flying Lake Powell. Forty minutes of spectacular scenes and hard hitting music provide great triking entertainment. Great for parties! P/N 13-05078

ROD MACHADO'S INSTRUMENT PILOT SURVIVAL MANUAL

This book is unlike any other book on instrument flying that you have encountered. 232 pages, illustrated with humorous drawings. Excellent for IFR students or as IFR refresher. P/N 13-40330

ROD MACHADO'S PRIVATE PILOT HANDBOOK 2ND EDITION

A serious text written in a fun and witty style. More than 1,200 original illustrations & photos with 50 pgs in full color, ensures this to be a one-of-a-kind manual. You can learn or review by just looking at the pictures. However, the text is laced with Machado's humor, so you will want to read every last word of the 572 pages. Written in the first person, it's as if Rod is sitting next to you, personally explaining all the necessary aspects of flying to make you an informed, confident and competent pilot. Flight instructors will love using the great illustrations with their students. It will also be a favorite for its readability. A book only has value if it's read and understood. For years pilots at Oshkosh, Sun n' Fun and seminars across the country have asked Rod to write a fun and easy to understand book for pilots. Well, here it is folks, perfect to refresh for a flight review, catch up on new rules or for student pilots to pass their FAA knowledge and oral exams.

ROD MACHADO'S PRIVATE PILOT WORKBOOK

The new Rod Machado's Private Pilot Workbook is now available. As a programmed learning guide, this book will help prepare you for the FAA Private Pilot Knowledge Exam. The questions are organized to follow the presentation of material, section, as found in the Handbook. Not only will this book prepare you for the Private Pilot Knowledge Exam, it will help you understand and absorb the knowledge necessary for you to fly safely. You can test your knowledge and comprehension in each subject area with numerous weight and balance, performance, and flight planning problems. P/N 13-01502

ROD MACHADO'S INSTRUMENT PILOT'S HANDBOOK

624 pages in full color! This book allows you to learn everything you need for: * The FAA instrument knowledge exam * Your instrument proficiency check * Updating and refreshing your knowledge This valuable one-stop handbook contains the information necessary to: * Fly instruments as a knowledgeable and competent pilot. * Prepare for the FAA instrument pilot knowledge exam * Prepare for the instrument pilot practical oral exam. * Refresh for your instrument proficiency check. * Remain an up-to-date confident instrument pilot. P/N 13-05699

ROD MACHADO'S PLANE TALK

A collection of Rod Machado's most popular aviation articles and stories from the last 15 years. This 456 page book contains articles on topics such as higher aviation learning, the value of aviation history, aviation literature, aviation art and how an artist's perspective can help you better understand weather. P/N 13-03155

ROD MACHADO'S AVIATION VIDEOS & DVD'S

DEFENSIVE FLYING

Rod Machado discusses how pilots can learn to think defensively. Learn about acknowledging your own limitations and a pilot's psychological predators as well as never underestimating aerial enemies. Listen to an actual, hair-raising, in-flight emergency as two professional pilots exercise one of the most important skills in Defensive Flying. This presentation contains many new stories and humor not previously heard on Rod's audio tapes. P/N 13-40305

AVIATION HUMOR

Laugh along with over 2,000 pilots as Rod Machado entertains his audience with some of the best of his aviation stories. As a professional humorist, Rod has always been known for his ability to move people off the edge of their seats and onto the floor with his fast paced, humorous presentation. After so many requests for a video version of his very popular audio tapes, this video of Rod's is sure to be a popular addition to your library. P/N 13-40310

IFR FLYING

Rod has incorporated six of his most popular IFR segments into this educational video. And, for comic relief, Rod has interspersed live, humorous clips from one of his popular seminars between each story segment. This is a valuable tape for beginners as well as seasoned pros. You're sure to laugh and learn as Rod shows you: A unique, multi-step instrument scan, Single pilot IFR cockpit management, How to really use the approach lighting system, techniques to make safe IFR departures, & more. P/N 13-40315

BV

ENGINEERING REFERENCE MANUALS

ACCEPTABLE METHODS, TECHNIQUES & PRACTICES

Contains "Aircraft Inspection & Repair" (AC43.13-1A) and "Aircraft Alterations" (AC43.13-1B with change 1). These valuable FAA manuals originally published by the US Government Printing Office, have been combined and reprinted in a single volume. 393 pages. EA-AC 43.13-1A-2A P/N 13-11350

ASA AIRCRAFT INSPECTION, REPAIR & ALTERATIONS

The "bible" for AMTs, aircraft owners, and homebuilders, this FAA Advisory Circular outlines the standards for acceptable methods, techniques, and practices for the inspection, repair and alteration of non-pressurized areas of civil aircraft with a gross weight of 12,500 lbs or less. Includes both Part 1B and Part 2B. P/N 13-06050

STANDARD AIRCRAFT HANDBOOK (LEAVELL & BUNGAY)

This handy book contains a wealth of information with illustrated chapters on riveting, bolts and fasteners, tools and their proper use, assembly and installation methods, materials and fabrication, blueprint reading, lofting and templates. 292 pgs, paperback. 6th edition. P/N 13-11400

DESIGN & CONSTRUCTION MANUALS MOLDLESS COMPOSITE SANDWICH HOMEBUILT AIRCRAFT CONSTRUCTION (BY BURT RUTAN)

A step-by-step construction manual for the beginner in working on composite aircraft designs. If the steps are studied and followed carefully, a first time builder can work confidently with these materials. Profusely illustrated. P/N 13-11600

COMPOSITE AIRCRAFT DESIGN (MARTIN HOLLMAN)

A very popular new book from the designer of several innovative composite aircraft. Describes the history of composite aircraft development and provides technical information & sources for the many composite materials in use today. Filled with photos, sketches and graphs. 88 pages. P/N 13-11700

COMPOSITE CONSTRUCTION FOR HOMEBUILT AIRCRAFT (JACK LAMBIE)

This comprehensive manual shows you the techniques of working with plastics in homebuilt kit airplanes. Lambie's humor and sound judgment are ideal for any avian dreamer. Over 300 graphs, drawings, diagrams, and photos that show you how. 240 pgs. P/N 13-12300

AIRCRAFT DETAIL DESIGN MANUAL (S.J. DZIK)

Revised 3rd Edition. Detailed 2 & 3 view design drawings from existing aircraft plans plus wing design, engineering tables & hardware specs. P/N 13-12000

A PRACTICAL GUIDE TO AIRPLANE PERFORMANCE AND DESIGN (DONALD R. CRAWFORD)

This book will prepare you with the mathematical tools you'll need to turn fantasy into at least drafting table reality. Find design trade-offs in minutes with easy-to-use graphical and numerical techniques. P/N 13-16820

AIRPLANE DESIGN (DONALD R. CRAWFORD)

Collected reprints of a series of technical articles on airplane design printed first in KITPLANES magazine are bound in a single 114 page volume. Easy-to-use BASIC computer programs (with fully annotated source listings included) are applied to sample problems. Detailed derivations of the governing equations provide the necessary technical background for the solution method. A disk of the computer programs and sample output is available for the IBM-PC and compatibles. P/N 13-16825

MODERN AIRCRAFT DESIGN, VOLUME 1 (MARTIN HOLLMAN) 6TH EDITION

A complete look at the designing of an aircraft from the configuration evaluation to performance calculations, configuration sizing, loads analysis per FAR 23, composite materials properties, structural sizing, building and flight testing. This book also explains how to perform full-scale finite element analysis on the MacIntosh personal computer. 195 pgs, over 100 illus. P/N 13-12100

MODERN AIRCRAFT DESIGN, VOLUME 2 (MARTIN HOLLMAN) 6TH EDITION

A continuation of the immensely popular Volume 1 and such topics as new computer programs (software and hardware), drive shaft sizing, and the use of prepreg composite aircraft parts are discussed. Knowledge of these topics is essential in designing aircraft made of composite materials and using the latest state-of-the-art technology. Vol. 2 assumes the reader has read Vol 1. P/N 13-12200

PRACTICAL STRESS ANALYSIS FOR DESIGN ENGINEERS

Deluxe hardbound edition, 464 illustrations and drawings, 685 pages. Solutions based on "real" aircraft structure. A simplified, easy-to-understand reference book - contains no complex mathematics. Aircraft designers and experimenters can master the principles and fundamentals of stress analysis. Learn new techniques and simplified approaches to the analysis of new and innovative designs. P/N 13-00035

UNDERSTANDING AIRCRAFT COMPOSITE CONSTRUCTION

This book was written to provide a basic understanding of composite technology prior to commencing a composite project. The book discusses the very elementary theory of beams and sandwich structures, then extends this to composite structures. The well-known moldless (Rutan) techniques are described as well as a detailed description of vacuum bagging techniques suitable for the homebuilder. P/N 13-12350

INDUSTRIAL RESIN PUTTYS (JOHN WILLS)

A shop manual describing how to formulate over 100 filled polyester, epoxy, phenolic and acrylic resin compounds. Resin putty formulations for composite and foam construction are included. A "must" for builders of an original fiberglass design. 68 pages, 48 illus. P/N 13-12400

GEL COAT FORMULATION (JOHN WILLS)

Explains what gel coat is and how it works. Formulas for all types of polyester gel coats with step-by-step mixing procedures are given. Excellent for all builders making fiberglass molds and parts. P/N 13-12500

MODERN GYROPLANE DESIGN (MARTIN HOLLMAN)

A thorough discussion of gyroplane design and performance calculations. Includes configuration design and structural analysis of rotor blades in flight, as well as practical examples and a complete list of references. Furnished with software. P/N 13-03058

FLYING THE GYROPLANE (MARTIN HOLLMAN)

Covers the history of rotorcraft including da Vinci, Focke, Benson, and the Sportster and Bumble Bee designed by the author. Original flight reports from the test pilots of the C-30, Rotachute and many others. A must for any rotorcraft enthusiast. P/N 13-13000

HOW TO BUILD COMPOSITE AIRCRAFT (MARTIN HOLLMAN)

You will learn how to assemble kit aircraft made out of graphite/epoxy such as the Lancair IV and Stallion and how to build plugs and molds for these type of aircraft and where to buy the materials at low cost. Once the molds are built, you will learn how to vacuum bag parts using prepreg materials. You will also learn how to build your own aircraft design out of composite materials using a low cost method for shaping fuselage and wing parts out of Last-A-Foam and the wet layup method to build sandwich structures. P/N 13-12205

AIRCRAFT DESIGN: A CONCEPTUAL APPROACH, FOURTH EDITION

This highly regarded textbook presents the entire process of aircraft conceptual design—from requirements definition to initial sizing, configuration layout, analysis, sizing, and trade studies—in the same manner seen in industry aircraft design groups. Interesting and easy to read, the book has more than 900 pages of design methods, illustrations, tips, explanations, and equations, and has extensive appendices with key data essential to design. Introduction to spaceflight and rockets including thrust analysis and vehicle sizing for launch and planetary missions. Software (P/N 13-04238) and Book/Software Combo (P/N 13-04561) also available. Book..... P/N 13-04237

HOW TO COOL YOUR WANKEL

This 100 page book can be used as a guide when designing a liquid cooled Wankel rotary engine installation in an experimental aircraft. Information from the Aircraft Rotary Engine Internet Newsletter and a compilation of the published information from the established international experts in the field over the last seventy years. Includes a bibliography. The information applies to any liquid cooled aircraft engine. Printed on heavy weight gloss paper with many color illustrations and pictures (Sizes 8-3/8 x 10-1/2 x 1/2). P/N 13-04888

DESIGN & CONSTRUCTION MANUALS

THE SPORTPLANE BUILDER (TONY BINGELIS) – An introduction to homebuilts along with information on construction practices, fiberglass techniques, canopies, windshields, instrumentation, fuel systems, control systems, landing gear components, electrical systems, covering and painting and more. 320 pgs, completely illustrated. P/N 13-13200

SPORTPLANE CONSTRUCTION TECHNIQUES (TONY BINGELIS) – 3rd in a series of outstanding books from the dean of homebuilders. Includes sections on getting ready to build, construction practices, fiberglass components, control systems, aircraft interiors, canopies and windshields, landing gears, instrumentation, electrical systems and finishing. 368 pages, fully illustrated. P/N 13-13300

FIREWALL FORWARD (TONY BINGELIS) – The complete guide to engine selection, firewall preparation, engine mounts, exhaust systems, hoses and lines, cowlings, fuel systems, ignition and electrical systems, instrumentation, propellers spinners and much more. Highly recommended by Rutan Aircraft Factory. 303 pages, completely illustrated. P/N 13-13400

BINGELIS ON ENGINES (TONY BINGELIS) – A treasury of practical engine information for aircraft builders, owners, restorers and mechanics. Things you need to know about engine selection, engine installation, firewall preparation, baffles, cooling, fuel systems, ignition and electrical, exhaust systems, props and spinners all are thoroughly covered. Presented in clear, easy to understand language and illustrated with photos and drawings, this is another of Tony's incomparable collection of articles from EAA's Sport Aviation magazine that addresses powerplant issues facing today's sport plane builder and pilot/ All the right answers at your finger tips. P/N 13-13450

SPECIAL!
ALL FOUR TONY BINGELIS BOOKS FOR .
P/N 13-13500

PAZMANY BOOKS

CUSTOM-BUILT AIRCRAFT OWNERS AND OPERATORS MANUAL - Contains spaces for listing of aircraft description, specifications, construction data, weight and balance calculations, operating limitations, operating instructions and servicing information. (L. Pazmany). P/N 13-20100

LANDING GEAR DESIGN FOR LIGHT AIRCRAFT (L. PAZMANY) - Discusses in great detail all aspects of the landing gear including tires, wheels, brakes, loads & deflections, main gears, nose gears & tail gears. Includes 32 tables & 3 large fold-out drawings. Recommended highly by many leading aircraft designers. 245 pages, 463 illustrations. P/N 13-14000

LIGHT AIRPLANE CONSTRUCTION FOR AMATEUR BUILDERS (PAZMANY) – Published in 1970. Covers in detail the fabrication and assembly of sheet metal, fiberglass and Plexiglas components. 92 pages. Many, many photos. This book is a "must" for a builder of any sheet metal aircraft. P/N 13-13800

LIGHT AIRPLANE DESIGN (L. PAZMANY) – A step-by-step description of PL-1 & PL-2 preliminary design and the reasoning begin each feature of these airplanes. No high math; very easy to read. Used as a text in several universities. 80 pp P/N 13-14100

PL-4A CONSTRUCTION MANUAL (L. PAZMANY) – This 104 page book will guide you through every step in building a sheet metal aircraft. You will find a very detailed list of tools, a section on aluminum handling, how to make ribs, frames, fittings, form blocks and jigs. Construction tips. Forming of parts. "Pop" riveting techniques. Fitting & drilling of Plexiglass. VW engine assembly instructions.

EVANS LIGHTPLANE HANDBOOK (W.S. EVANS) – This exceptional book provides a ready source of data commonly used in the field of light aircraft design. The book includes detailed information on aerodynamics, engines, propeller, wood, aluminum, steel, composites, landing loads, flight loads, stress analysis, tubing, weight and balance, weights, data tables, and an AN parts guide.

VP-1 Volksplane Plans and Pilot's Handbook (W.S. Evans) – The complete set of plans to build the popular VP-1 as well as a complete pilot's operating handbook. Fully illustrated. 2 Book Set P/N 13-11560

FASTENER BLACK BOOK - This pocket book is a great resource for anyone using standard fasteners on a routine basis • It's designed for technicians, apprentices, trainees etc. • Coated with in a Glare-Free laminate that resists tearing • Free thread pitch identification gage with each book P/N 13-06587

ENGINEERS BLACK BOOK - This pocket book is a great resource for anyone working in a shop • It's designed for metal workers and machinists • Coated with in a Glare-Free • Free drill sharpening gauge with each book P/N 13-06586

AIRFOIL SELECTION – Airfoil Selection is an outstanding book by airfoil expert Barnaby Wainfan which will aid the reader in understanding and choosing airfoils for light aircraft. This book is a collection of a series of articles originally published in Kitplanes magazine and reprinted in book form with the cooperation of Kitplanes editor, Dave Martin. All articles by Barnaby Wainfan. 57 pages, illustrated. P/N 13-18700

GA AIRFOILS (HARRY RIBLETT) – This book is a critical study of the NACA airfoil design work addressing errors and omissions of the NACA work and correcting NACA airfoils where needed. This is a comprehensive catalog of airfoils designed for general aviation use. Also included are sections on general wing design, including planform, wing tips, root stakes, aircraft performance and stability, and more. 136 pages. P/N 13-18725

ALTERNATIVE ENGINES – This is a compilation of the "Contact" magazine articles written by Mick Myal on conversion of auto engines. Well written with many helpful ideas. Filled with specifications, pictures and diagrams. An essential book to anyone converting an auto engine. P/N 13-00398

TEST FLYING (MARTIN HOLLMAN) – Explains how to predict performance by analysis and provides a detailed description of flutter modes, flutter analysis, flight testing, and spin testing. Lancair IV and other aircraft are used as examples. Includes flight test forms and list of references. 84 pages, illustrated. P/N 13-13010

DESIGNING WITH CORE (HAL LOKEN AND MARTIN HOLLMAN) – Explains how to design core structures. Finite element analysis and hand calculations are included. Discusses materials such as honeycomb and foam cores and gives detailed instruction on how core structures are fabricated. P/N 13-13020

HOW TO PAINT YOUR OWN AIRPLANE (RON ALEXANDER) - This book discusses all aspects of spray painting including choosing the right equipment, how to set up a paint booth, preparation of surfaces, painting techniques, safety issues, etc. This is an EAA "How To" book written by Ron Alexander. Over 80 pages. P/N 13-03274

COMPOSITE BASICS (ANDY MARSHALL)– An excellent review of composite structure design and technology from one of the foremost authorities on advanced composites. Illustrated. 7th edition. P/N 13-18000

LOW POWER LAMINAR AIRCRAFT DESIGN (ALEX STROJNIK) – Aerodynamics of light aircraft of 40 HP or less. P/N 13-14200

LOW POWER AIRCRAFT STRUCTURES (ALEX STROJNIK) – Stress analysis of aircraft structures in the air and landing, and info. on load conversions. P/N 13-14300

LOW POWER LAMINAR AIRCRAFT TECHNOLOGIES (ALEX STROJNIK) - Instructions on how to build low power aircraft. P/N 13-14400

SPECIAL!
ALL 3 ALEX STROJNIK BOOKS FOR . P/N 13-14500

ASA - THE PILOT'S MANUAL ACCESS TO FLIGHT - The Pilot's Manual Series, The Pilot's Manual: Access to Flight, provides an innovative curriculum that meets the challenges of training in the 21st century. This comprehensive ground school textbook combines the Private Pilot and Instrument Rating curriculums into a single flight training program.

