TO ORDER AEROTHANE:

Create the part number for the Aerothane you require: Color-A-Q(quart) or G (gallon). Add -K (kit) if catalyst is required. Example: 100-A-Q-K is 1 quart of color #100 with catalyst included.

POLY-TONE/AEROTHANE ENAMEL FLATTENER

Used to make Aerothane and Enamel match the semi gloss finish of Polytone, or to make either Aerothane, Polytone and Enamel Full Military Flat.

Use 1 Pint, to flatten 1 QuartP/N 09-02052
Use 1 Qt. & 1 Pint, to flatten 1 Gallon.....P/N 09-02051

POLY-FIBER CALIBRATION THERMOMETER

Made specifically for calibrating irons. Printed with both Centigrade and Fahrenheit scales. Superior to open coil thermometers which may vary 30°. P/N 09-37475

BLACK BARON FABRIC IRON

The Black Baron Iron was designed specifically for use on small aircraft. The exclusive "roll bars" fit into fillets and undercambers. The flat sole is for sheeted and open structures, and its beveled edges provide constant heat without marks. The toe is rounded and flat best performance. The coating is 100% blackstone making the iron slide like butter, even on tacky surfaces with almost no adhesive buildup. An advanced hi-tech thermostat reduces temperature drift to only 5° – Ordinary irons can vary up to 40°, causing surface bubbles. Get the best – get Black Baron.

110VP/N 09-37411

CUSTOM SEALING FABRIC IRON

This Teflon coated sealing works on a variety of coverings and has adjustable heat setting. It's an AC unit which operates at 170 watts. The temperature range is approximately 100-350°F. Has a 1-year warranty.

110VP/N 09-37400

The Poly Fiber Covering Kit from Aircraft Spruce includes all of the materials generally required to recover a wide variety of small aircraft (see list below) except the fabric. When you order this Covering Kit from Aircraft Spruce, you can also order the preworn fabric envelope or fabric yardage you will need to recover the aircraft and receive a 10% Poly Fiber Covering Kit and you will see that Aircraft Spruce is the best choice for your covering materials requirements. Count on Poly Fiber's largest distributor ... Aircraft Spruce!

POLY FIBER COVERING KIT

This kit recommended for these aircraft:

- AERONCA CHAMPION
- CALLAIR
- FUNK
- PIPER J3, J4, J5, PA-11, PA-12, PA-14, PA-18, PA-25
- REARWIN
- AERONCA CHIEF
- CITABRIA
- INTERSTATE CADET
- PORTERFIELD
- TAYLORCRAFT

Note: This kit is for aircraft requiring about 45 yards of fabric. Quality required vary by aircraft. Verify quantity shown are correct for your aircraft before ordering kit.

CYCLONE PAINT SHAKER

Only the Cyclone has "Varishake", adjustable haking power that automatically compensate for can size. A Cyclone will give you superior mixing power to quickly and completely separate and disperse individual metallic and pigment particles so you can match intensity and pitch exactly. Then, at a touch, your Cyclone will give your batch an extra gentle agitation while you are painting, to hold the batch in the fully mixed condition. Cyclone helps eliminate problems with panel to panel uniformity. Features: • Clamps cans quickly, easily, positively. • Thoroughly mixes most products in 60 to 90 seconds. • Breaks up and resuspends well settled solids. • Accepts pint through four-liter cans, including U.S. gallon, Imperial gallons, square gallons, and aerosol cans. (Some 5.1 cans, also 1/4 and 1/2 pts. stacked or with spacers.) • Quiet. • Mounts solidly. • Rugged construction. Engineered and manufactured in the U.S.A.

 Cyclone Pedestal P/N 09-00903

CS

PRE-SEWN POLY-FIBER AND CECONITE ENVELOPES

Presewn envelopes are much easier to install than fabric yard goods. The envelopes are sewn to fit each individual surface depending upon the type of airplane. They can be placed on the surface like a sock. The envelopes are sewn using a special thread and special stitches. Fabric tapes must be placed over all seams. The seams can be sewn chordwise or spanwise for the wings. Individual Pieces Priced Per Each. On presewn envelopes, individual pricing is done by each piece. (i.e. If your airplane is a Stearman, you will have 4 wings. Price shown is per wing - \$86.44. Your cost for all 4 would be: 86.44 x 4 = \$345.76

PLEASE ORDER BY PART NUMBER - Basic part numbers (09-XXX) are shown in the chart. Complete the part number with 10 for wing, 20 for fuselage, 30 for aileron, 40 for stabilizer, 50 for elevator, 60 for flap, 70 for rudder, or 80 for complete set. **After the P/N**, add -1 for Heavy Duty 3.4 oz Polyfiber Fabric, -3 for Medium Weight 2.6 oz. Polyfiber Fabric, -5 for Ceconite 101 fabric, or -6 for Ceconite 102 Fabric. **Prices of envelopes vary based on Fabric selected.** Example: Complete part number for a Stinson 108-1 complete set in Ceconite 102 fabric would be 09-67380-6. Note: All pre-sewn envelopes are non-cancelable, non-returnable special orders items.

PRICES SHOWN ARE FOR CECONITE 102 ONLY

ULTRALIGHT SAILS

Our sails are made in the United States by a top flight sail loft. These sails are made from the highest quality 3.9 oz. Dacron, many of them from the original OEM sail patterns. These sails are guaranteed to fit properly. All sail sets come complete with tail feathers and fuselage covers, except where noted. All sail orders are on custom-fabricated basis. Therefore, please allow an average of three weeks for delivery. There are no refunds on sail sets unless they are defective. Non-refundable 100% deposit or credit card purchase required. A wide selection of sail colors are available. Contact Aircraft Spruce for details on colors, patterns, and custom work. Prices subject to change without notice.

CECONITE AIRCRAFT MATERIALS

CECONITE FABRIC

Ceconite, 100% polyester fabric is approved for use on most certified aircraft. To be sure to check the master eligibility list in the procedure manual.

CECONITE 101 (3.4 oz.) - Much stronger and far more durable than cotton. It has a probable lifetime durability.
70" Width .. P/N 09-00700 /lin. yd

CECONITE 102 (2.6 oz.) - A fine weave medium weight fabric to be used as a replacement for intermediate weight cotton fabric as described in TSO-C15.
70" Width P/N 09-00900 /lin. yd

UNCERTIFIED LIGHT - 1.7 oz., lightweight fabric recommended for covering ultralight aircraft. This fabric will be unstamped. It is not approved for certified aircraft except over plywood surfaces.
66" Width P/N 09-00921 /lin. yd

SUPER SEAM FABRIC CEMENT

New Super Seam Fabric Cement. Not compatible with original nitrate-based Super Seam. Used to attach Ceconite Fabric to structures. High solids nitrate based cement approved in the Ceconite STC.

FLAMMABLE
1 Qt. P/N 09-18100
1 Gal. P/N 09-18200

POLYESTER THREAD & CORD (FAA APPROVED)

INTERIB BRACING TAPE - 36 yd roll, 1/2"w P/N 09-41560.....

CECONITE REINFORCING TAPES (FAA APPROVED)

Polyester twill with adhesive back. Applied under riblacer, server, or pop rivet to prevent fabric from ripping. 60 yd. length.

1/4" width P/N 09-41230

3/8" width P/N 09-41238

1/2" width P/N 09-41212

CECONITE PROCEDURE MANUAL

STC manual for applying ceconite materials.
P/N 09-01000.....

CECONITE TAPES

This FAA approved process utilizing Ceconite polyester fabrics and the Randolph line of finishes assures a beautiful, durable, weather-resistant cover job every time. The Ceconite cover process was issued Supplemental Type Certificate No. SA4503NM in 1997, and this number will apply to all aircraft. Note: Only Randolph materials may be used through the

topcoat paint to comply with STC requirements. Randolph finishes are required for approval. Ceconite is approved for use on most certified aircraft. To be sure, check the Approved Model List in the latest revision of Procedure Manual 101 for the Ceconite Aircraft Covering Process.

FABRIC – TAPES

DACRON FABRIC FOR HOMEBUILT AIRCRAFT

Easily controlled shrinkage by the application of heat by either a conventional steam iron or other heat source assures a professional covering job even on the first attempt. It may be coated with aircraft dope, epoxies or other finishes as acceptable to the FAA. Dacron is available in many weights and weaves but three types have been selected as being most suitable as an aircraft covering material. The tensile strength of Grade A and Irish Linen aircraft fabrics is 80 pounds, which may be used as a comparable standard in selecting the proper Dacron fabric weight for a specific application. The 1.8 oz. is a light weight material which is generally used on gliders and over plywood. The 2.7 oz. fabric is comparable in strength to Grade A. The finer weave assures an ultra-smooth texture-free finish. The 3.7 oz. material is a heavy duty fabric for extraordinary service.

NOT for use on certified aircraft.

| Weight per Sq. Yd. | Part No. | Strength (Lb./In.) | Width | Price Per Lineal Yd. |
|--------------------|----------|--------------------|-------|----------------------|
| 1.8 Oz. | 09-00100 | 60 | 60" | . |
| 2.7 Oz. | 09-00300 | . | 62" | . |
| 3.7 Oz. | 09-00500 | 130 | 66" | . |

DACRON SURFACE TAPES

The Dacron tapes are made up in the 2.7 oz. weight. Available with smooth edges or with conventional pinked edges. The Dacron tape is not FAA approved. Sold in 50 yard rolls.

| Width 50 Yd Roll | Smooth Edge | | Pinked | |

Discount Schedule for Dacron Tapes: Less 10% for 12 Rolls (assorted) • Less 15% for 25 Rolls (assorted). Request quote on larger quantities.

DACRON BIAS TAPE FOR HOMEBUILT AIRCRAFT

Bias-cut tapes (weave 45° to edge) are especially useful for trimming compound curves on components such as wing tips and tail surfaces. Bias tape will stretch to conform to the contour without wrinkles, without heat-shrinking edges or cutting and notching to remove excess fabric. Stretching reduces the width about 35% so 3" tape should be used to finish areas normally covered with 2" tape. 2" Bias tape will pull to about 1-3/8" width.

2" x 50 Yd. Roll P/N 09-16300
3" x 50 Yd. Roll P/N 09-16400

NOT FOR USE ON CERTIFIED AIRCRAFT

SOLDERING IRON

Use to melt drain holes and inspection rings in polyester fabric. 35 Watt, 900°F tip. Tip is replaceable & long life coated.

P/N 09-37430

HEAVY-DUTY HEAT GUN

This soft air velocity of this heat gun increases the surface temperature to the required working temperature much faster than conventional heat guns and maintains a higher temperature for faster completion of the application. Features double insulation, two temperature selections of 570°F and 1000°F, and a unique impact resistant heating element. Operates

on 120V AC at 11.6 amps. Air volume 14.8 cu. ft. per minute. Wt. 1-1/2 lbs. P/N 09-00354

DELUXE HEAT GUN

This handy tool gives you a fast, drum-tight, mirror smooth finish. It's ideal for heat-shrinkable covering films. Get a professional finish with less time and effort. 1-year warranty.

Features: • Includes removable wide nozzle • 1000-watt heating power • Heavy-duty fan motor • Textured, composite hand-grip • 3-position, hot/cool/off switch • Adjustable air intake baffle • Weight: 15 oz • 5.5' AC power cord with

2 prong plug

P/N 12-00527

POCKET THERMOMETER

This Pocket thermometer can eliminate 80% of your iron-on covering problems. These problems are caused by your iron's temperature varying as much as 60° while in use, which causes bubbles and sags. If you are using an iron other than Black Baron, this thermometer is a must in monitoring iron temperatures.

P/N 09-37500

PINKING SHEARS

Hot drop-forged of fine cutlery steel. Precision matched teeth. Ball bearing pivot reduces friction and finger fatigue. Length 9".

Right handed
P/N 09-00355

STEWART SYSTEMS EKOBOND

Stewart Systems EkoBond is a revolutionary water based cement for the application of fabric. EkoBond has extreme bond strength for fabric to fabric and fabric to non-fabric surfaces in both peel and shear tests. EkoBond is very user friendly since it has very little odor and can be used in a closed shop with no health or fire hazards. EkoBond dries quickly and will not attack primers or enamel paints. EkoBond is non-flammable and environmentally friendly. Available in Quarts & Gallons

PTI SPECIALTY PAINTS

PTI Specialty Paint & Coatings exclusively from Aircraft Spruce & Specialty Co. are featured in space, aerospace and aviation applications throughout the world -- the Space Shuttle and Space Station projects, the Patriot and Stinger missile projects and in refurbishing of landing gear for commercial aircraft. Now, Aircraft Spruce brings PTI products to General and Sport Aviation.

See PTI Paint Products at www.aircraftspruce.com

1. Paint Stripper
2. Primers: Acid Etch and Epoxy
3. Topcoat: A chemical resistant Polyurethane with UV protectors
4. PTI Polykick™ to accelerate drytime

PTI COMPLETE SPECIALTY PAINT SYSTEM

Note: Strong professional recommendation – These products have been specifically formulated to work together. So, while PTI's polyurethane will work with other primers and PTI's primers will work with other topcoats, maximum adhesion, durability and performance is achieved when these products are applied as a system. To Purchase Your Specialty Paint System Simply tell us the make and model of your aircraft, and the Federal 595 Color – see chart on our website at: www.aircraftspruce.com Need a custom color that is not on the chart? – Ask us, we can help you with that too.

SOLVENTS, REMOVERS, & REDUCERS

PTI-MEK is virgin (not recycled) MEK that may be used to clean and prepare the substrate for painting. PTI-MEK may also be used to clean brushes, paint guns and other painting tools. PTI-Acetone is virgin (not recycled) Acetone that may be used to remove lacquer finishes, for cleanup after painting, and to soften lacquers or acrylics that set up in spray guns or hoses. Acetone is not effective on urethanes and should not be used. Use MEK for cleanup on urethane products. Use only virgin acetone. Recycled acetone can damage virtually anything to which it is applied. PTI-PRB paint remover is a non-toxic paint stripper designed for removing polyurethane and other paint systems. Contains no halogenated solvents, pheno, heavy metals or other toxic materials. It clings to vertical, inclined and overhead surfaces and is slow drying for a long reaction time. PTI-PRB is also free rinsing and it's surfactants are biodegradable. The remover is safe on all aircraft structural metals including high strength steel. This non-toxic stripper conforms to the following specifications: Boeing D6-17487, Douglas CSD-1, T.O. 1-1-8, MIL-R-81249D, Type I & II (partial testing) and AMS 1375B (partial testing). PTI-PRY paint remover is a high performing stripper for removing urethanes, epoxies, primers and enamels. In addition to the fact that it is effective it is economical. PTI-PRY clings to vertical, inclined and overhead surfaces and is suitable for indoor use. This product is safe on most aircraft structural metals including high strength steel, mild steel, cadmium, aluminum, magnesium and copper alloys. The surfactants on this stripper are biodegradable. PTI-PRY conforms to the following specifications: MIL-R-81294D, Types I, II & IV and Class 3 (QPL), T.O.1-1-8, AMS 1375, DOUGLAS CSD-1, TYPE III, and BOEING D6-17487 REVISION H. PTI-Toluene is virgin (not recycled) toluene that may be used as a reducer for enamels and other coatings in the alkyd family. Do not use with PTI chromate and chromate free primers. Instead, use PT-1022X66 reducer. PT-1045 is a reducer specially formulated to compliment the PTI Air Dry Wash Primer. PT-1022X66 is a reducer specially formulated to compliment the PTI chromate and chromate free primers. PT-1003 Type II is a reducer specially formulated to compliment the PTI Epoxy primer.

EPOXY PRIMER

PTI's Epoxy Primer is a low VOC (volatile organic compounds) epoxy polyamide solvent primer which conforms to the military specification MIL-P-23377 Rev. E. This formulation has been tested by the U.S. Government and is on the Federal Government's "Qualified Products List." This coating is highly recommended for use on aluminum and all plated or unplated metallic surfaces to insure maximum protection against corrosion. This primer may be used as an interior or exterior primer that insures maximum adhesion of any paint or lacquer finish coats. In laboratory tests, PTI's epoxy primer maintained its integrity when subjected to the following chemical and other resistance properties tests: Lubricating Oil 24 hr immersion @ 250F - No defects Full Chemical Resistance after 7 days Hydraulic Fluid 24hr immersion @ 150F - No defects - Salt Spray per ASTM B117-1000+ Hrs Methyl Ethyl Ketone-Soaked Cloth 100+rubs - Passes Humidity (Filiform) - 1000+ Hrs DS2 (1,5-Dichloropentane) - Passes.

NOTE: Before applying, refer to the technical data sheet for this product. *Must be shaken for 15 min. on a paint shaker.

ACID ETCH PRIMER

PTI's Air Dry Wash Primer is a polyvinyl butyral zinc chromate formulation that may be used to prime all plain or plated metallic surfaces. Priming surfaces with this primer will ensure maximum adhesion of all bake or air-dry finish coats (including lacquer finish coats). The finely ground emulsions of zinc chromate pigment, resins and phosphoric acid hardeners are virtually non-settling. Once applied, PTI's Air Dry Wash Primer requires no sanding. For the best results follow the instructions on the technical data sheet. This primer exceeds the performance standards specified in Department of Defense specification (DOD) 15328 and Military Specification MIL-8514.

ZINC CHROMATE PRIMER

PTI's Zinc Chromate Primer is formulated to exceed the performance standards in the Federal Specification TT-P-1757. This primer promotes maximum adhesion to bare aluminum and steel and is recommended for that purpose. PTI's zinc chromate primer is a formulation proven to perform.

ZINC OXIDE PRIMER

PTI's Zinc Oxide Primer is formulated to exceed the performance standards in the Federal Specification TT-P-1757 (the chromate free version of that specification). Promotes maximum adhesion to bare aluminum and steel and is recommended for that purpose. Formulated to provide a high performance primer that is considered a safer, more environmentally friendly, alternative to the zinc chromate primer.

PTI SANDABLE PRIMER

PT-573 is a two component epoxy based primer. PT-573 is capable of filling small holes and imperfections before topcoating. PT-573 provides a smooth, sandable base coat that improves the adhesion and appearance of the topcoat. Because of PT-573's unique formula, this primer also provides excellent rust and corrosion protection. This sandable primer is compatible with PTI's epoxy (PT-426F series) and Polyurethane (PT-785 and PT-799 series) topcoats.

POLYURETHANE - ENAMELS

POLYURETHANE/CATALYST CURE: Toxicity: PTI Polyurethane contains no substance of known toxicity under normal conditions of usage. Colors: The Polyurethane is available in clear, white, blacks, grays and most Federal Standard number 595B (FS#) colors or glosses. Custom colors are available upon request. Viscosity: Admixed and reduced (17925) 15 seconds with #4 Ford Cup. Solids: Nonvolatile admixed & reduced (17925) 65% by weight. Weight: Weight per gallon-admixed and reduced (17925) 10.2 lbs./gal. Hardness: Pencil Hardness (17925) 514. Flexibility: 1/4" Mandrel - Passes. Salt Spray: Saturated Salt Spray 1,000 hours minimum. Spray: Saturated Salt Spray 1,000 hours minimum. **ENAMEL:** PTI's Enamel is formulated to meet the performance specifications of Federal specification TT-E-489G. This product is a high quality alkyd enamel which performs best when used with PTI's zinc chromate or chromate free primer. It may be applied over wood or metal and is suitable for both interior and exterior applications.

PTI POLYURETHANE PAINT KIT

This kit will provide all the materials needed to paint any RV or similar size aircraft.

The kit consists of:

- Green Acid Etch Primer & Reducer
- Yellow Epoxy Prime, Catalyst, & Reducer
- Polyurethane White topcoat, with catalyst & Reducer
- Clear coat sold separately

Additional colors are available upon request, for an additional cost.

DOPEs – THINNERS – SOLVENTS

CERTIFIED COATINGS PRODUCTS, located in Los Angeles, has been manufacturing aircraft dopes, thinners and special products for the aircraft industry for 50 years. It is a small company making good quality, high-solids dopes, very competitively priced. Since their products are made locally, we enjoy a tremendous saving in delivery costs which is reflected in the pricing as well. We have handled their line for many years with complete customer satisfaction.

FAA/PMA

In January 2005, Certified Coatings Products received FAA-PMA (Federal Aviation Administration Parts Manufacturing Approval) for use on Ceconite fabric. The products have always been approved for use on any other fabric. (PMA#PQ2435NM)

*Add 5% to 10%, as needed, of this blend of fast-cutting, high-boiling solvents to prevent dope blushing under conditions of high humidity. Also improves flow by slowing drying time.

Certified Coatings offers only a limited number of colors in butyrate dope which have been selected as standards. The colors will match as closely as possible the corresponding color on the Randolph selection card reproduced in this catalog.

RANDOLPH ACID-PROOF BATTERY BOX BLACK PAINT #345

Battery Box Black Paint is an asphaltic coating used to provide protection from battery acid in battery boxes and compartments. It is generally applied with a brush or roller to any metal area that may be exposed to leaking battery acid. Shelf life: Guaranteed 2 years from date on manufacture in sealed container in protected storage. Coverage: 225 square feet per gallon with one coat. Mixing: Stir well before use. Thinning: Use out of the can. If thinning is necessary, thin five parts paint to one part 286 Nitrate Thinner. Application: Apply with a brush. Three coats will provide the best possible protection to epoxy primed metal surfaces. Qt.....P/N 344-QT.....

55 Gallon Drums - For 55 gallon drum of Randolph product, use basic P/N D55 - Example: 210-D55

RANDOLPH FINISHES

RANDOLPH COLOR PRODUCTS
RANDOLPH COLORED NON-TAUTENING BUTYRATE DOPE - The final color coat applied over fabric in the Ceconite/Randolph system. Available in 50 standard colors. Thin one to one with 9703 Butyrate Thinner. One thinned gallon covers approximately 200 sq ft with one coat.

RANTHANE POLYURETHANE FINISH

Ranthane is a low viscosity, very high solids polyurethane material resulting in low film weight providing a lasting high gloss. Will withstand most chemicals, engine oils, and hydraulic fluids. Has superb adhesion and abrasion resistance as well as high temperature resistance. For fabric and primed metal.

RANTHANE HIGH SOLIDS CATALYST -

The FAA has approved the use of Ranthane over Poly-Fiber. To order Ranthane colors, please specify Randolph color from chart on right and specify quart or gallon.

NOTE: Randolph paints are now manufactured by Consolidated Coatings and will not exact match old Randolph colors. If you are ordering to match old Randolph colors, please provide a paint sample that can be matched by the factory.

MARK II FOR METAL (NOT FOR USE ON FABRIC)

A tough, long-lasting, two-part topcoat paint catalyzed with a non-isocyanate catalyst. Supplied air respirator not required when spraying. Available in same 50 colors as Colored Butyrate Dope and Ranthane for use over primed metal or composite parts. Mix 1:1 with Mark II Mixing Liquid.

MARK II MIXING LIQUID - Combination of catalyst and thinner to be used with Mark II for Metal paint.

FAST-DRY ENGINE ENAMELS

Formulated to be heat resistance and maintain good gloss and color retention. For use in the painting of engine crank cases and cylinders, after major overhaul or for general maintenance. Can also be used on engine mounts and supports. Service temperature is 300-350 degrees F. Reduction: Thin to correct spray viscosity with #257 Enamel Thinner(approximately 20% reduction). Application: Spray two coats. Allow to dry to the touch between coats.

PAINT VISCOSITY CUPS

A precision tool to accurately measure paint viscosity when spraying automotive and aircraft finishes. Consists of a nylon cup with a precisely sized small hole in the bottom. As paint flows through the hole, time the rate of flow. Adjust viscosity by adding thinner as required to produce recommended flow for product being used.

3M™ ABRASIVES

3M™ STIKIT™ DISC PAD 05575

For use with 5 diameter Stikit™ Discs. Has medium density foam and a 45° tapered edge for flexibility. These lightweight, shock-resistant pads have a vinyl face (blue) that provides excellent disc adhesion yet allows quick, easy removal.

| Color | Size | Part No. | Price |
|-------|-----------|----------|-------|
| Blue | 5" x 3/4" | 09-01535 | . |

3M™ STIKIT™ DISC HAND PAD 11063

Use with 5 diameter Stikit™ Discs. Made with soft density foam for conformability. Has 1 inch wide strap for holding the pad to the operators hand.

| Size | Part No. | Price |
|---------|----------|-------|
| 5" x 1" | 09-01448 | . |

3M™ STIKIT™ PAPER DISC ROLL 236U

Constructed of durable aluminum oxide; works well for most wood species. The open coat feature provides a more aggressive cut than a comparable closed coat abrasive of the same grade and a special loading resistant coating makes this disc a good choice when loading is a problem. The C weight, paper backing is more durable for extended disc life and harsher sanding applications.

3M™ FOAMFAST 74 SPRAY ADHESIVE

For bonding flexible urethane or latex foam together or to many other materials like wood, metal, and non-vinyl plastics. 24 oz. Can. Orange in color.

P/N 09-01394.....

3M™ POLYSTYRENE FOAM INSULATION 78

3M™ Polystyrene Foam Insulation 78 Spray Adhesive is a high solids aerosol. Adjustable lace spray minimizes overspray and cleanup. Ideal for attaching fiberglass, expanded polystyrene foam and extruded polystyrene foam insulation. Effective up to 140°F. 24 oz. can, clear in color.

P/N 09-01378.....

3M™ REPOSITIONABLE 75 SPRAY ADHESIVE

This adhesive provides tape-like bonds on many lightweight materials. It adheres in seconds, yet has an extra-long tack range that allows you to lift and reposition materials. 16 oz. Can.

P/N 09-01377.....

3M™ RUBBER AND VINYL 80 ADHESIVE

First true contact adhesive in aerosol form. It has exceptional resistance to plasticizing oils. Bonds rubber and supported vinyls better than many typical bulk neoprene contact adhesives. 24 oz. can

P/N 09-01396.....

3M™ SCOTCH-WELD™ URETHANE ADHESIVE DP601/ DP601NS

3M™ Scotch-Weld™ DP601 is a self-leveling, gray, rapid setting, two-component polyurethane adhesive. It is packaged as 1:1 ratio liquids in duo-pak cartridges. With the squeeze of the trigger, the components are automatically mixed and easily dispensed as a bubble-free liquid. DP601NS is the same as the DP601 except it is a non-sag, gray, rapid setting, two-component polyurethane adhesive.

| Description | Size | Color | Part No. | Price |
|-----------------------|-------|-------|----------|-------|
| DP601 (Self-leveling) | 12 oz | Gray | 09-01413 | . |
| DP601NS (Non-Sag) | 50 ml | Gray | 09-01412 | . |

3M™ HI-STRENGTH 90 SPRAY ADHESIVE

High strength, fast contact-type adhesive. Fast contact strength buildup for many decorative laminates. Only needs 1 minute of drying time.

| Size | Part No. | Price |
|-------|----------|-------|
| 24 oz | 09-01376 | . |

3M™ SCOTCH-WELD™ EPOXY ADHESIVE

Fast setting, flexible, two-part adhesive with a 1:1 mix ratio for bonding many materials, such as metals, ceramics and many plastics. 9 minute work life with handling strength in 20 minutes.

| Size | Color | Part No. | Price |

3M™ SCOTCH-WELD™ INSTANT ADHESIVE CA40H

One-part, high strength, very fast setting adhesive cures at room temperature. Adheres to difficult to bond substrates such as EPDM rubber, aluminum, and flexible vinyl. Comes in a 1 oz. Bottle. Clear.

P/N 09-01368.....

3M™ SCOTCH-WELD™ INSTANT ADHESIVE CA8

This instant adhesive has a fast set time of 5 to 40 seconds. Excellent adhesion on metal, plastic and rubber. Bonds resist shock and impacts. A cyanoacrylate adhesive. Comes in a 1 oz. bottle.

P/N 09-01366.....

3M™ SCOTCH-WELD™ INSTANT ADHESIVE SURFACE ACTIVATOR

It is ideal for use with all 3M Cyanoacrylate Adhesives for a broad range of industrial and electronic applications. It is also ideal for use with CA-5, CA-9, or CA-50 Gel for many wire tacking and coil terminating applications.

P/N 09-01407.....

3M SCOTCH-GRIP™ HP CONTACT ADHESIVE

A high performance contact adhesive that provides a long bonding range and excellent initial strength.

1357 Grey/OLIV..... P/N 09-01362.....
1357 Neutral 1G..... P/N 09-01373.....

3M™ SCOTCH-GRIP™ PLASTIC ADHESIVE 2262

A clear, non-staining high strength adhesive with exceptional resistance to plasticizer migration. Develops tack very rapidly. Can be used to bond many flexible, rigid and extruded vinyls to metal and many other surfaces. Comes in a 1 qt. can.

P/N 09-01365.....

3M™ SCOTCH GRIP RUBBER ADHESIVE

Lower viscosity, sprayable version of Scotch-Weld Neoprene High Performance Rubber and Gasket Adhesive 1300. Has excellent adhesion to metal, baked enamel, wood, most plastics, and neoprene, reclaim, SBR, and butyl rubber. not for EPDM rubber.

3M™ SCOTCH-GRIP™ CONTACT ADHESIVE

A brushable, neutral-colored contact adhesive for bonding many decorative laminates, aluminum, steel, plywood, panels, wood and wood veneer, masonry, rubber, canvas and other porous and non-porous materials to each other or to themselves.

P/N 09-01364.....

3M™ SCOTCH-GRIP™ RUBBER AND GASKET ADHESIVE 847

This fast drying adhesive develops strength very quickly. It has excellent heat resistance; temperature performance is from -5 to 300F. Meets specification requirements of MIL-A-1154C. Bonds neoprene, reclaim, SB-R, and butyl rubber to metal, wood, most plastics, and many other products. 5oz. Tube. reddish Brown in Color.

P/N 09-01361.....

3M™ SCOTCH-SEAL™ DUCT SEALER

An extremely smooth, easy handling knife or caulking grade sealant for sealing medium and high pressure heating and air conditioning ducts.

P/N 09-01409.....

3M™ GENERAL TRIM ADHESIVE 8088 - CLEAR

A high strength adhesive for bonding automotive materials (carpeting, jute pads, fabrics, plastics) to metal and other surfaces. Good heat and water resistance. Not recommended for bonding polystyrene foam. (For bonding polystyrene foam, use 3M™ Spray Trim Adhesive PN08074). 18.1 oz. can. Color is clear.

P/N 09-01444.....

3M™ IMPERIAL™ HAND GLAZE

Non-silicone, non-wax hand glaze. Excellent depth of shine. Superior luster. Use by hand to refine and fill swirls after machine glazing refinish or factory applied paints. Specially formulated to work on all colors and can be painted over. 1 qt. Bottle. Color is clear.

P/N 09-01438.....

3M™ IMPERIAL™ MACHINE GLAZE

Non-silicone, non-wax machine glaze. Possesses excellent scratch removal characteristics. Superior depth of shine and luster. Use by machine to remove swirl marks after compounding acrylic lacquer. Formulated to work on all vehicle colors. 1 qt. bottle. Color is clear.

P/N 09-01439.....

3M™ FINESSE-IT™ FINISHING MATERIAL 81235

Specially designed compounds and polishes to be used on OEM and baked refinish paints to remove sand scratches or to remove swirl marks from previously compounded areas. 1qt. bottles.

P/N 09-01451.....

3M™ FINESSE-IT™ NATURAL BUFFING PAD

The 3 inch buffing pad is designed to get you into tight areas not accessible with a conventional polisher. Pads are hook-and-loop backed. Pads are sold each.

P/N 09-01452.....

3M™ PREMIUM LIQUID WAX

Clear coat safe wax. Use on all cured paint finishes. For use by hand or with an orbital polisher. Produces a high-gloss, deep-luster, durable finish on both new and used car paints. Special formulation is capable of removing road film or light oxidation from car finishes. Heavily oxidized finishes may require compounding with 3M™ Super Duty Rubbing Compound (PN39004) prior to applying wax.

P/N 09-01440.....

CS

3M™ AUTOMOTIVE PRODUCTS-CLEANERS

3M™ PERFECT-IT™ II RUBBING COMPOUND

Specially designed medium-cutting compound for removing grade 1200, 1500 and 2000 color sanding scratches in paints including clear coats. Unique formulation. Produces minimal compound swirl marks while buffing to a high gloss. When followed by the 3M™ Perfect-It™ Foam Polishing Pad Glaze, this two-step system delivers a show car luster in record time. Use with 3M™ Perfect-It™ Foam Compounding Pad (PN05723). 1qt. P/N 09-01437

3M™ PERFECT-IT™ SHOW CAR PASTE WAX

Ultra high gloss paste wax with exceptional durability for use on automotive paints. Shines and protects new and like new pint finishes, producing a deep high gloss, lustrous, durable, "wet look" finish. P/N 09-01443

3M™ PERFECT-IT™ BACKUP PAD

Enables 3M™ Superbuff™ Compound Pad users to use the 3M™ Perfect-It™ Foam Polishing Pad without having to remove the 3M™ Superbuff™ Adaptor 05710 from the shaft of the polisher. Fits all standard 5/8 inch shaft slow-speed polishers. 7" x 3/4". P/N 09-01426

3M™ PERFECT-IT™ PLUS FOAM POLISHING PAD

Foam polishing pad that utilizes a 3M patented convoluted foam face. Reduced diameter loop attachment backing for added edge protection. Attaches to either backup pads part numbers 05717 or 05718. Fits all 5/8 inch shaft on slow speed polishers. P/N 09-01427

3M™ AVIATION RUBBING COMPOUND

Effectively refines scratches in business jet cabinet clear coats using polyesters and polyurethanes. Also used for refining scratches on painted aircraft surfaces created during the defect removal process, as well as removing paint oxidation on painted aircraft surfaces. Can be used on aircraft cabinetry or painted surfaces. * No Silicone * Non-corrosive P/N 09-02173

SuperBuff Buffing pad 05703 P/N 09-02174

3M™ WHITE GREASE 8875 (LITHIUM LUBE)

Long-lasting lubrication, easy spray viscosity. Won't drip or run. Resists "washing out" if exposed to road spray. 10.5 oz. Can. P/N 09-01445

3M™ OVERSPRAY PROTECTIVE SHEETING MASKER

Portable masker designed to dispense Overspray Protective Sheeting (PN06727). Can be used horizontally, vertically or wall mounted. Spring loaded end frame designed for easy loading of Overspray Protective Sheeting. Paper is not included with masker. P/N 09-01441

3M™ FIBERGLASS RESINS

Designed to be used with Fiberglass Cloth (PN05838) and/or Fiberglass Mat (PN05833). Waterproof when cured. Liquid Hardener (PN0536) included. For metal and fiberglass. Thick formulation resists sags or runs. 1 Qt. P/N 09-01433

3M™ LIGHTWEIGHT BODY FILLER

Cures tack-free in 15-20 minutes — reduces sandpaper loading. Creamy texture. Smooth spreading. Easy smoothing. Vacuum processed to minimize pinholes. 1 Qt. P/N 09-01428
1 Gal. P/N 09-01429

3M™ FLOWABLE FINISHING PUTTY

Tack-Free and Stain Resistant. Two component, self-leveling putty designed for use as a "skin" coat over plastic filler to fill pinholes, sand scratches, low areas or other imperfections. Available in quart and handy squeeze dispenser — no mess. Fills pinholes in body

fillers and small imperfections in metal and fiberglass. Cures tack-free in 30 minutes. Flowable, brushable. Easiest sanding 3M™ Polyester Putty. Minimizes staining that can occur with basecoat/clearcoat systems over body filler. Vacuum processed to minimize pinholes. Excellent adhesion to galvanized, aluminum and thoroughly cured and sanded factory-applied paint surfaces. P/N 09-01432

3M™ LIQUID HARDENER

Fast-acting liquid hardening agent designed to be used with 3M™ Sprayable Polyester Filler (PN05825 or 05856), and/or 3M™ Fiberglass Resin (PN05833 or 05834). 22oz. tube P/N 09-01434

3M™ LONG STRAND FIBERGLASS REINFORCED FILLER

Contains long strands of fiberglass. Repairs holes, cracks and tears in fiberglass. Repairs holes in metal. Waterproof. Repairs larger holes, cracks and tears than 3M™ Short Strand Fiberglass Reinforced Filler (PNs 05815-05816). 1 Gal. Can P/n 09-01430

3M™ SHORT STRAND FIBERGLASS REINFORCED FILLER

Contains chopped fiberglass. Repairs holes, cracks and tears in fiberglass. Repairs holes in metal. Smooth spreading. Waterproof. Can be used with Fiberglass Mat (PN05837) or Fiberglass Cloth (PN05838) to reinforce large repair areas. 1 Gal. Can P/N 09-01431

3M™ SPREADERS

Designed for spreading body and fiberglass fillers, finishing putties, and resins. Sharp edge. Flexible. Durable. Easy to clean. Cured fillers pops off easily. Available in 4" or Assortment (1 each 4, 5 and 6). 4" P/N 09-01435

Assortment P/N 09-01436

3M™ ADHESIVE REMOVER CITRUS BASE

Provides easy clean up of most types of adhesives. Quickly removes waxes, road tars, grease, oil and similar materials. Will not harm paint, vinyl or fabrics when properly used. 24 oz. Can. Pale yellow in color. P/N 09-01379

3M™ ADHESIVE REMOVER CITRUS BASE

A liquid cleaner/degreaser that can be used to dissolve and remove dirt, grease, tar, and many non-curing type adhesives. It can also be used to degrease substrates for adhesive bonding in place of many chlorinated or petroleum-based solvents. 24 oz. Can. Clear in color. P/N 09-01393

3M™ 5-WAY PENETRANT

Multi-purpose product that is effective as a demountant - displaces moisture and "dries out" electrical apparatus. 24. oz. Can. Light Amber in color. P/N 09-01370

3M™ SCOTCHGARD SPOT REMOVER AND UPHOLSTERY CLEANER

Designed to clean carpets and upholstery. Releases both oil- and water-based soils from carpet and upholstery. Aerosol foam is sprayed directly on spot with minimum of overspray. Requires no rinsing. Wipe or blot area with a clean, absorbent cloth. P/N 09-01722

3M™ STAINLESS STEEL CLEANER AND POLISH

Ideally suited for stainless steel, chrome, laminated plastics and aluminum surfaces. With a high-gloss formula, it wipes clean with no streaks or buildup, resists fingerprints and masks surface blemishes. Pleasant lime fragrance. Contains no petroleum distillates. P/N 09-01721

3M PAINT RESTORATION KIT

This all inclusive kit for on aircraft detailing. This is not a polish or wax which only fill scratches, 3M's Paint Restoration Kit actually, removes oxidation, refines scratches, and achieves a professional finish. Designed for airplanes: no-corrosive, silicone free, commercial aircraft manufacturer tested and approved. Kit includes: * 3M Aviation Finishing Compound 1 bottle (16 oz) * 3M Aviation Oxidation Removal Compound 1 bottle (16 oz) * 3M Superbuff

Adapter * 3M Superbuff Buffing Pad * 3M Perfect-it Back-Up Pad * 3M Perfect-it Plus Foam Polishing Pad * 3M Perfect-it Detailing Cloth, Yellow * 471 Vinyl Red 1" x 36 Yds

3M™ FASTENERS - SAFETY - TAPE

3M™ SCOTCHMATE™ VELCRO FASTENING TAPES

RECLOSEABLE FASTENER HOOK

It's as simple as pressing together and pulling apart. When your product calls for thousands of easy openings and closings, 3M™ Scotchmate™ Reclosable Fasteners pull through for your. Tiny, stiff hooks mesh with pliable loops for quick secure fastening. In addition, provide a solution as strong as you need. No adhesive, nylon and

sewable hook so can be easily attached to many substrates. Sold by the foot.

- Velcro Fastening Tape 2" Black.....09-22223.....
- Hook 2" SJ3402.....09-01388.....
- Loop 2" SJ3401.....09-01387.....

VELCRO FASTENING TAPES

Consists of a set of 2 mating 1" wide black Nylon tapes, which, when pressed together, lock tightly and hold until peeled apart. Tapes have pressure-sensitive adhesive backs. Ideal for use in cockpit to mount pilot supplies or as an upholstery and rug attachment. An effective fastening material - applications are unlimited. Sold by the yard.

- Velcro Fastening Tape 1" Black.....09-31400.....
- Loop 1" SJ3571.....09-00251.....
- Hook 1" SJ3572.....09-00250.....

3M SCOTCHMATE 2" LOOP SJ3572

It's as simple as pressing together and pulling apart. When your product calls for thousands of easy openings and closings, 3M™ Scotchmate™ Reclosable Fasteners pull through for your. Tiny, stiff hooks mesh with pliable loops for quick secure fastening. In addition, Scotchmate reclosable fasteners are backed with 3M adhesive technology expertise which range from rubber adhesives to

high performance, double-coated foam tape which can be adhered to most surfaces to provide a solution as strong as you need. Premium performance nylon hook with VHB™ Tape for high temperature resistance and great shear performance. Sold by the foot.

- Velcro Fastening Tape 2".....09-01656.....
- 2" Loop SJ3572.....09-01653.....
- Hook 2" SJ3572.....09-01652.....

3M™ SAFETY WALK SHEET

A durable, mineral coated, non-slip fabric for wing walks. Waterproof, weather-proof and unaffected by vibrations, heat, cold, gasoline or oil. Assures safe footing. Pressure-sensitive backing should have additional coating of 3M 1300L (located on pg 388) to assure adhesion for aircraft applications.

3M SAFETY GOGGLES

Meets the requirements of ANSI Z87.1-2003 as high impact protectors. Provides side protection. Hard-coated, polycarbonate lenses offer 99% UV protection. Helps protect against chemical splashes. Pliable vinyl frames provide a comfortable fit. Indirect vents for air flow. P/N 09-01498.....

3M™ THREE POSITION EAR MUFF

Padded headband and adjustable head strap. Comfortable fit with the headband under the chin, over the head or behind the head. Noise Reduction Rating: 27dB* with headband over and behind the head (26dB* with headband worn under the chin). P/N 09-01499.....

3M™ EAR MUFF 1440

Lightweight. Padded headband. Tension adjustment. Contoured ear cushion in multi-position ear cup gives enhanced fit. Replaceable cushions and molded noise suppression inserts. Noise Reduction Rating: 24dB*. P/N 09-01495.....

3M™ EAR MUFFS 1435

General purpose ear muffs. Wide, forked headband and multi-position large ear cup create a comfortable, secure fit. Economical, lightweight design. Replaceable, soft sealing cushions. Noise Reduction Rating: 23dB*. P/N 09-01494.....

3M™ EAR PLUGS 1100

Smooth dirt resistant surface, tapered design to fit the ear canal, provide added comfort and hygiene. Hypo-allergenic material. Each box contains 200 pairs, and each package is easy to dispense. Noise Reduction Rating: 29dB*. P/N 09-01493.....

3M™ REUSABLE EAR PLUG

Multi-flanged plugs stay securely in ear canal. Soft, cloth cord lays flat. Model 1271 includes storage case to keep plugs clean and protected. Plugs are washable and reusable. Bright orange color for visibility. Noise Reduction Rating: 24dB*. P/N 09-01492.....

3M™ GLASS CLOTH TAPE 361

7.5 mil (0.14 mm) thick, glass cloth tape with silicone adhesive. Used for many applications requiring high temperature resistance, high adhesion, and a very strong, abrasion resistant backing such as masking protection in thermal spray operations.

| Size | Part No. | Price | Size | Part No. | Price |

3M™ GLASS CLOTH TAPE 398FRP

Flame Retardant Sealing Tape 398FRP is a glass cloth tape with an acrylic adhesive for many applications requiring high adhesion, an abrasion-resistant backing and flame retardant properties. The tape meets flame retardancy requirements of F.A.R.

- 2"x36 yards..... P/N 09-01728.....
- 3"x36 yards..... P/N 09-02135.....

3M™ THERMOSETTABLE GLASS CLOTH TAPE

8.3 mil (0.20 mm), glass cloth tape with thermosettable rubber resin adhesive. For many applications requiring high adhesion and a very strong comfortable backing such as wrapping wiring bundles for abrasion and heat protection and connecting cabin ducting sections together.

- 1" x 60 YARDS.... 09-01334.....
- 2" x 60 YARDS.... 09-01342.....

3M CARPET TAPE 9377 2 INCH X 25 YARD

3M 9377 Tape has a differential adhesive system with a high-tack acrylic that bonds to the top-layer substrate and a rubber-based adhesive system that attaches to the flooring material. One side is black and attaches to the flooring material with an acrylic-based adhesive. The white side of the tape is a rubber-based adhesive that provides a bond to the floor surface. Firm application pressure helps develop better adhesive contact and improve bond strength. The bond strength will build over time reaching maximum strength at 72 hours. P/N 09-02133.....

3M™ SCOTCH® SUPER 33+D VINYL ELECTRICAL TAPE DISPENSER

A premium grade vinyl electrical insulating tape, its aggressive adhesive and elastic backing ensure easy, water-resistant conformation to irregular surfaces in low temperatures, yet will not ooze or melt in high temperatures. 3/4" wide X 33' Long. P/N 09-01465.....

CS

3M™ TAPE - MASKING

3M™ SCOTCH® FINE LINE TAPE 218

This 3M tape is particularly suitable for pin striping, multicolor and other custom painting applications. It is a thin, conformable green polypropylene film tape with a special finish that resists paint runoff. The adhesive adheres instantly and offers good holding power, resists lifting and curling. Stretchable and easy to handle. Provides an extremely fine color-line separation for decorative painting of aircraft. Scotch No. 218.

3M MASKING POLY TAPE 5903 (RED)

5903 is a poly tape comprised of heavy duty polyethylene film and synthetic rubber adhesive. It is UV weather resistant and removes cleanly for up to a month with little or no adhesive residue on most opaque surfaces without deteriorating or fading. Used for window and door masking, outdoor holding and protecting surfaces including stucco, concrete, brick, and a variety of construction surfaces where removability is important.
P/N 09-02136

3M™ HAND MASKER KIT

Tape guide pin molded into the M3000 KML frame. Guide pin aids tracking of the masking tape onto masking paper while dispensing. Tack-Down Tape Dispenser (PN06789) allows easy on-off mounting. Provides fingertip access to an extra roll of masking tape. Includes 12 cut off blade. Making film is not included with dispenser.
P/N 09-01442

3M™ SCOTCH® SAFERELASE™ BLUE PAINTERS MASKING TAPE 2090

Ideal for long-term masking projects when tape must be left on for up to a week. Removes cleanly and easily for up to seven days without leaving adhesive residue.

3M™ NOVEC™

3M™ NOVEC™ ELECTRONIC DEGREASER - Effectively removes oils, greases and handling soils from electric motors, electrical equipment, precision devices and other electro-mechanical or sensitive devices. Based on proprietary 3M solvent technology; it is non-flammable, non-ozone depleting and contains no HCFCs, HFCs, nPB or HAPs. 12oz can, 6 can per case. PN 09-01703

3M™ NOVEC™ FLUX REMOVER - Effectively removes rosin solder fluxes, waxes and similar contaminants found in electronics manufacturing and repair. Based on proprietary 3M solvent technology; it is non-flammable, non-ozone depleting and contains no HCFCs, HFCs, nPB or HAPs. 12oz can, 6 can per case. PN 09-01702

3M™ NOVEC™ CONTACT CLEANER - Effectively removes light oils, greases, silicones, dust and particulates from sensitive electrical and electronic equipment. It is compatible with plastics, is non-flammable, non-ozone depleting and contains no HCFCs, HFCs, nPB or HAPs. 11oz can, 6 can per case. PN 09-01704

3M BODY FILLERS

3M premium fillers with adhesion promoters, offer the very best in all-around performance. Our premium fillers adhere to virtually any surface including wood, metal, aluminum, galvanized steel, fiberglass and concrete. They are also non-staining, non-shrinking, creamy and are great for building plugs, patterns, molds, prototypes and general repair to composite parts. 3M premium fillers are easy to sand and are manufactured with only the highest quality ingredients.

3M™ PAINT PREPARATION SYSTEM (PPS™) CUP AND COLLAR, 16023

3M™ PPS™ Cup and Collar, 16023 Large hard cup that supports and holds the PPS large flexible liner, part number 16024. If filled to the top, this cup will hold 32 fl oz. P/N 09-01717

3M™ PPS™ KIT 16024

Kit contains 25 each large lids, liners and sealing caps. Graduated measurement to 28 oz/840 mL (with mix ratio film insert). Max. capacity of 32 oz/950 mL (filled to within 1/8" of rim). For use with part number 16023. Note: mix ratio insert P/N 09-01718

3M™ PPS™ MINI CUPS & COLLARS 16115

Hard cup that supports and holds the PPS mini flexible liner, part number 16114. If filled to the top, this cup will hold 6 fl oz. P/N 09-01720

3M™ PPS™ MINI LIDS AND LINERS 16114

Kit contains 50 each mini lids, liners and 20 sealing caps. Graduated measurement to 5 1/2 oz (with generic mix ratio film insert). Max. capacity of 6 fl oz. For use with part number 16115. Note: mix ratio insert is purchased separately. P/N 09-01719

3M™ PPS™ MIXING CUP AND COLLAR, 16001

Small, hard cup that supports and holds the PPS small flexible liner, part number 16000. P/N 09-01715

3M™ PPS™ ADAPTOR, 16054, TYPE 18

Adaptor converts DeVilbiss TGHV 530 Siphon Feed and all Full Size Siphon Feed Guns with North American 3/8 Female-18 Thread NPS guns for use with 3M™ Paint Preparation System. P/N 09-01716

3M™ HEADLIGHT LENS RESTORATION SYSTEM

With the 3M™ Headlight Lens Restoration System, you will use a 1200-1600 rpm drill equipped with a backup pad and sanding discs to remove the yellowed layer from the headlight lens surface. A higher rpm drill could generate excessive heat and can cause damage to the headlight lens that is difficult to remove. A lower rpm drill does not work efficiently for this process. Two sanding steps will follow to refine or reduce the sand scratches that are made when removing the yellowed layer. Finally, 3M™ Headlight Lens Polish and a foam pad will remove the fine scratches and put the final clarity on the headlight lens. Kit Includes: 1 - Disc Pad Holder 1 - 3M™ Soft Interface Pad 6 - 3M™ Sanding Discs 4 - 3M™ Finishing Discs 1 - 3M™ Trizact™ Disc 1 - 3M™ Headlight Lens Polish, 1oz 1 - Buffing Pad 1 - Step by Step Directions PN 09-02109

3M FIBERGLASS RESIN/KITS

3M's Fiberglass Resin and Resin Kits use the exact same high-strength polyester resin that is used to manufacture high performance watercrafts, snowmobiles, bathtubs and showers. Polyester resins can be used alone or in conjunction with fiberglass mat, cloth or tape to create waterproof repairs to wood, metal, concrete, stainless steel, aluminum and fiberglass. Great for repairing large rust holes in metal and large fiberglass areas where lamination must be rebuilt. Compatible with all paints, including gel coat and marine paints. Quart. P/N 01-01104.....

MEGUIAR'S DUAL ACTION POLISHER

Whether you're a seasoned professional or a weekend warrior who wants show quality, swirl-free results, this is the tool for you. Meguiar's® Dual Action Polisher greatly reduces the amount of time it takes to apply paint cleaners, polishes and protection products and produces results far superior to applying these products by hand. And because of its dual action - rotation and orbit, you never have to worry about burning the

paint. *G110 includes (polisher, "D" handle, custom hard case, W67DA backing plate, wrench, manual) P/N 09-02358.....

MEGUIAR'S SOFTBUFF FOAM PADS

SoftBuff foam pads are safer than wool pads because they will not leave scratches or buffer swirl marks. When used to apply Meguiar's cleaners, polishes & waxes, these unique, fiber-free foam pads add incredible gloss and depth of color to all fiberglass & painted finishes.

W-7000 8" CUTTING PAD - Offers aggressive cleaning ability without leaving swirl marks, scratches or other blemishes. Its quick-change anchor-loop backing matches up with all popular types of hook and loop buffer backing plates. P/N 09-23470.....ea

BOELUBE LUBRICANTS

A Space Age Lubricant developed by The Boeing Company that fights friction at the interface of the cutting edge and the workpiece. The reduction of friction at these surfaces minimizes heat generation and concurrent chip weld. Tools retain their cutting edge longer, leading to closer tolerances and prime chip yield. Manufactured from personal care ingredients, Boelube is non-toxic, non-irritating and biodegradable. Boelube is non-corrosive, non-flammable, chemically stable and free of halogens, heavy metals, sulfur, phosphorus, silicone, petroleum or paraffin wax.

BOELUBE BL70200-13 SOLIDS LUBRICANT

Drilling - Tapping - Reaming - Abrasive Belts - Files - Deburring Tools - Grinding Wheels - Chisels - Band, Circular and Hand Saw Blades. Boelube Solids improve tool life by reducing heat build-up in belt, disc or wheel grinding operations. Apply the push-up tube to the tool before start up. Individual Boelube Blocks are ideal for grinding operations. 1.6oz Push Tube 09-01731

BOELUBE 90 HIGH EFFICIENCY MACHINING LUBRICANT

BOELUBE® 90 is non-toxic, non-irritating, environmentally safe synthetic lubricant that is effective for machining many types of materials. BOELUBE® 90 will provide superior lubricity leading to better finish and longer tool life. BOELUBE® 90 is compatible with Aluminum, Titanium, Graphite, Composites, Honeycomb, Inconel, Kevlar, Wood, Ferrous and Non-ferrous Metals. BOELUBE® 90 is recommended for Drilling, Deburring, Broaching, Forming, Grinding, Milling, Gun Drilling, Routing, Reaming, Oil Hole Tools, Sawing, Punching and Tapping. BOELUBE® 90 is best utilized in One-Shot or Mist Applications, and is ideal for applications where Cold-Cut® or Positive-Lube units are utilized. 4oz Bottle 09-01734 Gallon 09-01733

BOELUBE 70104 LUBRICANT

BOELUBE® 70104 is non-toxic, non-irritating, environmentally safe synthetic lubricant manufactured from personal care ingredients that is effective for machining many types of materials. BOELUBE® 70104 will provide superior lubricity leading to better finish and longer tool life. BOELUBE® 70104 is non-corrosive, non-flammable, chemically stable, and free of Halogens, Silicone, Petroleum, Paraffin Wax, Sulfur, Phosphorus and Heavy Metals whether added or present in any of its ingredients. BOELUBE® 70104 is compatible with Aluminum, Titanium, Graphite, Composites, Honeycomb, Inconel, Kevlar, Wood, Ferrous and Nonferrous Metals. BOELUBE® 70104 is recommended for Drilling, Deburring, Broaching, Forming, Grinding, Milling, Routing, Reaming, Gun Drilling, Oil Hole Tools, Sawing, Punching and Tapping. Handheld lubricant 09-01732

BOELUBE BL70307L PASTE

Boelube® Pastes provide excellent lubricity and are extremely cost effective in single point work such as Tapping, Drilling and Reaming. A small amount of Paste applied to the tool is all that is required to obtain a high quality finish and extended tool life with little or no clean-up required. Brush it on or dip tool in paste. Boelube pastes are also ideal for Forming and Bending as well as in Drop Hammer, Verson Press and Spin Forming applications. Boelube Pastes provide closer tolerance parts and extended diaphragm and die life. We furnish 70307 medium (blue) paste. 4oz Jar 09-01735.....

COLOR-BOND LEATHER, VINYL & HARD PLASTIC REFINISHER

Color-Bond restores or changes the color of leather, vinyl, ABS plastic, PVC, polycarbonate, acrylic, fiberglass, lexan and thermal plastic urethane permanently. It is dry to the touch in 45 seconds and fully bonded in 10 minutes. It will not crack, flake or peel & gives complete grain simulation. You can change color over and over and never obscure the grain or affect the hand. It is now OEM approved by the Ford Motor Company. After 3-1/2 years of testing, the specification that Color-Bond passed is the first of its kind and is approved for worldwide use. Color-Bond will be distributed to the 5,200 Ford Quality Service Parts dealers of North America. It will also be used for repair of instrument panels, door panels and seats in all of the assemble plants. Color-Bond is excellent for restoration of aircraft seats, side panels, glare shields, and other items. Aircraft Spruce & Specialty Co. has been appointed as the aviation distributor for Color-Bond.

GRACO HVLP SPRAY SYSTEMS

Virtually eliminates mist. Requires less maintenance. Blows less heat up the stack. Uses up to 50% less material. Delivers better pattern control. Reduces overspray up to 90% Eliminates high-pressure "flop" and tiger stripes.

GRACO HVLP AIR SPRAY SYSTEMS GTS-2500 HVLP SPRAYER

This lightweight, portable sprayer features the GTS-960 Bleeder Style Gun and offers outstanding performance in its equipment class. Easily spray stains, lacquers, oils, enamels and urethanes.

- Turbine Stages –2
- Cup – 1 qt (1 liter)
- Weight: Complete – 32 lb
- Turbine Air Working Pressure – 5 psi (.345 bar, 34.5 kPa) max.
- Turbine Air Outlet Flow Rate – 58 cfm (1642 lpm) max.
- Gun – GTS-960 Bleeder Style with Fluid Set #3
- Standard Turbine Air Hose Length—Standard units incl. 20 ft (6 m). Use 40 ft (12 m) max.
- Electrical Rating – 7A at 120 VAC
- Power Cord – No. 16 AWG, 3 wire, 6 ft (1.8 m)
- Shipping 18 in. x 15-1/2 in. x 16 in.
- The GTS-2500 is not designed for use with non-bleeder guns. P/N 12-15710

GTS-3800 HVLP SPRAYER

The GTS-3800 is highly productive for nearly all fine finish applications. Easily spray stains, lacquers, oils, enamels, urethanes and automotive finishes. Plus, it atomizes many water-based latex and acrylic coatings, multi-color and other higher viscosity coatings.

- Turbine Stages – 3
- Turbine Air Working Pressure – 6 psi (.414 bar, 41.4 kPa) max.
- Turbine Air Outlet Flow Rate – 80 cfm (2265 lpm) max.
- Gun – GTS-980 Non-Bleeder Style with Fluid Set #3
- Cup – 1 qt (1 liter)
- High-Flex Turbine Air Hose Length – Standard units incl. 30 ft (9 m). Use 60 ft (18 M) max.
- Power Cord – No. 16 AWG, 3 wire, 6 ft (1.8 m)
- Electrical Rating – 12A at 120 VAC
- Weight: Complete – 34 lb
- Dimensions: 18 in. x 15-1/2 in. x 16 in. P/N 12-15780

GTS-4900 HVLP SPRAYER

Our most powerful and versatile sprayer offers everything you need on the job for high productivity. This unit is loaded with features and can spray the broadest range of materials.

- Turbine Stages – 4
- Weight: Complete – 39 lb
- Turbine Air Working Pressure – 8 psi (.552 bar, 55.2 kPa) max.
- Turbine Air Outlet Flow Rate – 82 cfm (2321 lpm) max.
- Gun – GTS-980 Non-Bleeder Style with Fluid Set #3, #4 and #5
- Cup – 1 qt (1 liter)
- High-Flex Turbine Air Hose w/Quick disconnects – Standard units include 30 ft (9 m). Use 60 ft (18 M) max.
- Power Cord – No. 12 AWG, 3 wire, 15 ft (4.6 m)
- Electrical Rating – 14A at 120 VAC
- Dimensions: 18 in. x 15-1/2 in. x 16 in. P/N 12-15950.....

NEEDLES – GROMMETS – PLATES

MARTIN FABRIC CLIPS

Used to secure fabric to metal ribs in wings and control surfaces. Replaces rib-stitch cord or P-K screws. Provides a more secure and streamlined installation. Drastically reduces covering time. FAA-approved for aircraft listed. Easily adapts to homebuilts with metal ribs. Spacing between clips, 3". Spacing may be reduced to 1-1/2" on high-performance aircraft by using 2 wires, with clips inserted in alternate holes that are spaced 1-1/2" apart. Fabricated from stainless steel wire. Supplied in 25-ft. continuous coils.

25-Ft. Coil..... P/N 09-19400

INSTALLATION KITS

PAINT SAVER LIDS

Saves money, paint and clean-up time. Snaps onto top of can and pulls off quickly. Prevents drips down side of can and paint from getting in grooves of can. Made of rigid, long-lasting, recyclable plastic. Reusable.

P/N 09-01754.....

POUR-IT REUSABLE PAINT LID

The only reusable paint can lid that seals to the inside of all one gallon cans. This keeps the paint out of the lid channel for a perfect re-seal. It keeps all contaminants out of your paint. As it was designed for accurate pouring, it also has a quality screw cap on the pour spout for easier access to trim paints, primers & sealers that are used often, in smaller quantities. Pourit eliminates hazardous paint spill, saves clean-up time and reduces material waste. It is washable and reusable. This product should be used anytime you open a round one gallon can.

P/N 09-01756.....

JR. POUR-IT REUSABLE PAINT LID

Quality screw cap for easy access and is large enough for a 2" brush. It grabs the outside of the quart can so it will seal to the inside rim. Jr. Pourit converts any quart can into a jar for maximum material usage. It is washable and reusable. This product should be used anytime you open a one quart can.

P/N 09-01757.....

STORE-IT PAINT SAVING DISC

The only paint saving disc that floats on top of any left over paint in a one gallon can. Storeit will eliminate the skinning and spoiling of paints in storage for reuse at a later date. It will contain VOC's in open containers. It will also eliminate all of your consumer waste disposal expenses associated with these problems. Storeit should be used anytime a paint is prone to skinning or any paint is put into storage for a long period of time. It is washable and reusable.

P/N 09-01758.....

Storeit is patented in the U.S. with other patents applied for.

SPATCHIT PAINT SPATULA

Designed to remove all of the remaining paint from your one or five gallon container. Used as a spatula, it will eliminate the need for 'ragging clean' the cans before recycling or disposal. It will eliminate your paint waste allowing you to transfer the last bit of paint into a smaller container for later use. This product should be used any time you are emptying a paint can. It is washable and reusable Spatchit has patents pending in the U.S.

P/N 09-01759.....

AERODYNAMIC DENT FILLER

An easy-to-use two-tube system of aluminum filled resin & curing agent. Aluminum dent filler may be used wherever shallow dents occur. Gel time is 10-15 minutes at 70°F. Repair cures to 80% strength in 90 minutes. Used extensively by the airlines and applicable to general aviation repairs.

TEMPO FINISHES

AIRCRAFT SPRAY COATINGS

All Tempo spray products feature the exclusive adjustable Fanspray valve which offers a professional spray pattern so anyone can "paint like a pro". The extra-width pattern evenly coats about 3 times the area with each pass compared with an ordinary spray valve. Packaged in 11 oz. to 16 oz. cans, depending on product.

Discount: 10% on 6 cans, 15% on 12 cans, 25% on 24 cans. (May be assorted.)

ULTRA-HIGH TEMPERATURE PAINTS

Exceptional durability up to 1200°F. Will not burn off, chip or peel when properly applied. No primer required. Ideal for exhaust stacks. Ultra-High Temperature paints air-dry in minutes but require curing at temperatures over 650°F.

- White #13-1
- Black #13-2
- Racing Silver #13-8.....

TEMPO MAINTENANCE & SPECIALTY PRODUCTS

Fluorescent Paint (Red/Orange) — Up to 4 times brighter than other colors. Ideal for aircraft, boat - wherever visibility is vital. For best results, use over light colored base.

#18-1301 **J/ea.**

Chrome Paint — restores new chrome appearance to chromed surfaces.

#20-199 **J/ea.**

Scratch Filler Primer — Ideal for filling nicks, scratches, and minor surface imperfections. They dry fast, are sandable, and provide a smooth uniform surface for top coats.

#7-3500 - Red Oxide..... **J/ea.**

#7-4500 - Platinum Gray **J/ea.**

AIRCRAFT ENAMEL

Excellent adhesion to aluminum and steel

Tempo's Aircraft Enamel has been especially formulated to adhere to aluminum and steel; providing excellent corrosion resistance. Recommended applications are all interior and exterior aluminum and steel surfaces, including wheels, landing gear and inside door hatches. For propeller blades, we recommend Epoxy Propeller Coating.

PREMIUM SELF-ETCHING PRIMER

Etches and primes in one easy step. Can be used under all today's automotive finishes. Perfect for spot repairs. Creates superior adhesion on most plastics, fiberglass, bare steel, aluminum and stainless steel. Color: Green. 12oz. Spray Can

P/N 09-02099.....

CAN-GUN

Can-Gun is an aerosol spray can trigger handle which makes painting, cleaning, and lubricating jobs safer and easier. The user-friendly form-fit handle and trigger eliminates finger fatigue and provides the user with accurate control over the amount, speed, and direction of spray. The built-in safety shield insures no more messy hands or fingers. Sprays virtually all spray paints,

lacquers, polishes, cleaners, lubricants, sealers, and adhesives and Can-Gun fits most spray cans. P/N 09-14760..... **ea.**

AIRCRAFT LACQUER

Dries in under 15 minutes

Tempo's Aircraft Lacquer is ideal when a very fast dry is required. This blended nitrocellulose lacquer formula can be applied to all interior and exterior aluminum and steel surfaces, including wheels, landing gear and inside door hatches. When additional corrosion protection is required, we recommend Tempo Aircraft Enamel.

EPOXY PROPELLER COATING

Extends blade life. Tempo's Epoxy Propeller Coating is formulated with the extra adhesion and abrasion resistance needed to protect propellers from corrosion and wear. Compared to standard enamel and lacquer paints, our epoxy formula stays on the blade more flying hours; hence, with regular use, this formula can extend blade life.

White P/N 09-00992.....

ZINC PHOSPHATE AND ZINC OXIDE PRIMERS

Maximum adhesion to bare aluminum and steel

Tempo's Zinc Phosphate and Zinc Oxide Primers are recommended for priming bare metal. These primers provide maximum bonding to bare aluminum and steel. Tempo's Primers have been the workhorse in the aviation industry for many years. Zinc Oxide has been recently introduced to provide a "safer, healthier" alternative to Zinc Chromate with equal performance.

The A-701 Yellow and A-702 Green Zinc Phosphate Primers meet the performance standards outlined in Federal Specification T-P-1757A. They also exceed the 800 hours of salt spray fog test (ASTM #B117). A-701 will replace A-901 Yellow and A-702 will replace A-902 Green.

METAL CLEANERS — PRIMERS

PREKOTE SURFACE PRETREATMENT

PreKote® Surface Pretreatment from Pantheon Chemical, is a non-chromated surface pretreatment utilizing a safe, hazard-free technology that is flying on over 1,500 United States Air Force aircraft. PreKote® offers superior adhesion, improved paint flexibility, and advanced corrosion

protection on painted surfaces, relative to traditional chromate and conversion pretreatments (such as alodine). PreKote® has passed stringent testing by the U.S. Department of Defense, the Boeing Company and other coating industry leaders. By eliminating the need for chromated conversion coatings (such as alodine), acid etches, solvent washes and other toxic processes, PreKote® can reduce paint preparation time and costs by up to 40%. PreKote® can be used on a wide range of surfaces including aluminum, steel, magnesium, titanium, CRES, galvanized surfaces, composite and plastic surfaces. Consistent, high performance results are achieved with a variety of paints and primers. PreKote® is non-toxic, non-corrosive, non-flammable, CFC free, ODS free, odor free, and readily biodegradable upon disposal. FEATURES: • Easy & safe process • Quantified superior results • Immediate cost reductions • Reduces hazardous waste • Decreases material, labor, and hazardous handling costs • Results in a high-performing surface finishes • No short and long term health risks.

ALUMINUM PREPAINT PRODUCTS ALUMIPREP USED FIRST MAKES THE PAINT FINISH LAST!

Use on unpainted aluminum aircraft, truck trailers, house trailers, boats, garage doors, outdoor furniture, etc.

ALUMIPREP NO. 33 – Use to clean, brighten and transform badly corroded aluminum to its natural appearance. Covers 400 sq.ft. per quart.

Qt. P/N 09-01621
Gal. P/N 09-01620

ALODINE NO. 1001 – An invisible coat to provide in-depth corrosion proofing to the brightened aluminum surface and act as a firm barrier against the elements and continued corrosion. Covers 250 sq.ft. per quart.

Qt. P/N 09-01628
Gal. P/N 09-01629

METAL PREP NO. 79 – A brush-on, wipe-off aluminum cleaner and paint preparer in one powerful, easy-to-apply formulation. It etches the metal, neutralizes hand marks, is smutless on alloy surfaces, removes oil and grease and will not burn. It provides a firm and lasting adhesion between aluminum alloys and paint. Dilute with 2 or 3 parts of water. Improved in early 1985, Metal Prep No. 79 is now even more active on the metal surface and offers superior performance. Covers 400 sq.ft. per qt.

Qt. P/N 09-01625
Gal. P/N 09-01624.....

ALODINE NO. 1201 – After precleaning with Alumiprep 33 or Metal Prep 79, rinse with water. Apply Alodine without dilution by brushing or swabbing with sponge. Rinse with water and surface is ready for paint. This is a visible coating which leaves the surface with a golden coloration. The alodized surface provides protection against weather and firmly bonds paint. One quart treats about 200 sq. ft.

Qt. P/N 09-01619
Gal. P/N 09-01618.....

AQUAPREP AVIATION METAL CLEANER

Aquaprep is a safe, superior cleaner for use on any metal or hard surface and is designed to replace solvent cleaners. It may be used on painted, primed, or bare metal surfaces. It is non-staining, provides improved cleaning and improved corrosion resistance, and is compatible with MetalPrep and Alodine. Designed to remove sealers, wax, grease, silicone, and crayons. Try some new Aquaprep on your next metal cleaning project. Covers 400 sq.ft. per quart.

1 Gal. P/N 09-42100.....

ALODINE TOUCH-N-PREP 1132

Touch-N-Prep Alodine 1132 no-rinse conversion coating effectively phosphates most metals including aluminum, ferrous and galvanized substrates. Doesn't require rinsing, and can be air dried or force dried with hot air or an infra-red lamp. High density acrylic tip of the Touch-N-Prep applicator can be modified with a single edge razor blade to form any shape. The application method controls the amount of coating applied to the surface. Covers 20 sq.ft. P/N 09-01630.....

AKZO FAST DRYING INTERIOR EPOXY PRIMER

AKZO interior epoxy primer #463.12-8 is a chemically cured 2-component epoxy primer designed to provide maximum protection from various chemicals, hydraulic fluids, aviation fuels, hydraulic fluids, and corrosive causing media. Drying time to touch is 15 minutes and to recoat is 1-24 hrs. Shelf life: 2yrs, Color:

Green. Used extensively in military and aerospace applications and popular with aircraft builders. Uses 1 gallon of primer and 1 gallon of catalyst.

PRIMERS – SOLVENTS - PAINT REMOVERS

STEWART SYSTEMS EVERSHIELD CERAMIC SURFACE TREATMENT

An Easy-To-Apply Glass-Like Finish With Many Incredible Protective Properties For Almost Any Aircraft Surface. In tests it resists blow-torch heat (yes, blow-torch flame) above 2000°F. It is impervious to virtually any chemical. It is excellent for hardness, flexibility, impact and scratch resistance, adhesion, and corrosion protection.

On any aircraft, EverShield has applications from nose cone to tail cone. Wiped on a prop, this incredible film sheds bugs, pebbles, salt spray, whatever. On an exhaust, it seals the metal from corrosion and by refraction reduces heat transmissions to cowling and elsewhere. On leading edges bugs slide off. Over the entire plane, the slick surface fortifies the boundary layer, reduces drag.

It is non-hazardous (like all SS products). Cleans up with water (or solvents). Grips most any surface, from stainless steel, to plexiglass, to paint. EverShield is a true breakthrough miracle coating. There's nothing comparable available. Once you use it you'll continue to find a myriad of applications. Better give it a try soon.

STEWART SYSTEMS EVERSHIELD is a two-component, ceramic clearcoat/chemical treatment system designed for Original Equipment Manufacturers (OEM) to protect the substrate over which it is applied from corrosion and oxidation. Will not yellow, chip, crack, or peel. If gouged or damaged, the finish will not experience creepage and is repairable. A low VOC and EPA compliant coating. Considered non-hazardous by EPA definitions and does not contain lead or chromates. Please follow local and state regulations in the proper use and disposal of this product.

STEWART SYSTEMS WATERBASE STEEL CONVERSION COATING

A water-based product that eliminates rust by accomplishing two functions at the same time. First, rust is converted to ferric iron, a black organic compound. Second, a coating of clear acrylic is formed over the coated area. The surface that remains after the transformation can be either left black or coated with Stewart Systems wide range of products for the desired outcome. Product tests have shown that SS Conversion Coat has extended the life of equipment or products for several more years after probable replacement. SS Conversion Coat can be used on all rusted surfaces.

NUVITE POLISH - PROTECTANT SYSTEMS

NUGLAZE SUPER PAINT GLOSSER

Nuvite introduces NuGlaze to create a super high gloss "show quality" finish for paint in new or excellent condition, and it adds a U/V and sealant protection. It will put that final "wet-look" finish on good paint, and can be used as a final step for maximum gloss after using a drywash cleaner/polish such as Nuvite NuPower II. With regular NuGlaze use, a continuing surface barrier against most

of the effects of airborne chemicals and ultraviolet radiation is created. Paint can be maintained in "new" condition longer and maintain the color balance intended by the manufacturer with regular use.

Bugs and normal soil remove easily from a NuGlaze surface, and the added gloss keeps the "new paint" look longer. NuGlaze is simple to use and avoids complicated setups and special application or buffing equipment. Proven techniques and continuing technology advancement from Nuvite have come together to produce NuGlaze - the best thing you can do to maintain and protect your near-new or "new-looking" paint.

NUVITE CITRI-CUT CLEANER

NuVite CitriCut is a citrus based airframe wetwash and wipe-down cleaner. Pleasant citrus smelling wet wash or wipe down cleaner that is especially friendly to the environment. Works great for standard wet washing with mops or scrub pads. When used as a wet wash, water sheets off, minimizing water spotting. CitriCut is also handy for hand debugging

or hand wipe down without need for rinse -so there is no need for water or floor cleanup. Spray CitriCut at 1:8 from hand trigger sprayer for hand debugging or wipedown and wipe with terry towel until clean. Use a clean towel to buff up surface shine. No need to rinse surface. Supplied as concentrate—use 1:8 for hand wipe down or 1:16 in wet wash water.

NUSHINE II POLISH/ SYSTEM

Nuvite engineers have formulated a system of polishes to meet the needs for almost any metal and paint polishing project. New metal to antique, the formulations in the NuShine II Polishing System will give superior definition, highlights, imagery, clarity, and will retain the finish longer than normal polishes. Nuvite's

NuShine II graded polishes use high technology materials with programmed abrasive characteristics and are blended with superior carriers to offer the ability to produce cutting action when needed, yet offer micron-level finishing in the finer grades that produces highest reflectance and image excellence.

Grade S (for final finishes) - The finishing grade that gives the really deep, clear image when used as a final finish over a properly prepared, oxidation-free surface. 0.5 Lb. jar P/N 09-00578

Grade G6 (SS & titanium or heavily oxidized aluminum) - When a heavy cut of the surface is needed, G6 may be a good answer. G6 has a high-tech abrasive system that is designed to do a quick, aggressive cut, and immediately break down to a finer cut, similar to Grade C. Use when there is heavy oxidation on the surface of aluminum, or even when very light corrosion is evident. Can also be used to blend surface scratches in aluminum. Can also be used for polishing stainless steel. 0.5 Lb. jar P/N 09-00586

Grade C (for unpolished aluminum and repolishing degraded brightwork) - C is a cutting grade polish that we recommend to prep for using Grade S. Use Grade C to begin polishing on clad aluminum that has never been polished. Will also remove the cloudy/hazy white background found in many otherwise good polish finishes. 0.5 Lb. jar P/N 09-00587

NUSHINE II POLISH SYSTEMS

Polishes for both metal and paint finishing that will provide the finest surface finish available. Has been shown to outperform all other aviation, automotive and marine polishes in side-by-side testing by users throughout the world. Affords the operator the choice to select the grade of polish to match the needs of the surface to be polished, be it brand new, oxidized in use, or with atmospheric corrosion. NuShine II not only polishes paints and metals to an incredibly deep, clear and image-reflecting surface, but also imparts a protective chemical barrier to inhibit corrosive oxidation to the metal.

Grade F9 1/2 lb. P/N 09-02086
Grade F7 1/2 lb. P/N 09-02087

POLISHES – CLEANERS

AERO GLOSS

Aero Gloss polish is used by 80% of the world's major airlines. It is now available to the general aviation and experimental aircraft market. Removes turbine soot and exhaust stains from paints. It is an excellent plexiglass polish and can be applied with a power buffer. It takes 1-2 pints and 3-4 hours to polish an average Cessna 182 with Aero Gloss.

Pint P/N 09-38100
 Gallon P/N 09-38101
 5 Gallon P/N 09-02180

STAR BRITE AIRCRAFT POLISH

This exceptional new polish cleans off dirt, stains and oxidation and restores the original bright color of the aircraft leaving a dazzling shine. StarBrite also cuts fuel consumption and boosts speed by reducing drag an amazing 5.5%. Contains no wax, oils or acids. 16 fl.oz. P/N 09-23900

TOP GUN ULTRA FINISH

Top Gun Ultra Finish is the ideal one-step product for all aircraft finishes. The product removes surface contaminants and oxidation through a unique chemical process, rather than using harsh abrasives. The coating left behind is not a wax, but an extremely hard and durable sealant. This affords superior long term protection (up to 12 months or longer), and easier cleaning of your finish. Once applied, bugs and corrosive elements remove more easily. Use Top Gun Ultra Finish to add brilliance to your aluminum and magnesium alloys. It is also very effective in restoring clarity to plexiglass windshields, side windows, and lenses. 16 fl. oz. Made in the U.S.A. 16 oz. P/N 09-00192

RACERS EDGE POLISH

Specifically formulated to provide drag reduction, use of this revolutionary formula results in increased air speed, protection, and the richest, deepest shine. Flight tested by the U.S. Air Force and engineering certified for all Boeing, Douglas and Airbus aircrafts. Blend of highly protective properties provide maximum protection for all elements of nature & engine exhaust. Apply by hand or machine. P/N 09-00157

SEAL-A-PLANE

Seal-A-Plane provide an unbelievable shine that seals and protects the finish; we have also found that the exhaust and bugs don't like to stick to the surface and can be removed with just a damp cloth. Unlike products that were designed for the automobile industry, Seal-A-Plane is for aircraft and protects the aircraft surfaces from harmful UV rays and corrosion. Common waxes breakdown in the sun. Seal-A-Plane actually gets harder in the sun and is stable up to 500 degrees F. Seal-A-Plane contains no silicones and is non corrosive. It normally only requires application once a year (depending on the planes operating environment) and can be used on any surface including fiberglass and Plexiglas. Never before has there been a product on the market like Seal-A-Plane. Turbine owners especially will appreciate a product that is available that will remove the ugly exhaust stains. One 16 ounce bottle will be enough for most single engine planes and two will do most light twins. P/N 09-01650

MASTER FORMULA - SEALER GLOSS

Master Formula Sealer Gloss Protective Sealer waterproofs, protects and seals any hard surface. It leaves a durable, glossy protective coating that's easily maintained and lasts up to one full year. Master Formula Sealer Gloss is excellent for use on any metal or painted surface. These surfaces include all car finishes including clear coats, gel coats, plastics fiber glass. They also include all metal surfaces such as aluminum, chrome, brass, stainless steel, gold, silver and more. 16oz.

12OZ P/N 09-02077
 16OZ P/N 09-01609

MET-ALL

An aluminum polish which removes and prevents pitting. Makes aluminum shine with mirror-like brilliance. Non-toxic, non-abrasive and non-flammable. A non-silicone product which resists further corrosion. Meets military specifications. 1 Lb. Can P/N 09-24200
 2 Lb. Can P/N 09-24300

BUG BLASTER SPRAY

Dissolves and removes bugs without scrubbing - no elbow grease is required! This is a quick, time saving product. Just spray, wait and wipe. Finally a product that solves messy problems without being messy!! Unlike other formulations, when sprayed, Bug Blaster instantly attacks bug proteins and acids. You will not have the dripping, messy run-off you have with conventional bug removers. Perfect for use in paint shop environments where run-offs need to be avoided.

32 OZ P/N 09-02080
 1 GALLON P/N 09-02081

MET-ALL DETAIL POLISHING KIT

Met-All's Detail Polishing Kit will produce a show room finish on bare metal, painted surfaces and fiberglass using Met-All polishes and premium bonnets. Each bonnet features a recessed loop back so the edge and face can be effectively used with less concern for marring the finish. Change pads quickly and easily. Ideal for polishing aircraft, cars, motorcycles, boats etc.

P/N 09-00448

BLUE MAGIC METAL POLISH

Blue Magic produces a deep mirror shine. The oxide residue left after polishing is easily wiped off with a rag. A small amount will polish a large area. Airshow aerobatic pilot Chuck Lischer, Jr., whose high performance Swift is shown here, recommends Blue Magic as the best polish available for polished aluminum aircraft.

#500 1 lb. Can P/N 09-24600

210® PLASTIC CLEANER/POLISH

•Anti-static, Anti-fog • Will remove marks from crayons, magic markers and paint oversprays • Removes residue glue from protective backings and masking tape • Evaporating properties in the formula - cleaning is quick and easy without leaving any streaks or swirl marks • Resists fingerprints • Seals pores in plastic and leaves a protective coating • Pleasant clean aroma • Gives plastic a clear, lustrous look.

7 oz. P/N 09-00518
 14 oz. P/N 09-00517

210® PLUS PLASTIC SCRATCH REMOVER

•Extremely mild abrasive compound, with anti-static and anti-fog properties in its formula • Ideal for the removal of surface scratches and blemishes from windshields or heavy cleaning of all plastic materials • Water soluble, excess can be wiped off with a wet sponge or cloth • Easy to use.

15 oz. P/N 09-00519

MAAS ALUMINUM & FIBERGLASS POLISH

Maas polish removes fine scratches, prevents clouding on plexiglass windshields and windows, reduces air resistance, and repels moisture. It is used by major air carriers and has provided them with a 10% savings on fuel due to Maas' ability to substantially reduce parasitic drag and friction on the leading edges of the aircraft.

Excellent for use on anodized or bare aluminum, painted surfaces, plastics, plexiglass, and fiberglass. 1 lb. can P/N 09-23545

ROLITE PREMIUM VINYL & LEATHER PROTECTANT

"The Sun Protector". Protect your aircraft interior by using Rolites' maximum sun block formula. Contains no solvents, silicone oils, or petroleum distillates. Its anti-static formula will produce a shine on your vinyl or leather seats without being slippery or tacky. And will actually repel dust! Comes in spray pump bottle.

ACTION CHIPKIT FIXES PAINT CHIPS AND SCRATCHES

The Action Chipkit stops rust around paint chips and scratches and produces repairs which are flush with the rest of the paint. The kit includes the Eliminator rust remover which is used to prepare the surface, and then the kit's clear paint sealer is applied. The kit's microfine sanding papers and sanding block are used to create a smooth and flush finish. Extrafine polishing compound completes the job by removing irregularities and restoring gloss. Everything you need for small paint chip repairs is included in the easy-to-use Action ChipKit.