Today's increasingly complex flight environment and Technically Advanced Aircraft (TAA) demand a level of understanding and functional proficiency as never before. Fuel costs and time constraints continue to rise, mandating an efficient curriculum for pilots in training. The integration of Private and Instrument curriculums in this breakthrough course is simply the most efficient and effective way to prepare for safe flight within this dynamic environment and during these demanding economic times. In addition to preparing pilots for the cockpit, chapter review questions will help prepare students for the FAA Private and Instrument Knowledge Tests

Textbook..... P/N 13-06339

Syllabus P/N 13-06340

Kit - (Kit contents: Textbook, Syllabus, Cirrus Flight Operations Manual, Private Test Prep, Instrument Test Prep, FAR/AIM, Private Oral Exam Guide, Instrument Oral Exam Guide, Private Practical Test Standards, Instrument Practical Test Standards, CX-2 flight calculator, Rotating Plotter, Instrument Plotter, Logbook and Cirrus Flight bag)

P/N 13-06341

AVIATION MAINTENANCE TECHNICIAN HANDBOOK - FAA did a terrific job with this new generation A&P General Textbook. It is fully up to date, easily readable, well illustrated, and in full color. It is also the "official" book from which all FAA knowledge test questions are derived. In reviewing this book, Aircraft Technical Book Company, together with five part 147 colleges, have identified numerous errors and omissions.

P/N 13-06257

AIRFRAME & POWERPLANT HANDBOOK: AIRFRAME - This FAA reprint provides the textual material needed to study this mechanic rating. It is the document from which the FAA tests are drawn. 630 pages.

P/N 13-06205

ASA AIR TRAFFIC CONTROL CAREER PREP - Designed to help readers improve their chances of earning a high score on the FAA's ATC pre-employment test. Includes practice test CD-ROM! Author Patrick Mattson Updates Version 1.3 Update(Update applicable to software (companion CD) only.)

Air traffic controllers can earn high salaries, get great benefits, and are in big demand as much of the current workforce prepares to retire. Industry reports claim that as many as 11,800 NEW air traffic controllers will be needed over the next ten years.

P/N 13-05848

ASA PRINCIPLES HELICOPTER FLIGHT - This book explains the complexities of helicopter flight in clear, easy-to-grasp terms, covering helicopter aerodynamics and operations in a building-block manner of teaching. Author: Walter Wagten-donk Edition: Second

P/N 13-05807

ASA CALM IN THE FACE OF CONFLICT - Twelve powerful strategies to help you think through problems, decisions, and conflicts. Author Cheryl Cage If you have ever found yourself: * Wishing you could grab words out of the air the second you've spoken them, * Avoiding conflicts instead of resolving them, * Spending too much time 'researching' a problem instead of solving it, * Losing sleep over a decision or conflict...

(And who hasn't?) P/N 13-05846

ASA WELCOME ABOARD! - Career guidance for employment as an airline flight attendant. Author Becky S. Bock Edition Third The opportunity for a flight attendant career is more accessible now than ever before. Airlines are actively recruiting applicants just starting on their career paths, as well as men and women ready for exciting second careers. Welcome Aboard! will provide you with all the information you need to

prepare for your flight attendant interviews, and learn about the exciting challenges and lifestyle changes that come with a flight attendant career. So, no matter what your age or background, if you are ready for a challenge now is your opportunity! This new Third Edition updates information regarding the aviation industry, and new or changed/merged airline companies.

P/N 13-05847

ASA AIRLINE PILOT TECHNICAL INTERVIEWS - A study guide to instill confidence for a successful airline checkride and technical interview. Author Ronald D. McElroy Edition 2nd Edition There are many variations of technical questions that can be asked in an interview; however, there is a specific approach a pilot should take in preparing for this section of the interview. Aspiring professional pilots will be prepared to

display their flying skills during the simulator ride, as well as their aeronautical knowledge during the face-to-face oral questioning. Soft cover, illustrated, glossary and index included, 144 pages.

P/N 13-05849

JOB HUNTING FOR PILOTS - Whether your goal is jet captain, flight instructor, or any other pilot position, Job Hunting for Pilots will help you take command of your career. Author Greg Brown Edition Second Edition Increase your career rate of climb. This book includes pilot resumes, cover letters, interview preparation and much more. Addresses everyone from aspiring pilots to transitioning military aviators and old pros changing jobs or careers. Shows how to develop those all-important inside contacts who can help you more quickly achieve your dream flying job. Join thousands of pilots who've advanced their careers with the aid of this unique book.

P/N 13-05843

YOUR JOB SEARCH PARTNER - A 10-day step-by-step opportunity-producing job search guide. Author Cheryl Cage Edition Second Edition In Your Job Search Partner, author Cheryl Cage offers professionals, in any field, an extensive, positive, step-by-step guide to marketing themselves more effectively while helping them uncover hidden talents and strengths.

Armed with Cheryl's motivational real-life advice, even a professional feeling unorganized and unprepared can implement an organized, positive and effective job search in just 10 days!

P/N 13-05844

REPORTING CLEAR? - A pilot's step-by-step guide to conducting their own background check and the proper presentation of personal history during the interview process. Author Cheryl Cage Before aspiring airline pilots can make it to the interview, they need to pass the "paperwork review." Reporting Clear is the definitive pilot's interview guide to background checks and presentation of personal history. Author Cheryl Cage offers an easy, step-by-step guide for the pilot conducting his/her own background check. Titles, addresses, phone numbers, and website information for the agencies they must contact are all here.

P/N 13-05845

FAIR WEATHER FLYING - Now back in print. 2nd edition of popular book containing information and advice for a better understanding of today's aircraft and flying techniques. By Richard L. Taylor. 353 pages. Hardbound.

P/N 13-23105

POSITIVE FLYING - This book tells why and how "flying by the numbers" works, and gives the flight-tested numbers for precision performance in 27 of America's favorite small aircraft. By Richard Taylor and William Guinther. Fly any airplane at a set attitude, airspeed, and power setting and it does precisely what you want it to, every time. For aircraft not included in the 27 popular general aircraft covered, the book provides exact cockpit procedures for nailing down the numbers for any other light airplane. Hard cover, 223 pages, indexed and illustrated.

P/N 99-00064

COCKPIT PROCEDURES - EFFECTIVE ROUTINE FOR PILOTS AND VIRTUAL AVIATORS - Written by an experienced instructor and pilot examiner, Cockpit Procedures provides a solid understanding of the underlying principles and detailed descriptions of the checklists and routines used in many flight schools. This book is a description of what you should be doing during each phase of flight, including emergencies and training maneuvers. Readers will find it contains a practical definition of airman-ship, good habits to develop, workload management, and even what you should have in your flight bag. This book covers actual cockpit actions and thinking, providing the rationale behind common procedures that are standard practice in the training environment and in the airlines.

P/N 13-06254

101 CROSSWORDS FOR PILOTS - Pilots are inherently drawn to puzzles; problem-solving and playing the "what-if" game are in their nature. They share a fascination for anything and everything about airplanes and flying.

The over 6,000 clues used in 101 Crosswords for Pilots will provide hours of enjoyment for pilots and aviation history enthusiasts, stimulating recall of stored knowledge as well as satisfying that innate yearning to learn more.

P/N 13-06255

CYCLIC & COLLECTIVE 2ND EDITION, ART & SCIENCE OF FLYING HELICOPTERS - This unique book, written from the perspective of the pilot provides a detailed, yet easy to understand overview of the theory and practice of helicopters. It covers nearly all aspects of learning to fly a helicopter, from basic theory through autopilots. It offers detailed explanations for both the beginner and advanced pilots on performance, handling and the mechanics of helicopters. The beginner section covers fundamentals of helicopter theory, aerodynamics, performance and flying.

Examples are based around piston engine helicopters and are given from a cockpit perspective. The advanced section is for professional pilots, as well as those who want to know more about helicopters and how they work. It covers turbine helicopters with more advanced systems.

P/N 13-02878

ULTRALIGHT BOOKS

POWERED ULTRALIGHT FLYING (DENNIS PAGEN)

- An excellent book for the beginner, covering basic information such as how to select a suitable ultralight, equipment needed, how to choose a proper site, meteorology and airmanship. Newly revised in 1984. 72 pages and many illustrations.

P/N 13-15700

ULTRALIGHT FLIGHT (MIKE MARKOWSKI) - Ultralight aerodynamics, stability and control, design and performance, plus a fascinating history of the sport. A down-to-earth explanation of the theory of flight.

P/N 13-16000

ULTRALIGHT AIRMANSHIP (JACK LAMBIE) - Learn how to make the right decision in the air. Written by Jack Lambie, a master aviator; it'll help you "see the wind" and be the best pilot you can be. Filled with diagrams.

P/N 13-16100

FIRST FLIGHTS IN YOUR ULTRALIGHT/LIGHT PLANE

- You've taken a big step by purchasing the ultralight or light plane of your dreams-but are you ready to fly it? First Flights in Your New Ultralight/ Light plane has been produced for the FAA by EAA. You'll learn how to prepare for & what to expect from the first flight in a new ultralight or light plane. (20 min)

P/N 13-23385

A PROFESSIONAL APPROACH TO ULTRALIGHTS - A

Professional Approach to Ultralights offers 256 pages of plain-spoken, real world, ultralight-specific information based on over 25 years of experience. You'll discover invaluable strategies, tips, and an overall guiding philosophy in the purchase, maintenance, and operation of your ultralight that will stretch your spending power and create a safer flight environment. Whether you are interested in ultralights or just want to increase your general aviation knowledge, we know you'll find A Professional Approach to Ultralights a valuable resource.

P/N 13-03797

A PROFESSIONAL APPROACH TO ULTRALIGHTS 2ND EDITION - By: by

Carol and Brian Carpenter Book has plain-spoken, real world, ultralight-specific information based on over 25 years of experience. You'll discover invaluable strategies, tips, and an overall guiding philosophy in the purchase, maintenance, and operation of your ultralight that will stretch your spending power and create a safer flight environment. Whether you are interested in ultralights or just want to increase your general aviation knowledge, you'll find the info here. This is a comprehensive and realistic guide for the purchase and operation of Ultralight Aircraft.

P/N 13-06204

FEDERAL ULTRALIGHT RESOURCE GUIDE - This

compilation of FAR Part 103, its accompanying FAA Advisory Circulars (ACs) along with FAA guidance regarding traffic pattern procedures is a must for any ultralight student, pilot or instructor. At last, all of FAA's current ultralight rules, regulations and advisory material are in one easy to reference document. Part 103 is in its entirety including the preamble which offers FAA's justification for creating the rule and what it expects of ultralight operators. AC 103-6 offers guidance about ultralight vehicle operations including airports, air traffic control and weather. AC103-7 offers FAA's rationale in creating and interpreting its ultralight vehicle definition. AC 90-66 offers practical guidance on what to expect when flying into a general aviation airport. 72 pgs.

P/N 13-00062

THE COLLECTED SAILPLANE ARTICLES AND SOARING MISADVENTURES OF BRUCE CARMICHAEL

- 2nd Printing 2007. U.S. Softcover. 306 Pages. 69 Articles from Soaring, Technical Soaring, OSTIV, Shop Talk, Sailplane Builder, National Soaring Museum, National Free Flight Society, Southern California Soaring Association, and Author's Autobiographical Notes. Sailplane Design Optimization, Sailplane Aerodynamic Design, Future Predictions, Memorials to Departed Greats, Ultralight Sailplanes, Dynamic Soaring, Summaries of 20 years of Sailplane Homebuilders Technical Workshops, Hilarious Accounts of Seven of the Author's Early Soaring Misadventures.

P/N 13-05021

PILOT AND AIRCRAFT LOG AND REFERENCE GUIDE

- Specifically designed for ultralighters. Generic entry pages to log both piloting activity and vehicle information works perfectly for 3-axis, trikes, powered parachutes & more. Includes

areas for personal identification and important phone numbers, ultralight registration program endorsements and memoranda. Reference material includes an ultralight airspace summary, ATC light signals, Part 103, controlled airspace and radio communication information and a wind chill chart. Durable water resistant leather-like finished cover. 68 pages.

P/N 13-00064

ADVISORY CIRCULAR 90-89A

- This FAA Advisory Circular, titled the Amateur Built Aircraft and Ultralight Flight Testing Handbook, was re-written in 1995 with the help of ultralighters to cover all phases of preparation and flight testing of newly constructed non-production aircraft. The AC describes recommended steps to take to confirm that the aircraft, operating facility and pilot are ready for that first flight. A section is specifically devoted to ultralight enthusiasts.

P/N 13-00063

TRIKE FLYERS MANUAL

- This concise manual gives students and pilots invaluable information about how trikes fly. Included the specifics of rigging, inspection, startup and taxiing, ground handling, take-off and landings of all types, straight and level flight, turning, climbs and descents, speed and power balance, stalls, spiral dives, forced landings, low flying, wing tuning and more.

P/N 13-00067

ULTRALIGHT PILOT'S FLIGHT TRAINING MANUAL

- The industry standard used by the majority of ultralight instructors. Designed by author Curtis Hughes to correlate with the knowledge areas covered in the USUA Pilot written and practical examinations. Sections include basic and advanced airwork, traffic pattern, solo, meteorology, Part 103 and the National Airspace System. Student flight training forms and debriefing pages accompany each phase in the manual. 245 pgs.

P/N 13-00065

THE PILOT TRAINING PROGRAM INSTRUCTOR GUIDE

- This instructor companion guide by Curtis Hughes helps flight instructors whose students are using The Ultralight Pilot's Flight Training Manual as their training program syllabus. 3 major sections cover the organization of the student text, essential elements of instructing, lesson plans and teaching points. Each of the 10 lesson plans follow the student manual and cover background, goals and objectives, preflight preparation, teaching points, in-flight exercises, instructional tips and post flight discussion. Review questions and their answers are found at the end of each lesson. 140 pgs.

P/N 13-00066

201 ULTRALIGHT PROJECTS

- A 247-page book featuring over 200 do-it-yourself projects and maintenance aids for the ultralighter. Marketed to the general UL market plus 3 chapters specific to Quicksilver, Phantom, and Flightstar designs.

P/N 13-29450

ULTRALIGHT & LIGHT SELF LAUNCHING SAILPLANES BY BRUCE CARMICHAEL

- 2nd Printing 2007. 8 x 11 Softcover. 70 Pages, 44 Illustrations; 24 3-Views. 203

Ultralights, 16 Lights, 18 Sustainer Engines, 56 Self-Launch Engines, Performance Calculations, 10 Prop Locations, and Prop Drag Reduction Methods History and Safety.

P/N 13-05020

THE COLLECTED AIRCRAFT PERFORMANCE IMPROVEMENT ARTICLES AND LECTURES OF BRUCE CARMICHAEL 1974-2000

- 1st Printing 2007. 14 articles. Oshkosh Appraisal, Laminar Wing & Fuselage Design, Propeller Place, Performance Revolution and Improvement, AR-5 & VMax Probe Study, 7 Lectures on Drag Fundamentals, Body Drag, Realm of Reynolds Lam., Aircraft Search, Lam Aircraft Odyssey, 100% Laminar by Suction. 203 Pages.

P/N 13-05022

PILOTS & MECHANICS REFERENCE MANUALS

PLANE & PILOT MAGAZINE - In each issue of Plane & Pilot magazine, you get pilot reports for piston-engine aircraft, expert flying techniques and skills, must-have product reviews, aviation careers and training advice, travel adventures and scenic photography. Published by leading aviation industry experts and pilots since 1965. Sign up for the FREE eNewsletter at www.planeandpilotmag.com today. P/N 13-31185.....

KITPLANES MAGAZINE - Add the current issue of the popular homebuilders magazine to any order. We also have some back issues available on request. Most recent issue published will be shipped. P/N 13-31110.....

27 YEARS OF THE RV-ATOR (ANDREW GOLD) - An outstanding collection of newsletter reprints of Van's Aircraft's line of RV homebuilts. A must for any builder of RV home-built aircraft. Book.....P/N 13-25450
CD.....P/N 13-04959

AIRCRAFT SPRUCE AND PLYWOOD - Reprint of Government Specifications MIL-S-6073 and MIL-P-6070. P/N 13-14900

MODERN SUBSONIC AERODYNAMICS BY R.T. JONES-

Explains early theories of lift, aircraft design, and math modeling of fluid motion. Purpose of special airfoils and laminar airfoils are discussed. Wing design, wing sweep, use of winglets, longitudinal stability, and neutral point. Includes a listing of the Oshkosh Airfoil Program for the IBM-PC. R.T. Jones is one of the world's leading aerodynamicists with over 50 years of experience in designing aircraft working at NASA as chief research scientist, and teaching at Stanford University. The book is written for the novice as well as the experienced aerodynamicist. If you have any interest in aeronautics, this book is hard to put down once you start to read. 114 page and over 52 figures. P/N 13-16700

.....

NONDESTRUCTIVE TESTING IN AIRCRAFT - Reviews the basic principles underlying nondestructive testing including radiographic, magnetic, ultrasonic and dye penetrate inspections. EA-AC 43-3.....P/N 13-20400

AIRCRAFT INSTRUMENT SYSTEMS - One of the most comprehensive books available which identifies the many types of aircraft instruments and how they work. Includes an extensive section on installation and marking. Fully illustrated. EA-A1S.....P/N 13-19300

AIRCRAFT WEIGHT AND BALANCE - An excellent book for the practicing aviation mechanic. Contains valuable information on determining weight and balance in all types of aircraft including fixed wing and rotary wing aircraft. EA-BAL P/N 13-19500

UNDERSTANDING AND USING AIRCRAFT TUBING (BOB WHITTIER) - While this publication is not a how-to-weld manual, it does contain information on where to obtain such literature. Its aim is to give newcomers to the field of amateur aircraft construction a broad and valuable insight on what steel tubing is all about, to help them work their way safely and productively into this specialized skill. There are many rare illustrations of both technical and historical interest and this makes the book a "good read" for those who are interested in the history of aircraft construction. It also comprises a readable and valuable refresher course for A&P mechanics who have become out of touch with the art of aircraft welding. 36 pages. P/N 13-30625

.....