P/N 09-27225

ICE AWAY PROP ICE GRIP INHIBITOR

Sooner or later, most pilots get into icing conditions and an ice-free propeller may be the ticket to safety. Years of testing have shown Ice-Away to stay on for several hours in icing conditions. Ice-Away facilitates propeller ice shedding and enhances safety. Simply spray Ice-Away on the propeller leading edges and reapply as necessary.

REJEX SOIL BARRIER & STAIN PROTECTOR

RejeX™ is an advanced polymer system that seals painted surfaces to guard against corrosive exhaust gas, oil, and bug stains. It forms a slick, long-lasting, glass-like barrier that allows easy removal of turbine and piston-engine exhaust stains with mild detergents. Bugs can be removed quickly and easily with just a stream of plain water. On paint in good condition, RejeX eliminates the need for waxes and polishes, and one application will last a minimum of 4 months. Surfaces to be protected should be clean, dry, and cool to the touch and the product should not be applied in direct sunlight. Damaging contaminants, such as bug acids and exhaust stains will no longer be a problem.

PLEXUS AIRCRAFT PLASTIC CLEANER, PROTECTANT & POLISH

Plexus™ was developed for use in aviation, specifically for cleaning and protecting aircraft windshields and painted surfaces. It's quite simply the most effective product you can buy for cleaning, polishing and protecting all clear and colored plastics and painted surfaces. Plexus is easier to use, and leaves a noticeably cleaner, more lustrous finish than conventional polishes. It protects by actually sealing the pores in plastic making it more resistant to debris, oil, bugs or scratches. Because it's anti-static, it repels dust and lint. It's perfect for windshields and the leading edges of the wings, as well as for removing exhaust stains and cleaning wheel wells. Also, Plexus polishes without harmful abrasives. It leaves an invisible, micro-thin layer of wax without smears or smudges. It dries to a crystal clear luster, leaving no oily, sticky or tacky residue. It's the ultimate detailer for your aircraft. So, if you're looking for a better way to save time, money and help protect your valuable investment, it's clearly brilliant. Plexus. Clearly the best. Plexus contains no CFC's, so it's safe for the environment. And because it's an aerosol, there is virtually no waste.

POLISHES & CLEANERS

ALL KLEER

Black Labs Corporation is proud to introduce, All Klear, the ultimate plastic windshield cleaner and polish. All Klear was invented by a pilot over 25 years ago for cleaning and maintaining plastic aircraft windshields that require absolute clarity.

All Klear is different than most windshield products on the market as it not only cleans dirt, bugs and grease but leaves a very fine, slick finish. This finish helps to repel water, dust, bugs, and water spotting - making it easier to see and to clean the next time. All Klear contains no wax, ammonia, or abrasives and does not require the use of any water. A non-pressurized leak proof 8oz bottle is designed to be carried on board if desired.

Simply apply All Klear with a clean towel to a dry windshield cleaning off any bugs and dirt and allow 30-60 seconds for a haze to form. After it has completely dried, wipe off with a clean towel and feel the All Klear finish.
P/N 09-01602

PRIST® ACRYLIC, PLASTIC AND GLASS CLEANER: FOR ALL TYPE OF WINDOWS

The convenient 13-ounce can is ideal for use on acrylic, stretched acrylic, poly carbonate, glass, and coated glass. It may also be used for cleaning many other sources including aircraft interiors, goggles, helmets, lenses, and plastic and metal surfaces. Prist® cleaner contains no abrasive cleaning agents and cleans without scratching glass or plastic surfaces. This prevents scratches in acrylic windshields that necessitate costly replacement. Unlike other cleaners, Prist® cleaner dispenses as foam and leaves no residue. The cleaning agent soaks into the dirt, grease and insects to remove them with minimum effort. Suitable for interior and exterior cleaning, Prist® cleaner prevents static charge build-up with regular use.

MICRO-MESH WINDSHIELD SCRATCH REMOVAL KIT

Micro-Mesh is a cloth backed cushioned abrasive with a resilient layer of material between the back and the abrasive. When pressure is applied, the abrasive crystals recede into the resilient layer and find an even plane for cutting. The result is a smooth shaving action with an ultra fine scratch pattern which restores scratched, discolored, or damaged fiberglass or acrylics to like-new condition. Kit includes everything needed to repair approximately 30 sq. ft. Standard Kit (restores up to 30 sq. ft.)..... P/N 09-24700..... Large Kit (restores up to 60 sq. ft.)..... P/N 09-24701..... Professional Kit (restores up to 100 sq. ft.)..... P/N 09-24716.....

MICRO-GLOSS POLISH

Safe for use on bare acrylic, bare polycarbonate, and coated polycarbonate. Tests using Micro-Gloss were completed according to ASTM F791 standards and to USAF specification 16ZK002F (Addendum 2) at stress levels of 2000 and 3000 PSI in both dry and humid conditions. Approved for use on the inside and outside surfaces of F-16 aircraft. * Removes fine scratches. * Removes swirls created by improper cleaning methods. * Removes haze and milkiness from interior/exterior windows. * Provides a final polish, leaving you with an ultra-clear finish. * Can be applied by hand or machine * Approved for use by Boeing, Spec D6-52021 * Approved for military use, NSN #5350-01-334-89978 oz..... P/N 09-24710.....

MICRO-SURFACE WINDSHIELD RESTORATION KITS

Micro-Surface Finishing Products, Inc. FAA Repair station #KY2R969K, has been a leader in acrylic restoral for the past 30 years. The following kits were developed for use with standard power tools. Micro-Mesh is approved by Boeing/McDonnell Douglas, the Military and FAA. All kits come with easy to read instructions. Designed to save you both money and time, these kits will restore acrylic back to optical clarity using a minimum of steps. Re-order individual components as you need them. All kits restore up to 100 sq. ft.

MICRO-MESH FINISHING KIT FOR WOOD

This kit is designed for craftsmen for use in hand finishing applications and without the mess of steel wool, rottenstone or pumice. MicroMesh may be used on bare or finished wood with wet or dry application method. A high reflective finish, satin or matte finish can be achieved, depending on how many MicroMesh steps are completed. This makes it an excellent product for spot matching of finishes. P/N 09-24705.....

PLEXIGLASS LENS REPAIR KIT

Protect your investment by restoring crazed, scratched, hazy lenses. Perfect for recognition light lenses, navigation light lenses, and landing light lenses. Lenses can be restored on the plane without removal. Soft Touch pads in this kit fit nicely in your hand and allow you to polish both concave and convex surfaces with ease. Dry pads, store and reuse again and again. P/N 09-01603.....

PERRONE LEATHER PRODUCTS

DEEP CLEANER FOR LEATHER

Perrone's Leather Cleaner / Conditioner is a premium blend of gentle cleansers and light conditioners formulated to clean and rejuvenate finished leather, vinyl and plastic surfaces. Perrone's Leather Cleaner/ Conditioner removes dirt, dust and oils without drying or damaging the surface.

Perrone's Leather Cleaner/ Conditioner helps protect leather from weathering and fading. Leaves leather surfaces soft, supple and smelling like new again. The wipes are treated with the same leather cleaner/ conditioner as in the spray bottle.

Perrone Leather Cleaning/ Conditioning products create an invisible barrier between leather seat covers and soils. This quick, convenient and cost effective method of reducing ink stains, dirt, grease, grime and body oils from penetrating leather surfaces will add to the longevity and appearance of your aviation leather interior without any adverse effects on flammability.

DRIVEN AUTOMOTIVE POLISH

Driven Automotive Polish is the most highly advanced formulation of premium grade polymer polish on the planet. It has a super high gloss wet look with incredible depth and clarity, the sheeting action reduces water spots that wipe clean. Nothing sticks. Harmful elements can't "bite in". Easy to apply in sun or shade. Can be applied to an entire vehicle before wiping off. Will not harden or cake. Long lasting. Holds up under intense heat from sun and severe winter cold for up to 1 full year. Cleans surface contaminants and oxidation with no abrasives. Fills light swirl marks and leaves no residue. Repels water from windows in the rain without the use of wiper blades. Cleans brake dust from rims. Once applied, non-stick finish reduces brake dust build-up. Paint life is dramatically extended by feeding with essential polymers & oils. Excellent for use on aircraft.

P/N 09-00776

DRIVEN MARINE POLISH

Driven Marine Polish is the most highly advanced formulation of premium grade polymer polish on the planet. Sheeting action reduces water spots that wipe clean. Nothing sticks. Harmful elements can't "bite in". Easy to apply in sun or shade. Super high gloss wet look with incredible depth & clarity. Long lasting. Holds up under intense heat from sun and severe winter cold for up to one full year. Maximum U.V. inhibitors prevent sun damage. Excellent for use on aircraft.

P/N 09-00777

DRIVEN QUICK SPRAY CONCENTRATE

Driven Quick Spray Concentrate is a highly concentrated, biodegradable solution, not only cleans water spots, it brightens and enhances the finish while strengthening Driven's legendary non-stick protection with each application. Just add water and make 4 qts of fluid for every pint of concentrate. Once activated by water, it works by combining biodegradable cleaners, the power of citrus, and a full spectrum of essential polymers and oils. Driven's high lubricity formula actually encapsulates water spots, dust particles, fingerprints and other fresh surface contaminants, allowing them to be wiped away without streaking. Driven Quick Spray Concentrate will not strip polish or wax. And it won't stain rubber or vinyl. This formula deepens and enriches all hard surfaces, adding brilliance and protection to your finish. Excellent for use on aircraft.

P/N 09-00779

DRIVEN WASH CONCENTRATE

Driven Premium Polymer Wash safely cleans all automotive and marine finishes without stripping polish or wax. Activated by water, this unique combination of cleaning agents foams away surface contaminants while brightening and nourishing the finish with a full spectrum of protective polymers. Biodegradable. pH balanced. Safe for clear coat and fiberglass gel coat. Super concentrate provides more washes per bottle. Sheeting action is highly effective in the reduction of hard water spots. Rich foamy lather. Will not streak. Brightens and extends polish protection and shine. Excellent for use on aircraft.

P/N 09-00780

DRIVEN PROTECTOR

Driven Vinyl/Rubber/Leather Protector is a Premium Polymerbased cream that conditions, preserves and protects new and old vinyl, rubber and leather leaving them naturally soft and supple without being slippery or greasy. This conditioning formula feeds and nourishes new vinyl, rubber and leather with a full spectrum of rich gels, protective polymers and U.V. sunscreens. It also rejuvenates old and neglected surfaces that have dried and faded due to weather, exposure and the sun's damaging rays. Excellent for use on aircraft.

P/N 09-00781

DRIVEN FINISH RESTORER

Driven Finish Restorer promises & delivers unparalleled performance. This dramatically different premium grade glazing compound was designed using only the very highest quality of ultra fine micro abrasives to achieve world class results. These precision abrasives with numerous exterior facets and extremely sharp edges are the critical element for safe removal of oxidation, heavy water spots, surface contaminants, stains and light surface scratches. Driven Finish Restorer simultaneously feeds the finish with a full spectrum of essential polymers and oils resulting in a phenomenal shine. Safe for all automotive and marine finishes including paint, clear coat, fiberglass gel coat and all types of metal. This unique combination of safe cleaning and nourishing is sure to bring out the very best in your finish. Excellent for use on aircraft.

THE PROPER AIRCRAFT CLEANING PRODUCTS

TRI-GUARD™

The Best boot treatment available!

One of the most frequently asked questions we receive from aircraft owners is "What is the best way to take care of my de-ice boots and not spend a lot of time?" After researching, testing, and re-testing; The Proper Aircraft® has found a solution. Tri-Guard™ De-Ice Boot Protectant, the newest edition to The Proper Aircraft's® line of quality aircraft cleaning products. Tri-Guard™ is a rejuvenating conditioner with a high gloss shine, as well as a component to help with the ice-shed process. It is specially formulated to achieve superior care of your de-ice boots in less time (and money) over traditional multi-step products.

Description

LIQUID CARNAUBA WAX

Liquid Carnauba Wax – the ultimate in shine, durability and protection. Liquid Carnauba Wax will safely protect your finish from the effects of insect stains, acid rain, engine exhaust and other finish eaters. Our unique formula Liquid Carnauba Wax contains the highest-grade #1 yellow carnauba wax – the best in the world! The special ingredients are designed to protect and preserve all aircraft finishes, including clearcoats. Its easy-on, easy-off application is a plus. For use on newer finishes.

P/N 09-02020.....

REJUVINATING LIQUID CARNAUBA WAX

Rejuvenating Liquid Carnauba Wax restores oxidized finishes to their original beauty. Our rejuvenating wax contains the same rich ingredients as Liquid Carnauba Wax with the addition of a mild rejuvenating polish. In one easy step, Liquid Carnauba Rejuvenating Wax safely strips away oxidation from old painted surfaces. The result: a polished gleam that lasts. Carnauba doesn't leave a buildup of wax because you apply it with one thin coat. It goes on and wipes off with ease. For use on finishes that have oxidation

P/N 09-02021.....

LEATHER CONDITIONER & PROTECTOR

There's nothing quite like the look and feel of new leather. And there's nothing quite like the Proper Aircraft Leather Conditioner for keeping it that way. The Proper Aircraft Leather Conditioner keeps your interior soft and vibrant without leaving a greasy residue, prevents soiling and inhibits moisture loss. The Proper Aircraft Leather Conditioner contains natural penetrating oils that nourish the hide's deep fibers and restore moisture, improving the leather's resiliency. It's highly concentrated, so a little goes a long way! Before conditioning, we recommend that you first clean leather using The Proper Aircraft Leather Cleaner.

EARTH SOAP CONCENTRATED CLEANER/DEGREASER FROM SPRAY NINE

Premium Environmentally Preferable Cleaner

Cutting-edge biodegradable technology combines powerful surfactants with low emulsifying action to create Earth Soap, a potent, yet environmentally thoughtful product. Earth Soap's innovative formula dissolves dirt, grease, grime and other hard-to-remove soils from most hard, washable surfaces. This versatile, concentrated cleaner may be "custom-formulated" by diluting in any proportion with water - from 1:1 for heavy soil loads to 50:1 for routine light-duty cleaning. Additionally, Earth Soap contains NO solvents, butyl, phosphates, or other harsh chemicals. Earth Soap is low-emulsifying and will not negatively impact oil/water separators and other pollution abatement systems. **Corrosion Inhibiting** - Corrosion-inhibiting formula cleans metal parts without damaging parts or parts washers (metal and plastic, traditional and heated up to 180 degrees F) Ideal uses: Dip Tanks • Engines • Concrete/Hangar Floors • Vehicles (Inside & Out) • Wash Racks • Tools & Equipment • CTK Took Kits • Plastic & Vinyl • Floors & Walls • Parts Washer (both traditional and heated up to 180°F)

COMPOSICLEAN LEATHER CLEANER & CONDITIONER

A rich conditioning cream that cleans leather as it brings back softness. Leaves leather looking natural with no greasy residue. 1 quart with flip top. 32oz.
P/N 13-05258.....

COMPOSICLEAN MICRO-FIBER CLOTH

MicroFiber is a man-made product that consists of two fibers, Polyester and Polyamide. The Polyester is the scrubbing and cleaning fiber, while the Polyamide is the absorbing and quick drying fiber. Each square inch in a MicroFiber towel contains approximately 90,000 MicroFibers. MicroFiber is a lint free, non-abrasive, and hypoallergenic products.

Unlike ordinary cotton towels that move, or push, the dirt and dust from one point to another, MicroFiber actually gets underneath the dirt and lifts it from the surface. It then stores the dirt particles in the towel until it is washed. MicroFiber is very absorbent and can hold up to seven times its weight in moisture providing "streak-free" cleaning. MicroFiber cloths are safe on all surfaces.

Keep MicroFiber cloths clean and separate from cotton towels. To ensure the effectiveness of your MicroFiber Towels only wash with other MicroFiber Towels. If MicroFiber is washed with cotton it will grab onto the cotton fibers and hold on to them. Washing by hand with mild hand soap is the best way to maintain this high quality cloth. MicroFiber cloths along with Composiclean™ Super Spray-Wax™ will provide a great streak free deep shine even in direct sun. When buffing off Super Spray-Wax™, it is best to NOT let cloth get to saturated, dryer is better. Try a MicroFiber cloth with Composiclean™ View Polish™ for streak-free window cleaning.

CLEANERS - DEGREASERS - ADHESIVES

VpCI™-415 HEAVY DUTY ANTI-CORROSIVE CLEANER & DEGREASER

Cortec® Corporation's VpCI™-415 Conforms to Stringent Boeing Specifications! Cortec® Corporation proudly announces the recent conformance of VpCI™-415 to Boeing's commercial specifications (D6-17487 Revision P). VpCI™-415 is a highly concentrated, non-toxic, heavy-duty, biodegradable cleaner/degreaser, which provides up to six months protection against corrosion. It is a waterbased alkaline cleaner and degreaser offering unique flash corrosion protection. It can provide corrosion protection for up to 6 months during indoor storage, and is formulated to meet the requirements for cleaning and corrosion protection of aircraft. The compounds contained in VpCI™-415 function by altering hydrocarbons so that the deposits can be removed with water. It can be metered into power washers, steam cleaners, dip tanks and other cleaning equipment. Along with good detergent properties, it is hard water stable. VpCI™-415 offers improved cleaning plus multimetal corrosion protection action in one step, resulting in significant savings. VpCI™-415 has the unique ability to remove such deposits as heavy hydrocarbons, grease, drawing, buffing machinery compounds. This concentrated alkaline cleaner degreaser is not only an excellent cleaner, but also leaves behind VpCI™ (Vapor Phase Corrosion Inhibitors) designed to protect aluminum from corrosion. This product is currently used by the Coast Guard for cleaning aircraft stationed in salt spray environments. Use at 10-25% in wash water solution.

Tested:

- MIL-PRF-87937D
- ASTM D 2240
- ASTM F 483-90
- ASTM F 484-93
- ASTM F 485-98
- ASTM F 502-93 F
- ASTM F 519-93 Type 1C
- ASTM F 1104-87
- ASTM F 1110-90
- ASTM F 1111-88

Features: •Biodegradable, • Heavy-duty chemical cleaner and degreaser with, • unique cleaning action for removing hydrocarbon deposits, • Provides temporary multimetal corrosion protection, • Provides exceptional resistance to pitting corrosion, • Non-toxic, non-corrosive and does not contain nonylphenoethoxylates, • Provides excellent cleaning action at low temperatures, • Mild foaming, • Exhibits hard water tolerance, • Formulation remains stable during freeze-thaw cycle

STRIKE HOLD II CLEANER/PENETRANT/LUBRICANT

Strike Hold is a potent anti-corrosive and has a dielectric strength of 38,000+ volts so it can also be used on electrical contacts and connections. Its capillary action will quickly encapsulate metals by flowing against gravity and under overlapping sheets of metal. It is a highly penetrating and mobile liquid with CFC's and is non-flammable by flame projection test as opposed to other fluids containing butane or propane propellants. It completely seals out water with a shield film. The carrier agent evaporates (unlike ACF 50) and does not leave a dust collecting film to re-contaminate a surface. The flash point is in excess of 450°F and the freezing point is -85°F. This product is heavier than water and does not damage polymers, rubber or plastics.

P/N 09-00890

STRIKE-HOLD® BRAND MICROFIBER CLOTH

These high quality 16"x16" Microfiber® Cloths are machine washable and won't scratch, mar or streak surfaces. Features: • lint-free • non-abrasive • machine washable • eco-friendly "Green" • inexpensive and long-lasting

CLEANERS – POLISHES

PPC AIRCRAFT CLEANERS

PERFECT DETAIL™ SURFACE ENHANCER

Perfect Detail™ is the nation's leading choice for producing "wet look" shine! A light mist instantly produces maximum depth of gloss and flawless glassy brilliance on clear coat, black, and all other paint finishes. It works especially well on all other non-porous surfaces (such as chrome, glass, etc.) while lightly cleaning and accenting soft surfaces such as vinyl, rubber, and leather. For engine detailing Perfect Detail™ can't be beat! Perfect Detail™ is anti-static and slippery, enabling it to resist dust, dirt, and abrasion better than any product.

18 oz.P/N 09-00165
1 GallonP/N 09-00166

BELLY WASH™ DEGREASER

Water-based BellyWash™ is highly concentrated for versatility and cost-effectiveness in any aircraft surface maintenance situation. It can be applied in any manner – spray, brush, wipe, power washer, etc. – and can be diluted with water by as much as 80:1 for routine cleaning in commercial application. Stubborn stains are dissolved almost on contact using full strength Belly Wash™, making it perfect for keeping troublesome aircraft bellies and wheel well areas in like-new condition. When used to remove concealing grime and petroleum-based residues from the aircraft engine area, Belly Wash™ makes it possible to perform a more thorough inspection when checking for potential maintenance problems.

18 oz.P/N 09-00168
1 GallonP/N 09-00169

WING CLEAN™ LEADING EDGE CLEANER

One major performance factor the aircraft owner/operator can improve upon is complete removal of all parasitic drag resulting from impacted air debris on the leading edges. Wing Clean™ is specifically formulated to both safely and effectively dissolve the problem. Wing Clean's™ water-based non-solvent "spray-soak-rinse" application dramatically improves an aircraft's flight-ready condition. Routine use of Wing Clean™, in series with PPC's Perfect Detail™ and/or Prestige Protective Polish, produces a microcellular separation barrier on leading edge surfaces, making future bug removal a progressively easier task.

BIG ORANGE PLUS

A citrus scented degreaser and cleaner designed for the aircraft industry. This surface degreaser is non-irritating but will remove heavy encrustations. Big Orange Plus combines solvent power with an emulsifier system that removes SKYDROL, hydraulic fluids, fuel stains, exhaust soot.

1 GallonP/N 13-00031

FLEET WASH

Fleet Wash aircraft wash and wax is an effective cleaner that leaves a wax-like surface on the washed aircraft. Contains a high percentage of W-300. Fleet Wash leaves a high luster, water-repellent surface which helps to repel dust.

1 GallonP/N 13-00032

FORMULA 2™ CLEANER/ PROTECTANT

Formula 2™ Cleaner/Protectant is a chemically unique multipurpose liquid which thoroughly cleans, beautifies, and protects all leather, rubber, vinyl, and finished wood products in one easy sstep with no greasy film! Due to its unique chemistry, Formula 2™ can also be used on painted and plastic surfaces. When applied sparingly to such surfaces it dries to a slick smooth, invisible coating resistant to mud, fingerprints, food splatters, soap scum, water spotting, etc. On leather, rubber, and vinyl Formula 2™ first dissolves away imbedded grime, then penetrates and softens the material to give it new life and flexibility, at the same time providing a lustrous, weather-resistant finish to prevent future deterioration.

20 oz.P/N 09-00174

EASY™ ALUMINUM POLISH

Easy™ Aluminum Polish is a unique liquid formula that produces a "mirror-like" shine in seconds on smooth aluminum, magnesium, stainless, brass, nickel, etc. Its ability to melt oxidation and simultaneously bring up the metal's true brilliance can't be matched by any other polish. The application of Easy™ allows its exclusive acrylic polymer barrier to "lock" onto the metal's polished surface to resist staining, tarnish, and weathering effects indefinitely. The fine "mirror" finish can easily be maintained with a quick "touch up" application of product as desired.

8 oz.P/N 09-00177

REAL™ WHEEL CLEANER

Real™ Wheel cleaner is the first detergent-based single product able to clean brake dust and corrosion from any type wheel in seconds! It works on contact to remove corrosion from older unfinished or neglected metals (aluminum, copper, brass, bronze, zinc) and is great for antique restoration. Real™ Wheel Cleaner's exclusive detergent action saves both time and money when detailing any vehicle.

18 oz.P/N 09-00178

NATURALLY NEW™ TIRE DRESSING

Naturally New™ Tire Dressing utilizes PPC's advanced water-based polymer technology to produce an effective, cost-efficient dressing that actually protects rather than destroys the integrity of the sidewall. Naturally New™ exactly describes the lustrous sheen imparted on contact with this instant action formula. The dry, semi-permanent barrier is both water repellent and resistant to dust, dirt etc. Naturally New™ Tire Dressing adds maximum beauty while conditioning to keep that "new tire" look during the treadlife of the tires

FLYERS SPEED-WAX WATERLESS DRY-WASH

SpeedWax is a specially formulated waterless aircraft polish and high gloss protectant Dry-Wash. This product is Carnauba Rich & is easy-on, easy-off. With Flyers there is no need to pre-clean any surfaces before using. Due to EPA regulations, cleaning aircraft with soap and water is becoming more and more regulated. Flyers SpeedWax is the answer to the ever increasing EPA regulations. This product will allow you to clean your aircraft in a reasonable amount of time, leaving the surface of your aircraft highly protected.

16 oz. bottle.....P/N 09-42015

JET STREAM METAL POLISH

SKAI METAL POLISH - Skai Metal Polish is designed to polish and restore aluminum or stainless steel to a mirror image. Used for polishing aircraft leading edges, spinners, engine inlets, thrust reversers and bare aluminum skins. Also safe for use on aircraft paint for removing heavy oxidation and stains.

Skai Metal Polish is also very economical. A one pound container will normally equal several pounds of our competitor's products. Skai makes very little mess when you are polishing and will not sling over the aircraft if used properly. Skai is non-abrasive, fast cutting and quick to clear under a buffer. Surfaces treated with Skai are protected and resistant to oxidations. **MIRROR IMAGE** - Mirror Image Brightwork Swirl Remover is designed to remove swirls in polished metal caused by machine buffing. Mirror Image can also be used as a light maintenance polish between machine polishing jobs. Contains corrosion inhibitors and anti-oxidation agents for long lasting protection on all polished metal. Mirror Image will produce 100% protection while sealing the polished metal.

FLITZ POLISHING AND BUFFING BALL

The Flitz 8" Polishing & Buffing Ball is made of a viscos material which is a cooling material vs. lambs wool or cotton which is a heating material. This way it doesn't burn the paint and can be used to buff leading edges without having to tape them. This ball works wonders with Flitz Products and makes polishing much easier, faster and more effective in less than half the time. It fits all drills and air tools and will buff out scuffs, oxidation tarnish, pitting, corrosion on all metals, paints, fiberglass, plastics, and wood. Re-usable & washable.

P/N 09-00554

FLITZ MICROFIBER CLOTH

The Flitz microfiber cloths are 30 times finer than cotton and are great for buffing out waxes and polishes by hand. They will wash windows without chemicals (just use water) and will not streak or leave lint. Size: 16"x16".

P/N 09-00556

KOZAK SUPER DRY WASH

Use on metal, painted, or buffed aircraft surfaces to clean and maintain a beautiful shine. Good on spinners and prop blades too! Made from specially woven cotton fibers with a unique cleaning formula that lifts loose dirt and dust up and away from the surface. Use every time you fly to maintain a shine all year round! Reusable more than 50 times.

P/N 09-00345

SUPER SHINE SPRAY CLEANER & PROTECTOR

Super Shine is a no-run, all purpose spray cleaner and protector. Just spray on Super Shine and let its foaming action lift off dirt and grease from all washable surfaces. Surfaces stay cleaner longer, while fogging and static build-up is eliminated. Ideal for use on plastic windows. Plexiglas, windshields, vinyl, leather, glass, tires and trim, chrome, fiberglass, acrylics, veneers, and painted surfaces. Non-toxic and meets California Clean Air Act. Widely used in aviation, racing/automotive, motorcycle, & marine industries. 15 oz. Spray CanP/N 09-42580

POLISHES – CLEANERS - POLISHERS

CYCLO ORBITAL POLISHERS FOR AIRCRAFT

Genuine Cyclo Polishers: a fifty-year heritage of quality.

Precision machined and hand assembled for a lifetime of trouble-free operation, the Cyclo Polisher's dual heads orbit in a random, overlapping motion that mimics fine hand polishing. Leaves a dazzling, swirl-free shine every time.

The Cyclo Dual Head Orbital Polisher is the most effective means of polishing available today. Even in the hands of a novice, it is safe to operate and provides professional results every time. The difference lies in the tool's overall balance and its patented dual heads. The dual heads operate in a synchronized motion, providing the most effective results without fear of heat buildup; damage to trim pieces, moldings and gaskets; swirl marks, holograms and more. The low-vibration and balanced design allow for a more even application and better control when operating. Electric Polishers

MODEL #5 - * Power Supply: 115 Volts, 60 Hertz, 220 Watts * Motor: alternating current, semi-enclosed 24-bar commutator, * Speed: 3000 orbits/minute, * Output: 1/3 H.P. (.25 Kw) * Weight: 6.5 lb. (2.9 kg) * Head Rotation/Diameter: clockwise /4" * Electric Cord: 10' length, 16 ga/3SJTOW * Housing: heavy-duty cast aluminum * Polisher Only.

HYDRASOLVE

Hydrasolve is a thickened, heavy duty, water soluble gel degreaser formulated for efficiency and performance in a broad range of cleaning and degreasing applications. It will easily and safely remove carbon exhaust, exhaust tracks, hydraulic fluid, thrust reversers, soot areas, oil & bugs. Hydrasolve is a gel product that clings to the surface being cleaned and has the ability to rinse spot free. It will not smear, but lift and suspend soils, making rinsing easy & complete. Meets Boeing & McDonnell Douglas approvals.

5GAL.....P/N 09-00425

FAST WING PAINT SEALANT

T-500 Paint Sealant with PTFE-M is more than a wax or polish. T-500 provides a tough, long-lasting, mirror-like finish that protects paint longer. Works great on aircraft, cars and boats. Fast Wing will increase performance by reducing parasitic drag. The performance of the aircraft actually increased due to the slick surface the Teflon Sealant left on the paint. 100% Satisfaction Guaranteed. 16 oz. (1 pint).....P/N 09-00186

FAST WING VINYL & LEATHER CLEANER

Fast Wing T-600 vinyl & Leather Protector wipes dry leaving that lustrous new look finish. It creates a anti-static surface that helps repel dust and dirt, without leaving an oily residue. Fast Wing T-600 leaves a non-glare finish that is especially important to pilots and race car drivers.
16 oz. (pint).....P/N 09-00188

FAST WING CLEANER

Originally designed to remove over spray, Fast Wing T-11 cleans and restores the paint to the original luster without the use of harsh abrasives found in most rubbing compounds. Rubbing compounds almost always use some sort of abrasive material, such as volcanic ash, which can leave microscopic scratches. Abrasives may actually accelerate the oxidation process. 16 oz. (pint).....P/N 09-00187

SAFETY WASH

Safety Wash is a mild neutral PH water based exterior wash & wax concentrate designed to be gentle on your aircraft. It provides detergency and built-in easy rinse characteristics that will enhance gloss and eliminate the risk of streaking. Formulated for general routing washing of aircraft. Meets Boeing & McDonnell Douglas approvals. Safety Wash is NOT designed to clean heavily soiled areas.

DE-ICER PRODUCTS — LPS PRODUCTS

BF GOODRICH AGE MASTER RUBBER NO. 1 PROTECTIVE AGENT

FLAMMABLE
Age Master #1 rubber protectant helps extend the life of your de-icers so you can cut maintenance costs, slow deterioration and aging, extend service life and save money. Age Master #1 protectant isn't just a surface coat. It penetrates neoprene rubber to help retard damage from ozone, weathering and pollutants to help your de-icers stay strong and flexible. And now it's economical, long lasting and easy to apply. Just follow the simple BF Goodrich guidelines. Wipe or brush on Age Master #1 protectant every 150 flight hours or at least semi-annually, for continuing protection. Age Master #1, the only rubber protectant recommended by BF Goodrich. Meets military specification MIL-P-11520E. Age Master #1 protectant is a staining material. Avoid contact with painted surfaces. Apply sparingly and let dry thoroughly before flying in rain to prevent run-back.
Quart P/N 09-42545.....

BF GOODRICH ICX II FOR DE-ICERS

FLAMMABLE
Icex coating boosts your de-icer performance so you fly with greater confidence by helping your de-icers shed ice at peak efficiency. Icex coating chemically bonds with rubber de-icer surfaces and forms a slick film that makes your de-icers slippery. It will lower the adhesive bond between ice and de-icer surfaces so your de-icers break the frigid grip of ice better and faster! Icex coating is easy to apply and economical, too. A single application provides 50 flight hours of added ice fighting protection on leading edge de-icers and 15 flight hours of protection on prop de-icers. Get Icex coating in quart cans for an attractive uniform satin finish on your de-icers. One is enough to treat a complete single or twin-engine aircraft.

Odor: Citrus. Color: White.

LPS LOW SURFACE TENSION (LST)

A deep penetrating formulation attacks rust and corrosion to free "frozen" parts. LST has an extremely low surface tension that combines with a powerful foaming action to provide complete surface coverage, better penetration and improved moisture displacement. LST Penetrant lubricates and protects against rust and corrosion.
11 oz. aerosol can. P/N 09-01916.....

LPS COPPER ANTI-SEIZE

Premium Copper Anti-Seize a low-friction, anti-seize lubricant dispersed in a water-resistant grease and fortified with anti-oxidants, plus rust and corrosion inhibitors. It prevents seizure and galling and resists welding, hardening or setting. It provides low friction and cushions impact and shock loads. It will perform in temperatures up to 1800°F (982°C). Fittings are heated red hot, allowed to cool, can be disassembled without seizure or distortion. It is recommended for production and maintenance jobs where speed in assembling and dismantling is essential. It reduces downtime, saving valuable man-hours while increasing production.

LPS MAGNUM TEFLON LUBRICANT

LPS® Magnum Teflon® Lubricant provides ultra-high lubricity, plus the additive strength of Teflon® for high-temperature, high-pressure environments. In even the most demanding situations, extend equipment life and reduce maintenance.
11 oz.. Spray Can P/N 09-26430.....

LPS STRONG STEEL STICKS

Easy-to-use, hand-kneadable stick for immediate repairs to steel equipment and surfaces. Ideal for stopping leaks, even works on underwater applications. Permanently fills gaps and holes in metal, concrete, wood, fiberglass, and ceramics. Has a working time of 4 minutes, and will fully cure in 30 minutes to form a durable mass which can be machined, drilled, and painted. Can be used for many types of repairs, such as plumbing, electrical, ceramic, vehicle, equipment, and machinery. It is ideal for patching holes and cracks in pipes, drums, and tanks.
4 oz. stick P/N 09-26444.....

LPS ELECTRO 140 CONTACT CLEANER

LPS Electro 140 Contact Cleaner is the high flash point, fast penetrating, non-residue cleaner alternative to CFCs for fine parts. The Electro 140 Contact Cleaner flash point is above 140°, making it safer to use in areas where flammability may be a concern. It is free of any known stratospheric ozone depleting substances - like CFCs, HCFCs, and 1,1,1 trichloroethane. Electro 140 has a low odor & is effective for flux removal and immersion cleaning.
11 oz.. Spray Can P/N 09-26465.....
Warning: Due to VOC Regulations CA, OR, WA, CO states laws prohibit use, sell, or purchase of this product as of 01/2008 Replacement for 09-26465

LPS NO FLASH ELECTRO CONTACT CLEANER

LPS NoFlash is a vaporous solvent cleaner alternative to CFC's that's safe to use on most surfaces. It's nonconductive and nonflammable, so it can be used while equipment is in operation to avoid costly downtime. NoFlash Electro Contact Cleaner penetrates and evaporates quickly, dislodging oil, grease, dirt and other materials from precision mechanical and delicate electrical/electronic parts leaving no residue.
P/N 09-26412.....

LPS MICRO-X CONTACT CLEANER

A fast evaporating contact cleaner ideal for removing grease, dirt and oil from delicate precision electrical, electronic and mechanical parts. Safe on metal and most plastic parts. No rinsing.

LPS PRODUCTS

LPS® HEAVY-DUTY SILICONE LUBRICANT

Meets FDA regulation for incidental food contact. Silicone-rich formula. Water-based formula. Colorless, odorless & non staining. Ideal for rubber and plastic surfaces. Eliminates sticking, binding and squeaking. Does not contain chlorinated solvents. Safe on most surfaces NSF® H1 registered. 13oz. (368g) – aerosol.....P/N 09-26410

LPS PSC PLASTIC SAFE CLEANER

Patented formula – Patented US #6,342,471. Electrical contact cleaner. Cleans electrical parts without harming plastics. * Non-flammable * Plastic safe * Non-conductive * No residue * Replaces HCFC 141b contact cleaners * Fast evaporating * Conforms to CARB VOC requirements
14 oz. aerosol can.....P/N 09-26406

LPS® COLD GALVANIZE CORROSION INHIBITOR

* Zinc purity greater than 99% * Works like a hot-dip on ferrous metals indoors and outdoors * Withstands water temperature up to 212°F (100°C) and continuous dry heat up to 750°F (400°C) * Commonly used as a flash rust preventive on welded areas * Long term protection * Flexible coating will not yellow, chalk, crack or peel * Electrochemically protects bare metal * Dries to touch in 3 to 5 minutes * 14oz. (397g) – aerosol P/N 09-26425

LPS® INSTANT SUPER DEGREASER

* Heavy-duty performance * Power blast spray * Non-flammable * Removes oil, greases, dirt and tar * Non-chlorinated * Fast evaporating * Non-conductive * No rinsing * No residue * NSF® C1 registration #129029: (aerosol); #129028: (bulk) * Canadian Food Inspection Agency (CFIA) approved 20 oz.....P/N 09-26415

LPS® TKX® ALL-PURPOSE LUBRICANT

All purpose, value lubricant which displaces moisture, loosens rusted or frozen parts and protects metal against corrosion. Does not contain chlorinated solvents or silicones. Safe to use on most surfaces. High flash point of 175°F (79°C). Inverta Spray Valve allows user to spray in an upright or inverted position. NSF® H2 registration. 11oz. (312g) – aerosol. P/N 09-00148

LPS® HDX HEAVY-DUTY DEGREASER

* Nonflammable * Removes oil, grease, wax, dirt, moisture, tar, brake fluid and other contaminants * Fast evaporating * Low odor * Quick penetration * No residue * Non-conductive * NSF K1 registration # 059809: (aerosol); # 059810: (bulk)
19oz. (539g) – aerosol.....P/N 09-26407

LPS® EVR® CLEAN AIR SOLVENT DEGREASER

* High solvent strength * Fast evaporation * Low VOC content * Complies with CARB/OTC (California Air Resources Board/Ozone * Transport Commission) Rules * Not a Hazardous Air Pollutant (HAP) * Instant cleaning action * Excellent replacement for Methyl Ethyl Ketone (MEK) * Ideal for cleaning metals * No residue * No ozone depleting compounds * Inverta Spray Valve allows user to spray in an upright or inverted position. P/N 09-02013

LPS® LVC CONTACT CLEANER

Reduced VOCs (Volatile Organic Compounds). Conforms to CARB (California Air Resources Board) requirements for VOC emissions. * Fast evaporating * Ideal for electrical/electronic and fine parts * Cleans and degreases delicate precision mechanisms * Safe on plastics * Penetrating action removes oil, grease, dirt, flux and other contaminants * Does not contain chlorinated solvents * No residue P/N 09-02045

LPS® U-10 BRAKE CLEANER

* Low VOC (Volatile Organic * Compounds) content * Complies with CARB/OTC (California Air Resources * Board/Ozone Transport Commission) Rules * Instantly removes brake fluid, dust, grease and oil * Improves brake performance * Helps stop disc brake squeal * Powerful jet spray and high solvency * Can be applied without disassembling the brake unit * No ozone depleting chemicals * Fast evaporating * Does not contain toluene * Does not contain chlorinated solvents * No rinsing or no residue * 14oz. (397g) – aerosol P/N 09-02119

LPS 1® PREMIUM LUBRICANT

Provides a dry, thin lubricating film. Resists oil, dust and dirt build-up. Fast acting penetration. Displaces moisture Loosens rusted or frozen parts. Provides a short term, light corrosion resistant barrier. Nonconductive Ideal for delicate mechanisms. Used worldwide in aviation. Safe on paint and most plastics. Inverta Spray Valve allows user to spray in an upright or inverted position NSF® H2 registered .

CLEANERS — DEGREASERS

AVL LUBRICANTS & RUST INHIBITORS

AVL LIGHT - The premium light lubricant and rust inhibitor that penetrates and displaces moisture fast, leaving a delicate coating for excellent lubrication and rust protection. A fine, light film that resists the accumulation of dust and dirt. Ideal for drying and protecting electrical connectors and delicate machinery. Can sprays upright or inverted. P/N 09-02106

AVL MEDIUM - The premium medium lubricant and corrosion preventor is specifically designed to penetrate and displace moisture fast. It leaves a medium weight oily coating for long term lubrication and rust prevention. Can sprays upright or inverted. P/N 13-02963

AVL THICK - The premium thick lubricant and corrosion preventor penetrates and displaces moisture. It stops corrosion on contact leaving a thick coating for long term lubrication and corrosion prevention. Can sprays upright or inverted. P/N 13-02964

AVL NO CHLOR CLEANER/DEGREASER

The powerful flushing action and a high solvency formulation makes cleaning metal parts faster and easier. Penetrates quickly into hard to reach areas, cleaning thoroughly. AVL NO CHLOR Cleaner/Degreaser does not contain any 1,1,1 Trichloroethane or any solvents or CFCs known to deplete the stratospheric ozone layer. Evaporates quickly leaving no residue. Removes oil and grease on contact. This is the best non-chlorinated degreaser we have ever produced. 14 oz. P/N 13-02961

AVL ELECTRO CONTACT CLEANER

The premium aviation cleaner that penetrates fast, cleans and degreases, removes dust and dust buildup without leaving a noticeable film or oil residue. Both penetrate and dry quickly. Ideal for air and ground, electrical and avionics, and sensitive mechanisms. Non-flammable. P/N 13-02958

AVL FAST ACTING CLEANER/DEGREASER II

AVL Fast Acting Cleaner/Degreaser II is a highly concentrated solvent designed to remove dirt, grease, oil and grime from metallic and non-metallic surfaces. Cleaning is quick and simple without the danger of injury to working parts. Ideally suited for use on electronic motors even while running, electronic equipment, ignition systems, generators, power tools, etc. It is non-flammable and non-conductive so it can be used while motors and equipment are operating. Cleans & degreases very fast and dries quickly leaving little residue. P/N 13-02960

MACH #1 DEGREASER/CLEANER

A citrus scented degreaser and cleaner designed for the aircraft industry. This surface degreaser is non-irritating but will remove heavy encrustations. Mach #1 (formally known as Big Orange Plus) combines solvent power with an emulsifier system that removes hydraulic fluids, fuel stains, and exhaust soot. P/N 13-00031

AVL AIRCRAFT GLASS CLEANER

AVL glass cleaner is safe on all plastics and glass. It contains no ammonia. This foaming glass cleaner cleans and leaves a shiny finish with no residue. It easily removes bugs and grime from windshields and all surfaces. 15 oz. P/N 13-02959

CRAZY CLEAN ALL PURPOSE CLEANER

Crazy Clean is an all purpose cleaner which is excellent for removing fuel stains, exhaust stains, an dgrease and grime from your aircraft. Ideal fro removing bugs from leading edges. Crazy Clean produces a cinging foam which cleans and deodorizes and leaves a clean, not waxy surface. Keep a can in the airplane to use when travelling. Recommended by Aviation Consumer. 15 oz. aerosol can. P/N 09-00563

THOR TREE SAP REMOVER

Having a problem with those pine trees & Nasty bird droppings? Well we have the product for you Thor Tree Sap Remover is the answer to remove that sticky tree sap. Even more effective on hardened sap and Bird droppings. Very easy to apply, just pour it on a soft cloth towel apply it to the tree sap or bird droppings and watch it be removed with ease! P/N 09-01958

THOR AERO BRUSH

This a 10" foam block that is completely filled with a one threaded green nylon. This brush will effectively remove oil, grease, exhaust fumes, and other oily residues. 60" length metal handle not included, order separately.

Thor Aero Brush P/N 09-00897
Handle For Brush P/N 09-02097

EXTREME SIMPLE GREEN AIRCRAFT CLEANER

Unique cleaning & anti-corrosion chemistry delivers superior performance and materials-safety all in one. Cuts through tough, built up grease, oil, dirt, pollution, insect residue & impact soils. Gets its superior cleaning from a unique "triple play" cleaning formula. 2 high performance surfactants and new generation grease lifter/cutter combine to get the soil away from the aircraft surface quickly and keep it away so it can be cleanly rinsed away. Also able to go into oil/water separators and have oil break from solution. Extreme Simple Green's safety upon aircraft materials and precision cleaning surfaces comes from a combination of proven anti-corrosion agents. Time tested coupling agent allows these to work together to battle corrosion & hydrogen embrittlement. This makes it safe to put through pressure washing equipment, rack wash systems, dip tanks & parts washers, without any equipment damage.

SIMPLE GREEN 4-WAY PROPORTIONER -

SIMPLE GREEN FOAMING CRYSTAL INDUSTRIAL CLEANER/DEGREASER - Fragrance-free and color-free solution. P/N 09-01305

SIMPLE GREEN CONCENTRATED CLEANER/DEGREASER DEODORIZER

- Clean & deodorize grease filters/traps. 24 oz. (Trigger Spray) P/N 09-01306
1 Gallon P/N 09-01307

SIMPLE GREEN LIME SCALE REMOVER INDUSTRIAL/ INSTITUTIONAL DESCALER - Dissolves soap scum & mineral deposits. Deodorizes-contains no bleach, ammonia or phosphorus. Non-abrasive & non-flammable. Spray..... P/N 09-01308
Bottle..... P/N 09-01309

THOR AIRCRAFT CONCENTRATE

Thor Aircraft Concentrate is specifically formulated to dissolve the residue of exhaust, grease, dirt and oil. It is safe on all surfaces such as ferrous metals, aluminum, plastic, rubber, painted and unpainted surfaces. Also a non toxic, non-corrosive, non hazardous product. Use 1 to 2 quarts of product per 5 gal. of water, depending on how heavily soiled the aircraft is. P/N 09-02122

THOR BUG SPONGE

This product is designed to be used when wet, this foam like material will safely scrub away bugs, bird droppings and any other contaminants. It can be used on Plexi-glass and all painted surfaces. P/N 09-00898

THOR AERO DRY WASH

When you do not have access to water, this is the product for you. Simply spray it on and wipe it off. This unique product also has a polish in it to protect the painted surface. It also contains a corrosion inhibitor which protects the painted surface. Thor Aero Dry Wash is especially safe on plexiglass.

CRC AVIATION MAINTENANCE PRODUCTS

CRC 3-36® MULTI PURPOSE LUBRICANT

A multi purpose lubricant and corrosion inhibitor specifically designed for use around modern plastics. Applications Include: • Seat and cargo tracks • Landing Gear • Lower fuselage interior • Faying surface and crevices • Wing interior surfaces • Entry door horizontal stabilizers • Ground support equipment. Not for use on energized equipment.
16 oz.P/N 09-39600

CRC ULTRA-LITE LUBE

CRC ULTRA-LITE LUBE is an ultra-thin, non-staining dry film lubricant that resists oil dust and dirt buildup. It penetrates into the most minute openings, sealing out moisture and preventing corrosion. Applications include: • Specially formulated for use around modern plastics, polycarbonates, ABS and NORYL • Insulators • Enclosures • Delicate components • Penetrates through rust and scale • Loosens seized mechanisms and frozen parts. Not for use on energized equipment.
16 oz.P/N 09-39602

CRC POWER LUBE®

A unique lubricant that incorporates a sophisticated additive package with Teflon® to provide long lasting protection against friction and wear. Applications include: • Hinges • Motors • Bearings • Cables • Chains • Rollers • Locks • Guide Bars • Pulleys • Sliding surfaces • Valves • Gears • Ball & socket joints • Linkages • Taps and dies • Air power tools • Cutting tools • Precision tools • Chain drives • Sliding mechanisms • Sprockets. Not for use on energized equipment.
10 oz.P/N 09-39605

CRC PRECISION CONTACT CLEANER

A Revolutionary new precision cleaning solvent designed to meet today's environmental challenges. This high-purity solvent is a chemically stable HCFC and does not exhibit the same ozone depleting properties as conventional solvents. It evaporates rapidly and has no flash point and leaves no residue. Applications include: • Computers • Delicate avionics • Oxygen & other pressurized gas systems • PC boards • Radios • Radar equipment • Contacts and switches. Do not use on polycarbonate or Noryl type plastics. Not for use on energized equipment.
16 oz.P/N 09-39617

CRC QUICK DRY CONTACT CLEANER

An alcohol-based precision cleaner that is 100% free of CFCs. Ideal for applications where lower flashpoint solvents may be used. It evaporates rapidly and completely and is harmless to most plastics. Applications include: • Switchgears • Circuit breakers • Telecommunication equipment • Fusible connecting devices • Motors • Generators • Relays • Terminals • Rheostats • Instrumentation • Communications equipment. Not for use on energized equipment.
16 oz.P/N 09-39620

CRC PAINT & DECAL REMOVER

A solvent-based, high strength cleaner that effectively loosens and helps remove paint, adhesives and sealants. It helps protect equipment surfaces by eliminating damage caused by excessive scraping. Applications include: • Dissolves and aids removal of paints, lacquers, adhesives and varnish • Removes graffiti from metal and stone • Removes conventional and formed-in-place gaskets on motors, pumps & flanges. Not for use on energized equipment.
16 oz.P/N 09-39622

CRC AVIATION WINDOW CLEANER

A modern blend of detergents and corrosion inhibitors designed to safely clean aircraft glass, plexiglass and other surfaces (pH 10.6±0.5). Applications include: • Windows • Interior surfaces • Galley areas • Overhead compartments. Not for use on energized equipment.
16 oz.P/N 09-39630

AVIATION DEGREASER

Aviation degreaser is a halogenated solvent-based cleaner/degreaser that is chemically stable and extremely effective in heavy duty cleaning applications. It is fast-acting, non-flammable, and evaporates quickly leaving no residue. Extremely effective solvent for cleaning and removing corrosion inhibiting compounds. Contains no HAPs. Removes carbon buildup. High dielectric strength of 26,800 volts. Degreases and cleans aviation surfaces to allow for east visual inspection. Cleans and prepares metal surfaces for painting on adhesive bonding. Evaporates fast leaving no residue. Non-flammable, non-staining and non-corrosive. Applicatons: Fuselage • Wheel wells • Electric motors • Firewalls • Nocelles • Generators • Nosegear • Ground support equipment • airframe exterior surface
20 oz. aerosol.P/N 09-39690

CRC SUPER DEGREASER

A revolutionary alternative to 1,1,1 Trichloroethane and other chlorinated solvents. Now you can give up chlorinated solvents without giving up cleaning power. A unique, scientifically formulated cleaner and degreaser that effectively removes grease, oil, dirt and other contaminants from motors, parts and equipment. Applications include: • Exhaust trails • Hinges • Antenna mounts • Static tubes • Wheel wells • Struts & tubes • Galleys • Seat tracks • Cargo doors • Cargo tracks. Not for use on energized equipment.
20 oz.P/N 09-39642

CRC CORROSION SHIELD

A long-term corrosion inhibitor that provides extended protection for all metal parts and assemblies, both in storage and during shipment. Its thin, nondrying film protects better than many thicker, waxy films, and is easily removed with solvent cleaners. The unique overlapping plating action provides unequalled protection for planed surfaces and sharp edges. Applications include: • Seat and cargo tracks • Landing gear, wheel wells & keel beam • Fuselage structure • Wing to body fairing • Pins • Hinges • Wing front & rear spar • Lower fuselage interior • Wing interior structure • Horizontal stabilizer • Ground support equipment • Chains and cables • Air conditioning ducts • Lap joints • Skin panel edges • Emergency escape hatches • Bulkheads • Entry and cargo doors. Not for use on energized equipment.
20 oz.P/N 09-39655

CRC CORROSION SHELL

A long-term indoor and outdoor corrosion inhibitor for machined surfaces and assemblies subjected to long periods of storage or adverse conditions during shipment. Its firm, waxy film is highly resistant to humidity and salt spray and never becomes brittle. Petroleum solvents may be used to dilute the product to vary the film thickness or to remove it after application. Applications include: • Completed assemblies • Seat tracks • Chains and cables • Landing gear • Wheel wells • Faying surfaces • Air conditioning ducts • Lap joints • Skin panel edges • Fuselage • Landing gear and bilges • Emergency escape hatches • Bulkheads • Entry & cargo doors. Not for use on energized equipment.
16 oz.P/N 09-39657

LUBRICANTS

LOCTITE THREADLOCKER

Loctite Threadlocker used on a standard fastener can eliminate expensive locking devices while you increase the reliability and quality of your assembly. One drop prevents loosening. 2 removable strengths for large & small applications and permanent strength for locking parts you never want to take apart.

- #222 Threadlocker (permanent, for small screws)
10 ml..... P/N 09-42605..... 50 ml..... P/N 09-42610.....
- #242 Threadlocker (removable, for large screws)
10 ml..... P/N 09-42615..... 50 ml..... P/N 09-42620.....
- #262 Threadlocker (permanent, for large screws)
10 ml..... P/N 09-42625..... 50 ml..... P/N 09-42630.....

PARKER-O-LUBE

Excellent for use on exposed valve plungers, cylinder rods, and other o-rings. It lubricates without causing deterioration of rubber and is water resistant. Good for low pressure vacuum and pneumatic systems.

- 4 oz. tube..... P/N 05-00773.....

SEALUBE

Anti-seize sealer for threaded aluminum alloy parts exposed to gasoline, oil, water, air or vacuum. Good lubricating qualities. Will not harden or set. Will not freeze joints at low temperatures. Non-corrosive, insoluble in gasoline, oil or water.

- 1 Lb. Can P/N 09-25200.....

BAKERSEAL

Thread sealing and lubricating compound. Contains Teflon. Prevents thread leaks with fluids and gases up to 600°F. Recommended for gasoline and aircraft oils. Superior to Teflon tape and much easier to use. 8 oz. jar.

- P/N 09-00346.....

LUBRIPLATE NO. 630AA

Multi-purpose lubricant. Forms a wearing film on working surfaces. Excellent protection against rust and corrosion. Recommended for controllable pitch props, wheel and magneto bearings, general greasing.

- 14 oz. Can..... P/N 09-25400.....
- 6 Lb.. Can..... P/N 09-25500.....

EZ TURN LUBRICANT (FUELUBE)

EZ Turn is a specialty lubricant/sealant used for fuel and oil line valves and is resistant to high temperatures. It is especially effective where high octane fuels and aromatics are present. EZ Turn is also extremely efficient as a gasket paste and anti-seize agent. EZ Turn will not gum, crack or dry out. Each shipment is independently tested. Excellent for tapered plug valves, aircraft engine manufacturing, and marine applications. EZ Turn is the functional equivalent of fuel lube.

- 5 oz. tube..... P/N 09-00306.....
- 1 Lb. can..... P/N 09-00180.....

PERMATEX ANTI-SEIZE LUBRICANT

Prevents galling, seizing and corrosion of metal parts from 65°F to 2000°F. Acts as a low speed lubricant and maintains a corrosion-resistant coating at high temperatures. Makes aluminum and stainless steel joints disassemble quickly, easily. Excellent lubricant for press fit assembly. Works on industrial engine parts, boilers, outdoor motors, cables and internal combustion engines. Conforms to MIL-A-907D. Improves reliability at high temperatures. Saves time, labor.

- 1 oz. tube P/N 09-28410.....

MICROLON PRECISION OILER

This oiler has the famous Microlon resin suspended in a light-weight oil to lubricate, penetrate and prevent rust. It is excellent for lubricating bearings, threaded parts, hinges, pocket knives, chains, rollers, fishing gear, chain saws, guns, garage doors..... just about anywhere that friction causes noise and resistance. Furnished in a handy pen size oiler with a pocket clip. .25 Fluid Ounces.

- P/N 09-00756.....

WD-40 PENETRANT/LUBRICANT

Displaces moisture on any metal surface, preventing rust, corrosion or oxidation of the surface. Used on switches pulleys, wheel housings, seam areas. Non-gumming, non-conductive—safe for all electrical systems. Conforms to specification C-234

- 11. 12 oz. Spray P/N 09-00347.....

DRY GRAPHITE SPRAY NO. 5200

Provides a uniform dry lubricant film of non-abrasive graphite for any metal surface. Can be used alone or with fluid lubricants. Used in engine overhaul, on struts, gears, tracks. Meets MIL-G-26548. DGF-123

- 11 oz. Spray..... P/N 09-25600.....

TRI-FLO TEFLON LUBRICANT

Penetrating lubricant with Teflon, corrosion inhibitors, moisture displacers and solvents to soften and remove dirt and corrosion. Will not cause corrosion. Use on aircraft cabin door hinges, landing gear hinges and struts. Loosens rusted bolts and other fasteners. 12oz. aerosol can

- P/N 09-42540.....

FOAMING SUPERIOR LUBRICANT

Tri-Flow is revolutionizing the way you clean, protect and lubricate all of your moving parts with the introduction of Foaming Superior Lubricant and Foaming Citrus Cleaner Degreaser. Tri-Flow's powerful foaming action clings to both horizontal and vertical surfaces to allow for deep penetration and accurate application. Tri-Flow Foaming products are ideal for use on bicycles, firearms, sporting equipment, manufacturing equipment, and more!

- P/N 09-02082.....

LIQUID WRENCH

A powerful blend of quick acting solvents to free parts frozen by rust, corrosion or paint. Harmless to metals. 11 oz. Aerosol

- Spray..... P/N 09-25800.....

F-900 "TORQUE SEAL"

Inspection Lacquer is used in production on compression fittings, studs, nuts, parts, and assemblies after they are in proper torque or position. Widely used as "Anti-Sabotage Lacquer". Inspectors can visually detect any movement or tampering; Torque Seal becomes brittle and will crack. Excellent adhesion to all metals and to most other surfaces. Dries fast. Torque Seal is packaged in convenient 1/2 oz. poly squeeze tubes. Available in 4 high visibility.

- Yellow P/N 09-25807.....
- Blue P/N 09-25809.....
- Green P/N 09-25808.....
- Orange..... P/N 09-25810.....
- Red P/N 09-02033.....

F-1000 SENTRY SEAL

Used on compression fittings, studs, nuts, parts and assemblies after they have been set to proper tension or position. Service personnel or inspectors can quickly spot any changes or tampering with equipment. Sentry Seal has excellent adhesion to metals, including aluminum, magnesium, titanium, stainless and copper, and is non-corrosive to these metals. It is packaged in handy metal tubes. Squeeze the tube to extrude the Sentry Seal through the small hole to form a bead (narrow stripe) across the parts. The surface dries in about one minute, then it will start to polymerize and become brittle as it dries completely. Available in blue.

- P/N 09-28512.....

LOGO DECALS

AUTHENTIC AIRCRAFT LOGO DECALS

Our full line of authentic aircraft logos are produced on state-of-the-art long lasting UV coated pressure sensitive adhesive vinyl. They are precision cut by a specially programmed computer and have no clear background. Other brands of decals can be produced cheaply but the clear background tends to yellow, rendering unsightly over time. With our custom cut decals, only the letters themselves go on the aircraft giving the lettering a truly professional look which will last as long as the aircraft paint. Please order by part number shown. Many other logos and styles are available, as well as other colors. Call for quotation or send \$2.00 for our complete logo and decal catalog. For quote on custom logo decals, send sketch and details. **FOR OTHER LOGOS AVAILABLE. Send \$. FOR COMPLETE LOGO AND DECAL CATALOG P/N 09-43736**

STARS & BARS

STYLE 1

1943

Between 29 June and 14 August, the official national insignia incorporated white sidebars and an overall red surrounding.

STYLE 2

1943-1947

The red surround of the official insignia was quickly changed to a blue surround. During its 4 years use this insignia appeared on more aircraft than all its predecessors combined.

STYLE 3

1947-Present

With the reorganization of the Defense Department and the creation of the USAF, red bars were added to the official national insignia. A variation of this insignia appears officially without the blue surround on F-15 aircraft.

All the placards & decals on this page are produced on long lasting UV coated pressure sensitive adhesive vinyl. They are computer cut using no clear background so they won't yellow. These are all top quality decals which will enhance your aircrafts looks for years to come. Do not settle for "cheap" imitations.

12-INCH STENCIL NUMBER STRIP

Highly recommended as the easiest and most effective way to apply painted 12" stenciled "N" numbers on any aircraft. These come pre-spaced and aligned horizontally or vertically and assure a professional looking job. Shipped factory-direct to you within 48 hours. Provide exact "N" number when ordering. Special order - Non-returnable. Please specify horizontal or vertical. 6 Characters on each strip or less. Made of Vinyl.

12" Strip (straight) (right/left).....P/N 09-00287 set
12" Strip (slanted) (right/left).....P/N 09-00288 set

3-INCH STENCIL STRIP

Vertical or horizontal lettering individually spaced and aligned. Advise number. Stencils will be made-to-order and shipped in about two weeks.

Straight Set of 2 (Right/Left).....P/N 09-00289 set
Slanted Set of 2 (Right/Left).....P/N 09-00290 set

INDIVIDUAL FIGURE STENCILS

N4804K N2510T N6979N
N425WT N100MD N51ER

Precut sticky paper masks for spraying registration numbers. Used by Piper and other aircraft manufacturers. Order two of each character for vertical stencils. Slanted stencils are furnished in pairs (R/L), so order one pair of each character. Order by part number. For last digit, put in number or letter needed.

3 Inch Vertical Figures.....P/N 09-3280x Ea
12 Inch Vertical Figures.....P/N 09-3290x Ea
12 Inch Slanted Figures.....P/N 09-3300x Pr

Painting Options: These stencils offer you two methods of spraying lettering incorporated in a single stencil.

You can: (1) Letter after the body color has been applied or (2) Letter before the body color has been painted. This second method provides recessed, protected lettering and eliminates masking.

LETTERING & NUMBERS

For any use. Available in over 40 type styles. Most colors available.

GYROS

SIGMA-TEK ATTITUDE GYROS (VACUUM)

An air operated instrument which indicates aircraft attitude through 360° in roll & 360° in pitch. The pictorial airplane remains fixed during gyro operation but may be adjusted by the pilot for changing conditions. The upper half of the horizon bar and the mask are light blue color. Sky is blue and ground is brown. Zero pointer and airplane wings are yellow. Numerals and markings are white on dull black background. Vacuum port and air inlet ports 1/4" NPT. Gauge port 1/8" NPT. Size: 3-3/8" x 3-3/8" x 6-3/8". Wt: 1.9lbs. Standard equipment in production Cessna & Piper aircraft. If instrument panel is tilted, special order gyro is required. *Lighting tray must be purchased to attach to the bezel for lighting.

RC ALLEN VACUUM HORIZON GYRO

The RCA22 Series of vacuum artificial horizon are controlled by air driven precision gyros to present the pilot with pitch and roll information. The attractive color scheme of blue sky and brown ground presents a realistic spherical display of flight. Unless otherwise indicated all instruments have a dark blue/brown display, fixed pointer and are unlighted. This is the "standard" display. Instruments equipped with a warning flag will let you know when vacuum has dropped below 3.8 inch Hg. Flag retracts from view at 4.3 inch. Hg. Instrument fits in a standard 3 1/8" panel cutout. Meets or exceeds all requirements of FAA TSO C4c and Aeronautical Standard AS396B.

RC ALLEN ATTITUDE GYROS (ELECTRIC)

The RCA26 Series is the top of the line and has been designed for precision and reliability. The RCS26EK Series is a 12-30VDC instrument. You have a choice of a fixed or moveable pointer, and a 14 or 28 volt lighting. Performance characteristics include roll indication of 360°. Pitch ± 30°. Pitch trim range ± 7°. Slip Indicator can be added upon request. Mating connector (MS3116E8-4S) is also available. Pictured is the RCA26EK-11

SIGMA-TEK DIRECTIONAL GYRO VERTICAL CARD (VACUUM)

An air operated instrument which indicates compass headings through 360°. The gyro is functional during dives, climbs or banks up to 55 degrees displacement from level flight. Dial has matte white numerals and markings on a dull black background. Vacuum port and air inlet ports 1/4" NPT. Gauge port 1/8" NPT. Size: 3.25" x 3.25" x 6.5; Wt. 2.6 lbs. Standard equipment in production Cessna and Piper aircraft. New manufacture.

INSIGHT GYRO 4000

Replace Troublesome Learjet DN-101 or DN-104 Gyros with Dependable 10,000 Hour Sperry/Honeywell Gyros The Insight Gyro 4000 is based on the best heading system in the industry, the Sperry/Honeywell C-14A.

The C-14A rotors are equipped with long life ceramic bearings rated for 10,000 hours. Combining the C-14A with special interface circuitry in a compatible package, the Gyro 4000 is a plug-in replacement for the old JET DN-101 or DN-104. STC'd for Learjet: 23, 24, 25, 28, 29, 31, 35 and 55 DN-101,104 equipped Learjets as a direct replacement.

P/N 11-05199

RC ALLEN DIRECTIONAL GYROS VERTICAL CARD (VACUUM)

The vertical rotating azimuth card is controlled by a precision air-driven gyroscope. This D.G. will give correct heading information through 85° of aircraft attitude in roll and pitch, 360° in yaw. Full-freedom design allows accurate indication, even after extreme maneuvers. Size: 3-3/8" x 3-3/8" x 7". Wt. 2.9 lbs. Fits standard 3-1/8" dia. panel cutout. Factory new.

RC ALLEN DIRECTIONAL GYROS (ELECTRIC)

The RCA15 Series electric directional gyro employs and electrically driven gyro motor and is a direct reading, azimuth indicator. Rotor run up time is 3 min. They have a built in inverter which converts aircraft DC power to the required AC voltage and frequency. May be used in both fixed wing and rotor wing aircraft and is easily installed in standard 3 1/8" panel cut out. Power failure flag drops into view when supply voltage is lost or has dropped below a level for proper operation of the gyro. Azimuth indication range 360°. Altitude operation -1,000 to 40,000 feet. Meets or exceeds all requirements of FAA TSO C5c, and Aeronautical Standard AS397. Mating connector MS3116E8-4S

GYROS

SIGMA-TEK 500EG ELECTRIC GYRO ATTITUDE INDICATOR

Lighted bezels have anti-reflective glass. Lighted gyros do not include lamp trays. All gyros calibrated for zero degree panel tilt. Mating Connector not included with gyro. FAA Certified as a primary or standby gyro (FAA advisory circular AC20-41A) Approved to Replace you turn coordinator (FAA advisory circular AC91-75) **Optional Features:** * Panel Tilt Inclinometer: 0 to 10 degrees, Standard tilts 0°, 5°, 7-1/2°, 8°, & 10° * Lighting L 5, 14, 28 Vdc external lamp tray, 12-inch leads. * Inclinometer: Slip Indicator, ball type, bezel mounted. * Mating Connector: Part No. 10-02756 **Specifications:** * Panel mount: Standard 3-1/8 inch round cutout, rear mount * Length: 8.1 inches maximum * Weight: 2.6 lbs. maximum, C/G 3.25 inches from mounting face * Input Power: 14Vdc input-1500 mA starting & 1400 mA running; 28Vdc input-600 mA starting & 550 mA running. * Dial Presentation: Fixed pointer, rotating dial, with symbolic airplane. * Operating Temperature Range: -30°C to +50°C, -22°F to +122°F * Certification: FAA TSO-C4c * Limited Warranty: 12 Months from date installed / 6 months shelf life. **All lighted gyros must order tray separately.**

THE "LIFESAVER" ELECTRIC GYRO

The only attitude indicator with a self-contained battery backup, the Lifesaver® provides one hour of emergency attitude reference in the event of power failure. With 7,500 hours MTBF – more than double the competition – it is an exceptional value. TSO approved. Added safety, ease of installation and cost-benefit make this an ideal primary or standby artificial horizon. Custom versions available to match existing instrument/EFIS displays. Anti-reflective glass and long-life lighting are standard on all Mid-Continent indicators.

FALCON ATTITUDE GYRO (VACUUM)

This Gyro Horizon is controlled by an air driven precision gyroscope to present the pilot with pitch and roll information, through the full 360° "pictorial" presentation leads to faster interpretation of airplane attitude. A zero pitch adjustment knob is provided. Dims: 3-1/8 x 3-1/8 x 8 max. Similar to Air Italia Gyros. Non-TSO'd for Experimental Aircraft Only P/N 10-22955

FALCON ATTITUDE GYRO (ELECTRIC)

This factory new electric attitude gyro fits the standard gyro instrument cut-out. Features push-to-cage knob, low power/power failure flag, longer life & reliability due to lower operating temp.; Black case, black adjustment knob, & bright yellow/green airplane marker with sky blue/brown ground dial. Roll & loop without worry. Size: 6.4", Wt: 2.4 lbs., Power: 14VDC req. MS3116E8 connector (included). Non-TSO'd for Experimental Aircraft Only.

CASTLEBERRY ELECTRIC ATTITUDE INDICATOR

The high quality electric attitude indicator replaces the turn and bank and may be installed in the same panel location, freeing up crowded panel space. Installation of these units is straightforward. It has an inclinometer for use in standard rate turns and a failure warning flag to indicate loss of gyro RPM. When used together with the Castleberry Emergency Power Unit, Model EPU 28-24RMT, this instrument provides the pilot with a welcome margin of insurance in case of aircraft electrical power failure. **Features:** • Inclinometer • Power failure flag • Pull to cage knob • Backlit • Standard 3 1/8 in. diameter

CASTLEBERRY EMERGENCY POWER BACK-UP EPU-2

TSO'd emergency power supply, Model EPU 28-24RMT that can replace some older non TSO'd units made by Terra and AIM that are no longer in production. This unit provides a 24 VDC output up to 5 Amps for 30 minutes for emergency buss power to operate the standby attitude gyro with extra capacity of up to 4 amps for other critical instrument or avionics. This is economical insurance in a 7.5 pound package for aircraft frequently involved in IFR operations.

MID-CONTINENT 3300-10

ELECTRIC DIRECTIONAL GYRO

FEATURES: • Weighs just 1.9 lbs. – One pound less than most electric directional gyros • Multi-voltage 10–32 volt DC, remains valid until the aircraft main battery discharges to 10VDC • Direct replacement for many AIM205 and RC Allen RC15A units • Designed specifically for use in high vibration applications • Warning flag monitors rotor speed and power input • Anti-reflective glass enhances visibility and reduces fatigue • Approved to FAA TSO-C5e and RTCA DO-160E • Requires less than half the power of standard DG units • Long-life LED lighting, user selectable to 5, 14 or 28 volt input • One year limited warranty **SPECIFICATIONS:** Power Input: 10–32 VDC, Current Rating: At 14 VDC Start: 1.4A Max., Run: 0.44A nominal, At 28 VDC Start: 0.6A Max., Run: 0.22A nominal, Lighting: Internal LED lighting switchable to 5, 14 or 28 VDC input; wired through main connector, Weight: 1.9 lbs., Length: 4.7 inches, MTBF: 2,500 hours, Mating Connector: MS3116F8-4S, Mounting: Rear panel mount in standard 31/8" round panel cutout P/N 10-02821

RCA 2600 SERIES DIGITAL ATTITUDE GYROS

FAA TSO-C4c certified and is designed to be a direct replacement for any Electric Attitude indicator. Contains no mechanical gyro. Ideal for light sport and home built applications. The precision and stability qualities of these instruments also make them suitable for larger aviation applications such as business aircraft and rotorcraft. Capable of aerobatic type maneuvers with a full 360 degrees of pitch and roll without the typical "tumbling" of mechanical gyros and without any harm to the instrument.

FALCON DIRECTIONAL GYRO (VACUUM)

The vertical rotating azimuth card is controlled by a precision gyroscope air-driven. The directional gyro will give correct heading information through ±60° of aircraft attitude in roll and pitch, 360° in yaw. A caging knob is provided to reset the gyro to the magnetic compass. Similar to Air Italia Gyros. Non-TSO'd for Experimental Aircraft Only. P/N 10-22950

FALCON DIRECTIONAL GYRO (ELECTRIC)

The Directional Gyro is a gyroscopic navigation instrument designed to provide the pilot with a constant directional reference that is not subject to characteristics of a magnetic compass that cause errors. The vacuum type is operated by the air flow generated by the aircraft's vacuum system while the electrical type is operated by the aircraft's power supply. Non-TSO'd for Experimental Aircraft Only.

| | |
|-------------------|--------------------|
| 28V Heading..... | P/N 10-01799 |
| 14V Electric..... | P/N 10-01798 |

Falcon gyros can tolerate some aerobatic flight, but aerobatics can reduce the life of the gyro. It is recommended that the gyros be removed when the aircraft will be performing extensive aerobatic maneuvers. The Falcon electric gyros have caging knobs, but the vacuum gyros do not.

GYROS – STANDBY VACUUM SYSTEMS

MINI 2-INCH ELECTRIC ATTITUDE INDICATORS

The Mini Gyro offers big features in a compact package. At half the cost of the competition, the Mini Gyro not only saves panel space, but also time and money. An ideal standby instrument, this TSO-approved indicator has 10-32 volt DC operation and is an attractive alternative to vacuum systems.

It features unique LED lighting selectable to 5, 14 or 28 volts. Remote emergency power supply available for this indicator (P/N 11-05540).

- Standard airplane displayP/N 10-01721
- Delta airplane displayP/N 10-01722
- Emergency Power SupplyP/N 11-05540

VOLT & VAC ALERT

A gyro instrument can start giving false information in less than one minute, and it is important that the pilot become instantly aware of a vacuum loss. The Volt & Vac Alert monitors instrument vacuum and electrical voltage. Should either fall below set values, the system will provide an instantly recognizable voice warning directly in the pilots headset, and then flash a light positioned within the normal gyro scan area, providing him with instant recognition of a problem. The Volt & Vac Alert is STC - PMA approved P/N 10-00393

RAPCO STANDBY PNEUMATIC CLUTCH REPLACEMENTS

400 Series replacement clutches for Rapco standby pneumatic systems are available in 12 volt or 24 volt. They can be purchased either new or as an overhauled exchange. A core charge will be added to the purchase price of exchange units and refunded with the return of a repairable 400 series core.

VACUUM WARNING INDICATOR

The Precise Flight Vacuum Warning Indicator will provide the pilot with immediate warning of failure of the vacuum system, providing valuable time prior to gyro failure. An inexpensive system that can alert the IFR pilot immediately in the event of vacuum failure. P/N 11-02205

VENTURI

2" VENTURI - This small aluminum venturi provides 2" Hg vacuum for operating turn/bank indicator. Has 1/8" NPT port. Use 1/4" tubing for hookup. Wt. 3.5 oz. P/N 15045

4" VENTURI - This venturi develops 4" Hg suction from double-throat venturi and 10" long horn. Used to operate a directional gyro or gyro horizon. When operating a directional gyro there is sufficient capacity to also operate a turn/bank. All aluminum construction. May require a suction regulator. Wt. 0.9 lb. P/N 15050

9" VENTURI - This "super venturi" is similar in appearance to the 4" venturi but with redesigned air passages and a recontoured, long (11-1/4") horn. It pulls enough vacuum to operate a gyro horizon, directional gyro and a turn/bank. Must be used with a suction regulator. P/N15052

SIGMA TEK CAGEABLE ATTITUDE GYROS

Short stops (engine off less than twelve minutes) and some aerobatic maneuvers may cause your attitude gyro to tumble or precess from its vertical reference. When the rotor is spinning, the gyros normal erection system is slow and can take several minutes to correct a large erection error. This non-locking caging feature allows the pilot to quickly align the gyro display and rotor to gyro case reference. The attitude gyro should only be caged for quick alignment during straight and level VFR flight using well defined earth horizon for reference or prior to take off. **All lighted gyros must order tray separately.**

VAC-2 VACUUM PUMP ADAPTER

The revolutionary VAC-2 adapter provides a direct replacement for the Lycoming vacuum pump pad adapter casting. The VAC-2 design provides a standard vacuum pump pad with provision for inverted oil pick-ups. Normally there is a T fitting mounted on the firewall that supplies the inverted oil. For many engines when this T fitting is used, the oil pressure will drop down into the yellow on the oil pressure gauge for three to five seconds when inverted. On some aircraft this drop in oil pressure will cause the prop to cycle

because of lack of oil pressure. With the VAC-2 adapter installed you do not have this drop in oil pressure. By using the VAC-2 adapter you have (1) the best inverted oil pickup, (2) a stock vacuum pump pad adapter. Used in place of Christen "T" fitting.

The VAC-2 comes complete with oil seal installed, gaskets, and MS 20822-10D fitting. Just slip vacuum pump gear assembly and washer into VAC-2 and install on engine. The standard Lycoming vacuum pump gear assembly and washer will fit into the B & C adapter. (Gear and washer shown are not included.)

VAC-2-4 for 4 Cylinder EnginesP/N 07-06790

VAC-2-6 for 6 Cylinder EnginesP/N 07-06795

STANDBY VACUUM SYSTEM SVS V

Manufactured by Precise Flight, Inc., this Standby Vacuum System, SVS V, is a new solution to the old problem of in-flight vacuum pump failures. It operates on a differential between manifold pressure and ambient pressure which is directed through a shuttle valve system to drive the flight instruments. When the vacuum pump fails, the pilot simply turns on the SVS system and adjusts

engine power settings while observing the instrument suction gauge to obtain adequate differential to operate the instruments. Kit includes low vacuum light and installs in 2-4 hours. STC'd for most aircraft. This kit can provide peace of mind on all flights and, if that pump ever fails, can be a real life saver. P/N 10-00400

AERO SAFE GUARDIAN I STANDBY VACUUM/PRESSURE SYSTEMS

The Aero Safe Guardian I Standby/ Pressure system is designed to provide the pilot with the most reliable standby source of instrument air available for single engine aircraft. STC'd for most Bellanca, Beech, Cessna, and Piper single engine aircraft. Specify aircraft make, model, year, and serial number when ordering.

- Vacuum systemP/N 10-00267
- Pressure systemP/N 10-00268

TURN COORDINATORS – TURN & BANKS

RCA TURN COORDINATOR 3 INCH. INDICATORS

Used in many production aircraft. Incorporates an electrical Gyro Turn Indicator with an inclinometer. The inclinometer, by movement of a ball in relation to the lubber lines, indicates the slip angle of aircraft while in a turn. The airplane on the dial rotates with reference to the indices. A power failure flag drops into view whenever the supply voltage is lost or when voltage has dropped below a level acceptable for proper operation of the gyro. Operates on 14 to 28V DC. New manufacture. First installation requires electrical connector and clamp. **DIMENSIONS:** Length: 6 1/5 in. Max, Width: 3 3/8 in Max, Height: 3 3/8 in Max, Weight: 1.9 lbs. Meets or exceeds requirements of FAA TSO C3b

MID-CONTINENT TURN COORDINATOR (ELECTRIC)

Engineered for a long service life, the new "B" model turn coordinator features a proven AC rotor powered by a solid-state inverter. This creates less heat behind the panel. By utilizing a brushless rotor design, this instrument has one of the top ratings in the industry – 4800 hours MTBF. A direct replacement for most 3-pin turn coordinators, it is perfect for use in high-performance aircraft and cold-climate applications. The well-known "Z" models are an industry standard. Value priced and reliable they are in more aircraft than any other brand. All 3-inch turn coordinators operate from 10 to 32 volts DC for convenience and reliability.

BANK INDICATORS (BALL TYPE)

Bank indicators show the lateral inclination relative to the horizon. In turning, instantly register slightest departure from the correct banking angle. Bank scale has white markings on black background. New manufacture. Available in 2 models: 10°-10° Scale, 2.25" between mounting holes. P/N 10-00600
20° - 20° Scale, 5" between mounting holes... P/N 10-00700

WINTER SLIP INDICATORS

The basic flight instrument for co-ordinated turns. Available in two styles: Rectangular model fits easily in cramped panel space. Square model matches a 2-1/4" instrument hole, fits on either side of the panel. Both feature finely crafted metal cases and precision ball and tube assemblies.

Square P/N 10-03812
Rectangle P/N 10-03857

MID-CONTINENT TURN & BANK (ELECTRIC)

Built-in voltage regulator allows it to be used in either 14V or 28V systems. Small, compact unit and weighs only 1.2 lbs. Incorporates a small "power out" warning window which is black when normal current is being supplied but turns red in the case of electrical power failure. This turn and bank is now being used in many production aircraft. New installation requires electrical connector and cable clamp. New manufacture by Electrical Gyro Corp. Size: 3-3/8" x 3-3/8" x 3-3/4" long.

Unlighted P/N 1234T100
14V Bezel-Lit P/N 10-22614
28V Bezel-Lit P/N 10-22628
MS3106A-10SL-3S Electrical Plug Connector
MS3057-4A Cable Clamp

FALCON TURN & BANK (ELECTRIC)

The unit is an electrically-driven gyroscope. The inclinometer, by movement of a ball in relation to the lubber lines, indicates the slip angle of the aircraft while in a turn. A power flag drops into view whenever the voltage drops below a level which is required for proper operation of the gyro. It incorporates a built-in voltage regulator so it can be used with either 14VDC or 28VDC power supply system. It has a DC-AC-DC converter. Power Supply: 10-30VDC, Electrical Consumption:

Max. 1.0A at 11-26VDC Max. 0.35A at 26 to 30VDC, Operating Range: 2 min. Turn, Weight: 18 oz./0.5 kg, Length: approx. 5 inches Unlit
P/N 10-22515

RCA TURN & BANK (ELECTRIC)

Instrument is powered by an electrically driven DC precision gyro with an inclinometer. It gives the pilot turn and bank information. The RCA56 series is an all volt instrument, with a power warning flag, a black or white ball inclinometer and either lighted or non-lighted. DIMENSIONS: Length: 6 1/4 in. Max Width: 3 3/8 in. Max Height: 3 3/8 in. Max Weight: 1.9 lbs.

Meets or exceeds requirements of FAA TSO C3b New manufacture by A.I.D. RC Allen. New installation requires plug connector & cable clamp.
RCA56-3B, UNLIT P/N 10-01684
RCA56-3BL, LIT P/N 10-02138
Plug Connector P/N MS3106A-10SL-3S
Cable Clamp P/N MS3057-4A

RCA MINIATURE TURN/BANK (ELECTRIC)

Similar to the air driven model but the gyroscope is electrically driven. Connection is by electrical plug. Power: 14 or 28V DC. New manufacture.

28V, 4 Min Turn Yellow markings P/N 10-03429
14V, 2 Minute Turn P/N 10-00499
14V, 2 Minute Turn 14/28 V Lit P/N 10-02587
Plug Connector P/N MS3106A-10SL-3S
Cable Clamp P/N MS3057-4A

AN5820-1 TURN & BANK (VACUUM)

AN5820-1 Turn & Bank indicator completely overhauled and certified to FAA requirements. Fresh matte-white dial markings with "doghouses". Power: 1.8" to 2.2" Hg vacuum produced by a 2" venturi or vacuum pump. Size: 3.25"x 3.25"x 4.75" long. Weight: 1.5 lbs. 1 year warranty.
P/N AN5820-1

TURN & BANK KIT

Consists of an overhauled and certified Turn & Bank indicator, 2" venturi, hoses, fittings and instrument screws.
P/N 10-00300

MINIATURE 2-1/4" TURN & SLIP INDICATOR

Widely used in the turbo-prop market as standard equipment, this dependable instrument fits into the tightest panel space. The AC brushless rotor offers great reliability. Internal lighting options of 5, 14 and 28 volt offer greater flexibility. These were factory installed on the DeHavilland Dash 8 and Boeing Chinook CH47

14V Turn & Slip P/N 10-00305
28V Turn & Slip P/N 10-00310
Plug Connector P/N MS3106A-10SL-3S
Cable Clamp P/N MS3057-4A

2-1/4" INCLINOMETER

This in-dash mounted inclinometer is lightweight and fits a standard 2-1/4" instrument hole. Used on Kitfox aircraft & ideal for virtually any homebuilt. P/N 10-00705

TEMPEST DRY AIR PUMPS

TEMPEST TORNADO 3000 DRY AIR PUMPS

New revolutionary LRT oil drain, patent pending feature is designed to drain oil, caused by a leaking Garlock Seal, before it reaches the drive coupler. Provides a tell tale leak path. Closed front ends, designed to eliminate oil and oil residues from entering into the pump. Helps prevent pump failures

caused by oil entering into the drive mechanism or rotor and vanes.

TEMPEST VACUUM PUMP COOLING SHROUDS

Cooling shrouds have been proven to reduce pump operating temperature and therefore extend service life. Testing has proven reduction in operating temperature by as much as 15%. Saves money - extends service life of dry air pumps. AA20T fits all 200/240 series pumps. AA40T fits all 400 series pumps. Sigma - Tek® pumps are not eligible.

AA207.....P/N 10-02796.....
 AA40TP/N 10-02797.....

TEMPEST ELECTRIC AUX. DRY AIR PUMPS

Electric auxiliary dry air pumps are recommended for single engine aircraft flown in IFR conditions as a back-up in the event the primary vacuum pump fails. These pumps are FAA-PMA approved as direct replacements for Airborne pumps previously installed under STC eligibility and STC approval for these pumps for many additional aircraft is pending. Add \$200 core charge on both models. Electric Auxiliary Dry Air Pump Model AA4A2-1 P/N 10-00585.....
 Electric Auxiliary Dry Air Pump Model AA4A3-1 P/N 10-00584.....

TEMPEST DRY AIR PUMPS

Tempest dry air pumps, from Aero Accessories, are 100% new production and use all new components. They are FAA-PMA approved replacements for like and similar models on many installations. These pumps are available in the 200, 240, and 400 series.
 The AA211CC series come with a 1-year, unlimited hour warranty and the AA241CC, AA242CW, and the AA441CC and AA442CW series come with a 1-year, 500 hour warranty. Warranties expire 2-years from date of manufacture. \$100.00 Core Charge applied to Overhauled Pumps

***Core Rebate available for new pumps.**

Add Core Charge On Overhauled Pumps to purchase price. 200 Series . 400 Series . Return Cores must be Rapco or Airborne aluminum cores, no cast iron cores accepted. Cores must be returned in repairable condition to receive full credit. Return cores via UPS and reference Aircraft Spruce Invoice No. No core with all new Rapco Pumps.

RAPCO VACUUM PUMP REMOVAL & INSTALLATION TOOL

The RA716 Pump Wrench provides superior access to the vacuum pump flange nuts. This new tool is made from quality hardened steel with corrosion resistant nickel plating. The shank is shaped to provide easy access to tight areas between the pump and accessories. The open end head is laser cut providing a close tolerance fit on the nut. Plastic coating on the handle provides a firm grip .P/N 10-13911

SIGMA-TEK DRY AIR PUMP

The Sigma-Tek 1U128-006 is a pump which carries a warranty of 2-years or 1000 hours. It uses an aluminum rotor and rotor housing, making the pump very resistant to damage from ingestion of foreign objects, excessive loads or engine oil. It provides clean, dry air for operation of air driven instruments in aircraft operating at medium altitudes. Pump rotates clockwise or counterclockwise in vacuum or pressure mode. May be mounted in either a vertical or horizontal position. FAA approved as a direct replacement for all instrument pumps but is not intended for supplying air to deicing boots. Mounting gasket furnished. Install suction regulator in line to instruments. Delivers 6 In. Hg vacuum (2.9-8.5 minimum CEM) or 6 In. Hg pressure (3.7-8.5 minimum CEM) from 1500 to 4000 RPM. No core charge. P/N 10-02778

SIGMA-TEK AEON DRY AIR PUMP

The Sigma Tek 1U478-003 piston air pump's unique design features give virtually maintenance free operation with unprecedented long life and is backed by a full 5 year/2,000 hours warranty. Will replace 200 series and 1U128 series instrument vacuum pumps. Contains no brittle carbon rotor and vanes to shatter, making this pump highly resistant to damage from foreign objects or excessive loading. This pump operates either clockwise or counterclockwise engine pad rotation in the vacuum or pressure mode. Each port is clearly marked. May be mounted in any orientation. Mounting gasket furnished. Sigma Tek recommends using our high flow fittings, always use P/N 58B423-003 (90 degree long) and 58B423-004 (90 degree short) fittings where applicable. FAA-PMA approved. PN 10-01133

AAA REMANUFACTURED DRY AIR PUMP

Arizona Aircraft Accessories is an FAA Approved overhaul facility which remanufactures run-out Airborne vacuum pumps to factory specifications. Warranty on 211/212 series pumps is 1-year/1000 hours and on 240/440 series pumps warranty is 1-year/400 hours. Weight: 211/212/240 series= 3 lbs.; 441/442 series = 4 lbs.

TEMPEST VACUUM PUMP WRENCH

Case hardened steel, with nickel-chrome plating for corrosion resistance. Slip resistant vinyl grip. Rare earth magnet allows efficient and easy installation of hard-to-get-to install nuts. Eligibility: Fits all 200, 240, 400 and 3200 series vacuum pumps. P/N 10-02654

SUCTION REGULATORS – PNEUMATIC FILTERS

PARKER SUCTION REGULATOR

Constructed of lightweight aluminum. Large air passages minimize the pressure drop through the valve. Valve chatter is virtually eliminated by pneumatically balancing the regulating diaphragm. The simple but effective polyurethane garter filter protects the air pump and may be easily replaced.

Beaded hose fittings simplify installation and eliminate expensive AN fittings which unnecessarily restrict air flow.

P/N 10-03147

RAPCO RA2H3-12 VACUUM REGULATOR (PN 10-00289)

This FAA Approved Rapco vacuum regulator is designed to maintain a constant suction at various altitudes and is used in various General Aviation applications. It is a direct replacement for the Airborne Model 2H3-12, and supersedes the 133A16 or 2H3-16. It is adjustable and come preset to 5.0 inches of mercury (HG). This model has two 3/8" hose inlet ports at a 45 degree angle to each other and one 5/8" hose outlet port.

RAPCO RA2H3-23 VACUUM REGULATOR (PN 10-03009)

This FAA Approved Rapco vacuum regulator is designed to maintain a constant suction at various altitudes and is used in various General Aviation applications. It is a direct replacement for the Airborne Model 2H3-23, and supersedes the 133A4. It is adjustable and comes preset to 5.0 inches of mercury (HG). This model has two 3/8" hose inlet ports parallel to each other and one 5/8" hose outlet port.

RAPCO RA2H30-9 PRESSURE REGULATOR (PN 10-03147)

This FAA Approved Rapco pressure regulator is designed to maintain a constant pressure at various altitudes and is used in aircraft with pressure instrument systems such as newer Beechcraft Bonanza. It is a direct replacement for the Airborne Model 2H30-9, and supersedes the 1H30-9. It is adjustable and come preset to 5.0 inches of mercury (HG). This model has a 5/8" hose inlet port and a 5/8" hose outlet port.

VACUUM RESTRICTOR VALVE

AN5829-2 manually adjustable needle valve complete with locking collar and mounting flange. For reducing vacuum to 2" Hg for operation of turn/bank. Manufactured by ACS Products Co.....P/N AN5829-2.....

Aircraft Spruce offers RAPCO FAA-PMA approved filter replacements for Airborne assemblies. Destructive contamination abounds within an aircraft environment. Without proper filtration, system dirt and dust from the

cabin as well as cigarette smoke will take its toll. This results in the replacement of expensive gyro instruments and other components. Your operating costs can be significantly reduced when filters are changed on a scheduled basis. RAPCO in-line and central filters are constructed to the highest industry standards. They utilize a 0.3 micron filtration media which provides superior filtration without undue air flow restriction. As a RAPCO distributor, Aircraft Spruce offers these replacement filters at exceptionally low prices.

CLEAR VIEW INLINE AIR FILTER

Constructed of high temperature, high impact material, the CV1J4 transparent housing allows the aircraft mechanic, pilot or owner to visually monitor filter contamination when referenced with an internal "Change Indicator" decal. This revolutionary new design will aid in identifying malfunctioning or inoperative system components that cause premature air pump wear and avoid replacement of clean filters usually replaced annually or based on aircraft operating hours. When installed in a "Vacuum" gyro system between the air pump and gyro instruments, the CV1J4 "Clear View" air filter will prevent contamination of gyro instruments from carbon dust created by air pump failure. The CV1J4 filter is a direct replacement for Airborne 1J4-6 and 1J4-7 filters. FAA/PMA approved for Beechcraft Singles & Twins, Piper PA31, 31P, -300, -310, -325, -350, PA-31P-350, PA31T2, PA-34-200T, Grumman GA-7, Rockwell 700, standard equipment on all Mooney aircraft. P/N 10-00450.....

.....

INLINE AIR FILTER KIT FOR CESSNAS

This FAA-PMA approved kit includes a CV1J4 clear view filter, necessary hardware, a copy of the STC and detailed instructions for smooth installations. An adhesive backed label is provided for recording kit installation data in aircraft log books.

P/N 10-00451.....

INLINE AIR FILTER KIT FOR PIPERS

Similar to kit for Cessnas above. FAA approved for most PA-28 and all PA-38. P/N 10-00452.....

AIRBORNE CENTRAL AIR FILTERS

Increase gyro life with Airborne gyro air filter. Incorporates a 0.3 micron filter element that protects gyro instruments by filtering out tobacco smoke and cabin dust.

Small, lightweight, easily installed. Fits most planes. Dual 3/8" beaded tubes simplify 2-gyro installations.

| Part No. | Description | Price |
|----------|---|-------|
| 1J7-1 | Vacuum Instrument Central Gyro Air Filter: 0.3 micron pleated paper element with two 3/8" installation tubes. | . |
| B3-5-1 | Vacuum relief & pump inlet foam garter filter: Foam Garter filter. Fits Airborne 133 & 2H3 Regulating Valves. | . |
| D9-14-5 | Replacement element used in Airborne 1J2 Series Inlet filter (except 1J2-2) | . |
| D9-14-3 | Replacement element used in Airborne 1J2-2. | . |
| D9-18-1 | Replacement Filter for Airborne 1J7-1 Gyro filter Assy. | . |
| 1J10-1 | Line mounted Filter 3/8"x3/8" non-beaded tube 5-3/4" long. | . |

Available with custom range marksP/N 10-02614

LIGHTED UNITED AIRSPEEDS

Add -1 to P/N's above for internally lighted airspeed indicators. For an additional \$128.00

UNITED TRUE AIRSPEED INDICATORS

The true airspeed indicator corrects the indicated airspeed for changes in temperature and pressure encountered as aircraft changes altitude. By aligning outside temperature and pressure altitude with setting knob, movable airspeed scale is rotated proper amount so pointer registers true airspeed. Factory new 8100 series by United. TSO'D for certificated aircraft. Dual scale. Not Lighted.

Add . for custom range marks

& specify exact range marks needed.

Add -1 to P/N's above for internally lighted airspeed indicators.

UMA 2-1/4 TSO'D AIRSPEED INDICATORS

UMA indicators are FAA TSO'd to C2d specifications. Installable in a fixed wing aircraft with a reciprocating or Turboprop Engine. Must be installed in a temperature controlled environment from -55 to +85 °C, to a max altitude of 25,000 ft. UMA offers indicators with full scale ranges available, from 160 to 300 in MPH or Knots.

AIRSPEED INDICATORS

FALCON 3 1/8" SINGLE RANGE AIRSPEEDS

Falcon Gauge Airspeed Indicators have been one of the most chose flight instruments by kit plane builders and pilots. There are many great advantages to using these gauges: excellent slow speed characteristics; very progressive increments; a variety of ranges, light weight; short length, and affordable price. All Falcon Gauge Airspeed Indicators are housed in an aluminum case and consist of all metal parts.

Available ranges: mph, knots, km/hr; single range reading or dual range readings. Size: 3-1/8". Non-Tso'd

| Range | Length | Weight | Part No. | Price |

FALCON 3 1/8" DUAL RANGE AIRSPEEDS

Falcon Gauge Airspeed Indicators have been one of the most chose flight instruments by kit plane builders and pilots. There are many great advantages to using these gauges: excellent slow speed characteristics; very progressive increments; a variety of ranges, light weight; short length, and affordable price. All Falcon Gauge Airspeed Indicators are housed in an aluminum case and consist of all metal parts.

Falcon Gauge Dual Dial Airspeed Indicators provide dual readings and are suitable for higher performance type aircraft flying at moderate to high speeds. Matte-white dial markings, housed in a sturdy protective aluminum case.

Weight: approx. 10.5 oz./301g Length: 3.5" or 97.3 mm
Size: 3-1/8"

THE KIT COLE CLARIFIER

The Kit Cole Clarifier Removable

The Kit Cole Clarifier is a non FAA approved coated, high quality glass lens provided in a kit that allows you to temporarily attach it to your altimeter face for all of your VFR & LSA flying needs. The kit

comes complete with a non-permanent, clear bonding gel and instructions for installation. This product is sold as a removable visual aid and is not intended for IFR use on TSO'd altimeters. The Kit Cole Clarifier is not sold to be permanently bonded to your altimeter face by any non FAA approved techniques.

The FAA Approved Kit Cole Clarifier

The Kit Cole Clarifier (US Patent No 7,313,962, 7,404,322) is a FAA approved coated, high quality glass lens provided in a kit that is attached to your altimeter face for all of your VFR & LSA flying needs. This product is sold as a visual aid and is intended for IFR use on TSO'd altimeters. Special order only must send in altimeter to have bonded.

Kit Cole Clarifier - FAA Approved P/N 11-07785

FALCON 3 1/8' TRUE AIRSPEEDS

Falcon Gauge True Airspeed Indicators have a sub-dial and window. The pilot can set the dial to coincide the outside temperature with the flight altitude for immediate and accurate true airspeed reference. It is a high precision airspeed indicator which makes for a nice feature and impression in an experimental aircraft cockpit. It also features all parts made with metal, aluminum case housing, short length and light weight. Non-Tso'd

FALCON 2 1/4" MINIATURE AIRSPEEDS

Falcon Gauge Miniature Airspeed Indicators are designed for ultralights. They offer ultralight pilots an affordable alternative to other higher priced indicators found in the market today without compromising the pilot's needs for a quality gauge that provides accuracy, light weight, compactness and safety. Their excellent slow speed performance provides an extra measure of safety by assuring accurate speed readings when flying low or critical stall speeds.

WINTER MINIATURE ALTIMETERS

The mini altimeter is a remarkable instrument. Through the use of an accurate single pointer design, the 0-5,000 and 0-10,000 altimeters are able to squeeze precision and reliability into a 2-1/4" instrument which is less than 2" deep. All altimeters are designed with Kollsman windows, glass faces, precision jewelled movements and a rugged combination metal and plastic case. Static porting is standard.

TASKEM 2000 DIGITAL ALTIMETER

The Series 2000 Digital Altimeter is a precision instrument providing altitude readings from -100 to +30700 feet in 10' steps. A standard 3-1/8" instrument powered from 11-35V DC & uses a highly visible backlit liquid crystal display. Displayed data includes Altitude, Baro Ref & Vertical Speed. A programmable altitude alert function combines both audio and visual (LED) outputs. An oxygen alert cautions when over 12500 feet. All data is output in computer compatible RS-232 format.

Model 2000 devices display pressure in Hg while Model 2001 units are in mBar. 2 options can be added to the basic (-1) model; OAT (-2) includes temperature sender and also computes and displays Density Altitude, Mode C (-4) is a standard TSO-C88a compatible encoder. Both options are included in the (-3) versions. Wt., 8 oz. Depth behind back of instrument panel, 3-7/8". 2-yr factory warranty.

TASKEM 5000 DIGITAL ALTIMETER

Unlike mechanical altimeters, the Taskem 5000 is insensitive to the high vibration of 2-stroke engines frequently used on ultralight aircraft. This has literally shaken many mechanical altimeters. The 5000 is all solid state and can withstand severe shock and vibration without damage. It has a full 4.5 digit liquid crystal (LCD) display with large, 1/2" high characters. Because the LCD uses direct drive, it is easily readable from most viewing angles and does not disappear when viewed from an angle or does not washout in bright sunlight. Includes a backlight for night or dusk viewing. The altitude range extends from below sea level to well above the need for supplementary oxygen. The limits are -1000 to 19,990 ft. (-305 to 6,093 meters). Increments are in 10 ft./1m steps. The instrument is powered from DC in the range of 7-30V and is protected for accidental polarity reversal. A 9V battery is a common power source and a battery holder for this is provided on the back, external to the case. An alkaline battery will provide over 40 hours of operation, without the backlight illuminated. The backlight is not powered in the ON power switch position to conserve battery life.

Meters.....P/N 10-24020.....

ALTILERT ALTITUDE ALERT

Designed for general aviation use, the AltAlert is a portable device to help the pilot maintain an assigned or desired altitude. It's use is simple. Fly to your desired altitude and turn the unit on. The AltAlert learns your current altitude (by sampling barometric pressure, just like your altimeter) and stores this information. As your altitude drifts, an error signal is generated. At approximately +/- 100 ft. (or 50 ft. in Precision Mode), the red indicator flashes quickly and is accompanied by a piezo horn. The horn can be silenced by pressing the push button switch. Alarms will clear upon return to your original altitude. A new desired altitude can be set by turning the unit off and back on at any time. SPECIFICATIONS: • Size: 1.5" h x 4" L • Wt: 5 oz. (including battery) • Battery: 9V (not included) • Battery Life: 24 hrs+ • Dual Sensitivity Levels • Audible Alarm.

P/N 10-01727.....

ALTIMETERS

UNITED SENSITIVE ALTIMETERS

Designed to help the pilot determine altitude by measuring existing atmospheric pressure, this altimeter translates this measurement into "height-above-sea-level." This is indicated on the dial of the instrument in feet, which requires setting the barometric pressure in the Kollsman window.

Standard 3-1/8" size.

UNITED ALTIMETER, 3-INCH COUNTER DRUM POINTER

Aerosonic Common in turboprop and jet aircraft that require high quality instruments, this 3-inch, 35K counter drum pointer (CDP) has many features. The easy-to-read altitude window shows the aircraft height above sea level while the needle provides additional altitude precision. Requires 28 VDC power for operation.

FALCON 3 1/8" SENSITIVE ALTIMETERS

1. Three Pointer Altimeter with Barometric Window and Low Altitude Warning Stripes is a modern type. The easy to read striped sector will show while flying below 16,000 ft. 2. Three Pointer Altimeter with a Barometric Window enables the pilot to adjust the altimeter to the barometric conditions existing at the point of landing. 3. Two Pointer Altimeter without Barometric Window. This type of altimeter is designed to meet the demands of some pilots who either live or fly the area's barometric pressure beyond 28.1 to 31 inches of mercury, or 950 to 1050 millibars, or some pilots prefer to set the altimeter to "0" altitude before taking off without regard to the barometric pressure. By installing this altimeter, the pilot can fly anywhere in the world without having to care about the barometric pressure changes. Non-TSO'd.

FALCON 3 1/8" NON-SENSITIVE ALTIMETERS

Falcon Gauge light weight altimeters feature a non-sensitive altimeter on a 3-1/8", single pointer, and a barometric window. A setting knob allows the pilot to set the barometric reading to the correct field elevation or barometric pressure setting. They are weight conservative, economical, yet very precision and accurate instruments that provide excellent altitude measuring capabilities; designed for ultra-light airplanes. 3-1/8" is non-sensitive. Standard Types are either feet reading with barometric window inches of mercury or millibars reading; or meters reading with barometric window millibars reading. Length: 2 3/8" Weight: 10.7 oz.

FALCON 2 1/4" SENSITIVE ALTIMETERS

2-1/4" is sensitive. Single Pointer, and a barometric window. A setting knob allows the pilot to set the barometric reading to the correct field elevation or barometric pressure setting. They are weight conservative, economical, yet very precision and accurate instruments. It is suitable where space and weight is a consideration. This type is available in Feet or Meter reading, the baro-metric window can be either in inches of mercury or in millibars reading. Length: 2 3/8" Weight: 3.6 oz.

WRIST INSTRUMENTS – BUGS – REDUCING MASKS

VECTOR WRIST-TOP COMPUTER

The Vector combines an altimeter, vertical speed indicator, barometer, compass and a precision timepiece in one compact wristwatch-sized case. The instrument allows altitude measurement in feet or meters, up to a max. 27,000 ft., accurate to plus or minus 10 ft. It also provides instantaneous vertical ascent & descent rates in either feet/second or meters/second. The backlit display is easy to see in all lighting conditions. The barometer displays current barometric pressure and trends for accuracy, and deviation adjustment to correct for differences between true and magnetic north. Reliable & accurate, this new instrument provides time, day and date, as well as three daily alarms, a stopwatch and countdown timer. The unit is also waterproof to 100 ft. P/N 10-19325

MICROTIM™ BAROMETRIC ALTIMETER

Features: * Extreme sensitivity. Registers changes in altitude of 2 feet or less. * Calibrated from -2000 feet MSL (2000 feet BELOW sealevel) to +20000 feet MSL (20000 feet ABOVE sealevel). * Low Power. Single AAA battery lasts for months. Battery monitor gives several DAYS of low-battery notice. * One foot resolution, barometric-pressure and field-elevation adjustable. * AGL(relative), MSL(sealevel) or BOTH alternately every 2 seconds. * Selectable units: feet/inHg or meter/kPa or feet/mbar(hPa). * Excellent ultralight altimeter or backup unit. Small (3"x1.5"x3/4") with large easy-to-read numbers (3/8" high numbers). Very durable (resin encapsulated internals), resists shock, vibration, and moisture. * EASY TO USE right out of the box. The 3 primary key functions allow you to o 1) Raise the barometric pressure setting o 2) Lower the barometric pressure setting o 3) Zero the ground-level altitude (AGL) * Then three additional functions are accessed by holding down one key for 5 seconds which allows you to o 4) Change units o 5) Change the display mode (AGL, MSL, or BOTH) o 6) Reset MicroTim to factory defaults (AGL only, feet, 29.92 inHg). ...and that's all there is to it! P/N 10-01726

INSTRUMENT BUGS

"Bugs" are perfect for pilots who rent aircraft, and for owners. The transparent suction cup works on all instruments. A thumb screw friction lock lets the yellow pointer tip rotate 360°. Fly with it day & night. Includes: 2 "Bugs" in a plastic reusable storage box with instructions and 4 disposable alcohol swabs, which are used to clean the instrument face and bugs so that they stick well. P/N 10-00114

AIRCRAFT INSTRUMENT COVER

The instrument cover is a plastic disk approximately 2 3/4" in diameter and 1/16" thick. By use of the attached suction cup, the cover will mask the face of most general aviation flight instruments. It is useful in many training situations one of which is partial panel work. As a safety aid, the cover can be used to mask an instrument when it is non-functional, as is required by Regulations. Each package has two covers. P/N 13-04968

INSTRUMENT COVERS

The suction cup on the back of this soft rubber disc enables the pilot or instructor to cover up one or more flight instruments for partial panel instruction or to cover a failed instrument during flight. Measures 3-1/8" in diameter. Flight instructors and IFR pilots should have several of these handy covers in their flight bags. P/N 13-00088

INOPERATIVE INSTRUMENT AID

Designed with static cling polyester, the IIA will stick to your glass instrument face without licking and will stay there until you want to remove it. Practicing instrument failures during flight is a requirement by the Federal Aviation Administration for your practical test. One package includes four Inoperative Instrument Aids. Developed by a Certified Instrument Flight Instructor with the intent to improve instrument instruction. measures 3" in diameter. P/N 13-04173

3ATI REDUCER PLATES

3ATI Reducers to 3 1/8" - Use a 3ATI hole cut out to mount 3 1/8" diameter instrument. Plate can be shimmed to instrument-panel thickness. Simple installation. Heat-treated aluminum .080 thick with black anodize finish. P/N 07-01331

3ATI Reducers to 2 1/4" - Use a 3ATI hole cut out to mount 2 1/4" diameter instruments. Plate can be shimmed to instrument-panel thickness, comes with 4 rivets. Simple installation. Heat-treated aluminum .080 thick with black anodize finish. BACK PLATE 3.8 X 3.8 P/N 07-01330

REDUCING MASKS

Precision die-cut black anodized aluminum masks simplify installation of small instruments in large instrument panel cut-outs. 3 types available.

- #1: Large AN-type artificial horizon cut-out to 3-1/8" size P/N 10-05900
- #2: Large AN-type directional gyro cut-out to 3-1/8" size P/N 10-06000
- #3: 3-1/8" size cut-out to 2-1/4" size P/N 10-06100

DRILL JIG AND FILING TEMPLATE FOR THE 3 ATI INSTRUMENT CUT

A handy much needed tool to have for those difficult to make 3 ATI cut outs that everyone complains about. A rugged tool made of alloy steel with a 58-60 RC hardness for long life. Simply drill mounting holes and cut opening file to P/N 10-00153

template.

MOUNTING PLATE FOR THE 3 ATI INSTRUMENT

Quick fix for a hard to cut out opening. Plate is .500 wider than instrument. For easy mounting, material is .080 aluminum P/N 10-00154

REDUCING PLATE FROM 2-1/4" DIA.

Reduce from 2.25" to 2" diameter instrument. For oil pressure, ammeter gauge etc. P/N 10-00155

INSTRUMENT COVERS FOR PARTIAL PANEL PRACTICE

Sold in 4 packs of 25 (for a total of 100 sticky notes). These round pads are white with a light blue ASA logo, and fit any aviation instrument. Perfect for partial panel practice or jotting down quick notes. P/N 13-21776

ANGLED INSTRUMENT MOUNTS

This angled instrument mount allows replacement of a 3-1/8" gauge with a 2-1/4" gauge. It places the gauge at a 20° angle toward the pilot for easier reading and reduced glare. Made from 20% glass fiber filled Lexan. P/N 10-06800

INSTRUMENT PANEL COVER-UPS

These white stick on instrument size covers are ideal for partial panel practice or to cover an actual failed instrument. These covers are reusable and are furnished in a package of 5 covers P/N 10-00066

INSTRUMENT PANEL COVER-UPS FOR PFD / MFD

Cover ups for PFD and MFD screens for glass cockpit training. For partial panel practice & actual instrument failures. * Reusable, 3 per pack * "Cling" type plastic covers, with lift tab * Zip lock plastic bag for convenient storage. P/N 13-06116

INSTRUMENT HOLE COVER PLATES

Use these plates to attractively cover unused panel cut-outs. Aluminum and plastic plates have raised center, which brings the plug face about even with the front surface of the panel.

- Plastic plate for 2-1/4" Cut-Out..... P/N 10-06900
- Plastic plate for 3-1/8" Cut-Out..... P/N 10-07000
- Plastic plate for standard altimeter hole..... P/N 10-07100
- Aluminum plate for 2-1/4"hole, black wrinkle P/N 10-00427
- Aluminum plate for 2-1/4"hole, no paint..... P/N 10-00428
- Aluminum plate for 3-1/8"hole, black wrinkle P/N 10-00429
- Aluminum plate for 3-1/8"hole, no paint..... P/N 10-00430
- Plastic plate for 3ATI hole, black fire retardant... P/N 10-00433
- Aluminum plate for 3ATI hole, black wrinkle..... P/N 10-00434
- Aluminum plate for 3ATI hole, no paint..... P/N 10-00436
- Plastic plate for half ATI hole, black fire resist... P/N 10-00437

INSTRUMENT PANEL LAYOUT TEMPLATE

Use this template for precise positioning of instrument holes and mounting screw holes in panel. For both 2-1/4" & 3-1/8" dia. instruments. With transfer punch for marking screw hole centers and instructions. P/N 12-14600

VSI - ACCELEROMETERS

FALCON ACCELEROMETER (G-METER)

Accelerometers register to "g" forces acting on the airframe during turbulence or aerobatic maneuvers. One pointer gives a continuous reading, the other two indicate maximum positive and negative loads. Easy to reset by pushing the "push to reset" knob.

All models are mechanical and offer precision, accuracy, reliability and durability. They are very easy to operate with no wiring necessary.

Whether flying acrobatic or not, this G-Meter provides the pilot valuable information for a

winged airplane and helicopter without having to spend astonishing figures.

| Size | PART NO. | LIGHTING | RANGE | PRICE |
|--------|----------|----------|-------------|-------|
| 3-1/8" | 10-00936 | UNLIT | -5g to +10g | . |

| 2-1/4" | 10-00840 | UNLIT | -2g to +5g | . |

MECHANICAL ACCELEROMETER ("G" METERS)

This instrument registers "G" forces acting on the airframe during turbulence or aerobatic maneuvers. One pointer gives a continuous reading, the other 2 indicate maximum positive & negative loads. A reset knob is provided. In smooth, level flight the instrument indicates +1 "G". Large "G" Meter - Range: -5G to +12G.

Fits 3-1/8" dia. panel cutout. Wt 0.8 lb.

Overhauled & Certified - w/Matte-White Dial Markings.

P/N 10-09710

FLIGHT DATA G-METER GT50 12/28

The GT-50 is a Six Function: Accelerometer - Clock - Voltmeter - Temperature for Experimental Aircraft.

G-Meter:

* Continuous Instantaneous Display to +12/-10 G's

* Records and Saves Max and Min G's

* 30 Degree (Sonex) Tilted Panel Compatible

Flight Timer: Automatically Records Flight Time

Clock: 12 or 24 Hour Format

Timer/Stopwatch Voltmeter

Features:

* Best G-Meter Value Available

* Extreme Operating Temperature Display

* Soft Orange Backlight

* 2-1/4" Panel Mounted

* Weighs 2.5oz

* Includes Pre-Wired Connector

* 12-28 Volt Compatible P/N 10-03691.....

Flight Data OAT Probe GT50..... P/N 10-03694.....

WINTER VARIOMETERS

These extremely sensitive Winter instruments provide instantaneous indication of changes in vertical speed. Mechanical operation, with vario flask included. 2 1/4" and 3 1/8" sizes, 1000 fpm, 10 knot and 1500 fpm ranges

UNITED VERTICAL SPEED INDICATORS

The vertical speed indicator is a precision instrument which provides an accurate indication of rate of change of altitude. This instrument is temperature compensated and is provided with a zero adjustment screw on the face of the case in the seven o'clock position. Power: Static system.

Manufactured by United Instruments. Used in most production aircraft.

Size: 3-1/8" x 3-1/8" x 4", Wt. 0.7 lb. TSO-C8b.

FALCON VERTICAL SPEED INDICATORS

Falcon Gauge Vertical Speed Indicators (Rate of Climb), have been installed in thousands of planes. Available in climb ranges from 2,000 feet per minute to 4,000 feet per minute, and 10 meters per second. This precision aircraft instrument provides immediate climb and descent information with an easy to read dial and is extremely reliable and durable. Over several decades, they have been servicing and satisfying pilots and kit plane builders worldwide.

The 2-1/4" altimeter is perfect for the ultra-light models and where space and weight are a factor of consideration.

INSTRUMENT MOUNTING & ADAPTER KITS

INSTRUMENT MOUNTING KITS

Kits come with "special" self-locking black pan head screws nylon washers, and alignment guide pin.

Precision machined "Nut Ring" instrument mounting kit. Designed to slide on from the back side of the instrument using the alignment guide pin inserted through a screw hole. Pulling on the alignment pin from the front side of the panel allows you to hold the instrument in correct alignment in the panel. Specially designed self-locking pan head black brass mounting screws and nylon washers are then easily installed from the front. Countersunk self-locking black brass screws are also available. Extra screws & washers are sold in packs of 12. The nylon washer keeps from chipping the instrument panel. All self-locking screws are extra long to accommodate the extra thickness of light wedges and internally lighted instruments. Nut Rings can be installed without removing hoses, tubing, or electrical connections. Designed to replace "grasshopper nuts". PMA'd. Alignment guide pin sold separately. (P/N 10-03696)

"EZ NUTS" INSTRUMENT MOUNTING SYSTEM BY SPT

Take the frustration out of mounting instruments with the use of Superior Panel Technology's EZ Nuts. Adhesive tape securely holds nut ring in place. No realignment if instrument is later removed. Includes four

1-1/2" non-magnetic black oxide stainless steel, pan-head screws. Stronger than brass. Includes four black nylon washers to prevent marring of the panel. Aluminum bezel is treated to prevent corrosion. The pressed in stainless steel inserts eliminate the problem of striped threads. Simply cut off one corner if only three screws are needed. Save labor time when compared to "grasshopper nuts". 100 degree countersunk screws available and are sold in packs of eight.

PITOT TUBE COVERS

PITOT TUBE BODY - Durable leather-like cover provides optimum protection. Velcro strap attaches body to 5/8" or 11/16" dia. L-shaped pitot tube. Bright red "Remove Before Flight" streamer. Made of flame-proof & weather-resistant National Aerospace material. P/N 15210

SLIP-ON PITOT TUBE COVER - Not shown. Same as above except is slip fit over 1/4" or 1/2" dia. pitot tube. Red "Remove Before Flight" streamer is attached to cover. Made of flame-proof and weather-resistant National Aerospace material. P/N 15220

DEGROFF'S PITOT SHIELDS

PITOT SHIELDS are a "fail-safe" pitot tube cover that will protect the pitot tube from contamination by insects, debris and ice while the airplane is on the ground. It is friction-fit to the pitot tube and has a calibrated "flat-plate-forward" design that, upon reaching a specific velocity, will release from the pitot tube and fall harmlessly away, allowing for normal airspeed indications. The cover utilizes EVA foam that is UV resistant and stable at temperatures reached by heated pitot tubes. It is a highly visible color with the words

"REMOVE BEFORE FLIGHT" printed and visible from all directions. This pitot tube cover is soft, but tough. It will not damage aircraft surfaces when it comes off during ground roll, nor will it be a potentially hazardous foreign-object on the runway.

- For 5/8" pitot tube.....P/N 10-00491
- For 3/4" pitot tube.....P/N 10-00492

PITOT TUBES

UNHEATED PITOT TUBES

STRAIGHT TYPE - Flange-mounted through leading edge of spar. Aluminum tube 24" long, 1/4" dia. May be cut to shorten.

P/N 15133

L-SHAPED TYPE - Flange mounted L-shaped model for under-the-wing mounting. 1/4" dia. aluminum tube.

P/N 15135

L-SHAPED PITOT-STATIC TUBE - Same design with static tube added. For pitot tube cover order #15220 or 10-02100 (flip up).

P/N 15144

STRAIGHT TYPE PITOT-STATIC TUBE - Clamp-mounted for leading edge of wing. 14-1/2" long. May be shortened, formed or shaped to best angle of attack. 1/4" dia. aluminum tubes. All installation hardware furnished.

P/N 10-01800

STRUT TYPE PITOT-STATIC TUBE - Simple L-shaped design for clamping to strut. 1/4" dia. aluminum tubes.

P/N 10-01900

MAST-MOUNT PITOT TUBE - Designed for mounting in 3/4" O.D. x .049" wall aluminum tubing (not furnished). Machined from solid aluminum. Polyethylene fitting for 1/4" I.D. hose included. P/N 15170

RAVEN PITOT STATIC TUBE

Pitot system combines pitot and static functions in one tube. Used for years on many different aircraft. Comes complete with mounting block to install it.

P/N 10-00476

PITOT STATIC SUMP BOTTLE

This pitot-static sump bottle collects moisture in the aircraft's static system which prevents water damage to panel mounted instruments. Used in many Cessna aircraft. Measures 1.625" dia. x 4.75" long.

Cessna.....P/N 10-00630

STATIC PORTS

Aluminum static port for mounting through 1/4" dia. hole in side of fuselage. Base has 1/8" NPT female port for connecting to static line (polyethylene fitting included). Install with 3/32" dia. flush rivets.

P/N 15160

Aluminum static port mounts from outside of fuselage through 9/16" dia. hole. Secure to skin with 9/16" Pal nut & lock washer on inside. Includes (1) 0700-153 polyethylene fitting.

P/N 15165.....

Aluminum static port mounts from outside of fuselage through .560 dia hole. Secure with four countersunk 1000 3/32" rivets. Includes one 0700-153 polyethylene fitting.

P/N 15175.....

Aluminum single engine cessna type static port. External mounted through a 19/64" hole. Can be used on fabric, composite or aluminum. No need for rivets. 1-3/8" dia.x1" depth. Ideal for homebuilts of all types.

P/N 10-00250.....

BOND-IN STATIC PORT SET

This aluminum static port is designed for high performance composite aircraft. Simply bond through the fuselage from the outside. Base has a 1/8" NPT for connecting to the static line. Furnished with installation instructions. Sold in set of 2.

P/N 10-00229

PITOT PAL

The Pitot Pal is a precision machined adapter that is installed in the nose of the aircraft by simply drilling a 1/2" diameter hole, inserting the adapter, and locking in place by a nut on the backside. The adapter has a barbed fitting to which the airspeed indicator tubing is attached. The aluminum Pitot Tube slides into the adapter and locks in place with a press fit. The added benefit to this is that the Pitot tube can be easily removed at a fly-in or similar event to prevent it from getting bent. Deluxe kit includes tubing & a fitting to connect Pitot Pal to the airspeed indicator.

Pitot Pal..... P/N 10-00062

Deluxe Kit..... P/N 10-00063

FALCON HEATED PITOT TUBES

The AN5812 heated pitot tube has been used on a wide variety of aircraft over the years and is now available for experimental aircraft. Made from brass and weighing 1.5 lbs, these imported pitot tubes meet the AN specifications.

12V, 7ampsP/N 10-00984

24V, 3.5ampsP/N 10-00985

HEATED PITOT TUBES

AN5812 PITOT TUBE - This heated pitot tube mounts under the wing. Used on Mooney, Beech, Piper, Maule, American Aviation aircraft, Glasair & Glasair. Threaded outlet fits 1/4" size AN tube fittings. Use 2.023x.857x.049 4130 Streamline Tubing to fabricate mount.

AN5812-12 (12V) (10 amp.)

AN5812-1 (24V) (15 amp.)

Phenolic connector receptacle P/N 10-00032

AN5814 PITOT-STATIC TUBE - Same design as AN5812 pitot tube but with heated static tube added. Used on Glasair & Glasair (Piper No. 305-12).

AN5814-12 (12V) (20 amp.)

AN5814-2 (24V) (15 amp.)

AN5813-1 PITOT TUBE - The AN5813-1 (PH500) is the standard replacement heated pitot tube for twin Cessnas with 24V systems. Draws 3-4 amps and measures 9.75" long. Mounts in 1.18" diameter tube. Available with or without sleeve. With Sleeve.....P/N 10-00064

SPACEAGE PITOT

SpaceAge Control miniature heated pitot or pitot-static probes offer the lowest power consumption and lowest weight available to the general aviation market. A small tip diameter of .31 inches allows the sensing tip to remain free of ice under severe in-flight icing conditions at only 50 watts of power - which is about 25% of the power of those bulky probes with similar anti-icing capability. Probes are constructed of highquality corrosion resistant materials - a stainless steel outer shell on the nose section, aluminum body, stainless steel pressure lines, and aircraft grade lead wires.

GRETZ GA-1000 HEATED PITOT TUBE

The Gretz Aero GA-1000 is a totally new design of heated pitot tube. It is molded from a very high-tech polymer material that has nearly the same thermal conductivity as that of metal. This new design has electronics embedded in the Pitot tube.

It also comes with a small electronic control module to control the heat of the Pitot as well as to provide information to the pilot regarding thermal and heater performance of the Pitot tube. This done by way of a 3/16" diameter multi-conductor cable that has a LED board already attached that will mount conveniently on the panel. The GA-1000 will fit the Gretz mounting bracket kits that were designed for other popular Pitot tubes. The GA-1000 Pitot tubes come with the electronic control module, the LED board and cable, Pitot mounting screws, electronic control module mounting hardware, and of course, complete instructions for installation and use. P/N 10-01715

GRETZ GA-500 UNHEATED PITOT TUBE

The Gretz GA-500 is the same shape and color as the heated GA-1000 Pitot tube, but does not include the heater, electronic instructions, etc. It will mount into the same Gretz mounting bracket kits.

P/N 10-01716

GRETZ AERO PITOT TUBE BRACKETS

These chrome plated bracket kits include all of the parts needed to install AN5814 or AN5812 pitot tubes into any of the Vans RV series aircraft or into most other metal winged aircraft with some slight alteration of the kit. Complete instructions included. Kits for homebuilders pitot tubes (below) are bare metal (paintable) and undrilled.

Kit for AN5812 pitot tubesP/N 10-01950

Kit for AN5814 pitot tubesP/N 10-01960

Pitot Tube Bracket Undrilled/PaintableP/N 10-01188

HOMEBUILDERS HEATED PITOT TUBES

These heated pitot tubes are similar to AN5812 pitot tubes but are 1/4" deeper and 1/2" longer. Available in 12 volt or 24 volt models. Not FAA approved for certified aircraft. Note: Mounting holes will need to be drilled and taped.

FALCON GAUGE PITOT TUBE MOUNTING BRACKET

This Falcon Gauge Mounting Bracket for Pitot Tubes works with heated and non-heated tubes. Material: Aluminum Alloy

Standard Mounting Bracket.....P/N 10-01063

Mounting Bracket for RV'sP/N 10-02276

PITOT TUBES - ANGLE OF ATTACK INDICATORS

AEROGIZMOS PITOT TUBE

Incorporates the mount and the tube in one convenient unit, making it no longer necessary to have a separate mount. This unit further enhances the building experience as there is no protruding mast from the wing if it is to be stored during the building process. Made from a single piece of 6061 aluminum making it strong and long lasting. The unit has been lightened in the interest of weight savings. Not for IFR use.

P/N 10-03633

THE REDDISH STALL WARNER

Developed in the UK by Nigel Reddish, these stall warners have been installed in many RV series aircraft. The vane is ground adjustable and installation is simple. Includes a micro switch and vane. For experimental aircraft only. **Note:** The Mark 2 Version is practically the same as the Mark 1, the only difference is the vane on the Mark 2 is longer. The installation is the same as the Mark 1 only.

Mark I P/N 10-00189.....

Mark II P/N 10-02686.....

RIGHT ANGLE BUDDY AOA

The RiteAngle™ "Buddy" is a modern, up to date system that accurately determines your aircraft's angle of attack. This series uses an improved easy-to-understand LED display. Green indicates Safe, Amber indicates Caution and Red indicates Danger. In addition to the color of the LED's the flashing "arrows" show which way to put the nose to prevent stalling the aircraft. The horizontal line of Green LED's indicate the "On Speed" AOA, 1.3 Vso regardless of bank angle density altitude or any of the other variables where the airspeed is inaccurate. We will not sell this system to aircraft with flaps.

P/N 11-06626

NON-HEATED NON-IFR WELDED PITOT TUBE ASSEMBLY

This non-heated non-IFR welded pitot tube assembly. It is intended for the experimental VFR aircraft market. The tube and mast are from 4130 tube welded in a fixture to assure alignment. The orifice is produced from aircraft grade aluminum. The pressure tube is polyethylene for easy connection to the aircraft pitot system. Dimension: 6" x 5" x 2-1/2"

P/N 10-03637

SAFE FLIGHT PRE-STALL WARNER

Warns by light and horn of any danger of an approaching stall regardless of the flight maneuver. Never signals unless a stall is imminent. Consists of an instrument panel unit (fits standard 2.25" hole) containing a warning horn & signal light, and a small vane wing unit which operates a relay. Operation of the instrument doesn't depend upon air speed but rather on the air flow conditions of the wing. Complete with installation kit & instructions. Installation time: 2-6 hours.

ACI STALL WARNER

Few pilots need reminding of the catastrophic consequences of an unintentional stall at low level. A frequent sequence of events is distraction of pilot attention, leading to lack of speed control, with the stall rapidly followed by rotational entry into a spin. Steep ground impact follows all too quickly. We all know about this, but why do stall accidents continue to kill pilots and their passengers year after year? Factors include the rapidity with which our low inertia aircraft lose airspeed, their sensitivity to gusts, the higher frequency of engine failure - and so on. However, very few Experimental and PFA aircraft are fitted with audible stall warners, and yet we are flying aircraft that need them. Virtually every certified production light aircraft has a stall warning system as standard. The ACI Stall Warner is for experimental aircraft only. P/N 10-00235

MPL 503 AIR PRESSURE SWITCH

MPL 500 Series switches offer pressure, vacuum, and differential sensors, sensitive to as low as 0.05 in/H² O. Their accuracy and reliability offer the designer an excellent general purpose low pressure to electric interface for monitoring and control applications. Miniature size and low cost make the 500 Series ideal for OEM applications. MPL 503 is a Range B switch, which is 0.50 to 3.00 in/H₂O

P/N 11-02379

AOA PROFESSIONAL MODEL

This angle of attack instrument is designed for experimental aircraft pilots. Angle-of-Attack unlocks Navy carrier pilots secrets and puts a priority on safety. All approaches should be flown at the same optimum approach angle of attack not the same IAS. We can now do precision approaches just like the military and airline pilots and accurately gauge Vx, Vy, Best glide, L/D max, and maximum endurance AOA because angle of attack is not a function of weight, bank angle, fuel load, density altitude and etc. This revolutionary angle of attack instrument is based on a long known aerodynamic principle. The AOA Professional includes a four color liquid crystal display and a aural voice system which warns of critically high AOA, gear position errors and installation/hardware errors. There are no ugly probes, vanes or protrusions to slow you down or accumulate ice.

For Composite Construction..... P/N 10-00016

For Metal Construction..... P/N 10-00736

AOA SPORT MODEL

Designed for those tight panels, requiring simplified features but still uses revolutionary patent pending sensing techniques. This angle of attack instrument is only 1/2" wide by 1-3/4" by 1-1/4" deep overall and will fit on or under your glare shield or between instruments as a panel mount in either the vertical or horizontal position. Enhance safety by installing the ultimate aerodynamic performance instrument. The display is a three color LED ladder and includes the same aural voice warnings as the AOA Professional. It can be powered with a 9V battery or by standard 14 or 28 aircraft bus systems. There are no ugly probes, vanes or protrusions to slow you down. This instrument has more resolution than the Navy's indexer used by Naval and Marine aviators today. Excellent for RV's, Glasairs, Lancairs, and other homebuilts.

P/N 10-00017

ALPHA SYSTEMS AOA KITS

AOA-5060K MECHANICAL KIT (3-1/8" MOUNT) - The Alpha System AOA mechanical kit includes everything needed to install an angle of attack gauge in any aircraft. This kit includes probe, probe mounting plate, all fittings, 21 feet of hoses and the AOA gauge with a 3-1/8" standard panel instrument opening mount. PN 11-05601

AOA-5070K MECHANICAL KIT (DASH MOUNT) - The Alpha Systems AOA Mechanical Kit includes everything needed to install an angle of attack gauge in any aircraft. This kit includes probes, probe mounting plate, all fittings, 21ft. of hoses, the AOA gauge, and custom dash mount with mounting plate. PN 11-06446

AOA-5050K MECHANICAL KIT (2-1/4" MOUNT) - The Alpha Systems AOA mechanical kit includes everything needed to install an angle of attack gauge in any aircraft. This kit includes probe, probe mounting plate, all fittings, 21 feet of hoses and the AOA gauge with a 2-1/4" standard panel instrument opening mount. PN 11-05599

AOA-2000K ELECTRONIC KIT (2-1/4" ROUND DISPLAY) - The Alpha Systems AOA electronic kit includes everything needed to install an angle of attack display in any aircraft. This kit includes probe, probe mounting plate, all fittings, 21 feet of hoses, the AOA digital control module with audio beeper, power cord and round LED display with a 2-1/4" standard panel instrument opening mount. PN 11-05596

AOA-3000VK ELECTRONIC KIT (VERTICAL DISPLAY) - The Alpha Systems AOA electronic kit includes everything needed to install an angle of attack display in any aircraft. This kit includes probe, probe mounting plate, all fittings, 21 feet of hoses, AOA digital control module with audio beeper, power cord and 4" bar graph LED vertical display. PN 11-05597

AOA-3000HK ELECTRONIC KIT (HORIZONTAL DISPLAY) - The Alpha System AOA electronic kit includes everything needed to install an angle of attack display in any aircraft. This kit includes probe, probe mounting plate, all fittings, 21 feet of hoses, AOA digital control module with audio beeper, power cord and 4" bar graph LED horizontal display. PN 11-05598

PITOT TUBES - COMPASSES

SPACEAGE HEATED PITOT-STATIC PROBES

Avionics engineers needing AN5812-mount pitot tube and AN5814-mount pitot-static tube compatibility but requiring the latest in low-power, low-mass, and small-size technology can now specify SpaceAge Control 4380-type air data probes. Unlike legacy-design AN-type products, the new 4380 and 4420 series probes meet FAA TSO C16a deicing requirements. The 4380 and 4420 series air data probes reduce the impact of air data systems on the aircraft's power and mass budgets, weigh in just 1/4 pound, and have a power consumption of just 45 watts continuous.

PRECISION VERTICAL CARD COMPASS

The Precision Vertical Card Compass is a totally new concept for today's aircraft. It is a dry compass, designed to replace the float/liquid type compass; no more leaking fluid or backward azimuth readings. It uses eddy current damping and as such has no overshoot. It consists of a 2" vertical rotating dial which is compared with a fixed miniature airplane (lubber line) to present the magnetic heading of the aircraft at all times. Heading information is more natural because the heading is read at the 12 o'clock position and off the nose of the miniature aircraft. The compass card rotates and presents all quadrants in their true relation to line of flight. Requires no power (except for lighting) to operate. Fully TSO'd. Installed in many current production aircraft and helicopters. Size: 2-7/8"H x 2-3/8"W x 2-1/8"D. Wt. 0.6 lb. After installation, compass must be compensated using standard compensation procedures. Also used in sailplanes.

COMPASS COMPENSATOR

The Precision vertical card compass is very sensitive to stray magnetic fields within the aircraft. If the compensators of the compass will not bring the compass within tolerances, it will be necessary to install the HBB47S compensator ("balanced balls"). These balls contain magnets which permit the compass to be properly compensated. Instructions furnished.
 P/N 10-07900.....

MAGNETIC COMPASS SHIELD (MU METAL)

Use this .005" x 5" x 12" metal strip to shield the precision PAI-700 compass from magnetic interference in the instrument panel.

COMPASSES – ENGINE GAUGES

S.I.R.S. "PEGASUS" (TSO'D)

The S.I.R.S. "Pegasus" compass utilizes the most advanced technology and manufacturing methods to produce the most accurate compass in the industry. It utilizes high quality components throughout, including Silicone rubber seals, metal expansion bellows, and Tungsten Carbide pivots. The "Pegasus" has a high-visibility spherical display, and can be viewed over a 140° arc instead

of the standard 90°. Fits standard 2-1/4" panel hole (by 2-1/4" deep) and weighs only 30% of a typical liquid compass. The "Pegasus" comes in blue/white lighted or unlighted versions, and has a 3-yr. warranty.

S.I.R.S. "NAVIGATOR" (TSO'D)

The S.I.R.S. "Navigator" delivers extremely accurate readings due to it's fully integrated, 4 magnet correction facility. A similar design is used on the Concord, and many civil and military aircraft. Same features as "Pegasus", but is mounted with a fully adjustable bracket that allows attachment to a variety of positions including the glare-shield or the windshield. This allows the compass to be located away from magnetic influences. Size: 20-3/8" h x 2-1/4" w. "Navigator" comes in lighted or unlighted versions; 3yr. warranty.

S.I.R.S. NAVIGATOR NV2-2400X

Navigator NV2-2400X by SIRS is designed to replace older, less stable compasses. The NV2-2400X bolts onto the aircraft's glareshield. The Navigator houses a compass rose suspended in a silicone-based fluid and features silicone seals to eliminate the problem of leaks and fluid evaporation common to older compasses and reduces lead and lag errors inherent in liquid-filled compasses. Metal expansion bellows allow

for flexing in high-altitude, unpressurized flight. The display shows 140° of heading, as opposed to the 90° view offered by standard compasses. The TSO'd Navigator comes in 6, 12, & 28V configurations, with a 3 year warranty.

ICEMAN CARBURETOR ICE DETECTION SYSTEM

Fits into a 2-1/4" or 3-1/8" instrument cut-out (or optional bracket) on the panel. The system works on normal 12 or 24V aircraft electrical systems. No temp gauge, no worries about humidity, no graph. Enables an interface with the audio panel, effectively "piping" the ice alert warning sound right into the headset. The ICEMAN is a sealed, solid state unit weighing only 5oz and is currently approved by the FAA in the United States, certified by the CAA, by Transport Canada, and validated in Australia. Probe is included with the system. The Iceman is approved for most general aviation aircraft. Approval list available on request

ARP CARBURETOR ICE DETECTION SYSTEM

Made in USA. Available in three (3) different mounting configurations (Panel Mount, Remote Mount and Universal Mount) thus providing flexibility for any aircraft installation. GIVES UP TO 5 MINUTES WARNING TIME by illuminating a RED visual ice warning light. LIGHT WEIGHT less than 13 ounces. SIMPLIFIED INSTALLATION keeps installation cost down - approx. 1 to 3 man-hours. WARRANTY 3-years on Electronics Box and 1-Year on Probe. FAA-STC SA489EA APPROVED for normal, utility and acrobatic airplanes and helicopters equipped with Continental, Franklin and Lycoming type engines and Precision Air-Motive (Facet or Marvel-Schebler) MA-2, MA-3, MA-3A, MA-3SPA, MA-4, MA-4-5, MA-4SPA, MA-5, MA-6, MA-6AA and HA-6 series carburetors. Installation on other aircraft not specified on the STC may be performed via FAA Form 337. FAA-PMA APPROVED for installation on Type Certificated aircraft.

FLIGHT DATA SYSTEMS AFF-30 FUEL COMPUTER

Designed for the experimental aircraft owner who wants instantaneous flight information previously reserved only for transports and private jets. The Air Data Computer function features complete Winds Aloft information, Airspeed information including True Airspeed and Mach number, Altitude information such as Density Altitude and Vertical speed, and both Total and Saturated Air Temperature .Complete with GPS communication enabling it to display fuel computer data. The Performance Computer function calculates, instantaneously, Percent Horsepower based on the engine manufacturer's power chart. It also provides backup Tachometer and Manifold Pressure indications. Compatible with most handheld and panel mount GPS units.....P/N 10-03154

ENGINE GAUGES

28 VOLT K.M.C 2" OIL TEMP. GAUGE

Housed in a 2" diameter case, this top quality Kelly Manufacturing Co. oil temperature gauge is operated by an MS28034-1 resistance bulb and is available in °C or °F scale. Size: 2" dia. x 3.12" long. Wt. 4lbs; Power: 28VDC Connector: MS3112E8-4P. Add -C or -F to part no. for °C or °F.
Gauge only round.....P/N 10-02077.....

Resistance bulb.....P/N 10-00953.....
Square bezel.....P/N 10-00943.....

K.M.C 2 INCH TEMP/OIL PRESSURE GAUGE

High accuracy 2" pressure gauge that qualifies per mil-g-7734c, and has standard wet-line connection. Oil temperature is sensed by a MS28034-1 resistance bulb. Dimensions: 2-3/8 X 2-3/8 X 2 Weight: .5 lbs. Power: 0 to 200 PSI & 0-300 PSI..... P/N 10-02075.....
Ms28034-1 Resistance bulb..... P/N 10-00953.....

COMBINATION MANIFOLD PRESSURE FUEL FLOW GAUGE

This space saving 3-1/8" gauge provides manifold pressure (10"-50" Hg) and fuel flow (4-36 GPH). New manufacture by United Instruments. Direct connections. No transducer required.P/N 10-10200.....

2-1/4" UMA MANIFOLD PRESSURE GAUGES

Manifold pressure is one factor used to obtain correct power setting of the engine. The indicators are temperature and altitude compensated. Matte-white dials. Units are new. Manufactured by UMA.

KELLY MANUFACTURING TORQUE INDICATORS

Our Torque Indicators are a wet line, direct reading bourdon tube type instrument, housed in a 2" diameter case. Unit can be calibrated over a wide range of PSI input to direct read torque. Units can be furnished to your specifications. Indicate needed pressure input and pressure-to-torque conversion. This unit cannot be damaged by oil back up in vent line. DIMENSIONS: 2" diameter x 2.125" length, Weight: 0.4 lbs, Power: Wet line direct reading pressure gage

UMA PRESSURE SENDERS

UMA's pressure senders offer high reliability and accuracy at an affordable cost. They use precision solid state sensors and are designed for rugged use in just about any environment.

UMA 1-1/4" ENGINE INSTRUMENTS

Monitor your engine's vitals with a full line of space saving 1-1/4" engine instruments with 240 degree analog sweep. These instruments allow you the opportunity to utilize panel space without compromising readability. No longer do you have to decipher cluster gauges or push buttons for readings or try to concentrate on flashing numbers. These premiere UMA instrument are electronic and can be powered from 14 or 28 volts. Signals are acquired from remote mounted sensors, processed and displayed on analog dials with easy to read markings. Each gauge uses rugged aircore meter movement for vibration resistance and repeatability. Each gauge can be placed in a 1-1/4" diameter hole and mounted behind the panel with (4) 6-32 screws. They can be cluster mounted as close as 11/2" centers.

STREAMLINE • STACKABLE • EASY TO READ • RUGGED DESIGN

KELLY MANUFACTURING CO. INSTRUMENTS

KELLY MANUFACTURING CO. AMMETERS

12-1100 Ammeters - This ammeter is similar to 12-1200 series except that zero amps are positioned at the left of the scale. To be used with 50 MV shunt. Dimensions: 2-3/8 x 2-3/8 x 2. Weight: .4 lbs approx. Voltage: 14 or 28 VDC

12-1200 Ammeters - Moving coil type, designed for aircraft use. Requires 50 MV shunt (12-902 series). Dimensions: 2-3/8 x 2-3/8 x 2 Weight: .4 lbs approx. Voltage: 14 or 28 VDC

| Model No. | Range (Amps) | Part No. | Price |
|-----------|---------------|----------|-------|
| 12-1100-1 | 0 to 30 amps | 10-02555 | . |
| 12-1100-2 | 0 to 60 amps | 10-02556 | . |
| 12-1100-3 | 0 to 80 amps | 10-02557 | . |
| 12-1100-4 | 0 to 120 amps | 10-02558 | . |
| 12-1100-5 | 0 to 150 amps | 10-02559 | . |

KELLY MANUFACTURING CO. VOLTMETERS

| Model No. | Range (Amps) | Part No. | Price |
|-----------|--------------|----------|-------|
| 12-5000-1 | 0 to 16 VDC | 10-02567 | . |
| 12-5000-2 | 0 to 30 VDC | 10-02568 | . |
| 12-5000-3 | 0 to 60 VDC | 10-02569 | . |
| 12-5000-4 | 0 to 100 VDC | 10-02570 | . |
| 12-5000-5 | 0 to 200 VDC | 10-02571 | . |

KELLY MANUFACTURING CO. SHUNTS

For use with ammeters and voltmeters with a 50 MV rating. Dimensions: 2 x 1-1/4 x 1-5/8 Weight: .5 lbs approx.

| Description | Model No. | Part No. | Price |
|------------------|-----------|----------|-------|
| Shunt - 30 amps | 12-902-1 | 10-02574 | . |
| Shunt - 50 amps | 12-902-2 | 10-02575 | . |
| Shunt - 55 amps | 12-902-8 | 10-02576 | . |
| Shunt - 60 amps | 12-902-3 | 10-02577 | . |
| Shunt - 75 amps | 12-902-4 | 10-02578 | . |
| Shunt - 80 amps | 12-902-6 | 10-02579 | . |
| Shunt - 100 amps | 12-902-11 | 10-02580 | . |
| Shunt - 120 amps | 12-902-9 | 10-02581 | . |
| Shunt - 125 amps | 12-902-5 | 10-02582 | . |
| Shunt - 150 amps | 12-902-10 | 10-02583 | . |

KELLY MANUFACTURING CO. LOW VOLTAGE WARNING SYSTEMS

An amber light will come on at the moment of low voltage condition which will inform the pilot of attention needed to the alternator, generator, or voltage regulator. Any of these conditions allowed to continue will result in a weak or completely discharged battery condition and loss of radio and electrical equipment. Indicator light features a built in dimmer and press to test with amber lens. Lights will trigger at 13 volts for 14V systems and 25 volts for 28V system. Accuracy, plus or minus 0.2 volts. Size: 1/2" Dia. 3" Depth required behind panel. Weight: .2 lbs., Power: less than 1/10 amp. Fuse supplied with kit.

RCA40A-6

RCA40A-6 - 2" Prop Tachometer, Green Arc from 0 RPM to Red Line at 1700 RPM

RCA40AB-07

RCA40AB-07 - 2" Prop Tachometer, Lighted, Green Arc from 1400 RPM to Red Line at 1700 RPM.

RCA41A-07

RCA41A-07 - 2" Percent Tachometer, Type MU-1 (MIL 25623A)

Many years of experience were drawn upon in the design and development of these tachometers. Only the best time tested and field proven features were used. These instruments use a three phase alternating current synchronous motor powered by a remote tach generator. The simplicity of design results in a twofold gain: increased reliability and ease of overhaul. Dimensions: 2" diameter x 5". Weight: .7 lbs. Power: Tach Generator, MIL-G-9398. Connector: MS3106A-14S-5S

HOUR METERS – ENGINE GAUGES

HOBBES HOUR METERS

The Quartz + series of hour meters provide performance and reliability. Features include a highly reliable drive mechanism and odometer gear train combined with the accuracy of quartz crystal timing. Accurate to +/- 0.02% from -40° to 185°F. Total digital quartz readout is 9999.9 hours. Easy-to-read white numerals on black face dials. Sealed against dirt and moisture. Meets requirements of spec. MIL-L-3971B. Power: 10 – 32 V DC. Models 85094, 85001 and 85011 read "Total Hours". Model 85012 reads "Flight Hours".

- Hobbs Hour Meter 85094 + P/N 15000
- Hobbs Hour Meter 85001 + P/N 15001
- Hobbs Hour Meter 85011 + P/N 15006
- Hobbs Hour Meter 85012 + P/N 15007

PRESSURE SWITCH FOR HOBBS HOUR METERS Normally open. Closes at 4 PSI. Single circuit with 2 insulated terminals. Switch has silver contacts enclosed in weatherproof case. 1/8" male pipe thread connection.

- Water Compatible Pressure Switch for Rotax engines. P/N 10-00813
- P/N 10-00326

TEE CONNECTOR - For pressure switches with 1/8" male pipe threads. For 1/4" O.D. oil pressure lines. P/N 10-13300

DATCON HOUR METERS

- Model 876 12V P/N 56458-4

TINY TACH TACHOMETER/HOUR METERS

Tiny-Tach is an affordable, accurate, self-contained tachometer/hour meter. Displays RPM while the engine is running and total engine time when the engine is off. The unit is waterproof, shock resistant, and has a built-in battery that lasts up to 8 years. Tiny Tach can be mounted easily using 2 mounting tabs or double sided tape.

Model 2C is used when there is one spark plug firing on each revolution of the crankshaft. P/N 10-24420

Model 4C is is for engines which have a spark every two revolutions of the crankshaft such as those with a distributor driven crankshaft. P/N 10-24430

Model 1C is for twin cylinder engines with a spark firing every 180 degrees of the engine crankshaft.....P/N 10-24440

FALCON VOLT METERS

Falcon Gauge Volt Meters are 6-16V and are available in 2-1/4" and 2" Round.

ENM VIBRATION ACTIVATED HOUR METERS

Features 6-digits with an hour glass as a running indicator - operates only when engine is vibrating. Install anywhere with no wired connection or power source to operate. Internal battery supplies all the necessary power for the gauge to operate for years of service. Total operating hours are always shown on the LCD display. Compact tamper-proof meter is sealed against the environment to provide years of service.

- ENM Hourmeter Vibration P/N ENMV
- ENM Hourmeter DC Power P/N ENMDC
- ENM Hourmeter AC Power P/N ENMAC

UNIVERSAL DIGITAL TACH/HOURMETER

Now both a digital tachometer and an hourmeter in the same low cost and small size package! No power required yet there is a large 7 segment LCD display. Solid state electronics with quartz crystal technology make this instrument highly reliable. Easy to install - just wrap the attached wire around your spark plug cable. The case is completely sealed, it operates in a wide temperature range and the service interval is programmable..... P/N TLPT14

CURTIS HOURMETER

All solid state. Mount from front or back of panel in 1 3/8" by 7/8" hole. Requires 12 VDC.

- P/N CUR701

VOLTMETERS

These new manufacture voltmeters offer accuracy, rugged construction, and contemporary styling. Made in USA. 2 1/4" Range:

- 9-16V P/N 10-14620
- 20-32V P/N 10-02064

AMMETERS

These new manufactured ammeters offer accuracy, rugged construction, and contemporary styling. Made in U. S. A. Furnished with shunt.

- 0-60 (0 center)..... P/N 10-14655
- 0-80 (0 center)..... P/N 10-14660

KOBRA TACH/HOUR METER

This tiny and portable RPM meter and hour meter unit is chip controlled, fully programmable, and is suitable for both two and four stroke engines: one product fits all engines. It keeps in memory the max RPM and the time the engine has been running: both values are resettable. Its two small batteries last for years before needing to be replaced. A strong velcro for fixing is included. Features: * Velcro set for attaching the RPM-H * 2m cable * Batteries Included * One product fits all engines in the market thanks to programmable chip * Battery can be replaced, virtually is a life long product * it registers max RPM of the life of the engine, which are resettable. P/N 10-03573.....

ONE TOUCH DIGITAL TACH CHECK

This digital LCD tachometer reads 2, 3, or 4 blade props very accurately. Very easy to use and features auto-shutoff and 10 RPM readout. P/N 10-00749

DIGITAL FLAP INDICATOR

Early-model Cessnas originally utilize older-style, wire-wound transmitters. These transmitters are located in the wing, where they are exposed to humidity and extreme temperatures. After many years in such harsh environments, these transmitters become worn and corroded, causing them to fail or become intermittent.

Owners have been plagued with high maintenance costs, difficulties obtaining replacement parts, as there are compatibility issues the various transmitters and the gauges. The Visual Instruments Flap Indicator system provides a means for owners of these older aircraft to upgrade their troublesome indicators to a modern, more reliable design. The system includes a new transmitter, a modern digital display, and all parts necessary to perform the upgrade. The new display incorporates a color LED bar graph. The appearance is similar to flap indications shown on modern glass cockpits. Positions of more than 10° flap are indicated in a different color. This allows for easy identification during an emergency procedure such as a balked landing (go-around). The LEDs are very viewable from a wide angle. This is particularly useful since the indicator on many Cessna models is located on the right side of the panel. The display automatically adjusts to the ambient light for IFR or night operation. The Flap Indicator system includes all necessary parts and typically takes a mechanic approximately 2 hours to install. 5 year factory warranty. STCd for installation on early model Cessna 172s, 182s, 205s, 206s, & 210s. P/N 10-00240

INSTRUMENTS

INSTRUMENT MOUNTING PODS

An economical, high-quality, easy-to-install solution to your instrument mounting problems. Made of vacuum-molded white and black ABS plastic with attractive black matte ABS faces. The white pod may be easily spray-painted with acrylic enamel to match your aircraft. Two-piece mounting brackets fit snugly around 1" tubing, secured with screws provided. Available for 2, 3, 4 or 5 instruments with the face precut and mounting holes drilled for either 2-1/4" or 2" instruments. Blank face plates also available. May be used horizontal or vertically. When you order, specify either 2-1/4" or 2" instruments holes or blank face plate. Instruments not included.

LC-6 LIQUID CRYSTAL CHRONOMETER

The LC-6 is a 5-function, liquid crystal display, aircraft quartz chronometer. All functions contained in a single Large Scale Integrated Circuit (LSI) bonded directly to a printed circuit board. Features 6-digit local time or GMT stopwatch, 100-hour remote-activation timer, presettable down-counter. Unit mounts into standard 2.25" panel cutout, back-lit, may be wired into aircraft instrument panel lighting system (14 or 28V). P/N 10-15503.....

YOKE MOUNT FLIGHT CLOCK

Battery-operated quartz aircraft clock reads out 12 or 24 hour formats in bright digital display, and has stopwatch & alarm features. Includes yoke attachment for mounting directly in front of the pilot, and the yoke clip holds charts, approach plates, etc. Uses one watch battery (included). 1yr warranty. A great clock & approach timer.

Flight Clock (for Piper).....P/N 13-31200.....
Flight Clock (for Cessna & all others).....P/N 13-31210.....

AVIATOR'S 5-IN-1 FLIGHT TIMER

5 timers in one package! A combination of 12/24 hour digital chronometer, plus stopwatch, plus 3 countdown timers is about as close to timed maneuver perfection as a pilot can get. Large LCD digital readouts and large push-buttons make reading and operating easy. Memory stores

each waypoint, tank change or approach count-down preset. When time is up, timer element flashes and counts up. The Flight Timer Amplifier is very compact and includes a speaker volume control & external output jack for audio annunciation.

PRECISION QUARTZ AIRCRAFT CLOCKS

Designed for accuracy, these precision clocks are manufactured to meet rugged aircraft environmental standards. High-quality, solid state quartz movement and a variety of lighting options. Come with a factory one year limited warranty. FAA/PMA approved. Voltage: 10-32 VDC. Current: 2.3 milliamps @ 14V. Wt. 5 oz. Fits 2-1/4" panel hole.

Standard Electric Clock.....P/N 10-00459.....
Lighted Electric Clock (14V).....P/N 10-00460.....

SUPERCLOCK FROM ELECTRONICS INTERNATIONAL

Displays local and Zulu time. May be set to display in a 12 or 24-hr format. A 10-year lithium battery keeps the clock running even if the aircraft battery is removed. Displays an Up Timer. This Timer will start running when the engine is started. In this manner the Timer acts as an automatic Flight Timer. The Up Timer may be started, stopped or reset. A Recurring Alarm may be set to alert you at appropriate time intervals. Example: If the alarm is set for 30 minutes, you will get an alarm at 30 minutes, 60 minutes, 90 minutes, etc. This alarm can be used to remind you to check your fuel level or switch tanks at set time intervals. Displays a Down Timer. This Timer counts down from a programmed start time. The Down Timer may be started, stopped or reset. Warning lights above the LCD display will blink if the Up or the Down Timer times out. Displays an Engine Timer. This Timer acts as a Hobbs Meter. When the engine starts, the Engine Timer will run. The Engine Timer displays total engine time in hours, tenths and hundredths of an hour. Specifications: 2-1/4" mount. 3.65" Depth. 10 Oz. Unit. Viewable in direct sunlight. Backlit for night operation. Operates from 7.5 to 35 volts at .3 amps.

P/N 10-01612.....

SUPERCLOCK/ALTITUDE ALERT FROM ELECTRONICS INT'L.

Reads your Altitude Encoder and displays your current altitude as seen by ATC. Display indicates when your current altitude is above or below your Programmed Target Altitude. A "Level off Alarm" occurs as you approach your Programmed Target Altitude. A "Deviation Alarm" occurs if you deviate from your Target Altitude. A Programmed Approach Altitude may be set to alert you when you have reached MDA, DH, pattern altitude, wheels down altitude or any altitude for which you wish to set an alert. Displays Density Altitude based on your current OAT reading. Displays OAT. May be toggled between degrees F and degrees C. A Programmable Timer may be set as an "UP" or "Down" counting Timer. When set as an "UP" Timer, the Timer will start automatically when your current altitude reaches 300 feet above the ground. A Recurring Alarm may be set to alert you at appropriate time intervals. Example: If the alarm is set for 30 minutes, you will get an alarm at 30 minutes, 60 minutes, 90 minutes, etc. This alarm can be used to remind you to check your fuel level, engine instruments, course, etc., at set time intervals. Displays Local and Zulu Time. The Local Clock may be set to display in a 12 or 24-hr format. Meets FAA requirements for a clock. Specifications: 2-1/4" mount. 3.65" Depth. 10 Oz. Unit. Viewable in direct sunlight. Backlit for night operation. Operates from 7.5 to 35 volts at .3 amps.

P/N ASC-5.....

QUARTZ ELECTRIC AIRCRAFT CLOCKS

These clocks are constructed for easy installation in a wide variety of aircraft. The rugged quartz movement is accurate within 2 seconds in 24 hours under normal operations and runs accurately in temperatures from -30°-180°F. The clock kit includes a power harness, mounting screws and installation instructions. The clock features adjustable red elapsed time hands. **Not for certified aircraft.**

AEROSPACE LOGIC DT1-F CLOCK/OAT

The Aerospace Logic CT1 Now you can have everything in one place! The CT1 Clock and Outside Air Temperature instrument includes a feature-rich aircraft chronograph with constant viewable Outside Air Temperature - all in one 2 1/4" mount instrument. For experimental aircraft. Programmable Features - CT1 allows you to configure the instrument just the way you need it. All clock functions are available in both 12 and 24 hour format with instant indication of the current operating format. Local time is calculated as an offset from UTC. Just set your offset. Programmable to 23 hrs/30 min. either side of the date line.

Other features: • MultiFunction Flight Timer • Down Timer • Outside Air Temperature • Hi-Tech Temperature Sensor • TSO & STC Certificate pending (Oct 2005) • Dimensions: 2.45" X 2.45" X 1.6" • Weight: 8oz. • Power: 6V-40VDC P/N 10-01719.....

FALCON MULTI-FUNCTION DIGITAL CLOCK

Three clocks packed into one convenient, easy to use clock, providing the pilot with standard time, flight time and elapsed time. The bright red LCD display is easy to read day or night by adjusting brightness control. Regular time recorded in hours, minutes, and seconds. Four switches provide control and mode selection. Fits standard 2-1/4" instrument cutting hole. Includes Connector. P/N 10-00370.....
Replacement Connector.....P/N 11-04970.....

DIGITAL VOLTMETER OUTSIDE AIR TEMPERATURE MODEL 303

- OAT (F) & OAT (C)
- Aircraft Voltage with Flashing Alarm
- Bright Sunlight Readable Displays
- Input Voltage 11 TO 28 Volts.
- Complete with 12 FT. Digital Probe.

| Description | Part No. | Price |
|--------------------------------------|---------------|-------|
| O.A.T. F & C / Voltage (Front Mount) | 10-24565-14-1 | . |
| O.A.T. F & C / Voltage (Rear Mount) | 10-24565-14-2 | . |

DIGITAL VOLTMETER AMMETER MODEL 475VA/475VAA

M475VA

- Low current drain .001 amp
- Plus 100.0 volt D.C. range
- 1.3" case depth
- Sunlight readable
- One tenth volt resolution

M475VAA

- Plus or minus 150.0 amp range
- 2 1/4 Standard mount
- 14 or 28 volt back lighting
- One tenth amp resolution

The M475VAA has dual shunts and can read voltage and two current flows (M475VA has a single shunt). The 475VA and the 475VAA were designed for low current drain and are also used in standby and emergency battery packs. One example of safety is if the alternator fails, you can monitor the load current out of the battery.

| Description | Part No. | Price |
|--|----------|-------|
| Volt/Amm Meter 14V Lighting (Single Shunt) | 10-03319 | . |
| Volt/Amm Meter 28V Lighting (Single Shunt) | 10-03320 | . |

| Volt/Amm Meter 28V Lighting (Double Shunt) | 10-03322 | . |

TACHOMETER RIGHT ANGLE DRIVE

Attach this 90° adapter to male thread on the recording tachometer & female end of the tach cable. Makes installation possible in "impossible" places. May also be used as a reversing drive by removing plug and replacing it with threaded fitting opposite it.

Screw plug in opening left by fitting removed. 1:1 Ratio.

P/N 10-00815.....

ENGINE RIGHT ANGLE DRIVE

Female end attaches to engine tach drive outlet. Male output end accepts standard tach cable female nut (7/8-18 thread). Eliminates bending of tach cable at the engine in cramped installations. Designed for heavy-duty service.

Gears and shafts are of heat-treated alloy steel. Oil impregnated sintered bronze shaft bearings. Cast iron case and fittings. With lubricator fitting for greasing. 1:1 ratio.

P/N 10-00814.....

DUAL TACHOMETER DRIVE

Adapter screws to the male thread on the back of the tachometer. The two tachometer cables screw onto the opposite sides of the dual adapter. 1:1 Ratio.

P/N 10-01445.....

TACHOMETER CAP

This Tach Cap can be used to close off the tachometer drive of a Lycoming engine when an electronic tach drive is being used off the magneto or electronic ignition. 7/8" thread and Viton (R) O-ring to seal.

P/N 10-06754.....ea

DIGITAL OUTSIDE AIR TEMPERATURE

MODEL 301

- OAT (F)
- OAT (C)
- Bright Sunlight Readable Displays
- Input Voltage 11 TO 28 Volts.
- Complete with 12 FT. Digital Probe.

TACHOMETER CABLES

Custom made cables to exact specifications. Over-length cables can cause problems - order one that fits the installation. Select the proper length from the listing below, but measure old tach cable to verify length in chart is correct for your aircraft, as tach cables can vary from aircraft to aircraft. Measure original cable from end of Ferrule to end of Ferrule when fully extended. **Left lay is standard on all stock tach cables.** Tach Cables have male ends only. 7/8-18 on one end and 5/8-18 on the other. No female ends. When ordering special length tach cables specify aircraft, engine make, model & dash number.

Tach Cable Ass'y - Lengths to 4ft (Add \$2.50/Ft. for Longer Lengths)
4 foot length

Inner Cable Only - Length is 4ft (Add \$0.90/Ft. for Longer Lengths)
P/N 10-22400

TACHOMETERS

MITCHELL MECHANICAL TACHOMETERS

3-1/8" Tach

In 1985 AC discontinued production of the popular "RT" series of mechanical tachometers. We now offer Mitchell tachometers to fill this void. These tachs feature exceptional accuracy and reliability. Mitchell tachs come with a 2-year factory warranty. Range on all models is 500 - 3500 RPM. Determine the correct part number for your application from the chart below, and order by our part no. from the charts shown here. All Mitchell tachs are FAA approved for certificated aircraft. \$30.00 for custom range marks (specify ranges). \$12.50 to set hours (specify hours)

SLI AIRCRAFT TACHOMETERS

SL1010-43000-SERIES

For three decades, Superior Labs, Inc. (SLI) has supplied the aircraft OEM's with the finest quality and most reliable mechanical tachometers in the industry for new production aircraft and can be customized for a variety of aircraft applications. These are now available to the public as aftermarket tachometers.

Specifications:

- Accuracy to within ± 25 RPM
- Diameter 3-1/8"
- Weight: 13 Oz.
- Range 0-3500 RPM
- Length 3-1/2"
- Two Years Warranty

TACHOMETERS – EGT/CHT SYSTEMS

UMA 2-1/4" ELECTRONIC TACHOMETERS

These tachs have high resolution and easy to read displays. The analog model has a 250° sweep which provides great resolution in both the 3500 & 7000 ranges. The digital model has a bright LED display. Separate power source required. All tachs require power from a 14 or 28V system. Installations are simple with instructions included.

3500 ANALOG TACH - Lyc./Continental (to replace mechanical tachs) Current: 37 milliamps Size: 2.25"rnd. X 2.75"deep
 0-3500 RPM, 4 cyl., Pulses:1.. P/N 10-02140

UMA 3-1/8" ELECTRONIC TACHOMETERS

These 3-1/8" electronic tachometers use a 250° sweep meter movement to withstand high levels of vibration and register flight time accurately. Starting at 1800 RPM and higher, not just cruise speed. The hour meter counts flight hours at RPM settings of 1800 & higher. Power: 12-28VDC. 2-year warranty.

| Range | Description | Part no. | Price |
|------------|--|----------|-------|
| 0-7000 RPM | For Rotax 912 Engine | 10-00119 | . |
| 0-3500 RPM | *To replace Mechanical Tachometer (reads CW or CCW; B&W Dial Only) Furnished w/mechanical sender | 10-00120 | . |
| 0-3500 RPM | *To replace Mechanical Tachometer (Green Arc 500-2700 - Red 2700) Furnished w/mechanical sender | 10-00121 | . |

* P/N 10-00120, 10-00121, 10-24870, & 10-24885 tachs eliminate the problems associated with mechanical tach cables, and the sending unit is a direct replacement for the tach cable. All models are analog style tachs with hour meters and can read RPM for either clockwise or counter-clockwise revolutions. Sender included. **Slick Mags Only

WESTACH TACHOMETERS

Westach Tachometers connect to primary lead of magnetos. No sender required.

UMA ELECTRONIC TSO'D TACHS

Owners of Lycoming & Continental powered airplanes now have an electronic, analog alternative to the old cable driven tachometer. The new UMA tach is certified to FAA TSO C49b standards for fixed wing aircraft. The system uses a tach sender mounted on the engine in place of the mechanical cable and is connected to the indicator with a single, 3-conductor cable. The 3 1/8" indicator utilizes a high torque pivot and jewel movement. The hour meter can be factory set to start at any desired RPM point. This unit gives the pilot the analog display that is easiest to scan and provides electronic accuracy and ease of installation. Custom dial markings in color & internal Electro-Luminescent lighting are available at extra cost. UMA manufactures a complete line of TSO'd & non-TSO'd gauges & instruments in the USA.

| UMA Model# | Range | Dial Marking | Part No. | Price |

P-1000 DIGITAL TACH BY HORIZON INSTRUMENTS

Provides diagnostic and performance information about the aircraft engine and ignition system not normally available with current mechanical or electrical/electronic tachometers. Horizon instrument's P-1000 eliminates problems resulting from inaccurate tachometers: engine operation outside of allowable RPM ranges, reduced engine life, reduced fuel economy, reduced power, or propeller overspeeding - all of which can result in hazardous flying conditions. The P-1000 is STC approved for primary installation, not just secondary. Also incorporated into the P-1000 is a highly accurate engine hours clock, and an RPM Trap memory that recalls the highest RPM achieved by the engine. Both features are enabled with a touch of a button. The P-1000 is housed in a rugged, light-weight aluminum standard 3-1/8 inch "MS" style case. Installation is simple. Only four wires are connected, all of which are located under the panel! The P-1000 is the ideal aircraft tachometer, for upgrades or new designs, providing the conscientious pilot with high reliability, accurate RPM reading, and valuable diagnostic information..... P/N 10-01592.....