FAR FEDERAL AVIATION REGULATIONS FOR AIRCRAFT MECHANICS, 2009 EDITION - All pertinent FAR's for aviation students, mechanics and shop personnel. P/N 13-15300

KITPLANE CONSTRUCTION (RON WANTTAJA) - Wanttaja gives well-deserved consideration to such important (and rarely discussed) topics as financing, powerplant selection, propellers, instruments and avionics, and how to prepare a workshop for action. Provides the kind of helpful information most builders learn the hard way: from expensive and frustrating mistakes. He made many of the same mistakes he discusses in the book when he built his first airplane. 432 pgs, fully illustrated. P/N 13-30611

WORKING HEALTHY - This is a "no excuses" book that belongs with every A&P student, mechanic, technician, aircraft builder, repair station library, and training and repair station manager. A manual on health and safety techniques written by an aviation medical examiner specifically for the aviation technician. Learn how to protect yourself from the many risks and long term health issues common in an aviation facility. Learn to advise and protect your most valuable assets (your employees and students) P/N 13-06647

AIRFRAME & POWERPLANT MECHANICS AIRFRAME HANDBOOK - This volume contains information on airframe construction features. assembly and rigging, fabric covering, structural repairs and aircraft welding. EA-AC-65-15A.....P/N 13-19210

AIRFRAME & POWERPLANT MECHANICS POWERPLANT HANDBOOK - Contains information on engine construction features, lubrication systems, exhaust systems, cooling systems, cylinder removal and replacement, compression checks and valve adjustments. EA-AC-65-12A.....P/N 13-19220

SPEED WITH ECONOMY (KENT PASER) - This is an excellent reference manual for the amateur aircraft builder who wants to make his plane go faster. Kent Paser has spent over 23 years improving the Performance of his MustangII with many Modifications, each carefully documented and tested. This book chronicles them all, from the exhaust system, intake system, cooling system, propellers, drag reduction, & more. P/N 13-33000

HOW-TO-LICENSE A HOMEBUILT AIRCRAFT - Simplifies the process of licensing paperwork. For someone thinking about buying or selling a homebuilt aircraft, this book explains how these transactions are made and what paperwork is needed by both the buyer and seller. P/N 13-02096

TRANSITION TO TWINS - YOUR MULTI-ENGINE RATING (by DAVID ROBSON) -This is one of the most concise and well-illustrated books on flying twin-engine airplanes, covering all facets of multi-engine flight, including: • Orientation to multi-engine terms, definitions, and systems • Pre-flight, ground operations, takeoffs, high speed flight, slow flight, stalling and landings • Single-engine operations, with a comprehensive discussion and practical suggestions on factors affecting controllability, VMC, & performance • Abnormal operations, including fires, engine and system failures, spins, landing gear lock-ups, icing, & bird strikes • Flight planning, including weight & balance, and performance calculations • Night & IFR operations • Commercial operations, introducing the factors involved with passengers, crew, cargo, schedules, duty times, and the airmanship required. 220 pgs. P/N 13-00793

AIRPLANE OWNERSHIP (RONALD J. WANTTAJA) - For the first-time airplane buyer, this book is an invaluable resource and guide to everything you need to know about plane ownership. The award-winning author gives you money and time-saving information on selecting, purchasing, financing, insuring, hanging, and maintaining your airplane. If you're still undecided, this book can help you determine if owning is right for you. 301 pgs, 150 illust., paperback. P/N 13-29910.....

THE COMPLETE ADVANCE PILOT: A COMBINED COMMERCIAL & INSTRUMENT COURSE (BY BOB GARDNER) - Chapter cover such topics as flight instruments, aerodynamics, airplane performance, navigation, weather, charts and publications, the IFR system and departures, en route operations, arrivals, instrument approaches, cockpit organization and procedures, regulations, advanced operations and preparing for the checkride. Each chapter includes questions taken from the FAA tests. Helpful web addresses, found throughout the book, are new to the Third Edition. P/N 13-01714

AIRCRAFT GAS TURBINE POWERPLANTS - Newly revised to include the most up-to-date information on aircraft gas turbine powerplants and updated coverage of jet engine technology. Extensive cross-reference between today aircraft and engines. Now includes over 500 illustrations, charts and tables. Written by Otis & Vosbury. 514 pages. P/N 13-02421

AIRCRAFT FUEL METERING SYSTEMS – A thorough explanation of basic aircraft fuel metering systems including operation, service and maintenance of carburetors. Covers TCM & Bendix systems. (#EA-FMS). P/N 13-19260

ADVANCED COMPOSITES – Covers all the latest techniques of composite construction and the applications for various composite materials in aircraft structures. (#EA-358). P/N 13-19235

AIRCRAFT – Covers all aircraft quality sheet metal, tools and fasteners, layouts, as well as repair techniques. A great guide to working with sheet metal for all homebuilders. (#EA-SM).. P/N 13-19205

AIRCRAFT RECIPROCATING ENGINES – Explains how aircraft reciprocating engines operate and includes detailed servicing requirements and tips. An excellent training text. (#EA-ARE) P/N 13-19295

AVIONICS FUNDAMENTALS – Covers all aspects of basic avionics selection, and maintenance in light aircraft. Good reading for any pilot. (#EA-AV) P/N 13-19320

BASIC HELICOPTER MAINTENANCE – A very informative guide to performing basic maintenance on all types of light helicopters. (#EA-HF2) P/N 13-19330

BEST OF AVIATION MECHANICS JOURNAL MAINTENANCE TIPS – This is an excellent collection of the very best of Aviation Mechanics Journal's many great tips covering a variety of aviation maintenance topics. (#EA-341) P/N 13-19335

MASTERING THE E-6B FLIGHT COMPUTER - Mastering the E-6B Flight Computer; a new book by Mike Arman, launches with this history of the humble yet elegant flight computer before delving into a thorough tutorial on its use. Although some student pilots actually fear these devices (and more than a few seasoned pilots have forgotten how to use them), the E6B is a no-fail way to make numerous critical calculations both before and during cross-country flights. You can use the book to learn how to figure everything from time/speed/distance problems to fuel burn, from density altitude calculations to wind triangles and drift. Arman, an advanced ground instructor and pilot, uses many examples in each lesson to illustrate E6B concepts. P/N 13-04709

FLYING CARPET: THE SOUL OF AN AIRPLANE (GREG BROWN) - This is the captivating inside story of the making of a pilot. Well-known and respected author Greg Brown shares the journey of life's skies as he matures from fledgling to seasoned aviator, encountering aerial adventure and colorful characters all along the way. This book goes beyond traditional flying stories and teaches what it takes to conquer the nagging fears faced by every pilot when attempting to master the challenges of flight.

Flying Carpet conveys the joy and boundless freedom of being a pilot, pursuing the irresistible lure of the map. Whether you fly from an armchair or a pilot seat, this book provides a well written, entertaining and humorous look into our own human nature. P/N 13-01949

ASA ROTARY WING FLIGHT - Includes discussion on helicopter aerodynamics, common flight techniques, normal flight operations, and precautionary measures, and critical conditions. 122 pages, glossary included. P/N 13-02381

ASA AIRPLANE FLYING HANDBOOK - This official U.S. government guide to piloting aircraft—created by the Federal Aviation Administration—is the essential resource for finding the knowledge and skills to fly all types of planes. It includes an introduction to flight training and official information on ground operations, basic flight maneuvers, slow flight, stalls and spins, takeoff and departure climbs, ground reference maneuvers, airport traffic patterns, approaches and landings, performance maneuvers, and night operations. Pilots will find information on transitioning from small aircraft to more complex airplanes, as well as detailed explanations of emergency procedures. Each topic is coupled with colorful, detailed illustrations to aid the reader. Any pilot who wishes to maintain a current understanding of aircraft operation must read this book. P/N 13-00975

FARS EXPLAINED – This important book helps answer the age-old question: "I know what it says, but what does it mean?" FARs Explained will save you time, money, and frustration. This book includes Plain-language FARs for Parts 1, 61, 91, & NTSB 830, easy-to-read and understand explanations of FAA letters, includes important cross-references to aid understanding, actual case histories and FAA Chief Counsel opinions. P/N 13-17520

TURBULENCE: A NEW PERSPECTIVE FOR PILOTS – Pilot's need to have more than a minimal understanding of the causes and characteristics of turbulence. While the number and types of accidents caused by turbulence has escalated, actual training on turbulence remains negligible. The purpose of this book is to help pilots recognize the conditions favorable for aviation turbulence so that its effects can be avoided or minimized. The book provides answers to questions such as: What is turbulence?, What does it look like?, How long does it last?, What caused it?, Where is it found?, What are its indicators?, What are its typical dimensions & intensities? P/N 13-17525

GAS TURBINE ENGINES: FOR PILOTS AND MECHANICS BY R.E. BIRCH – This 4-color text provides an introduction to the history, theory, and inner workings of modern turbine engines. Ideal for both pilots & mechanics. 122 pgs. P/N 13-01322

AVIONIC SYSTEMS: OPERATION AND MAINTENANCE – Explains avionic equipment and systems from the simple magnetic compass to the most advanced integrated flight management systems. Author James Wasson leads you through each subject in a comprehensive, yet easy-to-follow manner. Excellent foundation for any avionics or aircraft electronics program. Includes review questions, laboratory projects & glossary table. 342 pgs. P/N 13-01234

HUMAN FACTORS FOR GENERAL AVIATION – Helps pilots analyze why accidents happen. This text covers how to identify cockpit design problems, how your eyes and ears gather information, what factors affect your decision making, how to use cockpit resources effectively and much more. P/N 13-01236

FLIGHT THEORY FOR PILOTS BY CHARLES E. DOLE – For the pilot who needs to expand his knowledge of flight theory. Explains the basics of aerodynamics as they apply to flying an airplane or helicopter. The principal aerodynamics text in USAF courses taught by The University of Southern California. Written for pilots by a pilot. P/N 13-01237

AIRCRAFT SYSTEMS FOR PILOTS BY DALE DEREMER – The most comprehensive book available on aircraft systems as they relate to pilots and pilot training. All system types are covered in detail. Excellent for commercial and advanced private pilot programs, as well as the individual who wants to be well versed in how his/her airplane really works. 450 pgs. P/N 13-04665

FLY THE ENGINE BY KAS THOMAS - Being a skilled pilot means more than knowing how to operate stick and rudder: It means knowing how to operate throttle, mixture, prop, boost pump, primer, wastegate, alternate air, carb heat, cowl flaps, and other power controls in a way that maximizes safety, performance and engine life. This book shows you how! Filled with real-world examples culled from 40 years of flying, Fly the Engine takes you through all phases of engine operation, one step at a time, showing you how to spot engine discrepancies on preflight; how to start a hot, cold, or flooded engine; how to troubleshoot a rough runup; when (and when not) to lean the engine for all phases of flight; how to recognize valve sticking; and much more. P/N 13-05395

ASA - YOU CAN FLY! - For those who have always dreamed about flying but didn't know where or how to start — now they can take that long-awaited first step with some guidance. You Can Fly! authors Greg Brown and Laurel Lippert write to those who are considering flight training, specifically to answer frequently asked questions about it, and at the same time entice more people into exploring general aviation. P/N 13-05754

BOOKS

EAA PUBLICATIONS

FLYING & GLIDER MANUALS

Edited reprints of the original "Building and Flying Manuals" published from 1929 to 1933 by Modern Mechanix and Inventions. 70 pages each.

1929 FLYING & GLIDING MANUAL – Contains information on flight lessons plus building the Heath Super Parasol, Russell-Henderson Light Monoplane and an easy to build glider. P/N 13-40600

1930 FLYING & GLIDING MANUAL – Plans for building a Heath Baby Bullet, set of light plane metal floats, building the Northrop Glider, Lincoln Biplane, Alco Sportplane, plus other tips on building and welding. P/N 13-40605

1931 FLYING & GLIDING MANUAL – Building the "Longster," Georgias Special, a glider and secondary glider, Driggs Dart, the Church Midwing, the Heath Seaplane Parasol and its pontoons, the Northrop Glider and other gliders. P/N 13-40610

1933 FLYING & GLIDING MANUAL – Building the Gere Sport Biplane, Pietenpol Floats, Pietenpol Sky Scout, and Henderson Longster, Also Long Harlequin motor plans, a hydroglider and information on building propellers. P/N 13-40620

WOOD AIRCRAFT BUILDING TECHNIQUES (120 PAGES) – Excellent resource book on "How To" build or repair wood aircraft. P/N 13-40635

WELDERS HANDBOOK (AUTHOR: RICHARD FINCH, CO-AUTHOR: TOM MONROE)

The ONLY book in the world that teaches modern day aircraft welding. Written for the home workshop beginners, but also contains facts and procedures helpful to factory welding departments. Tells which type of equipment is best for you. Not like any other weld textbook. Current info. Self-teaching. Easy to understand. The author is a certified welder & college welding teacher. Written clearly enough that high-school students can teach themselves how to weld, using the book. 160 pgs: Over 400 photos & drawings. P/N 13-20610

TURBOCHARGERS (AUTHOR: HUGH MACINNES CO-AUTHOR: TOM MONROE)

The ONLY book in the world that fully explains the benefits of turbocharging piston engines. Used by most aircraft and auto factory engineering departments as THE sourcebook for designing turbo systems. Also used by race car and aircraft owners to design better-than-stock turbo installations. Many examples of high horsepower turbo engines. 3rd revision, latest info. 160 pages, 154 photos, 131 drawings, 70 charts. P/N 13-20615

ASA AVIATION INSTRUCTOR'S HANDBOOK

Written by the FAA. Includes principles of teaching and learning, with extensive details on how to pass along aeronautical knowledge and skills. 152 pages, glossary, index. P/N 13-19380

AIRPLANE FLYING HANDBOOK

FAA-H-8083-3 reprint. Completely rewritten and revised in 1999. Introduces basic pilot skills and aeronautical knowledge to student pilots. It is also beneficial to pilots who wish to improve their flying proficiency and aeronautical knowledge, those pilots preparing for additional certificates or ratings, and flight instructors engaged in the instruction of both students and certified pilots. Supercedes AC61-21A Flight Training Handbook. P/N 13-00975

THE GOLDEN AGE OF AIR RACING

S.H. "Wes" Schmid and Truman C. Weaver combine Volumes 1&2 into one book about those who made this age famous. Contains 3-view drawing, many rare photos and comprehensive race results from major events. A must for the air racing fan! P/N 13-40625

AIRCRAFT WELDING (94 PAGES)

Fundamental welding techniques for the building and repair of aircraft, from the pages of Sport Aviation and other sources. 94 pages filled with aircraft welding tips and information. P/N 13-40630

FLIGHT MANEUVERS FOR THE PRIVATE AND COMMERCIAL PILOT (BRAD DEINES)

Covers all the flight maneuvers contained in the Private and Commercial Practical Test Standards for single engine land. P/N 13-40692

INSTRUMENT PILOT FLIGHT MANEUVERS (BRAD DEINES)

Covers all the flight maneuvers contained in the Instrument Rating Practical Test Standards, plus additional training maneuvers. These manuals take each flight maneuver and break it down into an easy to read step by step procedure. Plus, most maneuvers also contain a profile giving the reader a visual description of the flight maneuver. P/N 13-40694

AIRCRAFT SYSTEMS FOR PILOTS (DALE DE REMER)

This book explains the various systems and how they operate. It contains chapters on physics, engine types, theory of operation, propellers and governors, fuels and fuel systems, and power management. It is recommended reading for all pilots and maintenance technicians. P/N 13-40665

VFR RADIO PROCEDURES IN THE USA

This paperback is the perfect tool to teach radio communications in all the different kinds of airspace or to refresh your memory to help you go through your local Class C airspace. Provides you with samples of radio calls that you can expect to hear and transmit at airports in Class A thru Class E. P/N 13-29945

THE MAKING OF THE DAISY MAE

Over 200 pages of solid, easy to understand information on Design and Construction of the author's own personal biplane. Plenty of illustrations. The plans give detailed instructions for constructing The Daisy Mae Aircraft. Materials kit list is available from Aircraft Spruce. See the kits section for plans. P/N 13-04086

VFR COMMUNICATIONS KIT

This aviation communication resource is currently the only aid designed to help you communicate effectively and efficiently during your flights. Learn how to communicate quickly and effectively by making a 'script' for every VFR flight. Each of the 32 templates included in the "Kit" matches a different type of radio communication that may be needed in a VFR flight. After just a couple of flights you will hear the difference! P/N 13-06864

IFR COMMUNICATIONS KIT

This aviation communication resource is the companion to the VFR Communications Kit. It was designed to help you improve your IFR communications with less stress by making a 'script' for every IFR flight. Script assembly instructions, template descriptions, an ample supply of each of the 32 communication templates. After a few flights you will sound like a seasoned pilot! P/N 13-06865

BOOKS

FLIGHT MANUALS BY WILLIAM KERSHNER

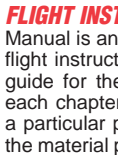

STUDENT PILOT FLIGHT MANUAL – Proves step-by-step ground and flight information for student pilots working on the private certificate. Full of useful information for safe flying and cites common errors by new pilots. Includes more than 280 illustrations, photographs, and charts. 368 pages, paperback. P/N 13-32230

THE ADVANCED PILOT'S FLIGHT MANUAL – Provides information needed by veteran pilots preparing for the commercial written and flight tests. Explains effects of light, drag, thrust, altitude, and temperature on aircraft performance. Includes over 440 tables, charts and illustrations plus a sample commercial written test and answers. 342 pages. P/N 13-32225

FLIGHT MANUALS BY WILLIAM KERSHNER

THE INSTRUMENT FLIGHT MANUAL – Teaches everything pilots need to know to acquire and maintain an instrument rating. Covers airspace, clearances, and altitudes relating to high performance, retractable gear, four place aircraft. Includes ATC procedures, partial panel flying, and weather flying. 296 pages, paperback. P/N 13-32215

FLIGHT INSTRUCTOR'S MANUAL – The Flight Instructor's Manual is an invaluable reference for those working on the flight instructor certificate and serves as an indispensable guide for the new instructor. The book is organized so each chapter can be used as a stand-alone reference for a particular phase of instruction. The information parallels the material presented in The Student Pilot's Flight Manual, The Advanced Pilot's Flight Manual, The Basic Aerobatic Manual, and The Instrument Flight Manual, allowing The Flight Instructor's Manual to serve as a "how to instruct" guide rather than a comprehensive textbook on the basics. Softcover, 8.5" x 11", 503 pages. P/N 13-32220

BASIC AEROBATIC MANUAL – In this manual covering basic aerobatics, Bill Kershner introduces maneuvers in order of difficulty, covering a variety of them in his clear, understandable, and humorous style. The Basic Aerobatic Manual is fully illustrated with the author's own drawings and contains a practical syllabus, a detailed bibliography and an index. Though the manual emphasizes airspeeds and techniques recommended for the Cessna Aerobat, the maneuvers described in the book may be performed in other airplanes certified for aerobatics. P/N 13-32210

REFERENCE BOOKS

DICTIONARY OF AERONAUTICAL TERMS (DALE CRANE) – A 1-volume library, explains more than 5,000 aeronautical terms and hundreds of abbreviations you should know. Almost 600 pages. Emphasis on aeronautical mechanics, engineering, electronics, and production. P/N 13-28700

DUAT AND WEATHER INTERPRETATION HANDBOOK (WILLIAM B. SANDERS & JOHN P. DAVIS)

– get up and running on DUAT and translating National Weather Service reports. Explains how to log on the DUAT, access weather briefings, file, amend, and cancel flight plans, interpret weather dumps, encode and decode locations. P/N 3004A

GLIDER FLYING HANDBOOK – The first book by the FAA completely dedicated to all aspects of glider flying and glider operations. Covers certification process and requirements, medical factors, aeronautical decision making, aircraft components and systems, soaring maneuvers and techniques, in-depth weather theory and services and launch & recovery procedures. P/N 13-02589

FLYING LIGHT RETRACTABLES – Follow author LeRoy Cook on a tour of the retractable-gear airplanes you've always wanted to learn more about. Flying the Light Retractable is an informative journey through the development history of each plane with plentiful insight into design considerations, evolutionary changes, advantages and disadvantages of the different models, and background on maintenance issues. Pilots or potential owners will really get a sense of the subtle or not-so-subtle differences; this is like going flying with the author and having the advantage of his eye for detail and sense of observation. Beautiful photographs (some in color) accompany each airplane discussion, covering these aircraft: Mooney M20C, M20J 201/MSE, Beech Bonanza 35, Beech Sierra, Cessna Cardinal RG, Cessna Cutlass RG, Lake Buccaneer, Piper Comanche 180, Piper Arrow, and Rockwell Commander 112TC. P/N 13-05247

AIRLINE CAREERS / INSTRUMENT FLYING

DICTIONARY OF AVIATION (2ND EDITION) – This up-to-date dictionary of aviation and aeronautical English contains more than 9,500 terms and is designed for those specializing in aviation and related industries, including trainee pilots, cabin crews, maintenance crews, ground staff, and other airline personnel. Ideal for professionals, aviation enthusiasts, those who are new to aviation, and those for whom English is not a first language, this practical reference features clear, simple definitions. Sample sentences, pronunciation guides, usage guides, and supplementary information accompany not only basic terms but also specialized technical vocabulary. P/N 13-03482

THE INSTRUMENT FLIGHT TRAINING MANUAL (PETER DOGAN) – Simplifies IFR for the student and updates the veteran, follows the format of a successful training program step by step. Chapters include knowing and using instruments, attitude instrument flying, IFR planning and procedures, VOR, ADF, holding, approaches, emergencies, and more. Review questions each chapter, pertinent FAR's, anecdotes and advice from instrument pilots. 276 pages, 150 illust.. New third edition, completely updated and revised for 1992. P/N 13-33325

INSTRUMENT PILOT FAA WRITTEN EXAM (IRVIN N. GLEIM) – The easiest, fastest, and least expensive method to pass the FAA written examination. All 832 FAA questions, answers next to each question, and outlines of what you need to know for each chapter. Only airplane questions are included. P/N 13-32320

IFR PRINCIPLES AND PRACTICE – Provides information needed by veteran pilots preparing for the commercial written and flight tests. Explains effects of light, drag, thrust, altitude, and temperature on aircraft performance. Includes over 440 tables, charts & illustrations plus sample commercial written test & answers. 342 pgs. P/N 13-29000

INSTRUMENT FLYING (TAYLOR) – This is a practical, readable guide to IFR proficiency for veteran or student instrument pilots. Covers attitude instrument flying, VOR navigation, holding patterns, NCB, VOR and ILS approaches, and emergencies. Weather radar is also covered. Includes a study of accidents which point to common mistakes made by instrument pilots. 3rd edition, revised & expanded. 267 pgs. P/N 3046

VOYAGER (DICK RUTAN / JEANA YEAGER) – Dubbed Aviation's Last First, Voyager is a remarkable story of patriotism, dreams, desire and determination. Read all about what was accomplished in this great, free nation of ours. The Voyager republication makes a superb addition to any library. The Adventure Library has reproduced the Voyager book in a handsome hardcover edition. There are over 352 pgs of text and dozens of photographs that will allow the reader to re-live the world's longest flight. P/N 13-01777

FLIGHT OF VOYAGER CD (DICK RUTAN) – This is a recount of the horrific, horrendous, heroic and humorous moments of the Voyager project through the eyes of the pilot Dick Rutan. On December 14, 1986 Voyager took off from Edwards AFB in California and 9 days later landed at the Edwards, completing the first ever non-stop, unrefueled world flight. This 3-CD set (3.5 hrs) includes a mini journal map of the flight, historic photos, fun facts, and more. P/N 13-01163

OWNING, BUYING OR FLYING THE CESSNA 150/152 – If you are considering buying a Cessna 150/152, or already own one, this book covers it all! Mike Arman is an advanced ground instructor, who uses his knowledge of flying, to impart helpful information to students and experienced pilots alike. Tips on buying, maintaining and upgrading a Cessna 150/152 are plentiful in this useful and entertaining book. P/N 13-03481

BOOKS

ATC & WEATHER: MASTERING THE SYSTEMS (2ND EDITION, BY RICHARD COLLINS) – In this exciting new edition, Richard Collins explains how to work air traffic control an dweather to maximum advantage on every flight. The emphasis is on judgment and the interface between pilot and environment. Addresses both VFR and IFR situations, from flight planning on through to arrival and landing. Soft cover, 172 pgs., indexed. P/N 13-02356

AIR CRASHES (BY RICHARD COLLINS) – What went wrong, why, and what can be done about it - this book examines factors that have led to past accidents so readers can avoid repeating them. Hard cover, 254 pages, indexed. P/N 13-02359

THE SAVVY FLIGHT INSTRUCTOR (BY GREG BROWN) – This book teaches tips and strategies for recruiting new and return flight students, increasing students' skills and customer satisfaction for the individual flight instructor, and for flight schools and managers. The author, a flight instructor since 1979 and an enthusiastic general aviation advocate, exhorts flight instructors to strive for professionalism, giving vital guidance for advancing their careers while helping promote general aviation. Foreword by Sean Elliott, Executive Director of NAFA. 213 pages, illustrated. P/N 13-02382

NOTES OF A SEAPLANE INSTRUCTOR: AN INSTRUCTIONAL GUIDE TO SEAPLANE FLYING (BY BURKE MEES) – Gives pilot all the information they need to add a seaplane to their certificate. All the seaplane maneuvers are covered, starting with preflight, through taxiing, takeoff, landing, and postflight procedures; also operating in various water conditions, stability of the aircraft on the water, step-taxi and -turn, and much more. Many illustrations, inspired by the author's original seaplane notebook sketches, are included to further explain the concepts. Soft cover, 160 pages, illustrated. P/N 13-02367

FLIERS (BY KATIE GOODE) – Explores aviators and their art, careers, kinds of flying; airshow performers, skywriter, Alaska bush pilot, airline captains, homebuilt airplane pilot, airforce captain, firefighter pilot, news-helicopter pilot, & more. All stories are in the pilots' own words. Perfect for experienced pilots or those active in "hangar flying," *Fliers* is motivational reading for all and makes an excellent guide to careers in aviation! Introduction by Chuck Yeager. Fully illustrated. Soft cover, 220 pgs. P/N 13-02362

PILOT'S HANDBOOK OF AERONAUTICAL KNOWLEDGE – Written for the applicant preparing for the Private, Commercial, or Flight Instructor Certificates, it is also valuable to flight instructors as a teaching aid. Providing basic knowledge essential for all pilots—from beginning student pilots to those pursuing more advanced pilot certificates—this introduces pilots to the broad spectrum of knowledge needed as they progress through pilot training. This book has all the information necessary for operating an aircraft. P/N 13-00983

ASA GALLOPING ON WINGS - Galloping on Wings with the P-51 Mustang is the action-packed autobiography by air race pilot Howie Keefe. Howie Keefe, USNR (retired), takes you behind the scenes to get a personal glimpse into the amazing and precarious world of air racing. The author's thrill-a-minute account is an inspiring chronicle of his many fascinating adventures from a lifetime of aviation exploits. Ride along at over 400 mph as he describes remarkable events from his early days of training to setting records and winning trophy after trophy in numerous Unlimited Class Air Races at Reno, Cape May, Miami, and more. P/N 13-05651

ASA TEACHING CONFIDENCE IN THE CLOUDS - Today, pilots are faced with a new and challenging era of glass cockpit general aviation aircraft, innovative aircraft design, advances in avionics technology, and changes to instrument procedures and airspace. Students are more technically savvy. Therefore with time/money always at a minimum, a demand exists for highly skilled flight instructors who know the best teaching methods for flying IFR. P/N 13-05652

SAY AGAIN, PLEASE: GUIDE TO RADIO COMMUNICATIONS (2ND EDITION, BY BOB GARDNER) – This new edition adds material on GPS, Land and Hold Short Operations (LAHSO), and has been expanded and updated to reflect current rules and operating procedures. Chapters cover communication etiquette and rules, understanding radio equipment, emergency situations, and IFR communications & clearances. Also included: a concise summary of the FAA's communication facilities and their functions, airspace classifications and definitions, and FAA's recommended shorthand for copying clearances. Soft cover, 208 pages, illustrated & indexed. P/N 13-01064

TIPS TO FLY BY (BY RICHARD COLLINS) – Veteran pilot Dick Collins draws on his extensive experience at the controls of a variety of light aircraft. Text is organized along the natural progression of a flight: through takeoff, climb, enroute, descent and landing. Added focus is placed on high performance singles, twins, and emergencies. This book imparts the kind of flying savvy that takes thousands of flight hours to obtain. Soft cover, 224 pgs, indexed. P/N 13-02383

ROTARY WING FLIGHT – Includes discussion on helicopter aerodynamics, common flight techniques, normal field operations, and precautionary measures, and critical conditions. 122 pages, glossary. P/N 13-00986

MENTAL MATH FOR PILOTS (BY RONALD MCELROY) – If you are simply looking for a way to improve your math skills in the cockpit, then this book is a must read. Mental Math revs up the brainpower to quickly process not only those pesky math questions asked during airline interviews, but expands the mental hard drive to handle a wide range of practical number problems in flight. Soft cover, illustrated, includes index & glossary, approximately 117 pages. P/N 13-03201

THE PERFECT FLIGHT (2ND EDITION, BY RICHARD COLLINS) – In this landmark book, Taylor provides VFR pilots with an emergency reserve of instrument flying techniques and procedures they need in order to cope with an dsurvive an inadvertent encounter with IFR conditions. Soft cover, 138 pgs, illustrated & indexed. P/N 13-04189

THE ART OF FLYING (BY ROBERT BUCK) – Robert Buck discusses how the smart pilot sharpens and uses his "feel" for the airplane; how the best pilots fine-tune their knowledge and skills to plan shrewdly, command confidence, and handle their aircraft smoothly. Stresses the need for pilots to be in command of their flying. Hard cover, 186 pgs, indexed & illustrated. P/N 13-02354

FROM THE GROUND UP - This full-color illustrated aviation ground school textbook is the most popular aviation text in many countries throughout the world. Rewritten for U.S. operations and procedures, this book is often referred to as the "bible" for ground school flight training and is more comprehensive and informative than the Aeronautical Information Manual (AIM). From the Ground Up offers a wide range of advice, techniques and instruction on practically every aspect of flying, supported with beautiful color illustrations and photographs throughout. A sample Private Pilot FAA Knowledge Exam concludes the book. Pilots will find everything they need to know within its covers. Soft cover, full-color illustration, glossary, indexed, 352 pages. P/N 13-04422

OWNING, BUYING OR FLYING THE CESSNA 150/152 - If you are considering buying a Cessna 150/152, or already own one, this book covers it all! Mike Arman is an advanced ground instructor, who uses his knowledge of flying, to impart helpful information to students and experienced pilots alike. Tips on buying, maintaining and upgrading a Cessna 150/152 are plentiful in this useful and entertaining book. P/N 13-03481

ASA - POWERED PARACHUTE FLYING BOOK - This new FAA handbook introduces the basic pilot skills and knowledge essential for piloting powered parachutes. It benefits student pilots just beginning their PPC endeavors, as well as those pilots wishing to improve their flying proficiency and aeronautical knowledge, and flight instructors engaged in the instruction of both students and licensed pilots. P/N 13-05761

BOOKS

THE PROFICIENT PILOT (BARRY SCHIFF) – The popular text on airmanship in a newly revised and enlarged edition. Covers all aspects of the subject accurately and concisely, using diagrams, tables, and graphs to make complex information clear. 320 pages. 100 illustrations, hardcover. P/N 13-23100

THE PROFICIENT PILOT, VOL.2 (BY BARRY SCHIFF) – Schiff disposes of popular misconceptions about cruise control, flying in turbulence, coping with wind shear, and obtaining meaningful performance data. Soft Cover, illustrated, indexed, 328 pages. P/N 13-01443

FLYING WISDOM: THE PROFICIENT PILOT, VOL. 3 (BY BARRY SCHIFF) – Diverse topics such as Deep Stalls, Black-Hole Approach, myth of The Downwind Turn, expectations vs. reality, CRM, and a short course that effectively describes the principles involved in flying jet airplanes. Also flying tips for fun & profit. Soft cover, 360 pgs, illust., indexed. P/N 13-01444

A PILOT'S GUIDE TO AIRCRAFT AND THEIR SYSTEMS (BY DALE CRANE) - Technological advances, accompanied with additional complexities, demand that today's modern aircraft be operated exactly the way designers intended. This book furnishes pilots and armchair aviators with explanation and insight into what the aircraft, powerplant, and each of the systems do. 320 pgs. P/N 13-02422

CONFIDENT FLYING—A PILOT UPGRADE (BY RICHARD COLLINS & PATRICK BRADLEY) – In this unique book, the authors' reflective insights provide the basis for a program of risk management, sound decision making, and judgment. Richard Collins and Patrick Bradley share both good and bad decisions they've made throughout their flying careers. Through their personal anecdotes, stories, and familiar writing style, readers will absorb the information without even realizing they're being taught some of

the most valuable lessons in their aviation career. Soft cover, 268 pages, indexed. P/N 13-02358

FLYING IFR, 4TH EDITION (BY RICHARD COLLINS) – invaluable discussions on instrument airmanship, weather analysis, flight planning and decision making, handling equipment glitches, and that critical survival skill — partial panel flying — are all presented for the sole objective of better preparing you to fly on IFR flight plans. The only tests this book prepares you for are those encountered in flying actual IFR. Soft cover, 230 pages, indexed. P/N 13-02363

FLYING THE WEATHER MAP (BY RICHARD COLLINS) – Following an in-depth discussion of the logic of aviation weather and basic theory, Collins takes you along on 46 actual cross-country flights. The anecdotes provide a valuable education in weather interpretation, forecasting and decision making. Soft cover, 234 pages, illustrated, indexed. P/N 13-02386

AVIATION MECHANIC HANDBOOK, 5TH EDITION (BY DALE CRANE) – A core reference manual for mechanics, aircraft owners, and pilots, this book compiles specs from stacks of reference books and government publications into a handy, toolbox-size guide. All the information critical to maintaining an aircraft. P/N 13-02366

CHECKLIST FOR SUCCESS (BY CHERYL CAGE) – This book contains the same Pilot Interview Preparation Program that has been used to prepare pilot clients since 1988. Checklist was written to assist pilots of any experience level with the pilot interviewing process. It has been used successfully by "beginning" pilots looking for their first pilot position, retired military pilots looking for commercial cockpit positions, and commuter & displaced airline pilots looking for a job with a major airline. P/N 13-28701

ALASKA JUSTICE BY M.D. KINCAID - Alaska Justice is a thorough Alaskan adventure, packed with flying action. Trooper Blake uses Bush planes -- on wheels, floats, and skis -- instead of patrol cars, to seek justice in the Last Frontier. Blake fights blizzards, grizzly bears, and crazed-killers in this 100,000 word feel-good novel, which is enjoyed by pilots and passengers alike. The author, Mike Kincaid, referenced twenty of years of notes as a Trooper/Pilot to base this novel and actual events. Here's what 747 Captain Dave Glasebrook just wrote about Alaska Justice: "That was one adventure after another after another. Whew! Definitely action. That was just like Indiana Jones with no time for popcorn or restroom breaks." P/N 13-05271

NONDESTRUCTIVE & ULTRASONIC TESTING FOR AIRCRAFT – Preparation, procedures, inspections, applications, and testing methods are discussed in this reprint of two FAA Advisory Circulars. Effective 1975; 96 pages. P/N 13-02342

AERODYNAMICS FOR NAVAL AVIATORS – This textbook presents the elements of applied aerodynamics and aeronautical engineering which relate directly to flight training and general flight operations. Originally published by the U.S. Navy. 432 pages. P/N 13-01060

AVIATION WEATHER – Earth's atmosphere, common IFR procedures, high-altitude weather and special area weather considerations are thoroughly discussed. Use with Advisory Circular 00-45E, Aviation Weather Services. Many of the FAA Knowledge Exam weather questions are pulled from this text. Effective 1975. 234 pages. P/N 13-01062

ASA AVIATION WEATHER SERVICES - Last revised in 1999, this new Advisory Circular 00-45F edition supersedes AC 00-45E, features full-color illustrations throughout, and full coverage of weather-related tools to assist every pilot's flight planning and in-flight decisions. P/N 13-05269

AVIATION WEATHER COMBO PACK – Aviation Weather and Aviation Weather Services are packaged together for greater savings. Also includes laminated weather code key cards, detailing the TAF/METAR abbreviations. P/N 13-02341

BIRDFLIGHT AS THE BASIS OF AVIATION - OTTO LILIENTHAL - It's the work of a creative genius whose observation, analysis, ingenuity and daring laid the foundation for the development of aviation. After a comprehensive scientific study of how birds fly, Lilienthal recognized the superiority of curved wing surfaces. He then developed a theory of flight, and designed and built a series of gliders - bridging the gap between those who dreamed of flying and those who flew. Learning of Lilienthal's fatal gliding accident in 1896, the Wright Brothers became inspired to investigate "the problem of human flight." They carefully studied his work, developed their own theories and designs, and invented the airplane. Author: Otto Lilienthal Cover: Soft Pages: 151 P/N 13-01488

INSTRUMENT FLYING REFRESHER (BY RICHARD COLLINS & PATRICK BRADLEY) – In this unique book, veteran IFR pilot Richard Collins takes the right seat beside Patrick Bradley to demonstrate effective ways to grasp & solve IFR problems and eliminate uncertainties that may plague even current IFR airmen. Carefully examines airline and general aviation accidents to point out how threatening situations can be avoided or safely confronted. P/N 13-02364

PILOT EXAMINER'S HANDBOOK – This FAA reprint is mandatory for Designated Plot Examiners (DPEs) and great for Flight Instructors. Outlines performance and procedures for all checkrides and explains examiner responsibilities, limitations and privileges. Effective 1976; 196 pages. P/N 13-02340

BOOKS

TIPS FOR SAFETY FLYING

TAMING THE TAILDRAGGER (JOHN F. BALL) – A flight manual for tailwheel aircraft, basic enough for the student pilot, thorough enough for the advanced. Includes performance figures and limitations for the classic planes, plus techniques and procedures for short- or soft-field operations, maintenance, transitioning from tricycle gear, more. 96 pages. Paperback.