TRU-TACH II DIGITAL TACHOMETER

An inaccurate tachometer can waste performance, fuel and engine life. Mechanical tachometers are notoriously inaccurate and should be checked at each annual and 100 hour inspection or any time aircraft performance is in question. The TruTach II Optical Digital Tachometer measures the true speed of your propeller from inside or outside the aircraft. Just point it at the propeller or rotor blades and TruTach II will directly display the rotational speed with a resolution of 1 RPM. No connection to aircraft systems is required and measurements may be made at any speed setting from 240 to 70000 RPM. Direct display is available for 2, 3, 4, and 5 blade propellers. Digital Signal Processing assures rock-solid display in single and multi-engine aircraft as well as helicopters. The compact 4-inch instrument weighs just 4 ounces and may be used with fast turning ultra-lights and kit plane propellers. Just turn it on, select the number of propeller blades and point. Automatic shut-off turns the unit off if you forget. The TruTach II includes an Impact resistant case and standard 9 volt battery providing 150 hours of operation. P/N 10-01021

MICROFLIGHT DUAL TACH/EGT

2" Round Gauge. Tachometer - Universal for single or dual ignition. EGT range: 700-1700°F. EGT probe (clamp type) sender included P/N 10-01628

ALCOR EGT & CHT SYSTEMS

BASIC EGT & CHT SYSTEMS

Alcor EGT and CHT gauges are fully TSO'd aircraft quality gauges which will provide precise monitoring of engine temperatures. Some of the most popular systems are shown here, and all systems are available. Request quotation on unlisted models.

2-1/4" GAUGES

3-1/8" GAUGES

BASIC SYSTEMS – Basic system kits include the 2-1/4" instrument, one lead and one probe to monitor the EGT or CHT for a single cylinder.

ANALYZER SYSTEMS – Analyzer systems include instrument, all leads, switches and probes to monitor the EGT or CHT for every cylinder.

| BASIC SYSTEMS | | | ANALYZER SYSTEMS | | |

2-1/4-INCH DUAL INSTRUMENTS SAVE PANEL SPACE (SUPREME SPACE SAVERS)

TWO INSTRUMENTS IN ONE 2-1/4" SIZE CASE - PERFECT FOR THE HOME BUILDER

All pressure instruments come complete w/pressure senders only (matched to instrument). On all other instruments, order senders at bottom of page.

DUAL EGT-CHT
700-1700°F EGT
100-700°F CHT
P/N 2DA1 .

DUAL EGT
700-1700°F
P/N 2DA2 .

**DUAL OIL PRESSURE
OIL TEMPERATURE**
0-80 PSI/100-260°F
P/N2DA3MM .

Complete w/ oil pressure sender.

**DUAL TACHOME-
TETER VOLTMETER**
0-5000 RPM/6-16V
P/N 2DA6 .

**DUAL
TACHOMETER**
0-5000 RPM
P/N 2DA5-2 .

DUAL FUEL LEVEL
Uses capacitance type
senders. 5V output.
P/N 2DA4V .

WESTACH INSTRUMENTS

FAA-APPROVED WESTACH INSTRUMENTS FOR CERTIFICATED AIRCRAFT

Westach Instruments now has FAA approval on all the instruments listed below. These gauges are fully approved for installation in factory aircraft, so the weight and cost savings of Westach gauges can now be enjoyed by owners of production aircraft as well as home builders. All systems are complete with instrument (internally lighted), senders and leads. The multi-position CHT and EGT systems also include sender selector switch with wiring. The EGT and CHT systems are furnished with #713-2DVK and #713-5W senders. If threaded senders are preferred, #713-4D and #713-7D senders can be furnished for an additional \$35.00 each. The EGT gauges have an adjustable pointer. All of these gauges fit 2-1/4" panel hole.

| Description | Model | Part No. | Price |

WESTACH ROTOR TACH

For the rotorcraft pilot, the rotor tachometer is a valuable aid to safe flight. Utilize a state-of-the-art Hall-effect sensor to accurately gauge rotor RPM based on the rotational positions of a series of magnets which are easily mounted on the rotor shaft or hub. Sensor and magnets are supplied with the gauge along with complete assembly instructions. 12 volt DC power required. Square style, 2 1/4 inch.

Terminals on instrument end of lead are plain eye type (one for No. 8 screw and one for No. 10 screw).

IN

ISS 2-1/4" ENGINE GAUGES

This quality line of engine gauges will provide an affordable engine monitoring package for experimental aircraft. Hundreds of these gauges are flying today in various homebuilts worldwide. Used extensively in Vans RV line of aircraft. NOTE: Our gauges do not include our company name or logo on the face.

FEATURES

- 270° Sweep Electric Gauges.
- High Quality Movements in Injection Molded Cases.
- Standard Aircraft 2-1/4" hole & mounting pattern.
- Internally Lit (12V only)
- Clear & sharp lettering with appropriate operating arcs & redlines screened directly on the face.
- Electric design uses transducers & senders. No pressurized fuel & oil in the cabin
- Wires attach with nuts (Included) to 6-32 studs on instrument. No spade fittings.
- Cases have Brass Inserts for the #6 Mounting Screws.
- No Need for Instrument "Grasshopper" nuts.
- Works with Standard Stewart Warner match transducers.

ENGINE INSTRUMENTS

QUALITY ROCHESTER GAUGE INSTRUMENTS

A fine line of electric instruments designed exclusively for aircraft use. Temperature compensated and guaranteed to 2% accuracy. Similar to units used in current Cessna, Piper and Beech aircraft. Standard 2-1/4" size with brilliant matte-white dials. Range markings add color and permit readings at a glance. Lighting fixture available. Recommended by Rutan Aircraft Factory for use in Long-EZ, Cozy, and similar home built using Lycoming engines. All instruments featured are for 12 volt systems. Lighting kit 105S3 fits all these gauges.

MITCHELL AIRCRAFT INSTRUMENTS 2-1/4" ELECTRIC GAUGES

Mitchell Aircraft Instruments is a high quality, economical line of gauges which is ideal for the homebuilt aircraft market. These electric instruments are lighted, allow easy installation, and feature a 2 year factory warranty. Order gauges and senders separately as shown. 12V operation unless other wise noted. Gauges fit 2-1/4 panel hole. For 24 volt operation, order P/N PE-111-4074 Resistors (\$3.50 each) for each instrument.

INSTRUMENTS

MITCHELL MINIATURE MODULAR GAUGES

This line of miniature engine gauges from Mitchell is ideal for a wide variety of general aviation applications. They measure nearly 1.5" square and are stackable. The modular design allows them to be plugged from the front of the panel. The units are internally lighted. Complete standard panels are also available as shown below.

* FAA Approved

** Do not use on Rotax. Use existing sender.

| Part No. | Gauge | Price |
|----------|-----------------------|-------|
| 10-10150 | Fuel* Pressure 15 PSI | . |

| PM-114-6002 | 10-25080 | 14MM CHT (VW. Rotax) | . |
| | 10-10184 | 45 AMP Shunt | . |
| | 10-10185 | 75 AMP Shunt* | . |
| | 10-02122 | Backplate w/ Pigtail | . |

* FAA Approved ** Do not use on Rotax. Use existing sender.

If individual gauges are ordered, the appropriate backplate with pigtail (\$9.95 each) must be ordered to mount and connect the gauge. If more than one gauge is ordered to be mounted together, it is a special order cluster that requires custom backplates as shown.

PRINCETON CAPACITIVE FUEL PROBES

- **Easy Push Button Calibration** - Simple push buttons make calibration easy and accurate. No sensitive screw adjustments to make. Place the probe in tank, connect power and press EMPTY. Fill tank and press FULL. Calibration is complete.
- **Steady Readings** - Digital filtering minimizes the effects of fuel slosh providing greater accuracy.
- **Proven Design** - Designed specifically for the aircraft that are subject to harsh environments, such as vibration, temperature, and electrical noise. Probes designed for industrial applications can fail under these conditions. Proven reliability with over 4 years of history.
- **No Moving Parts** - There are not any parts to wear out. Will not require future maintenance or replacement.
- **Compatible Fuel Quantity Gauges** - UMA P/N: 18-110-1C1 (P/N 10-01717), 18-210-1C1 (P/N 10-01717); Westach P/N: 20A4V (P/N 10-01255) & 2A7V (P/N 10-01246)

Mounting Options:

- **Unique Pressfit Installation** - Can be mounted in plastic tank by drilling a 1/2" hole. A rubber grommet is used to hold the probe in place.
- **Standard SAE 5-Hole Bolt Pattern** - A backing plate and seal are used to secure the probe to the tank. Standard Lengths of 12, 18, & 24 inches. Flange mount with standard SAE 5-hole pattern, or rubber grommet press fit. Probes may be shortened up to 1/2 of their measurable length. 0, 3, or 5 inch bendable section. 2 or 5 set points.

Ordering: (LL-BB-SS-MM)

LL - Length (12, 18, or 24 inches)

BB - Bendable Section (NB= non-bendable, 3B= 3inch, 5B= 5inch)

SS - Set points (2S= Empty/Full or 5S= Empty, 1/4, 1/2, 3/4, Full)

MM - Mounting method (PF= Press fit, FM= Flange Mount)

Example: A 12", non-bendable, 2 set point probe using a press fit mounting part number would be 12-NB-2S-PF

 5 gauge cluster (backplane only) P/N 10-01711
 6 gauge cluster (backplane only) P/N 10-01712

MITCHELL MODULAR GAUGE FRAMES

Modular gauge frames should be specified by part number plus identification of what function gauge (eg Oil Press., Ammeter, EGT) gets plugged in each location. Operating voltage of either 12 or 24 must also be specified. If operating voltage is not specified, 12 volt wiring will be provided. All mounting frames include backplane connectors pre-wired with labeled 18 inch leads

| Total Gauge Capacity | Configuration | Part No. | Price |

FALCON GAUGE FUEL QUANTITY INDICATOR

Falcon Gauge Fuel Quantity sender is an electronic capacity type. This sender is bendable and highly accurate with steady linear reading characteristics.

The 5V output senders can also be used with other brand 5V input gauges and EFIS systems. The 5V input gauges are available in single and dual range, with or without low level warning lights. The analog gauges with warning lights require the use of Falcon Gauge compatible senders, while the electronic type only require regular senders.

| Description | Model No. | Size | Part No. | Price |
|--------------------------------|-----------|---------|----------|-------|
| Single Gauge 5V Input | F2-001-5 | 2-1/4" | 10-02264 | . |

IN

MICRO - 1000 TACHS - FUEL MIZER

FUEL MIZER FUEL FLOW GAUGE

The Fuel Miser instrument, is a fuel flow gauge that is far more accurate than typical capacitance type gauges. This kit includes mounting bracket, reducer fittings and clamps and fits a 2" panel hole. This gauge is backlit and accurately measures the actual flow of fuel through the transducer and can handle a fuel flow rate of up to 45 gallons per hour. The turbine operates by means of a stainless steel shaft mounted in sapphire bearings. The transducer measures the turbine rotation by means of an infra red light which sends a signal back to the instrument. The gauge itself is menu driven and includes an audio and visual alarm that sends a signal when remaining fuel has dropped below a level that the user presets. In addition to displaying the remaining volume of fuel, this instrument displays the current fuel burn rate, the amount of fuel consumed on the current trip as well as the total amount of fuel consumed and can be incrementally adjusted for partial refueling. The gauge can be calibrated to measure in US gallons, imperial gallons, and liters. In the unlikely event that the turbine would malfunction it is fail-safe in that it will not retard fuel flow. The Fuel Miser cannot be used on an engine which has a return fuel line. Not STC'd. For experimental only and not for certified aircraft. Fuel Miser is furnished with installation manual and instructions P/N 10-00220

Note: Factory Warranty is 6 months from date of purchase.

FUEL FUNCTION:

Flow Range: Auto ranging 2.5–160 Liters/hour
0.5–43 U.S. gallons/hour
or 0.4–36 Imperial gallons/hour
Fuel Remaining: 0.999 selected units, non-volatile and resettable.

ALARM FUNCTION:

Fuel Remain alarm: Operates over full range
Alarm Signaling: Audible and visual

LOG FUNCTION:

Total Fuel Log: Auto ranging 0–999 liters, US gallons, or Imperial gallons, non-volatile & resettable
Trip Fuel Log: Auto ranging 0–999 liters, US gallons, or Imperial gallons, non-volatile & resettable

Features:

Mounting: Flush round bezel
Lighting: Red diffused lighting of keys and display
Units: Selectable in Liters, US gal., or Imperial gal.
Calibration: Front Panel adjustable
Current Drain: 70 mA (max.)

0-10,000 RPM DIGITAL TACH & HOURMETER

Records up to 9999 hours. May be either front or rear mounted. Uses an 8-yr internal battery. With 15' lead and rear-mount parts

TH200..... P/N 10-03424.....
TH201..... P/N 10-01630.....
TH202..... P/N 10-03425.....

TH201 App: Electronic Ignition - (1) spark fires per crankshaft revolution.
TH202 App: 4 Cycle Engines - (1) spark for every 2 crankshaft revolutions.
TH200 App: Ducati CDI - Twin Cyl. engines. Spark fires every 180° of crank shaft revolution.

TH200 SPECS

Model for twin cylinder engines with a spark firing every 180° of the engine crankshaft. Jet Skis generally use 1C. Exception: 3 cyl. Jet Skis generally use our special '2X' model Multi 4 cyl. = 1c wrapped around coil wire.

TH201 SPECS

Standard Model, used on engines with one spark firing on each revolution of the crankshaft. 1 cylinder, 2 stroke (reads 1x/revolution) Honda engines 4-stroke w/electronic ignition & nopoints. 2C can also be used w/ 2cyl. engine.

TH202 SPECS

Model for engines which have a spark for every 2 revolutions of the engine crankshaft such as those with a distributor w/points driven from a camshaft. Kohler 'K' series is the only Kohler model firing this way. True 4-stroke with points & distributor, NOT the firing on the exhaust stroke.

MICROFLIGHT GAUGES

MICRO-1000 ENGINE GAUGES

Senders and probes are not included unless specifically noted. See over half of the page for senders, probes, and other accessories. 2" gauges are round. 2 1/4" gauges are square.

OIL PRESSURE ELECTRIC

MICRO-1000 oil pressure electric includes 1/8 NPT SDR.
 2 1/4" OP031..... P/N 10-01574
 2" OP030..... P/N 10-01572

OIL TEMPERATURE ELECTRIC

Includes 1/8 NPT Sender
 2 1/4" OT031..... P/N 10-01588
 2" OT030..... P/N 10-01586

HOUR METER

AC or DC Powered
 2 1/4" HO031..... P/N 10-01507
 2" HO030..... P/N 10-01506

DC VOLTMETER

2 1/4" VM031..... P/N 10-01641
 2" VM030..... P/N 10-01639

WATER TEMPERATURE

Includes 1/8 NPT Sender. All electrical gauges have air core movements.
 2 1/4" WT031..... P/N 10-01652
 2" WT030..... P/N 10-01650

AMMETER ±30 AMPS

2 1/4" AG031..... P/N 10-01319
 2" AG030..... P/N 10-01317

MICROFLIGHT SENDERS & ACCESSORIES

100# PRESSURE SENDER

HAS A 1/8" NPTF fitting.
 OP030.2..... P/N 10-01573.....

TUBING KIT

Nylon tubing with brass fittings.
 OP032.1..... P/N 10-01575.....
 OP032.2..... P/N 10-01576.....

KEY WEST REGULATOR

Advanced regulator/rectifier circuit provides steady 13.8 volt output regardless of load. Maximum output 220 watts, 16 amps. 10v signal pulse output for digital or MaxPac® tachs. Accepts AC input from 15 to 100 volts. Can be used with AC strobe. **Features:** * Extremely clean filtered DC output * Electronics designed to deliver 16 amps producing 220 watts * Efficiency: No "consumer" or "dummy" load required for proper operation * A beautiful and rugged lightweight package weighs just 16 ounces and is 3.5 x 2.5 x 1 inch * Protection from the environment: complete epoxy encapsulation to insure all-season operation * Ease of installation: crimp type ring terminals and wiring schematics provided with every unit P/N 11-03168.....

TEMPERATURE SENDERS

Single-station senders for water and oil temperature gauges.
 WT030.2..... P/N 10-01384.....
 OT030.2..... P/N 10-01587.....

SENDER ADAPTERS

Electric sender adapter. 3/8" NPT
 ADP04..... P/N 10-01311.....

METRIC ADAPTER

ADP06..... P/N 10-01313.....
 ADP07..... P/N 10-01314.....
 ADP08..... P/N 10-01315.....

FLOAT-TYPE FUEL PROBES

6-23" Probe. Adjustable, 6-23"; 240-33 ohms standard: 5-hole ASME pattern. Requires mounting kit. FGP031..... P/N 10-01489.....

UNIVERSAL PROBE MOUNT

Works well with plastic and other tank. Includes threaded attachment ring, gasket, and hardware. Standard 5-hole SAE pattern. FMK01..... P/N 10-01501.....

COLOR TINT LAMPS

Color tint lamp boots. Set of Boots. Changes your instrument backlighting to red for night flying. LB001..... P/N 10-01556.....

APPLICATION NOTE: Most current production Rotax® engines require 1/8NPT temperature and pressure senders.

MICROFLIGHT GAUGES

MICRO-1000 PYROMETERS & PROBES

CP131 EP131 EP130

Superior to any other type of pyrometer available. Unlike competing brands, these units are temperature compensated. That is, when the ambient temperature changes, MICRO-1000 pyrometers still read the same. And we guarantee that, when properly installed, these pyrometers will be accurate within 2%. Like other MICRO-1000 gauges, these units come with our standard 2-year warranty. Order gauges, probes, and extension leads separately.

NOTE: MICRO-1000 pyrometers are not compatible with other thermocouple probes. Order Micro-1000 Probes.

- 2% Accuracy • Easy-to-Read Dial • Backlighting • Standard
- Temperature Compensated • Shock & Vibration Resistant
- Designed & Built for Aircraft

MICRO-1000 EGT PROBES

- Weld-on Boss Type EP131 P/N 10-01477
- Clamp-on Type EP130..... P/N 10-01471
- Adjustable 8mm EP130R..... P/N 10-01475
- (for all Rotax w/factory Boss)
- Adjustable 1/8NPT EP132 P/N 10-01478
- Adjustable 1/4NPT EP133 P/N 10-01479

MICRO-1000 CHT PROBES

- 14mm CP130 P/N 10-00823
- 18mm CP131 P/N 10-01440
- 10mm CP132 P/N 10-01441
- 7-ft. CHT - Ext. Id. CPE130.07..... P/N 10-01442
- 15-ft. CHT - Ext. Id. CPE130.15..... P/N 10-01443
- 7-ft. EGT - Ext. Id. EPE130.07..... P/N 10-01480
- 15-ft. EGT - Ext. Id. EPE130.15..... P/N 10-01481

The CHT probe (above left) is a high quality Chrome/Constantan "E" type. A more expensive material than that of the more commonly found "J" type, the "E" type probe produces much greater accuracy at lower temperatures (less than 600°F). Extension wire is of the same material as the thermocouple to preserve the accuracy and temperature compensation qualities. NOTE: The 15' extension leads may be shortened up to seven feet. The EGT probes are high-quality Chrome/Alumel "K" types. Choose the weld-on boss type (above) for new engine installations. Choose the clamp-on type (above) to replace the existing probe. Order gauges, Micro-1000 probes and extensions separately. **Note: These are "K" type grounded probes, not for use on digital gauges. For use with Micro-1000 gauges.**

CHT

FUEL PROBE 24VOLT

The ELECTRONIC SENDING UNIT for FUEL, OIL, and POTABLE WATER tanks provides a continuous readout of the liquid level in your tank. The unit (which has no moving parts) consists of a sensor probe and an amplifier. The amplifier components, are encapsulated in an epoxy resin compound to seal out moisture and other contaminants which could affect the operation. The mounting plate assembly has the same 5 hole SAE bolt pattern mounting dimensions as the standard float sending units they replace. The meter (receiving unit) can be remotely located close by or in your dash. FUEL SENSOR PROBE (Gasoline or Diesel) - Constructed of concentric tubing. The tubes act as a capacitor that has one value in air (empty tank) and changes in value as the fuel level rises inside the probe. WATER SENSOR PROBE - The probe consists of a PVC tube with a bare stainless steel (ground) wire running along the outside and an insulated (sensor) wire through its center. The PVC tube is to hold the wires in place. The output to the meter changes as the water level rises on the sensor wire. The probes come in 12 inch increments and can be cut to any length down to the next lower increment. We prefer to build them your required size, however, for which there is no extra charge. It saves you from having to shorten and recalibrate the sender.

- Cork gasket for fuel probe kit..... P/N 10-03730
- P/N 10-03699

MICROFLIGHT GAUGES

STANDARD MICROFLIGHT ENGINE GAUGES

Standard gauges are a low cost solution for monitoring engine performance. The gauges on this and part of the next page are light-weight, inexpensive alternatives. These gauges are not temperature compensated; changes in ambient temperature will affect their readings. Unlike our MICRO-1000 gauges, they do require shock mounting. All gauges come with a 1-year warranty which covers any malfunction. Prices include probes with 4-ft. leads. Gauges leads may be extended with 18-gauge wire. "C" at end of P/N indicates temperature scale in degrees celsius.

AIRCRAFT DIGITAL INSTRUMENTS

ADI RH60-A TACHOMETER/HOUR METER GAUGE

The RH60-A RPM/Engine hours/Elapsed time gauge is a four digit digital display of engine RPM, total engine hours and elapsed time. The RH60-A works with any engine and can be driven from a wide range of tacho signal frequencies and amplitudes. Front panel calibration is provided for spot-on accuracy to +/- 1RPM. A separate engine hours countdown alarm can be set to remind you of upcoming oil change or 100 hr maintenance due. A high RPM alarm can be set, and the RH60-A keeps track of the maximum RPM seen. When activated, the RH60-A built-in 85dB alarm will sound and the display will flash. Five levels of backlighting can be selected from, and thirteen levels of display dampening. All calibrations, alarm values and max RPM are saved to a nonvolatile memory. Terminal C can be programmed as an External Alarm output if so desired. P/N 10-02879.....

ADI MAP60-A MANIFOLD PRESSURE GAUGE

The MAP60-A, Manifold Absolute Pressure Gauge provides an accurate digital display of your engine's intake manifold absolute pressure. Commonly found and used in high performance aircraft with constant speed propellers, and/or with boost devices such as super and turbochargers. The MAP60-A is set up to use the UMA 5-60 InHg absolute pressure transducer. The display will show manifold pressure in tenth of an inch increments, from 5.0 to 60.0 InHg. The LOW and HIGH user settable alarms can be set over the entire range. The HIGH alarm in this case might be set to alert the pilot to a "OVERBOOST" condition. When activated the built-in 85dB alarm will sound and the display will flash. The External Alarm output would most likely be used to activate an annunciator/warning "OVERBOOST" condition light. Five levels of backlighting can be selected and then all setup, and alarm values will be saved to a nonvolatile memory. P/N 10-02872.....

ADI DIGITAL PRESSURE GAUGES

The P60-A DIGITAL PRESSURE GAUGE, can be used to display ENGINE OIL(AO), DRIVE OIL(ADO), WATER(AW), or FUEL(AF) pressures in PSI or Bars. It has built-in calibration curves for most popular senders manufactured by VDO, Teleflex, and Stewart-Warner (sender not included). The sender type is easily selected with the front panel keys. LOW and HIGH pressure alarms can be set over the entire range of the instrument/sender. When activated the P60-A built-in 85dB alarm will sound and the display will flash.

Five different levels of internal backlighting can be selected, and then all setup, calibrations, constants, alarm values, sender type, and lighting level are all saved to a nonvolatile memory. Terminal "C" comes Factory preset to use as an External Alarm signal. This 5V,10mA signal voltage could be used in conjunction with the optional ER-1A electronic relay to control a backup/secondary piece of equipment (electric water pump / fuel pump) or simply used to illuminate a panel warning light. NOTE: Alarm functions must be activated or enabled to utilize them.

Engine Oil Pressure Gauge..... P/N 10-02874..... Drive Oil Pressure Gauge..... P/N 10-02875.....
Water/Coolant Pressure Gauge P/N 10-02876..... Fuel Pressure Gauge P/N 10-02877.....
Hydraulic Pressure Gauge (with sender)..... P/N 10-02878.....

ADI DIGITAL TEMPERATURE GAUGES

The T60-A DIGITAL TEMPERATURE GAUGE provides an accurate digital display for Engine Oil(AO), Drive Oil(ADO), or Engine Water(AW) TEMPERATURES in either degrees F or C. It has built-in calibration curves for most popular senders manufactured by VDO, Teleflex, Stewart-Warner, and others(senders not included). Sender type is easily selected using the front panel keys. LOW and HIGH temperature alarm limits can be set over the entire range of the instrument/sender. When activated, the built-in 85dB alarm will sound and the display will flash. The alarm can be enabled or disabled with a single key press. Five different levels of internal backlighting can be selected. Then all setup, calibrations, constants, alarm values, sender type, and lighting level selected are all saved to a nonvolatile memory. Terminal "C" can be programmed as an External Alarm output.

Engine Oil temperature Gauge..... P/N 10-02881.....
Drive Oil Temperature Gauge..... P/N 10-02882..... Water/coolant temperature Gauge ... P/N 10-02883.....

The PY60-A DIGITAL EGT/CHT GAUGE works with both J and K type thermocouples to provide accurate monitoring of your engine's cylinder head or exhaust gas temperatures, from -4-2012F (-20-1100C). LOW and HIGH temperature alarm limits can be set from 32-2012F (0-1100C). When activated, the built-in 85dB alarm will sound and the display will flash. The highest temperature seen is automatically saved to a nonvolatile memory, and can be displayed or reset at any time. Five different levels of internal backlighting can be selected, then all setup, calibrations, and constants are also saved to nonvolatile memory.

Exhaust CHT Gauge P/N 10-02884..... Exhaust EGT Gauge P/N 10-02885.....

ADI DIGITAL FUEL GAUGES

The FU60-A DIGITAL FUEL QTY / FUEL FLOW GAUGE provides a highly accurate digital display of fuel remaining, trip fuel, total fuel used, fuel flow consumption rate, and "Time Remaining" at the current rate of flow. Fuel can be displayed with a resolution of 0.1 liters or gallons or as a percentage (0-100%). The FU60-A "learns" your tank and fuel sender characteristics, and is accurate with any tank shape. It is compatible with all popular resistive fuel senders, both American and European. LOW and HIGH fuel level alarm limits can be selected, then all setup, calibrations, constants, alarm values and sender type are saved to a nonvolatile memory. The FU60-A output signal on Terminal "C" may be programmed to activate an External Alarm (panel warning light)(see ACCESSORIES)... or possibly a fuel transfer pump. Should the desired "fuel transfer" mode be selected, (tFER) the pump would turn ON at the user selected LOW limit alarm setting... and OFF when the HIGH limit alarm set point is reached. The FU60-A's display will also flash during pump operation. The F60-A DIGITAL FUEL GAUGE provides an accurate digital display of fuel remaining, trip fuel and total fuel used. Fuel remaining can be displayed up to 6550 liters or gallons, or as a percentage (0-100%) with user selectable display dampening to help prevent unwanted fluctuations in rough air. The gauge display will flash during the pump's operation.

Fuel Gauge F-60-A (pictured)..... P/N 10-02868..... Fuel Flow Gauge FU-60-A..... P/N 10-02869.....

ADI V60-A VOLTMETER

The V55-A Battery/System Voltage Monitor gauge provides an accurate low cost digital instrument for battery/ system voltages between 9.5-33.0 VDC. You can set independent LOW and HIGH voltage alarms. The V55-A built-in 85dB alarm will sound and the display will flash. Five levels of backlighting can be selected and then all setup, calibration constants and alarm values are saved to nonvolatile memory. Terminal C can be selected and used as an External Alarm output signal. (5V, 10mA max). P/N 10-02886.....

ADI AM60-A DIGITAL AMMETER

The AM60-A Digital Ammeter provides an accurate low cost digital instrument for monitoring your aircraft's electrical load (amps), and is programmable to use a 5.0 to 900 amp shunt. (available separately). Up to 90.0 amps the AM60-A can display your load current in tenths of an amp. Above 90 amps current is displayed in full amps. The AM60-A can be powered by any voltage between 9.5 and 33.0 Volts. Five levels of backlighting can be selected using the front panel keys and backlighting can be turned ON/OFF remotely. All setup, calibrations, and constants are saved to nonvolatile memory. P/N 10-02864.....

Ammeter With 150A Shunt..... P/N 10-02932..... ADI AM60 85AMP Shunt only P/N 10-02893.....

ADI CT60-A CLOCK / TIMER

The CT60-A Clock/Timer is an accurate 12/24 hour format clock with a resettable down-counting timer with eight time-of-day settable alarms. The clock is Factory calibrated, but can be adjusted with the front panel switches and calibrations saved to nonvolatile memory. The clock is accurate to within five seconds per day, and is Factory calibrate to within one second per day. The CT60-A has a large LCD display, yet draws only 0.018 amps. Five levels of backlighting can be selected and all setup, calibration constants and alarm values are saved in nonvolatile memory. P/N 10-02865.....

INTERCOM

• Intelligently managed voice activators (VOX) • Listen to your favorite music e.g. from CD/cassette directly to your headphones or attach your intercom to your mobile telephone • Control your intercom digitally using keys & displays • Record and play pre-takeoff or landing checklist directly to your headphones (checklist can easily be created on your PC and recorded into the intercom) • In case of accident simply switch on emergency broadcast, which will be re-played at short intervals and transmitted using a RDST w/pre-recorded message. Size: 2-1/4"

| | |
|---|--------------------|
| Intercom w/voice alarm, checklist & digital voice rec. | P/N 10-00867 |
| Connection cable for mobile phone | P/N 10-00868 |
| Connection cable to VHF airband-transceiver ... | P/N 10-00869 |

ALTIMETER WITH ENCODER

• 2 instruments for the price of one - altimeter & mode C encoder for all types of transponder • Set value limits at 2 levels (Warning & Alarm) for multiples • Display QNH or QFE levels with the option of setting zero • The instrument will provide a warning if an insufficient oxygen altitude is reached • The instrument will signal low altitude, e.g. after opening of undercarriage, MDA, approach. Size: 2-1/4"

P/N 10-00891

VOLT-AMPERE METER

• First volt-ampere meter with 3-phase measurement of voltage, current & frequency • Connect up to 3 circuits for measuring current and voltage, for example instrument panel circuit, light circuit and flash and other circuit • Check the activity of the three-phase voltage converter for an artificial horizon using your voltmeter with the option of checking 400 Hz frequency • Set value limits at two levels (Warning and Alarm) for minimum & maximum voltage and current. Set the form of display either by gradual switching of voltage and current on the display at intervals chosen by you (SCAN function) or by displaying lowest or highest current-voltage. Size: 2-1/4"

| | |
|---|--------------------|
| Digital volt-ampere meter & frequency meter | P/N 10-00883 |
| Current shunt sensor for measuring to 50amps (for all aircraft) | P/N 10-00884 |

ACOUSTIC VERTICAL SPEED INDICATOR

TL-3624 is suitable for most aircraft whether they be airplanes or whether they be gliders. • Measure climb & descent rate with high level of accuracy using the integrated or averaging memory with selectable averaging time • Set value limits at 2 levels (Warning & Alarm) for climb and descent rate • Use acoustic climb & descent rate signals using an external loudspeaker. Size: 2-1/4"

P/N 10-00892

RPM & ENGINE HOURS

• Measure rotations & engine hours with the option to trigger the counting from a certain engine rotation rate (by your choice) so that you can divide taxing from flight time • Set value limits at 2 levels (Warning & Alarm) for all measured values. In case these values are exceeded the instrument will warn you in time of any possible engine damage • Several separate users with pilot/student option - suitable for several owners or in flight schools, where the instructor selects the student and the time will be measured only against his/her name. Size: 2-1/4"

| | |
|---|--------------------|
| Digital RPM w/ engine-clock & stop-watch | P/N 10-00886 |
| Digital RPM w/ engine-clock, stop-watch & internal speed sensor | P/N 10-00887 |

THERMOMETER

• Use the thermometer to measure up to 4 temperatures and oil pressure • Use the automatic choke function using the modeler's servo regulated by thermometer according to any of the measured temperatures e.g. CHT • Set value limits at 2 levels (Warning and Alarm) for all measured values. In case these values are exceeded the instrument will warn you at time of any possible engine damage • Set the form of display either by gradual switching of measured temperatures on the display at intervals selected by you (SCAN function) or displaying the closest temperatures to the limit values that you have set. Size: 2-1/4"

| | |
|---|--------------------|
| Therm. for 4 temp. & press. w/choke control | P/N 10-00874 |
| Thermocouple probe for CHT (type J) 12mm hole - for all engines | P/N 10-00876 |
| Thermocouple probe for CHT (type J) 14mm hole - for all engines | P/N 10-00877 |
| Oil or water temp. sender (0 to 150°C/300°F) for Rotax 4-stroke | P/N 10-00879 |

G ACCELEROMETER

• Using the accelerometer measure the operational values of your aircraft on the vertical axis • Set value limits at 2 levels (Warning and Alarm) for all measured values. In case these values are exceeded the instrument will warn you in time of any possible damage to the aircraft • Always be informed of values approaching the limits, which could result in damage to the aircraft • Always be aware of exceeded values from the previous flight after switching on the instrument • Start of logging is carried out by a switch on the undercarriage or by an internal / external pressure sensor on attaining your selected speed. Size: 2-1/4"

| | |
|---|--------------------|
| Digital accelerometer | P/N 10-00889 |
| Digital accelerometer w/ internal airspeed sens. | P/N 10-00890 |

TL-3424-RAS ACCELEROMETER

The TL-3424 is complete weight acceleration management. The instrument incorporates a high-precision sensor for measuring acceleration in the vertical axis. The SAS version also incorporates a sensor for measuring the indicated airspeed, which enables the activation of memory recording. Both versions enable to utilize an undercarriage scanner that can also activate memory recording.

P/N 10-02312

TL INSTRUMENTS ARE FOR EXPERIMENTAL AIRCRAFT ONLY.

IN

AE FUEL GUARDIAN

AE FUEL GUARDIAN LOW FUEL ANNUNCIATION SYSTEM

This system gets your attention before you have to switch tanks. When the annunciator light flashes, you will know your precise fuel quantity and also the time to engine shut-down for that tank. HOW DOES IT WORK? - The optical fuel sensor is a non-contact sensor mounted in a single hole in the fuel tank. It operates by bouncing a beam of light into the sensors lens. If it is reflected back into the sensor, there is no liquid present. If it is not reflected back, it is dissipated into the liquid media. The sensor output is pulled down, or activated. The electronics constantly monitors the sensor outputs of both tanks. When a low fuel level is detected, the appropriate light starts to blink, getting the pilot's attention immediately. After the pilot sees the alarm, he can press the acknowledge button. This action turns the light on solid (continuous) denoting a low fuel quantity. This function of the annunciator eliminates the distracting flashing action of the lights for the pilot, yet he can still see that he has a low fuel indication.

The AE Fuel Guardian also has an audio output that can be wired into the aircraft intercom or audio system if desired. The audio beep is only present when the annunciator lights are flashing.

The AE Fuel Guardian annunciator lights can also be wired into the aircraft dimmer bus if desired for night flight. This system is 100% solid state and is compatible with 12VDC or 24VDC electrical systems. The installer sets the sensors to provide low fuel warning at whatever level is desired. System includes (2) annunciator panel lights, (2) optical sensors, (1) push button, Sensor drive and annunciator electronics enclosure, wiring, and lettering decals. For Experimental aircraft only.

AE AIRSPEED SWITCH & RELAY BOARD

RELAY BOARD USE: Control your Flap & Elevator Trim motors

This board allows you to use any inexpensive switch [Single Pole, Double Throw, (ON)-OFF-(ON), Spring Loaded, 3 Position] to control your flap and elevator trim motors.

You can series as many switches as you desire control your flap & elevator trim motors. Free connection diagrams for relay boards and airspeed switch for several typical systems.

AIRSPEED RELAY USE:

Flap Deployment Protection at High Airspeeds

When our relay board is used with our airspeed switch, you can protect you flaps from being actuated in the downward direction when your airspeed is too high (above the white arc). We provide the end user with easy connection diagrams for several different systems.

Automatic Speed Adjust for Elevator Trim Motors

Many have complained about the fast adjustment speed of elevator trim motors at high airspeeds. When our relay board is used with our airspeed switch, it eliminates this problem. You will have two speeds, fast for slower airspeeds, and slower for high airspeeds. The slower speed is adjusted by supplying this relay board a lower motor drive voltage.

RELAY BOARD SPECIFICATIONS

Each board includes two independent, Single Pole, Double Throw Relays

Relay contacts are protected against inductive sparking generated from switching inductive loads such as motors. For use on 12Vdc systems. Switch currents up to 10 Amps. Boards are stackable to 3 levels high for saving panel space. Mounting hardware included

AE LOW OIL LEVEL SENSOR

This sensor is a "float type" Low Oil Level Sensor that can be installed in the bottom of an oil sump using spare drain holes. When a low oil condition is sensed, a NC contact will open, indicating a low oil level. This sensor was designed for the high vibration environment of an aircraft engine.

It is also available with electronics and a flashing LED indicator. This sensor indicates a low oil level that is less than 4 quarts in a Lycoming O-360-A1A. This sensor is compatible with many engines.

This sensor package was designed to be "Fail Safe". By "Fail Safe", they mean that if you utilize this sensor in the oil drain plug position, and you forget to reconnect the sensor to the electronics after an oil change, the panel light will come on indicating a low level. This scenario also holds true if you lose electrical connection to the sensor.

A small, reliable, light weight electronics package is provided with the sensor to allow its fail safe mode of operation. This electronics package is easily "wire tied" up under the instrument panel along with all the other instrument wiring. No mounting hardware is required. The electronics is powered by +12Vdc. It can be made 24V compatible by adding a small zener diode in series with the electronics. See below.

IK TECHNOLOGIES

AIM-1 AIRCRAFT INFORMATION MONITOR

If you're a "numbers" kind of guy or gal, this is the choice for you. The compact, all-in-one AIM-1 features a large-character, back-lit, sunlight-readable LCD screen that displays clearly labeled engine information -- no guessing what the numbers mean.

Cylinder head temperatures (CHTs) and exhaust gas temperatures (EGTs) for four cylinders are displayed simultaneously on bright, color-coded LED bargraphs, allowing for rapid scanning, comparison and instant recognition of normal (green), cautionary (yellow) or warning (red) conditions. Pressing the "MODE" button displays the precise numeric value of each CHT and EGT on the LCD screen.

Want to see what you're squawking? A touch of the "change screen" button displays your Mode C Altitude, which can then be offset by inputting barometric pressure or equivalent field elevation.

Outside air temperature, density altitude and a comprehensive, customized checklist are available as options.

IK-2000 AIRCRAFT INFORMATION MONITOR

The glass cockpit of the "future" has already become the standard in today's commercial and business aircraft. Why should you build & fly a contemporary aircraft with instruments designed half a century ago? Aircraft Spruce announces a breakthrough in instrumentation that will allow you, the experimental airplane builder/pilot, to enjoy all the benefits

of a state-of-the-art multifunction flight & engine monitoring system at a fraction of the cost of similar systems currently available.

Six independent microprocessors are used to acquire, measure and display data in the I-K 2000, ensuring continued instrument operation in the unlikely event of a processor or power-supply failure. This monitor was built with reliability in mind. Multiple displays can be used in a single aircraft. Ideal for tandem airplanes such as Vari-EZ, Long-EZ, Berkut, etc.

For experimental aircraft only. These devices are not presently STC-ed or PMA-ed. May be possible to install in certificated aircraft with FAA 337 field approval.

 FADEC Interface P/N 11-03367

AEROSPACE LOGIC

AEROSPACE LOGIC CHT/EGT INDICATORS

Available in 4 or 6 cylinder configurations • Supports most type K thermocouple probes • Displays information in °C & °F with automatic conversion of all setup parameters • Accuracy to within 1°F • Displays temps from 0°F – 1900°C / 0°C—1040°C (EGT); 0°F – 700°C / 0°C—371°C(HT) • High speed scan and acquisition rates. While others update information every 5 seconds and more, our instrument provides precise information every 1 second! • Analog bar type and digital display Select between any of these powerful display pages:

- 1) Any specific cylinder. Choose the cylinder you wish to monitor and change to the next whenever you wish.
 - 2) Sequential step through each cylinder with 5 second delay.
 - 3) Auto select. Selects the hottest cylinder, updated every 1 second.
 - 4) Switch between any selectable function and the auto function and return to the last monitored setting without any data loss!
- User programmable high and low limits • Internal and external brightness control (user programmable) • 9V-33V operating range • Only 2.2" deep • Fits std 2.25" mounting holes • Full 1 year warranty.

AEROSPACE LOGIC FL-100 DUAL FUEL LEVEL INDICATORS

Displays fuel level of two separate tanks on color coded bar graph indicators and a digital readout of fuel quantity on a 4-digit display. Fully user programmable from the front panel. For use with 0-5V sensors/ transducers. Fits standard 2-1/4" mounting hole. Voltage: 9-33 VDC. Displays fuel in US gallons.

Features:

- Viewable in direct sunlight
- Custom design color bar display
- Multi-color sunlight visible
- InGaAlP/GaN LED technology
- Analog/digital readout of fuel levels
- 100,00 hours operating life
- Color-coded fuel level quantities
- Low fuel level alarms
- Internal over temperature shutoff .25 second scan rate
- Dual processor monitoring with 1sec. error shutoff
- Floating point mathematical compensation for tank & sensor linearity
- 256 times measurement validation before display

AEROSPACE LOGIC OIL PRESSURE & TEMPERATURE

Your OL-100 Oil Pressure and Temperature Indicator will provide you with years of reliable service and generally outlast the life of your aircraft. Every reading you will see displayed on your instrument has been validated at least 256 times before you see it. This all happens in less than a second. When you see the result you know the instrument is functioning correctly as it is monitored by an independent microprocessor just to ensure that it is functioning correctly. In turn the main processor validates the independent monitoring processor.

AEROSPACE LOGIC CLOCK & OUTSIDE AIR TEMPERATURE

Manifold and fuel pressure combination instrument. Instrument contains an integrated manifold pressure sensor and requires 0.5v-4.5v fuel pressure input (0-100 PSI at full scale) Features: • Manifold Pressure 0.2-50 in.Hg • Fuel Pressure 0-60 PSI • Use as either manifold, fuel or both pressure instrument • Programmable display formats • Integrated MP sensor • Remote mount FP sender • External alarm output • All limits and functions are user programmable P/N 10-01766.....

FLIGHT/ENGINE MONITORS – SKYSPORTS

SUPER ENGINE INFORMATION SYSTEM (EIS)

Complete engine instrumentation packages available in various models for nearly all 2 & 4-stroke engines. The EIS includes 6 display pages. Combination pages provide convenient grouping of 6 or 7 engine parameters. Labeled pages are used by the alarm system with its external red warning light to make unsafe engine conditions immediately apparent. 2-stroke models provide tach, dual EGT, dual CHT, fluid temperature, auxiliary input, hourmeter, flight timer, voltmeter and outside air temperature. Four-stroke models include all of this, plus oil pressure, a second auxiliary input and a 10 rpm resolution tachometer. All models also available with the fuel flow option (including totalizer and time to empty). The 2-stroke model is available w/altimeter/rate-of-climb. The instrument has been proven in thousands of installations worldwide. Excellent quality and robust design makes this instrument highly reliable. Systems include probes and pre-wired cables, or may be purchased individually. Requires (5) 15/16" w x 2-3/4" h x 2-1/2" d panel space. Specify engine and aircraft makes and models, standard systems furnished with gasket type CHT senders and hose clamp type EGT senders. Threaded senders available at additional cost.

IN

SKYSPORTS CAPACITIVE FUEL SYSTEMS

There is simply no better fuel measurement device than the SkySports capacitance solid state fuel systems. Using a special, solid state capacitance probe, all moving parts are eliminated. Adapts to many different tanks, multiple tanks, and difficult mounting installations.

Systems are available in 12 and 24V configurations, or self-contained, battery powered units. Probes are available bendable, and cuttable, and the entire system is easy to install. Calibrations takes just seconds. Multiple probes can be "summed" on a single gauge, or can drive multiple gauges.

The kits include: probe (s) as specified, gauge as specified, 8 feet multiconductor wire, longer lengths available on request, electrical connectors, AN bolts, mounting hardware (aluminum flange and gasket, or rubber seal grommet and well-nuts), instrument mount screws, cable ties and instructions.

US-8A, STCd / PMAd, ULTIMATE ENGINE ANALYZER

Simultaneously displays EGT and CHT for Singles. (For Twins, call for model designation). May require two US-8As, depending on your requirements). Automatic Diagnostic Assist helps diagnose engine problems such as fouled plugs, burned valves, intake leaks, low compression, etc. Impressive Features Include: Auto Scan up to 16 temperature channels, Reprogrammable Temp Limits From the Front Panel (unavailable on competition's gauges in this category), Auto Detection of hottest EGT and hottest CHT + pilot-programmed Over-Temp and Under-Temp limits!, Programmable Scan Rate for each channel displayed (rather than competition making that decision for you). One Degree, STEADY Resolution! Only 6lbs., Standard 2-1/4" hole (or use an EI adaptor plate for 3-1/8" holes) Choose up to 16 probes (w/ cables): EGT, CHT, OAT, Carb Temp, Oil Temp

SINGLE-ENGINE US-8A PKG PRICES

| Model | Description | Part No. | Price |
|---|---|----------|-------|
| US-8A-4 | 4-cylinder engines without a Primary CHT gauge already installed. Includes 4 EGT probes, 4 CHT probes and 8 ea 6-ft harnesses | 10-00595 | . |
| US-8A-4G | 4-cylinder pkg for a/c w/ Primary CHT gauge already installed. Includes 4 EGT probes, 3 CHT probes, 1 P-102 Piggy Back CHT probe and 8 ea 6 ft harnesses | 10-03283 | . |
| US-8A-6 | 6-cylinder pkg for a/c without a Primary CHT gauge already installed. Includes 6 EGT probes, 6 CHT probes & 12 ea 6-ft harnesses | 10-00596 | . |
| US-8A-6G | 6-cylinder pkg for a/c with a Primary CHT gauge already installed. Includes 6 EGT probes, 5 CHT probes, 1 P-102 Piggy Back CHT probe and 12 ea 6-ft harnesses | 10-03284 | . |
| NOTE: The UBG-16 can accommodate to 16 probes (w/ cables): EGT, CHT, OAT, Carb Temp, and / or Oil Temp | | | |
| TWIN-ENGINE US-8A PKG PRICES: | | | |
| US-8A-4T | 4-cylinder Twin pkg for a/c without Primary CHT gauges already installed. 4 EGTs L&R and 4 CHTs L&R. Includes 8 EGT probes, 8 CHT probes and 16 ea 20-ft harnesses. | 10-00597 | . |
| US-8A-4G-T | 4-cylinder Twin pkg for a/c with Primary CHT gauges already installed. 4 EGTs L&R and 4 CHTs L&R. Includes 8 EGT probes, 6 CHT probes, 2 P-102 Piggy Back CHT probes and 16 ea 20-ft harnesses. | 10-00602 | . |
| US-8A-6-T | 6-cyl Twin pkg (scans all EGTs L&R + 2 CHTs L&R). Includes 12 EGT probes (for 6 channels of EGT on both engines), 4 gasket CHT probes (for 2 channels of CHT on each engine), plus 16 ea 20-ft harnesses. (For more than 12 EGTs and 2 CHTs L&R, + add'l temps, order 2 US-8As) | 10-00598 | . |

SR-8A ENGINE ANALYZER

STCd, PMAd - EGT's, CHT's TIT, Oil Temp, OAT, Carb. Temp + others, up to 8 channels. Manual and Auto Diagnostics (Scan) Modes. Auto Detects the hottest EGT or CHT. Factory-set EGT Over-Temp Limit (1650°F). Factory-set EGT Under-Temp Limit (1100°F). Factory-set CHT Over-Temp Limit (500°F). Differential Limit set from back panel (95°F or 195°F). Selectable Scan Rate + Number of Channels to be Scanned. 2 1/4" Mount. 5.35" Depth. 16 Oz. Instrument. 1° F Resolution. Accuracy; 1/2%. Superior Sunlight Viewability. Backlit. Operates from 7.5 to 35 volts @at .3 amps.

| Model | Description | Part No. | Price |
|---------|--|----------|-------|
| SR-8A | SR-8A Instrument only (no probes or cables) | 10-25220 | . |
| SR-8A-4 | 4 Cyl. SR-8A Package w/ 4 p-110 EGT probes, 4 P-100 CHT probes, 8 ea 6' Cables (uses all 8 inputs) | 10-00599 | . |
| SR-8A-6 | 6 Cyl. SR-8A Package w/ 6 P-110 EGT probes, 2 P-100 CHT probes, 8 ea 6' Cables (uses all 8 inputs) | 10-00603 | . |

UBG-16 ULTIMATE BAR GRAPH ENGINE ANALYZER

STCd and PMAd - Automatically helps detect engine problems before they become safety hazards or expensive repairs! • 32 PILOT-PROGRAMMABLE LIMITS provide a High and Low Alarm for EACH of the UBG's 16 channels! • NORMALIZED MODE with LONG-TERM MEMORY. • LEAN MODE with "TRUE PEAK DETECT" • DATA RECORDING with UNIQUE EXPANDABLE CAPABILITY. Stores up to 690 hours of data for every channel being monitored on the UBG-16. The UBG-16 can be set up to monitor: EGT, CHT, TIT, Oil, Outside Air, Carburetor, cowl and other temperatures. As well as Oil, Fuel, Manifold Pressure, Gyro Vacuum, R.P.M, and fuel flow, Bus voltage and Amps.

| Model | Description | Part No. | Price |
|-----------|---|----------|-------|
| UBG-16-4M | 4-Cylinder Package. Includes 4 EGT probes, 4 CHT probes, 12 ea 6' harnesses and Data Recorder (MUX-8A) | 10-00593 | . |
| UBG-16-6M | 6-Cylinder Package. Includes 6 EGT probes, 6 CHT probes, 12 ea 6' harnesses, and Data Recorder (MUX-8A) | 10-00594 | . |
| EGView | Software for analyzing downloaded software | 10-01219 | . |

E.I. DIGITAL/GRAPHIC INSTRUMENTS

These Digital/Graphic Instruments are solid state and hold their accuracy over time and a range of environmental conditions. The colorful Graphic Analog display emits green, yellow, or red lights enabling the pilot to spot problems immediately without interpreting a needle. Gauges mount in 2-1/4" instrument holes.

TACHOMETER - R-1, TACHOMETER: STCd, PMA'd and TSO'd as PRIMARY REPLACEMENT. Features a 210 degree graphic analog display with green, yellow, and red LEDs. Accurate 10 RPM resolution digital display. Flight Timer. Tach Timer. Peak RPM Recorder. Automatic Mag Drop Calculation. Connects to both "P" leads through isolators (no magnetic pick-ups required). 2 1/4" Mount. 3.65" Depth. 10 Oz. Unit. Superior sunlight viewability. Backlit. Operates from 7.5 to 30 volts @ .3 amps. Note: This instrument may come with labels on the faceplate rather than silkscreening, depending on you're a/c's required markings..

P/N 10-25200

OIL PRESSURE/TEMPERATURE - OPT-1, OIL TEMP/PRESSURE: STCd, PMAd and TSO'd as PRIMARY REPLACEMENT. OPT-1 features dual 90 degree graphic analog displays w/ green, yellow, and red LEDs. Accurate to 1 PSI and 1°F Resolution. External Oil Press and Temp Transducers (no oil in the cockpit). 2 1/4" Mount. 3.65" Depth. 22 Oz. Kit. Superior sunlight viewability. Backlit. Operates from 7.5 - 35 volts @ .3 amps. Note: This instrument may come with labels on the faceplate rather than silkscreening, depending on you're a/c's required markings.

P/N 10-25205

MANIFOLD PRESSURE - M-1, MANIFOLD PRESSURE. STCd, PMA'd & TSO'd as PRIMARY REPLACEMENT. 210 degree graphic analog display w/ green, yellow, and red LEDs. Accurate 1" Mercury Resolution digital display. Connects to std pressure line through 1/4" male flare union. 2 1/4" Mount. 3.65" Depth. 13 Oz. Unit. Viewable in direct sunlight. Backlit.. Operates from 7.5 to 30 volts @ .3 amps. Note: This instrument may come with labels on the faceplate rather than silkscreening, depending on you're a/c's required markings.

P/N 10-25210

VOLTS/AMPS - VA-1A, VOLTS/AMP. STCd, PMAd as PRIMARY REPLACEMENT. Internal Shunt. Discharge @ High Voltage Warning Lights. 100 amp capability. .1 volt & .1 amp 1% Resolution. Accuracy: 2 1/4" Mount. 2.5" Depth. 9 Oz. Unit. Viewable in direct sunlight. Backlit. Operates from 7.0 to 40 volts @ .1 amp.

P/N 10-00809VA-1A (internal shunt)

VA-1A-XX, VOLTS/AMP - STCd, PMAd as PRIMARY REPLACEMENT. (For use with External Shunt. Discharge and High Voltage Warning Lights. 100 amp capability (or order VA-1A-300 for 300-amp capability). .1 volt and .1 amp Resolution. Accuracy: 1%. 2 1/4" Mount. 2.5" Depth. 9 Oz. Unit. Superior sunlight viewability. Backlit. Operates from 7.0 to 40 volts @ .1 amp.

P/N 10-01378VA-1A-50 (S-50 external shunt)

P/N 10-01394VA-1A-300 (S-300 external shunt)

P/N 10-03207RSVA-3 Remote Switch

The UBG-16 input channels. Any of the following options can be added at any time. Each option uses 1 input channel unless otherwise noted.

| Model | Description | Part No. | Price |
|--------------|--|----------|-------|
| FM -FLOW -60 | Flow Transducer Use w/ engine-driven fuel pumps up to 350 HP. 1/4" female NPT. .6-70+ GPH, .6 PSI drop @ 30 GPH, 2.3 PSI drop @ 60 GPH | 10-25343 | . |
| FM -FLOW -90 | TRANSDUCER For 350 to 550 HP engines or gravity-feed engines, 1/4" NPT, 2 to 125+ GPH, .05 PSI drop @ 20 GPH, .2 PSI drop @ 40 GPH. | 10-02208 | . |
| FM-FP | Secondary Fuel Pressure Includes PT-30GA Pressure Transducer. (Can be used with The UBG-16 and also with the FP-5L (Fuel Flow/Pressure w/ GPS Interface instrument) | 10-25337 | . |
| FM-OP | Secondary Oil Pressure Includes PT-100GA Pressure Transducer. (For use with UBG-16 or FP-5(L). | 10-25336 | . |
| FM-RPM | Secondary RPM Connects directly to the Mag Switch. (For use with UBG-16 or FP-5(L) | 10-25341 | . |
| FM-VA | Secondary Volts/Amps w/S-50 Shunt Volts uses 1 input channel and Amps uses 1 input channel (i.e., monitoring volts and amps require the use of two of the UBG-16's input channels. | 10-25342 | . |
| FM-GYRO | Gyro Vacuum Includes Pressure Transducer. | 10-25339 | . |
| FM-MP | Secondary Manifold Pressure Includes Pressure Transducer. | 10-25338 | . |

ELECTRONICS INTERNATIONAL INSTRUMENTS

FP-5 FUEL FLOW + HORSEPOWER

PMA_d and STC_d - Same amazing Fuel Flow/Horsepower Instrument as our FP-5L, but without GPS interface. Features: • HORSEPOWER to 1% hp • FLOW Displayed in Gallons, Pounds, Liters or British Gallons. • AUTOMATIC K-Factor Calibration for UNSURPASSED • ACCURACY. • FUEL USED Displays "Used for Flight" and "Used Since Fill Up" • FUEL REMAINING Displays fuel remaining to 1/10 gallon. • SCAN MODES Manual and Automatic. • RECURRING FUEL USED ALARM Pilot Programmable! • AUXILIARY Channel To monitor one of the following options: EGT, OAT, Carb Temp, Oil Temp, Manifold Pressure, Gyro Vacuum, RPM, Volts or Amps • Pilot Two LOW FUEL ALARMS Pilot Programmable! • TIME TO EMPTY automatically calculated and displayed. Specs: 2-1/4" mount, 3.65" deep, 28 oz. pkg. Backlit. Superior Viewing in Sunlight. External Warning Line. Operates from 7.5 to 30 volts @ .3 amps.

| Model | Description | Part No. | Price |
|----------|---|----------|-------|
| FP-5 | Instrument Only FUEL FLOW w/ HP (instrument only, no transducers) | 10-25300 | . |
| FP-5-60 | FUEL FLOW w/ HP w/ FT-60 flow xdr, up to 350HP, engine-driven fuel pump | 10-25304 | . |
| FP-5-90 | FUEL FLOW w/ HP, w/ FT-90 Flow Transducer, for aircraft w/ 350-550 HP or without an engine-driven fuel pump | 10-00260 | . |
| FP-5-180 | FUEL FLOW w/ HP, includes HIGH FLOW Transducer (for aircraft w/ more than 550HP) | 10-03208 | . |

FP-5L FUEL FLOW, PRESSURE, HORSEPOWER AND GPS PMA_d & STC_d PRIMARY REPLACEMENT INSTRUMENT

Positively the best Fuel Flow/Horsepower Instrument there is! Nothing else even comes close. The FP-5L's High-Powered Features include: • HORSEPOWER, to 1 percent hp. No other fuel gauge provides this! • FLOW, displayed in Gallons, Pounds, Liters or British Gallons. • AUTOMATIC K-Factor Calibration for UNSURPASSED ACCURACY. • FUEL DISPLAYS: "Used for Flight", "Used Since Fill Up", "MPG", "Fuel Required to. Destination", "Fuel Remaining", "Time to Empty." • SCAN MODES: Manual and Automatic. • RECURRING FUEL USED ALARM Pilot Programmable. • 2 LOW FUEL ALARMS Pilot Programmable w/ Red Warning LED. • FUEL REMAINING displayed to 1/10 Gal. • AUTOMATICALLY CALCULATES AND DISPLAYS "Time to Empty", "Fuel Req to Dest," and "Fuel Reserve.". Displays Nautical and Statute Miles per Gallon. Multiple Data Outputs & Inputs, Handhelds & Panel Mounts. One-of-a-kind AUXILIARY Channel can be used to monitor an additional function (choose one):EGT, TIT, CHT, OAT, Carb Temp, Oil Temp, Cowl Temp, Fuel Pressure, Gyro Vacuum, Manifold Pressure, Volts or Amps. Specs: 2-1/4" mount, 3.65" deep, 28 oz. pkg. Backlit for Night Operation, Superior Sunlight Viewability, External Warning Line. Operates from 7.5 to 30 volts @ .3 amps.

| Models | Description | Part No. | Price |
|-----------|---|----------|-------|
| FP-5L | Fuel Flow w/ Horsepower & GPS input/output (instrument only; no transducers) | 10-01217 | . |
| FP-5L-60 | Fuel Flow w/ Horsepower & GPS input/output; includes FT-60 Flow Transducer (for aircraft w/ up to 350 HP & an engine-driven fuel pump). | 10-25310 | . |
| FP-5L-90 | Fuel Flow w/ Horsepower & GPS input/output, includes FT-90 Flow Transducer | 10-01045 | . |
| FP-5L-180 | Fuel Flow w/ Horsepower & GPS input/output, includes FT-90 Flow Transducer | 10-01050 | . |

FP-5 & FP-5L AUXILIARY OPTIONS

| Models | Description | Part No. | Price |
|--|---|----------|-------|
| The FP-5 & FP-5L feature an Auxiliary Channel. Any one of the following choices can be added to at any time. | | | |
| FFDM-1 w/ FT-60 | FUEL FLOW Differential Module, for aircraft with a Pressure Carburetor. Includes FT-60 or FT-90 Flow Transducer to measure the returned fuel. Please specify FT-60 or FT-90. DOES NOT use up the FP-5's Auxiliary channel. | 10-25325 | . |
| FFDM-1 w/ FT-90 | FUEL FLOW Differential Module, for aircraft with a Pressure Carburetor. Includes FT-60 or FT-90 Flow Transducer to measure the returned fuel. Please specify FT-60 or FT-90. DOES NOT use up the FP-5's Auxiliary channel. | 10-03190 | . |
| FM-Temp-P-110 | EGT hose clamp probe and 6' cable. Compensates HP reading when leaning. | 10-02188 | . |
| FM-Temp-P-128 | OAT or CARB Temp probe (1/4"-28 thread) and 6' cable | 10-02769 | . |
| FM-Temp-P-120 | Secondary OIL Temp probe (5/8"-18 thread) and 6' cable | 10-02770 | . |
| FM-Temp-P-111 | Secondary TIT or OIL Temp probe (1/8" NPT adjustable depth) and 6' cable | 10-02765 | . |
| FM-Temp-P-112 | Secondary TIT or OIL Temp probe (7/16-20 thread adjust. depth) and 6' cable | 10-02766 | . |
| FM-Temp-P-114 | Secondary TIT or OIL Temp probe (1/4" NPT adjust. depth) and 6' cable | 10-02767 | . |
| FM-OP | Secondary OIL PRESSURE. Includes PT-100GA Pressure Transducer | 10-25336 | . |
| FM-FP | Secondary Fuel Pressure. Includes PT-30GA Pressure Transducer | 10-25337 | . |
| FM-MP | Secondary Manifold Pressure. Includes Pressure Transducer | 10-25338 | . |
| FM-RPM 6C | Secondary RPM. Connects directly to the Mag Switch | 10-01786 | . |
| FM-Gyro | Gyro Vacuum. Includes Pressure Transducer | 10-25339 | . |
| FM-VA | Secondary Volts or Amps (one or the other) w/ S-50 amp shunt. | 10-25341 | . |
| AV-17 | Voice Annunciator. Connects through the Audio Panel or Intercom. The 1"x1" control panel mounts on your instrument panel. The 4.1"x 2.6"x 1.7" control box mounts under the instrument panel. See all Annunciator Panels on our "Accessories" page. | 10-00181 | . |

E.I. INSTRUMENTS

The entire line of Electronics International digital instruments offers precise readings at exceptional prices. All gauges are accurate to 1%. They are FAA-approved under STC No. 1626NM. Furnished complete with all probes & leads.

| C-6 | EGT and CHT instruments, STC _d , TSO _d and PMA _d . Six Channels | 10-01350 | . | | | | |

ELECTRONICS INTERNATIONAL INSTRUMENTS

MVP-50P GLASS PANEL ENGINE & SYSTEM MONITOR

MVP-50P is Certified Primary Replacement. 5.55" x 5.15" x 2.4" Deep Engine and System Monitoring: The MVP-50P replaces over 15 Engine Instruments and 50 Functions in a single, full color, enhanced TFT glass display instrument. It features excellent viewability, even in direct sunlight. The MVP-50 is an unrivaled Engine and Aircraft System Monitor with an easy-to-read and easy-to-use format. There are Pilot-Programmable colors, ranges and limits and a voice alarm for each instrument displayed. Its "System Page" displays trims, flaps, wheel status lights, many system parameters and annunciators. This is the most powerful engine and system analyzer on the market, featuring the following displays: Bar Graph (with Scan and Hottest Cylinder modes), Rich-of-Peak, Lean-of-Peak, Full Digital, Normalized and Differential. The MVP-50P's instant red and yellow visual warnings, as well as voice annunciators for all Programmed Limits, eliminate the need to constantly scan an entire panel for possible problems. In-Flight Data: The MVP-50P provides many "Flight Data Screens" to reduce cockpit clutter and pilot workload. Some of these screens are: Fuel Management, Timers, Clocks and Date, Weight and Balance, Data Recording, Custom Checklists (Start, Taxi, Run-up w/ Mag Drop, Take Off, Landing, Emergency and more!), Custom Flight Plans, General Information (Aircraft Performance, Engine Diagnostics, VSI Lights, Airspeed, VFR Minimums, Altitude Table, Light Gun Signals, Transponder Codes, Frequencies, Real-Time Out (providing telemetry for UAV racers, etc.), plus additional Screens, including: Flight Log, Max Data Log, Min Data Log and others. And it's easy to create your own Custom Screens and download them to the MVP-50P through its USB port. Compatible with OP Technologies and Chelton. EGView Charting Software is also available for use with the MVP-50P. Other Functions Included: Help Screen; EGT & CHT Differentials; Shockcooling; Horsepower; Weight & Balance Data and Graph; GPS Interface and Data; Fuel Efficiency; Fuel Used for Trip; Fuel Used Since Fill Up; Time to Empty; Distance to Empty; Fuel; Time and Distance to Way Point; Fuel Reserve; Time Reserve; Distance Reserve; Up and Down Timers; Flight and Tach Timers; Engine Hours; Date; Local and Zulu Time; Voice Warnings; Data Recording; selectable .33 – 6 min., 665 hours @ 6 seconds!

| EGView | EGView Charting Software. Use for analyzing and downloading data to the MVP-50P. | 10-01219 | . |
| USB-64 | USB Memory Stick, 64 MB or larger. Used to upload and download data to the MVP-50P. | 10-03186 | . |
| GP-1-MVP | LED Intensity Control Pot. External pot used to control the display intensity. | 10-03211 | . |
| EDC-33P-4/6 | 4/6 Cylinder Engine Data Converter. Adding a second EDC to the MVP allows. Additional pressures, annunciators and other functions to be monitored on the MVP (uses the Input Port 3 on the MVP). | 10-03184 | . |
| MVP-50P Head Only | Display unit only! May be used to display parameters in a second location Display Only | 10-01193 | . |

TEMPERATURE PROBES FOR MVP-50P & MVP-50T

| Models | Description | Part No. | Price | Models | Description | Part No. | Price |
|---------------|--|----------|-------|-------------|---|----------|-------|
| P-100-MVP | CHT probe, screw-in, 3/8"-24 | 10-03212 | . | P-111-MVP | Std TIT probe, 1/8" NPT, .187" D | 10-03222 | . |
| P-101-MVP | CHT probe, Military Bayonet | 10-03213 | . | P-111-F-MVP | Fast Response TIT probe, 1/8" NPT, .187" D | 10-03223 | . |
| A-101-MVP | CHT Adaptor for P-101 Probe, 3/8"-24 | 10-03216 | . | P-112-MVP | Std TIT probe, 7/16"-20, .187" D | 10-03224 | . |
| P-102-18-MVP | CHT probe, 18mm gasket | 10-03214 | . | P-114-MVP | Std TIT probe, 1/4" NPT, .187" D | 10-03225 | . |
| P-102-14-MVP | CHT probe, 14mm gasket | 10-03217 | . | P-114-F-MVP | Fast Response TIT probe, 1/4" NPT, .125" D | 10-03226 | . |
| P-102-12-MVP | CHT probe, 12mm gasket | 10-03218 | . | P-120-MVP | Oil Temp probe, 5/8"-18 | 10-03227 | . |
| P-102-3/8-MVP | CHT probe, 3/8" gasket, piggy-backs on a primary CHT probe | 10-03219 | . | P-128-MVP | OAT/Carb Temp probe, 1/4"-28 | 10-03228 | . |
| P-110-MVP | Std EGT/TIT probe, Hose Clamp Type, .187"D | 10-03220 | . | P-104-MVP | Universal Temp probe, #6 hole | 10-03229 | . |
| P-110-F-MVP | Fast-Response EGT/TIT probe, Hose Clamp Type, .125"D | 10-03221 | . | XDS-6' | One 6 ft TC harness w/ crimped D-Sub pins. Use to interface any temperature Probe to the MVP system. Specify length at time of order. | 10-03192 | . |

PRESSURE TRANSDUCERS AND MODULES

(Each includes a Cbl-4D-6' harness when ordered w/ the MVP-50 & MVP-50T)

| | | | |
|---------------|---|----------|---|
| PT-30GA-MVP | Pressure Transducer, 0 to 40 PSI (see Accessories page for details) | 10-03232 | . |
| PT-100GA-MVP | Pressure Transducer, 0 to 120 PSI (see Accessories page for details) | 10-03233 | . |
| PT-300GA-MVP | Pressure Transducer, 0 to 300 PSI (see Accessories page for details) | 10-03235 | . |
| PT-3000S-MVP | Pressure Transducer, 0 to 3000 PSI (see Accessories page for details) | 10-03236 | . |
| PT-30ABS-MVP | Absolute Pressure Transducer, 0 to 36 In Hg (Manifold Press or Cabin Altitude) | 10-03238 | . |
| PT-30ALT-MVP | Altitude Transducer | 10-03239 | . |
| PT-60ABS-MVP | Absolute Pressure Transducer, 0 to 70 In Hg (Manifold Pressure) | 10-03240 | . |
| PT-05Diff-MVP | Differential Pressure Transducer, 0 to 60 In Hg (Vac Pressure or Cabin Diff Pressure) | 10-03241 | . |
| PT-04H20-MVP | Differential Pressure Transducer, 0 to 5 In H20 | 10-03242 | . |
| FM-PR-MVP | Allows an EDC temperature channel to measure a pressure (operates w/ any EI MVP Pressure Transducer). Pressure transducer sold separately. | 10-03204 | . |
| DPIM-1-30-MVP | Differential Pressure Interface Module for aircraft that require fuel pressure to be Measured in reference to the upper deck. Includes a PT-30GA pressure transducer to measure the upper deck pressure. | 10-03205 | . |
| Cbl-4D-6' | One 6' 4-wire cable with crimped D-Sub pins. Used to interface any pressure transducer, fuel flow transducer or fuel level probe to the MVP system. Add \$.95 per foot to the price for anything over the standard 6' length. | 10-03183 | . |

FUEL FLOW TRANSDUCERS AND MODULES

| | | | |
|-----------------|--|----------|---|
| FT-60 | Fuel Flow Transducer (Red Cube), .6 to 70+ GPH | 10-01196 | . |
| FT-90 | Fuel Flow Transducer (Gold Cube), 3 to 125+ GPH | 10-01224 | . |
| FT-180 | Fuel Flow Transducer (Black Cube), 5 to 250+ GPH | 10-01197 | . |
| FFDM-1-MVP-FT60 | Fuel Flow Differential Module for aircraft w/ a pressure carburetor. Includes FT-60 or FT-90 transducer to measure the returned fuel. Please specify FT-60 or FT-90 at time of your order. | 10-03244 | . |
| FFDM-1-MVP-FT90 | returned fuel. Please specify FT-60 or FT-90 at time of your order. | 10-03245 | . |
| FM-Flow-P | Measures Fuel Flow from a pulsed injector signal. | 10-03206 | . |

FUEL LEVEL PROBES AND MODULES

| | | | |
|------------------|---|----------|---|
| RELM-4-12 | Resistive Fuel Level Module. Must be used w/ EI's "EDC" to measure up to 4 Resistive Fuel Level Sensors. | 10-02772 | . |
| RFLM-4--24 | | 10-03231 | . |
| P-300C | 3/4" Capacitive Fuel Level Probe w/ Accessories. (see our Accessories Page for details.) Specify Probe length at time of order. | 10-00382 | . |
| P-300C-Mini-1/8" | | 10-03193 | . |
| P-300C-Mini-1/4" | 3/16" Capacitive Fuel Level Probe (see our Accessories Page for details) | 10-03194 | . |

VOLTS AND AMPS MODULES AND SHUNTS

| | | | |
|---------------|--|----------|---|
| FM-VA-MVP-50 | Volts/Amps Module. Allows any temperature or pressure channel on EI's EDC to measure Voltage and Current on a separate bus. Comes w/ an S-50 or S-300 shunt. | 10-03247 | . |
| FM-VA-MVP-300 | | 10-03248 | . |

MVP SCREEN ANNUNCIATOR INTERFACE UNITS

| | | | |
|--------|--|----------|---|
| VI-221 | Voltage Interface Unit. Allows any temperature or fuel level channel on our EDC to measure the output voltage of any device. This voltage measurement can then be used to drive an annunciator (Canopy Latch, Gear Lights, Baggage Door, etc.) that will be displayed on the MVP screen. | 10-03187 | . |
|--------|--|----------|---|

ELECTRONICS INTERNATIONAL INSTRUMENTS

ELECTRONICS INTERNATIONAL PANEL PACKAGES

PACKAGE A - Includes: 1. US-8: All EGT's, all CHT's, OAT, carb. Temp, 16 programmable upper limits, 16 programmable lower limits, 2 programmable differential limits and a programmable shock-cooling limit. 2. FP-5: Fuel flow, Rem, used time to empty, fuel pressure, 2 programmable low fuel limits, 1 programmable time to empty limit, programmable high and low pressure limits, programmable K factor, programmable fuel weight and programmable display for gallons or pounds. 3. R-1: RPM w/high warning, tach time and flight time. 4. M-1: Manifold pressure to .1" Hg. w/high warning. 5. OPT-1: Oil pressure and oil temperature w/high and low warnings. 6. VA-1A: Volts and amps with discharge and high voltage warnings. • Total pkg will fit in a 5" x 7.5" space with no external boxes. • Includes all probes, 6' cables, transducers, accessories and a free LED front panel intensity control pot. **CALL FOR SPECIAL PRICES**

PACKAGE B - Includes: 1. EAC-1: One channel of EGT, CHT and OAT. The EGT and CHT may be upgraded to an analyzer with the addition of a remote switch. 2. FP-5: Fuel flow, Rem, used, time to empty, fuel pressure, 2 programmable low fuel limits, 1 programmable time to empty limit, programmable high and low pressure limits, programmable K factor, programmable fuel weight and programmable display for gallons or pounds. 3. R-1: RPM w/high warning, tach time and flight time. 4. M-1: Manifold pressure to .1" Hg. w/high warning. 5. OPT-1: Oil pressure and oil temperature w/high and low warnings. 6. VA-1A: Volts and amps with discharge and high voltage warnings. • Total pkg will fit in a 5" x 7.5" space with no external boxes. • Includes all probes, 6' cables, transducers, accessories & a free LED front panel intensity control pot. **CALL FOR SPECIAL PRICES**

SUPER CLOCK INSTRUMENTS

ASC-5A - Displays Local & Zulu Time in 12 or 24 hr format, Up & Down Timers w/ alarms, Altitude (as seen by ATC), and OAT. Several programmable alarms, including Assigned Altitude, Level Off, Deviation Alarm and an Approach Alarm + a recurring alarm to alert you at a programmable interval, for checking fuel. P/N 10-02914

SC-5 - Displays Local (12 or 24-hour format) & Zulu Time. 10-year Lithium battery keeps the clock running even if the a/c battery is removed. Displays an Up Timer, which starts running when the engine is started, acting as an automatic Flight Timer. The Up Timer may be started, stopped or reset. Recurring Alarm may be set to alert you at appropriate time intervals, e.g., if set for 30 minutes, there will be an alarm at 30 minutes, 60 minutes, 90 minutes, etc. Alarm can be used as a reminder to check fuel level or switch tanks at set time intervals. P/N 10-01612

FUEL LEVEL INSTRUMENTS

For TC holders, STC holders or Experimental Aircraft No STCs. FL-1CA Fuel Level Instrument. The FL-1CA is to be used w/ EI's P-300C Capacitive Fuel Probe (custom order probe length from 6" to 20'). The FL-1CA features a 210 degree Arc of LEDs for an excellent "field of vision" reference and a Digital Display. Can display in gallons (one or one-half gallon increments), pounds or liters. Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit. Viewable in direct sunlight and Backlit for night operations.

| Model | Description | Part No. | Price |
|--------------|---|----------|-------|
| FL-1CA | The FL-1CA is to be used w/ EI's P-300C capacitive fuel probe (order from 6" to 20' long). 210 degree LED arc + a digital display. Can display in gallons (one or one-half gallon increments), pounds or liters. Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit, Viewable in direct sunlight and Backlit for night operations. | 10-00386 | . |
| FL-1RA-12/24 | The FL-2RA-12 designed to be used on a 12-volt system w/ resistive fuel probes. Features a 210 degree LED arc + a digital display. Max resistance between 90-270 ohms. Can display in gallons (one or one-half gallon increments), pounds or liters. Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit, Viewable in direct sunlight and Backlit. | 12V | . |
| | | 24V | . |
| FL-2CA | The FL-2 is a fuel level instrument featuring dual 90 degree LED arcs + a digital display. The FL-2 can display in gallons (one or one-half gallon increments), pounds or liters. Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit, Viewable in direct sunlight, Backlit, Operates from 7.5 to 35 volts at .3 amps. | 11-03788 | . |
| FL-2RA-12/24 | The FL-2 is a fuel level instrument featuring dual 90 degree LED analog displays and a digital display. The FL-2 can display in gallons (one or one-half gallon increments), pounds or liters. FL-2 Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit, Viewable in direct sunlight, Backlit, Operates from 7.5 to 35 volts at .3 amps. Please specify 12/24 volt at the time of order. | 11-03789 | . |
| FL-2RA-24 | The FL-2 is a fuel level instrument featuring dual 90 degree LED analog displays and a digital display. The FL-2 can display in gallons (one or one-half gallon increments), pounds or liters. FL-2 Specifications: 2 1/4" Mount, 3.65" Depth, 10 Oz. Unit, Viewable in direct sunlight, Backlit, Operates from 7.5 to 35 volts at .3 amps. Please specify 12/24 volt at the time of order. | 11-07104 | . |

MVP-50T GLASS PANEL MULTI-FUNCTION DISPLAY

Replaces 15 engine gauges and 50 functions. Remarkable full-color, enhanced TFT Glass Display (excellent viewability, even in direct sunlight) Pilot-Programmable Colors, Range Markings, Limits and Voice Alarms (for each parameter monitored) "System Page" to display Trims, Flaps, Wheel Status Lights, and many other system parameters and annunciators. 27 Pilot-Customized Annunciators at the top of the "Main Page". Fuel Management, Timers, Clocks, Date, Weight & Balance. Data Recording (.33 - 6 min, 665 hours @ 6 seconds). Pilot-Customized Checklists and Flight Plans. General Info, Flight Log, Start Log, Max & Min Data. Pilot easily can generate Custom Screens and download them to the MVP-50P through the USB port. Help Screen, GPS Interface and Data, Fuel Efficiency, Fuel Used for the Trip, Fuel Used Since Fill Up, Time to Empty, Distance to Empty, Fuel to Way Point, Time to Way Point, Distance to Way Point, Fuel Reserve, Time Reserve, Distance Reserve, Up Timer, Down Timer, Flight Timer, Engine Hours, Cycles, Date, Local and Zulu Time. Other functions, such as Fuel Level, Gyro Vac, Hydraulic Pressure, etc., may be added by purchasing an appropriate probe & harness, or transducer, etc. See our Accessories, "Probes and Transducers" section on previous page. Using your current Resistive Fuel probes require our FFLM-4-XX to interface with the MVP-50T System. Torque, Oil Pressure & Temperature, Fuel Flow & Pressure, OAT, Amps, Volts, Multiple Fuel Screens, Pre-wired Harness, N1 and N2 hookups. Includes EDC (Engine Data Converter), cables and harnesses, transducers, shunt (for amps), USB Download/Upload Memory Stick, and our AV-17CP (Voice Warning Control Panel). Only 5.55"x 5.15"x 2.4" deep

| Models | Description | Part No. | Price |

| -OPT | Allows the MVP to provide Engine Data to an OP Technologies unit. | 10-03169 | \$667.00 |
| -RTDO | Real-Time Data Out. Can be used to provide Telemetry Data for UAV's, racers and other applications. | 10-03168 | . |
| ACCESSORIES | | | |
| USB-64 | USB Memory Stick, 64 MB or larger. Used to upload & download data to the MVP. | 10-03186 | . |
| CP-1-MVP | LED Intensity Control Pot. External pot used to control the display intensity. | 10-03211 | . |
| EDC-33T | Turbo Prop/Jet Engine Data Converter. Adding this second EDC to the MVP allows monitoring of additional temperatures, pressures, annunciators and other functions. | 10-03185 | . |
| MVP-50T Display Head | May be used to display parameters in a second location. (display only) | 10-03202 | \$3,550.00 |

INSTRUMENTS FOR TURBOPROP AIRCRAFT

| Model | Description | Part No. | Price |
|--------------|---|----------|-------|
| 10-03249 | RPM INSTRUMENT, TSOD, PMAd (no STCs). Digital 1% Resolution Display + 210 degree LED arc display with green, yellow and red LEDs. 2 1/4" Mount, 3.65" Depth, 10 Oz. Viewable in direct sunlight, Backlit, Operates from 7.5 to 30 volts @ .3 amps. | 10-03249 | . |
| R-1-N1 | RPM INSTRUMENT, TSOD, PMAd (no STCs). Digital 1% Resolution Display + 210 degree LED arc display with green, yellow and red LEDs. 2 1/4" Mount, 3.65" Depth, 10 Oz. Viewable in direct sunlight, Backlit, Operates from 7.5 to 30 volts @ .3 amps. | 10-03264 | . |
| R-1-N2 | RPM Instrument displayed in RPM. TSOD, PMAd (no STCs). Digital 10 RPM Resolution Display + 210 degree LED arc display with green, yellow and red LEDs. 2-1/4" Mount, 3.65" Depth. | 10-03265 | . |
| M-1T | PRESSURE OR TORQUE INSTRUMENT, TSOD, PMAd (no STCs). 1 PSI or 1% Resolution + 210 degree LED arc display with green, yellow and red LEDs. 2 1/4" Mount, 3.65" Depth, 10 Oz. Instrument. Backlit. | 10-03266 | . |
| M-1-ITT | INERT-Turbine Temperature Instrument IN Celsius. TSOD/PMAd (no STCs). Digital display (1 degree C resolution) + 210 degree LED arc with green, yellow and red LEDs. 2 1/4" Mount, 3.65" Depth, 10 Oz. | 10-03267 | . |
| M-1-TOT | Turbine Outlet Temperature INC. TSOD/PMAd (no STCs). | 10-03267 | . |
| OPT-1-FV-60 | AC BUS VOLTAGE & FREQUENCY, TSOD/PMAd (no STCs). The "-60" instrument is for a 60 Hz. bus and the "-400" instrument is for a 400 Hz. bus. Accurate Digital Display can be switched between Voltage and Frequency, displays in Volts and Hz. 2 1/4" Mount, 3.65" Depth, 10 Oz. Instrument. | 10-03268 | . |
| OPT-1-FV-400 | AC BUS VOLTAGE & FREQUENCY, TSOD/PMAd (no STCs). The "-60" instrument is for a 60 Hz. bus and the "-400" instrument is for a 400 Hz. bus. Accurate Digital Display can be switched between Voltage and Frequency, displays in Volts and Hz. 2 1/4" Mount, 3.65" Depth, 10 Oz. Instrument. | 10-03269 | . |

ELECTRONICS INTERNATIONAL ACCESSORIES

AP-7H OR AP-7V LED ANNUNCIATOR PANEL

(H = Horizontal Mount; V = Vertical Mount) When mounted in front of the pilot, the AV-7 Annunciator Panel's bright red LEDs give a quick warning of any out-of-limit condition. Can be connected to these E.I. instruments: US-8A or SR-8A, FP-5(L) and/or FL-2, R-1, M-1, and OPT-1. A control switch will dim or turn off the warning LEDs. Simple to install (requires only 8 ea. 1/2" holes to mount). Connect to a small 3" x 2" x 1" Control Box tie wrapped to a wire bundle under the instrument panel. Size: 5.3" x .9", 10 Oz. Kit, Operates on a 12 or 24-volt system. Includes: Annunciator Panel, Control Box and all wires and connectors.