P/N 13-27100.....

AIRPLANE TALK (CAPT. GLENN CARLSON) – New 2nd edition by Capt. Glenn Carlson. Thoroughly covers communication procedures for all aspects of both VFR and IFR flight, and how pilots should properly use the air traffic control system. 266pp. Illus.

P/N 13-29100.....

MAKING PERFECT LANDINGS IN LIGHT AIRPLANES (RON FOWLER) – No matter how long you have been a pilot and no matter what degree of skill you have attained, if you are to land perfectly you must exert 100% effort toward that task. Many pilots resign themselves to imperfect landings merely because they are unaware of the simple fact that even the pros must work at each landing.

P/N 13-23500.....

AVOIDING COMMON PILOT ERRORS (JOHN STEWART)

– The author discusses errors that pilots frequently make, particularly in controlled airspace, and advises how to fly more safely. Also explains new FAA control equipment and ATC procedures that will save you time and money during a flight.

P/N 3033.....

SUNSET TO SUNRISE – Sunset to Sunrise by David Robson. Night flight is one of the most pleasant forms of flight. Every city looks good at night. The sparkling lights, stars, moon and reflections combine to produce a spectacle many only dream about. However, night flight requires different technique, perspective, and considerations than day operations. The aircraft must be flown with reference to the flight instruments, and the outside visual references take on new importance while at the

same time providing different illusions. Night flight can be a test for even the most experienced pilot.

P/N 13-03285.....

INSTRUMENT PILOT FLIGHT MANEUVERS – Provides a thorough explanation of each maneuver and task called for in the FAA's Instrument Practical Test Standards (PTS). The latest update improves upon its sound platform with even more information for the pilot seeking an instrument rating. Both the 1998 and oral PTS are included so that the manual reflects the current standards you will encounter during the check-ride. In the intervening years, the FAA has changed

some terminology in the PTS, and this fine-tuning is also present in this, the third, edition of the manual. With GPS and RNAV navigation much more commonplace, these inclusions have also been made by the FAA. In addition to the technical changes, the publisher has also improved the graphics to better illustrate each maneuver, while retaining those maneuvers that the FAA had deleted from its Instrument Flying Handbook for greater depth. A cross reference of applicable FAA publications to each maneuver and task helps with further research. The spiral-bound manual is easy to use, clipping onto a standard, approach plate-size kneeboard for flight.

P/N 13-02733.....

IFR: A STRUCTURED APPROACH – For the instrument pilot seeking to upgrade his or her skills, John C. Eckalbar's IFR: A Structured Approach provides compelling insights. Eckalbar, a well-regarded instructor for the American Bonanza Society, offers tips for "flying by the numbers" and specific numbers (power settings, airspeeds, and descent rates) for flying GPS approaches in particular. If you've been stumped by circling approaches or DME arcs, he also has much to say on those topics, as well as a two-part look at mastering the ILS. If one book could help make the leap from a bit player to a skilled conductor of instrument flight, this is it. Hard cover, 250 pages. Illustrated, black & white photos, chart excerpts.

P/N 13-04566.....

HOMEBUILT AIRCRAFT

RE-INVENTING THE AIRPLANE (BURT RUTAN) – This book is an outstanding compilation of history about Burt Rutan, his family, his airplanes, people who built and flew the airplanes he designed, plus the incredible Voyager story. An interesting look into a true American aviation genius. Illustrated. Hardback. (Vera Rollo)

P/N 13-15165.....

FLIGHT TESTING HOMEBUILT AIRCRAFT – Defines flight testing as a four phase (pre-flight, first flight, envelope expansion, and performance), step-by-step process of learning the limitations of an aircraft, defining and eliminating problems, and determining aircraft capability and optimum flying techniques. This book is a must-have for all homebuilders, 189 pgs illustrated.

P/N 13-40685.....

CONSTRUCTION OF TUBULAR STEEL FUSELAGES BOOK – This book provides step by step instructions on how to construct a perfect tubular steel fuselage. It is the result of hundreds of hours of development in the shop doing rapid prototyping of perfectly symmetrical and dimensionally accurate fuselages and assemblies, without special jigs.

P/N 13-03707.....

CHOOSING YOUR HOMEBUILT "THE ONE YOU'LL FINISH AND FLY" (KENNETH ARMSTRONG) – Helps answer the three crucial questions every builder faces: Can you build it, can you fly it, and can you afford it? Chapters describe the relative merits of plans, kits, and materials packages, as well as what to ask the manufacturer and what to consider when buying a completed homebuilt. Other sections include a comprehensive section on engines, auto gas and avionics, plus pilot reports on 22 homebuilt designs including photos and specifications. 325 pages.

P/N 13-31115.....

YOU WANT TO BUILD AND FLY A WHAT? (DICK STARKS) – This is the boisterous, very funny, wildly exaggerated true story of Dick Starks, a math teacher who goes through the agonies and delights of learning to fly, buys an old Cessna, and then goes on to build a replica of a WWI Nieuport fighter plane. This is a book about the fun of flying and the joy of sharing that fun with family and friends.

P/N 13-15170.....

MODERN PROPELLER AND DUCT DESIGN – This book tells you the theory of propeller aerodynamics and how to size a propeller. The program allows you to optimize a propeller for a given horsepower and airspeed. Variables such as number of blades, pitch, airfoil, thickness, air density, thrust coefficient, prop efficiency, and airspeed are all explained. Discussion of various prop materials and duct theory is also included. (Martin Hollman) P/N 13-15175.....

STRESS WITHOUT TEARS (TOM RHODES) – This is a primary discussion, not an advanced text by an experienced aircraft stress analyst. Math and other theory is introduced, but only as necessary to master the subject matter. Stress analysis is presented in as simple terms as possible without complex scientific jargon and is done so in a readable and enjoyable manner.

P/N 13-15180.....

CHASING LEWIS & CLARK ACROSS AMERICA BOOK – Enjoy the breathtaking beauty of the Lewis and Clark trail from an open cockpit plane as you float over the same route the Corps of Discovery traveled 200 years ago. Stunning photographs of mighty rivers, plains and mountains—coupled with an adventure story—reveal America's soul.

Professional photographer and pilot Ron Lowery flew an open-cockpit airplane, that he and his son built, over 14,000 miles across America. Along with co-pilot and author Mary Walker, they landed at airports large and small...and not at all. Their adventure comes alive as one reads of the dangers and challenges they encountered on their journey. With the unique plane acting as ambassador, readers will share their cultural experiences as they dined with American Indians, flew aerial ballets with crop dusters, and landed on remote ranches. Through excerpts from the Lewis and Clark journals and visits with re-enactors, one will relive the greatest American adventure. Book is 10 x 13 inches, full color, 168 pgs.

Book..... P/N 13-04562.....

DVD..... P/N 13-04563.....

Book/DVD Combo..... P/N 13-04564.....

ANATOMY OF A SPIN – This thoroughly researched and documented text provides insight to all the major spin categories; upright, inverted, single and multi engine. Recovery techniques varies with aircraft design. Learn why ailerons may be of help in spin recovery, why some aircraft spin readily while others are reluctant to spin.

P/N 13-02080

IFR PRINCIPLES & PRACTICE – This concise, thorough, and unique book provides a singular presentation of a difficult subject, with many helpful diagrams. This book includes practice exercises and score sheets to enhance your learning and allow you and your instructor to quantify your progress.

P/N 13-02081

MOUNTAIN FLYING – Organized to follow the sequence of typical flight, the book preflight, takeoff, enroute, arrival procedures, and landing. The author discusses fuel management, the magnetic compass, the effects of high-altitude on weight and balance, and the airspeed indicator.

P/N 13-02082

ASA FLYING AMERICA'S WEATHER – Despite quantum leaps in cockpit technology, weather radar and forecasting techniques, flying often boils down to "someone sitting in a cramped cockpit somewhere, trying for all he's worth to figure out what meaning those clouds up ahead have for him." An understanding of how larger climatic forces affect each region's specific patterns can give that lone pilot the edge, and this edge is what Flying America's

Weather is all about. This illuminating book takes us on a pilot's tour of our nation's weather, from the brilliant blue of the Hawaiian Islands to the black and gray monster that is the Nor'Easter — and everything in between. It shows a grand and diverse country, dominated regionally by grand, diverse, and understandable patterns of weather. Flying America's Weather combines decades of climate research with hands-on experience, an awareness of larger weather forces at work on local geography, and critical examples of how weather contributes to aviation accidents. It focuses on what weather we can expect from the areas we fly in, yet provides a deep understanding of why it's there. In doing so, Flying America's Weather becomes an indispensable guide for all pilots, wherever they fly.

P/N 13-04065

ASA PILOT MEDICAL HANDBOOK - Indispensable for pilots and other aviation workers, this comprehensive guide contains the authoritative word on pilot health and flight safety. Being a safe pilot involves more than checking the weather, filing a flight plan, and performing a preflight inspection. It also requires that pilots assess their physical and mental health and evaluate a slew of situational factors.

P/N 13-06669

A PILOT'S GUIDE TO SAFE FLYING – This unique book is designed to help pilots avoid the pitfalls that have trapped many unwary pilots over the years. There is nothing else like it on the market today. This manual has received praise from reviewers around the world including the AOPA Air Safety Association, the National Association of Flight Instructors, and the Canadian Owners and Pilots Association. Author: Sander Vandeth

P/N 13-04063

178 SECONDS - THE POCKET BOOK THAT COULD SAVE YOUR LIFE – This booklet has been designed to bring together all the preflight planning elements in A Pilot's Guide to Safe Flying in the form of a series of questions, as a reminder to pilots of the issues that need to be considered prior to a flight. There is nothing like it on the market. Pocket Size.

P/N 13-04239

THE GEE BEE RACERS: A LEGACY OF SPEED - By: Charles Mendenhall The only work ever available which covers the entire line of Granville Bros. projects including all models of their sport and racing planes, as well as the drawings for a proposed Indy race car. Includes coverage of recent flying replicas and a discussion of the aerodynamic knowledge base in the 1930s, when these aircraft were built and cautiously raced, versus 1994 when the replicas are flown in aerobatic demos.

P/N 13-06754

LESSONS FROM THE LOGBOOK – Piloting techniques on diverse topics in this collection of stories from an experienced flight instructor's logbook. The book is organized to reflect all the phases of flight: preflight, departure, en route, and arrival, and concludes with a section on recurrent training. It provides piloting techniques on such diverse topics as night flying; what to do when you get stuck above or below a cloud deck; how to handle in-flight emergencies; evaluating real-life takeoff performance; pursuing a path to perfect flying; and much,

much more.

P/N 13-05019

ADVENTURES OF A P38 ACE HERBERT ROSS – Adventures of A P38 ACE is the life story of Colonel Herbert E. Ross - United States Air Force - Retired. This book of Memoirs written by Colonel Ross covers his Military Career as well as his life long love of being a Pilot. Colonel Ross has included detailed information on the Aircraft he flew as well as his amazing life story in a captivating and entertaining fashion. Over 200 pages with photos. A must read from a longtime Aircraft Spruce customer!

P/N 13-04221

INTERNATIONAL AIRCRAFT DIRECTORY

AP – Whether you're a pilot or an aviation enthusiast, the International Aircraft Directory from the editors of Plane & Pilot magazine is sure to have all you're looking for in an easy-to-use reference tool for checking facts about a particular model, identifying unusual aircraft, and recognizing trends in airplane design. Now in its third edition, the book features detailed descriptions and photographs of more than 500 airplanes from around the world, including single-engine, multi-engine, jet, classic antique, homebuilts, kit-builts, sailplanes, motorgliders, warbirds, and military aircraft flown by civilian pilots. The directory lists airframe and powerplant information and historical facts as well as standard data and performance specifications such as a horsepower thrust, weight, speed, and range. The 304-page softcover book.

P/N 13-04144

THE FLIGHT INSTRUCTOR'S GUIDE TO ENDORSEMENTS – Every endorsement the active Flight Instructor needs to provide clear, concise and accurate endorsements for their students. Compiled by an FAA Designated Pilot Examiner, it includes notes and guidance to the instructor. In addition, there are sections to record the endorsements made which complies with the CFI Records Rule and a TSA training log, both of which meet regulatory requirements. A BFR/ IPC section serves as a reminder to keep clients coming back to you for repeat business.

Number of Sample Endorsements for: Student Pilot 9 • Recreational Pilot 8 • Sport Pilot 6 • Sport Pilot CFI 5 • Private Pilot 3 • Commercial 3 • CFI 4 Instrument 3 • Multi-engine 2 • Misc 12

P/N 13-04181

POCKET REF (THOMAS GLOVER) 3RD EDITION –

This great little book is a concise all-purpose reference featuring hundreds of tables, maps, formulas, constants & conversions AND it still fits in your shirt pocket! Goes where you go! • Pocket Ref • 3rd Edition by Thomas J. Glover • Over 200 new pages and virtually thousands of updates! • Index for information access. • This book has been in print since 1989 and is now in its 3rd Edition. • It has also gone through numerous printings in each edition.

P/N 13-19342

THEY FLEW PROUD – They Flew Proud crisply

tells the story of the Civilian Pilot Training Program through the Army Air Force Cadets at Grove City College (PA.) and the Grove City Airport where the flight instructors (including Gardner Birch) trained the cadets to solo. Across the U.S., more than 435,000 men and women were taught to fly under the CPTP in pre and post WWII. In Grove City, the 8th Detachment's 486 students received almost 5,000 hours of instruction, and then went forward to serve their nation in WWII. 192 pages.

P/N 13-05672

AVIATION MAINTENANCE TECHNICIANS BOOK (DALE CRANE) – This textbook series provides the most complete, up-to-date texts for A&P students and educators. The curriculum meets 14 CFR Part 147 requirements and includes all of the aeronautical knowledge required for the FAA Knowledge Exams for AMTs. They are written and designed for at-home, classroom, or university-level training. Each comprehensive textbook includes colored charts, table, and illustrations throughout, in addition to an extensive glossary, index and additional career information. A study guide is included within each textbook in the form of Study Question sections, with Answer keys printed at the end of each chapter. These can be used for evaluation by an instructor or for self-testing. These textbooks are all inclusive; no separate, inconvenient workbook needed by the student / instructor.

General textbook.....P/N 13-00574
Airframe vol. 1.....P/N 13-00581
Airframe vol. 2.....P/N 13-00582
Powerplant.....P/N 13-00583

EVERYTHING EXPLAINED FOR THE PROFESSIONAL PILOT BOOK – 430 pages (8 1/2 x 11) crammed with virtually every scrap of information essential and necessary for every pilot. All that knowledge you wish you could have at your fingertips all the time, and many things you never even thought about. Fun to read and yet excruciatingly detailed. The ultimate reference book that explains all aspects of

aviation from proops to heavy jets P/N 13-03231

ARTFUL FLYING BY MICHAEL MAYA CHARLES – Michael Maya Charles identifies a path through which any pilot can seek to transform his flying skills from pedestrian to truly sky-worthy, and gain greater insight in the process. By drawing upon Eastern philosophy, Charles introduces pilots to a way of approaching flight with a “beginner’s mind.” Not only does this practice increase a pilot’s enjoyment of flying, but it also makes that pilot safer by increasing

situational awareness and mental flexibility in times of crisis. The book is layered with many examples that feature beginning students to experienced aviators, flying gliders to rotocraft and sport airplanes to heavy jets. Hardcover book, 323 pages. P/N 13-04015

FUNDAMENTALS OF SAILPLANE DESIGN – This book, the definitive text on sailplane design, grew out the authors work with the Akaflieg Braunschweig as well as his popular introductory course in sailplane design. To make the material accessible to pilots without an engineering background, an emphasis is placed on physical understanding and visualization. Mathematics is held to a minimum. Because it draws on decades of experience developed at the German Akafiegs, the material will help the experienced engineer to quickly develop a practical understanding of the considerations that go into the design of a high-performance sailplane. The design data tables and three-view drawings have been expanded to include entries for over 150 aircraft. CONTENTS: Volume 2 P/N 13-00361

MAYDAY MARION F. STURKEY – MAYDAY examine airline accidents caused by mechanical failure fire, mid-air collision, terrorist hijacking, and human error. Also, accidents caused by sabotage, suicide, fuel exhaustion, mistaken identity shoot-downs, spatial disorientation, hazardous weather, controlled flight into terrain, and other aerial perils. The author is a former military and commercial pilot. Readers embark on a brutally accurate journey through Commercial Aviation History. They re-live the airline accidents which have marred man’s conquest of the skies. P/N 13-04017

MID-AIR COLLISIONS BY MARION F. STURKEY – Offers readers brutally authentic accounts of collisions involving Military aircraft and Civil transports. Each chapter is a window through which readers re-live the aerial crisis, the voice transcript (where available), the collision, the investigation, and the Probable Cause. The author is a former military and commercial pilot, and this is his eighth book. He eliminates the fog of aviation techno-jargon and explains each accident in simple and easy-to-understand layman’s terms. P/N 13-05663

MASTERING GPS FLYING (BY PHIL DIXON & SHERWOOD HARRIS) – GPS mastery is becoming as necessary to pilots as basic stick and rudder skills. Mastering GPS Flying is a set of 6 flight lessons and 10 background chapters that give you all you need to become comfortable and proficient with GPS, no matter what your level of experience. Fully illustrated throughout with more than 50 charts, photos, and diagrams. P/N 13-03084

THE WICHITA 4: CESSNA, MOELLENDICK, BEECH AND STEARMAN – New perspective into Clyde Cessna, Walter Beech and Lloyd Stearman. Includes activities of J.M. “Jake” Moellendick, the “Father” of aviation in Wichita. These intrepid entrepreneurs, self-taught in their respective skills, developed an industry in the design and production of airplanes. From humble, primitive beginnings they built empires while establishing ground rules governing the operations of that industry, to include production methods, standards and engineering practices. Their actions brought recognition to Wichita, Kansas, as “The Air Capital of the World.” But rifts between them brought separation, as they went their separate ways to build that fledgling industry into the giant it became. The Wichita 4 provides a look at the factors leading these pioneers into their chosen career endeavors, what attracted them to flying, then brought them together to mutual friendship and affiliation in pioneering airplane business ventures and finally to separate paths leading to their own outstanding individual successes. 160pgs, 280 photos, paperback. P/N 13-00631

THE \$100 HAMBURGER – A Guide To Pilots’ Favorite Fly-In Restaurants - The burger is back and juicier than ever! This Second Edition of the little book private pilots live, and eat by, features over 1,000 pilot-recommended places to land for that meal at the end of the flight. The author rates restaurants in all 50 states and even includes 6 foreign locations including France, England and Germany. Just what every pilot needs to plan a fun outing in the plane and get some good food too. ?All reviews are from fellow pilots who’ve actually been there, chowed down, and awarded each place from one to five “burgers”. Tells everything, location, service, price, transportation, dress codes & hours of operation. P/N 13-03454

THE \$500 ROUND OF GOLF-A GUIDE TO PILOT-FRIENDLY GOLF COURSES – Here’s a combination travel, golfing and pilot guide all in one! The man who brought you the \$100 Hamburger turns to golf (a pilot hobby almost as popular as eating) and lists the 500 best places to land for a quick round of golf — every single one recommended for pilots. Covers all 50 states. Includes runway info, service, location, style, quality, price, transportation, operations & more. 50 bonus winning weekend golf tips included. P/N 13-03455

TURBINE PILOT’S FLIGHT MANUAL (BY GREGORY BROWN AND MARK HOLT) – Truly a text designed to help move the aspiring professional pilot up into the turbines. The book basic yet thorough approach makes no assumptions about the readers prior knowledge on the subject. P/N 13-00637

IT’S ALL UP IN THE AIR BY DON SUMMERS - It’s all up in the air spans the aviation career of Don Summers. Told with unique insights and perspective, his story takes the reader through the ups and downs of more than forty years of flying...as bomber pilot, bush pilot, air traffic controller, corporate and charter pilot. This is a trip through the critical, formative years of aviation piloted by a man who grew with the industry. His adventurous life has been up in the air. P/N 13-04020

ROTORCRAFT FLYING HANDBOOK (FAA HANDBOOK) – The Basic Helicopter Handbook (Advisory Circular 61-13B) has been rewritten and renamed the Rotorcraft Flying Handbook. Written for the applicant preparing for the private, commercial, or flight instructor certificate with a helicopter or gyroplane class rating, the book is also valuable to flight instructors as a teaching aid. Both aeronautical knowledge and skill for operating rotorcraft are covered. The book is broken into 2 sections: One dedicated to helicopters, and another dedicated to gyroplanes. Each section includes chapters covering aerodynamics, flight controls, systems, the rotorcraft flight manual, flight maneuvers, emergencies, and aeronautical decision making. In addition, the helicopter section includes chapters on weight and balance, performance, attitude instrument flying, and night operations. P/N 13-00735

THE AEROELECTRIC CONNECTION A Guide to Theory, Operation, Design and Fabrication of Aircraft Electrical Systems, Revision 12. Written by Bob Nuckolls with over 50 years of hands-on experience in electronics and aircraft electrical systems. 304 pages of 18 chapters plus Appendix are topped off with a discussion of the poor man’s approach to system reliability. Appendix Z offers dozens of variations for tailoring an electrical system to the builder’s project and mission requirements. P/N AEC001

AVIATION BOOKS BY HOWARD FRIED: INSIDE THE FAA – Fried has flown everything from 40 horsepower Cubs to Citations and Lear Jets, from gliders to float-planes. Fried founded a very active flight school in 1964 where he trained pilots for all certificates and ratings. In a career spanning seventeen years as a Designated Pilot Examiner until victimized by rogue FAA officials, he administered over four thousand certification flight tests for all certificates and ratings. Fried is a lecturer and speaker on Aviation Education and Safety and an expert witness in aviation litigation. Throughout his entire career he has dealt with the “friendly feds” and has come to know a great deal about the inner workings of the only agency of the United States Government that is authorized to promulgate and enforce its own rules. Inside the FAA...An Agency Out of Control explains just how badly this is done and what must be done to fix the problem.
P/N 13-04036

AVIATION BOOKS BY HOWARD FRIED: TELL ME ABOUT AIRPLANES – Although originally meant to be a book designed to answer children’s questions about airplanes, Tell Me About Airplanes is suitable for anyone of any age who is curious about just how airplanes work. Heavy as they are, just how do they defy gravity and stay aloft? How do they navigate from departure to destination? What happens in an emergency? And a myriad of other questions are answered in this fascinating little book.
P/N 13-04037

AVIATION BOOKS BY HOWARD FRIED: EYE OF EXPERIENCE – Howard Fried shares over fifty years and forty thousand hours of experience with pilots all over the world every four weeks with his column, “The Eye of Experience,” in AVweb, the bi-weekly aviation news magazine. Now all of the experience he has shared in his columns can be yours to keep in book form. With over fifty-five years and forty thousand hours of experience, as a flight school operator, flight instructor, and Designated Pilot Examiner who has administered over four thousand certification flight tests, one might think he has seen it all, but far from claiming he has seen it all, Fried says he is constantly surprised by the things both students and certified pilots do. In his seventies, Howard Fried is still an active flight instructor. He enjoys teaching because it presents an opportunity to pass his love of aviation along to others. Knowledge comes from experience and experience comes from mistakes. We can do it the hard way-- make the mistakes ourselves--or we can learn from the mistakes of others. Which will it be? Fried’s books help with the easy way.

THEY CALLED ME MR. BONANZA – How it all started in 1944; the original Bonanza design team and their early efforts to find the ideal airplane for the postwar market; how and why the V-tail was chosen; Experimental power plants, first flight wind tunnel testing; Staggerwing influence; birth of the Debonair; why the “straight” tail, airplane genealogy chart. Specs on all models from 1946-1972.
P/N13-04102.....

AVIATION RADIO COMMUNICATIONS MADE EASY – Talking on the radio comes easily for some pilots, not so easily for others. Adding to the pressure of using correct phraseology is the knowledge that everybody on that frequency can hear you. Thus a number of tools have become available to help pilots practice this important aspect of flying. Hugh Ward has designed a VFR communications “script” that a pilot can fill out during preflight and use in flight. He accomplishes this by providing a variety of templates that the pilot assembles and completes for each type of communications that might be needed. The 272-page spiral-bound workbook includes 32 different templates ranging from operations at nontowered fields to initial call-up of an approach control facility to requesting VFR traffic advisories, also known as flight following. You complete these templates - literally filling in the blanks-and practice them before your flight, then take them along-they’re sized to fit a standard pilot’s kneeboard. Six copies of each template are included, which should give most pilots ample opportunity to work with them.

AVIATION BOOKS BY HOWARD FRIED: EMERGENCY! TIPS, ANECDOTES AND PREPARATIONS – What may be a life-threatening event to one person may be a routine non-event to another. However there are some situations which anyone would consider an emergency. This book examines some of them and goes on to explain what can be done to prevent them, or to react properly when one jumps up and threatens a pilot.P/N 13-04039

AVIATION BOOKS BY HOWARD FRIED: FAY GILLIS WELLS - IN THE AIR AND ON THE AIR – In 1929, Fay Gillis Wells soloed before she was twenty-one. The next day she tumbled out of a disintegrating plane and saved her life with a parachute. She was the first woman to evacuate a damaged airplane with a parachute. This event was the start of a career that led her to Russia, to Africa, even to the White House as the White House Correspondent for the Storer Broadcasting Company. She flew a Russian military plane outside of Moscow; she covered wars. Aviation events, special world news items, and four United States Presidents; she patented special furniture for houseboats; she hobnobbed with celebrities from all professions; and through all of these adventures, this gracious woman with the heartwarming smile remained a devoted wife and mother. Fay Gillis Wells, in her ninety-four years, had enough adventures for several lifetimes. Yet, she remained a friendly unassuming lady whom everyone loves until the end of her life in December 2002. Her story cried out to be told.
P/N 13-04044

FROM TRAVEL AIR TO BARON...HOW BEECH CREATED A CLASSIC! – The complete story of Beech Aircraft’s recognition of the need for a true light twin to fill the market gap between the Bonanza and the larger Model 50 Twin Bonanza. This book covers the design concept, marketing strategy, and development of this Beechcraft model line from the first Travel Air in 1958 until the last in 1968. All the Baron models are included, from the Model 55 in 1961 and continuing through the 1994 Model 58 Baron.
P/N13-04103

THE IMMORTAL TWIN BEECH – Welcome to the history of one of Walter Beech’s finest creations- the Model 18 Twin Beech! This venerable aircraft had a production run of 32 years and an amazing, useful life. A behind-the-scenes look at the ongoing history of a unique airplane, one that not only “built” a company but served equally well in peace, war and then peace again. P/N13-24586

FOLLOWING AMELIA – In Following Amelia, Sandi Smith and Jay Merten share tales of their adrenaline-flowing 1995 world flight in a single-engine Piper Malibu. This book contains a daily narrative of the flight in fast-reading, novel-like style. The interleaved perspectives of international aviation, travel, humanitarian, and family make this book unusual and interesting. Sandi also weaves in facts about Amelia Earhart from her 1937 flight and compares Amelia’s flight to modern-day flying. Favorite Amelia’s idea for: CFIs looking for new lessons and challenges for their students • Student pilots who are exploring the potential of flying • Wives of pilots who are a bit afraid of flying • Pilots looking to fly to new countries, overseas, or around the world • Anyone who loves a great adventure
P/N13-04069.....

AIRLINE CAREER & INTERVIEW MANUAL – A unique book written by experienced aviators with solid airline backgrounds. Gives you step-by-step guidance on how to be in a winning situation while preparing for your interviews. If you are seeking an aviation career then this book is a MUST for you. “For many people, the reason they have taken wing is to ultimately fly for an airline. While the path to this goal often seems tortuous, the authors have made achieving this a bit more understandable with their new book...Anyone considering an airline career would do well to read this. It provides a no-nonsense look at the industry and provides some common sense advice...” Flight Training Magazine. Guaranteed insider tips on how to pass the interview the first time or your money back! 160 plus pgs., paperback
P/N13-00364

JENNY: THE AIRPLANE THAT TAUGHT AMERICA TO FLY - The WWII pilots who were the first to fly jets learned to fly in little cloth & wooden biplanes -- the aircraft of the 1920s & 1930s. One such airplane was the Curtiss JN4 Jenny, known as the Model T of airplanes because it was the first aircraft to be mass-produced. Jennys became the airplane of choice for barnstormers and early airmail pilots. Story of this remarkable airplane from the point of view of an early pilot. By David Weitzman
P/N 13-06756

MAINTENANCE & OWNERSHIP

PURCHASING & EVALUATING AIRPLANES (BRIAN JACOBSON) – The most comprehensive book on purchasing general aviation aircraft on the market. It starts with the most important decisions you have to make regarding what type of airplane to buy, considering how much money you have to spend, and goes right through the closing. It includes a few horror stories about those who didn't know what they were doing and got burned. P/N 13-31420

AIRPLANE MAINTENANCE & REPAIR (CARMODY) – Time and money-saving tips and techniques from hundreds of experienced mechanics. Step-by-step FAA approved procedures; advice on selecting, using & caring for tools; maintenance, diagnostic & repair instructions and how to find the right mechanic at the right price. P/N 13-21600

CONVENTIONAL GEAR: FLYING A TAILDRAGGER (DAVID ROBSON) – A taildragger is more difficult to operate on the ground because it diverts from a straight line when moving. It is more difficult to control upon takeoff; it is also harder to land because it tends to bounce and weather vane on touchdown unless the pilot is skilled. So because it takes more piloting skill, flying a taildragger well is the sign of a good pilot. The three part of the book include: the theory and dynamics of a tailwheel airplane; the piloting techniques needed to safely operate a tailwheel airplane; and a series of descriptions of what it is like to fly a selection of traditional and current tailwheel airplanes. The last section is edited by the author from contributions of pilots and airline captains with experience in the particular tailwheel airplanes covered. P/N 13-01552

FLY-ABOUT ADVENTURES AND THE ERCOUBE (PAUL PRENTICE) – What you will find in this book. Some of the adventures and discoveries of Fly-About Adventurers. Oshkosh-The Picnic-Sun-N-Fun, Pictures of fly-about ercoupes, Paint Schemes and Instrument Panels, An analysis of the fly-about coupe, The Mysteries of Performance, Mods-Mods-Mods, Ownership and Soap Box Subjects. 130 pages and a lot of nice photos! P/N 13-42732

THE QUOTIENT CLUB – The Quotient Club introduces Joe Hara, the forty-eight-year-old Japanese-American protagonist of my detective series, six months after retirement as homicide detective for the L.A.P.D. His passion for running leads him to early retirement, but his obsession with his past profession keeps interfering. When his former police chief's godson, who is president of a large Napa Valley winery, dies suspiciously, Joe is asked to assist. He uncovers a series of mysterious deaths. Joe thinks rumors of Folino's Mafia ties might be true; when certain people choose to exit the program, unusual accidents occur. Posing as a prospect for the program, Joe meets Jill Riley, a beautiful journalist, who is writing an article about the rich and their toys. As Joe and his former partner investigate all leads, their safety is jeopardized by a killer's selfish motives. The person behind the deaths is exposed in the final chapters, with unexpected. P/N 13-03466

MUSIC'S BROKEN WINGS: FIFTY YEARS OF AVIATION ACCIDENTS IN THE MUSIC INDUSTRY - Covering the 50 year period between 1935 and 1985, this 540-page book analyzes 34 aviation accidents, which affected the music in our world in some way. From the most famous American artists, such as Buddy Holly, Patsy Cline, Rick Nelson and Lynyrd Skynyrd, to the lesser-known international performers Carlos Gardel, Anna Jantar, Tamara and Kyu Sakamoto, this text covers many types of music and the talents who were affected by adverse aviation events. Concentrating mainly on the aviation accident itself, the text also touches on some personal aspects of the artists' lives. From chamber music, big band, opera, tango, to country, folk, gospel and rock and roll, this book has something of interest for everyone. It also holds some surprises for many readers. J. P. Richardson, son of the "Big Bopper" (who was killed in the Holly accident) wrote the Foreword for the book. Written by professional airline pilot, William P. Heitman, the author successfully intertwines each story to keep the pilot, and non-pilot alike, interested in the history of the event, while providing as much factual documentation as possible to unravel the devastation that sometimes resulted. Complete with illustrations, photographs, airplane statistics and actual government accident reports. P/N 13-02711

AIRCRAFT SYSTEMS: UNDERSTANDING YOUR AIRPLANE (DAVID A. LOMBARDO) – System theory, preflight, preventative maintenance, & in-flight trouble-shooting. Emphasizes way to maximize pilot safety, aircraft performance, & equipment life. 272 pgs. 135 illust. Paperback. P/N 3120

YOUR PILOT'S LICENSE, 4TH EDITION (JOE CHRISTY) – A valuable reference manual during training, but also a "keeper" that should be in the pilot's basic reference library as long as you continue flying. 176 pages, 73 illustrations. Paperback. P/N 13-29900

FLYING ON THE GAGES – Easy to read and packed with tips, tricks and techniques that will make anyone a better instrument pilot. Great source of information for those who are contemplating getting an instrument rating or those who already have one. P/N 13-19420

YEAGER: AN AUTOBIOGRAPHY (GEN. CHUCK YEAGER) – with Leo Janus. The greatest test pilot of them all. The first man to fly faster than the speed of sound. The WWII ace who just kept showing them how, right on into the jet age. 423pgs, 8pgs of photos. Paperback. P/N 3898

BUYING & OWNING YOUR OWN AIRPLANE (JAMES ELLIS) - The 3rd edition of this manual provides answers on everything from selecting partners and home fields to negotiating sales contracts to maintaining and upgrading your treasured bird. Readers will find new information essential for buying aircraft, including a survey of the most common new and used planes on the market today. Chapters are fully updated, offering additional aircraft coverage, detailing changes in tax laws, outlining requirements for obtaining and retaining insurance coverage, and projections on long-term trends in the aviation industry. Updated information includes the enormous impact of the Internet on aviation purchasing and ownership. Contents include: • Comprehensive coverage of what first-time owners should consider, with analyses of popular planes (including the Cessna 177 Cardinal, Piper PA-38 Tomahawk, Beech 77 Skipper, and others). • A chapter examining complex single-engine aircraft, so you can expand your horizons into 200-plus horsepower singles and retractables as well as the new Cirrus, Lancair, and Diamond aircraft. • A complete listing of aircraft owners' associations specializing in the care of specific types of aircraft. P/N 13-03260

SEVERE WEATHER FLYING (DENNIS NEWTON) - This book is not about flying in severe weather, but about how to detect and therefore avoid it, with advice on how to escape it if you become caught in it accidentally. Meteorologist, weather research pilot, engineering test pilot, flight instructor and author Dennis Newton speaks pilot to pilot in this valuable guide on how not to fly in severe weather. Newton says that given the knowledge, pilots can truly lessen their chances in being caught in thunderstorms and other extreme weather conditions. Soft Cover, 208 pgs, illustrated, 3rd edition. P/N 13-02014

CAPT. JEPP AND THE LITTLE BLACK BOOK – Flint Whitlock & Terry L. Barnhart How barnstorming aviator and mail pilot Elrey B. Jeppesen made the skies safer for everyone. A fascinating life story of a true pioneer and visionary. With a foreword by Erik Lindbergh. Pages: 288 Hardcover. P/N 13-04740

SHEET METAL HANDBOOK - Detailed information on how to form and shape sheet metal for competition, custom or restoration use. Chapters include hammer forming tools, terms and equipment, riveting techniques, layout, design and pattern-making. A great companion to the Metal Fabricator's Handbook. Author: Ron and Sue Fournier Pages: 144 P/N 13-06720

METAL FABRICATOR'S HANDBOOK - How to build structurally sound, good looking metal parts for custom street rods, race cars or restorations. Over 350 step-by-step photos and instructions illustrate proper welding, metal shaping and design techniques. Pages: 176 P/N 13-06719

FIBERGLASS & OTHER COMPOSITE MATERIALS - A revised and updated guide to fiber reinforced plastic materials, including fiberglass, Kevlar, and carbon fiber. It also includes sections on mold making, plugs, materials, structures, gel coats, advanced building techniques, tools, and equipment. Author: Forbes D. Aird Pages: 192 P/N 13-06721

TRAVEL BOOKS

AIR BAJA! (GALEN L. HANSELMAN) – A Pilot's Guide to the Forgotten Peninsula. 624 pgs. A comprehensive guide to the airports in Baja. Color photos, info on hotels, camping, hiking, fishing, hunting, surfing, rock art, dining, history and lots of Baja stories as only Galen can tell them!

P/N 13-26800

GH-22 WAC SUPPLEMENT FOR BAJA CALIFORNIA, MEXICO – Contains current info on over 100 usable and transitional airports in Baja. Chart unfolds vertically to show entire peninsula on one side. No more flipping and fiddling! Reflects the transpeninsular highway completed in 1972 and associated relocation of towns, fish camps, ranches and ejidos. Includes user waypoint info for simple GPS navigation. Fuel availability chart and a comprehensive Baja Airport Master List containing the current status of over 240 airstrips. The laminated chart folds perfectly and does not have plastic overcaps like some laminations. Has very vibrant color and is very durable.