Vertical..... P/N 10-03288
Horizontal (Pictured)... P/N 10-03289

AL-1(X) CHROME ANNUNCIATOR LIGHT

(X) = "R" for Red, "Y" for Yellow, "B" for Blue, "G" for Green or "O" for Orange. The AL-1 makes an excellent indicator light for displaying boost pump on, gear status, power on, flags, etc. Also, it can be used as a remote warning light for any E.I. instrument featuring an external warning line. The AL-1 is more attractive, operates on less power and is smaller than old-fashioned indicator lights.

The AL-1 has a service life of over 1000 times that of incandescent bulbs. Mounts in a 5/16" hole. Size: .4" diameter x 1" depth. Operates on a 12 or 24-volt system. Comes with 32" leads.

P/N 10-03291

AV-17 VOICE ANNUNCIATOR

The AV-17 can provide up to 17 verbal warnings through your headset, ending the need to constantly scan the instrument panel. Eliminate concern about missing an alarm at a critical moment. The instant a monitored alarm occurs, the Voice Annunciator will chime in the headset and a pleasant female voice will announce a phrase, such as: "Check Oil Pressure," or "Check Altitude," etc. The AV-17's voice alarm in the headset provides an instant and clear understanding of what's going on in the cockpit without the hassle of having to scan instruments, decipher functions, interpret readings or translate numerous bells, buzzes or beeps. The AV-17 connects to the headset through the Audio Panel or Intercom or may be connected directly to the headset. The AV-17 receives most of its warning signals from any one or more of Electronics International's instruments which feature a warning light. However, other alarm inputs can be received from any warning device that drives a horn or light. It is not necessary to activate all 17 of the AV-17's warnings. A "Check Bus Voltage" warning is built into each AV-17. Further voice alarms can be activated as EI instruments are added to the panel. The AV-17 is compact. A 4.1" x 2.6 x 1.7" Control Box tie wraps under the instrument panel. A 1" x 1" Control Panel mounts on the aircraft instrument panel. The Control Panel allows you to turn the Voice Annunciator on or off, and allows you to acknowledge, and thereby deactivate, any active alarm for either 1 minute or 10 minutes. The AV-17 voice alarms are activated by pulling the appropriate control line to ground (0 volts).

AVI-1 MODULE - This Module allows a positive voltage to activate one AV-17 control line. Use with the AV-17 when utilizing inputs from gauges other than Electronics International's.

AV-17..... P/N 10-00181
AVI-1..... P/N 10-03292

FIELD TEST DEVICES

| Models | Description | Part No. | Price |
|---------|--|----------|-------|
| FCD-T | Outputs a calibrated temperature signal. May be used to test any E.I. temperature instrument (approximately 1400°F). | 10-03294 | . |
| FCD-FF | Outputs a variable fuel flow signal. | 10-03295 | . |
| FCD-FP | Outputs a variable fuel pressure signal (0 to 50+ PSI). | 10-03296 | . |
| FCD-OP | Outputs a variable oil pressure signal (0 to 100+ PSI). | 10-03297 | . |
| FCD-RPM | Outputs a variable RPM signal (800 to 2800 RPM). | 10-03298 | . |
| FCD-AMP | Outputs a 50mV signal. Used to test the VA-1A-XX Volt/Amp Instrument. | 10-03301 | . |
| FCD-CFL | Outputs a variable capacitive fuel level signal. | 10-03302 | . |
| FCD-RFL | Outputs a variable resistive (0-250 ohms) fuel level signal. | 10-03303 | . |

REMOTE SWITCHES

A remote switch may be used to upgrade many single-channel E.I. instruments to multi-channel EGT and/or CHT engine analyzers. This is an excellent way to insure your engine is operating properly. Specifications for all switches: Body - 1"x 1"x 1.5" depth, front panel - 2"x 1.15", STC'd / PMA'd

RS-4-1S - Upgrades any unit to read four channels of EGT or CHT, Package includes: Unit, (3) 6' cables, (3) probes. Specify probe type with order. P/N 11-01688

RS-4-2S - Upgrades any two channel unit to read four channels of EGT and CHT, Package includes: Unit, (6) 6' cables, (3) EGT probes, (3) CHT probes P/N 11-01689

RS-6-1S - Upgrades any unit to read six channels of EGT or CHT, Package includes: Unit, (5) 6' cables, (5) probes. Specify probe type with order. P/N 11-01690

RS-6-2S - Upgrades any 2 channel unit to read six channels of EGT and CHT, Package includes: Unit, (10) 6' cables, (5) EGT probes, (5) CHT probes P/N 11-01691

RS-8-1S - Upgrades any unit to read eight channels of EGT or CHT, Package includes: Unit, (7) 6' cables, (7) probes. Specify probe type with order. P/N 11-01692

RS-12-1S - Upgrades any unit to read 12 channels of EGT or CHT, Package includes: Unit, (11) 6' cables, (11) probes. Specify probe type with order. P/N 11-01693

PRIMARY REMOTE SWITCHES

REMOTE SWITCHES for use w/ EI 1 or 2 channel EGT/CHT instruments. STC'd, PMA'd Electronics International gauges are available to replace your Primary Engine Instruments. Available for single and twin engine applications.

RS-5-1PS - Upgrades any primary TIT/CHT unit to read 4 channels of EGT or CHT, Package includes: Unit, (4) 6' cables, (4) probes. 15 oz. kit Specify probe type with order..... P/N 11-01694

RS-5-2PS - Upgrades any primary TIT/CHT unit to read 4 channels of EGT and CHT, Package includes: Unit, (8) 6' cables, (4) EGT probes, (4) CHT probes. 2.2 lb. kit..... P/N 11-01695

RS-7-1PS - Upgrades any primary TIT/CHT unit to read 6 channels of EGT or CHT, Package includes: Unit, (6) 6' cables, (6) probes. 27 oz. kit. Specify probe type with order..... P/N 11-01696

RS-7-2PS - Upgrades any primary TIT/CHT unit to read 6 channels of EGT and CHT, Package includes: Unit, (12) 6' cables, (6) EGT probes, (6) CHT probes. 3.2 lb. kit..... P/N 11-01697

PROBES

P-100 CHT Probe; screw-in type, Standard with most kits. Can be used in a pressure environment. 700°F max. P/N 10-00808

P101 - CHT Probe; Military Bayonet type, 1/4 turn locking for quick removal. To be used with the A-101 adaptor. 700°F max. P/N 10-00438

A101 - CHT Adaptor; 3/8" - 24, to be used with the P-101 CHT probe. P/N 10-00374

P-102 - CHT Probe; Gasket type, 18mm, 700°F maximum. P/N 10-01368

P-110 - EGT/TIT Probe; Hose clamp type, used with 13/64" hole. Standard with most kits. Weight: 1.6 oz. P/N 10-01591

FAST RESPONSE P-110 - EGT/TIT Probe; Hose clamp type, used with .130" hole. Optional with most kits. Weight: 1.6 oz. P/N 10-00376

Probe only P/N 10-00376

Probe w/6' cable..... P/N 10-00377

P-111 - TIT Probe; 1/8" NPT with adjustable depth. (with cable) P/N 10-25235

P-112 - TIT Probe; 7/16"-20, with adjustable depth. (without cable) P/N 10-00378

P-114 - TIT Probe; 1/4" NPT with adjustable depth. (without cable) P/N 10-00379

P-120 - Oil Temp. Probe; Can be used in a pressure environment, 700°F max. P/N 10-25245

P-128 - OAT/Carb Temp. Probe; uses a precision connector, can be used in a pressure environment, 700°F max. P/N 10-00301

P-104 - Universal Probe; Used to measure surface temperatures, 700°F max. P/N 10-00380

ENGINE MONITORS

GRAPHIC ENGINE MONITOR (SINGLE ENGINE)

Graphic Engine Monitor - STC'd Single Engine - Normally Aspirated 4 or 6 Cylinder. The GEM 602 is designed for use with all 4 or 6 cylinder piston engine aircraft. The instrument graphically displays up to 12 critical engine temperatures in a single instrument in an easy-to-read bar-graph format on a brilliant plasma display. **Features:** Displays up to 12 EGT, CHT temperatures. Lean Mode: is used during cruise to identify the leanest cylinder. Lean Mode can be entered at any time. The GEM's microprocessor analyzes EGT temperatures and indicates the leanest cylinder by blinking the appropriate column. Monitor Mode: each time that Monitor Mode is entered, the GEM microprocessor stores the EGT values into memory. Should any cylinder's EGT subsequently rise 50°F or more, the corresponding column will begin blinking to signal change in fuel flow or ignition. Test Mode: is designed into the GEM system should trouble be suspected. Entering the test Mode causes each bar column to stack up, a bar at a time, until fully illuminated, then blank. Each successive column until all six have been done. Automatic selection of the correct number of cylinders. Automatic intensity control for all lighting conditions. Whether you fly a home-built, war bird, or latest model aircraft, the GEM 602 provides a complete picture of EGT and CHT at a glance.

| P/N | Model | Description | Price |
|----------|--------|-------------------------------------|-------|
| 10-18805 | GEM603 | Single Engine, 4 cyl., turbocharged | . |
| 10-18810 | GEM603 | Single Engine, 6 cyl., turbocharged | . |

3 UNIVERSAL ENGINE MONITOR

The E3 universal engine monitor combines in one compact 2.25" format instrument all that is needed to monitor most smaller aircraft engines from two-stroke ultralight engines to medium sized four strokes such as from Rotax, Continental and Lycoming. Also most automotive engine conversions can benefit from the use of the E3 engine monitor. P/N 11-06442

INSIGHT G3 GRAPHIC ENGINE MONITOR

TC CHT PRIMARY STC PENDING - Single Engine - Normally Aspirated or Turbo-Charged with SD Data Card for 4, 6 or 9 Cylinder. **ALL NEW G3 UNITS ARE FACTORY CALIBRATED.** Combines all the ergonomic advantages of the original GEM 602/603/610 with greatly enhanced capabilities including: **Features:** • Bright bold LCD color display with many screens, and dozens of new functions • 100 times the power of the previous generation • 100 thousand times the data log space (Never run out of space) • Engine vibration measurement and analysis • Specialized analysis for propeller balance, turbulence and even landing shock • Integrates, logs data from G3, TAS Air Data and GPS for the complete picture • SD Card stores all engine, air, winds aloft and fuel data (No more lost data) • Entire aircraft life history directly on SD card in PC compatible form • Specific functionality for safe Lean of Peak operation with no detonation • Oil Temperature and Pressure • Manifold Pressure, Fuel Flow and RPM • OAT • Carburetor and Alternator Temperature • Fully compatible with GEM 602, 603 and 610 Installations (Easy Upgrade) • Buss Voltage

G3 Systems (4 Cylinder) P/N 10-03195
 G3 Systems (6 Cylinder) P/N 10-03196
Upgrade from GEM 602, 603, 610 to G3
 4 Cylinder Upgrade P/N 10-03198
 6 Cylinder Upgrade P/N 10-03197

INSIGHT TRUE FLOW 500

A new concept in fuel flow computers, True Flow 500 is designed to give pilots a simple and efficient way of reading fuel information directly on the GPS fuel pages. Eliminates tedious installation and set-up procedure and set-up procedures that are required for other fuel flow computers. Install True Flow 500 on top of the engine and connect fuel lines, GPS power, ground and RS232 RX input. Works on fuel injected or carbureted engines, but not on carbureted engines with a fuel return line. Many other STC's for installation on certificated aircraft. P/N 11-01913

GEMINI 1200 SYSTEM (TWIN ENGINE)

Graphic Engine Monitor - TC & FAA PRIMARY STC PENDING
 Twin Engine - Normally Aspirated or Turbo-Charged with Data logging for 2, 4, 6, 7, 8 and 9 Cylinder.
 Designed for twins, the GEMINI 1200 has all of the same advanced features as the GEM 610.

ALL NEW 1200 UNITS ARE FACTORY CALIBRATED.
Features:•Display up to 30 temperatures. •IAT Temperature. •Side-by-side display of Left/Right or Front/Rear Engines. •4 digit readout of any EGT, CHT, TIT, OAT and IAT.

GEM 610/1200 NOW WITH PRIMARY INSTRUMENT REPLACEMENT STC

GEM-610 SYSTEMS

Graphic Engine Monitor - TC & FAA PRIMARY STC PENDING Single Engine - Normally Aspirated or Turbo-Charged with Data logging for 4 or 6 Cylinder. ALL NEW GEM 610 UNITS ARE FACTORY CALIBRATED.
Features:•Selectable Fahrenheit/Celsius Temperatures.

•Normalization Mode: allows easy observation of any change in EGT during cruise flight. The GEM will memorize current EGT indications and electronically adjust bar graph display to align all EGT columns with the "Reference Asterisk". Any change in EGT will instantly obvious. •Lean Mode: is used during cruise to identify the leanest cylinder. Lean Mode can be entered at any time. The GEM's microprocessor analyzes EGT temperatures and indicates the leanest cylinder by blinking the appropriate column. •Monitor Mode: GEM continuously indicates actual EGT pattern in optimum resolution. Real CHT shown for each cylinder. •Trend Indicators. •OAT Sensing. •Dual TIT Annunciators. •Soft Hobbs Meter/Clock Calendar. •Automatic Data Logging of Vital Engine Temperatures into non-volatile memory. •Wireless Infrared Interface •Software configurable. •Back-lit CHT scale. •Automatic self-test at start-up. •More than a decade after the GEM revolutionized engine monitoring, GEM 610 is "The Next Generation" in engine monitoring and diagnostic systems. Specifications: •Size: 2-1/4" panel mount. •Weight installed is 3 lbs. •Power: 10-30VDC.

J.P. INSTRUMENTS FUEL SCAN -450

Provides continuous display of fuel burned in gal/hour (liter and lbs. available on special order). Also provides total fuel used, fuel remaining, endurance in hours and minutes, fuel re-quired to next waypoint, fuel reserve at next waypoint, and nautical miles/gal. Que lights indicate which function is being displayed in lower display. Auto button starts an automatic scan of the functions. Step button can index info forward or backward. Will mate with an old Shadin or Hoskins system, and will talk to a panel mount or handheld GPS. Fits in standard 2.25" instrument hole and weighs only 5oz. Depth: 1.5". Complete with instrument harness and a Flow Scan 201 or 231 transducer. Ideal for experimental aircraft. FuelScan 450 is FAA approved for certified aircraft. This comes with a Fuel Pump Transducer. The Components Included with FS450: • FS 450 unit • 450 Fuel Flow Harness • Aeroquip Red Firesleeve • 201 Xducer • Install Manual with Pilots Guide, STC, and FMS

ENGINE SCANNERS

J.P. INSTRUMENTS EDM-700 DIGITAL AND ANALOG EGT/CHT SCANNERS

All pilots know that to run their engines at peak performance means maximum efficiency! Maximum efficiency translates to substantial savings in fuel burned and engine maintenance. JPI's EDM-700 assures pilots of **Peak Precision Engine Performance Simply and Economically**. The EDM-700 includes: Computer assisted diagnostics for troubleshooting the entire system, 2-1/4" panel mount, Normalize mode, Graphics resolution, Automatically finds the first EGT to peak, display of OIL, OAT, IAT, CDT, voltage, shock cooling of two TIT's, one degree temperature resolution, selectable °C or °F, all functions have Hi/Lo pilot programmable limits, supplied with JPI's well known, grounded, fast response probes, TSO quality, FAA TSO/STC approved, 3 year warranty. All probes, harness, and hardware included. **Data Recording** - All EDM-700 and EDM-760 systems come with data recording and provide long term trend monitoring for maintaining ultimate engine health. Data Recording capability records and stores all displayed parameters and, at a later time, transfer the info to a palmtop or laptop PC. Retrieve all the data stored in the EDM-700 and 760 or only the new data recorded since your last retrieval. In either case, no data is erased in the EDM unit. PC program supplied with the unit will graph the data for display and use by other programs, such as MS Excel or Lotus 123. EDM-700 or 760 Data Recording contains a date and time clock. You may also program an aircraft ID, such as your aircraft registration no. or your name that will appear in the output data file.

Systems include EGT & CHT probes, harness, memory module, leads, and hardware

BASIC EDM-760 TWIN ENGINE SYSTEMS

The value of Digital engine temperatures for precision engine monitoring is well documented. JPI has merged the Analog and digital information into one gauge. The EDM-760 monitors 29 channels of information with 14 columns of analog information. All EDM's have a built in voltmeter monitoring high and low system voltage. All the enhancements found on the single engine EDM-700 are available in the Twin engine EDM-760, including: Digital display of OAT, TIT, OIL, CARB, IAT, CDT, and EGT/CHT, Shock Cooling displayed in degrees per minute with alarms, Normalize Mode levels the bar graph display for instant identification of engine trends during cruise, Automatically finds first cylinder to peak on each engine. EDM-760 is shipped complete including everything necessary for installation. The package contains Quick response EGT probes, Bayonet CHT probes w/wiring harness, memory module, insulating sleeves, terminals w/mounting screws. Options like Oat, Oil & CDT/IAT are available and can be added later. 3 year warranty on electronics. Size: 3-1/8" display with 14 columns, installed weight = 6 lbs. RS-232 Output port and 1 TIT function are included in the system.

All Systems which include Fuel Flow come with Transducers. 201 Transducer is for Aircraft with Fuel Pumps. 231 Transducer is for Gravity Fed Aircraft.

SLIM LINE DIGITAL ENGINE INSTRUMENTS BY J.P. INSTRUMENTS

These compact engine instruments from have a bright red display and feature central remote and individual alarms on all gauges. The gauges are easily stackable in a homebuilt aircraft panel, and come complete with sensors. Specify voltage. NOT FAA APPROVED.

TACHOMETER - Features quartz crystal and accuracy of 1 RPM. Resolution is 10RPM and includes red line alarm. Specify engine and magneto models, number of cylinders, voltage, and red line. P/N 10-24900

Manifold Pressure - Features resolution of 0.1 inches mercury, accuracy of 0.1" Hg, solid state sensor, and over boost alarm. Range: 0-50" P/N 10-24910

Outside Air Temperature (O.A.T.) - Features resolution of 1° and has range of -40 to 195°F. P/N 10-24940

Oil Temperature - Features resolution of 1° and over temperature alarm of 235 F. P/N 10-24960

Volt/Ammeter - Features resolution of 0.1 volts/amps and discharge alarm. Ammeter Shunt - (100 Amp) P/N 10-24925

Oil Pressure - gives readout in PSI and features resolution of 1 PSI and an under pressure alarm. P/N 10-24930

Turbine Inlet Temperature (T.I.T) - Features resolution of 1° or 10° and a Hi-temperature alarm at 1650° F. P/N 10-24950

Fuel Pressure - Features Resolution of 1 PSI and under pressure alarm. Slimline Carb 1-8 PSI P/N 10-24970-30B

Slimline Injected 10-32 PSI P/N 10-24970-30A

ENGINE SCANNERS — FUEL COMPUTERS

JPI EDM-730/830

The EDM-730/830 revolutionizes engine monitoring by the integration of brilliant full color graphical LCD display with the extremely popular EDM 700/800 series functionally and yet reduces the package size to the smallest on the market! The EDM-730 packs more features, functionality, and information onto its large full color screen than any other monitor available and features larger characters for easier reading. Oil pressure has also been added to the entire EDM series line. Mounting is a breeze due to its standard 3-1/8" format, and because it can be mounted in either portrait or landscape orientation, thus accommodating virtually any panel configuration. Depth behind the panel is an amazing 2-1/2". The unit is "Plug and Play" compatible with existing EDM-700/800 units. Full Color LCD Display: * More Graphics * Large digits for easy reading. * Full color parameter range markings. * FAA STC/TSO approved. Package Form Factor: * Standard 3-1/8" Mounting from the front. * Face is offset from center to better fit in spaces where other equipment is currently located. * Can be mounted in four different face orientations to satisfy tough mounting scenarios. * Depth is nearly the same as the height of a business card, 2.5". * Plug and play compatible with the JPI EDM-700/800 harnesses for easy upgrade. * Front mounted USB jack for easy software upgrades and data downloads.

JPI EDM 800 DIGITAL/ANALOG SCANNERS WITH AUTOMATIC HORSEPOWER COMPUTING

Dot identifies cylinder associated w/digital info. Automatically advances.

Missing bars indicate CHT Trend. Highest CHT even by 1° show as CHT bar.

EGT (1340°F) left side CHT (376°F) right side

Step button can index info forward or backward. All programming done from front panel simply with 2 buttons, no switches or toggles.

Percent of HP using RPM/MAP/OAT, memory & fuel flow shown constantly.

Last column displays Turbine Inlet Temp or Oil Temp.

Adjustable column height.

Digital display of 24 functions such as DigiScan® Fuel Flow, OAT, TIT, IAT, CDT, & Oil Temp. LF, Lean Find, automatically finds first & last cylinder to peak. Displays histogram of each cylinder that peaks.

The EDM-800 instrument has all the advanced functions of the EDM-700, but incorporates some new features that can only be found on JPI products. No longer do pilots have to waste time looking up and guessing the present percentage of horsepower (HP). There are new easily readable digits located at the top of the EDM display which continually show the percentage of horsepower being used, and can also display RPM. What is truly unique about this new feature is that it can also display HP over lean. HP can be displayed for either carbureted or injected engines, even if they are turbocharged. Now you can be sure that you are within the horsepower limits of your engine, and in IFR conditions, this can be quite a task. At the present time HP is only available on single engine 4 and 6 cylinder engines. The EDM-800 calculates percent of horsepower in an Over lean condition. Lycoming & Continental horsepower charts stop at peak EGT on the first cylinder to peak. Gami has developed a method of going over lean on all cylinders. When you are over lean, every ounce of fuel is burned and used to create horsepower and heat. Cooling is accomplished by excess air in the combustion chamber. JPI has developed an algorithm to calculate horsepower based on fuel consumption and other factors. To obtain HP in this over lean condition you must have an EDM-800 engine analyzer which includes fuel flow, RPM, MAP, OAT, Memory and Gami tuned injectors. In addition to JPI's HP function, the EDM-800 also has a Memory Module that can store up to 25 hours of engine data, which can be downloaded to a laptop or palmtop PC. When using the memory function, all functions of the EDM will be recorded, including Fuel Flow and HP.

EDM 930 & 930T PRIMARY

True TFT Transflective Custom Display - Display brightness increases with ambient brightness, always sunlight readable. All gages have a Variable Scale and alarm limit to fit your engine. New form factor, panel size: 6" w X 4" h X 2.9" d. Records all engine parameters at 2 to 255 second intervals. Plot the data with EZplot. All probes and transducers supplied. High Flow transducer (120 GPH) included in EDM930T Compatible with and transmits RS-232 data to most MFD's, also sold less the display.

ducers supplied. High Flow transducer (120 GPH) included in EDM930T Compatible with and transmits RS-232 data to most MFD's, also sold less the display.

PISTON FUNCTIONS: • Tachometer/Hobbs • Manifold Air Press • 6 EGT/CHT • Oil Temp. • Oil Press • Fuel Quantity • Fuel Press • OAT • Carb. • Temp • TIT, TIT-2 • CDT • GMT • Volts/Amps 1-2 • Differential EGT • Shock cooling • GPH • Fuel remaining • Fuel Endurance • Fuel required to GPS waypoint • Fuel used • Percent of horse power • Receives data from any GPS and transmits data to any GPS.

J.P. INSTRUMENTS EDM-960

The EDM-960 is the latest graphic engine analyzer for Piston Engine Twins from JP Instruments. The EDM-960, STC'd as Primary engine instrument, takes the best from their EDM-760 and adds total engine display monitoring including Tach, % Horsepower, Hobbs, Manifold Pressure, EGT, CHT, Oil Pressure, Oil Temp, Fuel Flow, Outside Air Temp, Volts, and Amps plus optional Fuel Pressure, Fuel Quantity, and Turbine Inlet Temp. Each individual engine display has a scale and alarm limit to fit your particular airplane. As with the popular EDM-760, the EDM-960 has internal memory that records all engine parameters that can be recalled and displayed on your computer to keep track of the health of your engine. Plus: warnings for shock cooling and excess temperatures, leaning assist for both "lean of peak, and "rich of peak".

FUEL TOTALIZERS - FUEL GAUGES

SHADIN MINIFLO TOTALIZERS

MINIFLO SYSTEMS - Miniflo is the miniature fuel flow meter which constantly displays fuel flow in the lower windows. The fuel used and fuel remaining functions are continuously computed and can be displayed in the upper window by pressing the appropriate button. Endurance (time remaining) can be displayed in the upper window by using the rotary switch. STC's for most aircraft. Power: 12-28V DC Furnished in gallons readout (pounds also available). Weight: 31 oz. (meter & transducer). Size: 3.25" x 1.25" x 7.5". Miniflo now provides all features of standard Miniflo system plus a Loran interface as described in Digiflo above. This gives the pilot NM/Gal, Gallons to Destination and Gallons of Reserve. Specify aircraft and engine model on all Miniflo orders. Prices vary according to aircraft model.

Single Engine/Loran GPS Miniflo P/N 10-24735.....

SHADIN DIGIFLOW TOTALIZERS

Digiflo-L is a Digital Fuel Management System designed to provide complete fuel management information under real flight conditions without any manual entry of data (after entry of the initial fuel on board information). Digiflo-L is connected to the engine fuel flow transducer for fuel flow information and to the Loran-C or GPS receiver serial

port for navigation data (ground speed, distance and estimated time en route). This system is also capable of transmitting the fuel information to the Bendix/King KLN-88, KLN-90, and Garmin GPS navigation receivers, for additional calculations and display of fuel management data.

Single Engine/Loran GPS Digiflo P/N 10-02212..... **Please Call**
Twin Engine/Loran GPS Digiflo..... P/N 10-02213..... **Please Call**

SHADIN F/ADC-200 FUEL/AIR DATA COMPUTER

The affordable Shadin F/ADC-200 Fuel/Air data computer maximizes aircraft range and fuel economy by providing automatic updating to your GPS for true air speed, winds aloft, wind components, density altitude, OAT, pressure altitude, fuel flow rate, fuel used, fuel required to destination, fuel endurance, and more. Interfaces with most popular GPS units including Bendix King KLN series, Garmin 150, 155, 165, Trimble

2000/3000 series, and Arnav. Please specify aircraft make/model, engine make/model, serial number of aircraft, and GPS make/model at time of order. P/N 10-24768..... **Please Call**

IMPORTANT: For all Shadin orders, please specify engine make and model number; aircraft make and model number; specify gallons, pounds or liters on readout and if Loran or GPS will interface. Specify make and model.

SHADIN SYSTEMS PRICING

Prices for Shadin Microflo, Digiflo, & Miniflo systems vary according to aircraft/engine models. Call Aircraft Spruce for your best pricing on any Shadin system. Aircraft Spruce guarantees to meet or beat any competitor's current advertised prices.

FREE FLIGHT TRA 3000 RADAR ALTIMETER / INDICATOR

The TRA 3000 Radar Altimeter, combined with the TRI40 Radar Indicator, provides precise AGL information from 2,500 feet down to 40 feet. This real-time system offers an extra measure of operational safety during landing, navigation, and hovering. It is especially useful in flying search and rescue missions, forestry operations, pipeline maintenance, offshore helicopter operations, aeromedical emergency medical services, border patrol, and electronic news gathering operations. The transmitter / receiver and antenna fit in a single lightweight & aerodynamic unit that is easy to install.

TRI 40 System Altimeter..... P/N 10-02519.....

FREE FLIGHT TRA 3500 RADAR ALTIMETER / INDICATOR

The TRA 3500 Radar Altimeter, combined with the TRI40 Radar Indicator, provides precise AGL information from 2,500 feet down to ground level and consists of a remote unit and dual antennas for greater accuracy. ARINC analog outputs allow seamless integration with other on-board equipment such as flight director systems. Its patented "anti-rotor-modulation" capability prevents altitude wandering while hovering in a helicopter. This real-time radar altimeter system offers an extra measure of operational safety during landing, navigation, and hovering. It is especially useful in flying search and rescue missions, forestry operations, pipeline maintenance, offshore helicopter operations, aeromedical emergency medical services, border patrol, and electronic news gathering operations.

FUEL LEVEL SYSTEM BY DATCON

This Datcon fuel gauge and senders are designed for use with 12 volt electrical systems in automotive, marine and homebuilt aircraft applications. The gauges have a round 2" diameter case with chrome bezel. Mounting brackets and instructions are furnished. 240-33 Ohms.

.....Gauge No. 100177 with steel case P/N 100177
Lighting Kit (12V) P/N 06215-00

UNIVERSAL SENDER FOR DATCON GAUGES

This Fuel Level Sender has removable mounting plate which can rotate 180° to mount on either right hand or left hand position. For tanks 6"-15" deep.

P/N 05-16710.....

STEARMAN FLOAT-TYPE FUEL SIGHT GAUGE

Float type fuel sight gauge used in Stearman dusters. Plastic tube with fuel level marking and 3/4" male pipe thread fitting. 16" long overall, 8" tank depth. 5-1/2" travel. Use AN867-6 Aluminum

Welding Flange to mate with above gauge. P/N 10435
Aluminum Welding Flange to mate with above gauge. P/N AN867-6.....

SPIRAL ACTION FUEL GAUGE

A precision magnetic gauge for narrow vertical tanks. Rubber float travels on spiral rod to record fuel level on hermetically sealed side-reading dial marked E, 1/4, 1/2, 3/4, F. All aluminum construction. Housing has 1-1/2" NPT male threads for connection to threaded bushing (see below). Available in three lengths:

Length 'L' 15", Float Travel 12-3/4" P/N 05-16900.....
Length 'L' 19", Float Travel 16-3/4" P/N 05-17000.....

Welding Bushings - 6061 aluminum, 2-1/4" O.D., 1/4" wall. Available in 1" & 2" length. Use with welding ring to provide base for attaching to fuel tank with bolts or rivets. Ring may be welded at any point along bushing to permit depth adjustment. Specify bushing length. For use with Spiral Action Gauge.

1" Bushing P/N 10362-1

2" Bushing P/N 10362-2

Welding Ring - 6061 aluminum, 4-3/8" O.D., 2-1/4" I.D. to fit above welding bushings. For use with Spiral Action Gauge. P/N 10363.....

MECHANICAL FUEL GAUGE

Lever-action gauge measures fuel level from full to empty on fractional dial. Matte-white markings on 2" black dial with red "No Take-off" sector below the 1/4 full mark. Cork float has 4" travel. Wire arm 12" long may be cut off to required length, wire bent to 90° angle to secure cork float. 1-13/16" between mounting hole centers. Hermetically sealed dial assembly has magnetically driven, silicone-damped or position pointer to prevent flutter. P/N 05-16700.....

Accessories

Weld Adapt FLANGE 10361 P/N 10361.....
Gasket for 05-16700..... P/N 15-4.....

ULTRALIGHT FUEL FLOW METERS

For ultralight engines, a fuel totalizer provides instantaneous fuel flow rate, fuel used, fuel remaining, time remaining and user settable alarms. Easy to calibrate and simple to use. Install included transducer in fuel line, hook up 12VDC, and go fly! Available in gallons or liters for most twocycle engines.

30LPH W/ Standard P/N MGU001L.....
8GPH W/ Standard P/N MGU001G.....

LUSCOMBE/AERONCA TYPE FUEL GAUGE

This direct reading fuel quantity gauge is usable in tank depths up to 9" such as Luscombe & Aeronca. Not FAA approved. Excellent for homebuilt aircraft. Displays fuel level from full to empty. Size: 1-1/2" diameter face.

Fuel Gauge P/N 05-00029
Rebuild kit for Fuel Gauge P/N 05-00031

IN

FUEL COMPUTER — INSTRUMENT HOOK-UPS

SELECTING FITTINGS FOR INSTRUMENT HOOKUPS

1. Make sketch of instrument layout.
2. Draw lines showing routing of tubing from instruments to the fire wall or other locations.
3. Determine diameters of instrument lines. 1/4" diameter tubing is used for most instruments. The artificial horizon and directional gyro should have at least 3/8" diameter lines.
4. Select the required AN or Nylo-Seal fittings.

EXAMPLE NO. 1: HOOKUP OF AIRSPEED, ALTIMETER, & RATE OF CLIMB

The aluminum lines (1/4-in. diameter) will be flared and attached to the fittings with AN818-4D nuts and AN819-4D sleeves.

EXAMPLES OF EQUIVALENT AN-TYPE AND NYLO-SEAL FITTINGS

| AN Fitting | Thread Size | Nylo-Seal Fitting |
|------------------|----------------------------|-------------------|
| AN816-4D Nipple | 1/4 tube x 1/8 pipe | 268-N 1/4 |
| AN816-6D Nipple | 3/8 tube x 1/4 pipe | 268-N 3/8 |
| AN818-4D Nut | 1/4 tube | Nuts and Sleeves |
| AN818-6D Nut | 3/8 tube | are included with |
| AN819-4D Sleeve | 1/4 tube | all Nylo-Seal |
| AN819-6D Sleeve | 3/8 tube | fittings. |
| AN822-4D Elbow | 1/4 tube x 1/8 pipe | 269-N 1/4 x 1/8 |
| AN825-4D Tee | 1/4 tube, 1/8 pipe on run | 272-N 1/4 x 1/8 |
| AN826-4D Tee | 1/4 tube, 1/8 pipe on side | 271-N 1/4 x 1/8 |
| AN912-1D Bushing | 1/4 pipe x 1/8 pipe | No Equivalent |

*Use AN816 Nipple and Nyloseal 266-N Female Connector to transition from AN-type fittings to Nyloseal fittings.

Each connection between the aluminum lines and the fittings requires either all AN818-4D nut and AN819-4D sleeve (1/4-in. line) or an AN818-6D nut and an AN819-6D sleeve for 3/8-in. line.

*Turn/Back vacuum set at 2 In. Hg.

HELPFUL HINTS

It is good practice to put some form of water trap in both the pitot and static lines. It should be placed at the lowest practical point in the system between the pressure source and the instrument. The trap can be a simple T-fitting with a cap:

EXAMPLE NO. 2: HOOKUP OF GYRO INSTRUMENTS

IN

ARNAV FUEL COMPUTERS

The FC-10 fuel computer fits into a 2.25 inch instrument hole, and can provide a wealth of information to the pilot. The unit provides information on how much fuel has been burned, how much is still on board, the endurance at the current engine power, and even has a low fuel annunciator that comes in when fuel level falls to the point indicated by the pilot. The fuel computer can be quickly calibrated to calculate at gallons, liters, kilograms, or imperial gallons. The compact unit uses a fuel flow transducer that is attached to the fuel line at the fuel manifold on the engine. The unit has an appropriate serial output that will allow its fuel data to be exported to most LORAN and GPS systems. This makes them more powerful flight management tools by allowing them to access the onboard fuel information. Twin engine pilots will need a second unit, the FT-10. It monitors the second engine and provides that information to the FC-10 for pilot display. The twin installation requires two 2.25 inch holes – one for each monitor. The FT-10 monitors the fuel flow to the second engine, and sends information to the FC-10 that monitors the total fuel used and the total fuel on board. The FC-10 system is STC'd as the primary fuel instrument on all Bonanza and Debonair aircraft except Turbo Bonanzas after 1981. The FC-10/FT-10 system is STC'd for the same function in all 55 and 58 Barons, the Duke series and the Twin Bonanza.

FT-10 Fuel Totalizer displays fuel flow and fuel burned. FT-10 w/116-0201 piston transducer, single engine

WHEN ORDERING, PLEASE SPECIFY ENGINE MAKE & MODEL.

OVERHAULED INSTRUMENTS

OVERHAULED INSTRUMENTS

These instruments are overhauled and certified at our affiliated instrument repair facility and are available on an outright purchase basis (stock permitting). For outright purchase, you will be billed the purchase price plus core charge. Core charge is credited upon return of acceptable core. We can also overhaul your instrument at the price shown, and no core charge will be billed. Allow 2-3 weeks for overhaul of your instrument. If in stock, outright purchases can ship within 2 days. Warranty details are included with the instrument.

To send in your instrument for overhaul or to return a core, please contact Aircraft Spruce Customer Service in advance for an RMA number and then ship instrument to Aircraft Spruce East in Georgia.

GILL BATTERIES

Founded in 1920 in Redlands, CA, Gill has become the OEM original equipment battery for Raytheon, Cessna, Learjet, Mooney, Piper, Ayres, Airtractor, Maule, and many other manufacturers. Gill's 600 series batteries have proven to be the high performance, high discharge lead-acid batteries need by jet and turbo-prop aircraft. Gill's line of sealed recombinant batteries are now available in most popular sizes and are FAA approved. Gill also provides batteries for battery powered carts which are available by special order.

NOTE: Part Numbers with an asterisk (*) ship with acid.

NOTE: The data in the "Application" section above is intended as a reference guide only. Some installations may vary and require airframe or battery box modification. Some applications may require field approval and some listings are pending FAA approval. Verify correct battery model for your aircraft before ordering. Dry charged Gill Batteries are furnished with electrolyte (except overseas) unless requested otherwise.

GILL 12/24 VOLT CHARGER

Perfectly packaged, this compact charger is big on performance. Offering adjustable amperage for 12 & 24V batteries, digital 24-hour timer, LED display, constant voltage and constant current for the most efficient way to charge. Wt: 9 lbs. This unit is switchable from 100 Volt to 220 Volt.

P/N 11-01540

GILL 24 VDC CHARGER

Small, lightweight. 'Smart' state-of-the-art software. Charger starts when battery requires charge •Adjusts to all Gill 24V batteries. LED progress indicators: indicates battery charge level. 'Smart' Circuit will not overcharge battery. Circuit Protection - reverse & short protection •Sleep mode when battery is charged. Specifications: Input: 110-120VAC @ 60 HZ 3.4 amps, Output: 27 VDC Nominal 7.7 Amps, Oper. Temp.: 23-104°F, Wt: 3.3 lbs.

3 Qts.....P/N 11-00305.....

BATTERY WARRANTY (APPLICABLE TO GILL & CONCORDE)

The manufacturer will replace with a new battery without charge (except for transportation) any battery which fails in service within 90 days. Addition of any chemical other than water or battery grade sulfuric acid voids this warranty. After expiration of Service Guarantee, adjustment will be made on pro-rate basis based on unused months of service. Batteries that are broken, discharged or fail due to freezing or abuse are not covered.

CONCORDE BATTERIES

Since their introduction in 1986, several styles of RG® Batteries, likewise known as VRSLAB, SLAB, or AGM batteries, have been developed by Concorde Battery Corporation. Concorde Battery has a dedicated Research and Development Department that is continuously improving and refining its recombinant gas product line. Formed in 1977 Concorde's factory was dedicated to manufacturing dry charged (vented or flooded electrolyte) aircraft batteries. In 1985 Concorde developed its first recombinant gas battery with absorbed glass mat separators. Now, with the proven reliability of Concorde's recombinant gas (RG®) aircraft batteries and great acceptance in both military and commercial applications, over 90% of its manufacturing has been changed over from dry charged to RG® production.

CONCORDE SEALED LEAD ACID BATTERIES

RG-25 RG-25XC RG-35 RG-35AXC RG-24-11 RG-24-11M RG380E/44

Concorde's line of sealed lead acid batteries is designed with larger positive and negative plates for more capacity and greater starting power even at sub-zero temperatures. They feature real aircraft quality terminals, patented copper alloy internally threaded terminals brass terminal bolts with conical silicon bronze lock washers, recommended 70" pound terminal torque, more than 20% higher capacity than earlier models, and a molded carrying or lifting handle. These valve regulated sealed lead acid batteries feature fully aerobic sealed construction; no spillable electrolyte or flammable gas emissions. "XC" or "AXC" in the model number indicates extra cranking power, and "M" in the model number indicates manifold venting.

CONCORDE PLATINUM SERIES LEAD ACID BATTERIES

CB25 CB25XC CB35AXC CB35 CB24-11 CB24-11MXC

The Platinum Series® battery line from Concorde features more cold cranking amperes for one minute at 0°F, and more 30 minute emergency capacity than any other brand. Platinum Series® batteries provide more one hour capacity than any other brand as well as more high rate performance. These batteries utilize real aircraft quality copper alloy terminals with silicone bronze bolts and conical washers. The batteries listed in the chart below which are not described as "Platinum" are the original series of Concorde lead acid batteries.

BATTERY WARRANTY

(Applicable to Gill and Concorde)

The manufacturer will replace with a new battery without charge (except for transportation) any battery which fails in service within 90 days. Addition of any chemical other than water or battery grade sulfuric acid voids this warranty. After expiration of Service Guarantee, adjustment will be made on pro-rata basis based on unused months of service. EL

BATTERIES - CHARGERS

POWERSONIC BATTERIES

Power Sonic sealed maintenance-free batteries allow safe, trouble-free operation in any position. You never need to add electrolyte; gases generated during over charge are recombined in a unique "oxygen cycle". Under normal operating conditions, 4 or 5 years of dependable service can be expected in standby applications, or between 200 and 1000 charge/discharge cycles, depending on depth of discharge. Made with high-impact ABS plastic bases, using a carefully controlled plate-making process to provide excellent output per cell. This high energy density results in superior power/volume & power/weight ratios. Temp. range: -76° to +140°F.

3-AMP BATTERY - Ideal for aircraft with power requirements but no electric starter. Designed to power instruments radios, strobes, etc. This unit may NOT be charged from the onboard charging system. Use dual-rate charger. 5.23"l x 2.64"h. Weight: 2.6 lb.

P/N BT020.....

18-AMP BATTERY - Suitable for powering the electric starter of most Rotax and other 2-stroke engines as well as on-board electrical devices. May be maintained by on-board charging systems (see regulator/rectifiers). 7.13"l x 2.99"w x 6.57"h. Wt: 12.8 lbs.

P/N BT021.....

26-AMP BATTERY - Where maximum cranking power is needed or several accessories are being used, this is the battery that can handle it. May be maintained by on-board charging systems. Also recommended for the 582/532 engines when used in extremely low temperature environments. 6.89"l x 6.54"w x 4.92"h. Wt: 21 lbs.

P/N 11-03155.....

ATP HIGH POWER BATTERIES

ATP's UltraStart-Red & UltraBat-13 batteries are the ultimate in high power density non-spillable SLA batteries. The UltraStart-Red is ideal for starting light aircraft engines for ultralight and experimental aircraft and other internal combustion engines. Typical applications include all Rotax 2 stroke engines and HKS 4-stroke engines. For engines 100HP and up UltraStart-Red - Voltage: 12.6 VDC, Energy: 5AH cap., Peak current: 250A instantaneous, Weight: 4.4 lbs., Size: 2.7"l x 3.5"w x 4.5"h

UltraBat-13 - Voltage: 12.6 VDC, Energy: 13AH cap., Peak current: 650A instantaneous, Weight: 10.8 lbs., Size: 3-3/8"l x 7"w x 5"h

BATTERY CORROSION GUARD

Battery Corrosion Guard forms a thin protective coating that will neutralize battery acid on all treated areas. It is an excellent way to clean the battery, hold down straps, and all metal parts you want to protect including cables, clamps, box, and posts. Excellent for aluminum battery boxes. Widely used in the aircraft, truck, and boat industries.

BATTERY TERMINAL TOOL

This unique tool is designed to provide positive tightening of battery terminals on all popular brands of lead/acid aircraft batteries without over-torquing and without the danger of an electrical short. The tool is made from steel for rugged service and is fully insulated with a rubber hand grip for protection against electrical shorts.

P/N 12-16200.....

GILL TCT-1000 12V/24V CAPACITY TESTER

The TCT -1000 Battery Capacity Analyzer has been designed to perform automatic capacity testing of 12 and 24 Volt lead-acid batteries. This unit is capable of accurately measuring the capacity of a fully charged battery with a rating between 10 and 59 amperes. It is self-contained and easy to operate. The load tester will display, in percentage, the conformance to the battery's one hour rating.

P/N 11-03302.....

PULSETECH POWERPULSE 12VOLT WITH LUG

PowerPulse is not a charger. It's a performance device designed to help batteries charge faster and provide maximum performance and power. This patented unit uses a revolutionary ReNew-IT Pulse Technology™ to safely prevent the main cause of battery problems and failure: sulfation buildup on lead-acid battery plates. Used extensively by the consumers and the U.S. Military worldwide for almost ten years. PowerPulse can be powered in two different ways. When the battery is being charged -- either by an onboard charger or a separate charging system -- it will use the charging current as a power source. The rest of the time it uses a small portion of the battery's own energy so it is working 24-hours a day. The PowerPulse system can also be used together with an existing charging system. In fact, it will work even faster and stronger. This means batteries can be both charged and desulfated at the same time.

P/N 11-07464.....

SEALED IMMOBILIZED ELECTROLITE BATTERIES (GEL TYPE)

•Maintenance-free operation •Excellent shelf life •Long cycle life •Can be mounted on its side •Delivered fully charged and ready for use •Quality construction provides superior resistance to shock and vibration •Long life w/a charging voltage of 13.8V +/- .2V •Need adjustable voltage regulator such as the LR-3 so that charging voltage can be set at 13.8V •No corrosive gas generation •DOT & IATA approved for shipment

by air as dry cells • 300 Starting AMPS •Warranty 1 year or 100 hours.

ODYSSEY DRYCELL BATTERIES

P/N 11-01651

P/N 11-02233

P/N 11-01945

Odyssey batteries, with an eight year design life saves you time and money because you do not have to replace your battery as often. It is also the ONLY battery that is capable of delivering a large number of deep cycles - up to 400 when fully discharged or up to 500 when discharged to 80%. Plus, the battery is specially designed for high vibration applications. Unlike conventional batteries that need to be recharged every six to twelve weeks, the Odyssey battery will maintain up to 50% state of charge after 2

years if stored at room temperature (77°F). At temperatures lower than 77°F, storage times will be even longer. The cranking power of Odyssey batteries is double to triple that of equally sized conventional batteries, even when the temperature is as low as -40°F. Odyssey batteries may be shipped worry free by UPS/Federal Express or air. 2 Year Warranty.

KELLY BC3000 BATTERY ANALYZER

"Your Battery M.D." Portable and cordless the BC-3000 is a lightweight fully automated battery analyzer assessing the health of all lead-acid aircraft batteries with an ampere hour range of 1-59.

Connect the battery using the included quick battery connection adapters, the unit automatically senses and selects 12 or 24 volts, set the battery rating and press start, that's it. One hour later your test is complete and the

health of your battery is displayed P/N 08-07161.....

BATTERY BOXES - BATTERIES

ALUMINUM BATTERY RACKS & BOXES

RACK

BOX

These top quality battery racks and battery boxes are constructed from 5052 aluminum and are heli-arc welded. A corrosion resistant epoxy powder coating is applied using an electrostatic process and oven baked for a long lasting finish. Complete hold down hardware kits are provided with all racks and boxes, and mount flange are pre-drilled for mounting ease using 3/16" diameter bolts. Use battery racks when mounting in a ventilated area. Use battery boxes when mounting battery in a confined area, where enclosed battery protection is required. Battery boxes include a 1/4" tube for venting and drainage. Specify make and model of battery and horizontal or vertical mount when ordering.

Bumper Seal 1-1/2"

P/N 11-05612

AIRCRAFT BATTERY HYDROMETER

Special Tester designed for testing aircraft batteries. Requires only small amount of fluid & ideal for close quarters. Float calibrated from 1.100-1.300 Sp. Gr. in 5° intervals. P/N 11-01674

AIRCRAFT BATTERY LOCK

This simple locking device is designed to disable the battery from the electrical system which cuts off all power to the aircraft unattended many pilots disconnect the battery and lock the panel door. However, many panel locks are easy to pick and pry open. If a

thief is able to unlock the panel door, it is simple to reconnect the battery. Then all on would have to do is go inside the plane through the emergency door, which is often left unlocked with a key, the engine can easily be started and the plane can be flown away. The batter lock is constructed using a tough space age plastic polymer and a seven pin round ball bearing lock that is impossible to pick which in turn prevents aircraft theft and increases security. P/N 11-02753

BATTERY MAT

The Battery Mat is the world's only acid neutralizing and absorbing mat designed for use beneath any lead-acid battery. Each mat is simple, efficient, and cost-effective. It's ideal for use with all aircraft, as well as standard and heavy duty equipment. The acid-neutralizing and absorbing fabric is patented and manufactured with recycle

material in the U.S. Battery Mat absorbs and neutralizes battery acid that may leak or result from a "boil over", prevents corrosion, cushions vibration shock, is simple to use and install, and is safe to handle. Width: 12". Sold by linear ft. P/N 11-00170

BOGERT BATTERY BOX NYLON FLANGES

Improve Starting Performance. Easier Removal & Installation of Battery. May prolong life of battery and starter. Less expensive to modify existing box than to replace. Compatible with our famous "Low Loss" Cable Kits! Eliminate extra connection on outside of the battery box. Do away with the troublesome braided negative strap. Nylon Flanges replacement or experimental. P/N 11-02892

Nylon Flanges STC'd / PMA'd P/N 11-02893

BOGERT CONCORDE BATTERY POST ADAPTERS

Aircraft using Concord CB-35A and RG-35A batteries must install two PN 1-1-6 adapter plates to the battery posts before completing the Battery Box Modification. These adapter plates raise the battery post height to equal the post height of standard G-35 series batteries. P/N 11-02891

BATTERY CHARGERS

BATTERY CHARGERS BY SCHAUER

Over 70 years of manufacturing experience assures, the user of the finest line of battery chargers—solid state circuitry, non-aging silicon rectifiers at low prices. All chargers furnished with complete operating instructions. One year warranty

CR612 12 VOLT 10 AMPERE AUTOMATIC

This charger has 5 times the charging rate of the 2 ampere model. Charges average 12V battery in 3 to 7 hours. Equipped with ammeter, 3-wire AC cord, 6-ft. DC output cord with heavy duty plier type battery clips and carrying handle. Size: 7-3/8"H x 9-3/8"W x 6"D. Wt.11.75 lbs. Designed for overnight use. P/N 11-00890.....

SR5024WC 24 VOLT 5 AMPERE AUTOMATIC

This charger will charge 24V batteries at a 5 ampere rate. Ideal for aircraft batteries, diesel starting engines, golf carts, electric cars, standby equipment. Size: 7.25"H x 9.25"W x 5.75"D. Wt. 4-3/8 lbs. Designed for overnight use. P/N 11-00885.....

TB SERIES

24 VOLT 10 AMPERE • 24 VOLT 20 AMPERE TEMPERATURE-VOLTAGE COMPENSATED =

Highly advanced, fully automatic charger which reduces from full charge rate to a safe maintaining charge rate as the battery becomes charged. Can be left connected for extended periods without danger of overcharging. Supplies the proper charge in the hot-test or coldest weather and is maintained at proper voltage even when the AC line voltage varies ±10%. Size: 11-1/4"H x 8-1/4"W x 7-7/8"D. 24V 10A-Wt. 22.5 lbs..... P/N 11-00889..... 24V 20A-Wt. 29.5 lbs..... P/N 11-00891.....

MANUAL CHARGERS

Manual chargers must be disconnected when battery is charged to prevent overcharging and damage to the battery. Normal indication that battery is charged is when ammeter stabilizes for one hour.

DX5 10 AMPERE TRI-POWER MANUAL

Charges 6, 12 & 24V batteries at a 10 ampere rate. Will also charge four 6V or two 12V batteries at 10 amps when connected in series. Equipped with ammeter voltage selector switch, DC circuit breaker, 3-wire AC cord, 6-ft. DC output cord & carrying handle. Size: 8.25"H x 11.25"L x 7.875"D. Wt. 20.75 lbs. P/N 11-00886.....

12V 50A STARTER/10A CHARGER

A combination 10 amp manual battery charger and 50 amp engine starter. When connected to the battery and 120V AC outlet, it will provide up to 50 amps of cranking power, sufficient to turn over the average engine. Size: 7.25"H x 9.25"W x 5-3/4"D. Wt.12.75 lbs. P/N 11-00892.....

SCHAUER 1A AUTOMATIC BATTERY CHARGER

This fully automatic charger can be left on the battery indefinitely. Features include indicator lights, overload protection, reverse polarity protection, and small size (4" x 3" x 2"). Charges, maintains, and conditions 12V batteries in stored vehicles, such as aircraft, cars, motorcycles, mowers, etc. Ten foot long cordset includes quick charge battery clips and ring terminals. Wt: 2 lbs. P/N 11-04407.....

FLEET FAST CHARGER/ENGINE STARTER BY SCHAUER

This fast charger/engine starter on wheels provides both low and high charge rates as well as a starting function to start engines. This charger provides 6, 12, & 24V, 60 amp fast charge rate and 300 breaker to protect charger and battery from incorrect hookup, and a one hour timer for automatic shut-off or continuous charging. 2 year limited factory warranty. 53 lbs. P/N 11-00887.....

KWIKSTART 6290 POWER SUPPLY

Equipped with 2 UL listed 12V, 22amp hour DC High Performance batteries. Ideal for jump-starting aircraft, cars, trucks, boats, RV's and tractors. Also has a convenient switch when moving from 12 to 24V settings. The operator also has up to 100 hours of portable 12VDC power for cell phones, power tools, work lights and more. Also equipped with a bright emergency light. Equipped with a 110V, 1000 mil amp charger with built in overcharge protection to prolong battery life. P/N 11-02487.....

THE BATTERY MAINTAINER SOLAR BATTERY CHARGER

The Battery Maintainer is the best device available to ensure that your battery will always be "topped off" and fully charged. It has the capacity to keep any 12 volt battery charged with as little as one full hour of sunlight per day. The life of your battery will be dramatically extended by using the Battery Maintainer. It features a diode to prevent the battery from discharging on cloudy days or at night. It is constructed with a glass face and black molded base. Size: 5-1/4" x 11" x 3/8" thick. Output: 100 ma 16 VDC full sunlight. Connects to battery via 12V "hot" cigarette lighter plug in aircraft. For 24 volt use two units. LED Light not included. P/N 01-28312.....

SOLARGIZER AVIATION BATTERY LIFE EXTENDER

Solargizer is the only one of its kind in the world. It is not a battery charger, but a proven, patented electronic device designed to eliminate the #1 cause of battery problems and failures – sulfation. Whether you deal with aircraft, ground equipment, or virtually any other type of vehicle, Solargizer will dramatically extend the life of your battery, increase performance efficiency, reduce recharge time, extend battery capacity so your battery runs longer between charges, and even maintain a charge indefinitely no matter how long your aircraft or vehicle sits unused. Solargizer is small, weather-proof, and easy to install. Because it keeps batteries in optimum working condition, the Solargizer system helps reduce downtime, battery maintenance and replacement costs. And it even protects our environment by reducing the number of batteries needlessly discarded every year.

BATTERYMINDER® BATTERY CHARGER 12V & 24V

Both model BatteryMINDers are "Smart" 3 stage charger /maintainer /conditioners that extend both performance and life of 12-Volt and 24-Volt sealed and wet (filler cap) Concorde and Gill FAA-PMA Certified LA batteries. The voltage settings and charge rates have been chosen, after conferring with leading aviation battery makers in the U.S. By providing each of these BatteryMINDER units with an "At-the-Battery" temperature compensating sensor, batteries can be safely charged and maintained for extended periods in temperature extremes from 32°F to 125°F. Without this type temperature sensing, batteries will be under-charged in colder temperatures (<60°F to 32°F) and over-charged in high temperatures (>80°F to 125°F).

1-year 100%money-back guarantee+five (5) year "no hassle" warranty

CHARGERS - APU'S - SOLAR PANELS

OPTIMATE DIAGNOSTIC DESULFATING CHARGERS AND TESTERS

OptiMate 5

OPTIMATE 5 can SAVE a neglected / sulfated* leadacid battery unable to accept charge from the engine charging system (even after jump starting). The multi step charging system is suitable for any type of 12V lead-acid battery. During the 24/7 auto storage control the battery is tested every hour and recharged as necessary. The universal input system accepts AC power between 100 to 240VAC (incl. generator / inverter). Hook it up anywhere in the world, walk away, OptiMate5 does the rest, automatically, safely. Recommended for all lead-acid batteries from 7.5Ah – 120Ah. P/N 11-07220.....

OptiMate 6

OPTIMATE 6 can SAVE a neglected / sulfated* leadacid battery unable to accept charge from the engine charging system (even after jump starting). The micro processor controlled multi step charging system with cell equalizing is suitable for deep cycle and starter (SLI) batteries and the ampmatic auto current control takes the guesswork out of charge current selection. During the continuous maintenance and testing cycle the battery is tested daily and recharged as necessary. Hook it up, walk away, OptiMate6 does the rest, automatically, safely. Recommended for all lead-acid batteries from 15Ah – 240Ah. P/N 11-07221.....

OptiMate PRO S

OPTIMATE PRO-S has a charging system able to save a neglected *sulfated battery that cannot accept charge from a standard charger or the engine charging system. Battery power is optimized during bulk, absorption & cell balancing charge modes, and then tested to verify charge retention. Battery life is extended if left connected to OptiMate PRO-S when vehicle/craft/equipment is not in use. Initializes, desulfates & charges 1 x 12V battery at a time – from small to large. P/N 11-07222.....

OptiMate PRO 2

OPTIMATE PRO-2 has two independent charging systems able to save a neglected *sulfated battery that cannot accept charge from a standard charger or the engine charging system. Battery power is optimized during bulk, absorption & cell balancing charge modes, and then tested to verify charge retention. Battery life is extended if left connected to OptiMate PRO2 when vehicle/craft/equipment is not in use. Initializes, desulfates & charges 2 x 12V batteries at a time or 1 x 24V system. PN 11-07223.....

*A battery discharged over time that has built up chemical resistance to charging, but otherwise undamaged and measuring at least 2V.

AUXILIARY POWER UNIT (APU) & BATTERY CHARGER

Designed to supply filtered DC bus power through standard APU receptacle in private and commercial aircraft. Up to 25 or 50 amp is available for operating avionics and flight control systems when the master switch is activated. It can also charge the battery through the plug at a 10 amp rate. Output is current limited, and will withstand starting loads. Voltage is limited to prevent battery overcharging. DC Current and voltage are displayed on panel meters, voltage accurate to 00.00 **NOTE: Available with piper plug too.**

| Model | P/N | DC Amps | DC Volts | AC Power | Dimensions H.W.D. | Wt. | Price |
|------------|----------|---------|----------|------------------------|-------------------|-----|-------|
| APU14v/25A | 11-07068 | 25 | 14 | 117 volts 60hz. 3 amps | 8.5x10x12 | 22 | . |

AIRCRAFT APU & CHARGER

25 amps of auxiliary power to prevent battery drain while checking aircraft controls and avionics. Battery status is monitored by a digital volt meter accurate to 00.00, and a Tri-color LED. If left connected, will charge and fully maintain battery. Available with plug as shown, or Piper plug. Plugs into standard 117v 60 Hz. receptacle. Max current draw, 6 amps on 24 volt model (APU24v/25A), 3 amps on 12 volt model, (APU12v/25A). Warranty: (3) years.

- * Unique solar charger provides clean, quiet energy
 - * Cleans battery plates of large, damaging lead-sulfates so batteries can accept, store and release MAXIMUM power when you need it
 - * Helps offset energy-robbing key-off parasitic loads (see chart below)
 - * Works with all lead-acid batteries (flooded cell, AGM and gel)
 - * Ideal for virtually any kind of vehicle and equipment in areas with out access to electrical power
 - * Low-profile industrial-strength solar panel mounts flat (no frame required) so it's virtually indestructible
 - * Prevents the normal loss of battery power on vehicles stored out side no matter how long they sit unused — even months at a time
 - * Helps extend battery life up to 3X longer
 - * Choose from three models: 2-Watt, 5-Watt and 6-Watt
 - * The 5-Watt solar panel is almost HALF THE SIZE of other 5-watt panels yet offers full 5-watt power
 - * The smaller 5-watt panel provides more installation options
 - * The 6-watt model is ideal for emergency rescue and law enforcement vehicles because it has a unique rectangular solar panel designed to easily mount on any light bar
 - * 2- and 5-Watt models include 17-feet of wire between circuit box and solar panel, and the 6-Watt includes 14 feet of wire
 - * Five-year limited warranty

5WATT..... P/N 11-07121

REDIPULSE PRO-12 CHARGE/MAINTENANCE SYSTEM

The PulseTech Pro-12 Charge/Maintenance System. It is designed to keep new batteries "factory-fresh" while they rest on the shelf waiting to be installed or sold. Batteries that sit idle suffer from damaging sulfation buildup (lead sulfate deposits on the battery plates). This buildup is the main cause of battery problems and failure. The Pro-12 uses our scientifically-proven ReNew-IT Pulse Technology to keep these deposits off the plates. By removing these energy-dampening deposits, your batteries are stronger than ever. This means your "shelf-life" warranty issues and other battery-related expenses are reduced dramatically. P/N 11-07122.....

START PAC® STARTERS - POWER SUPPLIES

START PAC® PORTABLE STARTING UNITS

The new patent pending Start Pac QC models have separate removable batteries that can be changed in 15 seconds. This feature allows the user to change the batteries in the field without needing to send the Start Pac back to the shop or manufacturer. Batteries have no memory effect and can be recharged at anytime. Made in the USA. Certain aircraft will allow the ship's generator to back charge a GPU. In this manner, Start Pacs can be recharged in the field without an AC source indefinitely.

NOTE: When storing the Start Pac for more than 30 days, remove the battery pack from the charging unit and store separately.

MODEL 1324-1 QC - * 13 AMP hours @ 10 Amp Hour Rate * 1300 AMPS Peak Current complete with built in charger, power plug and cables. * 15.5"x4"x11.75" * 35 LBS. Complete * Units are 24 VDC output with a universal charger that will accept 90-240 VAC 50/60 hertz. Will start turbine or piston engines up to 500 horse power.

Has a 4.5 amp charger and will provide a charge time of approx. 4 hours. Will give two to three starts between charges. This portable unit is mainly designed for emergency starting in remote locations. This unit is not designed for repeated daily starts or maintenance functions.

1324-1 QCP/N 11-04538
1324-1 QC-RBS (Battery Set)P/N 11-07231

MODEL 1324-2QC - Complete with built in chargers, power plug and cables. Units are 24 VDC output with universal chargers that will accept 90- 240 VAC 50/60 hertz. * 16 AMP hours @ 10 Amp Hour Rate * 1400 AMPS Peak Current * 19.2"x7.5"x9.75" * 50 LBS. Complete.

Will start turbine or piston engines up to 800 horse power. This unit has dual 4 amp chargers and will provide a charge time of approx. 2 hours. Will give two to four starts between charges. This portable unit is mainly designed for emergency starting in remote locations. This unit is not designed for repeated daily starts or maintenance functions.

1324-2 QCP/N 11-04539
1324-2 QC-B (Batteries)P/N 11-06777

MODEL 2300 QC - Built in chargers, power plug and cables. 24/26 VDC output, with universal chargers that will accept 90-240 VAC 50/60 hertz. * 26 AMP hours @ 10 Hour Rate * 2300 AMPS Peak Current * Trolley avail. * 19.2"x7.5"x11.5" * 69 LBS. Complete. For starting engines up to 1500 horse power and give four to six starts between charges.

This unit has a dual redundant 4 amp chargers.. When plugged into an AC source, 8 amps at 28VDC, is available for maintenance functions without depleting the batteries. Recharge time is approx. 3-1/2 hours.

2300 QCP/N 11-06780
2300QC-B (Batteries)P/N 11-06781

MODEL 1628QC - Complete with built in chargers, power plug and cables. 28.5 VDC output, with universal chargers that will accept 90-240 VAC 50/60 hertz * 16 AMP hours @ 10 Amp Hour Rate * 1400 AMPS Peak Current * 19.2"x7.5"x9.75" * 54 LBS. Complete. Quicker more

robust start due to its higher voltage. This unit utilizes dual 3.5 amp chargers for reliability with a recharge time of 2.5 hours. These units will give three to five starts between charges. Due to their lightweight and portability, these packs are especially suited for use in remote locations. Will start turbine engines up to 800 horsepower.

1628QCP/N 11-06778
1628 QC-B (Batteries)P/N 11-07187

MODEL 6028 QC - Built in chargers, power plug and cables. Units are 28.5 VDC output, with universal chargers that will accept 90-240VAC 50/60 hertz. * 26 AMP hours @ 10 Hour Rate * 2300 AMPS Peak Current * Trolley avail. * 19.2"x7.5"x11.5" * 77 LBS. Complete. Will start the largest electrically started turbine or piston engines

including the Garrett TPE331. Will provide a faster and cooler start than most ship's aircraft batteries, thus increasing turbine life. Various maintenance duties can be performed with this pack that requires more than 24 volts for checkout. This unit has dual redundant chargers with a total of 7 amps output with a recharge time of approximately 4 hours.

6028 QCP/N 11-06783
6028 QC-B (Batteries)P/N 11-07189

MODEL Li2800 QC - A full 28VDC battery pack and will provide superior starts on all electrically-started turbine engines. It has dual, redundant chargers with a total of 7 amps output and a recharge time of approximately 4 hours. * 28 AMP hours @ 10 Hour Rate * 2400 AMPS

Peak Current * L 19.2" x W 7.5" x H 9.75" * 46 LBS. Complete. Utilizes the latest technology in Lithium batteries. (can be left in a completely discharged state without causing damage)

Li2800 QCP/N 11-06782

QUICK CHANGE TROLLEY - The Start Pac® QC trolley is a light weight accessory for either the Start Pac® Models 1324-2QC, 1628QC, 2300QC or the 6028QC

P/N 11-06775

START PAC® POWER SUPPLIES

The entire aircraft electrical system can be powered up for GPS programming and electrical maintenance. Thus the on board aircraft battery can be saved for starting. Do not use for starting as starter motors require far more amperage than is available from the StartPac® Portable Power Supply. Not for battery charging. Made in the USA.

MODEL 53025/12V - Do not cover or enclose this Start Pac® when using, as this will inhibit airflow needed for cooling purposes. Use a minimum of 12# wire size for the AC extension cord. 12 Volt output unit. * AC INPUT: 90 to

240 VAC, 7 amps * DC OUTPUT: 25 amps @ 14.2 Volts * 9 Lbs./4.08 kilos complete * 14" long, 5.25" wide, 5.5" high * Continuous duty fan cooled * Over current protection * Over voltage protection * Over temperature protection. Designed to power up 12 Volt aircraft systems. The voltage output is set to 14.2 Volts. Maximum amperage output is 50 amps which is adequate for most light aircraft. If overloaded, the 53025/12 will trip off and reset itself after a short period of time. This unit is ideal for powering up new and old aircraft with glass cockpits.

53025 - 12VP/N 11-04536
53025-24VP/N 11-04537

MODEL 53050 - Specifications: * No duty cycle, output voltage 28.5 VDC * AC input is universal 90-240 Volts. * Over current protection * Over voltage protection * Over temperature protection * Forced air-cooling * DIMENSIONS: Wt. 10 lbs./4.54 kilos 14" X 5.25" X 5.50".

A 28.5 Volt continuous DC power supply when plugged into 110/220 Volt single phase AC power. Will deliver full 50 amp DC output continuously, but will not provide enough current for aircraft engine starting or mining equipment starting.

53050P/N 11-06833

MODEL 53105 - Specifications: * Maximum continuous 105 amps +5%. No duty cycle. * AC input 190-240 Volts. * Over current protection. * Over voltage protection. * Over temperature protection. * Forced air cooling. * 8 foot power cable. * Weights 26 lbs./11.80 kilos complete with power cable. * 14.5"x7"x13.75".

A 28.5 Volt continuous DC power supply when plugged into 220Volt single-phase AC power. Will deliver full 105 amp DC output, but will not provide enough current for engine starting.

53105P/N 11-06834

MODEL 53300 - Specifications: * Maximum continuous 300 amps +5%. No duty cycle * AC Input: 190-240 Volts, 60 Amps * Over current, voltage, and temperature protection * Forced air cooling * 10 foot power cable. Size: * Weight: 120 lbs/54.4 kilos complete Dimensions: 38"L x 21"W x 20"H * Handle height: 48".

A 28.5 Volt continuous DC power supply when plugged into a 220 Volt single-phase AC power source.

53300P/N 11-06835

START PAC® MINI CHARGER - Specifications: * 24 Volts * 1.5 amps * 90 to 260 Volt universal input * Indicator light showing orange when charging, green when fully charged * Has float mode, can be left connected indefinitely without harming the battery * High tech, sophisticated electronic circuitry with microchips * CE approved * Will fully charge most lead acid aircraft batteries in 24 hoursP/N 11-04535

START PAC® GROUND POWER UNITS

The following dimensions apply to each of the 3300s: 38"x21"x20" Handle Height 48". Avoid discharging the batteries completely as damage can result.

MODEL 3324 - Combination power supply and battery pack. Batteries: * 78 Amp Hours at 10 hour rate * 24 Volt DC - 25.5 Volts at rest Sealed cells non- hazardous Valve regulated high amperage output lead acid * 3200 Peak Amps Power supply / charger: * Multi- unit 58 Amp DC continuous output * 28 - 28.5 Volt output from 0 - 58 amp load * Battery recharge time from fully discharged - 2 hours * AC Input - 110 Volt or 220 Volts (only 1) Limitations : 200 amps maximum DC load NOTE-When using more than 58 continuous amps, the batteries will make up the difference until they become depleted. On most aircraft, a low voltage relay will drop the GPU offline when the voltage

drops below a preset level. Once the GPU is dropped off, it's voltage will rise and will be accepted again by the aircraft, then will immediately drop off again. This oscillation can cause damage to aircraft components. NOTE-- PLEASE USE #12 or Larger AC EXTENSION CORD

AVTEK PRODUCTS — BATTERY CHARGERS

AVTEK STANDBY ELECTRICAL SYSTEM

AvTek uses rechargeable, dependable, deep discharge batteries as the power source in its Standby Electrical System. They are sealed and maintenance free. Nothing can get out and there is nothing to add. They can't leak, because the acid is absorbed in the "Substrate" were gases are re-combined. These are very safe batteries in a ventilated enclosure box. These are deep-discharge batteries, not like your "WET-Acid" cold-cranking car battery, and unlike Nicads, there will never be a memory problem with lead acid. All the potential stored energy will be available to your dead panel. Power is delivered through the cigarette lighter. No power will be discharged through the cigarette lighter greater than what it takes to heat up the lighter element in the first place. AvTek's design is much more than a battery in a black box. AvTek uses a circuit board to control the power to the buss. This Smart board monitors the amperage demand at an efficient, reliable rate to insure a safe IFR descent. An uncontrolled portable battery connected to the cigarette lighter could smoke the panel, as with any home made project built without a controlling (PCB) Printed Circuit Board. AvTek's batteries are powerful. Clearly capable of delivering over 200 amps through the Cig plug, enough to start the engine if NOT controlled. PCB gives you protection while delivering reliable, dependable source of power for 60 mins. or longer to your IFR panel.
28V system P/N 11-01262.....

AVTEK 1ST ALERT ELECTRICAL FAILURE SYSTEM

An early warning detection system that is simple, flawless, & reliable. Detects alternator failure, broken/slipping belts, leaky diodes, regulator failure or if you forgot to turn OFF the master switch after tie down. Uses a reliable MicroCircuit and will never need repair. Has a pulsing red panel mounted LED that is larger and 15 times brighter than normal LEDs and will alert you at the first sign of trouble. Weighs only 1.5 oz. and installs quickly. The LED begins to pulse every time you first turn on the master switch and hit the starter key/button and will go out as the Alternator/Generator comes on so you know everything is alright before you depart. First Alert is now armed & ready to detect any in-flight electrical problems. Size: 3.25" length x 2" width x 1.25" height. Indicate your aircraft voltage when ordering.
P/N 11-01259.....

AVTEK DIGITAL VOLTMETER

The AvTek digital voltmeter is portable and features an LCD display that pivots for viewing at any angle and under any lighting condition, from bright sun to night flights. Designed for 12/24V electrical systems.
P/N 11-01263.....

AVTEK 3-WAY CIGARETTE LIGHTER SPLITTER

AvTek's cigarette lighter splitter accommodates 3 electronic devices. The AvTek unit is ridged and pivots in three directions to minimize clutter. Designed for 12 electrical systems.
P/N 11-01264.....

AVTEK TEKLITEZ

It's amazing, you'll agree. Flexible thin clear Fiber, that is energized by the inverter designed by AvTek. The fiber needs 66Vac at a specific frequency which when energized develops this Cool-Blue-Neon, that is embedded in the substrate. The gas is NOT free flowing. The result is 360 degrees of the best instrument lighting you'll ever see. It's the specific frequency of the inverter that produces the color. Use your imagination and Light YOUR panel the way you want. Unlike other panel lighting that comes ONLY in round screw-on "White Light Filaments". Each five foot TekLitez Fiber is "Snap" connected at the inverter...you can purchase one or more...you can always add more in the future... 9 v Battery or you can connect to your buss...use your own dimmer. TekLitez allows you to illuminate Square instruments. Under the panel for better chart reading. Snap to install. The small thin E.L.F. is Super-Glued into place. The inverters is 2" cube, which goes anywhere behind the panel. Sold in 5 foot lengths per kit which will illuminate approx 5 or 6 large round instruments (includes inverter). Life expectancy is over 80,000 hours.
P/N 11-07169.....

AVTEK BONDING AND GROUND KIT

Do your Panel Instruments Bounce and become erratic? Does your Starter turn your Engine SLOWLY and you have a new fully charged battery? Do you see an ugly corroded Battery Post soon after you clean the Post? These are symptoms of BAD Ground/Bonds. When the Resistive Corrosion is developed at the Starter the result is slow turning during starts. Mechanics miss-diagnosing the problem and a NEW Starter is purchased needlessly. Kit includes: * FAA-APPROVAL * Three (3) Jumper One for the panel, starter and your battery...and Aluminum Fasteners * DVD step by step how to Power-Point Presentation * Sealant . P/N 11-07359.....

ROLL AROUND STARTER

Quick-start vehicles anywhere without AC power. On-board starter battery gives more cranking power than any fast charger, up to 1100 amps cold cranking power. Assists pilots where there is no power. Plugs into any AC outlets for rapid automatic recharging. Solid state circuitry monitors battery condition and maintains maximum state of charge. Patented "stop/go" light warns operator before making a reverse connection. Fully automatic, 10amp charger recharges starter battery or any on-board 12V battery. Will not overcharge. (Battery not supplied, recommended minimum 500 CCA) Features heavy duty 8 ft. long 4 AWG cables, 500 amp clamps, and flexi-spring cable guards. P/N 11-06127.....

PORTABLE STARTER/ 400 AMP BOOST BATTERY

Features: 17 amp hour battery, Up to 50 hours of power, 400 cranking amps, 3ft. long - 4 gauge cables, 1000 peak amps, LEDs for battery state of charge, External charger, Overcharge protection, 400 amp clamps, Wt: 18 Lbs.
P/N 11-01382.....

PORTABLE STARTER/ 600 AMP BOOST BATTERY

Features: High performance 17 amp hour battery, Up to 100 hours of power, 600 cranking amps, 32" long - 4 gauge cables, 1600 peak amps, LEDs for battery state of charge, External charger, Overcharge protection, 600 amp clamps, Wt: 20 Lbs. P/N 11-01383.....

BATTERY TENDER CHARGER

BATTERY TENDER PLUS - 6V @ 1.25A

12V @ 1.25A. The Battery Tender Plus is a 1.25 amp battery charger designed to fully charge a battery and maintain it at proper storage voltage without the damaging effects caused by trickle chargers. Included is a quick connect harness for hard to reach areas. ***DO NOT USE P/N 11-03015 WITH GILL OR CONCORDE AVIATION BATTERIES.**

LONESTAR DC CIGARETTE LIGHTER RECEPTACLE

Upgraded significantly over the commercial parts available through the automotive market. Include a high amperage ceramic, internal soldered center lug, MS hardware, heat shrinkable terminals to produce a safer and more reliable power connections to your aircraft's buss. TSO pending, tested with our ultra-small converters. P/N 11-04862.....

GARHAWK CV500 AC-DC CONVERTER FOR GPS PRACTICE

Enables you to practice with your GPS at home or at the office without running down expensive batteries. Plug into any 110V outlet and call up the simulator mode on your GPS. Powers any GPS with power cord having a cigarette lighter plug, and it can be used with a 110V AC extension cord. Ideal for powering a cel phone from home, hotel, or business. P/N 11-00426.....

EL

GROUND STARTING COMPONENTS

AIRCRAFT JUMPER CABLES

Cable is heavy duty, 4 ga. copper, 15 ft. long, twin extruded to help prevent tangling, and room temperature flexible at 40 degrees below zero. Fully insulated clamps wont arc or spark and are rated 500 amps, have a solid copper jaw, and have a flexispring strain relief to prevent cable breakage. Polarity light warns if clamps are connected incorrectly, preventing electrical system damage and personal injury. Available in two styles (above).

6141 - Jumper Cable with standard 3-pin Lexan female plug (equivalent to AN2551) on one end and alligator clamps on other end.
P/N 6141

6142 - Jumper Cable with special Piper single-pin plug on one end and alligator-clamps on other end.
P/N 6142

REPLACEMENT PAIR OF 500 AMP CLAMPS

Used on #6141 and #6142 jumper cables. (above)
P/N 11-06202

JUMPER PLUG

Standard 3-pin female plug equivalent to AN2551 plug. Red Lexan construction is unbreakable and screws together in minutes. Sleeves are solid copper, silver plated. With solenoid pin. Corrosion proof. Mates with AN2552-3A external power receptacle. P/N 11-03158

WOODEN PLUG

Solid laminated ash plug with brass female sleeves. Functions same as AN2551 plug. Add cables and alligator clamps for economical ground starting cables. No soldering required. Solenoid activator element in small hole.
P/N 11-00400

PIPER TYPE PLUG

Mates with 11041 socket. Electrical conductors and connections are designed for maximum efficiency and long life. With ground return terminal. Single pole. Brass female contact with spring-grip tension provides solid engagement with the socket. Cable clamp holds wires firmly in place. Diecast housing. Accepts up to OAWG cable.
P/N 11-03159

PIPER TYPE SOCKET

Self-grounding socket. Single pole. Diecast housing, spring-loaded door. Solid brass contact, 3/8" (9.5mm) diameter, with insulated tip to prevent short circuits. Rubber boot protects terminals and connections. Accepts up to OAWG cable. Fits 2" (50.8mm) diameter hole. Flange holes 21/64" (8.6mm) diameter, 2 15/16" (74.6mm) on centers. Mates with 11042 plug.
P/N 11-00500

EXTERNAL POWER RECEPTACLE

This external power receptacle is designed to mount in a hole in the skin of aircraft. Hole is then covered with hinged access door (not included). Mates with AN2551 type plugs. Model 4621B.
P/N AN2552-3A

PLUG & JUMP

The Plug & Jump is a very portable unit which can be carried in the aircraft at all times because it is so lightweight. It can be used to start the aircraft from an ordinary car using standard jumper cables. It comes in two models; The Universal Model is used for Cessna, Beechcraft, etc. (3 pin plug) and the Piper Model is a single pin. The Plug and Jump is a simple conduit of power from any external power source to the aircraft. It is not a battery in and of itself. The Plug n Jump can be used for either 28V or 14V systems.
Universal Model 11-00971
Piper Model 11-00972

MASTER RELAY

(Battery Solenoid) - Used on production aircraft. Applicable to all homebuilts. Continuous duty. 12V and 24V
111-226 (12V) P/N 11-03161
111-226 (24V) P/N 11-05799

STARTER RELAY

(Starter Solenoid) - For 12V intermittent duty. Adequate current capacity for most engines. P/N 11-03162

SOLENOID DIODE

Contacter diode with 16 inches of lead wire. Install on any contactor, solenoid, or relay, or in certain situations - switches to prevent EMF damage to electronic equipment. Connect the ring terminal end to the trigger wire on the device and the other end to a ground point. P/N 11-06697

PORTABLE POWER SUPPLY

These portable power supplies are an excellent way to power your avionics on the ground while you train or practice in the cockpit. Especially helpful in learning how to operate glass cockpit avionics and panel mount GPS units. To use the

Portable Power Supply plug the cord into an AC wall outlet, and then connect the 3-pin or Piper style plug into the external power receptacle on your aircraft. Furnished with Cessna style 3-pin plug or round Piper style plug. Manufactured in U.S.A.

Features: •Charge control: constant current charge to a constant voltage then to a float standby. •Current Limiting. • Fully automatic 3 stage charger can be left on the battery in maintaining/float mode. •Can be set for any type lead acid battery, including conventional, maintenance free, deep cycle, gelled-type, valve regulated batteries. •Cyclic Voltage: 2.5 volts/cell for 24 volt batteries; 2.6 volts/cell for 36 & 48 volt batteries. • May be preset to customer's specification for battery type. •Continuous - 100% duty cycle. •Low voltage start: will start charging a deeply discharged battery with terminal voltage less than 4 volts. •Reverse polarity and short circuit proof. •Aluminum case.

12V Port Power Supply 3 Pin Plug P/N 11-05084
12V Port Power Supply Piper P/N 11-05085
24V Port Power Supply 3 Pin Plug P/N 11-05086

BYCAN 28V/100AMP APU

The Bycan APU will furnish up to 100 amps at 28 VDC. it plugs into the APU connector on the engine cowling and automatically disconnects the battery so that it will not be drained by the servicing process. A valuable ramp accessory.

| Description | Part No. | Price |
|---|----------|-------|

RED BARON AUXILLIARY POWER UNIT (APU)

The Bycan RB-14/28-25 Red Baron APU is designed to operate avionics equipment in private and commercial aircraft. It will output 14 or 28 volts DC at up to 25 amperes. The voltage is filtered to eliminate hum and is regulated against input AC line voltage changes. The output DC voltage and current are displayed on front panel meters. The DC is also protected by a circuit breaker. The RB-14/28-25 plugs directly into the APU receptacle on the aircraft. It comes equipped with either the standard three-prong connector or the Piper coaxial connector. Both connectors can be supplied, optionally at a slight extra cost. DC cable length is 8'. The AC line cord is normally 8' in length, but special lengths up to 50' are available. The housing is steel, powder coated in red, for optimum flight line safety. Rubber feet and handle are included.

Features: • AC Line Voltage: 115v, 60 Hz • AC Current Drain: 7 amperes Max • DC Output: 14 or 28 volts, up to 25 amperes. • Weight: 35 lbs (16 Kg) maximum • Size: 10" x 8" x 8" (25 x 20 x 20 cm) • Warranty: Two years from date of purchase • Regulation: 13.75V ± 1.5v, 27.5V ± 2.5v.
Standard Connector P/N 11-02142
Piper Connector P/N 11-02143

THE BLUE ANGEL AIRCRAFT POWER SUPPLY

The Bycan BA-14/2850 Aircraft Ramp Power Supply and Battery Charger is a multi- purpose aircraft flight line service and maintenance tool. The unit has a filtered 14 & 28 volt DC power supply with up to 50 amperes capability for tests of aircraft electrical systems and a secondary mode for recharging run-down batteries. This ramp or hangar accessory is an absolute must for avionics service, gear and flap actuator exercising and other electrical system service. The BA-14/2850 plugs directly into the aircraft APU connector and is tied to the electrical system when the master switch is activated. Selection of output voltage is by a front panel switch which is protected by a switch guard. Closing the guard forces the switch to the 14 volt position. The battery charging mode is selectable by a front panel switch. The charging process is fully automatic. When the charge is in progress a red LED is illuminated. This is replaced by a green LED when the aircraft battery is fully charged. The on/off switch on the unit also resets the unit.

EL

VOLTAGE CONVERTERS – POWER PANELS

SS-6 CHARGE CONTROLLER

Morningstar's superior series switching provides many advantages compared to shunt controllers. Series regulation reduces FET heating and lowers voltage stress on the power FET's. A series configuration also improves protection against lightning surges and reduces switching noise. The series design improves charging accuracy. In PWM, series switching becomes self-correcting for temperature and system voltage drops.

P/N 11-04618

DC1428A VOLTAGE CONVERTER

The DC1428A is a switching DC-DC converter. Input voltage is typically 12 to 14V, but the converter will operate over a wide range of input voltage. Output voltage is 28V. The input current is limited at 10 amps, so that available output current depends on input voltage. Provide 3.2 amps out at 28V with 12V input, and provides 3.7 amps out with a 14V input. When current draw begins to exceed these limits, the output as avionics equipment designed to operate at 28V will usually operate down to 18V. However, it is still best to limit 28V loads to 3.2 amps. For multiple 28V loads of approximately 3 amps each, additional DC1428A units can be installed for each load. Ideal for providing a 28V product in a 14V aircraft. Size: 6"x 4.75"x 2.2" Wt: 1.5 lbs.

P/N 11-11685

LONE STAR VOLTAGE CONVERTERS

Lone Star Aviation's new 12V STEP-UP Converter is the smallest (3" x 5" x 2"), most efficient (93-95%) and the most versatile STEP-UP aircraft converter in our industry today. RTCA/DO 160D tested to operate 28V NAC/COM radio equipment such as KX 155, KX 165, KY 196A, KY 196B, and Motorola VHF transceivers on 12V aircraft. Additional 28V electronic devices are HSI, cameras, audio panels, battery backup systems, etc. FAA Approved Under TSO-C71 Now Approved LS03-05002B-MS Features: * Ultra-Small size 2.5" x 4.5" x 2.0" * 93-95% Efficiency rating * Light Weight 275 grams / 0.606 lbs * Optional Connector: MS 3102 Receptacle * Potentiometer for output adjustments * Universal Mounting * LED Status Indicators * Operating Temp: -55C to +70C * Circuit Protection: OV, UV, SC, SP, RP, OC * Regulation Load: +/- .5% * Ripple Input/Output: 20-25mVp-p * Transient response time .5 ms * Easy Installation * FAA TSO-C71 Approved (Pending)

DC/AC INVERTER

This classic DC to AC solid-state "peanut" inverter provides a reliable source of 26 volt, 400 Hz, AC power. Versatile, compact and lightweight, it is ideal for use with Stormscope bootstrap and multifunction display installations. Specifications: * Input: 28VDC @ 0.75 amp. (MD26-28) * 14VDC @ .150 amp.

(MD26-14). * Output: 26 VAC, 400 Hz, Single Phase, 10 volt-amperes

MD26-14V Inverter P/N MD26-14

MD26-28V Inverter P/N11-07062

Specifications for 14V to 28V: • Input Voltage: 10-15 VDC • Output Voltage: 27.5 VDC • Efficiency: 87% (13.5 VDC @ 5A) • Short Circuit: Auto Recovery • Over Voltage: 15 VDC Max • Altitude: 50,000 Ft. • Over Current: 110-140% > 5A Auto Recovery • Terminal Block: (5) Phillips Pan Head Screws • MTBF: 100,000 Hrs./According to Mil HBK 217F • Output Current: 5 A (144w) Cont. 7.5A Peak • Temp.: -55C to (+) 71C • TSO Category: Category A

Specifications for 24V to 12V: • Input Voltage: 22-32 VDC • Output Voltage: 13.8 VDC • Efficiency: 89% (24 VDC @ Full Load) • Regulation: Line-Load = .03 VDC • Ripple: .005 Volts at 400hz • Altitude: 50,000 Ft. • Over Current: 110-140% > 5A Auto Recovery • Terminal Block: (5) Phillips Pan Head Screws • MTBF: 100,000 Hrs./According to Mil HBK 217F • Output Current: 10 A, 12 A Peak at 13.8 VDC • Temp.: -55C to (+) 70C • TSO Category: Category A

HIGH/LOW VOLTAGE WARNING INDICATOR

This warning indicator device drives an instrument panel mounted warning light which provides an indication of abnormal buss voltage. A flashing light indicates a buss voltage greater than 15.5VDC. A steady light indicates a buss voltage below 12.5 volts DC. The weight of the device is 4.5 oz. and operating voltage is 9 to 20 volts DC. Operating current exclusive of lamp load is 0.1 amps. Lamp load: .02 amps maximum. The sensor requires very little power. Consider using an existing breaker of fuse instead of adding a new one. Do not power from a circuit protected more than 5 amps. 22 AWG wire is recommended for all connections. Recommended lamp fixture (not included) should have transparent yellow or amber lens.

P/N 07-06830

LONESTAR THE ELIMINATOR

The Eliminator is a low pass double (LC) PI type filter designed to suppress both low and high frequency line noise. The filter may be connected at the source of the noise or on the input of the connected component.

P/N 11-08055

VERTICAL POWER VP-200 AND VP-200 DUO

The VP-200 brings modern technology to the experimental aviation community to reduce wiring complexity, reduce pilot workload, and increase pilot awareness and safety. It is built using the latest technology, yet is based on time-honored electrical architectures. The system provides device switching and circuit protection, overall electrical systems management, engine monitoring, and advanced checklist functionality.

The VP-200 Series of products includes the VP-200 and the VP-200 Duo. Both are based on the same technology platform, and offer different levels of redundancy. The VP-200 Duo includes a second Control Unit which allows additional switching and control capability. It additionally supports a dual independent bus, dual alternator electrical configuration.

Modes - The VP-200 Series products operate around the idea of Modes. A Mode is a specific phase of ground or flight operations. It provides a method by which to organize and clarify all of the various activities that must occur during normal operations. Using proprietary algorithms, the VP-200 takes inputs from aircraft engine data and GPS data and determines which one of ten Modes the aircraft is in. These Modes are defined as Pre-flight, Before-Start, Start, After-Start, Taxi, Run-up, Take-off/Climb, Cruise, Landing, and Maneuver. While this may seem like a new concept, you do it every time you fly. As a safe pilot, you are trained to do the same things every time you fly. By its very nature, flying lends itself to automating routine tasks that are done over and over every flight. Much of your routine workload is offloaded to the VP-200 allowing you to focus on flying the aircraft. Also, pilots are usually control freaks. With that in mind, the VP-200 allows you to override automatic settings when necessary (for example, manually turning on the landing light or turning off the strobes). It also tells you exactly what it is doing and provides a real-time status display of all your electrical devices.

For each Mode, the user can:

1. Define what devices (lights, radios, etc.) are turned on and off for each Mode.
2. Organize the display of engine instruments to optimize/de-clutter for that Mode (you may want to see different things during start than during cruise).
3. Configure what checklists to show at each Mode change (checklist items are user configurable).

Everything on traditionally-wired aircraft must be turned on or off manually, including lights, pitot heat, lighting, landing lights, fuel pumps, etc. You may use checklists to ensure you do not forget anything. Contrast this with recent advances in automobile technology where one finds automatic lights, windshield wipers, climate control, systems monitoring, integrated console functions, and so on. Often, when your workload is heavy or when you are distracted, items on the checklist are missed. Further, the very act of going through the checklist distracts you from the task of flying the plane itself, talking to air traffic controllers, and looking out for other traffic. **Specifications:** Operating Voltage: 4 volts - 32 volts normal operations, 40v for 1 second, 60v for 100 ms, Operating Temperature Range: -25 to +70 deg C, Storage Temperature Range: -30 to + 85 deg C, Control Unit: 2.5 lbs. Display Unit: 1.8 lbs. Switch Panel: 0.9 lbs

VERTICAL POWER VP-50

It brings modern technology to experimental aircraft to simplify wiring and provide advanced electrical system capabilities. It replaces switches, circuit breakers, indicators, voltage alarms,

trim relays, shunts, voltage converters and a host of other products. Plus, it makes wiring a modern electrical system simpler than traditional antiquated alternatives.

The VP-50 installs in your instrument panel and provides eight switches to control the avionics and trim system. It supports a single bus, single or dual-battery, single or dual-alternator electrical configuration. The lighted liquid-crystal display shows overvoltage and under-voltage alerts, short-circuit and over-current alerts, trim position, current draw of the system and individual devices, and bus voltage.

It is built using the latest technology, yet is based on time-honored electrical architectures. The system has the flexibility to adapt to each unique aircraft.

VOLTAGE CONVERTERS - POWER PANELS

AMERI-KING AK550 POWER BOOSTER

The Ameri-King AK-550 is a FAA TSO'd approved Regulated DC to DC Power Booster Converter. It transforms an unregulated input from a 12 Vdc to a regulated +28 Vdc output to a bootstrap mode. It may be installed in a pressurized area, controlled or non-controlled temperature at altitudes up to 55,000 feet. It's locations include Electrical/Avionic equipment rack, behind or beneath aircraft panel, or cabin pressure bulkhead. Installation is extremely simple. All necessary Accessories are provided, including mating MS connector plug and MS cable clamp.

28 VDC MINI INVERTER

This mini inverter converts 28VDC to 115VAC 60Hz output 9mod.Sine Wave). Excellent for enabling use of a laptop or similar unit that has a wall plug. For 28 volt aircraft. Size: 6.06"L x 2.87"W x 1.77"H. Wt: 1.08 lbs. Not FAA Approved. Lightweight and compact, user replaceable fuse, 150VA continuous output, 200VA peak power for 5 min., 400VA surge power, overload protection, short circuit prot., 1 yr warranty. P/N 11-02029

DELUXE COCKPIT VOLTAGE CONVERTER

DC-DC Converter, Device to reduce voltage from 28V to 12V. Allowing the user to operate 12V items in a 28/24V airplane. The device is fully electronic, no passive elements generating heat. It is fully protected and fused. A green LED indicates normal and abnormal conditions (overload). The unit is enclosed in a small precision machined aluminum box with integrated heatsink. Input is via a fused lighter plug and output is via a female light receptacle. Size: 1.3"x 1.3"x 2.3"; Weight: approx. 5.0 oz. 3 AMP.28-12V DC-DC Converter..... P/N 11-04330

10 AMP.28-12V DC-DC Converter..... P/N 11-04331

Y-COUPLER - Heavy duty device that allows user to split the output of their cigarette lighter outlet in their airplane or to be used in conjunction with one of the above Cockpit Voltage Converters (running multiple items of one converter). This device is fuse protected (6.0A)

02YC Y-Coupler..... P/N 11-00401

INVERTER - A device to produce Alternating Current out of a Direct Current Source. This device will generate 110V AC from a 28/24V DC Source (load limit is 150W continuous, 200W peak). Plug it in to your airplane lighter receptacle and have a household 110V AC outlet. This device is fuse and electronically protected against overload, over temperature, over and under voltage. Dims: 1.77"x 2.87"x 6.06"; Wt: 12.77 oz. 110I 28-110V Inverter..... P/N 11-00402

LONESTAR FEED THRU FILTER

Lone Star Aviation's 50 amp filter (FEED THRU) attenuates EMI-RFI noise generated from fuel pumps, ignition systems, dc motors, autopilots systems, etc. The 50 amp (feed thru) filter also can be used to filter ac noise from power lines on autopilots, instrumentation, audio panels, as well as other on board dc equipment effected by noise..... P/N 11-04851

LONESTAR FILTER 70 AMP

Lone Star Aviation's 70 amp filter attenuates EMI-RFI noise generated from alternator, generator systems, gear motors, blowers for a/c systems and other higher current noise sources. The 70 amp filter also can be used to filter the aircraft's avionics buss to filter RF, NAV, GPS, as well as other navigational equipment. The filter is FAA- PMA for certificated aircraft as well as for experimental aircraft. P/N 11-04849

LONESTAR FILTER 100 AMP

Lone Star Aviation's 100 amp filter (FEED THRU) (Fail Safe Design) attenuates both low and high frequency, (10hz to 30 mhz) of EMI-RFI noise generated from the aircraft's alternator systems to the aircraft's dc buss. This filter, (100 amp Fail Safe design) is used by OEM aircraft manufacturers to attenuate 100% of the on board noise before it penetrates the aircraft's dc buss. The filter is FAA- PMA pending for certificated aircraft but can be used on experimental aircraft. P/N 11-04850

POWER PANELS FOR HOMEBUILTS

Homebuilder's Power Panel

Mini Power Panel

Self contained power distribution systems that include commonly used switches and circuit breakers. Based on a heavy duty printed circuit board that eliminates the bus bars and provides a user serviceable and logical arrangement of all power system components. Only DC rated switches and quality resettable thermal circuit breakers are utilized. Connections to the panels are via screw type terminal blocks that are neatly labeled and organized for simple wiring. The avionics 'sub' bus is filtered to protect electronics and suppress noise in the aircraft communication systems. All metal parts are stamped aluminum, the face plate artwork utilizes a Lexan overlay material that is both attractive and durable. Complete documentation and suggested wiring diagrams are included.

Standard Power Panel: 8 Switches: Fuel Pump, Landing Light, Strobe Lights, Navigation Lights, Panel Power, Pitot Heat, Radio Master, and a Cessna type split master switch for master solenoid and alternator field control. **18 Circuit Breakers:** Fuel Pump, Landing Light, Strobes, Nav Lights, Panel Power, Pitot, Alternator Field, Gyros, Gauges, Trim, and Spare, (on Radio Bus) Radio1, Radio 2, GPS, Transponder, Audio, Avionics. **Dims & Wt:** 2.25"H x 13.00"W x 7.50"D, approximately 3.0 lbs.

Mini Power Panel: 6 Switches: (main panel) Fuel Pump, Landing Light, Strobe Lights, Navigation Lights, Panel Power, (side panel) has a Cessna type split master switch for master solenoid and alternator field control. **13 Circuit Breakers:** Fuel Pump, Landing Light, Strobes, Nav Lights, Panel Power, Engine Instruments, & Spare, (on Radio Bus) Radio1, Radio 2, GPS, Transponder, Avionics, (side panel) 30 amp alternator output breaker. **Dims & Wt:** (main panel) 2.375"H x 8.375"W x 6.50"D, (side panel) 2.375"h x 2.5"w x 2.0"d, approximately 2.5 lbs.

EXP BUS PRODUCTS

EXP TRAY EX-110- the EXP BUS mounting tray is the ultimate in quick build time savings. The tray comes Pre-punched, and pre-assembled with rocker switches prewired to the PC board. All the builder needs to do is to cut a single rectangular hole in the panel, connect the battery, alternator, and all of the load wires to the proper terminals on the EXP BUS2 PC board mounted in the chassis. 14V DC systems (not recommended for 28V aircraft). Replaces all but one circuit breaker in most homebuilt aircraft, and includes the master switch, master relay, and the avionics master switch. The avionics output bus provides six protected circuits, and automatically shuts off when the starter is engaged. Three master bus outputs operate items such as panel lights, gyros and engine instruments. Switched outputs include the alternator field, Beacon/Strobe output, nav light output, aux fuel pump output, two landing light outputs, and two spares. All outputs are overload protected, eliminating the need for fuses or circuit breakers, and saving the labor of installing and wiring them up.

STICK GRIPS

INFINITY MILITARY STICK GRIPS

Infinity Aerospace designed these grips with safety, comfort, functionality, durability and aesthetics in mind. The ergonomic design is contoured to the shape of your fingers and includes a fatigue reducing hand rest at the base. The non-glare matte black finish is abrasion and impact resistant for long life, yet easily removable, maintainable & repairable. Matching customized

right & left hand models available. All the major cockpit functions can be at your finger tips. Thousands have already been installed in over 50 models of aircraft (even a 314 ft custom Yacht and a submarine!) FAA certified in the new Micco and Eagle FAA certified aircraft, field approved in Bell 206, Hughes 500 and Hiller helicopters, Aero Commander 500 A's, Mooney's, Cessna's, Swift's and in blimps. Standard issue in several of today's finer Sport Aircraft Kits. Features: • 6" long • fits stick OD's from 5/8" to 1-1/4" • Includes 3 ft of shielded cable w/17 conductors. Color coded pre-wiring & installation schematic • Made from lightweight high impact, durable high temp. tolerant flame retardant & flash resistant injected ABS material • Wt: 12 oz. • Easy removal for maintenance, customizing or repair. Possible Switch Functions: • 2-Axis Trim Switch: Pitch & Aileron or Pitch & Rudder or Step frequencies and/or flip-flop frequencies and/or transponder ident.; or sweep spotlights, cameras, computer cursors, etc.; • Red Trigger Switch: Push-To-Talk (PTT); or 35mm camera, video camera, audio recorder, etc.; • ON/OFF Tactical Push-Buttons: Main fuel pump, aux fuel pump, landing light(s), taxi light(s), nav lights, strobe lights, pitot heat, ident., etc. Four of the switches can be changed to Normally Open (NO) or Normally Closed (NC) momentary push-button for transponder ident., auto-pilot disconnect or flight management control. Also, a spring loaded-to-center and/or an ON/Center OFF/Momentary ON toggle switch can be installed to operate flaps, speed brake(s), spoilers, cowl flap(s), rudder trim, aileron trim, etc.

TEAK WOOD CUSTOM PISTOL GRIPS

Teak wood is beautiful and absorbs sweat, preventing any sticky slime build-up. The grips come in standard, master and ultra styles in left & right hand. The standard grip comes with a push button on top with special dust-proof cover. Normally used for a push-to-talk button, open switch and good for 250,000 cycles min. The master grip has a larger head to accommodate a 4-way trim switch & push-to-talk button. The trim switch is the same one used with the M.A.C. systems. The ultra grip has a larger surface to accommodate the 4-way

trim and auto-pilot and/or air brake with the push-to-talk located near the tip of the index finger. The ultra can handle a total of four switches, when using the air brake, in its head. Configurations can also be custom designed. All grips come with buttons and 3/4" or 1" standard bore. Larger bores available.

RAC STICK GRIPS

G101 G205 G207

Ray Allen Company G1 and G2 series stick grips use modern, flush fitting push-button switches to control one or two axis electric trim. When one grip is used, these switches can be wired directly to RAC trim servos. This eliminates the need to wire relays in your trim system. However, if two grips are used, you will need either relays for the control of trims from one grip to the other. The grip itself is made of semi-soft UV and oil resistant foam. The upper switch housing is made of nylon with a lightly textured finish.

The **G101** grip (4.75" height) features a momentary contact switch on top that can be used as a PTT button. (Old MAC Model G1)
P/N 11-09930

The **G205** grip (5.25" height) has 5 functions which include a PTT and a 4 SPDT, momentary contact switches. These switches are rated at 5 amps and can be used for other purposes. (Old MAC Model G5)
P/N 11-09920

The **G207** grip (5.4" height) has additional momentary contact push-button switches mounted on top that can be used for controlling functions on avionics, auto-pilot, etc. (Old MAC Model G7)
P/N 11-09925

The **G303** stick grip has two trim switches, a faceplate slotted vertically for 1-axis trim and a PTT switch.
P/N 11-02538

The **G305** stick grip has 4 trim switches, a faceplate slotted vertically and horizontal for 2-axis trim and PTT switch. P/N 11-02539

The **G307** stick grip has 4 trim switches, a faceplate slotted vertically and horizontal for 2-axis trim and PTT switch. P/N 11-02540

Ray Allen stick grips are designed to fit any stick size up to 1" in diameter with the use of spacers. Two nylon spacer are included with each grip enabling easy installation on 3/4", 7/8" and 1" sticks. All Ray Allen grips come as a complete kit and include pre-cut and stripped, Teflon insulated wire. A die-cut label sheet is also supplied in the **G205** and **G207** grips

FLIGHT GRIP

#2 #4

The control stick grips from Flight Grip are modular in design to allow maximum flexibility when specifying switches to control the various electrical items on your aircraft and for ease of installation and assembly. Two "off-the-shelf" configurations are listed below. The Model #2 grip provides for control of two functions using

the rocker trigger switch. The trigger switch features momentary contact either side of center, with spring return to center OFF action. The Model #4 grip is the same as the Model #2, but adds two push-button switches for thumb activation in the top cap of the grip. The switch mounted closest to the thumb rest is a latching type (push on – push off), and the remaining switch is a momentary type. Left hand grips are available with all the same switch options. Grips are designed to fit 1-1/8" OD control sticks and adapter bushings are available to adapt to 1", 7/8" and 3/4" OD control sticks.

HOMEBUILT CONTROL STICKS

These homebuilt control grips are made of high-strength urethane plastic, finish painted in matte black and come complete with all necessary hardware (AN screw, nut, washers). Available unbored or bored to accept 7/8", 1", or 1-1/8" diameter tubing.

All of these grips (except unbored) are available w/PTT Switch at . Add -1 to end of part number for PTT.

RAC TRIM SYSTEMS

RAC ELECTRIC TRIM SERVOS

Ray Allen electric trim systems include a servo, LED position indicator, rocker switch and a clevis/pushrod kit. The heart of the Ray Allen trim system is the servo and they are designed specifically for experimental aircraft. They are small, lightweight, and powerful enough to control trim surfaces on any small aircraft. They will automatically stop when their travel limit is reached and will not travel unless power is switched on by the pilot. Voltage polarity determines direction of travel. Ray Allen servos can be purchased separately for controlling devices that would otherwise require bulky, complicated mechanisms. They are extremely durable and should last the service life of your aircraft. Production samples have been bench tested 50,000 cycles under loaded conditions relating to 244 hours of continuous use or thousands of flight hours. Ray Allen has 4 different servos available: The T2-7A, T2-10A, T3-12A, and the miniature T4-5. Check the specifications to determine which servo output travel best suits your application.

T2-7A
T3-12A
T4-5
*T2-7A = exact replacement for MAC 4A servo. *T2-10A = exact replacement for MAC 6A servo. *T3-12A = exact replacement for MAC 8A servo. *T4-5 is exact replacement for the Mac S9 servo.

RAC SWITCHES

RS2 ROCKER SWITCH - Very positive snap action in 2 directions and returns to a center off position. It was designed specifically for Ray Allen trim systems. It is wired to connect both power leads to ground when the rocker is released. This eliminates motor coasting & allows very precise trimming. The RS2 switch is rated at 1amp. The faceplate measures 1.75" (44mm) x 1.0" (25mm) x 1.47" (37mm) deep. Included with trim systems or can be purchased separately. P/N 11-02035

ROS-4 FOUR-WAY SWITCH - This compact multi-action switch can be installed inside your control stick grip to activate both elevator and aileron trims. ROS-4 has a SPST action so it must be used in conjunction with a relay deck to operate Ray Allen servos. Rated at 1 amp. P/N 11-02075

RANS ELEVATOR TRIM SYSTEM

Rans Elevator Trim System features a trim tab actuated by a push-pull wire. By turning the trim wheel, the wire moves the trim tab. The system has the look and feel of a standard aircraft trim wheel. The trim tab is constructed of sheet aluminum and can be adapted to the trailing edge of many homebuilts and ultralights. The trim tab is sized for both low & high speed aircraft and since it is mechanical, requires no battery or power source other than the pilot's hands.

| | |
|--|--------------|
| Trim Sys. less Tab (no panel or flap lever mount) .. | P/N 11-09955 |
| Trim Sys. with Lower Panel..... | P/N 11-09960 |
| Trim Sys. Flap Mount..... | P/N 11-09965 |
| Trim Sys. without Wheel..... | P/N 11-09970 |

RAC INDICATORS/SENSORS/ACCESSORIES

RP3 LED POSITION INDICATOR - This LED meter is designed to be installed in the cockpit and give an indication of the servo output shaft position. The ten LEDs are the brightest available for superior visibility in sunlight, but can be dimmed for night flight. It can be installed horizontally or vertically. 3 wires as small as 28 gage connect the indicator directly to a Ray Allen servo (or a position sensor). The face plate measures 1.75" x 0.75" x 1.1" deep. The RP3 is the standard position indicator included in R.A. trim systems. P/N 11-02020

GWL-1 GEAR WARNING LIGHTS - This 6 light indicator is designed to be installed in the cockpit and give an indication of the landing gear position. The lights are high intensity LEDs and are inset to provide maximum visibility in bright sunny conditions. The top lights are yellow and the bottom are green. Six 26-gage wires connect the lights directly to the gear safe/unsafe switches (not included). The faceplate measures 1.35" x 1.75" x 1.5" deep. Gear warning lights come with labels pre-installed. P/N 11-01575

POSITION INDICATOR/ROCKER SWITCH LABELS - Finish off your panel with these high quality labels. Rocker switches and needle indicators require a LARGE label, LED indicators use a SMALL label. Elev 1 shows trim down at top of label.

| | |
|------------------------|--------------|
| Rudder - Large..... | P/N 11-01819 |
| Rudder - Small..... | P/N 11-01820 |
| Aileron - Large..... | P/N 11-01816 |

| Cowl Flap - Large..... | P/N 11-01576 |
| Cowl Flap - Small..... | P/N 11-01814 |

POS-12 POSITION SENSOR - When combined with a Ray Allen indicator, this sensor can be used to measure the position of wing flaps, cowl flaps, or many other mechanisms. Small enough to be installed anywhere, size: 2.7" l x 0.8" w x 0.5" h. (note: T2 & T3 servos have their own built-in sensors) 1.2" travel. P/N 11-01321

REL-2 SERVO RELAY DECK - This device converts the momentary contact action of the ROS-4 4-way switch, or any SPST pushbutton switch, into a DPDT action that is necessary to operate Ray Allen servos. You will need one of these relay decks for each servo in your installation. The REL-2 relay deck replaces the REL-1 relay deck. The REL-2 functions the same as the REL-1, however the wire exit location is on the top. Measures 1.6" (40 mm) x 1.8" (49 mm) x 1.1" (28 mm). P/N 11-05312

SPD-1 SERVO SPEED CONTROL - Enables you to slow the speed of your trim servo to suit your individual installation. Size: 2" x 0.5" x 0.8". P/N 11-02078

REG-1 12V REGULATOR - Enable you to operate servos and indicators in aircraft having 28V electrical systems. Converts all input voltages up to 35V to 12V. Capable of supplying 1 amp of current allowing you to operate 2 trim systems simultaneously. Size: 2" x 0.5" x 0.8". P/N 11-02036

RC8-7 CLEVIS/PUSHROD KIT - Contains two 8-32 threaded clevis forks; 7" long, 8-32 threaded, stainless steel pushrod and hardware. This kit included with Ray Allen trim systems. NOT compatible with POS series position sensors. The T4-5 clevis/pushrod kit has just one clevis assembly. RC8 clevis & its hardware are available separately.
RC8-7 Kit.....P/N 11-02040
T4 Pushrod Kit.....P/N 11-02042

WC2 5-WIRE TEFLON® INSTALLATION CABLE - This durable, flexible wire cable is highly recommended for Ray Allen installations. Consists of 5 separate color coded, 26-gage, 19-strand, silver-plated, FEP Teflon® insulated wires inside a tough, all Teflon® sheathing.
20 ft. roll.....P/N 11-01577
25 ft. roll.....P/N 11-01578
50 ft. roll.....P/N 11-01579

EL

RAC BEZEL SWITCHES

RAC - RBS SERIES BEZEL SWITCHES

An excellent addition to any instrument panel. The bezel measures 1.25" w x 1.35" h. A die-cut label sheet is purchased separately. The switches are SPST. They have screw terminals and are rated at 15 amps. Specify Toggle (RBS-T11) or Pushbutton (RBS-P11) when ordering. The Ray Allen Gear Bezel Switch (RBS-GS) is the same custom bezel as above combined with SPDT retract gear toggle switch. The switch is rated at 15 amps and has a pull to unlock feature preventing accidental engagement. The Gear Bezel Switch comes with the labels pre-installed.

| RAC Part No. | Description | Part No. | Price |

TWO PLACE TRIM MIXER

The 2 Place Trim Mixer is a solid-state SMT equipment designed to replace the traditional mechanical relays earlier used for two pilots to operate the aircraft's trim system while adding the advantages of logic functions found in electronic equipment. The mixer incorporates MOSFET (Metal Oxide Silicon Field Effect Transistor) transistors for switching the high current with no moving parts and no electrical arc to prevent fuel fumes ignition.

A typical Trim System is composed of the following elements:

- Harnesses
- A mixer unit, the 2 Place Trim Mixer
- 2 DC trim motors (such as the MAC Servo with or w/o connections to position indicator)
- SPST switch (option) which are not included & should be provided by the customer

A key feature of the 2 Place Trim Mixer is the prevention of a conflict between two opposite inputs (eg. "UP" by the pilot, and "DOWN" by the copilot). Once an input is established by one of the crew, another input is ignored. An additional switch (option) enables the pilot to "Disable" the copilot from inputting any command to the trim motors.

The 2 Place Trim Mixer is enclosed in an aluminum enclosure for EMI/RFI protection and for easy installation onto the aircraft.

- Specifications:
- Operating Temp.: -20°C to +85°C
 - No. of Operators: 2
 - Operating Voltage: 10VDC to 16VDC
 - Max Current: 7A
 - Quiescent Current: Less than 4mA
 - Current Through any Switch Contact: Less than 10µA

P/N 11-02876

ELECTRONIC FLAP CONTROLLER

An electronic device designed to power and automatically position electrically powered flaps. It is a combination drive unit for the flap actuator, and an indicator of flap position. It features momentary push button switches with built in green LED

lights, providing settings for 4 flap positions. Each switch can be user pro-grammed to a specific flap position. Once calibrated, momentarily pushing any switch, will then automatically drive the flaps to the pre selected position and stop. The LED corresponding to the new position will then illuminate indicating that the flaps are now in the new position. LED lights can be dimmed for night flying. Can work with any actuator that draws less than 7 amps current at 12 volts when operating. It requires that the system have a 5K or 10K resistive position sensor that provides feedback of flap position. Many actuators incorporate this type of sensor in the unit, or separate linear resistive sensors are available from equipment suppliers. 3 1/2 inch long, it can be mounted either horizontally or vertically. The controller incorporates an interface to the optional Aircraft Components gear position warning systems eliminating the need for the manual flap position switch otherwise needed.

P/N 11-07728

TRIM SWITCHES

TRIM SWITCH CA3112 - The CA3112 is identical to the S-Tec 3112 switch but precision machined from aircraft aluminum and will not crack or break like the OEM version.

P/N 11-07354

TRIM SWITCH CA100-1 - The CA100-1 switch is used on a certified aircraft. It uses MIL-SPEC switches (SPST) and precision machined from aircraft aluminum and will not crack or break like cheap plastic switches. It has a nice tactile click action.

P/N 11-07355

FPS PLUS - FLAP POSITIONING SYSTEM

The FPS-Plus is a full service, automatic, flap positioning system. This system operates similar to the "Cessna type flap systems" that many pilots were trained in. The pilot can easily go from one flap position to another with one quick press of the flap button. All flap stop positions (from 0 to 10, your choice) are easily, user programmable. This system is also fairly simple to retrofit it to your "already flying" aircraft.

The Plus feature of this system, allows you to program an elevator trim position for each flap position. Your elevator trim will be automatically adjusted, for every different flap setting that you choose. NO more manual tweaking of the elevator trim is needed for every different flight configuration.

The pilot can now pay more attention to the actual "flying the aircraft", rather than tweaking the correct amount of elevator trim for every different flight configuration. Flying is made much more enjoyable. If you desire to retract the flaps fully, all you have to do, is press the "flap up" button for more than 1 second. The flaps will be automatically retracted to their full up position. The elevator trim is also automatically adjusted to your cruise trim position.

Features: • Full Automatic Flap Positioning with or without "Automatic Elevator Trim Compensation" • Step and Proportional Modes • Designed for +12v and +24v Systems • Compatible with Most Motors and Indicators • Setup is Fully User Programmable • No Limit Switches to Install

Specifications: • The system will operate on +12Vdc or +24Vdc systems. • Maximum amperage for each motor, 10A. • Dimensions (overall) 3" x 5.75" x 1.25" • Footprint 3 x 5.75" • Mounting 2 holes in bottom flanges, 0.156" dia, 5.375" apart • Weight < 4oz.

FPS-Plus Reflex Operation -All features of this system are exactly the same as our FPS-Plus. The exception is, when you press the Flap Up Button for more than a second, it returns the flaps to the zero degree position, not "full up". This is an advantage when initiating a "go-around" and "touch and goes". It is also an advantage when your flaps are in any down position, and you want to return the flaps to the "take-off" position.

FPS-PLUS without Elev. TrimP/N 11-02981

FPS - PLUS REFLEX.....P/N 11-06440

3 AXIS TRIM RELAY BOARD

3 Axis trim relay and buffer board has been designed to allow easy control of trim motors from small grip mounted or remote switches. Three Axis control is possible with each of the circuits being configured in a double throw format. "Off" circuit conditions apply ground to both motor wires providing an effective braking actions. Board will work with single or winding DC motors. Other remote controls are possible such as auto pilot disconnect or recognition lights and more. Relays are continuous DC rated at 10 Amps. Dimensions are 5.6"L x 4"W x 1.0"H

IGNITION SWITCHES

ACS KEYED IGNITION SWITCHES

MFG BY ACS PRODUCTS CO.

These fine quality switches are being used in many production aircraft such as Cessna, Schweizer, Ayers and Air Tractor. They provide "on" and "off" electrical control of both magnetos on single engine aircraft. The key-operated switches mount from rear of panel in 7/8" dia. hole. Available with or without starter position.

A-510-5 Without Starter Position., Supplied with switch plate and two keys. (diode not required) P/N 11-03169.....

 P/N 16050-2

ACS IGNITION SWITCH SERVICE KIT

Consists of replacement internal switch contacts, lubricant, diode assembly, and terminal board as required for compliance with ACS Ignition Switch Service Bulletin SB92-01. Kit A-3650-2 contains diode assembly for starter solenoids with one or two coil contacts.

Kit No. A-3650-2

MODEL NO. 10-357210-1, With push to start feature. Includes two keys. Furnished with Switch Plate.....

BENDIX SWITCH PLATES -

Without Starter Position..... Switch Plate No. 10-51127

With Starter Position..... Switch Plate No. 10-126676

SUNLINQ SOLAR PANELS

The **6.5-watt** portable solar pack module offers a unique solution for reliable and portable solar power for cell phones, PDA's, and other small personal electronics. The SUNLINQ™ 6.5-watt weighs less than half of a pound and when folded is compact, lightweight and easily stored and transported. The low maintenance design provides an optimal electrical path and rugged durability. Built-in grommets allow for hanging, mounting or laying in any position.

The **12-watt** portable solar pack module offers a unique solution for reliable and portable solar power for Sat phones, GPS, battery charging, etc. The SUNLINQ™ 12 watt weighs less than one pound and when folded is compact, lightweight and easily stored and transported. The low maintenance design provides an optimal electrical path and rugged durability. Built-in grommets allow for hanging, mounting or laying in any position.

The **25-watt** portable solar pack module offers a unique solution for reliable and portable solar power for vehicle battery charging, including boats and RVs and laptop computers. The SUNLINQ™ 25 watt weighs less than two pounds and when folded is compact, lightweight and easily stored and transported. The 25-watt SUNLINQ™ is made from a special urethane material giving it the utmost in durability and water resistance. The low maintenance design provides an optimal electrical path and rugged durability. Built-in grommets allow for hanging, mounting or laying in any position.

Cables included with SUNLINQ™ are one each, CLA receptacle, CLA vehicle power outlet, battery clamps, 4 in. barrel connector, and 8 ft. extension cable.

CIRCUIT BREAKERS

KLIXON 7270 & 7271 CIRCUIT BREAKERS

The Klixon 7270/7271 series circuit breakers were designed to utilize less behind panel space while protecting wire and cable in aircraft and ground support equipment on either 120 VAC, 400 Hz or 30 VDC systems. The units are available with neck mounting (7270-1 and 7271-8) or standard cover plate (7270-7 and 7271-3). In each of these Klixon circuit breakers, the bi-metallic element assures uniform current distribution throughout

its responsive area. This design reduces current density at the critical areas, resulting in an element having a much higher interrupting capability than conventional design. Inherently resistant to shock and vibration, the Klixon disc element is capable of precise calibration settings and will retain the initial calibration within close tolerances throughout the service life of the breaker. Both circuit breakers have conventional actuator action; i.e., the toggle actuator on the 7270 moves to the OFF position for trip indication and the button the 7271 pops out. A standard black button with a white collar is used.

FEATURES: • Trip-free • Snap-acting Thermal Element • Simplicity of Design • Lightweight • High Rupture Capacity - 3500 Amps, 120 VAC, 400 Hz 4000 Amps, 30 VDC • Small Size

KLIXON 7277 CIRCUIT BREAKERS

7277-1 Aux. Switch Contact
7277-2

The 7277 series circuit breaker is physically and electrically identical to the 7274-2 style circuit breaker, with the exception that the 7277 series has wider calibration limits. Originally developed as an alternative to slow blow fuses, the trip free 7277 is used extensively as primary electrical circuit protection on general aviation aircraft. The wider calibration limits of the 7277 has also resulted in applications including protection for data processing and telecommunications equipment, computers, flight simulators, construction, material handling and other industrial electronic equipment.

FEATURES: The 7277 series is designed for applications that do not require the tighter performance characteristics and approvals of our military circuit breakers. • Small size • Light Weight • Inexpensive Auxiliary switch 7277-1 Only Longer Push Buttons 7277-5 Only

ELECTRICAL PLUG CONNECTORS

Make your panel a "plug and play" panel with these heavy-duty electrical connectors. The connectors are designed for either panel mount or free hanging. Connectors are available in 4, 6, 12, 18, 24, and 36 pin configurations. Choose the pins and sockets based on wire size. The pins and sockets are top quality and are gold/nickel plated. The plugs are sold in pairs and include both the plug and the connector.

POWERGENIE

Powergenie is a power control unit for Rotax engines (503 through 912) and other two-stroke engines. With Powergenie installed, your hour meter will run only when the engine itself is running, eliminating the need to rely on the master or engine switch. You can power up the airplane's electrical system on the ground for radio work or general maintenance and testing without clocking aircraft time. In addition, you can use Powergenie to power other equipment like beacons, strobes and landing lights for automatic operation when the engine is running.

P/N 11-03388

STATIC DISCHARGERS

STATIC WICK

Used on Cessna and Piper aircraft. Comes with 2 holes to rivet to train-line edge and plain wire extension. P/N 11-04154.....

NULL FIELD TRAILING DISCHARGER

For general aviation & business class aircraft. FAA/PMA, MIL-9129D. Mounting: (2) #8-32 flat head screws. Length: 10-9/32". Wt: .78 oz. P/N 11-16320.....

MICROPOINT TRAILING DISCHARGER

For general aviation aircraft (speeds below 300 mph). Mounting: (2) #4-40 screws, 100% countersunk. Length: 8.75" Weight: 0.17 oz. P/N 11-16630.....

MICROPOINT TRAILING DISCHARGER (FLEXIBLE)

For general aviation & business class aircraft. FAA/PMA, MIL-9129D. Mounting: 15401, 15488, 15660-1, or 16195 screw retainer. Length: 7-5/8" Wt: 0.53 oz. P/N 11-16606.....

NULL FIELD TIP DISCHARGER

For general aviation & business class aircraft. FAA/PMA, MIL-9129D. Mounting: (2) #8-32 flat head screws. Length: 7-15/32". Wt: 0.53 oz.

P/N 11-16325.....

CIRCUIT BREAKERS

TYCO CIRCUIT BREAKERS

These bi-metallic single pole breakers weigh less than 2oz. and especially suitable for homebuilt aircraft. Used as original equipment in Beech, Cessna and Piper aircraft. Max. operating voltages: 32 VDC & 250 VAC (to 400 Hz).

W23 SERIES

W31 SERIES

W58 SERIES

White band around body of reset button becomes visible if breaker trips. Has heater wire for fast tripping. 8-32 screw terminals.

These are combination single pole switches and circuit breakers. Has a plain steel toggle w/ rating inscribed on tip. 8-32 screw terminals.

Recessed reset button has red band around it for visible trip indication. 6-32 screw terminals.

TYCO ROCKER TYPE CIRCUIT BREAKER

W33S2N1Q series breakers are 2 pole rocker actuated. Pole 1 is switch only, pole 2 is series trip overload sensing. These breakers are non-lighted with white rocker. W33S4B1Q series breakers are also 2-pole rocker actuated. Pole 1 is switch only, pole 2 is series trip overload sensing. These breakers feature 20 amp max. switch & amber plastic rockers.

FUSE HOLDERS

These fuseholders are non-indicating, plate mounted. The body is molded black phenolic. Knob grips fuse and pulls it from holder when knob is removed. Spring provides contact pressure on ends of fuse. For use with fuse size 1/4" x 1-1/4". Type HKP. P/N 11-13400

Nylon Twist-Lock in-line fuseholder. Supplied with 8" loop of 14-gauge wire and 1 spring to accommodate AGC fuses. Simple "twist-lock" allows easy fuse removal & replacement. P/N 11-04010

Bayonet knob in-line fuseholder. Supplied with 8" loop of 14-gauge wire and 1 spring to accommodate AGC fuses. Simple "twist-lock" allows easy fuse removal and replacement. P/N 11-01359

KLIXON CIRCUIT BREAKERS

Feature a bi-metallic snap-acting disc as the sensing element. Widely used in production and military aircraft. The most popular models are illustrated. Models PSM and PSM-N are available in the following ampere ratings: 2, 3, 5, 10, 15, 20, 25, 35. When ordering specify if neck-mounting style is wanted by placing "N" after ampere rating. Example: PSM-10N (P/N 11-04244)..... Ea.

For weatherproof circuit breakers in ratings from 50 to 150 amperes, order Model PDLM. Example: PDLM-50 (P/N 11-04241) ea.

60 AMP CIRCUIT BREAKERS FOR ALTERNATORS

These heavy duty circuit breakers are ideal for use with aircraft alternators and other applications using high amperage. 10-32 screw terminals. Size: 1-3/8"d x 1-3/8"h x 1/2"w. 60 Amp P/N 11-02191.....

ELECTRONIC CIRCUIT BREAKERS

These circuit breakers have no mechanical parts, except for the reset switch. The power switching and control components are completely solid state. They have added benefit of overvoltage and undervoltage protection. Will turn off if the input

voltage goes too high, protecting valuable avionics or other equipment. The circuit breakers operate differently than conventional ones in the following ways: If the circuit breaker 'trips', the switch will remain in the up or on position, but a red LED will illuminate indicating the condition. To reset the circuit breaker, the switch is set to off, then back to on. Removing power from the circuit breaker via a master switch and then restoring power will perform the same function. If a short or overcurrent condition exists at the output, the circuit breaker will continue to trip off after a reset.

The electronic circuit breaker is a 3-terminal device. In addition to the usual 2 terminals, a ground reference is required for the electronics to operate and as a reference for the overvoltage & undervoltage protection.

The 14V circuit breakers will shutdown with an overvoltage of 16V & undervoltage of 10V. The 28V will shutdown with an overvoltage of 33V & undervoltage of 20V.

Available in 14V & 28V versions, with the following current levels: 1A, 2A, 5A, 10A. Not FAA Approved. For experimental aircraft only.

EL

SWITCHES

ULTRA-MINIATURE TOGGLE SWITCHES

Ultra-miniature switches are rated at 6 amps at 125V AC and 4 amps at 28V DC. Solid silver contacts. Terminals are gold flashed to inhibit oxidation and to provide easier soldering. Case material is green diallyl phthalate resin. Bushing thread size: 1/4-40, usable in panel thickness up to 1/4". Micro Switch Co. have discontinued the manufacture of the 8A and 8H type switches, so switches by alternate manufacturers will be furnished. In most instances, Alco switches will be supplied. Switches furnished complete with locking ring and attaching hardware.

LEVER/CIRCUIT RELATIONSHIP

| Toggle Circuit | Circuitry* | | |
|----------------|------------|--------|------------|
| | One Side | Center | Other Side |
| 01 | On | None | On |
| 02 | On | Off | On |
| 04 | (On) | Off | (On) |
| 05 | On | Off | (On) |
| 06 | On | None | (On) |

*Use the "01" circuitry for On-Off switch. In hook-up, use center terminal & one side terminal. Leave other side terminal blank.

The operating sequence above is repeated in multipole devices. Each pole has double-throw circuitry and consists of three terminals which exit at the bottom of the switch case. The keyway is a helpful reference when you are applying a switch with the momentary (ON) circuit at one of the extreme lever positions.

TWIN CESSNA SWITCH COVERS

Are your switch covers faded by the sun or just looking grimy? These replacement switch covers fit on nearly every typical switch in Cessna Twins. Switch cover sets are available for 300 series twins (4 red, 3 black, and 18 white switches) and 400 series twins (4 red, 3 black, & 23 white switches). Also available are sets of 30 mini-switch covers for audio panels, prop sync, fuel transfer pumps, DME, etc.

- 300 Series P/N 11-22210
- 400 Series P/N 11-22220
- Mini Switch Package P/N 11-22230

TOGGLE SWITCH COVERS

Dress up the appearance of your panel and color code your toggle switches with high quality vinyl covers that do not have a nipple at the end of the cover. Available in various colors.

SUBMINIATURE PUSHBUTTON SWITCH

One-piece bushing and case construction, furnished with beveled nut for finished appearance. It has a relatively high current carrying capacity (3 amps at 125V AC) and a life expectancy of 10,000 operations at rated current. Momentary type SPDT switch, ideal for use as a mic switch on control wheel. Furnished with .205" dia. black pushbutton. Body is .354" dia. x .650" long. Mounts in 1/4" dia. hole. P/N MPA-103F

CIRCUIT BREAKER SAFETY LOCKS

Skylox™ is a unique product that will provide safety to your aircraft ground service crews. The circuit breaker safety lock is easy to use and is an innovative safety solution, all at a very low price. Simple to use. Just squeeze and place over an open circuit breaker to prevent accidental closing of breaker circuits being serviced.

Regular round Skylox™ for standard size breakers and Skylox™ L for larger sizes. Hexagonal shape easily differentiates between the two sizes. Add Skytags™ for added safety. Red with white letters and all white backs for adding notes or special instructions. NOTICE! Skylox™ are designed for use by ground maintenance crews during ground maintenance procedures only! Skylox™ are NOT to be used during flight operations. Danger..... P/N 11-07737..... Warning.... P/N 11-07738

- Large P/N 11-07734..... Standard .. P/N 11-07736

MS25224 SWITCHGUARDS

Prevents inadvertent operation of the switch. Switch can be operated only when the spring-loaded guard is lifted up. Returning guard to the down position forces the switch lever to the off position. Single-hole type for neck-mount switches such as AN3021 and AN3027. 3-hole type for panel-mounted switches such as AN3023. Color: Red.

- MS25224-1 (one hole) Ea.
- MS25224-2 (3 holes)..... Ea.

EATON SWITCH GUARDS

Spring Loaded Switch Guards - Eaton switch guards can be used with 2 or 3 position switches. Cover closure transfers toggle lever and is molded out of quality thermoset molding materials. Guard covers are spring loaded to either close or lock in an open position.

CESSNA SPLIT MASTER SWITCH

This versatile split red master switch has been used in virtually all single engine Cessna models since 1970 and can be used in most light aircraft with single alternator systems. Left rocker normally used for alternator and right half for battery. Order mount separately.

- Red Switch..... P/N 11-15900
- Beige Switch..... P/N 11-05733
- Mount..... P/N 11-15910

BEACON/STROBE SPLIT SWITCH

This is a split switch used in many production aircraft featuring an On-Off switch on left for rotating beacon and On-Off switch on right for anti-collision strobe. Switch is grey. New manufacture. P/N 11-14910

AN3021-1

TOGGLE SWITCHES

Toggle switches are available with 2 or 3 operating positions, one or three hole mounting and a variety of circuitry and electrical ratings. Contacts are made of solid silver. Wide usage is found in aircraft, mobile, marine, electronic and industrial applications. Available in full "AN" standard size and Ultra Miniature 1/2" size. The leading manufacturers of toggle switches are Micro Switch, Alcoswitch, Cutler Hammer, and JBT (now Cutler Hammer). Orders will be filled with switches of manufacturer whose product is available in local stock.

P5 ON-OFF ALTERNATE ACTION SWITCH

Push and the P5 series switch holds "on" push again and the P5 switch turns "off". Positive tactile feedback is featured so the operator is clearly aware the switch mode has been executed. The button returns to the original position after each actuation.

To guard against front panel splash and dirt, the P5 series is sealed at the button with OTTO's patented rolling sleeve principle. The terminals are sealed with epoxy, providing a seal against flux during wiring and behind panel dirt and moisture. The combination of sealing provides smooth operation over a wide temperature range. Watertight sealing to 1meter (IP68) pressure is also available.

OTTO PISTOL GRIPS

Cobra

Otto Controls has been making the switches used in a majority of military and commercial flight grips manufactured for the last 40 years. Otto has evolved from a switch supplier into a major gri supplier with flight grips in numerous military and commercial aircraft. These rugged grips are the same as our military qualified grips but without the expensive threaded connector. Grips have a 1.15"ID which can be adapted to a 3/4" or 7/8" joystick with separate sleeves sold below.

SOLDER SLEEVE

Raychem's Solder Sleeve one-step, heat-shrinkable wire and cable interconnection devices are a labor saving alternative to conventional wire and cable termination methods such as craft-sensitive, time-consuming, hand soldering or crimping. The one-step terminators create strong, soldered connections. They consist of a heat-shrinkable sleeve and a premeasured, fluxed solder band. When heated, the tubing shrinks and the solder melts, making reliable, insulated terminations.

COLOR CODED CIRCUIT BREAKER CAPS

These color coded caps can easily be installed and removed from Klixon and similar type circuit breakers. Colored caps are used to "flag" designated circuit breakers for flight check and other purposes. In addition, they greatly improve grip. Won't shake loose and rattle like others can.

LITTLE BLUE CRIMPER

The Daniels AFM8 is designed for most of the miniature and sub-miniature connector types that are so widely used in all types of electronic systems. Originally developed for the Air Force, the AFM8 meets the need for a miniature tool accommodating wire sizes 20 thru 32 AWG. The cycle controlled precision ratchet assures consistently accurate crimps every time. The tool has a built-in eight step selector knob for ease in dialing the correct crimp depth setting for the wire being used.

P/N 11-04443.....

BIG BLUE CRIMPER

The Daniels AF8 has virtually limitless application within the specified wire range of 12 thru 26 AWG. Over 1,000 turret heads or positioners are available to adapt the tool frame to your specific military or proprietary contact/wire combination. The eight impression crimp, which is standard in the AF8, assures absolute maximum tensile strength with almost every closed barrel contact. The precision ratchet controls cycling on the tool in both directions of handle movement. This assures the same, accurate crimp every time. It's like having a quality control inspector at every work station.

MATE-N-LOK EXTRACTION PIN & SOCKET TOOL

Insertion tool for grounding blocks and locking connectors. The AMP insertion tool for MATE-N-LOK pins. Contact sizes 20-24 AWG.

P/N 11-04438.....

PIN & SOCKET TOOL W/ INTERCHANGEABLE TIPS

This insertion & extraction tool consists of a handle, a cap, six insertion/extraction tips, a plug, and a .050-in. hex wrench. The handle of the tool provides storage for the tips, plug and hex wrench. The insertion/extraction tips convert the tool for the appropriate product and are used to insert or extract connector contacts. Each tip is color coded according to specific type and wire size. The hex wrench is used to tighten the set screw which secures the tip in the tool handle.

P/N 11-04436.....

PIN INSERTION & EXTRACTION TOOL

The insertion of contacts during assembly or replacement during repair is quick and easy with the appropriate tools. The tools have to fit the contacts and the connectors if assembly and repair are to be carried out correctly. Plastic Body, Metal Tip Insertion & Extraction Tool I After you've installed the pins on the wiring to a connector, this tool will help you set the pins correctly into the connector housing. This tool is also absolutely necessary to use for extracting a broken pin for replacement or moving a misplaced pin for relocation. Insert and extract all your connector pins & sockets with this premium tool. It will work with both standard and high-density pins.

ELECTRICAL TERMINALS

KOROSEAL LACING

Excellent lacing material. Permanently flexible. Resists oxidation, impervious to petroleum products. Holds tension on knots indefinitely. Perfect for holding wire bundles, tubing, etc. Rectangular cross-section 3/32"x 5/32".

P/N 11-12200...../Ft.

BREYDEN POLYESTER LACING TAPES

Flat braided tape manufactured from 100% high tenacity, continuous filament polyester fiber. This product conforms to the requirements of MIL-T-43435B; Type II, Size 3, Finish C. The tape is uniformly impregnated with a synthetic elastomer coating to improve knot holding and tying characteristics. Ideal for spot tying. 500 yd. rolls. Width: .085" (±10%); Thickness: .014" (±.003"); Tensile Strength: 50 Lb. (min.); Elongation: 40% (max.)

SEAL-ALL CONNECTORS

Seal-All Connectors are an environmentally sealed connection system developed to withstand exposure to extreme temperatures, moisture and harsh engine compartment fluids and chemicals with unfaltering performance. It consists of mating heat stabilized polyamide housings, male and female "pin and socket" terminals and self-lubricating silicone connector and cable seals. Seal-All connector configurations are available for one to six wires. -40 C to 125 C temperature range. Now you can have the same superior Plug/Connector that is used in vehicle OEM manufacturing.

CABLE TIES – SPIRAL WRAP

AMP® FLEXI-BLOCK MODULAR TERMINAL BLOCK SYSTEM

Assemble terminal blocks to custom requirements in seconds:

1. Pull out the number of block assemblies required from dispenser box. 2. Cut the track with hacksaw or cutting tool two spaces longer than unit. Slip the block assembly into the track 3. Insert end stops and assembly is complete.

USER'S KIT - Consists of 25 pcs Flexi-Block terminal block, 12 end stops and (2) 12" pcs. of track. Complete kit.

PROFESSIONAL KIT - No. 6 kit consists of 100 ea. P/N 604101-1 block assemblies, 25 ea. of P/N 604111-1 end stops & 2 ea. P/N 601805-1 track 3 ft. long. Complete kit.

COPPER BUS BAR - 0.125" x .5" Wide

AMP® SPIRAP SPIRAL PLASTIC TUBING

Spirap plastic tubing is a fast and economical way to bundle wires and harnesses. It is designed to protect wire insulation for the life of the circuit even under severe vibration. Spirap tubing obtains its gripping ability from the memory of the plastic. When 1/4" diameter Spirap is wrapped around a 3/4" diameter wire bundle, the Spirap tubing tries to return to its original 1/4" diameter size, effectively gripping the wire bundle. Flame retardant polyethylene. Color—white. Bundle diameter range: 3/16" to 2".

P/N 500004-1...../ft. /100 ft.

SPIRAL WRAP WIRE PROTECTORS

Permits flexible routing of cable harness while forming a neat, protective bundle. It twists on easily and quickly and allows lead-outs at any point. When installed, it may be gapped for greater economy and flexibility or it may be butted tightly for maximum abrasion resistance, insulation protection and greater rigidity.

Nylon type-for use in wider temperature ranges with high resistance to abrasion and good solvent resistance. PE=Polyethylene NY=Nylon

Bulkhead Seal, Square, 1-1/8" Hole P/N 11-04059
Bulkhead Seal, Square, 3/4" Hole P/N 11-04061
Bulkhead Seal, Elliptical, 1/2" Hole P/N 11-04060
Bulkhead Seal, Elliptical, 1-3/8" Hole P/N 11-04062

COBRA LOW PROFILE CABLE TIES

With an exceedingly low profile and a contoured locking head, the Cobra configuration is safer, more flexible and stronger than existing cable ties. Safer because the (often barbed) stub is now deflected into a pocket at the rear of the head. More flexible because the flat lock section curves to the bundle contour and stronger because the Cobra uses an inline geometry, eliminating the stress points of traditional cable ties. Bundles down to 3/8" diameter and meets new AS 3361 specs. Features pick-proof underside lock & all rounded edges.

COBRA CABLE TIE KITS

STANDARD

Contents of kit includes: 1 - C200 (Standard) Cinch and Trim Gun, 100 - 7.5" 50lb. Low Profile Cable Ties, 1 - Instruction Manual
Black 7.5" Ties P/N 11-06319
Natural 7.5" Ties P/N 11-06320

HEAVY DUTY

Contents of kit includes: 1 - C300 (Heavy Duty) Cinch and Trim Gun, 100 - 14" 120lb. Low Profile Cable Ties, 1 - Instruction Manual
Black 14" Ties P/N 11-04729
Natural 14" Ties P/N 11-04730

BOGERT CABLES

BOGERT'S LOW LOSS COPPER CABLE KITS

Piper Service Bulletin No. 836, considered "mandatory" by Piper Aircraft Corporation, calls for the inspection and replacement of aluminum battery-to-starter cables at the next scheduled inspection, but not to exceed 50 hours of operation. The aluminum cables may generate a lot of heat and have caused melted and blackened cables. This excessive heat buildup could also result in an electrical fire. No replacement parts are available from Piper, and Piper has also specified replacement materials that are not readily available and are very expensive. The Piper-specified cables and sizes actually reduce the maximum allowable cranking amperage to the starter. The Bogert "low-loss" cable assembly kits replace the cables affected by SB 836. They are ready to install and are FAA-PMA approved with an STC. The "low-loss" cables have at least 55% greater capacity than those specified in SB 836 and 25% greater capacity than O.E.M. parts. With the Bogert "low-loss" cables your starter will turn

at its rated speed with greatly reduced current drain from your battery. Please provide year, make, S/N and "N" number of aircraft when ordering. Custom length cables available for home-built aircraft. Request quotation. Advise if plane has a lightweight starter. Extra length cable is provided at no extra charge for lightweight design.

WHELEN AVIATION LIGHTING

POSITION LIGHTS AND ANTI-COLLISION LIGHT DISTRIBUTION PATTERNS REQUIREMENTS

An approved anti-collision strobe light system must project light 360° around the aircraft's vertical axis. One or more strobe lights can be used.

An approved anti-collision strobe light system must project light + or - 30° above and below the horizontal plane of the aircraft. One or more strobe lights can be used. The + or - 75° projected light is required since July 18, 1977.

ANTI-COLLISION AND POSITION LIGHT REQUIREMENTS, LOCATIONS, & DISTRIBUTION PATTERNS

All aircraft must have an approved anti-collision light and position light system for nighttime operations. The position lights consist of an Aviation Red on the right side, an Aviation Green on the left and an Aviation White taillight (REF. FAR 23.1389).

The anti-collision lighting system is required under FAR PART 91.205(c).

There are different requirements affecting different aircraft. These aircraft are categorized by the date of application for type certificate. Home built aircraft are determined by the date of issuance of the Experimental Operating Limitations. The different categories are as follows:

Aircraft for which type certificate was applied for after

April 1, 1957 to August 10, 1971:

These anti-collision systems must produce a minimum of 100 effective candela in Aviation Red or White (REF. FAR 23.1397), 360° around the aircraft's vertical axis, 30° above and below the horizontal plane (REF. FAR 23.1401).

Aircraft for which type certificate was applied for after August 11, 1971 to July 18, 1977:

These anti-collision systems must produce a minimum of 400 effective candela in Aviation Red or White (REF. FAR 23.1397), 360° around the aircraft's vertical axis, 30° above and below the horizontal plane (REF. FAR 23.1401).

Aircraft for which type certificate was applied for after July 18, 1977:

These anti-collision systems must produce a minimum of 400 effective candela in Aviation Red or White (REF. FAR 23.1397), 360° around the aircraft's vertical axis, 75° above and below the horizontal plane (REF. FAR 23.1401).

Note: The position lights must be wired independently of anti-collision lights.

INSTALLATION LOCATIONS

WING TIP:

The major difference in systems is the location of the strobe power supplies which can be mounted locally, one in each wing tip, or a single power supply can be mounted in the fuselage. Installation time can be greatly reduced if done in conjunction with an annual or one hundred-hour inspection. Properly installed power supplies and cabling are necessary for the safe operation of Whelen or any light systems.

FUSELAGE:

Fuselage mounted units can be either self-contained with the power supply and lighthouse as one unit, or remote lighthouses run off a separate power supply. To meet the field of coverage, one must be on the top of the fuselage and one on the bottom.

VERTICAL FIN:

Finally, if applicable, a single anti-collision light can be mounted on the vertical stabilizer. It can be either a self-contained or remote lighthouse depending on the aircraft.

HOME BUILT & KIT AIRCRAFT

For Aircraft with Standard Wing Tips – The most widely used system on the market, this provides all of the components for anti-collision and position lights without the need for a taillight. The power supply is mounted in the fuselage and shielded cable is run to the strobe lights. The following is recommended:

| Quantity | Model # | Part # | Description |
|--|----------|---------------|--|
| 1 each | HDACF | 01-0770028-05 | Power supply |
| 1 each | A600PG14 | 01-0790006-00 | Wing tip strobe/position/taillight, 14 VDC |
| 1 each | A600PR14 | 01-0790006-02 | Wing tip strobe/position/taillight, 14 VDC |
| Note: Model 9034001 and 9034002 can replace Model A600 for a LED solution | | | |
| 1 each | HD60 | 01-0750206-00 | Installation package |

For Aircraft with Enclosed Wing Tip Fairings – If the position and strobe lights are mounted under a clear fairing, a third tail strobe is required. The following is recommended:

| Quantity | Model # | Part # | Description |
|--|----------|---------------|--|
| 1 each | HDACF | 01-0770028-05 | Power supply |
| 1 each | A650PG14 | 01-0770054-00 | Wing tip strobe/position light, 14 VDC |
| 1 each | A650PR14 | 01-0770054-02 | Wing tip strobe/position light, 14 VDC |
| Note: Model 7111001 and 7111002 can replace Model A650 for a LED solution | | | |
| 1 each | A500AV14 | 01-0770024-00 | Tail position/strobe light assembly |
| 1 each | HDT390 | 01-0750205-00 | Installation package |

For Aircraft with Enclosed Wing Tip Fairings & Wing Tip Mounted Power Supplies – If position and strobe lights are mounted under a clear fairing, the need for a third tail strobe is required. The following is recommended:

| Quantity | Model # | Part # | Description |
|--|----------|---------------|---|
| 2 each | A490ATSC | 01-0770062-03 | Power supply |
| 1 each | A650PG14 | 01-0770054-00 | Wing tip strobe/position/taillight, 14 VDC |
| 1 each | A650PR14 | 01-0770054-02 | Wing tip strobe/position/taillight, 14 VDC |
| Note: Model 7111001 and 7111002 can replace Model A650 for a LED solution | | | |
| 1 each | A500AV14 | 01-0770024-00 | Tail position/strobe light assembly, 14 VDC |
| 3 each | HS5 | 01-0750215-00 | Installation package |

LOCATIONS ON THE AIRCRAFT FOR ANTI-COLLISION STROBE LIGHTS, TO COMPLY TO THE LIGHT PATTERN REQUIREMENTS

VERTICAL FIN

One anti-collision strobe light mounted on the vertical fin will meet the minimum requirements on most aircraft. A half red and half white lens is recommended.

WING TIP

Two wing tip strobe lights that protrude beyond the wing tip.

ENCLOSED WING TIP

Enclosed wing tip anti-collision strobe lights, require a third strobe light on the tail or vertical fin, to fill in the required light envelope. This is an approved anti-collision system.

FUSELAGE

In a fuselage mounted anti-collision strobe light system, a minimum of two strobe lights are necessary to get the required vertical coverage. This is an approved anti-collision system.

EL

WHELEN POWER SUPPLIES - LIGHT HEADS

HOW TO CHOOSE A POWER SUPPLY AND ABOUT COMETFLASH®

The power supply needed depends on the application, and the mounting location. Model HDACF Series is a fuselage mounted power supply that will power two or three lights. Model A490ATSC Series is designed for installation adjacent to the strobe lighthead and will power one light assy. Model A490TCF Series is the most economical power supply when adding only one light. It mounts adjacent to the strobe lighthead assembly (not legal for light output with red strobe light). Most other Whelen power supplies are application specific, call for details. Unless otherwise noted, all power supplies are CometFlash®. A major advancement in the field of safety lighting. By pulsing the flash tube four times in rapid succession, the effective "on-time" of the strobe is increased from 2/1000 of a second to 4/10 of a second. This increases your airplane's visibility.

MODEL HDACF SERIES - HDACF series provides simultaneous flashing, alternate flashing or both. It will operate one, two or three strobe lightheads. Operating the wing tip strobes in the alternating mode will provide an accumulated 42 joules of power to each light. When in the simultaneous mode, the accumulated power to each light is 21 joules. In the three light mode, the wing tips will flash simultaneous at an accumulated 21 joules each, they alternate with a third light operating at an accumulated 42 joules. On the trigger selector outlet, a switch mounted in place of the jumper will allow wing tip outlets 2 & 3 to be turned off, while the tail outlet 1 will remain on. This function is commonly used when the third light is for ground operations. This power supply will operate from 10 to 30 VDC.

SPECIFICATIONS: • Power Consumption: 7.0 amps @ 14 VDC; 3.5 amps @ 28 VDC • Weight: 2.1 lbs. (953gm) • Length: 5.50" (140mm) • Width: 5.0" (127mm) • Height: 2.37" (60mm)

| Model # | Approvals | Part No. | Price |
|---------|-----------|----------|-------|
| HDACF | FAA/PMA | 11-16218 | . |

MODEL A490ATSC SERIES - A490ATSC series operates one strobe lighthead. Its compact size allows mounting in the wing tip and/or the tail, adjacent to the lighthead. It produces an accumulated 34 joules of power and can be equipped to flash simultaneously with up to 5 other like units by connecting an 18 gauge wire between outlet 3 on the input power connector. This power supply will operate from 10 to 30 VDC.

SPECIFICATIONS: • Power Consumption: 4.0 amps @ 14 VDC; 2.0 amps @ 28 VDC • Weight: 1.7 lbs. (771gm) • Length: 5.0" (127mm) • Width: 3.12" (79mm) • Height: 3.06" (78mm)

| Model # | Approvals | Part No. | Price |
|----------|-----------|----------|-------|
| A490ATSC | FAA/PMA | 11-02666 | . |

MODEL A490TCF SERIES - A490TCF series operates one strobe lighthead. It is our most compact unit and can be mounted in the wing tip and/or the tail adjacent to the lighthead. It produces an accumulated 19 joules of power. It will only meet 400 CP when used with the A470A-W. This unit cannot be synchronized. Operates from 10 to 30 VDC (not approved for use with red strobe light). **SPECIFICATIONS:** • Power Consumption: 1.7 amps @ 14 VDC; 0.85 amps @ 28 VDC • Weight: 1.2 lbs. (544gm) • Length: 5.0" (127mm) • Width: 3.12" (79mm) • Height: 2.38" (60mm)

| Model # | Approvals | Description | Part No. | Price |
|----------|-----------|-----------------------------|----------|-------|
| A490TCF | FAA/PMA | 20" leads, amp connectors | 11-14714 | . |
| A490TCFM | — | 20" leads, Molex connectors | 11-06406 | . |
| 7000615 | — | 20" leads, no connectors | 11-07600 | . |

MODEL A490TCCF SERIES - A490TCCF series is the same as the A490TCF but has a mounting plate with additional holes that directly replaces factory installed systems on single engine Cessna's, Aero Commanders, and Grumman Americans. **SPECIFICATIONS:** • Power Consumption: 1.7 amps @ 14 VDC; 0.85 amps @ 28 VDC • Weight: 1.2 lbs. (544gm) • Length: 5.0" (127mm) • Width: 3.12" (79mm) • Height: 2.38" (60mm)

| Model # | Approvals | Description | Part No. | Price |
|----------|-----------|--|----------|-------|

| 7000617 | — | 3" output, 7" input & 4 pos. amp conn (Cessna) (182,206) | 11-04494 | . |

MODEL HDS SERIES - HDS series produces 20 joules of energy, SingleFlash, alternating between two light assemblies. The SingleFlash allows for a low current draw. This power supply will operate from 10 to 30 VDC. **SPECIFICATIONS:** • Power Consumption: 4.0 amps @ 14 VDC; 2 amps @ 28 VDC • Weight: 2.0 lbs. (907gm) • Length: 5.50" (140mm) • Width: 5.0" (127mm) • Height: 2.37" (60mm)

| Model # | Approvals | Part No. | Price |
|---------|-----------|----------|-------|
| HDS1428 | — | 11-03279 | . |

NOTE: All non-FAA approved whelwn parts are signified by a (—) in the approval column. Parts without FAA approval may still be purchased, however, installation of these parts on U. S. Type Certificated products may require additional FAA approvals.

MODEL 90340 SERIES STROBE ANTI-COLLISION/LED POSITION LIGHT ASSEMBLY

90340 series is an all inclusive wing tip mounted strobe anti-collision/position light assembly utilizing LED's for both the forward & tail position lights, eliminating the need for a tail mounted position light. The LED's provide a significant reduction in current draw over conventional position light bulbs. The strobe light lens assembly is radio shielded for maximum EMI/RFI protection. Direct replacement (exact footprint) for the Whelen Model A600PG/PR series without replacing the current strobe power supply. Single set of flying leads operates both forward & tail nav on 28 VDC version, and one set each of flying leads for the forward & tail nav on the 14 VDC version.

MODEL 90375 SERIES STROBE ANTI-COLLISION/LED POSITION LIGHT ASSEMBLY (FOR COMPOSITE WINGTIP STRUCTURE)

Same as 90340 series with addition of 3 feet of braided bonded protection. **SPECIFICATIONS:** • LED Navigation Light Power Consumption: 0.5 amps @ 14 VDC, 0.25 amps @ 28 VDC • Weight: 0.60 lbs. (272gm) 14 VDC, 0.65 lbs. (295gm) 28 VDC • Exposed Height: 2.70" (69mm) • LED Colors: Aviation Red, Aviation Green & Aviation White 1.1 lbs. (499gm) • Lens: Clear RFI coated glass: strobe, Clear Polycarbonate: Navigation Lights

MODEL A600 PG/PR SERIES

A600 PG/PR series wing tip anti-collision, forward position and tail position lights, all in one compact unit. Tail position light eliminates the need for a tail mounted position light. Available in 14 or 28 VDC and in a radio-shielded version. The forward position lamp is 26 watts and the taillight lamp is 25 watts. **SPECIFICATIONS:** • Weight: 0.8 lbs. (363gm) • Position Lamps Power Consumption: 4 amps @ 14 VDC; 2 amps @ 28 VDC • Exposed Height: 2.4" (61mm) • Length: 5.63" (143mm) • Width: 1.7" (43mm)

MODEL 71110 SERIES STROBE ANTI-COLLISION/LED POSITION LIGHT ASSEMBLY

71110 series is a wing tip mounted strobe anti-collision/position light assembly utilizing LED's for the forward position lights. The LED's provide a significant reduction in current draw over conventional position light bulbs. The strobe light lens assembly is radio shielded for maximum EMI/RFI protection. Direct replacement (exact footprint) for the Whelen Model A650PG/PR series without replacing the current strobe power supply. Navigation light portion is wired with flying leads.

SPECIFICATIONS: • LED Colors: Aviation Red, Aviation Green • LED Navigation Light Power Consumption: 0.25 amps @ 14 VDC or 28 VDC • Weight: 0.45 lbs. (204gm) 14 VDC, 0.50 lbs. (227gm) 28 VDC • Exposed Height: 2.70" (69mm) • Lens: Clear RFI coated glass: strobe, Clear Polycarbonate: Navigation Lights

WHELEN SELF-CONTAINED LIGHT ASSEMBLIES

MODEL 70900 SERIES LED BEACONS - (for fixed wing aircraft) 70900 series are FAA TSO compliant self-contained anti-collision lights for fixed wing aircraft. An external power unit is not required. Conservative lab life results greater than 20,000 hours. No EMI or RFI produced. All units meet the minimum requirements stated in FAR Parts 23 & 25 for anti-collision light systems used on fixed wing aircraft, Ref; Class

III (100 effective candela) of SAE AS8017a minimum performance standards. STC SA615EA approved.

Models 7090004 & 7090005 are designed to replace existing light assemblies with the 3-3/4" (95mm) dia. mounting pattern (Ref. Whelen HRCFA series, 90081 series, and "old style" rotating beacons). Same mounting hole pattern, no modification to the aircraft is required. **SPECIFICATIONS:**

• Power Consumption: P/N 11-02523: 0.85 amps @ 14 VDC • Power Consumption: P/N 11-02524: 0.425 amps @ 28 VDC • LED Color: Aviation Red • Weight: 1.1 lbs. (499gm) • Exposed Height: 3.1" (78mm) • Exposed Diameter: 2.8" (71mm)

9052051

MODEL 90520 SERIES LED FLASHING BEACON (RED & WHITE LED'S) - 90520 series LED beacons are FAA TSO compliant self-contained LED anti-collision lights (Ref. Class I - 100 effective candlepower). They are designed to replace strobe lighthoods as small as the A470A with available models to replace HR self-contained beacons (HRCFA) or our legacy 70900 LED beacon. Mounting plate included with assembly. Refer to models and descriptions below.

ELECTRICAL:

Models ending: 2001, 2004, 2005, 2014, 2015, 2051, 2055: 12" Flying Leads

Models ending: 2007, 2017, 2008, 2018: MS3102R10SL-3P Connector

MECHANICAL:

Models: 2004, 2014, 2008, 2018 are designed to replace existing beacons utilizing a 5 Hole mounting pattern on 4.656 diameter bolt circle (Whelen 70285 series / 7090501 series or 70900 with A440 adapter).

Models: 2005, 2015, 2007, 2017 are 3 3/4" opening designed to fit inside an A440 mounting adapter, mounting holes to fit in place of rotating beacons, Whelen model HRCFA, or 7090004, -05 series LED beacons

SPECIFICATIONS: • Current: 0.67 amps Average, 3.0 amps Peak • Weight: 0.65 lbs. (295gm) (-01 & -51) • Lens: Clear polycarbonate • Dimensions: 2.6" (66mm) Diameter, Exposed Height, 3.74" (95mm) (-01 & 51)

MODEL HRCFA SERIES - HRCFA series is a self-contained CometFlash® strobe anti-collision light. The unique polycarbonate optic lens and reflector design re-directs stray light rays into the horizontal plane to provide maximum 360° of uniform light coverage. Available in three different lens colors, aviation red, aviation white and split aviation red/white and in radio-shielded configurations. FAA approved as a direct replacement for any rotating beacon that uses a 3-3/4" (95mm) dia. mounting hole. Can be installed in the vertical fin or the fuselage. Fuselage installation requires the A440 mounting adapter. Operates between 10 to 30 VDC. **SPECIFICATIONS:** • Weight: 1.5 lbs. (680gm) • Height: 7.25" (184mm) • Diameter: 3.7" (94mm) • Power Consumption: 3.2 amps @ 14 VDC, 1.6 amps @ 28 VDC

MODEL 70905 SERIES LED BEACONS (FOR ROTORCRAFT) - NOTE: Users of 70905 Series LED beacons should examine Model 71080 (above). At a lower cost and less weight 71080 is designed to replace all 70905 Series beacons.

70905 series are self-contained anti-collision lights for Rotorcraft. An external power unit is not required. All units meet the minimum requirements stated in FAR Parts 27 & 29 for anti-collision light systems used on rotorcraft, Ref: Class I (150 effective candela) of SAE AS8017a minimum performance standards. 28 VDC Only.

7090505 is designed to replace existing beacons on the Eurocopter EC120, 130, & 135, or any other rotorcraft that uses the 4 hole mounting as shown on the mounting plate. It incorporates a MIL-C-38999 Series III, 20FA98PN connector for input.

SPECIFICATIONS: • Power Consumption: 0.45 amps @ 28 VDC • LED Color: Aviation Red • Weight: 1.4 lbs. (635gm) • Exposed Height: 4.04" (103mm) • Exposed Diameter: 3.66" (93mm)

MODEL 70285 SERIES - 70285 series self-contained CometFlash® strobe anti-collision light. It utilizes the same lens/reflector and strobe tube as the model HRCFA, however, its vibration resistant, heavy-duty construction is specially designed for helicopter applications. It has a fixed mounting adapter and an MS input connector. Available in three different lens colors, Aviation red, aviation white, and split aviation red/white and in radio-shielded configurations. FAA approved as a direct replacement for any rotating beacon that uses a 3-3/4" dia. mounting hole. Unit will operate between 10 to 30 VDC. **SPECIFICATIONS:** • Weight: 1.5 lbs. (680gm) • Height: 8.0" (203mm) • Diameter: 3.7" (94mm) • Power Consumption: 3.2 amps @ 14 VDC, 1.6 amps @ 28 VDC

NOTE: All non-FAA approved whelwn parts are signified by a (-) in the approval column. Parts without FAA approval may still be purchased, however, installation of these parts on U. S. Type Certified products may require additional FAA approvals.

EL

WHELEN SELF-CONTAINED LIGHT ASSEMBLIES

MODEL SACF SERIES - SACF series self-contained Comet-Flash strobe anti-collision light which utilizes the same power supply & housing as the model HRCFA. It uses an aviation white glass lens only, ideal for agricultural applications where chemicals are used. Because the lens has no optics built-in, it produces 300 effective candlepower. It uses a 3-3/4" dia. mounting hole. Fuselage installation requires the A440 mounting adapter. Operates between 10 to 30 VDC.

SPECIFICATIONS: • Weight: 1.5 lbs. (680gm) • Height: 5.50" (140mm) • Diameter: 3.7" (94mm) • Power Consumption: 3.2 amps @ 14 VDC, 1.6 amps @ 28 VDC

| A440 | FAA/PMA | Mounting adapter | 11-03699 | . |

MODEL 70509 SERIES - 70509 series self-contained halogen flashing anti-collision light with the same mounting pattern as the factory installed beacon on single engine Cessna's 1967 & later. Available in three different lens colors, Aviation red, aviation white and split aviation red/white. When used in conjunction with the model 50519 mounting adapter, it can replace rotating beacons with the 3-3/4" (95mm) dia. mounting hole.

Note: Not recommended for installation on helicopters or twin engine aircraft.

SPECIFICATIONS: • Weight: 0.27 lbs. (122gm) • Height: 3.75" (95mm) • Diameter: 2.65" (67mm) • Power Consumption: 2.7 amps @ 14 VDC, 1.3 amps @ 28 VDC

MODEL 90350 SERIES SELF-CONTAINED LED GROUND RECOGNITION LIGHT ASSEMBLY

- 90350 series is a self-contained all LED ground recognition light assembly. The design is intended to provide a solution to the needs for ground recognition lighting on a wide variety of aircraft. All current source and flasher circuitry is contained within the

base plate. Unit is flush mounted to aircraft surface eliminating the need for large cutouts in the aircraft structure. Item ships with flying leads.

SPECIFICATIONS: • Power Consumption: 0.28 amps Avg. @ 28 VDC • LED Colors: Aviation Red • Lens: Aviation Red, Polycarbonate • Weight: 0.2 lbs. (91gm) • Exposed Height: 1.48" (38mm) • Exposed Width: 1.64" (42mm) • Exposed Length: 4.61" (117mm)

| Model # | Approvals | Description | Part # | Price |

MODEL 71055 SERIES LED BEACON - 71055 series beacons are FAA TSO compliant self-contained LED anti-collision lights. They are designed to replace existing quartz halogen flasher beacons installed as original equipment on single engine Cessna's from 1967 and later (contact factory for details). They can also replace remote mounted strobe lights (ref. Whelen A470 series) allowing for removal of the strobe power supply. Internal mounting plate provided with choice of mounting holes to retrofit most existing mounting patterns. STC SA615EA approved.

SPECIFICATIONS: • Power Consumption: 01-0771055-00 - 1.2 amps Avg. / 11-04542 - 0.6 amps Avg. • LED Color: Aviation RED • Lens: Clear Polycarbonate • Weight: 0.52 lbs. (236gm) • Exposed Height: 3.09" (78mm) • Exposed Diameter: 2.60" (66mm)

NOTE: All non-FAA approved whelwn parts are signified by a (—) in the approval column. Parts without FAA approval may still be purchased, however, installation of these parts on U. S. Type Certificated products may require additional FAA approvals.

MODEL 90088 SERIES LED ANTI-COLLISION LIGHT

- 90088 series is a self-contained LED anti-collision beacon. It's solid-state circuitry and LED light source obsolete the "old style" mechanical oscillating beacons as well as the Whelen 90044 series quartz halogen flashing beacons. Benefits include no moving parts, no EMI/RFI, no inrush current spikes and crisp on/off cycles. There are several models available to provide compatibility with existing mounting patterns and profiles, thus eliminating the need to alter the aircraft.

SPECIFICATIONS: • Power Consumption: 0.45 amps @ 28 VDC • LED Color: Aviation RED • Weight: 1.8 lbs (816gm) (unless otherwise noted) • Exposed Height: 2.70" (69mm) • Lens Color: Clear glass • Replaces: Whelen: 90044 Series and Grimes: G9950(-), 40-0100(-), 30-2140(-), 40-0117(-), 40-0127(-), 30-2647(-)

To determine the model required for replacement, the following information is needed: upper or lower mounting, number of mounting holes (5 or 8), weight & position installed. Beacons installed on the rudder. Top replacement on Gulfstream II & III require a 9008812 in conjunction with the optional 16 hole mounting plate, P/N 06-170618-00.

| Model # | Approvals | Description | Part # | Price |

| 9008818 | FAA TSO-C96a Class III | Upper, 8 hole, 1.9 lbs, cable pigtail | 11-07634 | . |
| 9008819 | FAA TSO-C96a Class III | Lower, 8 hole, 1.9 lbs, cable pigtail | 11-07635 | . |

MODEL 90044 SERIES - 90044 series self-contained, 150 watt, quartz halogen flashing anti-collision light. Factory installed on Lear 31, Falcon 900 and Cessna Citation X. It is also a direct replacement for oscillating beacons on most corporate aircraft.

5-Hole **SPECIFICATIONS:** • Weight: 1.6 lbs. (726gm) to 2.5 lbs. (1134gm) • Height: 5.5" (140mm) • Power Consumption: 3.25 amps @ 28 VDC • Replaces: G9950(-), 40-0100(-), 30-2140(-), 40-0117(-), 40-0127(-), 30-2647(-)

To determine model required for replacement, the following information is needed: Lens color (red or white), upper or lower mounting location, number of mounting holes (5, 8, or 9), weight and position installed. Beacons installed on the rudder. Top replacement on GII and GIII require 9004401 or 9004402 in conjunction with the 16 hole mounting plate, P/N 06-170618-00.

WHELEN POSITION LIGHT ASSEMBLIES

MODEL 71105 SERIES LED POSITION LIGHT ASSEMBLY - 71105 series

are fully FAA TSO compliant forward position lights. LED's provide a significant reduction in electrical current draw over conventional light bulbs. The 71105 is our latest design and lowest priced forward position light. Direct replacement for Whelen Model W1285 series (Version STC'd on Learjet Aircraft).

SPECIFICATIONS: • LED Navigation Light Power Consumption: 0.25 amps @ 14 VDC or 28 VDC • LED Colors: Aviation Red, Aviation Green • Weight: 0.20 lbs. (91gm) • 14 VDC, 0.25 lbs. (113gm) 28 VDC • Exposed Height: 2.70" (69mm) • Lens: Clear Polycarbonate

| Model # | Approvals | Description | Part # | Price |

| W1250PG2 | FAA TSO-C30b Type II | Position grn, 28 V | 11-03278 | . |

MODEL A555A SERIES - A555A series tail mounted position light which uses a 25 watt halogen lamp. The suffix "V" or "H" in the part number designates the aircraft mounting screw locations in respect to the light shield. "V" designates vertical mounting and "H" indicates horizontal mounting on the aircraft. Supplied with a 2 position "AMP" connector. Specify 14 VDC or 28 VDC. Replaces the brand "G" A2064 series.