Standard Chart.....P/N 13-30705

Folded and laminated ChartP/N 13-30708

BD-1 BAJA DATABASE– Contains data on over 100 airports in Baja. The BD-1 is a 3.5" diskette that allows an individual to copy the entire Baja database onto a PC, and then download it onto their personal GPS in matter of minutes. All data cross references to User

Waypoints shown on the GH-22 aeronautical chart as well as AIR BAJA! Currently compatible with Morrowll GPS Waypoint Manager version 2.1& 3.1 for Windows, Garmin GPS Waypoint Manager version 2.07, & Lowrance Gdm16. PC version only. P/N 13-40900

BAJA BINDER – A beautifully constructed zip-up protective cover made of cordura nylon, custom designed to contain your copy of AIR BAJA!, an aeronautical chart, a pen, the BD-1 diskette, aircraft registration, pilot's license, medical, Mexican insurance policy, Mexican General Declaration, flight plans, and all of those little odds & ends so necessary for a safe, exciting trip to Baja. P/N 13-26810

THE WHOLE ENCHILADA – A complete travel kit. Includes GH-22 aeronautical chart, autographed copy of Air Baja!, a BD-1 Baja Database diskette, and a deluxe Baja binder. P/N 13-26910

THE OREGON, CALIFORNIA & MORMON TRAILS BY AIR (WILLIAM WHITE) – In the mid-1800's more than 300,000 people crossed the continent in search of land, riches or religious freedom. Follow their routes from Kansas City to Portland, Reno or Salt Lake City. Maps, photos and waypoints help pilots to follow the routes and spot sections of the ruts that were made by the immigrants' wagons and animals 150 years ago. An appendix contains information about ground attractions & FBOs along the way. (216 pgs/B&W photos). P/N 13-26710

FLY IDAHO! A GUIDE TO ADVENTURE IN THE IDAHO BACKCOUNTRY (GALEN HANSELMAN) – Beautiful color photos and vivid descriptions of 66 unpaved mountain airstrips in the state with the mt incredible mountain flying in the world! Includes info on hiking, hunting, fishing, mountain biking, history, & a relative hazard index. A must for serious backcountry pilots everywhere. 417 pages. P/N 13-30760

FLY UTAH! A PILOT'S GUIDE TO EXPLORATION AND DISCOVERY IN THE RED ROCK COUNTRY – FLY UTAH! is the same format as Galen Hanselman other guides and contains information on 83 back country airstrips; 57 of them never been charted or documented. This is a hard cover book with concealed Wire-O binding. In addition to the author's infamous Relative Hazard Index (RHI), each airstrip contains a full color illustration depicting the Terrain Elevation Model (TEM) and Runway Elevation Profile (REP). P/N 13-05130

THE FLYER'S RECREATION GUIDE: NORTHWESTERN STATES – Contains descriptions of Western America's most exciting sites, all within convenient access of landing strips. Included are tips and current costs for transportation, lodging, restaurants, hiking, fishing, swimming, evening entertainment, and more. The Guide tells how to find trail-heads, hot springs, raft trips, and items of interest. Airport information is included to help pilots determine if their aircraft and skills are compatible with the destination. This compact, perfect-bound 352-pg book has rounded corners & slips easily into a jacket pocket. Its high-quality paper provides maximum clarity for the the books 250 maps & photos. P/N 13-17590

FLY THE BIG SKY! (GALEN L. HANSELMAN) – Galen's brand-new book, Montana, Fly the Big Sky! is finally here. This is the book you've been waiting for. A whopping 720 pgs packed with the best information on Montana's unspoiled airstrips. 160 color photos, 100s of B&W photos, and lots of Galen's stories.

P/N 13-00896

SOUTHWESTERN FLYING ADVENTURES (BY JAMES S. KOHN, M.D.) - Explorations of 31 cities and towns in Texas, Arkansas, New Mexico, & Oklahoma. This book contains an index cross-referenced by activity and by location. It serves as a springboard to facilitate and encourage new adventures. Use it for ideas, as well as for the specific tips and references.

P/N 13-02875

THE GOLDEN AGE OF AVIATION SERIES

CESSNA'S GOLDEN AGE (ALAN ABEL, DRINA WELCH ABEL & PAUL MATT)– Takes a look at Clyde Cessna and nephew Dwane Wallace, longtime Cessna President, & the Cessna Aircraft Company from early 1900s, through the struggling years of the Great Depression, through World War II and the post-war years. Emphasis is given to Cessna Primary Gliders, Cessna Airmasters, Cessna T-50 Bobcats, Waco CG-4A Gliders (Cessna built), and Cessna 120/140 airplanes. Other Cessna models are also included. 96 pgs, softbound, 180 photos, 8 pgs of 3-view scale drawings.

P/N 13-01534

AERONCA'S GOLDEN AGE – Progressively details the events leading to the Aeronautical Corporation of America, from the early 1900s, through the Great Depression, the disastrous flood of 1937, World War II and beyond. The book includes biographical information on the founders of Aeronca, and details the people, facilities and manufacturing operations of Aeronca during the Golden Years. It also includes the reasons for the company's name change to Aeronca. Emphasis is given to Aeronca's C-2, C-3, Model K, Model L, 7AC Champ and 11AC Chief. All Aeronca's models are discussed. Several factory photos are included. 152 pgs, softbound, 240+ photos, 18 pages of internationally acclaimed 3-view scale drawings. P/N 13-01535

PIPER'S GOLDEN AGE – Details the formations, struggles & successes of the Piper Aircraft Corporation during aviation's Golden Age. Includes particulars of the original Taylor Brothers Aircraft Corporation and of C.G. Taylor (the father of the light plane) & his brother, Gordon. It explains the move to Lock Haven, Pennsylvania, the bankruptcy of the company during the Depression, and the ultimate split of Taylor & Piper, and the beginning of the Piper Aircraft name. Included are the Taylor Chummy, Taylor E-2 Cub, Taylor/Piper J-2 Cub, Piper J-3 Cub, J-4 Cub Coupe, J-5 Cruiser, the Grasshoppers (military observations & liaison airplanes), Piper TG-8 Training Glider, Piper Experimentals, PA-12 Super Cruiser, PA-11 Cub Specials, PA-14 Family Cruiser, PA-15 Vagabond, PA-16 Clipper and PA-18 Super Cub. 90 pgs, softbound, 11 pgs of 3-view drawings, 130 photos. P/N 13-01536

BELLANCA'S GOLDEN AGE BOOK – BELLANCA'S GOLDEN AGE Traces G.M. Bellanca coming from Sicily to America as a teenager in 1911 through his 42 years of continuous airplane manufacturing operations. He did more for aviation than any other single individual during aviation's first 100 years, bar none! This is the ONLY BOOK that has ever captured Bellanca's complete and lengthy story. Details the beginnings of the air transportation system over great distances. Details the first ten flights over the Atlantic and the first flight over the Pacific. Tells never-before-told stories of Charles Lindbergh, Clarence Chamberlin and many other Golden Age personalities. Tells the complete story of the greatest airplane of the 1920s – Bellanca's Columbia (the plane Lindbergh wanted but didn't get). In the 1930s the government tested 209 different airplanes and found that Bellanca's was the best regarding "efficiency." 148 pages and 175 plus photos.

P/N 13-03337

GEE BEE - by Delmar Benjamin Heres the inside story of the creation of the Gee Bee R-2 replica, written and photographed by the men who designed and built it. This star of air shows is followed from re-creating the original plans through all stages of construction; on its first test flights; and wowing the crowds at Oshkosh and other air shows. Packed with original color photography.

P/N 13-06202

RACE WITH THE WIND - By: Birch Matthews In decades leading to World War II, legendary air races were the proving grounds for radical new aviation designs. The people and machines of air racing contributed new technologies, aerodynamics, powerplants, and airframes. Unique look at key players and aircraft. Examines how innovative racing technologies found their way into future fighter and passenger aircraft. Covers races like the Schneider Cup, Pulitzer Trophy Race and Women's Air Derby. In-depth look with fascinating archival photos. 160 pgs, HB, 10 x 10, w/dust jacket, 150 b&w and 15 color photos.

P/N 13-06201

FLY LOW, FLY FAST: INSIDE RENO AIR RACES - Book takes us into the high-risk world of Unlimited Air Racing at the Reno National Air Races. Flying wingtip to wingtip around pylons at nearly 500 mph, just yards above the sagebrush, Reno's big throaty warbirds are piloted by adrenaline-addicted, Type-A elite whose oversize talent and egos spawn a hundred stories. Book traces the history of this colorful, often deadly sport, and follows the evolution of the competition planes from the exotic custom contraptions of the 1930s to today's machines like the Bearcat and Mustang.

P/N 13-06199

AIR RACING TODAY - THE HEAVY IRON AT RENO - Experience ground-shaking power and unbelievable speeds of the T-6 and Unlimited classes at the National Championship Air Races. Book captures breathtaking action of the P-51s, Sea Furies, and other modified air racers with dramatic color photos and fast-paced text. Features daring pilots, devoted crews and intriguing racing aircraft. Includes section highlighting planes' decorative nose art.

P/N 13-06198

VULTEE AIRCRAFT - Today the name Vultee is not as well known as, say, Douglas or Northrup but Gerard Vultee was the equal of the better-known names as an engineer and director, rapidly advancing the design of aircraft with aerodynamic all-metal structures and retractable landing gear in the 1930s.

P/N 13-06195

STINSON'S GOLDEN AGE - BY JOHN C. SWICK - This is the history of the Stinson 108 series airplane (the Voyager), although the 105, 10, 10A and L-5 are covered in great detail. The story begins with the three-place 105 in 1938 and concludes with the sale of the last Stinson 108-3 from Willow Run in 1950. Mr. Swick is well known for his particular attention to detail and historical accuracy. He spent hundreds of hours carefully researching the Stinson history, and has a very readable style in weaving together the details of Stinson's Golden Age.

P/N 13-06176

FAIRCHILD'S GOLDEN AGE - BY ALAN ABEL A young Sherman Fairchild quit college in 1917 to start a company to build aerial cameras. After 3 years, Fairchild built the first successful large, high-speed between-the-shutter camera that was a major breakthrough in aerial photographic technology. Fairchild found airplanes of the day not suitable for the photographic mission. Sherman decided to build one himself. During the design of the plane, Fairchild decided to build a multi-purpose plane suitable for other piloting needs and to market these airplanes to the public.

P/N 13-06177

HOWARD'S GOLDEN AGE ART HALL - After building four of the most successful and famous air racers in the world, in the 1930s, Pete, Mike, Ike and Mr. Mulligan, Benny Howard's fame increased with each passing year. With such notoriety, Benny was able to realize his dream -- that of manufacturing and selling commercial aircraft to the flying public throughout the world. Howard was also a highly acclaimed test pilot, having test flown many aircraft for several aircraft manufacturers during his career. This Benny Howard story is a story of struggle, fame, fortune, love, depression, failure and success.

P/N 13-06178

THE GOLDEN YEARS OF FLYING - As We Remember is the legacy of an earlier day in aviation history, recorded by one of the pilots who shared this experience and wrote down his fellow pilots' stories. Captain Tex Searle corresponded with and interviewed several retired DC-3 pilots from the old Frontier Airlines days, and brought all their tales together in one place for a vivid historical account. Covers from 1946 to 1986, and in her early days, crews hand-flew DC-3s over the high Rockies, in and out of small airports hidden deep in mountain canyons with approaches often referred to as "black holes" due to their almost ominous darkness and lack of reliable visual references.

P/N 13-06412

LUSCOMBE'S GOLDEN AGE - BY JOHN SWICK. Luscombe's Golden Age is the fifth book in The Golden Age of Aviation Series. John Swick, the author, has completely revised and updated the original The Luscombe Story published in 1987, including approximately 100 new pages of text, dozens of never-before published photographs and Luscombe magazine ads from that era. Included in this book are detailed accounts and descriptive 3-view scale drawings of each Luscombe model manufactured, including the early models: Phantom, Ghost, Spectre, Harpie, Small Transport and Sprite.

P/N 13-06180

CUBS ON THE LOOSE - Join this Cub, NC87881, as she takes her pilot flying like the old days - without modern instrumentation. "A heartwarming story of flight in its purest form. A totally different perspective... a cross-country trip from the eyes of the airplane. In this story, the J-3 Cub becomes human. To many of us who have flown the airplane, we felt that way all the time. Flying at its best. Simple, fun and relaxing."

Tom Poberezny, president, EAA. P/N 13-06182

THE HEATH STORY BY CHET PEEK - Chronicles the life of Edward Baird Heath and his famous "parasol" kiplanes. It spans the years from his first Bleriot flight in 1910 to the fatal test of his experimental Low Wing in 1931. He is best remembered for his introduction and promotion of the kiplane concept, powered by a Henderson 4-cylinder motorcycle engine. From 1927 to 1931, 1000s of air-minded young Americans bought his kits, then spent endless hours handcrafting a plane in barns and basements.

P/N 13-06184

BY CHET PEEK & GEORGE GOODHEAD - Chronicles humble beginnings of the Spartan Company in the "Roaring Twenties," and its travails during the Great Depression and its growth and prosperity during and after World War II. Every Spartan aircraft model is detailed. Includes 3-view drawings.

P/N 13-06185

THE TAYLORCRAFT STORY CHET PEEK - C.G. Taylor, Taylor/Piper business, Taylor/Piper split, and the Taylorcraft airplanes. Story opens with the December 1935 separation when Wm. T. Piper forced Taylor out of the company that bore his name, Taylor Aircraft Company, manufacturer of the "Cub." Name was changed to Piper Aircraft Corporation when Piper moved his reorganized business to Lock Haven, Pennsylvania in mid-1937. Traces C.G. Taylor's design and manufacture of the various Taylorcraft airplanes.

P/N 13-06186

THE PIETENPOL STORY BY CHET PEEK - The Atlantic had proved a graveyard for many ships, and when the first butterfly craft began to fly it after the World War I, all the omens warned that it would swallow up planes as well. Nonetheless, the pioneers - Read, Alcock, Brown and Lindbergh, as well as many who gambled and lost - continued to pit themselves against the odds.

P/N 13-06187

THE TIGER MOTH STORY BY ALAN BRAMSON - The Tiger Moth is one of the major aviation success stories. Developed by Geoffrey de Havilland during the early 1930s and flown for the first time on October 26th, 1931, the biplane became the most important elementary trainer used by Commonwealth forces. More than 1,000 Tiger Moths were delivered before WWII, and subsequently around 4,000 were built in the UK with an extra 2,000 being manufactured in Canada, Australia and New Zealand.

P/N 13-06189

TRAVEL AIR: WINGS OVER THE PRAIRIE BY ED PHILLIPS - Travel Air achieved worldwide fame by 1929 as a builder of high quality commercial biplanes and monoplanes. Every facet of the company's history is chronicled, including the "Mystery Ship" racers. Includes technical and construction data on every model and the people that made it happen. Also includes scale 3-view drawings and more. 128 pgs, SB, 8.5 x 11, 200 photos

P/N 13-06190

THE RISK TAKERS: RACING & RECORD SETTING AIRCRAFT, 1908-1972 - By: Hugh Cowin Book focuses upon two distinct but complementary - and in certain cases overlapping - aspects of aviation. At the Reims Air Show in 1909, the American Glenn Curtiss and Frenchman Louis Bleriot vied with each other for the speed record and Henry Farman won the distance prize. The first official air races were held in 1911. There were a staggering 32 aviation fatalities in 1910; CS Rolls (co-founder of Rolls-Royce) was the first to perform a non-stop return crossing of the English Channel; but his Wright Flyer would break up in mid-air a month later. This book illustrates and analyzes all such pioneering achievements in precise technical detail.

P/N 13-06197

THE COMPLETE GUIDE TO CESSNA AIRCRAFT BY TOM MURPHY - Ready to buy a new or pre-owned Cessna? This updated second edition includes (1) original in-depth info about older Cessna models (2) updated info on Cessnas being offered today and (3) buying advice on AD's, inspection of aircraft and its logbooks and how to choose the right model for your needs. P/N 13-06179

CARAVAN CESSNA'S SWISS ARMY KNIFE WITH WINGS - Affectionately called "a Swiss Army Knife with Wings", the Cessna Caravan can evoke a sense of adventure in almost all that lay eyes on this rugged and reliable SUV of the air." Join authors LeRoy Cook and J. D. Lewis as they combine their experience and skills in the first-class review of an amazing airplane. Includes beautiful photography throughout. P/N 13-06226

THE COMPLETE GUIDE TO PIPER AIRCRAFT - Are you ready to buy a new or pre-owned Piper? This updated second edition includes the original in-depth info about Piper models along with purchasing advice on ADs, inspections, the importance of logbooks, and how to choose the right Piper aircraft for your wants and needs. This informative narrative includes information on models from the Piper Cub, to the various Piper Indians such as the Cherokee, the Cheyenne, the Comanche, and the agricultural Pawnee. P/N 13-06181

VINTAGE AIRCRAFT OVER AMERICA - Just Published. Journey through time looking at several of the most evocative civil and general aviation airplanes built from the 1920s to 1950s. Book is packed full of color photos of many classic American airplanes. Most were photographed in the air between 1998-2002. P/N 13-06191

WINGS OF YESTERYEAR BY GEZA SZUROVY - Nostalgic look at the Golden Age of personal flight, when incredible aircraft of the 1920s, '30s, and '40s were pushing every known limit, and doing it with flair. The impeccable style and ever-increasing performance of stunning open-cockpit and cabin-class monoplanes and biplanes such as the Curtiss Jenny, Beech Staggerwing, Stinson Reliant, Luscombe Phantom, and Spartan Executive are all captured here. Also includes Stearman, Taylor, Piper, Lockheed and Waco. A detailed text traces the evolution of the airplanes. Exceptional collection showcases rare, vintage private airplanes through modern color photography (air-to-air) of restored aircraft. P/N 13-06192

BUSHPLANES BY GEZA SZUROVY - Colorful book examines the duties bushplanes help carry out around the world and the development of the greatest examples still plying the skies, including DeHavilland Beavers and Otters, Piper Cubs, Stinson Reliants, and Cessna Skywagons. P/N 13-06193

OF WINGS & THINGS BY PETER BOWERS - Peter Bowers is a foremost aviation historian and author. His byline has appeared hundreds of times as Peter Bowers has written numerous books, articles, columns, and stories for a variety of aviation periodicals over the last 70 years! In the process, Bowers has acquired one of the world's largest private collections of airplane photos and reference data. Authors and publishers worldwide draw from his research files. This particular book is a potpourri of Bowers' writings, as his aviation historical columns have appeared in General Aviation News over past years. P/N 13-06183