SPECIFICATIONS: • Exposed Height: 1.4" (36mm) • Mounting Diameter: 1.06" (27mm) • Power Consumption: 2 amps @ 14 VDC, 1 amp @ 28 VDC • Weight: 0.1 lbs. (45gm)

MODEL 90377 SERIES LED POSITION LIGHT ASSEMBLY - 90377 series is a

wing tip mounted position light assembly utilizing LED's for both the forward & tail position lights, eliminating the need for a tail mounted position light. The LED's provide a significant reduction in current draw over conventional position light bulbs. Direct replacement (exact footprint) for the Whelen Model A675PG/PR series. Single set of flying leads operates both forward & tail nav on 28 VDC version, and one set each of flying leads for the forward & tail nav on the 14 VDC version.

SPECIFICATIONS: • LED Navigation Lights Power Consumption: 0.5 amps @ 14 VDC, 0.25 amps @ 28 VDC • LED Colors: Aviation Red, Aviation Green and Aviation White • Weight: 0.35 lbs. (159gm) • Exposed Height: 1.08" (27mm) • Exposed Width: 1.87" (47mm) • Exposed Length: 5.69" (145mm) • Lens: Clear Polycarbonate

MODEL 71011 SERIES LED TAIL POSITION LIGHTS - 71011 series are LED tail position

lights designed to replace the existing "old style" tail lights typically seen mounted on most general aviation, corporate, and helicopter applications. They have all the advantages associated with using LED's as a light source, improved reliability, and reduced operating costs. Now offered with a 14 Volt version.

SPECIFICATIONS: • Power Consumption: 0.5 amps @ 14 VDC; 0.3 amps @ 28 VDC • LED Color: Aviation White • Weight: 0.2 lbs. (91gm) • Exposed Height: 1.36" (35mm) • Mounting Hole Pattern: 1.75" (45mm)

MODEL 70966 SERIES - 70966 series LED tail position light, is a high quality, long lasting, modern alternative to incandescent & halogen tail position lights. It offers significant technological upgrades over previous products. Utilizing LED technology, the following advantages are offered: Long Life (approx. 20,000 hours); Reduced Power Consumption (compared to alternative light sources); Shock & Vibration Resistant (no fragile filament to burn out); Light (produces bright white light) and No EMI or RFI Interference. 3 Year

Warranty. **SPECIFICATIONS:** • Exposed Height: 1.64" (42mm) • Length: 2.60" (66mm) • Width: 1.74" (44mm) • Power Consumption: 0.3 amps @ 28 VDC • Weight: 0.3 lbs. (136gm)

| Model # | Approvals | Description | Part # | Price |
|---------|-----------------------|---|----------|-------|
| 7096600 | FAA TSO-C30c Type III | 28 VDC - no connectors | 11-01228 | . |
| 7096601 | FAA TSO-C30c Type III | 28 VDC - connectors, case ground used on Beechjet | 11-07699 | . |

NOTE: All non-FAA approved whelwn parts are signified by a (—) in the approval column. Parts without FAA approval may still be purchased, however, installation of these parts on U. S. Type Certificated products may require additional FAA approvals.

EL

WHELEN EXTERIOR & INTERIOR LIGHTING

READING LIGHT - The Model A325 ML reading light will replace original equipment on 14 volt Piper aircraft. It is designed for passenger convenience and is equipped with an on/off slide switch. Specify voltage (14V or 28V). 14V P/N 11-03294
28V P/N 11-03682

COMPARTMENT FLOODLIGHT - The Model A325 FL is a floodlight for compartmental flooding and general lighting. It is equipped with an on/off slide switch. Specify voltage. 14V P/N 11-03681
28V P/N 11-03656

OVERHEAD CABIN LIGHT - The Model A360 is designed for recessed overhead lighting. Aluminum housing & Pyrex lens. Weight: 0.25 Lb. 14V P/N 11-03685
28V P/N 11-03686

MODEL 71144 'GOOSENECK' LED LIGHT ASSEMBLY - 71144 assembly features a positive off position and rheostat controlled light intensity. Models including 'side' mounted intensity control are which is designed for the S76D. 28 VDC Only. **SPECIFICATIONS:** • Power Consumption: 0.06 amps @ 28 VDC • LED Colors: Aviation White • Weight: 0.46 lbs. (209gm) • Black Nylon Hood: fixed in position

MODEL 70844 SERIES LED POST LIGHTS - The model 70844 series are LED (Light Emitting Diode) instrument post light assemblies. They are designed to illuminate the instrument panel, and function as instrument mounting bolts. It is a high quality, long lasting, modern alternative to standard incandescent post lights. They offer significant technological upgrades over existing products. Utilizing LED technology, the following advantages are offered:

- Long life - approximately 20,000 hours.
- Reduced power consumption - compared to alternative light sources
- Shock and vibration resistant, no fragile filament to burn out
- Light - produces bright white light.
- No EMI or RFI interference

A715-1 LANDING LIGHT
The Model A715-1 landing light is standard equipment on new Beechcraft, and will retrofit into older aircraft, as well. Accommodates PAR 36 sealed beam lamp. Order lamp separately (#4509 - 100W, 12V; #4594 or #4613 100W, 24V; Wt. 1/2 lb. Size: 4-3/4" dia. x 6-1/2" long x 2-1/8" deep.
P/N 11-03281

MODEL 71141 SERIES LED LANDING LIGHT (INTERNAL MOUNT) PAR-36 STYLE - 71141 series is a self-contained all LED landing light assembly. The design is intended to provide a solution to the needs for a taxi & landing light on a wide variety of aircraft.

All current source and electronic circuitry is contained within the housing. Unit is available in several mounting configurations to retrofit existing typical PAR-36 lighting. Unit is designed to be mounted internally behind existing lens. Item ships with flying leads. Contact your OEM for installation eligibility on your aircraft.

SPECIFICATIONS: • Power Consumption: 1.5 amps @ 28 VDC • Weight: 1.0 lbs. (454gm) • Exposed Diameter: 4.46" (113mm), Overall Depth: 1.90" (48mm) • Lens: Clear Polycarbonate

Homebuilders WHELEN STROBE KIT

This compact, lightweight strobe kit is very popular with builders of a variety of todays homebuilt aircraft. Kit includes: 2-A610 flash tube assys., 2-A612 magnifying lenses, 2-A490T,CF power supplies and 1-HT installation Kit.

P/N 11-00923.....

CUSTOM LOW ENERGY SYSTEM

Popular with Long-EZ, Q2, Q200 builders and others using a lightweight, low amperage generator or alternator. It consists of: (2) A600-PG/PR Wingtip Strobe Lights, (1) A413A, HDS-14/28 (Single Flash 20 Joules) remote mounted Power Supply, HD-60 Installation Kit (Draws less than 4A - 14V & produces 400 effective Candles.)

Kit # 11-05600

P/N 11-05600.....

WHELEN STROBE TESTER

Designed to determine whether power supply is operating normally. Kit contains troubleshooting procedures. Also contains adapter for testing some Grimes and Hoskins strobe light systems.

EL

ELECTRONIC ACCESSORIES

VOLT AND VAC ALERT

*Provides an instantly recognizable voice warning directly in your headset if low vacuum (or pressure) or low voltage develops. * Includes a red warning light mounted close to the gyro instruments. Many aircraft are equipped with backup vacuum systems, however you must first know that your instrument power system has failed before any of these backup systems are engaged. You must "know you have a problem before you have a problem". Volt & Vac Alert consists of a small electronic unit that can be mounted anywhere in the aircraft. It connects to aircraft voltage, instrument power (vacuum or pressure), and the aircraft audio system. If the voltage falls below 12v or 24v the voice message "CHECK VOLTAGE CHECK VOLTAGE" will be heard. Should the gyro power fail, the pilot will hear the voice message "CHECK GYROS, CHECK GYROS" directly in his headset. The voice message will sound once, and then the red warning light will illuminate until the problem is fixed. The unit can be used in 12v or 24v aircraft with either vacuum or pressure gyro power systems. It can be installed in pressurized or un-pressurized aircraft. Sold as a complete assembly with everything necessary for the installation except a 1 amp fuse or circuit breaker. STC'd for most general aviation aircraft
P/N 10-00393

VOICE ALERT

Whenever the existing stall horn sounds, the pilot will hear the instantly recognizable voice message "STALL, STALL" from the built in speaker, and directly in his headset. If the gear warning horn sounds, the pilot will hear the voice message "CHECK LANDING GEAR, CHECK LANDING GEAR" alerting of the problem. No more confusion over which horn is sounding. These voice messages are in addition to the original horn sounds. The Voice Alert consists of a small electronic unit about 2-1/2" by 3-1/2" in size that can be mounted almost anywhere in the cockpit. The installed weight of the unit is less than 1 lb. The unit is supplied as a complete kit consisting of the electronic unit, a pre-wired cable assembly, and all the connectors and mounting hardware. The only other item required is a 1 amp fuse or circuit breaker. Installation is easy, and can be performed by an A&P mechanic or an avionics shop. The system is approved for both fixed and retractable gear aircraft.

| Description | Part No. | Price |
|--|----------|-------|
| VOICE ALERT 2040-1-1 produces voice messages for gear and stall warnings, and can be programmed with up to 8 additional warning voices such as altitude, vacuum, fuel, pressures, etc. Supplemental system only. | 10-03713 | . |
| VOICE ALERT 2040-1-2 produces stall and gear voice messages in the pilot's headset. Supplemental system only. | 10-00394 | . |
| VOICE ALERT 2040-1-1P similar to the 2040-1-1 except approved for installation as primary replacement for existing warning units like Cessna Electronic Dual Warning units | 10-03714 | . |
| VOICE ALERT 2040-1-2P similar to the 2040-1-2 except approved for installation as primary replacement for existing warning units like Cessna Electronic Dual Warning units | 10-03715 | . |

GEAR WARNING SYSTEM (2048)

* Provides both voice and visual warning if the landing gear is not in the correct position for either a runway landing or a water landing. * Airspeed activated, activation speed is easily set from 45 to 90 mph. * Works with aircraft having 2, 4, or 8 gear indicating lights or simple switches that provide gear position. Consists of a small electronic module (2.5 inch by 3.25 inch weighing less than 1 lb), and a panel mounted switch with light. The system is airspeed activated. The activation speed can be easily set using a screwdriver. On takeoff once the speed has exceeded the activation speed, the system activates. A time delay is built in to prevent false triggering due to speed fluctuations. The light in the switch illuminates when the system is activated. The pilot can perform a self test of the system. Can place in a disengage mode which temporarily disengages the system for slow flight. If the aircraft has flaps, a flap switch can be added to cause the landing sequence to be initiated whenever the flaps are fully extended. The unit also includes an airspeed activated switch which closes whenever the airspeed is above 45 mph. This can be used to activate a transponder, Hobbs meter etc. The unit is sold as a complete system including the electronic unit, a pre-made cable assembly, a pre-wired switch, connectors, mounting hardware etc. Experimental aircraft. P/N 11-02258

POWER GUARD BUS MANAGEMENT SYSTEM

An essential bus management circuit designed to protect power sensitive and critical electronics. Starting currents are usually high enough to cause battery voltage to drop below tolerable limits for many electronics systems. The result could leave you without engine instrumentation until EFIS "reboots" (up to 30 seconds). Protection includes low voltage drop out and essential backup in the event of primary power loss. Filtration on the secondary supply and secondary battery charging are also an integral parts of the circuit. A secondary battery is required for the Power Gauge we recommend a 5-12 Amp battery for emergency supply. Several control modes are possible with the system allowing for installation and operational flexibility. Load Ratings: 7A continuous, 10A 10% duty. Dims: 4.75"l x 2.75"w x 1.2"h P/N 11-02044

AMPHIBIAN GEAR WARNING SYSTEM

Designed to provide an additional margin of safety for amphibian pilots by providing a backup electronic means of verifying landing gear position for both water and runway landings. Consists of a small electronic box (about 2.5 inch by 3.25 inch weighing less than 1 lb) that can be mounted anywhere in the aircraft, and 2 panel mounted switches with lights. The system is activated by airspeed. The activation speed can be set by a simple screwdriver adjustment. On takeoff, as the airspeed exceeds the activation speed, the system becomes active. There is a time delay built in to prevent false triggering. When the system becomes active, the lights in the panel switches will illuminate for 6 sec, to alert the pilot that the system is active. The pilot can perform a self test. Can be temporarily disengaged for slow flight. As the aircraft slows below the activation speed for a landing, the landing sequence is initiated. Panel switches are marked "L" for land, and "W" for water. If the gear is in the correct position, the voice message "GEAR O.K." will be heard. If the gear is not in the proper position, the voice message "CHECK LANDING GEAR, CHECK LANDING GEAR" will be heard. This message will continue until the speed is increased above the activation speed, or the gear is placed in the proper position. When installed in aircraft having multiple gear indicating lights, the system will respond with the "CHECK LANDING GEAR" voice warning if it determines that any of the wheels are in the wrong position. Also responds with the warning if the gear indicating lights lose power. Also incorporates an airspeed activated electronic switch which closes whenever the airspeed is above 45 mph. This can be used to activate a transponder, Hobbs meter etc. Supplied as a complete kit consisting of the electronic module, a pre-wired, color coded cable, switches, connectors, mounting hardware etc. The only other item required is a 1 amp fuse or breaker. STC'd for many amphibian aircraft and aircraft on amphibian floats
P/N 11-07537

GEAR ALERT SYSTEM 2050

NOTE: This system is not FAA approved. It is intended for installation in Experimental category aircraft only.

For Experimental amphibian aircraft consists of a small electronic module (2.5 inch by 3.25 inch weighing less than 1 lb), and a panel mounted switch with light. The system is airspeed activated. The activation speed can be easily set using a screwdriver. On takeoff, once the speed has exceeded the activation speed, the system activates. A time delay is built in to prevent false triggering due to speed fluctuations. The light in the switch illuminates when the system is activated. The pilot can perform a self test of the system. Disengage mode which temporarily disengages the system for slow flight. During this period, the light in the switch flashes indicating the system is disengaged. Pushing the switch again re-engages the system. As the aircraft slows for landing, the system enters the landing mode. The light turns off, and the electronics then checks the gear position lights to determine the gear position. If the aircraft has flaps, a flap switch can be added to cause the landing sequence to be initiated whenever the flaps are fully extended. A switch can be added to the throttle so that closing the throttle with the gear up will cause the warning voice message to be heard. The unit also includes an airspeed activated switch which closes whenever the airspeed is above 45 mph. This can be used to activate a transponder, Hobbs meter etc. The unit is sold as a complete system including the electronic unit, a pre-made cable assembly, a pre-wired switch, connectors, mounting hardware etc. P/N 11-07538

POWER BUSS 2075

An electronic device that provides 12 volt DC overload monitoring and protection for 18 electrical circuits. The Power Buss also monitors (high amperage) generator supply and landing gear actuator circuits. Protection is provided by 18 solid-state PTC current limiters that automatically remove power when a circuit becomes overloaded. Just as mechanical circuit breakers can be reset, the PTC can be reset if power to the PTC, or the load (or service) supplied by the PTC is manually shut off for approximately 15 seconds. Monitoring is provided by a red warning light (that includes the function of a momentary push switch) and an electronic voice annunciator system that provides an audio identification of the overloaded circuit through a built in speaker. Voice warnings can also be output into the pilot's headset. Includes an avionics buss that automatically removes power from sensitive avionics systems during engine start. Weighing only 13 oz. and self-contained the Power Buss module can be mounted anywhere behind the panel with only the warning light visible in the cockpit. Interconnect is made by quick connect terminals. The system's 18 PTC's provide an economical replacement for heavy circuit breakers. 18 different voice messages corresponding to the 18 circuits provide instant recognition of which circuit has tripped. The sophisticated electronic audio alert system removes the requirement for a separate (difficult to read and interpret) circuit display module. On power up the Power Buss automatically tests all circuits. Pressing the red warning light also tests the system with a "Test OK" annunciation. Experimental aircraft only. P/N 10-03716

ELECTRONIC ACCESSORIES - STROBES

MASTER NAG-THE MASTER SWITCH WARNING SYSTEM

An audible warning system for 12V or 24V aircraft designed to prevent leaving the master switch turned on in an aircraft. It is fully automatic and requires no attention from the pilot. It is armed by presence of engine oil pressure after the engine has been started and will alert the pilot if the master is left on after engine shutdown. Since the unit is triggered on engine shutdown by a loss of oil pressure a short time delay is experienced between shutdown and alarm activation. No sound will be heard when the master switch is first turned on. This allows the pilot to talk to ground control, clearance delivery etc., without the distraction of an alarm. The unit is constructed with MIL-SPEC components and printed circuit board construction. It is capable of 12 or 24 volt operation and is polarity protected, internally fused (no external circuit breakers or fuses required for installation) and can be triggered from a positive or negative signal from the Hobbs meter switch as described in the installation manual. Weighs less than two ounces, 8 milliamps. All mounting hardware and connectors are provided.

P/N 11-15200

ELECTRONIC FLAP CONTROL

Move aircraft flaps to 4 predefined positions/steps (Flaps Full Up, Flaps 1, Flaps 2, and Flaps Full Down). The positions may be defined by user at any time, when system is fully mounted and installed. The Box can be installed between Flap-switch, Position-indicator, Flap-motor and position sensor. Works with standard switches and position sensors. Has built-in Relays to drive directly the Flap Motor or solenoid-valves in hydraulic systems. **Features:** • Flap limit-switch (upper and lower) input • Auto/Manual-Switch input, to disengage Electronic-/Automatic-Mode in case of electronic failure. • Flap-Position-Sensor-Input (adjustable, to meet user requirements) • Flap-Position-Indicator-Output (adjustable, to meet user requirements) • Built-in mode switch to ease define Flap-stop-positions and working modes of device

• Full aluminum case • Detailed wiring diagram & setup-description • Dims: 4.72"x2.56"x2.13" • Weight: .474 lbs. • Output: Relays • Max input/Output-Current: 10A • Supply voltage: +12VDC

GRETZ AERO WARNING TONE

GENERATOR & AUDIO MIXER

GRETZ AERO AUDIO WARNING TONE GENERATOR - Warning tone can be used to get your attention for one of variety of events through your headset advising of a user selected function.

P/N 11-06491

GRETZ AERO AUDIO MIXER - A must have economical item if you have two or more audio sources in your aircraft. If you do not want to install a very costly and panel-space-hungry audio panel, the GA-AM is for you. Up to nine audio sources can be fed into this device. These audio sources could come from your com radio, a second com radio, your nav radio, GPS, marker beacon, or warning devices. You can even have music into your headset from your stereo CD player however it will be monaural. All that is needed is a music player.. The two stereo channels are fed into the Audio Mixer by using two of the Audio Mixer's nine audio inputs.

P/N 11-06490

DIGITAL VOLTAGE MONITOR

Helps pilots monitor critical electrical system. STC approved. Features a Multi Color LED display, which is easily viewable from a wide angle. In the event of an alternator/generator failure, the LED display indicates the reserve battery capacity. The display automatically adjusts to the ambient light for IFR or night operation and also serves as a reminder to turn off the electrical system after flight. Comes in either 12V or 24V models and includes all necessary hardware and FAA Documents. The display must be set to Dot mode for FAA approved installations.

12 Volt Digital Voltmeter P/N 10-00752
24 Volt Digital Voltmeter P/N 10-00753

CABIN POWER SYSTEM

The Cabin Power System provides a 12V outlet in the cabin. It consists of a Voltage Regulator Unit (VRU) assembly that is connected to a power outlet mounted within the aircraft cabin. The VRU (pictured) converts aircraft power to 12V @ 1.5A at the outlet. Size: 2-7/8" x 3.5" w x 2-1/8" h; Wt: 5 oz., the VRU can easily be mounted in a variety of locations. In Cessna 172, 182, & 206 models it is approved for mounting on top of the map compartment behind the instrument panel. STC-PMA'd for Cessna 172, 182, & 206 models. System is shipped complete w/Flight Manual Supplement, Instructions for Continued Airworthiness, and Installation Manual.

P/N 11-01894

SKYSPORTS BRIGHT STAR STROBE

Measuring only 4" high by 2 3/4" diameter, it weighs less than 5 ounces! Special dual xenon flashtube arrangement provides ultra-bright flash visible for over 3000' in daylight, much more at dusk and dawn. No separate power pack is required, all electronics are fully contained in the strobe itself. Lens is available in clear, red or green. Each strobe draws less than 300ma. Mounting bracket included. Buy two for wing-tip installation. Must be run from 12 volt battery. Dimensions: 4"x 2.75"(dia) Weight: 4.5 ounces.

MINIATURE AEROFLASH SINGLE LIGHT STROBE

A high-intensity anti-collision strobe system producing 10 joules. FAA-PMA approved. Mount on top or belly of fuselage or on vertical fin. The Xenon lamp is designed to produce symmetrical illumination pattern of light 360° around the aircraft and 70° above and below the horizon. Less than 3" dia., 2-1/2" high. Mounts in 7/8" dia. hole and is secured by two screws. Draws 2 amps nominal at 12V. Kit includes light, remote power supply and 15 ft. cable. Light has clear Fresnel lens and strobe tube. Wts: Light 6 oz., Power Supply 20 oz. Hardware NOT included.

AEROFLASH REPLACEMENT FLASHERS

P/N 150-0002 consists of:

12 Volt Single and/or Dual Flasher
Replaces Old Style Flashers in Cessna Aircraft

P/N 150-0003 consists of:

24 Volt Alternating Flasher Replacement
for Helicopters

Aeroflash flashing lights have been used on Cessna aircraft since 1964. The strobes have been original equipment since 1977 on Cessna, Varga and Aero Commander.

P/N 150-0008 consists of:

24 Volt Single and/or Dual Flasher
Replaces Old Style Flashers in Cessna Aircraft

P/N 150-0013 consists of:

24 Volt Single Flasher

EL

STROBES – POSITION LIGHTS - LED LIGHTS

ILLUSION AIRCRAFT STROBE

Powered by the lighting coil of Rotax and other two-cycle engines, this is the most efficient strobe light on the market because it uses only the power normally wasted by the voltage regulator in a battery charging system. It has no effect on the charging system, so you can still connect other equipment to the lighting coil. The two strobe lights flash alternately an average of 55 times per second. Lesser strobe systems fire their lights simultaneously, resulting in a much longer firing cycle because the lighting coil can only develop so much power in a given time. The illusion Strobe use a specialized prismatic Fresnel lens. This lens increase the strobe's effective light intensity up to 8 times. The illusion Strobe works with the new Rotax 170W dual-ignition lighting coils and the standard 125W single-ignition type. It meets Part 103 requirements to add to an extra hour of legal flying time each day. The illusion Strobe comes with 2 lights rated at 25 joules; driver, wire, hardware, instructions, and a two-year manufacturer's warranty.

FLIGHT STROBE FS 4400

This precision compact unit mounts easily on top or below fuselage, and directly replaces rotating beacons. It features a high-intensity Xenon arc lamp, a high-efficiency push pull inverter circuit for stable flash voltage and a flame-resistant military circuit board assembly. The lamp is readily replaceable without removing the unit from the aircraft, and the unit weighs only 1 lb. 4 oz. The Flight Strobe FS-4400 is visible for over 50 miles at night, in haze, smog or bright sunlight and is manufactured using the highest quality components for maximum reliability and service life. Amp draw 3 Amp. (14V) & 1.5 Amp (28V). STC'D for Cessna 180. FAA form 337 for field approval is required for installation of other certified aircraft. Order adapter separately.

LED REPLACEMENT LAMPS FOR NAVIGATION LIGHTS

Upgrade your Red & Green Navigation Lights to LED's. Replaces standard lamps in Whelen, Grimes, and Hoskins Navigation lights. It's simple! Just replace your old incandescent bulbs with our new LED lamps and you are ready to go. Longer life, runs cooler, draws less than .2 amps, 43 candle power, meets FAR 23-1391, and is Mil Spec.

ULTRALIGHT POSITION LIGHTS & STROBES

The new LED technology allows excellent navigation lights with only approximately 10% of the input power, compared with conventional navigation lights. The casting in a high-optical plastic makes the EPL (Electronic Position Light) absolutely insensitive against water, vibrations and other environmental influence. The efficiency of the output is much higher than with conventional electric light bulbs. The self-warming of the EPL is low and can be determined as safe. To avoid overheating, the heat balance is controlled electronically. As a precaution you must pay attention to ventilation with a cover installed, so that no heat accumulation within the casing can appear. This may be assumed by suitable constructive measures. These lights are manufactured in Germany.

AVEOFLASH - E-SERIES™ AIRCRAFT LED LIGHTS

E-Series AveoFlashLP™ Aircraft lights meet both TSO C30c and C96a design specifications, and EXCEED the requirements of TSO C30c, C96a, SAE AS 8037 and AS8017a, and DO-160B. E-Series AveoFlashLP™ are unbreakable lights with a lifetime warranty at an affordable price for your kit, sport, ultralight or experimental aircraft. No more broken expensive lens to replace, no more bulbs to replace! With the

Exclusive free-replacement lifetime warranty they are the last lights you will ever need to purchase.

Integrating the most technologically-advanced and brightest LEDs available in the world to the amazing and all-new exclusive AveoOptimizer™ circuitry, the futuristic E-Series are marked as "LP", for "low profile". At a fully 25 mm (1 inch) lower overall height than the 2008 AveoFlash™ lights, the E-Series lights feature:

- A 9-32 volt input range, no more separate lights by voltage
 - Light synchronization feature as standard
 - Combined 3-in-1 Nav/Position/Strobe
 - An even lighter overall weight
 - Minimum drag profile
 - And of course the industry-exclusive Lifetime Warranty
- Combined with the unbreakable AveoDiamidium™ encasing, and a blinding output of strobe, position and nav lights, AveoFlashLP™ is sure to make you BE SEEN, NOT SORRY™.

KUNTZLEMAN STROBE SYSTEMS

KUNTZLEMAN MAGNUM STROBES

The **SINGLE MAGNUM SMART STROBE** Driver is a state of the art single strobe light system. There is not another system on the market like this one. It will operate on 10 to 80 volts of AC or DC input power. It can be powered directly from the engine lighting coil (AC) or from a battery (DC) without any change in brightness or its double wink flash pattern at a 74 per min. rate. There are NO options to change and NO special equipment needed. This model is a favorite for king post installations and with the PPC flyers. It is also available with either the standard STREAMLINE HEAD or the COMBO STREAMLINE WHITE HEAD. Both are popular for tail mounting. Average current draw is less than 2 Amps. The driver measures 4 1/2" X 3 1/2" X 1 1/2" and weighs 10 ounces.

Smart Strobe Driver Box only - Single Magnum Smart Strobe driver only, without a strobe head. SS-DO

ROUND TAILLIGHT COMBO Head - White Led & Strobe Combination Includes 25' of wire and mounting hardware. SS-TL-L/S..... P/N 11-07346.....

The **DOUBLE DUAL MAGNUM STROBE** Driver is available in two models, the DDM 12 volt DC model and the SDDM smart model. The SMART Model simply means it can be powered by 10 to 80 volts of AC or DC. The 12 volt model is powered by the 12 volt electrical system of your aircraft. The strobe bulb fires a rapid double flash on one head and then the other in an alternating pattern. The first flash catches the eye and the second identifies your position. Total flash rate is 74 per min. Average current draw is less than 2 Amps. The driver measures 4 1/2" X 3 1/2" X 1 1/2" and weighs 10 ounces.

KIT #1 IS A SET OF SPECIAL HEADS - For builders of RV 7, 9, & 10

aircraft or any other kit that has like mounted wing lights. Due to the wing light configuration on these aircraft, the

white rear facing LED on the regular Combo head is of no use, because it can't be seen from the rear. A white position or tail light is then needed. These are strobe and red / green position light equipped heads No white LEDs, a 2 strobe driver box, that fires both wing strobes in an alternating double wink pattern, a white round LED equipped tail light to be mounted at the rear of the aircraft. 50 feet of 5 conductor shielded wire for the wings, plugs, pins and mounting hardware. Total power draw for this system is about 2 1/2 Amps at 14 volts. P/N 11-05833.....

The **TRIPLE MAGNUM 3 LIGHT STROBE** Driver is a 12 volt DC operated system. It fires 3 strobe heads in a double wink pattern. The two wing tip lights alternate between left and right while the tail, or third light is synchronized to flash every time one of the wing tips are flashing. Resulting in about 140 flashes per minute. The driver box measures 4 1/2" X 7" X 1 1/2" and weighs 17.2 ounces. The current draw with 3 standard heads is about 3 amps. If using two COMBO heads and one standard head it is about 3 3/4 Amps. This makes it the most power conservative triple strobe system on the market.

Triple Magnum 3 Light DRIVER BOX ONLY - 12 volt Model TRI3-DO..... P/N 11-01355.....

TRI 3 DRIVER with 3 STANDARD HEADS, Streamline or Round. - with 3 standard SL or ROUND FRESNEL heads, please specify. Complete with 75' of wire, plugs, pins, adaptor plates (for flat or curved surface mounting) and all the installation hardware. TRI3-SLP/N 11-01829.....

TRI 3 DRIVER with 2 COMBO HEADS & 1 STREAMLINE, ROUND FRESNEL or TAIL-LIGHT HEAD - The TRIPLE MAGNUM 3 light system with 2 COMBO & a choice of either 1 Standard Streamline Head, 1 Round Fresnel

head or 1 Round Tail Light without LEDs (Additional cost for the Round Tail Light) for the third head, please specify. Complete with 75' of shielded wire, plugs, pins, adaptor plates (for flat or curved surface mounting) and all the installation hardware. (Please specify choice at time of order) TRI3-SLC..... P/N 11-05125.....

TRI 3 DRIVER with 3 COMBO HEADS - The TRIPLE MAGNUM 3 light system with 3 COMBO heads, please specify Streamline Combo or Round Tail light Combo for third head. Complete with 75' of shielded

wire, plugs, pins, adaptor plates (for flat or curved surface mounting) and all the installation hardware. The tail COMBO heads both have a strobe and white LEDs to be used as a STROBE and WHITE tail light. TRI3-SLCW P/N 11-05119.....

KIT #2 IS A SET OF SPECIAL HEADS - For builders of RV 7, 9, & 10

aircraft or any other kit that has like mounted wing lights. Due to the wing light configuration on these aircraft,

the white rear facing LED on the regular Combo head is of no use, because it can't be seen from the rear. A white position or tail light is then needed. A set of special heads. They are STROBE and RED / GREEN Position light equipped heads WITHOUT the white LEDs, a 3 strobe driver box, that fires both wing strobes in an alternating double wink pattern and a third STROBE and LED equipped round tail light for mounting at the rear of the aircraft. The tail strobe fires in sync with each wing. Also, included is 75 feet of 5 conductor shielded wire, plugs, pins and mounting hardware. Total power draw for this system is about 4 Amps at 14 volts. TRI3-RV..... P/N 11-05834.....

ULTRALIGHT STROBES - AEROSUN LIGHTING

KUNTZLEMAN SELF CONTAINED 12 VDC STROBE

The SC103 STROBE is a self contained 12 volt DC operated light designed specifically for Ultralight use where an external 12 vdc power source (battery) is available. Its physical size is the smallest of any self contained strobe light in its class. Measuring 2 1/2" dia. At the base and 4" tall. Using the same xenon flash tube and Fresnel lens that is currently being used on its big brother the Single Magnum Smart Strobe. The brightness has been actual flight tested before sunset and is visible at 3 statute miles (FAR 103 requirement). The flash is in a single wink pattern at about 42 per minute, power consumption is 500 ma (1/2 Amp) and it weighs only 7 1/2 ounces. The SC103 is mounted with a 1/4 X 20 stud located in the center on the bottom of the unit. Also, a stainless steel tang is supplied. Its rugged construction makes it a great economical stand alone unit. P/N 11-04098.....

SHOCK MOUNT - Designed to be used when mounting the SC103 strobe in an area of high vibration. P/N 11-06251.....

KUNTZLEMAN LANDING/TAXI/RECOGNITION (LTR) LIGHTS

LSA and EXPERIMENTAL aircraft line of lights. Made in the USA, called the LTR which stands for Landing-Taxi-Recognition. The LTR consists of 9 extremely bright LEDs, focused through special lenses. This results in a white beam of light that has been measured with a light meter to be 2 1/2 times the brightness of a 55 watt halogen lamp while drawing 1/3 the current and 1 1/2 that of an HID lamp at about the same current. Powered by 12 to 14 volts DC it uses only 1.35 Amps of power. The LTR dimensions are 3" Dia. X 1" deep and weighs less than 6 ounces. Flashing it on & off can be accomplished with an led flasher from your local auto parts store. You must see the LTR in operation to believe the light output. Sold with a money back satisfaction guarantee. P/N 11-06854.....

KUNTZLEMAN HOT BOX

The HOT BOX is a complete electrical system intended for use with an electric starter equipped engine. The box contains a heavy duty regulator, starter solenoid, custom length cables, labeled terminal strips, a fuse panel and many more features. P/N 11-05144.....

Hot Box with Regulator HB..... P/N 11-05144.....

Hot Box no Regulator HB..... P/N 11-05145.....

RED LED AIRCRAFT BEACON

This self contained 14 Volt beacon uses surface mounted LED (Light Emitting Diode) technology and meets FAA requirements for anti-collision light systems in both airplane and rotorcraft categories. This rugged little unit measures 1.7 inches in diameter, 3.5 inches tall and weighs 8.4 ounces. The average current draw at 14 volts is 0.6 Amps with a peak input current of 1.2 Amps. It has a flash rate of 60 per minute and will not produce EMI or RFI interference. The color is Aviation Red LEDs through a clear Polycarbonate Fresnel lens. The manufacturers projected life for their LEDs is up to 100K hours. Mounting is accomplished by a #10-32 stainless steel stud that is in the bottom center of the base. NOT TSO'D P/N 11-05111.....

LED TASK LIGHTS

BEZEL MOUNT - 12V - Wires exit out the side, white dimmer light .16 amp P/N 11-05682.....

SURFACE MOUNT - 12V - Wires exit out the back, brighter light .60 amp P/N 11-05683.....

SUN SPOT

SUNSpot is designed as a certified, drop-in replacement for your existing GE4509, PAR36 aircraft lights. It is mounted in place of the conventional clamp mount with a single bolt attach point, or can be ring-clamped to the existing mount. SUNSpot delivers 2800 lumens at 36W compared to a 100W halogen at 2000 lumens; 30% the power and greater light output. AeroSUNSpot has the same great design features as other aircraft light designs: * Wide Input Voltage Range (9VDC-36VDS) * Built in Wig/Wag (stand-alone or synchronous with any of our other products) * Over-temp Sense Protection; ensures our 50,000 hour lifetime guarantee * Low-voltage Sense (shuts down half the LED's in emergency, low voltage conditions) sold each P/N 11-06578.....

SUNTAIL

SunTail is designed to perform the tail position/strobe functionality on the rudder of the aircraft. The design addresses all the shortcomings of the existing line of competitive products and can synchronize its strobe with any of the AeroLEDs' wingtip family of nav/strobe and nav/position/strobe products. As with the ExP, SunTail™ was intended to meet or exceed all of the FAA requirements for certification. The product is expected to receive certified approval by the third quarter of 2009. P/N 11-07781.....

COURTESY LIGHTS FOR CESSNA AIRCRAFT

This unique LED lighting system operates from a standard 9 volt battery. The system is designed to replace one or more inspection panels on the bottom of each wing with a new inspection panel and a battery operated LED light. This LED will provide lighting around the aircraft for loading passengers or assisting in pre-flight inspections during night time operations.

The LED has been designed and tested specifically for aircraft applications where altitude and temperature fluctuations can destroy certain components of a standard LED. The unit is also equipped with an indicator to assist the pilot in finding the switch in the dark. A timing feature allows the operator to run the light for either 3 or 15 minutes after which time the unit will shut itself off. Available with your choice of 5 different sized inspection panels. STC'd for many models of Cessna Aircraft. **Visit or website for aircraft eligibility list.**

SUNLITE LANDING LIGHTS

The SUNLite is protected against overheating with a built in protection circuit, is protected from lightning transients and ESD, voltage spikes, reverse voltage, and undervoltage conditions. Polycarbonate leading edge windows are commonly used with wing-mounted landing lights, and are typically available for most airplane types from a number of third-party suppliers. The AeroSUNLite dimensions are shown below in units of inches. This light is small enough to fit in the wingtip cutout found in Van's RV kits. AeroSun Lite 800 2 Lumen Lights (Single) P/N 11-06280.....

1600 LED LANDING LIGHT

The 1600 is a wing-mounted LED (Light Emitting Diode) landing light with a built-in wig wag mode in addition to its standard operation as a landing/taxi light. The 1600, made from extruded aluminum, is a very intense light source that uses 8 high power LEDs to produce up to 1600 lumens of light using just 24 Watts of power. The product is ideal of open airflow environments. Each uses one fourth the power of an equivalent 100 Watt halogen light while producing as much usable light. The LED light sources last up to 50,000 hours of constant operation. The unit is completely sealed and is very rugged. Completed and passed formal DO-160E testing for chapter 21 RFI and conducted emissions to category H, which is the most stringent level required. For installation on experimental category airplanes. Sold each P/N 11-05797.....

X-TREME

The X-treme is a wing-mounted LED (Light Emitting Diode) landing light with a built-in wig wag mode in addition to its standard operation as a landing/taxi light. The X-treme, made from a heavy T6-6061 aluminum, is a very intense light source that uses 8 high power LEDs to produce up to 1600 lumens of light using just 24 Watts of power. Ideal for non-airflow closed environments. Meets our internal Safety of Flight Designs (SoFD) criterion that surpasses all other manufacturers. Sold each P/N 11-06465.....

AERO-LEDS AERO PULSAR

The world's first LED-based Nav/Strobe lighting product that meets TSOs C30C and C96C. Will exceed the requirements which have traditionally been relegated to legacy technologies such as Xenon strobes and incandescent lighting. The design addresses all the shortcomings of the existing line of competitive products and was intended to meet or exceed all of the FAA requirements for certification. The product is expected to receive certified approval. P/N 11-06577.....

SUNRAY

The SunRay is a wing-mounted LED (Light Emitting Diode) landing light with a built-in wig wag mode in addition to its standard operation as a landing/taxi light. The SunRay is a very intense light source that uses 4 high power LED's to produce up to 500+ lumens of light using 12 Watts of power. The SunRay is equivalent to 1/2 of an AeroSUN 1600. P/N 11-07778.....

MICROSUN

The MicroSun is a wing-mounted LED (Light Emitting Diode) landing light with a built-in wig wag mode in addition to its standard operation as a landing/taxi light. The MicroSun is a very intense light source that uses 12 high power LED's to produce up to 1500+ lumens of light using 20 Watts of power. The MicroSun is equivalent to an AeroSUN 1600. P/N 11-07779.....

EL

LED LIGHTS - BEACONS - DIMMERS

AC-POWERED FLASHER

This anti-collision flasher meets Part 103 ultralight dawn to dusk flying requirements. The units draw 2.7 amps at 14V (nominal). It has a clear Lexan Polycarbonate lens and a 35W halogen lamp. Mounting bracket shown is also included..... P/N 10-01490

ULTRALIGHT BEACONS

These miniature self-contained units use solid state circuitry for reliability and a lexan lens that is UV protected and shatter resistant for durability. The beacon uses a commonly available 35W halogen DC lamp. 12V DC power source required for both units Wt: less than 7oz. Size: 3" h x 2-5/8" h. For Experimental Aircraft Only

Beacon, clear lens..... P/N 11-03007.....
Beacon, red lens P/N 11-03008

LIGHTMAN HIGH INTENSITY STROBE

Lightman is a high quality portable battery operated strobe which is an ideal addition to a pilot survival kit. Its brilliant flash can be seen up to 3 miles and operates for 3-7 hours on AA batteries. It is impact & weather resistant; size: 3.5" on each triangular side; wt: 3.5oz. w/batteries.

Includes storage pouch, belt/visor clip, magnet, & other attachment accessories. Furnished with clear dome. P/N 11-08200

ULTRALIGHT RED/GREEN POSITION LIGHTS

Made for easy installation to fit the tube that makes up the wing tip of most Ultralights. Powered by 12VDC and drawing only 1/3 amp each, these lights are just the thing for the Ultralight flyer that wants to add that special touch of position lights to his bird for those twilight flights. These

easy to mount lights measure 1-3/8" x 4-3/8". Please note that these lights are NOT TSO'd for VFR night flight...P/N 11-01356

NFLITE'S LOW VOLTAGE ANNUNCIATOR

The EA-1050 is designed for experimental aircraft. The microcontroller-based design is reliable, light-weight, consumes minimal current, and uses very little panel real estate. The industrial grade surface mount components used are shock/vibration resistant and

provide a wide operating temperature range.

The large red LED flashes for 60 seconds when alternator output voltage drops to 13V (normal output is ~14V). It then goes to continuous illumination until the condition is rectified. The flashing draws immediate attention to the condition -- continuous illumination is not a pilot distraction thereafter.

The voltage drop could be the result of an alternator malfunction or an overloaded system. Check by switching off a high load device, like landing light or strobes. If the ALT light goes off, the alternator is not malfunctioning but you are sourcing more voltage from your battery than the alternator is replacing. If the ALT light remains on, the alternator is malfunctioning and all non-essential electrical systems should be shut down immediately to conserve remaining battery voltage.

The LED activates when the master switch is turned on and goes out after engine start, assuming the alternator side of the master is on and alternator output is normal. Observing this should be a checklist item, as it indicates that conditions are normal and the annunciator unit is functioning prior to flight.

The flashing LED serves as a reminder to turn off the master switch after engine shutdown. It's also a helpful reminder to turn on the alternator switch after engine start (recommended starting procedure).

The entire unit is less than 1 sq. in. x 0.5" deep. A drill template is provided for attaching the LED bezel unit to the panel.

Complete installation and electrical connection instructions are also provided. P/N 11-02451.....

BLACK FLUTED CONTROL KNOB

Black Bakelite knob. Fluted grip. 1/4" brass bushing with set screw. 3/4" in diameter x 7/16" high. Fits potentiometers for Superior Panel Technology dimmers.

P/N 11-07344.....

SINGLE / 2 CHANNEL PWM DIMMERS

The two dimmers include a single channel model. Both use pulse wave modulation, or PWM electronic design for precise control of LED lighting such as LED instrument panel lighting, baggage, utility, map or post lights. The self-contained products are designed for easy installation and feature integrated on/off switches on each rheostat.

Rated at 18 Watts per dimmer channel, the dimmers are capable of operating a large number of interior lighting products and are engineered to provide additional over-current, over-voltage and reverse polarity protection.

Single Channel Pilot's Light Dimmer

Single Channel Dimmer is ideal for LED Light Strips, General Panel Lighting or Series of Lights (such as map or baggage lights). The rotating control has its own on/off switch.

- * 1.5A (18W) 12V dimmer using PWM (pulse wave modulation) for precise control
- * Integrated on/off switch and smooth action rotating control
- * Just 1.75" x 1.75" inches square. 1/4" shaft with high quality knob
- * Screw down terminals for input and output wiring. Very easy to install.
- * Powerful enough to operate numerous panel lights and convenience lights
- * To install, drill 1/4" hole, wire input and output to screw terminals and install.

2-Channel Pilot's Light Dimmer

Dual Channel (2 channel) Dimmers can be used with any combination of lighting - Dual Color LED Light Strips or for controlling 2 different sets of lights. Each channel has its own ON/OFF switch and dimmer control.

- * Each channel controls 1.5A (18W) using pulse-wave modulation for precise control
- * Controls LED or incandescent lighting, up to 18W each channel
- * Dual integrated on/off switches and smooth action rotating control
- * Permits complete independent operation of each channel (on/off & dimming)
- * Just 2.5" x 1.75" inches square. Dual 1/4" shafts with push-on knobs
- * Screw down terminals for input and output wiring. Very easy to install.
- * Powerful enough to operate numerous panel lights and convenience lights

Specifications:

- * Mode of Operation: Continuously variable, pulse width modulation (PWM)
- * Supply Voltage: 8 to 20 VDC working voltage, up to 30VDC momentary. Dimmer must be fused at power source
- * Output Voltage Range: From zero VDC to supply voltage
- * Output Current Range: Up 1.5A
- * Max Continuous Output Current: Full rated current up to 105F (40C), 75% of rated current up to 115F (46C)
- * Ambient Temp Range: Minus 40F (-40C) to 115F (46C), with restriction as noted
- * Size: About 1-3/4" inch square
- * Weight: 30 to 40 gm, depending on wired connection type
- * Heat Sink: Electrically isolated from voltage and acts as a circuit enclosure. Max. temperature rise under load is about 40 F (22C) above ambient.

COCKPIT LIGHTS — STROBE POWER SUPPLIES

754 SERIES LED COCKPIT LIGHTS

These versatile cockpit lights can be used to illuminate the instrument panel. They can be repositioned to illuminate your charts with their 110 degrees of angle adjustment while being able to rotate a full 360 degrees. Dimensions: 3/4" diameter, 1-5/8" tall fully-extended, 7/8" tall at 90 degrees.

The mounting stud is 1/4" in diameter and can be mounted onto a surface up to .200" thick. Switchable models facilitate wiring an SPDT switch (not included) to the light, allowing either red or white operation. We also offer a flush-mount flange to mount the light if the back side of the light is unreachable.

Flush Mount - (Pictured above) This part is for mounting and LED light Model 754 from the front side. The adapter base is 1-1/2" in diameter, stands 1-2" tall, and has a 1" bolt hole circle.

LED MAPLIGHTS

The body of the maplight is constructed of aircraft grade 6061 T6 aluminum and black anodize treated for protection from corrosion. The LED bulbs and internal components are high quality components, and are engineered to withstand 150% of their rated voltage without damage. The wire is

tefzel coated mil-spec wire used in certified aircraft and the component potting material is a two part epoxy making this maplight highly vibration and shock resistant. The average bulb life of the LED used in this product in excess of 20,000 hours of use and the maplight draws only 20 milliamps of power with virtually no heat produced.

The red LED used in this maplight gives the most light available in environments where night vision must be retained. This "LED Maplight" is built to be durable, simple to operate, lightweight and compatible with dimming systems. Each "LED maplight" is tested twice during production for maximum quality and customer satisfaction. The "LED maplight" is intended for use in Experimental, Amateur-Built aircraft only.

1512 SERIES LED EYE-BALL COCKPIT LIGHTS

These lights work great in overhead consoles and tight spaces. 30 degree adjustable angle, 360 degree adjustable rotation. LED technology draws less current (40 mA max.) and last much longer, (20,000+ hours.) and are fully dimmable.

The light is available in three light color version, two housing colors, and two voltages. The light colors are four red LED's, four white LED's, and two red/two white LEDs that can be lit separately with a SPDT switch (not included.) The housing colors are black or clear anodize. There are two voltages: 14 and 28. The light has a 1.45" flange and mounts in a 1.25" hole. The light requires 1" behind the mounting surface and is only 5/8" in front. It will accept up to 0.2" thick mounting surface.

| Pilot LED Cabin W003-12 LED Blue | 11-05524 | . |

CABIN LIGHTS

Designed for use in experimental aircraft, these LED lights are excellent for cabin lighting, work station lighting, interior lighting, or cargo space illumination. They feature small size (2" x 3"), low power draw (less than 95ma, and weigh less than 3 ounces. The basic module consists of 3 rows of LED's potted with epoxy in a strong plastic housing. This makes it extremely resistant to vibration and moisture. The modules are very efficient, and are available in 12 or 24V and in super bright white or red colors. Furnished with a diffused light pattern and a 3 ft. cable length. No on-off switch.

Example Uses for These Convenient Lights Include:

- Cabin Lighting
- Work Station Lighting
- Interior Illumination of Work Area (Without Loss of Night Vision)
- Illumination of Operator Controls
- Cargo Space Illumination

Benefits:

- Small Size - Only 2" x 3"
- Low Power Draw - Typically Less Than 95mA
- Customizable to Meet your Unique Needs
- Low Cost
- Weight is Less Than 3 Ounces

INSTRUMENT PANEL LIGHT STRIP

Flexible LED Instrument Lights

Flexible LED Instrument Lights

- Dimmable LEDs encased in a flexible resin strip
- Ideal for mounting under glare shields for instrument panel lighting
- Available in White, Red and Blue LEDs
- Can be trimmed every 2-1/2 inches (every 3 LEDs)

for Experimental Aircraft

- Easy-to-install, waterproof, shockproof and requires no inverter to operate.
- Draws only 83 mA, 12 volts DC, and has a service life of over 10,000 hours
- 35" length, 3/8" width and 1mm high. Installs in minutes with double-sided tape

| Description | P/N | Price |

FLEXIBLE LED INSTRUMENT LIGHTS - WITH CIGARETTE LIGHTER AND DIMMER

For production aircraft OR experimental aircraft

- The same quality Dimmable LEDs as our standard Flexible LED instrument Lights but with a Cigarette Lighter plug and in-line dimmer control
- Ideal for non-permanent installation in aircraft and other vehicles
- Power is supplied by the Cigarette Lighter plug (12 Volt systems only)

- In-line dimmer controls lighting level
- Available in Red, White or Blue LEDs.
- Ideal for mounting under glare shields for instrument panel lighting
- Can be trimmed every 2-1/2 inches (every 3 LEDs)
- Easy-to-install, waterproof, shockproof and require no inverter to operate.
- Draws only 83 mA, 12 volts DC, and has a service life of over 10,000 hours
- LED is 35" length, 3/8" width and 1mm high.

BATTPACK BATTERY BACKUP

The BattPack Battery Backup System can be used as an emergency/secondary power source for aircraft lighting. The 14V or 28V system will provide up to one hour or more of lighting for the FiberLite instrument lighting system (that uses LED light sources) or the Glow Strip (electroluminescent lamp) glare shield lighting system or for other low current draw lighting such as internally lighted instruments. The system includes the battery holders, a three position switch (normal, off, emergency), engraved placard and tefzel hook-up wire.

DIMMING SYSTEMS - COCKPIT LIGHTS

AMERI-KING LIGHT DIMMERS

Linear Designed, Single, Triple, Quad outputs. FAA TSO-C71 approved. Input: +14 Vdc or + 28 Vdc. One year warranty. Optional extension of three years.

Features: • Short Circuit Protection. Solid State Linear Design. D-Sub/Miniature AMP connector included

SOLID STATE LIGHT DIMMING KIT

Economical solution for the dimming of aircraft interior lighting. This heavy-duty solid state dimming kit by Superior Panel Technology includes a potentiometer with built-in off switch and 115W power transistor mounted to a heat sink. The supplied colored Mil Spec wire and very easy to follow wiring diagram allows the aircraft builder to customize the wiring harness to fit individual needs. When compared to rheostats, this unit provides more even dimming when a combination of LEDs, incandescent bulbs and electroluminescent lamps (such as SPT's Glow Strips) are used. Appropriate for both 14V and 28V systems. P/N 11-00846.....

LIGHT DIMMING KIT

Kit includes a Mil.Spec Potentiometer, Mil. Spec Power transistor mounted to a heatsink and a wiring harness. Breaker Size: 2A @ 14V, 1.5A @ 28V, Operating Range: 0-32 VDC, Current: 1.4A @ 14V, 0.7A @ 28V, Power: 20W P/N 11-02082.....

PANEL LIGHT DIMMING RHEOSTATS

These high-quality rheostats are used in production aircraft to dim instrument panel lights. Size: 1-9/16" dia. x 2-1/4" long. Mounts in 3/8" dia. panel hole. Shaft is 1/4" dia. w/ flat for knob set screw. New manufacture. Power Rating: 25 Watts. 0-8 OHM Panel light dimming retrostat..... P/N 0144 0-15 OHM Panel light dimming retrostat... P/N 5150

FINGER GRIP KNOB

Finger grip knob or rheostats. 1-1/2" Diameter, 1/4" Hole. P/N 5150

LC-40E/LC-40 LIGHTING CONTROLLERS

The LC-40e comes in an anodized brushed aluminum chassis. Features extra control knob sensitivity at dim end of the lighting range where it is needed most. It is microcontroller controlled and has continuous over voltage, current limit & fault protection. Each channel can handle 1.5 amps. LC-40E P/N 11-03366.....

MULTIPLE CIRCUIT SOLID STATE LIGHT DIMMERS

Choose from 2, 3, or 4-circuit heavy-duty 115W light dimming systems by Superior Panel Technology. Circuit board design with pin connector allows for easy and neat wiring. Mil Spec Tefzel color-coded wire is included. Unlike rheostats, this system will provide even dimming of incandescent lights, electroluminescent lamps (such as the SPT Glow Strips) and LEDs when used in combination on the same circuit. A separate control switch (with circuit breaking off position) is included for each circuit.

- 2 Circuit.....P/N 11-02046
- 3 Circuit.....P/N 11-02047
- 4 Circuit.....P/N 11-02049

VAL CLA 500 COCKPIT LIGHTING ASSEMBLY

The CLA 500 is a Multiple Circuit, Solid State Cockpit Lighting Assembly that will accommodate (4) independent dimmer lighting circuits such as instruments, sub panels, avionics, eyebrow, overhead, flood, and post lamps etc. The CLA 500 unit itself measures 5"l x 4.7" w x 1.5" h; wt: 0.8 lbs. The unit is rated at 14/28VDC input at 2.5 amps max per circuit. The CLA 500 comes complete with 4 on/off dimmer control switches and connector assembly. The CLA 500 carries a full 1-yr. factory warranty. P/N 11-05700(14v) P/N 11-04592(28v)

COCKPIT LIGHTS

TYPE C4A - A multi-purpose light providing narrow spotlight or floodlight beam. Rotate dial for red or white lens. Push-button for instant full light. Adjustable rheostat. Coiled cord & snap-in mounting base makes light portable in cockpit area. New mfg. Most suitable for larger aircraft. 12V P/N 11-03921 24V P/N 11-03922

MINIATURE EYEBALL COCKPIT LIGHTS

A low power, low intensity light for continuous use as chart or instrument light, allowing easy viewing of magenta lines and figures on sectional charts as well as red lines on instruments without wiping out night vision. Black acrylic ball with 1/4" aperture rotates in ABS housing for full swivel adjustment. 1.5" dia. overall. Mounts with 3 screws. Wt: .5 oz. Power consumption 1.12W @ 14V. Bulb life approx. 3500 hrs. Ideal for small homebuilts. Used on Voyager's world flight. P/N 11-07800

MOD1 OVERHEAD CONSOLE

The Mod1 Overhead Console is mounted to top of cabin or top wing skin with four stainless steel screws into the four standoffs or posts on Console. All lights are ordered separately. Weight: 3.8 oz. P/N 11-06003.....

EYEBALL COCKPIT LIGHTS

These high quality cockpit lights are engineered to match the eyeball swivel vents on the page on Air Vents in this catalog. Simple twist on/off operation provides white beam for cockpit lighting. Made from 2024T351 aluminum. Diameter: 2.75". Has 4 mounting holes (1/8" dia.) which are spaced 2-3/8" apart on a mounting plate with a thickness of .71". Made in USA.

- Black (no bulb)..... P/N 05-01401.....
- Gray (no bulb)..... P/N 05-01402.....

Order 14V or 28V bulb separately 14V..... P/N 11-04197..... 28V..... P/N 11-04172.....

NIGHT FLIGHT LIGHT

Red, Blue and Green lights independently dimmable with emergency battery that automatically operates in case of total power failure at the same adjustment. The unit is attached with Velcro in any position and connected to the power with cigarette lighter cord (provided), or directly connected to the harness in the vehicle with a fuse of 2 Amp in line. The combination of the 3 colors creates the perception of white light. Measurements: 2.36"x1.58"x1.22". Input Power: 12 volts to 28 volts. Warranty: One year warranty parts and labor in the factory (the lifetime of the components of this unit is approximately 50,000 hours.) P/N 11-06482

K11 AIRCRAFT PANEL DIMMER

The A & T Labs panel light dimmer provides features and functionality not available in other commercial dimmer products. Features: • 3 outputs with a tracking capability - One output is the "Master", and the other two can be set to track the master from 0 to any set voltage behind the master. This allows items on the dimmer bus to be grouped according to their relative brightness for better overall tracking. For example, the Vision Micro- systems products are typically way out of line in brightness compared to others at the same voltage • Quiet analog design • Multi-channel tracking capability • Daylight full-on over-ride capability for GPS annunciators, etc. • Current limiting/short circuit protection • Thermal protection • Low drop-out voltage (ability to adjust the dimmer bus up as close to the battery voltage as possible) • Photocell light sensor automatic control capability • Low cost • Performance: • Voltage range: 0 to Input supply - .6V • Output current - Depends on ventilation - Each channel is capable of 5 amps, practical dissipation limitation is ~ 5 amps total for all channels. (For 28 volt systems, current limit is 1 A per channel) Unit connections are made through a DB15 connector, and are easy to integrate into the rest of the aircraft wiring. P/N 11-02244

INSTRUMENT LIGHTING

MAX DIM DIMMER CONTROL UNIT

5-35 VDC 0-12.5A Control 350 Watts in a 1-1/4" Diameter package. Complete compact, light weight, powerful, solid state dimmer. Great for light wedges. FAA STC Approved. PMA'd. Features: • Aircraft Lighting Boat Cruiser Cabins. • Instrument Panels. • Hundreds of DC Lighting Control applications P/N 11-05738.....

MAXPULSE LANDING LIGHT CONTROL/PULSER - (STC'D)

The MaxPulse is a solid state landing light controller. The small size and one ounce weight places this controller in a class of its own. Extreme long life, low temperature operation, high current capability, noise free operation and small size makes it a ideal landing light controller for all aircraft. This new STC version sports eight functional pulse, flash and steady state modes of operation. It is also an ideal replacement for old technology controllers requiring large heavy heat sinks and or noisy relays as part of the installation. STC'd P/N 11-06998..... NON-STC'd P/N 11-05737.....

For Complete info on the Non-STC'D version please visit our website at www.aircraftspruce.com

UMA INSTRUMENT LIGHTING - PMA'D

Advanced lighting system to replace your existing post or indirect lighting system with a electroluminescence

light strip contained in a bezel allowing a bright 360° uniform light. EL lighting does not use bulbs which create heat and require replacements. The specially designed EL light is placed in a bezel and is simply mounted between the instrument and the panel in just minutes without modification to the panel or instrument. Only the white lighting color is PMA'd. Copies of approved 337 installations are available upon request.

EL

UMA ELECTRO-LUMINESCENT LIGHT STRIPS

UMA, Inc. now offers an ultra-thin (0.006") flexible self-adhesive long-life light strip based on the same technology that is used in our EL Light Bezel. Since there is no filament, these light strips are not bothered by vibration or rapid changes in temperature. Perfect for use under a glare shield, or for any other interior lighting need (both aircraft and automotive). Length may be cut as needed. Available colors are Aviation Green & White/Blue. Power Inverter required.

LEADING EDGE LANDING LIGHT KIT

Kit consists of (2) GE #4509 12V, 100W sealed beam lamps, brackets for installation, switch, switch plate, 60 ft. of 2-conductor hookup wire & instructions. Size: 4.5"hx5.25"w x2.25"d w/ bulbs installed.

Complete Kit P/N 11-08000.....

Replacement #4509 Bulbs P/N 11-03796.....

NULITE INSTRUMENT LIGHTING SYSTEM

Replace your existing lighting system of post lights or indirect lighting using the latest technological developed in optical enhancements. The NULITE uses dual incandescent bulbs with a rated life of 10,000 hours in a translucent material designed to look like an internally lighted unit. Nulites are easily installed by anyone in just minutes and are pre-cut to fit all standard instruments operating on 14, or 28 Volts. NULITE light wedges can be installed over the instrument or between the panel and the instrument. One wire is connected to ground and the other to a dimmable buss. Installation takes about 30 minutes for each unit and does not require any special tooling. The instrument is not altered in any way therefore only a log book entry is required. FAA/PMA approved.

FIBERLITE INSTRUMENT LIGHTING SYSTEM

FiberLites, by Superior Panel Technology, offers an innovative FAA approved instrument and label lighting system that uses fiber optics to evenly illuminate aircraft instruments with easily accessible, long lasting, LED light sources. Fiber-optics are affixed to specially designed bezels that are sandwiched between the instrument and the panel for appearance of an internally lighted instrument. The advantages of using FiberLites over other lighting devices are a) easier wiring, three LED light sources will light up all the instruments on most panels b) the LEDs are very long lasting, however, if they ever do need to be replaced, they are easily replaced without having to remove any instruments c) FiberLites provide even 360 degree lighting around the instrument, d) the instrument is not altered in any way e) FiberLites can be used to backlight printed labels. The following items are included in the FiberLite package. a) Three LED light sources with appropriate resistor (must specify 14 or 28V system). b) Eight 3/8" instrument bezels c) You can substitute TWO 2 1/4" inch bezels for each 3 1/8" inch instrument light. For example a package could consist of SIX 3 1/8" and FOUR 2 1/4" instrument lights. Bezels come in 3 sizes (3 1/8" standard with four screw holes (FL318), 3 1/8" with cut-out in corner that can be rotated either for a right or left hand cut-out (FL318CO) and the 2 1/4" bezel with four screw holes (FL214). Please specify the bezel sizes, and quantity and the voltage of the aircraft. A solid state dimmer is needed to dim LEDs. Order Superior Panel Technology's single circuit dimmer (part number 11-00846). A great compliment to this product is the BattPack battery backup system.

FIBERLITE ILLUMINATED LABELING

BATT INST RADIO TRIM PROP GEAR LIGHT

Backlite the wording on your panel with FiberLite fiber optics and custom printed labels. A single fiber optic ribbon can illuminate a label strip up to 8.2" in length. You can use two fiber optic ribbons for labels up to 14" in length. Fiber optic tails are 30" in length to allow for remote light source placement. Use either the FiberLite 8-port light source (see above) or an ultra-bright small LED light source. One port on the 8-port light source will illuminate two 8" labels (or one longer label that utilizes two fiber optic ribbons). The LED light source can illuminate up to seven fiber optic ribbons. Mounting channel is 5/16" in height and the label has a black background with white lettering. The FiberLite fiber optic ribbons can also be used to backlite reverse engraved panels.

| Labels | Part No. | Price |

PULSE LIGHT SYSTEMS - LANDING/TAXI LIGHTS

PULSAR LANDING LIGHT PULSE LIGHT SYSTEM

Pulses your landing or taxi light with a steady solid state electronic controller I/C. Filtered for quiet operation. Bulb life is not shortened, in fact bulb life is extended 10Xs longer; because the filaments never completely go out so there is no thermal shock turn-on. Pulsar's controlled pulse rate keeps the filament running much cooler than if the bulb was on continuously. Even longer life w/ GE Halogen lights. Your panel landing or taxi light switch is turned OFF, Pulsar's separate On/Off switch turned ON, your light will begin to pulse. If you are landing at night, and want your lights on steady, you simply reach to that landing light switch (which has been off during the pulse mode) and turn it ON. Your landing light or taxi light will come on steady because Pulsar has not changed or altered your aircraft wiring. Owner installed in 30 minutes. Pulsar is approved for all 100 Watt GE lights. Weight: 3.5 oz.; Size: 3.25" length x 2" width x 1" height. The Standard Pulsar system uses a relay switch. The MOSFET Pulsar system (Metal oxide semi-field effect transistors) uses advanced P-channel technology which does not fail (no transistors or relays) and each pulse is brighter, than other older Transistorized Pulse-Lights. Wing-Tip Aircraft Owners can easily look out the window to see their landing lights. AvTek's Green-LED allows pilot with a Nose-Landing-Light to know from the cockpit if the light is: Pulsing, on steady or out. Only AvTek's Pulsar has these extra features. MOSFET comes with all features. When ordering Pulsar, please indicate how many landing lights you wish to pulse and where they are in your aircraft, as well as your aircraft make and model. Dual Alternating Pulsing lights should never be side by side. Instead dual lights need to be located one in each wing. Two lights side by side can be pulsed together, or pulse just one light and leave the other light off.

| Description | Bulb | Part No. | Price |
|---|-------------------------------|----------|-------|
| Regular Pulsar with relay, Recommended for occasional flyers. | Standard halogen 50Watt Bulbs | 11-01258 | . |
| Pulsar for planes with one light on each wing, Recommended for frequent flyers, Mosfet Never needs repair, no transistors/relays | Quartz Q-4509 or Q-4591 | 11-04408 | . |
| Pulsar for planes with two lights on each wing, Recommended for frequent flyers, Mosfet Never needs repair, no transistors/relays | Quartz Q-4509 or Q-4591 | 11-04625 | . |

LANDING LIGHT AND FLASHER KIT

This Superior Panel Technology kit includes two bright 14V halogen bulbs, the SPT landing light flasher unit with wiring, toggle switch with attractive reverse engraved cover plate and the needed material to install the two lights in the wings' leading edge outboard bays. These halogen lamps are significantly brighter than both 50 and 100W incandescent bulbs. The solid state flashing system alternately flashes your landing lights and greatly extends the life of the halogen bulbs. The landing lights are easily aimed with the spring-loaded adjusting screws. The flashing unit is easy to install by following the comprehensive installation instructions. One 4PDT switch is added to the panel, giving you the option to switch from the flashing mode to the steady landing light mode. 14V. **FOR EXPERIMENTAL AIRCRAFT ONLY.**

P/N 11-02051

SPT LANDING LIGHT FLASHER

Increase the visibility of your aircraft and give yourself that extra margin of safety. This solid state flashing system alternately flashes your landing lights so pilots in other aircraft and controllers in the tower will be able to see our aircraft much easier. The flasher unit extends the life of your landing lights since they run much cooler and its easy to install by following the comprehensive installation instructions. One toggle switch is added to the panel, giving you the option to switch the lights from the flashing mode to the landing mode. Choose the flashing unit based on the wattage of bulb used in the aircraft. For 14V systems only

FOR EXPERIMENTAL AIRCRAFT ONLY.

50W bulbs..... P/N 11-02070
100W bulbs..... P/N 11-02071

LIGHTSAVER

The Lightsaver prevents this massive inrush allowing the filament to draw the rated current even at turn on with no change in typical light output performance. The filament life increases up to 10 times due to reducing the stress induced by inrush current. This is something the lamp manufacturers don't want you to know. After all they are in the business of manufacturing replacement lamps for your aircraft. Installation is simple.

XEVISION LANDING & TAXI LIGHTS

XeVision™ super bright Xenon metal halide arc discharge landing & taxi lights for experimental aircraft. Light so bright and white you'd swear it's daylight; 500,00 candle power (3200 lumens) for our 35 Watt and more than 750,000 candle power (5400 lumens) for our 50 Watt systems – up to more than 8 times brighter than a standard 100 watt incandescent sealed

beam. High HID efficiency means less than half the amp draw and about 1/2 of the radiated heat of standard or Halogen lamps.

XeVision™ offers reliable HID pulsing capability based on the proprietary XeStrike™ series ballasts and the XePulse™ (patent pending) pulsing module. All XeVision HID lighting systems are tested up to 100,000 feet altitude. XeVision systems are warranted up to 35,000 feet for continuous fail-safe operation.

XeVision offers retrofit kits for direct replacement or complete lighting system kits for new aircraft installation, different lamp shapes/sizes available. Many installation locations are possible now with a variety of lamp shapes and sizes, extremely small form factor, and lower lamp housing temperatures. They are especially suited for tight spaces in composite aircraft. XeVision reflectors are made of metal, not plastic. High Intensity Discharge (HID) lighting is the most significant breakthrough in aviation lighting since the development of modern sealed beam lamps. XeVision offers "Certified" quality at a very competitive price with a 5 year warranty and up to 3,000 hour typical lamp life.

The XeStrike™ proprietary ballasts XV1D or XV4D are an integral part of all XeVision aircraft lighting systems with the following features: * 12 or 24 VDC voltage input. * Designed for pulsing or dimming of HID Xenon bulbs with the XePulse™ HID control module. * Designed for 35 watt or 50 watt output, 75 watt for special applications only. * Extremely low EMI/RFI in combination with third generation D1S bulbs with integrated igniter and double shielded silicone cables. * Digital power control for pre-programmable start-up algorithm.

REPLACEMENT LAMPS – GLARESHIELDS

UNIVERSAL REPLACEMENT LAMPS

All Universal Corporation lamps are appropriately approved by the FAA. Our long life incandescent and halogen lamps offer greater light output with increased life and reduced costs. All lamps feature heavy filament construction. Improved design and manufacturing techniques produce a lamp far superior in service with lower cost to the user and packaging provides maximum protection in shipping, handling and storage.

GLARE SHIELD KIT

This Glare Shield kit provides the materials to produce a professional custom padded glare shield. The composite lay-up of material has passed the FAR 25.853 burn requirements and a burn certificate is provided with each kit. Kit includes 1.5 linear yards x 54" wide black SPT Leather-Like Vinyl, 1.5 linear yards x 48" wide 1/8" SPT open cell foam cushioning, two 1/16" x 8" x 50" ABS base material, aluminum stiffener, bull nose trim, template foam and cardboard template material. Complete easy to follow instruction sheet is provided to help you produce a professional looking padded glare shield that has the look and feel of leather. The electroluminescent Glow Strip Glare Shield Lighting (P/N 11-00848) fits nicely under this Glare Shield.

P/N 11-06324.....

GLOW STRIPS

Superior Panel Technology has developed a brighter, more uniform and longer lasting Glare Shield lighting system. The 18" x 1" Glow Strip electroluminescent lamps provide a beautiful, even (no hotspots) aviation green light output that is very easy on the eyes. The ultra-thin lamps (.065 including the adhesive backing) are very flexible and conform to the curves of the underside of the glare shield. The Glow Strips meet the FAA 23.853 burn test and FAA approval is pending. A solid state dimmer is recommended for dimming the lamps and the part number is listed below. A great compliment to this product is the BattPack battery backup system

GALAXY 4509 LANDING LIGHT BULBS

The 4509Q lamp is a direct replacement for the standard 4509 lamp. While the amps & wattage are the same, the rated design life of the 4509Q is 4 times longer (100 hrs. vs. 25 hrs.) and 4509Q has nearly double the candlepower and narrower beam disbursement.

CUSTOM AVIONICS PANELS

ADVANTAGE AVIONICS

Aircraft Spruce Avionics opened in September 1993 and in January 2004 merged with Advantage Avionics at Chino Airport in Southern California. Aircraft Spruce stocks a complete selection of major brand equipment at exceptional prices and ships to customers around the world. Advantage Avionics is Aircraft Spruce's custom panel and avionics installation facility. Highly skilled and experienced installers and bench technicians provide quality work at competitive prices. Advantage Avionics has become the avionics shop of choice for discerning aircraft builders and owners in Southern California.

Advantage Avionics

GARDNER AVIATION SPECIALIST, INC.

Exemplifying Pride and a Commitment to Excellence in all we do! Gardner Aviation is Aircraft Spruce's East coast avionics shop partner. Specializing in Avionics and Maintenance: Installs, complete avionics upgrades, autopilots, RVSM, TAWS, custom panels, aircraft annuals, 100 hours and pre-buys, and IFR/VFR certification.

Certified FAA Repair Station: G3SR222J
Radio Class: I, II, III
Instrument Class: I, II, III, IV
Limited Airframe

The Aircraft Spruce and Specialty Panel Builder allows you to plan your panel without having to search all over the internet and keep track of all your findings. Using drop down menus, you can easily search our large inventory of avionics & instruments by category. This tool displays every piece of equipment you will need for your panel, enabling you to get quotes

quickly and simplify the ordering process. Your data can be saved so you can build your panel at your own convenience.

If you need a complete custom panel built for your aircraft, Aircraft Spruce is your best choice for best quality and lowest cost.

Contact our Avionics Sales Manager for a quote on your new panel at: ryandeck@aircraftspruce.com.

IMPORTANT NOTICE

Aircraft Spruce & Specialty Co. cannot accept a return of any instrument or avionics equipment that has been installed and/or altered in any way. All returns must include all components and accessories and all original packaging. All returns must be in new, saleable condition. Credit or replacement will be issued at our discretion pending inspection and testing by the manufacturer. Warranty repairs can be sent directly to the manufacturer with a copy of our invoice.

GARMIN PORTABLE GPS

GARMIN GPSMAP 696 & 695

All-in-one navigator designed exclusively for aviation. Bright 7-inch diagonal high-definition sunlight-readable display. The bezel around the screen includes soft keys and a joystick control. Fast 5 Hz GPS update rate, the 696 renders graphics and presents flight data smoothly and continuously. With the addition of Garmin FliteCharts® and IFR map mode, the GPSMAP 696 has Class 1/Class 2 electronic flight bag (EFB) capability. Includes a GXM 40 smart antenna, which gives you access to high-resolution weather and audio entertainment right in the cockpit (XM subscription required). Can receive PIREPs, turbulence forecast and icing forecast information. The weather data can be laid directly over the unit's navigation map and topographic map databases. Features a high-resolution terrain page showing hazards relative to your altitude and a vertical profile of terrain along your route of flight. Built-in Jeppesen database, and an Americas, Atlantic or Pacific terrain database. Also includes an obstacles database for the U.S. or Europe. Comes with a realistic "view from space" satellite imagery basemap. When in the air, Garmin's new Smart Airspace™ feature makes it easier than ever to identify what airspace lies ahead.

GPSMAP 695 is Garmin's ultimate portable MFD. Similar to the 696, the GPSMAP 695 comes with a large screen and detailed electronic charts — minus XM compatibility — at a price you'll love.

GARMIN GPSMAP 496

Combines satellite datalink weather with a detailed color map and terrain alerting. Garmin SafeTaxi™ data provides detailed taxiway diagrams and position information for over 850 U.S. airports. Preloaded on the unit. Look up taxi services, plan an overnight, choose fuel stops and more with the Aircraft Owners and Pilots Association (AOPA) Airport Directory included on the GPSMAP 496. Detailed information for over 5,300 U.S. airports along with the names and phone numbers of thousands of FBOs, plus ground transportation, lodging, restaurants, local attractions and more. Smart Airspace feature makes it easier than ever to identify what airspace lies ahead. Automatically highlights airspace close to the pilot's current altitude and de-emphasizes airspace away from the current altitude, which gives you increased situational awareness. Built-in Jeppesen database with terrain and obstacle databases. Even customize your own minimum clearance levels to receive terrain cautions. Updates map data and "Panel" page instruments at 5 Hz, gives you a smoother, near "real-time" presentation of your aircraft's analog indicators. With an optional subscription to XM WX Satellite Weather™ and the included GXM 30A smart antenna, you'll have access to constantly-updated, high-resolution weather data for the U.S., right in the cockpit. Add a Garmin Mode S transponder, and the 496 will also display TIS traffic alerts that identify surrounding air traffic. Garmin's GPSMAP 496 comes ready to go right out of the box with preloaded City Navigator® NT street maps and a hefty points of interest (POIs) database, including motels, restaurants, fuel, ATMs and more. Simply enter a destination, and you're automatically routed with voice-prompted turn-by-turn directions. Add optional BlueChart® g2 data cards, and turn the 496 into a color chartplotter.

- GPSMAP 495 Pacific P/N 11-06318

GARMIN GPSMAP 396

An integrated GXM 30 smart antenna makes the satellite connection, enabling the unit to receive and process XM Weather and flight safety products. Allows pilots to display NEXRAD, Temporary Flight Restrictions (TFRs), METARs, TAFs, Winds Aloft, through a subscription with XM Radio data services. Displays TIS traffic when interfaced with a Garmin GTX 330, and channeling a Garmin SL 30 Nav/Com by highlighting a frequency on the GPSMAP 396 and pressing the enter button. Features: •GA 26C remote antenna •Full Jeppesen aviation database, including instrument approaches •Terrain/obstacle display with pop-up warnings •Built-in basemap with automatic routing and turn-by-turn directions •Rechargeable lithium-ion battery offers 5 to 15 hours of use depending on backlight settings •Provides separate serial and USB interfaces •50 reversible routes with 300 waypoints per route •10,000 point automatic track log; 15 saved tracks, 1,000 saved track points each •Project your position on the map with the configurable complex heading line Water resistant, IEC 60529 IPX7 standards (submersible to 1 meter for 30 minutes) P/N 11-03592

GARMIN GPSMAP 296

The GPSMAP 296 builds on the tradition of Garmin aviation handhelds like the GPSMAP 196 and GPSMAP 295. New features like terrain cautions and alerts, sectional chart-like topographic data, a built-in obstacle database of the U.S., and a transparent navigation arc view for course, speed, and distance information lead the list of advances. The GPSMAP 296 also features USB data transfer, faster processing speed, and a rechargeable lithium-ion battery pack. Press a button, and you have your choice of the unit's automotive or marine modes. An automatic logbook also calculates your flight time and automatically records departure and arrival locations. When used with Garmin's free logbook software—FlightBook—this feature makes light work of maintaining your logbook. Your flight information will be stored in the unit and can be downloaded to this exclusive Flightbook software at any time. Garmin delivers terrain awareness in an intuitive Terrain mode on the GPSMAP 296. The unit combines GPS position, GPS altitude and topographical mapping to give pilots a vivid depiction of potential terrain hazards.

- Features: * Sunlight Readable * Full Color Screen * Terrain (TOPO) with Alerts * Lithium Rechargeable Battery * Mapsource & Blue Chart Compatible * Turn by Turn Guidance * If Auto Kit is Purchased, has Voice Activated Turn by Turn * Processor is 2 Times Faster than the 196 * Can Display in 10 Different Languages that are Pre-Programmed in the GPS Itself: English, French, German, Spanish, Russian, Italian, Polish, Portuguese, Swedish, Dutch

GARMIN PORTABLE GPS

GARMIN GPSMAP 196

The GPSMAP 196 offers unprecedented features and utility in an aviation portable. In addition to the built-in Garmin basemap, the GPSMAP 196 accepts all of our MapSource products, and provides turn-by-turn route guidance for street navigation. Other exciting features include a unique "panel page", which offers a graphical depiction of GPS-derived

flight information, and an automatic logbook function that records departure airports, arrival airports, and flight time (automatically recording night flight based on sunrise/sunset information). This flight information is stored in the unit, and can be downloaded to Garmin logbook software. The GPSMAP 196's processor provides map redraws and scrolling at over twice the speed of previous aviation portables. With these features plus a large (3.8" diagonal), 12-level grayscale display in a slim package, the GPSMAP 196 is sure to be the next big hit. Features: • 3 distinct modes: Aviation, Land, Water Extended runway centerlines displayed on moving map • Unique panel page graphically displays flight info • Turn-by-turn automotive routing • Split-screen moving map and HSI display • Built-in basemap showing lakes, rivers, cities, highways, state boundaries • Benefits

Logbook feature automatically records flight data • WAAS-enabled, 12 parallel channel GPS receiver • 1000 user waypoints with name and graphic symbol; 50 reversible routes with 50 waypoints / route. • Compatible with most Map source products including Garmin BlueChart marine cartography, MetroGuide, and City Select. • Weight: approx. 1.5 lbs. with batteries • Battery life using (4) AA batteries; 16 hours with no backlighting used. 4 hours with full backlighting.

GARMIN GPS TRADE-IN / TRADE-UP PROGRAM

TRADE-IN YOUR
 OLDER MODEL
 AND TRADE-UP TO
 NEW MODEL

AV

Trade-in only applies towards a purchase of a new Garmin unit listed below (one unit per trade-in). Trade-in must be complete, having all accessories (listed below), and the unit must be in good cosmetic and working condition. Any unit not meeting this requirement may receive a lesser trade-in value or have the unit returned.

1. Purchase a new GPSMAP 296, 396, 495, 496, 695, or 696.
2. At the time of order, our sales representatives will give you your customer number and order number to use when sending in your trade-in unit.
3. Once you receive your new Garmin unit, please call our customer service number at 800-861-3192 and reference your customer number and order number to receive an RMA to ship your trade-in to Aircraft Spruce and Specialty.
4. After we receive your trade-in, we will verify that the unit is complete and in good cosmetic and working condition. Once verified we will credit you the trade-in value. Units with missing accessories will add delay to the credit process.

GARMIN PORTABLE GPS - ACCESSORIES

GARMIN NUVI 205W

This navigator leads the way with turn-by-turn directions and optional MSN® Direct services to get you there on time and keep you informed. It's packed with millions of destinations and maps for the contiguous U.S. **Navigate With Ease** - nuvi 205 comes preloaded with City Navigator® NT map data for the contiguous U.S. Simply touch the color screen to enter a destination, and nuvi takes you there with turn-by-turn voice directions, 2-D or 3-D maps and smooth map redraw rates as you navigate. Its digital elevation maps show you shaded contours at higher zoom levels, giving you a big picture of the surrounding terrain. In addition, nuvi 205 accepts custom points of interest (POIs). **Take It With You** - Like the rest of the nuvi 2x5-series, nuvi 205 sports a sleek, slim design and fits comfortably in your pocket or purse. Its rechargeable lithium-ion battery makes it convenient for navigation by car or foot. With its "Where Am I?" emergency locator, you always know your location. Simply tap the screen to get your exact latitude and longitude coordinates, the nearest address and intersection, and the closest hospitals, police stations and fuel stations. **Go Beyond Navigation** - Navigation is just the beginning. nuvi 205 includes many travel tools including JPEG picture viewer, world travel clock with time zones, currency converter, measurement converter, calculator and more. With photo navigation, you can download Google™ Panoramio™ pictures via our Garmin Connect™ Photos website and navigate to them. The 205 is compatible with optional enhanced MSN® Direct content (subscription and receiver required) and our free Garmin Garage where you can download animated vehicles that show your location on the map. It also comes with Garmin Lock™, an anti-theft feature. Enhance your travel experience with optional plug-in microSD cards such as Garmin Travel Guides for detailed data on attractions.

KNEEBOARD FOR HANDHELD GPS & PDAS

This angled kneeboard accommodates virtually every handheld GPS or PDA. The circular base is slightly cone-shaped for a leg-conforming fit and is wiggle-free secured around either upper leg with a velcro tape. The GPS or PDA attaches with velcro on a slant surface, which is angled about 30° and permits a perpendicular view on the screen.

USING THE GNS430W/530W

This is not your typical "Cook Book" approach to learning the GNS430/530W. The manual contains 62 pages of text and dozens of colored pictures, the same pictures you would see in real-life when operating the unit. Written by Keith Thomassen.

GARMIN NOH (NEWLY OVERHAULED) UNITS

and is TSO-certified for non-precision approaches for the IFR environment. Americas Data Base. P/N 11-05939

resolution DSTN display. The 300XL TSO shares the popular features of the GNC 250XL and is TSO-certified for non-precision approaches for the IFR environment. P/N 11-02934

GPS 150XL shares the popular features as the 155XL TSO at a lower price for the VFR pilot. P/N 11-06323

GARMIN 150XL NOH GPS

- The VFR panel-mounted GPS 150XL, along with its IFR counterpart, GPS 155XL TSO, combine moving map graphics with a fast, efficient GPS receiver.