X-PLANES: PUSHING THE ENVELOPE OF FLIGHT - Since the first edition of X-Planes at Edwards (0-87989-85-0) was published in 1995, many new types of civilian (Rutan-types, 717 and 777), military (Bombers, Fighters, Reconnaissance Drones and Transports) and dedicated research aircraft (X-planes) have been created by numerous manufacturers and then flight-tested at the Air Force Flight Test Center (AFFTC) and NASA Dryden Flight Research Center (DFRC) at Edwards Air Force Base in the Mojave Desert of California. P/N 13-06196

PAN, PAN, PAN! A SURVIVOR'S STORY - "A Survivor's Story" Pan, Pan, Pan is the story of how I dreamed of being a pilot and never gave up on that dream. It is also an account of having crashed into the ocean twice and living to tell about it. Pan, Pan, Pan shares my love of flying and my desire to do all that I can to help keep the airways safe. Author: Captain Denis G. Murphy Pages: 168 P/N 13-06104

FLYING WITH 40 HORSES - THE CONTINENTAL A-40 ENGINE - The Continental A-40 Engine was the answer to the continuing problem of finding suitable and inexpensive powerplants for lightplane manufacture during the Golden Age. The Aeronca E-113 of 36-hp was close, but the next generation, the Continental A-40 filled the bill. It was light, could power a 2-place airplane, and cost less than \$500. P/N 13-06194

THE STORY OF TRANSATLANTIC FLIGHT BY DAVID BEATTY - The Atlantic had proved a graveyard for many ships, and when the first butterfly craft began to fly it after the World War I, all the omens warned that it would swallow up planes as well. Nonetheless, the pioneers - Read, Alcock, Brown and Lindbergh, as well as many who gambled and lost - continued to pit themselves against the odds. P/N 13-06188

SPORT PILOT AIRPLANE: A COMPLETE GUIDE - By: by Carol and Brian Carpenter Book provides an in-depth understanding of light-sport aviation complexities. Clarifies points commonly misunderstood, provides a wealth of information on subjects such as: Selecting an Aircraft, Pilot and Aircraft Certification, Weather, Flight Principles, and more. The material presents the experience of thousands of flight hours and contains valuable lessons for all pilots and would-be pilots. Book is engaging, comprehensive, and well-illustrated for the veteran aviator and newcomer alike! P/N 13-06203

PREFLIGHT WEATHER ANALYSIS MADE EASY - This highly detailed, easy to follow guide carefully leads you through the preflight weather analysis process in plain everyday language. No critical weather hazard will be overlooked when following this manual's very systematic examination of weather and its potential hazards. Includes detailed reference materials and decoders to provide a complete preflight weather picture. P/N 13-06129

THE HELICOPTER PILOT'S QUICK REFERENCE MANUAL - Student pilots will find The Helicopter Pilot's Quick Reference Manual essential reading, and an excellent learning device to increase and simplify their understanding of helicopter flight. The more experienced helicopter pilot will benefit from the memory joggers and reference materials in this unique and handy resource - a real time saver! Flight schools will enhance their training program by offering The Helicopter Pilot's Quick Reference Manual as a supplemental handout to reinforce instruction to student pilots. Helicopter operators will substantially strengthen their safety program by giving each of their pilots a copy of this manual to help increase safety awareness. The Helicopter Pilot's Quick Reference Manual is more than a memory jogger - it's an everyday reference! P/N 13-06130

NOTAM'S ILLUSTRATED - NOTAM's Illustrated is a quick reference manual that can be used by pilots and airport operations personnel to rapidly decipher or format NOTAMs. This resource book features over 400 Notice to Airmen contractions-- that's 140 more contractions above those offered in the official FAA NOTAMs manual. The many NOTAM examples of airport movement areas, approach and lighting aids, navigational aids, airspace restrictions, and temporary flight restrictions allow the reader to completely understand Distant NOTAMs, Local NOTAMs, and FDC NOTAMs in their entirety. P/N 13-06131

THE METAR & TAF QUICK REFERENCE MANUAL - Every pilot will become an instant weather expert when using the METAR & TAF Quick Reference Manual. This indispensable guide defines over 250 METAR and TAF terms in a convenient dictionary-like format, providing all pilots with an instant understanding of this often-times puzzling weather language. Associated page references point toward more in-depth information, as well. A comprehensive glossary further aids aviators in developing an extensive knowledge base of all METAR and TAF terms. P/N 13-06132

AVIATOR'S DEVOTIONAL - The Aviator's Devotional, has been one of the top selling books at the Oshkosh AirVenture two years consecutively. It was the second and fourth best seller respectively in 07 and 08 at the EAA Author's Corner among books by over 40 popular aviation authors. The Aviator's Devotional is unique, as the only inspirational book of its kind exclusively for aviators. The book presents adventurous stories, aviation trivia, and practical flying pointers to illustrate valuable lessons on life from a Christian perspective. P/N 13-06140

AIR SCAN 5TH EDITION - AIR-SCAN Guide to Aeronautical Communications, 5th Edition by Tom Kneitel This unique book is the most comprehensive guide to monitoring aeronautical communications yet compiled. It covers HF (2 to 30 MHz), VHF aero (118 to 137 MHz), as well as other VHF/UHF bands 137 to 174 MHz, 406 to 512 MHz, and the 800 MHz band. P/N 11-18920

FLYING & LEARNING: BASICS FOR EVERY PILOT (WILLIAM HEITMAN)

Heitman uses simple terms and personal experiences to lay basics which students can use to get their feet wet. By keeping things simple, he also keeps the new student interested, which can be difficult when teaching something as complicated as flying. This is an excellent primer for students who are just beginning their flight training or pilots who have been away from flying for a while.

P/N 13-15129

CHINO: WARBIIRD TREASURES PAST & PRESENT

From the day it was founded as Cal Aero Flight Academy 60 years ago, Southern Californians Chino Airport has been the world's center for warbird restoration. This hardcover 198-pg book contains some 400 color and black & white photos, most of which have never been seen before. Joe Cupido spent years assembling materials for this book, interviewing hundreds of people and flying dozens of air to air photo sessions. Printed on high quality chrome-coated paper, photos in this book are exceptional.

P/N 13-01032

Ideal gift for any warbird fan.

50 AIRCRAFT THAT CHANGED THE WORLD

A close-up survey of 50 of the most remarkable and influential aircraft ever. For this book, the authors of the widely acclaimed Aviation Century series chose 50 of history's most influential aircraft, with profiles of their pilots and designers. They begin with the Wright Brothers' 1905 Flyer, then move on to the birth of aerial warfare in World War I, the trail-blazers of the interwar years, the first passenger flights, and the great flying boats. Classic World War II aircraft such as the Bf 109, Spitfire and Mustang are included among the stars of that time. Then come the jets of the Korean and Vietnam wars, modern commercial carriers, private jets, experimental designs, and new combat fighters featuring Stealth technology.

P/N 13-05248

SILENT WINGS - THE AMERICAN GLIDER PILOTS OF WWII

From the early race to build gliders to the D-Day invasion at Normandy and Nazi Germany's final surrender, Silent Wings - The American Glider Pilots of WWII narrated by Hal Holbrook, reveals the critical role gliders played in World War II offensives. Through rare archival footage and photographs, the film places the audience right at the center of the action in the dangerous world of the

American glider pilot.

P/N 13-05133

JOHN MONNETT FROM SONERAI TO SONEX

This is the intriguing story of John Monnett and his airplanes. He is a kit plane designer, innovator, air racer, world record holder and member of the EAA Hall of Fame. While pursuing his own aviation interests, Monnett inspired and enabled thousands of others to build and fly affordable aircraft. From the Sonera, sketched at his kitchen table in 1964, to pioneering engine conversions, to the Sonex's simple construction methods, John Monnett is a flag-bearer for grassroots aviation. The book covers his early aviation designs and all of the airplanes he designed.

P/N 13-05052

FLIGHT: A CELEBRATION OF 100 YEARS IN ART AND LITERATURE

Documents the centennial since the Wright Brothers first flew with contributions from a stunning selection of writers from the worlds of science fiction, poetry, aviation, literature, science and politics including Robert Frost, Joni Mitchell, Chuck Yeager, Antoine de Saint-Exupery, John Travolta, John F. Kennedy, Walter Cronkite, Diane Ackerman and Ray Bradbury. The artists represented range the spectrum of the 20th century art from Richard

Serra, Robert Rauschenberg, Robert Delaunay, Fernand Leger, Henri Rousseau, Pablo Picasso to Roy Lichtenstein, Andy Warhol, Norman Rockwell, William Wegman & Annie Liebovitz.

This publication coincides with the centenary of the invention of the airplane in December of 2003. P/N 13-02461

Pilot's Handbook

THE FLYING WINGS OF NORTHROP

Prepared by Northrop of Hawthorne, CA, The Flying Wings of Northrop is the actual pilot's handbook for model YB-49 airplane. Includes description, operating instructions, emergency operating instructions & operational equipment. 75 pgs.

P/N 13-24100

GHOST II - A TIME REMEMBERED (PHILIP MAKANNA)

Philip Makanna has flown with the Confederate Air Force for over 25 years and captured their rare planes with his extraordinary color photography. Makanna's breathtaking images capture the romance of 35 different American, British, German, & Japanese aircraft. In GHOST II he writes warmly of the men of the CAF, telling who they are and how they fly. Specifications and silhouettes are included as well as the famous WWII pamphlet "Fundamentals of Air Fighting". 128 pgs, 64 pgs, full color - 11-1/2" x 9" Hardbound. P/N 13-01957

Also available GHOST OF THE SKIES P/N 13-01319

GHOSTS OF THE GREAT WAR - AVIATION IN WORLD WAR ONE

GHOSTS of the Great War, Aviation in World War One is the fifth volume in Philip Makanna's classic series of books about aviation. "GHOSTS of The Great War" describes the sudden growth of aviation that began only ten summers after man's first flight and ended, four dark years later, with aircraft that had been hammered by war into reliable flying form. This edition of GHOSTS describes the beginnings of military aviation with Bleriot's wing-warping Model XI, Fokker's web of wires and sticks and Sopwith's simple seaplane racer. They began as sport planes and evolved in the deadly machines that swarmed over the trenches of Europe and altered the history of the world. They carried the dreams and nightmares of all mankind on their wings. Makanna's stunning color photographs of these aircraft in flight are woven with an extraordinary collection of archival duotones to describe the beauty, the romance and the tragedy of military aviation's earliest days. P/N 13-04016

ASA DREAM AIRCRAFT: THE MOST FASCINATING AIRPLANES I'VE EVER FLOWN

Join Barry Schiff on an amazing journey across time and space as he flies and brings home reports on some of aviation's most rare and popular aircraft. Dream Aircraft documents his lifelong voyage flying aircraft that pilot enthusiasts dream of flying. Some of these aircraft are so rare that most pilots have never even seen one, let alone had a chance to fly them. Each chapter is dedicated to a different aircraft as the author describes the unique aspects and performance characteristics: exactly how it feels to be behind the control wheel (or stick, as it may be). The book is dripping with detail and gorgeous images that will immerse the reader in an experience like no other. From the nostalgia of the Spirit of St. Louis, to the popular WWII fighter P-51 Mustang, to the exciting Lockheed U-2, this book is the who's who and how-to on some of the most remarkable aircraft ever developed.

P/N 13-05653

THE PHINEAS PINKHAM SCRAPBOOK

The "Phineas Pinkham" stories reprinted herein will bring back fond memories to aviation fans who were young in the 1930s. And they, in turn, may use this collection as a means of passing along to younger persons an appreciation for this obscure but quite amusing bit of aviation lore. Phineas is too fascinating a character to be forgotten by aviation enthusiasts! 64 pages.

P/N 13-06762

BOOKS

GOODYEAR & FORMULA ONE AIR RACING, VOL. 1, 1947-1967 — 202 pgs, 569 photos, 88 scale drawings, softbound. Learn how this exciting sport caught on, meet the early players and the governing organizations. This volume tracks technological developments which allowed faster speeds and greater safety. This volume covers early racers – Art Chester, Steve Wittman, Bill Falck, Tom Cassutt, Bob Downey, Bill Brennard and many other. P/N 13-00033

GOODYEAR & FORMULA ONE AIR RACING, VOL. 2, 1967-1995 — 170 pgs, 450 photos, 74 scale drawings, softbound. Air racing had its ups and downs but by 1967 it was firmly established as a sport here to stay. During this time, women pilots entered pylon racing, speeds continue to increase and concerns about safety led to additional equipment requirements. Bill, Ray Cote, Jim Miller, Jon Sharp and others contributed much to air racing's popularity. P/N 13-00034

AEROBATICS THE BASIC AEROBATIC MANUAL - (Kershner) – Step-by-step descriptions and 86 illustrations progress from simple through complex maneuvers. Cover loops, rolls, spins, stalls and much more. P/N 13-32210

BASIC AEROBATICS (GEZA SZUROVY & MIKE GOULIAN) — Enjoy the aerobatics experience with this complete guide from national champions who tell you not only how to perform the maneuvers, but why the airplane behaves as it does. A variety of maneuvers-loops, slow rolls, Cuban eights, inverted flight, and many more are discussed and illustrated with diagrams and in-flight photos. 288 pages, 90 illust., paperback. P/N 13-00677

SKYDANCING: AEROBATIC FLIGHT TECHNIQUES (DAVID ROBSON) – The book includes the terminology unique to aerobatics, and dedicates a chapter each to the physics and physiology of aerobatic flight. Mr. Robson explains how to prepare for an aerobatic sortie – including the aircraft involved, personal checklist, preflight requirements, and the regulations governing aerobatics. All the basic aerobatic maneuvers are covered, accompanied by easy-to-understand explanations, step-by-step instructions, and clear illustrations, to include the wing-over, aileron roll, loop, hammerhead, inverted flight, Immelmann turn, split-S, knife-edge flight, hesitation and snap rolls, the avalanche, and much more. The aerobatic sequence is explained, along with the Aresti Notation, which is used by aerobatic professionals and competitors in display and contests. P/N 13-00734

tions, step-by-step instructions, and clear illustrations, to include the wing-over, aileron roll, loop, hammerhead, inverted flight, Immelmann turn, split-S, knife-edge flight, hesitation and snap rolls, the avalanche, and much more. The aerobatic sequence is explained, along with the Aresti Notation, which is used by aerobatic professionals and competitors in display and contests. P/N 13-00734

PRIMARY AEROBATIC FLIGHT TRAINING WITH MILITARY MANEUVERS (LT.COL. ART MEDORE) – Covers ground instruction, use of instruments in aerobatics, and contains a complete section on advanced maneuvers. Illust. 157pages. P/N 13-15100

HOMER THE HELICOPTER BOOK/CD - A ONE OF A KIND TALE OF HIGH-FLYING AVIATION ADVENTURE! From his pug nose, to his emerald green eyes and shiny blades, down his sleek frame to his tail rotor, this little 'copter will captivate you from the start. Follow Homer from his beginnings at the helicopter factory on an epic journey, as he learns the ropes of being a touring helicopter. Meet Homer's beautiful mother, Elsa, the golden helicopter, as she tries to discipline her rascal son. Learn along with Homer how to fly, as he's taught my ace pilots Hank & Jennie. Gasp as the quick-silver-streak 'copter pops out of the puffy clouds, spinning straight down! Dodge sharp spires & rugged chasms of the Grand Canyon as Homer thrills his passengers with the ride of their lives! Laugh with the children when they nick-name Homer "The Cliff-Hanging" 'copter."

BookP/N 13-05090

CDP/N 13-05091

LEARNING TO FLY HELICOPTERS (R. RANDALL PADFIELD) - "Written in a conversational style that's both fun and easy to read... Even if you're a confirmed fixed-wing pilot and show no rotor-wing tendencies, you'll enjoy this book and gain an insight into your brother pilots' obsessions." AG-Pilot International. 354 pgs, 100 illust., paperback. P/N 13-29931

HANDLING IN-FLIGHT EMERGENCIES (JERRY EICHENBERGER) - Train and prepare for the unexpected with this thorough guide that builds your confidence and teaches you valuable techniques and procedures for coping with emergencies. 201 pages, 25 illust., paperback. P/N 13-70000

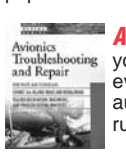

THE PILOT'S RADIO COMMUNICATIONS HANDBOOK, 5TH EDITION (PAUL E. ILLMAN) - "It should have a spot on your bookshelf right next to the airplane's service manual," said Private Pilot of this hands-on guide to equipment, techniques, regulations, and overcoming "mike fright." 232 pages, paperback. P/N 13-29944

AVOIDING COMMON PILOT ERRORS: AN AIR TRAFFIC CONTROLLER'S VIEW (JOHN STEWART) - This important book brings an air traffic controller's perspective to the mistakes pilots commonly make in controlled airspace. Veteran controller John Stewart has spent years observing pilots display their lack of education, lack of flight preparation, inability to communicate effectively, ignorance of or resistance to regulations, and other dangerous flaws. This book is his attempt to help pilots fly more safely in controlled airspace and to introduce them to new & coming air traffic control technology. 226 pgs, 21 illust., paperback. P/N 3033

THE PILOT'S HANDBOOK OF AERONAUTICAL KNOWLEDGE, 4TH EDITION (PAUL E. ILLMAN) - Studying for the private pilot tests or upgrading to a commercial license will be easier with this valuable, thoroughly illustrated guide to principles, instruments, aircraft and engines, the airspace system, flight planning, navigation, and much more. 416 pages, 230 illust., paperback. P/N 13-29918

AVIONICS TROUBLESHOOTING AND REPAIR - MAHER If you have not seen this book, it is an absolute must read for every technician. Forty years of hands on experience by the author Ed Maher. 400 pages of troubleshooting! Cover FAA rules and regulations P/N 13-01643

CHILDREN'S BOOKS

THE PILOT ALPHABET CHILDREN'S BOOK - Written by Sue Hughes Illustrated by Wang DaiYu of International Illustrators Join Claire Bear (Ursus Aviatrix) as she journeys from Alfa to Zulu to present The Pilot Alphabet! P/N 13-06343

MY FIRST LOG BOOK AND ACTIVITY BOOK® VOL.2 - A smaller

version of the original ...these new spiral-bound books have fewer pages than the original blue book, but they are still full of fun and a great keepsake! With 44 pages total (including cover) there are 6 journal pages and about 30 pages of activities. The books are designed for girls (pink) and boys (blue) with pictures inside geared to each

one. This is perfect for children who don't fly too often or who mainly fly commercial. Volume 2 (Blue)..... P/N 13-04299

Volume 2 (Pink)..... P/N 13-04301