GARMIN NOH GTX 330 TRANSPONDER

- See the same radar traffic your ATC controller is watching with the GTX 330, a panel-mounted Mode S digital transponder with traffic datalink capability that also meets the European mandate for Mode S level 2 surveillance. GTX 330D adds antenna diversity to the features of the GTX 330 for improved visibility of TCAS-equipped aircraft flying above you. P/N 11-05747

AIRGIZMOS PANEL DOCKS

AIRGIZMOS PANEL DOCK FOR GARMIN 695/696

• Securely mounts the Garmin GPSMap 695/696. • Designed to allow quick and easy removal of your portable GPS. • Made from durable, high quality plastic similar in appearance to the GPS itself. • Gives your instrument panel a professional, finished look. P/N 11-07309
Horizontal Tilt..... P/N 11-07310

AIRGIZMOS PANEL DOCK FOR GARMIN 196/296/396/496

The AirGizmos Panel Dock was designed to securely hold your Garmin 196, 296, 396, or 496 portable GPS. It fits nicely in a standard 6.25" avionics stack. It allows you to quickly remove your portable GPS from your plane for upgrades, flight planning, or for use in your car or boat. It is also a safe way to use your portable GPS, as it is securely held in the panel at all times. The Panel Dock is shipped with a set of mounting hardware necessary for attaching it to an avionics stack. If you intend to install it in a different way, use the included hardware as a reference when deciding what type of installation hardware you will need. P/N 11-03509

AIRGIZMOS PANEL DOCK FOR GARMIN 295

The Garmin 295 is held safely and securely, but can be easily removed in a matter of seconds. The external power and antenna connections are made at the back of the unit, and the cables are secured from falling into the panel with special keyholes machined into the dock. P/N 11-04315

AIRGIZMOS VERTICAL TILT ADAPTOR FOR GARMIN UNITS

Following up the release of their Horizontal Angle Adapter, AirGizmos decided to address the needs of those pilots who mount their GPS lower on the instrument panel. The Vertical Tilt Adapter angles the viewing angle of the GPS so it is more readable when the GPS is mounted at the bottom of a tall instrument panel. This adapter fits the same opening as the Panel Dock itself, so adding the vertical tilt should be very easy for existing installations. **REQUIRES P/N 11-03509.** P/N 11-05029

AIRGIZMOS HORIZONTAL TILT ADAPTOR FOR GARMIN UNITS

AirGizmos Horizontal Tilt Bracket angles the GPS at a fixed angle of 15 degrees, providing a much more convenient viewing angle. This adapter fits in the same panel cutout as the Panel Dock, so if you already have a Panel Dock you can attach this adapter without having to modify your installation. You can mount the Angle Adapter in either direction, in case you fly in the right seat. In addition, by using this adapter you can expand your installation options, since it lets you surface-mount the Panel Dock on any instrument panel. **REQUIRES P/N 11-03509.** P/N 11-04671

AIRGIZMOS 396 XM ANTENNA DOCK

Here is the perfect companion to your new Garmin 396 and the AirGizmos Panel Dock. Now you can move the XM antenna from plane to plane, or from vehicle to vehicle, along with the GPS itself. It is designed to mobilize your costly 496 XM antenna. It helps to maintain the clean look of a permanent installation by organizing the antenna cable. Using the AirGizmos Antenna Dock you can freely move ONE XM antenna from location to location, avoiding high costs of additional equipment and service subscriptions. To utilize the AirGizmos Antenna Dock, attach the base to your antenna and install the cradle in the necessary location (you can install several cradles in different locations). Using a simple twist & lock mechanism (no tools required) the base will lock your antenna into the preinstalled cradle, and your 396 XM antenna is ready to go! P/N 11-04694

PREMIUM BEANBAG XM ANTENNA PACKAGE

The AirGizmos Antenna Dock is designed to mobilize your costly 496 XM antenna. It helps to maintain the clean look of a permanent installation by organizing the antenna cable. Package includes: base, cradle, beanbag assembly, and two cables. P/N 11-07007

AIRGIZMOS 396 XM CRADLE & CABLE

This product will allow you to use the AirGizmos XM Antenna Dock in a second vehicle or aircraft. Use of this product requires that you first purchase the AirGizmos XM Antenna Dock. P/N 11-04781

AIRGIZMOS PANEL DOCK COVER FOR GARMIN 196/296/396/496

This panel is for Garmin panel dock for models 196/296/396/496. Protects unit from UV rays and hides unit in the aircraft so that theft is less likely to happen. Can be used even if Garmin unit has not been installed yet. P/N 11-04775

AIRGIZMOS PANEL DOCK FOR AVMAP EKP-IV

Now you can mount the beautiful, detailed display of the AvMap EKP-IV directly in your instrument panel using the AirGizmos EKP-IV Panel Dock. The AirGizmos EKP-IV Panel Dock is designed to hold the AvMap securely yet it allows you to easily remove your portable from your plane whenever the need arises. The AirGizmos EKP-IV Panel Dock offers easy installation, quick release, hassle-free management of cables, and elegance of design. P/N 11-04371

AIRGIZMO GEOPILOT PANEL DOCK

This GPS has a nice large screen to go with it's small size. Our Panel Dock is designed to hold the GeoPilot securely in your panel while allowing it to be easily removed for portable use. Made from durable, high quality plastic similar in appearance to the GPS itself. Gives your instrument panel a professional, finished look. P/N 11-05615

AIRGIZMO GEOPILOT II PLUS PANEL DOCK

The Panel Dock for the AvMap GeoPilot II Plus fits in a standard 6.25" radio stack. Power and antenna cables are organized and managed. The result is a professional installation for your portable GPS.

The included WxWorx weather receiver bracket provides additional organization in the cockpit by providing a secure mount for the WxWorx receiver box. P/N 11-06855

AIRGIZMOS PANEL DOCK FOR AIRMAP 1000/2000C

The AirMap 1000/2000C Panel Dock works in much the same fashion as other AirGizmos products. The cables supplied by Lowrance fit through keyhole slots on the back of the unit. The release latch at the top of the Panel Dock permits quick removal of the device for use in another vehicle or simply for security purposes. P/N 11-04372

AIRGIZMO LOWRANCE 600 PANEL DOCK

Lowrance makes a low cost handheld GPS that is just the perfect size for many panels. Our Panel Dock will allow the AirMap 600c to be nicely mounted in your panel while still allowing it to be easily removed and used as a handheld. Made from durable, high quality plastic similar in appearance to the GPS itself. Gives your instrument panel a professional, finished look. P/N 11-05616

AIRGIZMOS APPLE IPOD DOCK

The iPod Panel Dock fits all first, second, and third generation iPod devices. It does not fit the iPod Mini, or any of the iPod knockoffs that are out there. The iPod Dock can be installed to allow access to either the top plugs or the bottom plug. Just flip it the way you want it to go and mount it in your panel. The top plugs are useful for simple headphone-only connections, while the bottom plug allows you to fully integrate your iPod into your intercom and power system (a separate cable is required). P/N 11-04673

AIRGIZMOS AERO COVER

Would you like to be able to permanently mount the GPS or XM Weather antenna from your favourite GPS? If so, the Aero Cover is for you. It fits all of the major brands of GPS and XM weather antennas. It will protect your antenna from the elements. It is streamlined and attractive. Best of all, it gets your antenna out of your way. P/N 11-04777

AIRGIZMOS XM ANTENNA CABLE

XM Antenna Cable
Straight, 2 meter extension for Garmin XM Weather Antenna P/N 11-04780

AIRGIZMOS AERO DOCK

Don't have room to install the Garmin XM Antenna inside your plane?

The Aero Dock gives you the option of mounting it on the outside.

The AirGizmos Antenna Dock is designed to mobilize your costly 396 XM antenna. It helps to maintain the clean look of a permanent installation by organizing the antenna cable. Using the AirGizmos Aero Dock you can freely move ONE XM antenna from location to location, avoiding high costs of additional equipment and service subscription.

Kit includes: 1 cradle, 1 base, 1 cable, mounting hardware.

P/N 11-04778

BENDIX KING AV8OR™ SERIES - WXWEATHER

BENDIX KING AV8OR

Takes you to the airport, provides airborne weather and guidance enroute to your destination, and even provides multimedia entertainment along the way. Features: * Small and sleek yet hosts a large 4.3-inch diagonal display * External interface to access

XM weather information and overlay data on flight plan * Moving aviation map with vertical profile display of terrain * Moving automotive map with text-to-speech voice prompts * 20-channel SiRF III GPS receiver capable of receiving WAAS * Satellite signals within 5 meters of accuracy * Adjustable, high-brightness 150 FL LCD with 480 X 272 pixels * Touch screen virtual keyboard for efficient user interface * Powered by a new 400 MHz 2443 processor * 4-Gigabyte data card containing databases for the entire US/Canada or the entire Europe region * Spare room for personal files * Easily connected to a home or work PC for quick downloads of files or new databases and uploads of flight plans * Logged flights can be viewed from programs such as Google Earth * Multi-use: Aviation - Auto - Entertainment- MP3 Player, Movie Player, Electronic Books, Photo Viewer and more * Multiple Bluetooth interfaces for: - cell phones, XM Weather Receiver, Alternate GPS Receiver.

AV8OR™ HORIZON 3D COCKPIT INFORMATION SYSTEM

The Mobile Computer Platform (MCP) is a Tablet PC with a 7" high-resolution LCD display. This unit draws power from the aircraft's power supply and includes rechargeable batteries for wireless operation in the event of power loss. The unit can be mounted on the yoke or in any number of locations within the pilot's field of view.

The INU can be mounted on any level surface inside the aircraft such as under the passenger seat. The GPS-enabled Inertial Navigation Unit (INU) is a self-contained 3D solid-state inertial navigation sensor system with: * WAAS-enabled GPS receiver * 3D solid state gyros * Barometric pressure sensor * Battery backup * Bluetooth® wireless interface

Equipped with built-in 3D Synthetic Vision and IFR approach plates, with optional satellite weather and 3D traffic.

Synthetic vision technology is poised to revolutionize IFR flight, dramatically reduce pilot workload and increase flight safety. By combining both positional and situational data, the pilot can be presented with a realistic and accurate representation of the view through the aircraft windshield.

Synthetic Vision Systems (SVS) integrate data from terrain databases, Advanced Features: * True 3D Synthetic Vision * 3D emergency guidance to nearest airport * 2D moving maps with high-resolution terrain * Split-screen 3D/2D option * "Touch and see" moving map * "Touch and drag" map panning * Terrain awareness warning system view (TAWS) * Built-in flight planning * DUATS flight plan importing * FAA approach plates * SIDS/STARS * Built-in barometric altitude option * Satellite weather option * Traffic avoidance option * Automatic preheating capability for colder climates * Built in notepad for fast copying of clearances

The XM Satellite Weather Unit provides near real-time NEXRAD weather data, TAFs, METARS, TFRs, and NOTAM information, which are essential to improving the pilot's decision-making. The receiver can be integrated with the AV8OR Vision 3D system via USB.

Depending on XM weather data subscription, the following information is available: NEXRAD: Freezing levels, METARS/TAFs: Lightning, Winds aloft: Cloud tops

By integrating data from Zaon XRX, it displays 2D quadrant bearing, distance, and altitude information, as well as the world's first portable 3D Traffic View. The receiver can be integrated with the AV8OR Vision 3D system via USB.

AV8OR™ VISION 3D COCKPIT INFORMATION SYSTEM

Remote Touch Screen Display. Modular Mobile Computing Platform. Synthetic Vision - Improving Situational Awareness: Equipped with built-in 3D Synthetic Vision and IFR approach plates, with optional satellite weather and 3D traffic. Combining both positional and situational data, the pilot can be presented with a realistic and accurate representation of the view through the aircraft windshield. Advanced

Features: * True 3D Synthetic Vision * 3D emergency guidance to nearest airport * 2D moving maps with high-resolution terrain * Split-screen 3D/2D option * "Touch and see" moving map * "Touch and drag" map panning * Terrain awareness warning system view (TAWS) * Built-in flight planning * DUATS flight plan importing * FAA approach plates * SIDS/STARS * Built-in barometric altitude option * Satellite weather option * Traffic avoidance option * Automatic preheating capability for colder climates * Built in notepad for fast copying of clearances.

Position information is provided by a state-of-the-art ARS/GPS built-in Attitude Reference System (ARS) with WAAS GPS and Solid-State Barometric pressure sensor, a completely independent, battery backup.

Integrated Technologies:

WxWorx XM® Satellite Weather Unit - The receiver can be integrated with the AV8OR Vision 3D system via USB.

Zaon XRX PCAS™ Traffic Detection - By integrating data from XRX, AV8OR Vision 3D displays 2D quadrant bearing, distance, and altitude information, as well as the world's first portable 3D Traffic View. The receiver can be integrated with the AV8OR Vision 3D system via USB.

VFLITE AIRMAP 500/1000 INTERACTIVE GUIDE

Want to be able to use all the power that your AirMap 500 & 1000 GPS can offer? We're sure you do - and that you'd rather figure it out on the ground at your leisure (instead of flying "heads down" trying to learn it). The new VFLITE guide on the feature-rich Lowrance portables will greatly reduce the frustration that often comes from reading the manual, enable you to learn in a safe environment and let you maximize the investment you made in your AirMap. P/N 11-02760

GIPSI VOICE BASED GPS

The GiPSi is portable, voice based, Global Positioning System (GPS) device for General Aviation pilots. It allows you to maintain a much higher state of situational awareness. There is no "heads down" navigating. The interaction is very intuitive, it speaks to the pilot. The device does not require extensive training. The pilot can focus on "Flying the Airplane". It enables a pilot to create a flight plan with waypoints, on their computer and download it to the device. It automatically logs flight movement activity such as time stamped altitudes, airspeeds, track and bearing deviations as well as way points. It, at any time, can notify a pilot of exact location i.e. a "Where" function; the "Nearest" airport with name, bearing runway length, altitude and distance from current location. It stores in its database information on all United States airports. A GPS receiver is embedded in the GiPSi circuitry. The unit operates off of, up to, twelve (12) satellites. For even higher accuracy the GiPSi uses the Wide Area Augmentation System (WAAS). It weights just 3 ounces and measures 3-1/2" long by 2" high by 1" in depth. The device is controlled by a five (5) position joystick switch. It has a USB port that allows a computer connection for downloading and uploading information. The unit can also be charged via the USB connection. It ships with a wall charger as well as a cigarette lighter connector which can be used to charge the unit using either a 110V AC or 12V DC connection. There is a 3.5mm (MP3 type) plug for ear bud earphone. LEDs that indicate satellite strength are embedded in the case. P/N 11-07768

ANYWHERE TRAVEL COMPANION

Everything You Need "Built-In"
The ATC is a special version of the HP iPAQ 310. It retains all of the functionality of the original iPAQ Travel Companion and adds to this a special EMBEDDED EDITION of Anywhere Map®.
Not only does the ATC's 4.3" ultra high-definition 800 x 480 screen give the best view ever in handheld devices, it's touch-screen operated, with big buttons; and unlike many such products, there is nothing to load, nothing to initialize, no "internal computer" to operate - just turn it on and fly!

The ATC is convenient and capable, including among its talents the patented "cones of safety" glide calculator, high resolution terrain, flight planning and obstacle and terrain warnings. Options include XM Weather and Pocket Plates® approach plates that provide the features and safety margin available on modern panel-mounted units, and then some. "By pilots, for pilots," defines the eight years of intensive development that have resulted in the most intuitive navigation system that ever went into an airplane.

The ATC offers an advanced high-resolution terrain map, detailed aviation data including nav aids, airspace, airways, SUAs and TFRs, with advanced flight tools like a VNav HSI, flight planning, weight & balance, calculator, and an Airport Guide. Anywhere Map's Personal Digital Copilot® tracks your flight and issues Reminders like Switch Fuel Tanks and Begin Descent along with Obstacle and Terrain Warnings.

System Includes:

- Anywhere Map Travel Companion with built-in GPS
- Aircraft Mount
- Automotive Mount
- Smart Card
- Power Adapter (12V-40V)
- AC Power Adapter
- 1GB SD Card [Pre Installed]

ANYWHERE POCKET PLATES SOFTWARE

Pocket Plates Software with 6 months of Updates. Entire 12,000+ page library of current NACO (FAA) approach procedures for the lower 48 states for display on a Pocket PC (PDA) computer, or Windows® laptop or tablet PC. Included with the plates are all ephemera: performance, Arrivals and Departures. Exact reproductions of current procedures as published by the Charting Office. Pocket Plates are updated online by subscription every 28 days. Satisfies requirements for Part 91 usage.

Real-time GPS Position - Pocket Plates contain all underlying fixes, intersections, airports and nav aids in map coordinate format. Plates are calibrated, a simple process that takes about ten seconds, consisting of identifying two objects on the plate such as a fix and the airport. Calibrated plates display real-time GPS position in flight.

Product components - Pocket Plates consists of a Plate Manager that installs on your laptop or desktop PC, and a Plate Viewer for displaying the procedures on a Pocket PC. The Plate Manager selects which plates you store on your Pocket PC or Tablet; performs automatic Auto-Pilot Updates of the plate library, and prints our hard copies of plates as backup for specific routes.

Ease of use - Far easier to use in an aircraft than traditional paper books or cumbersome binders. Select approaches either by typing in an airport identifier or by tapping on geographic regions of the country. The procedure is intuitive and very fast and there are no fragile paper plates to remove from a binder.

Storage Options - The entire 12,000-page U.S. plate library and the Plate Manager are stored on a Windows® PC in under 1 Gigabyte of disk space. Plates are stored for viewing on Pocket PC or Raven® computers using a memory card. A 1-gigabyte card will store the entire library with about 200 MB left over. If your flights are typically restricted to a smaller geographic area, lower capacity storage cards may be used. Both Compact Flash® and Secure Digital® cards may be used for storage, depending on the facilities offered by the display device.

Compatibility - Pocket Plates is supported for Pocket PCs with ARM processors such as iPAQs and Toshiba, and Windows® 2000/XP computers. It is not currently supported on Casio Pocket PCs.

AVMAP PORTABLE GPS

GEO PILOT II

GeoPilot II, the new portable navigator developed by AvMap based on the success of the GeoPilot, is high performance and truly affordable. More Hi Quality hardware and Software features have been added: GeoPilot II is faster than ever thanks to the new 300 MHz processor and is more compact and practical with the built-in GPS receiver and richer

in information. **Large display, Safe Navigation** - AvMap GeoPilot II displays all the information you need on a wide 5" color LCD. The display is sunlight-readable and equipped with a sensor for automatic brightness control. The information is sharp and bright and the map page is fully customizable. The large control buttons and unique toggle cursor control make navigating through menus and editing flight plans easy. **Most Accurate Information** - The maps preloaded on the SD memory card includes the Jeppesen® navigation database with terrain and vertical obstructions. The Map also includes Victor Airways, marine objects, ULM Aerodromes and private airports. This enhanced database provides more navigation and emergency "nearest" options. **Enhanced Situational Awareness** - Situational awareness is greatly improved with TAWS (Terrain Awareness Warning System). With the new Crossed Airspace Predictor function, you can get a preview of the airspaces that you will cross along your flight, while the Crossed Airspace Advisor provides warnings during the flight on airspaces being crossed. **Multifunctional: Navigate by Sky and Land!** - AvMap GeoPilot II is engineered for aeronautical as well as terrestrial use as it can fit perfectly in your aircraft and in your car. With the optional 2GB SD Card preloaded with Tele Atlas Maps of all North America or Europe, GeoPilot II converts into an advanced car navigator with turn-by-turn vocal instructions! **Hardware** : Dimensions (mm): 140x100x35.4 Weight: 390g Display: LCD TFT 5" (12,7 cm) with audio - video input Display brightness: 400 nits Automatic brightness control: Yes + Night Palette for night flying Display Colors: 64 k Display resolution: 320x240 pixels GPS Receiver: Built-in Sirf Star III 20 channels Processor: Arm9 300Mhz RAM: 32 MB Memory Support: Secure Digital (SD) 256 / 512 MB Battery: Built-in Li-Ion rechargeable battery Power supply: Charger 10/35 V DC Built-in Speakers External GPS antenna serial Port **Operating System:** AvMap Software update: Free 2D view: Land Elevation (color coded topographic map showing the altitude of the terrain) Turn-by-turn vocal instructions: With built-in speakers (only for terrestrial navigation). Full flight planning capability: Up to 15 flight plans of up to 100 legs each Editable aircraft checklist, Trip computer, Full nav data Page, Full simulator functions, TAWS - Terrain Awareness and Warning System: Yes + Crossed Airspace Predictor and advisor Integration with other on board navigation systems.

GEOPILOT II PLUS

High Performance at an Affordable Price - The Geopilot II PLUS, the new portable aeronautical navigator developed by AvMap, is highly performing but truly affordable. GeoPilot II PLUS is faster than ever thanks to the new 300 MHz processor, more compact and practical with the built-in battery and GPS receiver, and an extra serial port available for connection with PC and autopilot

devices. **Large Display, Safe Navigation** - AvMap GeoPilot II PLUS displays all the information you need on a wide 5" color LCD. The display is sunlight-readable and equipped with a sensor for automatic brightness control and an audio video input. The information are clearly visible and the map page is fully customizable. **Weather Conditions** - With an optional antenna you can receive constantly updated XM/WX weather conditions: NEXRAD (next generation radar), and Lightning information are displayed on the map. Enhanced Situational Awareness With the TAWS GeoPilot II PLUS displays your position in relation to surrounding terrain. With the new Crossed Airspace Predictor function, you can get a preview of the airspaces that you will cross along your flight, while the Crossed Airspace Advisor provides warnings during the flight on airspaces being crossed. **Most Accurate Information** - The cartography preloaded on the SD memory card includes the Jeppesen® navigation database with terrain and vertical obstructions. GPS ANNUNCIATORS

With fingertip annunciation and flight information in the pilot's primary view, Annunciation Control Units (ACU) offer important features in an efficient design. As an interface with popular NAV and GPS systems, the ACU provides vital safety information including waypoint, approach status and integrity alerting. Approved to strict TSO standards, Mid-Continent ACUs are engineered as a compact, affordable solution to the challenge of installing several switches. Most versions are configured 14V or 28V with vertical or horizontal mounting and feature long-life lamps with automatic photocell dimming.

MD41-1468A

GARMIN SL 30 NAV/COM RADIO

Powerful 760 channel comm radio with a 200 channel VOR, glidescope and localizer receiver. Built-in course deviation indicator may be displayed and the SL 30 interfaces with most common mechanical CDIs and HSIs. The SL 30 can be shipped for installation in any aircraft and does not require dealer installation.

Garmin SL 30..... P/N 11-03581
With Harness P/N 11-05109

GARMIN SL 40 COM RADIO

Monitor ATIS while never leaving your assigned ATC channel. The SL

40 always gives priority to the active channel, meaning you'll never miss a transmission. With 10-watt transmit power and only 35-watt DC input, the SL 40 is power efficient and cool running.

Features: 760 channels; frequency range 118 to 136.975 MHz; tunes to National Weather frequencies; 16-character, high-intensity, alphanumeric LED display; transmit status indicator; capacity to store and recall 8 user-defined and previous frequencies.

P/N 11-02203

GARMIN GDU 375 & 370

Designed for retrofit installation in light sport (LSA) and experimental/kitbuilt aircraft, the GDU 375 is a panel-mount multi function display unit that provides a non-TSO'd "glass cockpit" option at a very affordable price.

7-inch high-definition WVGA flatscreen with dual redundant power inputs, mounts flush in the panel. Operation is simple: There's a handy rotary joystick cursor control for data entry, soft keys for mode selection, front-loading SD card slot for expansion memory and updates, plus an easy-to-navigate G1000®-like graphical user interface. Comes with Garmin FliteCharts® and SafeTaxi® pre-installed. There's also AOPA Airport Directory data that offers detailed information on over 7,400 U.S. airports, along with airports of entry for Canada, Mexico and the Caribbean. Weather or not?

The primary difference between the GDU 375 and its similar-looking sibling, the GDU 370, is that you get support for XM WX™ satellite weather with the GDU 375. (XM subscription required). You also have the option to

add over 170 channels of high-quality XM Satellite Radio programming – music, sports, news, talk and more – for an additional monthly fee.

In the future, the GDU 375 will accommodate not only MFD capability, but flight and engine instruments as well. With the purchase of additional hardware, your MFD will also become a PFD providing attitude/directional guidance with ADAHRS+Engine monitoring. These additional components are scheduled to be available in the second half of 2009.

*A single update of FliteCharts comes preloaded on the unit. FliteCharts will automatically disable when the data is over six (6) months out-of-date (six month period to commence when map is loaded in the factory). Each box will contain a certificate for one free current FliteCharts download. After the six month period, you must purchase a subscription for continuous FliteCharts chart availability.

GARMIN GMX 200 MULTI-FUNCTION DISPLAY

For the ultimate in situational awareness, the GMX 200™ multi-function display leads the pack with a viewing area almost 20 percent larger than other panel-mounted MFDs and an impressive list of features and nav graphic interfaces.

Big-Picture Display - You'll always get the big picture with the GMX 200's sunlight-readable, high-resolution, 640 x 480, display. In addition to its huge AMLCD display, it comes with enhanced backlighting that dramatically improves color and contrast, resulting in chart depictions and images that are brighter and more vivid in all lighting conditions.

Big-Time Features - Similar to its predecessor, the MX20™, the GMX 200 is easy-to-use with multiple functions and useful features that make navigation simple and provide an extra margin of safety: • At a glance, see aircraft's position relative to terrain, obstructions, weather, airways, restricted airspace & more • Select between several charting options & add or remove details with the simple press of a soft key • New rotary knob allows for quicker map scale changes and entry of data • Front loading SD card-slot allows for expanded memory & makes loading updated charts uncomplicated • Fits in same panel space as the MX20 & includes more serial ports for added sensor capacity.

Detailed Data - Custom map with sectional-like depiction of the Lake Tahoe area. The GMX 200 includes high resolution terrain and hydrography data for the entire world which is preloaded for an unmatched presentation even at the lower zoom scales. The Garmin Base Map with cities, roads, rivers, and lakes has been added to further improve situational awareness. An aviation database featuring Jeppesen® NavData™ is used to draw airports, airways, nav aids, airspace, and more. Map scales range from one-fourth of a mile to a whopping 2500 miles. A unique split screen function allows you to simultaneously view two charting options along with the vertical profile for the elevation of the terrain along the route of flight. Split screen allows you to combine any two charting options with a vertical profile of the terrain. Custom map with airspace depictions near Johnson County Airport in Olathe IFR Enroute chart with high and low altitude airways

Seamless Integration - With the addition of the GDL 69, you can add XM WX Satellite Weather information to the GMX 200. Graphical weather depictions including NEXRAD, METARs, TAFs, TFRs, winds aloft, echo tops, precipitation type at the surface, lightning strikes, storm-cell data, AIRMETs, and SIGMETs can be received and displayed regardless of altitude. Combine animated NEXRAD images with the maximum zoom range of 2500nm and a nationwide view of the weather is presented on one screen. The GMX 200 also provides a user interface for the more than 150 channels of XM audio with the GDL 69A. Similar to the MX20, the GMX 200 comes in three versions: Standard, Traffic, and Radar/Traffic.

GMX 200 Traffic — supports interfaces to Garmin TIS transponders and ADS-B transceivers, and can also be connected to certain TCAS 1 & TAS systems.

GMX 200 Radar/Traffic — supports traffic interfaces and can also be interfaced with Garmin's GWX 68™, a new color digital weather radar with 6.5 KW of transmit power. When connected to the GWX 68™, the Radar/Traffic model displays real-time weather ahead of the aircraft supporting both horizontal and vertical perspectives.

The GMX 200 may be interfaced with the Garmin 400/500 series, GNS 480™, Garmin GDL 69/69A, Garmin GTX 330/33™, Garmin GDL 90™, Garmin GWX 68, as well as many other manufactures' GPS navigation equipment.

GMX 200 must be installed by a Garmin Dealer. Can only be sold over the counter to experimental aircraft (must verify) with harness. Request for Quote.

GARMIN GNS 530W

The GNS 530W is an all-in-one GPS/Nav/Comm solution. It features a WAAS-certified GPS, 2280-channel capacity comm and 200-channel ILS/VOR with localizer and glideslope. High-speed 5 Hz processing makes navigation calculations and map redraw rates five times faster than earlier GNS series navigators.

Built-in WAAS navigation capabilities. It is approved to fly LPV "glideslope" approaches without reference to ground-based nav aids of any kind. An advanced 15-channel receiver capable of five position updates per second, GNS 530W meets the FAA's stringent TSO C146a standards for WAAS "sole means" navigation — providing vertical and lateral approach guidance into thousands of U.S. airports previously inaccessible in IFR conditions.

GNS 530W's 5-inch high-contrast display with brilliant colors makes it easy to read and interpret pilot-critical information. Conveniently scan information from wide viewing angles, even in direct sunlight.

Integrates built-in terrain and navigation databases. The 530W's huge Jeppesen® database, updated with front-loading data cards, contains location reference for all airports, VORs, NDBs, Intersections, Flight Service Stations, published approaches, SIDs/STARs, Special Use Airspace and geopolitical boundaries. A detailed basemap shows airports, cities, highways, railroads, rivers, lakes, coastlines and more.

GARMIN GTX 330 MODE S TRANSPONDER

A Level 2 Mode-S transponder with exciting datalink traffic capabilities. Sharing the same keypad & digital display with the popular GTX 327, the GTX 330 adds

to the features with an outside air temperature display (temp. input required), altitude monitor with voice audio alert, and density altitude computations (temperature input required). But the real excitement lies in the GTX 330's datalink traffic capabilities through the FAA's Traffic Information Services. GTX 330 promises to deliver effective traffic information to the GA cockpit in busy terminal environments at a fraction of the cost of current traffic systems. The TIS system is available through 124 Mode-S Traffic Control radar sites throughout the U.S. Aircraft within a 60nm (expected to increase to 90+nm) radius of a Mode-S radar site will receive traffic advisories and warnings from ATC via Mode-S datalink, and this info will be displayed on Garmin 400/500 series products. This system will display 8 nearest targets within a 7nm radius and ±3,500 feet of the aircraft. Pilots will receive both visual traffic information (via 400/500 series products) and radio alerts of traffic in the area. The GTX 330 meets all requirements of the Mode-S mandate in Europe, which requires Mode-S for IFR traffic by 2003 and all VFR traffic by 2005. GTX 330 will be offered in diversity & non-diversity models to meet the requirements of a variety of aircraft and operations. The GTX 330D (diversity model) is the first panel-mount diversity-model transponder available. 2 year warranty.

GARMIN GTX 327 MODE C TRANSPONDER

With the intro of the GTX 327, Garmin revolutionizes a part of the panel that has been long overlooked. This full-featured, TSO certified transponder

brings a unique level of functionality and utility to your airplane. Its solid state transmitter provides 200 watts nominal power output and eliminates the need for a cavity tube which will eventually fail and require expensive replacement. And since the GTX 327 design is 100% solid state there is no warm up time, lower power consumption and lower heat emission. All of which translates to a longer service life. Some of the GTX 327 biggest features are the easiest to see. Among them, the easy-riding DSTN Liquid Crystal Display which reverses yellow numbers out of black for optimal viewing. An innovative keypad makes entering a squawk code a snap. And a dedicated VFR button allows for quick and easy 1200/VFR squawking. The GTX 327 also offers two important timing functions.

The first screen shows the current time and count up timer. The second indicates flight time and a count down timer. Together they represent a whole new standard in transponder utility.

- GTX 327 with Harness..... P/N 11-00329..... \$1895.00
- GTX 327 Transponder only..... P/N 11-00342..... \$1695.00

The GTX 327 can be sold over the counter to certified & experimental aircraft owner's with a pre-wired harness.

GARMIN GTX 320A MODE C TRANSPONDER

The GTX 320A is a full featured, compact, panel mounted Class 1A transponder. GTX 320A's solid state transmitter provides 200 watts

nominal power output eliminating the need for a cavity tube that can degrade with time, fail, or require expensive replacement. 100% solid state also means no warm up time, reduced power consumption and heat for longer service life. Extensive utilization of surface mount technology provides shallow depth and light weight which simplifies installation in the tightest spaces. 14 or 28 volt operation is available without the requirement for external voltage converters or dropping resistors. The GTX 320A fits into existing installations of selected Narco, King transponders using optional adapters for simple, cost-effective upgrading. A single board design allows for ease of serviceability and simple, standard, four-knob tuning.

The GTX 320A can be sold over the counter to certified & experimental aircraft owner's with a pre-wired harness.

NOTE: The GTX 330, GTX 327 & GTX 320A DO NOT include an antenna. Experimental Aircraft can order TED Transponder antenna P/N 11-17995 for .

GARMIN NOH GNC 300XL TSO GPS/COM

The GNC 300XL combines go-anywhere GPS flight navigation with full 760-channel VHF communications. On the Comm side, a full powered 760 channel transceiver with 5W minimum transmit power delivers crisp, clear cockpit audio and voice transmissions. Comm features auto-squelch control, standard headset output with sidetone and audio leveling, stuck mike transmission timeout, emergency channel select and autotune freq. selection from database card. The Nav side features Garmins easy-to-use PhaseTrac 12 parallel channel GPS receiver. Waypoint library holds up to 1,000 user-defined waypoints and stores up to 20 reversible flight plans with up to 31 waypoints each. Jeppesen NavData database includes SUAs, MSAs, airports, VORs, NDBs, intersections, plus airport, FSS and center frequencies, nearest search of 9 airports, VORs, NDBs, intersections and user waypoints and 2 nearest FSS and ARTCC frequencies and all published GPS and GPS overlay approaches, SIDs and STARs. Weight: Unit: 41 oz, Rack: 11 oz. Size: 6.25" x 2" x 5.65". 14 volt; 28-volt with optional converter. TSO'd to C129a, Class A-1.

GARMIN GMA 240 AUDIO PANEL

Non-TSO'd so it's priced really low. Yet, it includes an intercom and will support dual COMM, dual NAV, dual AUX receivers, and dual music audio inputs – plus up to three unswitched inputs for telephone ringers, altitude alerts, or other warning tones.

Pilots can connect up to two dedicated music sources to the rear connector (e.g. XM music and CD player) and over-ride one of those sources at any time by plugging-in a device (e.g. MP3 player) into the 2.5 mm front jack. The music source's volume can be increased or decreased with the GMA 240 by pulling out the copilot volume knob.

The 2.5 mm front jack also makes it easy for pilots to make and receive cell phone calls. It has a full-duplex telephone interface with intercom isolation capability.

Specifications: * Weight: 15.5 oz (440 g) * Dimensions: 1.3" x 6.29" x 7.12" * Power: Input voltage range: 11-33 Vdc, 4.3 W normal * Temperature range: -20C to +55C * Altitude: 55,000 MSL unpressurized * Transceiver inputs: 3 (including TEL) * Receiver inputs: 4 * Alert inputs: 3 * Input impedance: 500 Ohms * Input isolation: 60 dB min * Bandwidth: 100 Hz to 6.5 kHz * Music inputs (stereo): 2 * Music gain: -20 dB @ min. volume, +26 dB @ max. volumeP/N 11-06619

GARMIN GMA 340 AUDIO PANEL

The Garmin GMA 340 audio panel is compact and lightweight, making it an excellent choice for panels with limited space. Audio panel features include 3 transceiver inputs, 5 receiver inputs, and 2 unswitched inputs. The intercom provides 6 positions, 3 volume controls, 2 VOX level controls, 6 VOX circuits, and 2 stereo music inputs. This unit features 3 stereo headphone outputs and 2 speaker outputs, and the marker beacon receiver features input impedance of 50 ohms. Size: 6.8" d x 6.29" w x 1.3" h. Power req.: 11-33 VDC

The Garmin GMA 340 an GMA 240 can only be sold over the counter with the harness.

GARMIN GMA 347 AUDIO PANEL

The GMA 347 audio panel builds upon the successful attributes of the GMA 340 while adding benefits such as automatic squelch, digital clearance recorder, and a full-duplex telephone interface. Automatic squelch option makes the entire audio experience quieter and clearer. Can also retain the manual squelch adjustment feature. Three more unmuted, unswitched inputs with individual volume control. Automatic digital clearance recorder. Continuously captures the last two and one half minutes of audio switched through the panel. Can replay the necessary information by simply pressing the "play" button. It has a full-duplex telephone interface with intercom isolation and disable capability. This feature allows private telephone calls by the pilot or copilot, or multi-party calls with crew and/or passengers. Integration of the G1000's "configuration module". If the audio panel is ever removed, all of the pilot's preferred settings are automatically loaded into the unit.

AV

SILVER CROWN KX 165 NAV/COM

Solid state, 760 frequency COMM transceiver, 200-channel NAV receiver, 40 channel glidescope receiver and built-in VOR converter, 10W, 14V. Simultaneous, digital, gas-discharge display of active and standby NAV & COMM frequencies or select digital display of radial from the VOR or VORTAC in lieu of standby NAV frequency. Push button frequency flip-flop. Meets DO-156 frequency selectivity requirements.

14V.....P/N 11-03399.....
28V.....P/N 11-00199.....

SILVER CROWN KX-165A NAV/COM SYSTEM

Large, self-dimming, microprocessor-controlled gas discharge readouts and solid-state electronic tuning provide fast, accurate selection of all 200 Nav & 760 Comm frequencies. On the COMM side, the KX165 system gives you 10W minimum transmitter power for maximum range and clarity. And on the NAV side, the KX165's useful 'Radial' feature offers you an instant readout of the radial you're on (from the 'active' VORTAC station), digitally displayed in the 'standby' NAV frequency window. The KX-165A is TSO'd and offers 32 channels of com frequency memory, an additional CDI mode. The GPS "Quick Tune" feature allows the pilot to select and remotely tune the standby com & nav freq. from the KLN94 GPS 28V ..P/N 11-00644.....

SILVER CROWN KX-155 / 155A NAV/COM

The KX155A gives you access to all 200 NAV and 760 COMM frequencies, along with its optional 40-channel glidescope. In addition to its standard use – offering both active and standby navigation and communications frequencies – the KX 155A incorporates a number of new control features. Program up to 32 COMM channels. Pre-selected frequencies are stored in a non-volatile memory circuit, eliminating the need for backup battery power. Other new features include a bearing-to-station mode and a radial-from-station mode. An internal Course Deviation Indicator (CDI) has been included for such times as when the external CDI is being driven by your GPS receiver, and the system now includes a handy elapsed-time and approach timer. On the COMM side, the KX 155A system gives you 10W minimum transmitter power.

CROWN KX-125 DIGITAL NAV/COM

The KX-125 is ideal as a replacement radio, a primary system for homebuilts or a very affordable back-up. Despite its low price, it comes with a complete list of features. For example, its COMM

section provides 760 frequencies, 'flip-flop' frequency selection, a built-in audio amplifier with sidetone and audio leveling, direct tuning, stuck-microphone alert, and even remote transfer of both COMM and NAV frequencies. Its separate NAV section offers 200 frequencies, including localizer.

CROWN KY 96A & KY 97A COM

With the anticipation of additional frequency allocations, Bendix/King has designed the KY 96A and KY 97A to operate

on 760 frequencies from 118.00 MHz to 136.975 MHz. You can switch between active and standby frequencies. Simply tune the desired frequency into the standby window ("STBY") while monitoring the "USE" channel-when the time is right, simply push the frequency transfer button to transfer the standby frequency into the active window. A remote switch may be installed as an additional means of providing the "flip-flop" function. Up to nine channels can be easily programmed by the pilot into the memory of the KY 96A or KY 97A. The KY 96A & KY 97A remember displayed frequencies and stored frequencies without batteries or external hookup during power shutdown or in the event of a power interruption and have an easy-to-read, illuminated LCD display.

CROWN SERIES KT-76A MODE C TRANSPONDER

The KT76A is a panelmount, class 1-A transponder and provides maximum performance at any altitude up to 35,000 ft. A compact unit with Large Scale Integrated (LSI) circuitry, reducing both weight and power requirements. All Mode A & Mode C transponders perform the same functions: replying to radar interrogations, providing Air Traffic Control (ATC) with positive identification, and showing your ground speed on the Controller's radar monitor. If you have an encoding altimeter or blind encoder, the transponder will transmit your altitude as well.

KT76A 06 14V With Harness.....P/N 11-02436.....
28V Dropping Resistor.....P/N 11-00913.....

KING SILVER CROWN KT-76C MODE C TRANSPONDER

The KT-76C is the finest panel-mounted Mode A/C transponder to allow for sequential push-button squawk code entry. To ease pilot workload, the push of a single button switches to a user-preset VFR code, such as 1200. Best of all, its bright microprocessor-driven gas plasma display is easily read in all light levels. The new unit features a bright, gas plasma display that shows the selected transponder code and, in a new feature, the encoder altitude output. The KT 76C will fit directly into the existing location of a KT 76A. However, in 28V installations the existing dropping resistor must be bypassed. Unit operates from 11-33VDC. Available with or without antenna.

SILVER CROWN KY 196A & KY 197A COM

This unit measures a trim 1.3" x 6.3" and weighs just 2.8 lbs. The 28V KY196A delivers 16W minimum

transmit output power and the 14V KY197A delivers 10W minimum transmit output power. Both units incorporate solid-state construction, with a digital frequency synthesizer generating all COMM frequencies. Despite their wide range of capabilities, the KY 196A and KY 197A were designed to be easy to read and logical to operate. For example, the active frequency is clearly distinguishable from the standby, with both displayed in separate, dedicated windows. Total frequency storage capacity is eleven, including those in "USE" and "STBY". The 118.00MHz to 136.975MHz range of the KY-196A & KY-197A provide 760 COMM frequencies. An audio leveling feature automatically amplifies weak audio signals and mutes strong signals.

HONEYWELL AVIONICS

CROWN KLX 135 GPS/COM

With unmatched GPS accuracy, 'Direct-To' operation, built-in CDI output and a host of other pilot-friendly features, the King KLX-135 provides the navigation capability you'd expect from the leader in panel-mounted avionics. Key features include storage capacity for up to 250 user-defined waypoints and as many as ten flight plans of up to 20 waypoints each; an OBS mode for flying specific radials/bearings; and supplemental calculations for estimated distance, bearing, time & fuel. KLX-135A includes a moving map display of flight plan waypoints, nav aids, and special use airspace, in addition to an enhanced high contrast LCD display for easy readability.

CROWN KMD 150 COLOR MULTI-FUNCTION DISPLAY GPS

With its big, 5" diagonal screen, the KMD 150 offers broad coverage to make flying easier. Combining aeronautical and cartographic mapping with GPS navigation information, it also provides a range of additional display capabilities, from airports, NDBs, intersections, VORs, special-use airspace, rivers, roads, lakes, cities, railroad tracks and towers, to WX-500 Stormscope® data. Built-in GPS receiver for total situational awareness. Packed with powerful features, the KMD 150 includes a customizable aeronautical database, along with a comprehensive "roads and rivers" cartographic package. A wide viewing angle and pilot-friendly operation system make it easy to use.

SILVER CROWN KMD 250

The KMD 250 is intended for piston singles. The MFD offers most of the advantages of the KMD550 and 850 displays but without the radar and terrain awareness and warning system (TAWS) interfaces, systems the vast majority of singles don't need. KMD 250 is slightly smaller than the 550 or the 850. With a 3.8" diagonal display, compared with the 5" screen of the KMD 550, the size difference is slight. The 250 measures 3" high, compared to 4" for the 550. The software and remaining capabilities on the KMD 250 are nearly identical to those on the KMD 550, so pilots familiar with one of Honeywell's other MFDs will have an easy time transitioning to the new hardware. TSO Certified.

CROWN KLN 35A GPS

The KLN 35A is a standalone GPS identical to the KLX 135A except without the COMM transceiver. The KLN 35A provides accurate satellite navigation capability with moving map displays for increased situational awareness. It features Jeppesen NavData for data base updates via 3.5" diskette. The moving map display shows flight plan waypoints, nav aids, and special use airspace, and the KLN35A has enhanced, high contrast LCD display for optimum readability. The KLN 35A is an outstanding GPS value with the Bendix/King reputation for quality avionics products.

|------------------------------------|--------------|

CROWN KR 22 AUDIO PANEL

The Bendix/King KR 22 Marker Beacon Receiver is a fully independent panel-mounted unit with its own audio output and self-test feature. The unit is all solid-state, and its compact size makes

it an easy fit in virtually any panel. A crystal-controlled superheterodyne receiver and 3-light presentation ensures that the KR 22 will give precise visual and aural indications of marker beacon passage. Excellent receiver selectivity eliminates interference. Headphone audio is provided, or if speaker output is desired, the KR 22 may be interfaced with the KA 134 or other audio control panel.

KING KI208A-10 VOR/LOC INDICATOR

The KI 208A VOR/LOC Indicator with VOR/LOC Converter and GPS Switching Relays has internal lighting. Internal relays allows from switching between VHF Nav and GPS. It is used with the KX 155 or KX 155A and KLN 89, KLN 89V, or KLN 94. Specifications: * Weight: 1.00 lbs. (0.45 kg) * Width: 3.25 in. (8.26 cm) * Power Required: 14/28 VDC @ 60 mA max. * Height: 3.25 in. (8.26 cm) * Length: 8.00 in. (20.32 cm) * Lighting Power: 14/28 VDC P/N 11-07599.....

NARCO MK 12D+ NAV/COM

The MK 12D features a powerful 760 channel communications transceiver which delivers crystal-clear audio with automatic leveling on both transmitter and receiver. It also contains a 200 channel (VOR) NAV which is compatible with HSI's, RNAV systems VOR RMI's and the companion ID 824 or ID 825 indicators. The MK 12D is 100% solid-state microprocessor controlled and fully TSO'd. It offers simultaneous display of active and standby frequencies and "flip-flop" transfer of both. All readouts are digital and the unit is compact, low-profile and self-contained. Size: 6-1/4"W x 2-1/2"H x 11"D. Wt. 5 lbs. Specify 14V or 28V. We have taken the most popular name in NAV/COM's, the MK-12D, and added features that are most often requested by our customers. These features include: Ten Channel COMM Frequency Memory Storage, Non-Volatile Frequency Memory (No keep-Alive wire req.), Digital Radial "FROM" Readout on NAV, Available in Either 28 or 14 VDC Models, COMM Freq. Entry into Active or Standby, VOR Centering Adjustable without Removing Faceplate

MK 12D/R NAV/COM REPLACEMENT

The MARK 12D/R was developed in order to provide pilots with a very cost effective way to update their avionics, to state-of-the art capability and performance. And meet new FCC/FAA requirements without incurring the high cost of a complete installation re-do! The MARK 12D/R Directly Replaces the MARK 12, MARK 12A & MARK 12B, utilizing the existing indicator. Features: • Direct Replace Capability • 760, COM Channels and 200 NAV Channels • TSO'd Microprocessor Design • Simultaneous display of active and standby frequencies • Glideslope and DME Channeling • Flip-Flop Display Transfer • Self-Contained 10 watt audio amplifier • Automatic audio leveling • Unique "Keep-Alive" option available 14 Volt P/N MK12DR-14.....

MK 12D NAV/COM CESSNA REPLACEMENT

Directly replaces the NAV/COM 300 series (RT 308 through RT 328C) radios. 100% solid state and TSO's, this unit provides simultaneous display of active and standby frequencies, flip-flop capability, automatic dimming, and digital readouts. 760 channel COM transceiver and 200 channel (VOR) NAV receiver. Easy to install and service and self-contained. P/N 11-16410.....

NARCO AVIONICS - TKM AVIONICS

NARCO NAV 122D/GPS

Narco has re-introduced the NAV 122, in the form of the totally new, surface mount designed NAV122D & NAV122D/GPS. The NAV 122D, is a totally self-contained 200-channel, VOR NAV receiver, 40-channel glideslope receiver, VOR, localizer/glideslope indicator and All packaged to fit into a 3.0" instrument hole. The NAV122D, is completely redesigned utilizing "Surface Mount Technology" and will directly replace, pin for pin (hole for hole), the original NAV122 Series back through the early NAV12. (NAV12 replacement will require an interconnect cable). The NAV 122D/GPS is the same as the NAV 122D except it will include a resolver, thus having the additional capability of being utilized as the required "Left/Right Indicator", in IFR approved GPS or multi-sensor systems installations. Power: 14VDC.

NARCO AT 165 MODE C TRANSPONDERS

The AT165/R is a transponder offered to replace the NARCO AT50, AT50A, AT150 & AT155 transponders in an existing installation utilizing the already installed tray, cables and antenna. The Narco AT165/R transponder has a high power (250 watt) transmitter featuring 4096-code capability and reliable TOTALLY solid state design. An innovative backup display, one touch VFR, easy-grip data entry knob, and altitude hold alert are just a few of the special features found in the AT165. It is compatible with leading encoding altimeters and altitude encoders including the Narco AR850 altitude encoder. This unit meets the FAA's tough C74c class 1A TSO for ATC transponders (MODE C). AT165/R Series Transponders have dual displays (active and standby) AT165R VS (value series) transponders have single displays.

MX 170C NAV/COM

An ideal Nav/Com unit to replace King KX 170 & 175 series Nav/Coms. 14VDC. Features active & standby display w/flip-flop capability, plus storage capability in Nav and Com.

P/N 11-18830

MX 300 NAV/COM

The MX 300 Nav/Comm is designed to replace the RT 328T, RT 308C, RT 328T, RT 328A, RT 528A, RT 328C, RT 528E, RT 328D, and RT 508A. The MX 300 is available in the black face plate shown above or in a beige face plate to match many Cessna panels. The MX 300 operates on 13.75 vdc with 7 Adc maximum current in transmit.

With Black Face Cover..... P/N 11-18835

With Tan Face Cover P/N 11-04825

MX 385 NAV/COM

MX 385 is a direct replacement for RT385 & RT485 series Nav/Com units. Features active & standby displays w/flip-flop capability plus storage in Nav & Com.; 28VDC.

P/N 11-18845

Note: All Michel radios are furnished standard with black face. Tan face for Cessna panels are available at same prices on special order.

NC 2210A NAV/COM RAMP TESTER

The NC 2210 Tester is optimized for ramp testing of navigation and communication equipment. The unit provides test signals for marker beacon, communication, localizer, glide slope, and VOR. Also included, is a wide band comm receiver to permit evaluation of comm transmitter AM fidelity. The TKM NC 2210 is a NAV-COMM Ramp Tester. The unit has improvements over the 2200, which it replaces. The improvements include the following: Higher •RF power • Precise localizer and glide slope deflection • Calibrated VOR bearings at 10 degree increments • Crystal controlled modulation frequencies • Longer battery life • Internal antenna with adjustable length • Smaller size. Specifications: •Size: 3.8 x 7.4 x 2.3" •Weight: 1.3 lbs. •Power: Internal battery with over 2 hours running time (110VAC charger included) •Warranty: 2-year from date of purchase. P/N 11-01813

MC 60 NAV CONVERTER

The TKM MC 60 is designed to provide a display for a variety of Nav signals including ILS, LOC, Back course, LOC, GS, GPS, and MB. The VOR display includes a Left and Right bar graph with an OBS and a tracking mode with reciprocal selection. When a GPS is selected by grounding the enableline, GPS is displayed in the OBS window and VOR and LOC functions are disabled. When the GPS is not enabled the VOR/LOC selection is made by the ILS enable line from the associated Nav receiver. Back Course selection is made by grounding the back course enable line. The digital display includes OBS, bearing, LOC, BAC, and GPS. The bar graph display contains 10 dots for Left, Right, Up, and Down. The center dot is used to indicate valid signals for LOC, VOR, or GPS. A Glide Slope light indicates a valid Glide Slope signal. P/N 11-04594.....

TKM MG200 GLIDESLOPE RECEIVER

At last, it is back! The MG-200 Glide Slope Receiver, a marvel of avionics engineering from TKM. Measuring only 3 inches wide by 6 inches long by 1 inch high, this 40 channel, totally solid state receiver is capable of handling your Nav/Com needs.

Using standard 25 DB connectors, it is easy to wire and install. Just wire the connector, plug it in, mount the receiver with four fasteners and run the wires to the receiver. That is it except the paperwork!

P/N 11-06868

ICOM RADIOS – TRANSCEIVERS

ICOM A210 COMM TRANSCEIVER

Innovative airband that's easier to install and see in more places
Large, bright OLED display - A fixed mount VHF airband first! The IC-A210 has an organic light emitting diode (OLED) display. The OLED display emits light by itself and the display offers many advantages in brightness, vividness, high contrast, wide viewing angle and response time compared to a conventional display. In addition, the auto dimmer function adjusts the display for optimum brightness at day or night.

Easy channel selection - It's fast and easy to select any of memory channels in the IC-A210. The "flip-flop" arrow button switches between main and stand-by channels. The dualwatch function allows you to monitor two channels simultaneously. In addition, the auto stack memory stores the last 10 channels used and allows you to recall those channels easily.

GPS memory function - When connected to an external GPS receiver equipped with an airport frequency database, the frequency data such as nearby airports can be transferred and made available in the IC-A210.

Features:

- TSO version planned (Pending as of July 2007)
- 10 regular memory channels with a 6-channel name
- 200 group memory channels (20 Ch x 10 banks) with a channel tag
- NOAA weather channel receive (USA version only)
- One touch access to 121.5MHz emergency frequency
- Side tone function for monitoring your voice with headset
- ANL (Automatic noise limiter) function reduces pulse type noise
- Remote control capability
- Time-out-timer
- VFO scan
- PC programming capability
- Dial lock and panel lock
- Squelch test function

ICOM PS-80 BASE STATION POWER SUPPLY

The PS-80 offers quick, easy installation of the IC-A210 in one compact desk-top unit that combines a power supply, speaker, microphone, headphone and antenna connectors.

Power Supply is user selectable for 110 or 220/240 V AC operation and supports a full 7 Watt transmitter output. Large internal speaker booms out 5 watts of audio. Microphone, headphone and antenna connectors are standard in the PS-80 so no wiring is necessary. Just plug in your selected hand or desktop microphone or headphone and outside antenna and you're on the air. Optional SM-6 Desktop Microphone, HM-7 or MIC Hand Microphone and B-ANT Base Station Antenna to complete the package are available and sold separately.

Specifications: * Input voltage: * 117 V AC +/- 10%, * 220 V AC +/- 10%, or * 240 V AC +/- 10% (selectable) * Output voltage: 13.8 V DC +/- 5% (negative ground) * Output current: 6 A * Duty rate: 1 hour for maximum current * Ripple voltage: Less than 20 mV rms * Useable Temperature Range: -10°C to +40°C; +14°F to +104°F * Dimensions (projections not included): 200(W) x 200(H) x 300(D) mm; 7.9(W) x 7.9(H) x 11.8(D) in * Weight: 6.0 kg; 13.2 lb

IC A110 VHF AIR BAND TRANSCEIVER (COMM ONLY)

The Icom IC A110 is rugged and reliable for serious ground crew communications. The IC-A110 can be installed in any vehicle and is adaptable to vehicles working on 12V or 24V power sources. The unit features a front mounted speaker, free from any obstacle blocking and puts out 10W of power for the external speaker. Dial select frequencies or memory channels. A total of 99 memory channels are available (requires CSA110 v2 software to be programmed). Up to 7-character names can be assigned to each channel.

Features:

- Equipped EEPROM system provides maintenance free memory backup capability, without the use of a separate backup battery
- Various scan functions, such as VFO and priority scans are available
- Limited number of keys for simple manipulation, but providing advanced multi-functions
- A total of 20 memory channels are available
- Ideal compact size of 150(W)x50(H)x180(D)mm to mount in various type of vehicles
- 36 W (pep) of powerful output
- Excellent durability to cope with even the toughest workplace
- Memory channel only operation possible via PC programming
- Hand Microphone supplied

Specifications:

- Dimensions: 150(W)x 50(H) X 180(D) mm
- Weight: 1.5kg; 3lb. 5 oz.
- Mode: 6K00A3E (AM)
- No. of memory CH: 20
- Antenna Connector: SO-239
- Power supply requirement: 13.75 VDC
- Current drain: Transmitting: 5.0 A max, Receiving: 4.0 A
- Operating temperature range: IC-A110(-30° C to +60° C); IC-A110EURO(-20° C to +55° C)
- Frequency stability: IC-A110 (5 ppm)

FLIGHTLINE FL 760 TRANSCEIVER

Introducing the FlightLine FL 760 - one of the smallest and lightest VHF Transceivers in the industry.

Specifications

- Frequency range : 118.00 to 136.975MHz (Receive:108.00 to 136.975MHz)
- Channel spacing : 25kHz
- Mode : AM (6K00A3E)
- Number of memory channels : 32
- Acceptable power supply : 11.7 V or 33 VDC (Negative ground only)
- Usable temp. range : -20 to +60
- Frequency stability : +/- 5ppm
- Current drain : TX: 3A(max) RX 0.8A(max) Standby: 300mA
- Dimensions : W61 X D159 X H61 (mm)
- Weight : 430g/14.11oz
- Exposed dial face : 56.4mm 2 1/4.5 inches
- Certification: Not TSO
- Output power : 5 W (carrier), 16W (pep)
- Modulation : small stage modulation
- Modulation limiting : 70 to 100%
- Audio harmonics distortion : Less than 15% (at 85% modulation)
- Hum and noise ratio : More than 40dB
- Spurious emissions : -16dBm or less
- Antenna impedance : 50
- Receive system : Double conversion superheterodyne
- Intermediate frequency : 1st : 38.85MHz (Upper) 2nd : 450kHz (Lower)
- Sensitivity (at 6dB S/N) : Less than 1uV
- Squelch sensitivity : 0.5uV (Threshold)
- Selectivity : More than 8kHz (at 6dB), Less than 25kHz (at 60dB)
- Spurious response rejection : More than 60dB
- Audio output power : More than 4W (at 4)
- Side tone : More than 100mW (at 600)
- Hum and noise : More than 30dB
- Audio output impedance : Ext. SP 4 (4 to 8), Side tone 600
- 2-1/4" panel mount

P/N 11-06307.....

USED AVIONICS FROM AIRCRAFT SPRUCE

Virtually all these avionics are in "Serviceable" condition. This is an FAA term that means that the radios have been repaired as needed, tested according to the manufacturer's procedure, and meet the manufacturer's performance specifications. These radios are legally approved for installation and use. These radios come with either a Yellow Tag or a 8130-3 Serviceable tag. Both tags certify that the radio is in "Serviceable" condition. The difference is the geographical area where the tag is accepted. The Yellow Tag is accepted in North America, while the 8130-3 tag is accepted worldwide. Generally 8130-3 tags are issued for our radios, because we rarely know exactly where it will be sent when it is in the shop. With an 8130-3 tag, we know that it can be used by any of our customers. Serviceable units carry a 90 day warranty. All used avionics are subject to availability, and will be shipped with the tray and connector included. Prices can vary. Please specify 14V or 28V when ordering.

CDIS - RELAY ASSEMBLIES

MID-CONTINENT 2 INCH CDI

This indicator will fit the need of aircraft owners of LSA all the way up to business aircraft. The CDI allows for precise and accurate readings. Nav, GPS and VLOC annunciation aer built-in and backlit by LED lighting, providing enhanced nighttime and sunlight readability. The CDI has TSO approval from the FAA and will interface with most nav and GPS receivers.

Features:

- Compact 2-1/4 inch size saves panel space
- Innovative Safety Feature – pointers move out of view with invalid signal
- Precision replacement for older navigation indicators
- Rectilinear meter movements allow for more accurate readings.
- LED backlighting looks great and provides increased reliability.
- Built-in annunciations for NAV, GPS, and VLOC or BC.
- FAA TSO approved for use with most GPS and VOR systems
- Rugged construction includes ball bearings in critical areas.
- True course resolver output (1 volt, 30 Hz)
- Quality Mil-Spec connectors included
- One year limited warranty

Specifications:

- Power Input: Accepts 11 to 32 Volts DC.
- Lighting: Internal white LED. Lighting control voltage is selectable for 5, 14, or 28
- Weight: 0.6 lbs.
- Length: 3.5 inches

GARRECHT TRANSPONDER CLASS 1 AND CLASS 2

VT01
UltraCompact

The Garrecht Transponder VT-01 is a flexible and modular system concept, in a compact size (57mm) with a very low current and integral alticoder. Available as Class-1 (125 Watt) or Class-2 (71 Watt) System.

Specifications: Certification i.a.w: ETSO-2C112a, ED-73B

•Min. RF Output power @Antenne: Class 1: 125 Watt Class 2:71 Watt. •Integral alticoder: Yes • Weight control unit: 0,21 kg. •Weight main unit: 0,61 kg •Supply voltage: 9-32 V DC • Power consumption (operation) @ 13,8 V (1200 Mode A/C or 50 Mode-S replies): Class 1: 0,24 A Class 2:0,22 A • Power consumption (on Ground) @ 13,8V (Squitter active): Class 1: 0,17 A Class 2: 0,16 A • Power consumption (Standby) @ 13,8 V: 0,005 A •Interfaces: RS232 + CAN •OPERATIONAL LIMITS • Max. Altitude: Class 1: 40.000ft Class 2: 15.000 ft (4.572 m) • Max. TAS: Class 1: 250 kts (463 km/h) Class 2: 175 kts (324 km/h) • MTOW: Class 1: 5.700 kg Class 2: 5.700 kg

AMERI-KING REMOTE RELAY ASSEMBLIES

The Ameri-King AK-950R is a FAA TSO'd approved remote Relay Assembly. It is designed to provide Switching Function, for HSI / CKE Data Inputs, between NAV (VOR) Receiver and the approached certified GPS receiver. The Assembly consists of a 24 pole built-in relay to simplify installation of the Switching Function. All Relays have gold-plated contacts and are Nitrogen filled for high reliability. The AK-950R

consists of 2 sub-groups, A & B. Subgroup A includes 20 poles switching; A failure detection pole built in; and an ILS auto override (to reverse to NC (NAV) position upon ILS frequency is turned in). Subgroup B includes 2 poles switching. Each subgroup is controlled independently. Protection includes input power reverse polarity, power transient. All relay coils are protected against EMI and transient switching. Installation is extremely simple. All necessary hardware is provided, including mating connector w/machine crimped contacts.

REMOTE SWITCHING RELAY UNIT

Remote mounted 24-pole unit features eight Nitrogen-filled relays (3 poles per relay) with Gold-plated contacts

- Ideal for GPS/VOR transfer and audio switching applications
- Relays are activated individually by voltage or ground keying or as a group by ground keying
- FAA PMA Approved (certified to 55,000 ft.) Versatile Mounting - Horizontal, Vertical or flat mount configurations
- Fail-safe fault monitoring through interlocking of all internal relays
- Adjustable dimmer output for external annunciations
- Quality MIL-SPEC connector kit included
- Specifications: Width: 2.86"
- Height: 1.52", Depth: 2.6"
- Weight: .75lbs

AVMASTER RELAY 14VOLT & 28VOLT

The AvMaster Relay is the first and only self contained, fail-safe, avionics master relay package to protect expensive radio gear at an affordable price. The AvMaster Relay is installed between the power bus and the protected radios. The Avionics Master Switch then controls the AvMaster Relay only and not the radios directly. Not only does the AvMaster Relay protect the system from transient electrical

spikes during normal operations, its four parallel relay controlled, surge protected circuits allow for individual fusing that separate all radios from each other.

The avionics master switch is a great idea. It protects against the large power surge potential during start up and shut down. It's also useful to prevent premature wear of each radio's switches and allow the benefit of maintaining the volume settings. But, it has a major weakness. An Avionics Master Switch becomes a potential single point of failure. If it fails, ALL radios shut down! A second Avionics Master Switch has been used as the solution to this problem. However, this offers no spike protection while on and it still connects all radios together. An overload in one radio can potentially spill over to the whole avionics circuit and take them all out.

The fail-safe design of the AvMaster Relay eliminates the need for a backup Avionics Master Switch. If the Avionics Master Switch ever fails, the pilot won't even realize it until after the flight is over and the Avionics Master Switch doesn't shut down the radio stack. The radios will just be controlled individually until the problem is resolved.

The AvMaster Relay will pay for itself with fewer repairs over the increased lifetime of the avionics stack.

14 Volt P/N 11-04857
 28 Volt P/N 11-04858

AN-21 ANNUNCIATOR CONTROL UNIT

The AN-21 is a light and warning tone generator for use in experimental aircraft. A total of twenty-one circuits can be monitored, sixteen channels are activated by ground and five by positive input.

Each channel activates a light and emits a warning tone when triggered. The AN-21 also includes a

Windows Programming Utility to enable the user to configure it for each specific installation. Each channel, when activated, has an associated user programmable output which can be programmed to do the following: Steady light, Flashing light, Alert Tone with steady or flashing light.

Features: "Master Caution" - User selected channels can trigger a Master Caution Annunciator •Test Function - Causes all lamps to illuminate to check the bulbs •Dim - Causes all Lamps to illuminate a selected lower brightness for night operation. P/N 11-04701

TED 4-70 GPS NOTCH FILTER

Your global positioning system receives its positional information at 1575.42 MHz. The communications radios on-board your aircraft typically broadcast in the 121.5 MHz range. That is a wide separation in frequency bandwidth but it's not the complete picture. Your comm's are also producing harmonics which can produce significant noise at the GPS frequency. Now you can filter that signal and avoid potentially hazardous situations.

A simple low cost way to clean up the receivers frequency environment. The TED 4-70 notch filter installs quickly and easily via standard BNC bayonet couplings, in-line between radios and antenna. The 4-70 rejects in excess of 50dB of 1575.42 signal at the source. Each filter is individually tuned and checked to assure maximum performance. Of course, the 4-70 also passes strenuous environmental criteria so important in aircraft applications. Major GPS manufacturers recognize this problem & recommend using the 4-70 on new and retrofit installation.

P/N 11-02204

AVONICS COOLING FANS - SCREEN PROTECTORS

TROLL AVIONICS COOLING FANS

THE ICE BOX - Avionics cooling fan is designed to mount remotely and cool up to 3 radios. It is shielded and filtered and uses standard 5/8" CAT type hose to direct air from 3 outlet ports. Thickness of the unit is only 1.4", and it operates on 14 or 28 volts. Ice Box offers a thin profile, flexible mounting, and very quiet operation. 2 yr warranty.

12V P/N 11-18350
28V P/N 11-18360

SUPER ICE BOX - Same as above except w/5 outlet ports instead of three, to cool 2 extra radios. 12V P/N 11-18365

AMERI-KING AVIONICS COOLING FANS

The Ameri-king AK-950F is part of a FAA TSO'd approved kit. GPS/Avionics fan is compact and delivers up to 26.6 CFM cubic feet per minute of forced air cooling to a variety of avionics equipment. It features ball bearing for highest reliability and long lasting. The AK-950F fan may be behind or beneath aircraft instrument panel or avionics equipment rack or cabin pressure bulkhead. The small, one port direct mounting fans (F1d) are for internal cooling and there is a second port for external cooling. No remote hose is required.

Features Include: power reverse polarity protection; compact size; choices of 1, 2, 3, or 5 hose outputs; universal mounting; hoses; connector kit and hardware (included). 4-year extended warranty. Size for 1-3 ports: L- 5.75" W- 5.130" H- 2.080". 5 ports: L- 6.75" W- 5.130" H- 2.080". Small F1d port: L- 2.60" W- 2.5" H- 2.5". Power 14 or 28 VDC.

AMERI-KING AK950-FTR RFI DC LINE FILTER

The AK950-FTR RFI DC line filter is the only TSO approved RFI filter available. The AK950-FTR was designed to replace all Hisonic RFI filters. It replaces Hisonic RFI-40, RFI-70, and RFI-100 filters. Works on 40-100 amp operation, working voltage is 30VDC. FTR1 designed to reduce noise from alternator or generator.

AK950-FTR1 P/N 11-00183

SANDIA ACF 314 (3 PORT FAN)

The ACF 314 and ACF 328 simultaneously cool up to three avionics units. Operating on 14Vdc and 28 Vdc respectively the ACF 314 and ACF 328 supply up to 20 cubic feet of cooling air per minute, helping maintain your avionics at a proper operating temperature. SANDIA Aerospace cooling fans use high quality, brushless blower motors and or Run-Quietm technology. These units are FAA PMA's and have passed stringent environmental testing to ensure years of reliable service. **Specifications:** • Operating Voltage: 14Vdc • Current Draw: 960mA (1.7A at startup) • Size: 5.18" x 5.18" x 2.1" • Weight: 1.18 lbs. P/N 11-06345

P/N 11-06345

CYCLONE 600 - 6 PORT AVIONICS COOLING FAN

The Cyclone-600 is a light weight, highly reliable brushless DC avionics blower that delivers 45-50 CFM of forced air to onboard aircraft electronics. The universal mounting system mounts vertical, horizontally or at 45 degrees for straight forward installations for all aircraft make and models.

Features

- * New DC Brushless Motor with FAA/PMA Approval.
- * High Performance 626ZZ Bearing for Extended Life.
- * High Impact Phenolic Housing.
- * Laser Balanced Impeller wheel.
- * Universal Front Plate (4,5,6, Ports).
- * Cable Harness (36"), included.

Benefits

- * Over Current Protection
- * Locked Rotor Protected
- * Reverse Polarity Protected
- * FAA/PMA Approved
- * DO160 D Tested
- * Low Noise

Specifications

- * Voltages: 12-14 VDC 600mA; 24-48 VDC 500mA
- * CFM: 45/50 CFM at 6000 RPM
- * Dimensions: 4.5in (H) x 3.0in (W) x 6.25in (L)

LONE STAR 12/24 VDC BLOWER KIT

Lone Star Aviation's new 1 port blower is the smallest (1 x 2 x 2), most efficient (brushless dc motor), and the most versatile avionics cooling fan in our industry today.

This New blower's universal mounting bracket makes it easy to set-up and install on a verity of aircraft Install immediately on experimental, sport and soon on general

aviation, business, rotor-craft, commercial class aircraft as well as Land-Mobile, Marine and Military Vehicles.

Specifications

- * Light Weight: 52 grams, 0.115 lbs
- * Enclosure: Aluminum, (powder coated)
- * Vdc, amperage: 12 = 10.2-15.8Vdc, 0.320ma
- * Vdc, amperage: 24 = 18.2-28.5Vdc, 0.300ma
- * 1 port = 5/8 inch x 1.0
- * Max Static pressure: H2O = 0.64
- * Max Air Flow: 6.7 CFM
- * Universal Mounting Bracket: (4)(mt)(h)
- * Operating Temp: -55C to +70C
- * FAA-PMA (pending), 6-30-08
- * Ultra-Small Size: 2.0H x 1.00W x 2.0L
- * Easy Installation: (4 x 6-32)
- * 1 year Limited Warranty

NAVIGATION SCREEN PROTECTORS

The Pre-cut navigation screen protectors provide excellent protection from scratches. The anti-glare layer reduces unwanted reflections, increasing contrast, clarity, and viewing comfort even with the use of polarized lenses. This film is thick enough to protect the screen, yet thin enough to have no effect on touch screen sensitivity. Light tack adhesion provides for residue-free removal. Does not require special cleaners. Available for: ADR, Anywhere Map, Avidyne, Apollo, Chelton, Eclipse Avio, Garmin, King, Vista Nav, and more.

AV

XCOM TRANSCEIVERS

XCOM VHF TRANSCIVER

Designed from the ground up the XCOM offers superior performance under the demanding and noisy conditions experienced in many amateur built aircraft. With low power consumption this radio is ideally suited to use in gliders, homebuilts, and ultralights. A full 6-Watt carrier and 20 Watt PEP output ensure that you will be heard above the general chatter in a busy airspace and the VOX intercom system with music input will enhance your enjoyment of the flight. With expanded receive range from 108 MHz, the XCOM760 provides NOAA Weather reception ensuring that you are always aware of impending weather conditions. The XCOM 760 will also operate down to a 108 MHz so you can receive the VOR channels. Additional safety enhancements such as dual watch allows the pilot to listen to the standby frequency while still monitoring the primary frequency. The XCOM 760 also has 99 memory channels, large volume and channel selector knobs and well spaced buttons. This radio is extremely easy to operate even when wearing flight gloves and you can even check the condition of your battery with the built in voltage monitor. Software update capability and Internet downloads mean that you are always provided with the latest features. The XCOM 760 offers superior quality, enhanced features and improved performance over many of the more expensive airband radios, without the high cost found in other brands. FEATURES: • New easier to read LCD screen • Several software updates • Memory scanning of up to 99 memory channels • Streamlined software increasing reliability and performance • Music/Second comm input is now user selectable for another VHF, UHF or Music input • Added sidetone volume adjustment • Improved AGC controls for close and powerful stations • Improved speaker output for glider operations P/N 11-02206.....

XCOM INSTRUCTIONAL DVD WIN XP

Instructional DVD explaining the complete operation and set-up of the XCOM VHF Transceiver. 30 minutes duration. P/N 11-05674.....

XCOM UNIVERSAL STAINLESS STEEL MOUNTING BRACKETS

Designed for the XCOM VHF aircraft transceiver but equally suitable for any other radio or instrument with the same 2 1/4 inch mounting hole. Can also be used in the Marine or automotive environment.

Manufactured from 2 mm thick 304-2B grade stainless steel for strength and corrosive resistance. Two 6.5 mm holes are provided for conveniently mounting switches such as the intercom ON/OFF/Isolate and the backlight switch. Blanking plugs are factory fitted to maintain the appearance if the holes are not used.

Can be installed in any orientation e.g. left, right, top or bottom; switches can be mounted horizontally or vertically. Supplied complete with stainless steel screws, washers and nyloc nuts for a secure installation, supplied with earthing strap fitted to the bracket for connection to the radio earth with a quick connect earthing point provided for bonding to the aircraft ground. P/N 11-05678.....

XCOM DUAL ALUMINUM BRACKET

This water jet cut bracket is ideal for mounting two XCOM's side-by-side in a normal aircraft rackmount system. Cut to the exact size required it will save you time and trouble in fitting a dual XCOM system to your aircraft. Comes mill finish in 2 mm aluminium ready for painting. P/N 11-05679.....

XCOM GLIDER BOOM MICROPHONE

Boom Microphone - More than 1200 made and used all over the world, 3 year guarantee. P/N 11-05675.....

XCOM GLIDER SPEAKER

Glider Speaker - Clear sound and easy to understand 5 watts output 8 ohm. P/N 11-05676.....

XCOM REMOTE HEAD

The newest addition to the XCOM range is the XCOM VHF Remote Head option. Interfacing with the XCOM VHF, this tiny unit provides remote access to all of the capabilities of the XCOM VHF Radio in one quarter of the space. Ideal for training situations, tandem seat aircraft, limited space installations or simply to provide easy access for both pilot and co-pilot, this unit duplicates the entire XCOM VHF display and provides full access to all functions (except power on) from the front panel of the radio. The connection between the remote head and the XCOM VHF radio is via a simple cable allowing all of the controls on either panel to be duplicated on the remote. When the master unit is changed, the remote head follows and vice versa. For example, if the pilot in the front seat of the aircraft adjusts the radio to 123.450 then the remote display also adjusts to show 123.450. If the toggle button is pressed on the remote, then the frequencies are toggled on both units. All of the XCOM features apart from powering on can be duplicated with a remote head option. The remote head is extremely small, being less than 1 1/2" deep (40mm), allowing it to be installed in places where the XCOM will not fit such as in the very tight confines of the panel in the Pitts Special. P/N 11-04399.....

XCOM DELUXE KIT

The XCOM Deluxe package comes complete with XCOM VHF Transceiver, 2 place wiring harness for easy installation, electrolytic capacitor, Comant 121 TSO'd aerial and 2.5 meters double shielded coaxial cable and plugs. P/N 11-04491.....

XCOM POWERMATE REGULATOR

The Power Mate regulator is designed to provide a clean DC power source to charge a 12Volt battery when connected to a single phase alternator found on Rotax and Jabiru engines. The output voltage is electronically stabilised and preset to a maximum output voltage of 14.5 V. @ 8 Amps. The Power Mate has inbuilt overload protection and is supplied with a 15 amp fuse and mounting instructions. Used on hundreds of aircraft worldwide with fantastic results removing engine electrical noise. Short circuit proof, overheating and over voltage protected, water and vibration proof, extends battery life. P/N 11-05673.....

XCOM VOLTAGE CONVERTER 15-38V

Switch mode voltage converter with soft shutdown and intelligent control. Input Voltages 15 to 38 Volts, Output 13.2 Volts 7 amps. Compact, efficient, short circuit protected, reverse polarity protected, overload protected. Perfect for warbirds. Made in the UK. Lightweight 195 grams (6.8 oz), Mounting bracket supplied. P/N 11-05680.....

XCOM FLIGHTCELL 2GO PHONE ADAPTER

Flightcell 2Go connects your cellphone through to your headset with amplified sound for quality audio communications. Features: • Compatible with stereo and mono systems. • Portable & battery powered, works independently of aircraft systems. • Proven Flightcell technology as used by US Air Force. • Auto-on mode - plug and fly. • EMI immunity for GSM and Nextel (iDen) phones. • LED battery and talk/stand-by indicator. P/N 11-05677.....

XCOM STEREO VIDEO PATCH CABLE

Seamlessly connect a Stereo or Mono Video Camera, Tape Recorder or Digital Voice Recorder into your aircraft headsets and record all communications between the Pilot and Co-Pilot, ATC and other Aircraft. Perfect for making your own aviation videos with crystal clear narration, flight training or many other uses. P/N 11-05658.....

ENCODERS - CABIN SPEAKERS

ACK A-30 ALTITUDE ENCODER

Add Mode C capability to your aircraft the most cost-effective way. The ACK encoder is the smallest, lightest, highest quality encoder available today and features the latest solid-state electronics for high reliability. Installation is quick and easy and usually is completed in less than 1 hour. It is compatible with most transponders in use today and reports altitude to 30,750 ft. Includes quick-release mounting tray, 4-ft. color-coded wiring harness with prewired jack, static line and fittings for installation in any aircraft, and installation manual with popular transponder pin-outs. 1yr. warranty. P/N 11-01561

ACK A30.8 (MOD 8) ENCODER

The ACK A30.8 (Mod 8) encoder is ideal for use with most GPS and TAWS systems, and works well with most of today's mode S transponders. Feature Gray code in 100ft. increments and RS-232 in 10 or 100 feet increments. Furnished with a 4 ft. harness, pre-wired jack, quick release mounting tray, fittings, static line, and installation manual. Reports altitude to 42,000 ft. One Year Warranty. P/N 11-02375

AMERI-KING ALTITUDE ENCODERS

The Ameri-King AK-350 is the most advanced blind altitude reporter on the market, extremely accurate and reliable, the AK-350 is compatible with all transponders, is TSO-C88 approved, and reports altitude to 30,000 ft. Only 3.5"x 2"x 4.75" and weighs 0.4 lbs. Perfect for pressurized or non-pressurized installations and uses 14V or 28V power. Installation is very simple; all accessories and installation instructions are included. 3 year extended warranty. The AK-35, AK-40 and AK-50 encoders are designed for aircraft flying at altitudes higher than 30,000 ft.

| Model # | Max. Altitude | Part No. | Price |
|---------|---------------|----------|-------|
| AK-350 | 30,000 ft. | 11-12010 | . |
| AK-35 | 35,000 ft. | 11-12011 | . |
| AK-40 | 40,000 ft. | 11-12012 | . |
| AK-50 | 50,000 ft. | 11-12013 | . |
| AK-60 | 62,000 ft. | 11-01250 | . |

NARCO AR850 ALTITUDE ENCODER

15 Pin FEATURES: • Solid State Sensor Reports Altitude to 30,000 ft. • Meets or Exceeds FAA TSO C88 Requirements • Designed to be used in non-pressurized, temperature controlled environments • Can be installed behind or beneath your instrument panel • Operates independently of other altitude reporting equipment • Highly Compatible • Compact and Lightweight • "Blind" Encoder means removal will not ground the aircraft • Operates on 11 to 32 VDC with only minimal power drain • Available for 30,000 ft. • Size: 4.3"x1.74"x6.4"

TRANS-CAL ALTITUDE ENCODER MODEL SSD120-30N

42 months manufacture direct replacement. * Average MTBF: 9.7+ years. That's right: Trans-Cal encoders are among the most reliable on the market, commonly providing reliable service for over 10 years. * Pin for pin replacement for most other manufacturers encoders. * Comes with Mating Connectors with Cable Clamps, and Mounting Bracket. * Optional: Available with two independent RS232 serial data ports selectable message protocols for most popular avionics interfaces. Programmable for 100' and 10' resolutions. See Part No. 11-06983 * Optional: Available with adapter plates that will allow the installer to mount the unit in another manufacturer's mounting tray. Specifications: * Size: 2.5"W x 3.42"H x 1.38"L. * Operating temperature: -20°C to +70°C * Operating altitude: -1000' to +30,000'(Available in altitudes from 30,000' up to 100,000') * Accuracy: +50' from -1000' to +30,000' * Weight: 5.9 oz. * Will operate on either 14 or 28 VCD at 0.270 Amps. * No Warm-up time: +20°C to +70°C -20°C to +20°C 30 sec P/N 11-06489.....

TRANS-CAL ALTITUDE ENCODER MODEL SSD120-30N-RS232

Best Warranty in the business: 42 months manufacture direct replacement. If your Trans-Cal encoder experiences a warranty covered failure, we will replace your unit with a brand new unit with a new 42 month warranty. Average MTBF: 9.7+ years. That's right Trans-Cal encoders are among the most reliable on the market, commonly providing reliable service for over 10 years. Pin for pin replacement for most other manufacturers encoders. Optional: Available with adapter plates that will allow the installer to mount the unit in another manufacturer's mounting tray. Features: * Operating temperature: -20°C to +70°C * Operating altitude: -1000' to +30,000' * Accuracy: 50' from -1000' to +30,000' * Weight: * Will operate on either 14 or 28 VCD at 0.270 Amps. * +20°C to +70°C, -20°C to +20°C 30 seconds. P/N 11-06983.....

MICROAIR EC2002 ALTITUDE ENCODER

Microair Avionics is pleased to announce the EC2002 altitude encoder. The EC2002 will accurately report the aircraft's altitude from -1000 to +35,000ft. The altitude output will be via the 10 line Gillham "Gray" code. The EC2002's accuracy has been measured as a 40 foot drift over 35,000 feet. The EC2002 will have the lowest power requirements of any altitude encoder today. The EC2002 will have a typical current consumption of 10 - 90mA, this makes the

EC2002 the logical choice for all battery only operators. The EC2002's small size and light weight make installation very simple. The chassis is flanged, and is predrilled with mounting holes for easy attachment. The connections for the EC2002 consist of the well know DB-15 electrical connector with pin assignments identical to many existing encoders, and a 1/8" NPT fitting which is an industry standard for aircraft equipment. These connections make the EC2002 compatible with all ATC transponders currently available. P/N 11-05105

SANDIA SAE5-35 ALTITUDE ENCODER

The SAE5-35 altitude encoder from Sandia is small (1" high), lightweight (12 oz.) and utilizes Gillham Grey code in 100' resolution for optimum performance and accuracy. Features two RS232 outputs in 10 foot resolution, simplifying installations. All connectors are on the same side for easy mounting, and digital calibration eliminates analog drift. Altitude In-Flight Monitoring (AIM) mode alerts the pilot when he strays off altitude. Requires virtually no warm up time and uses very little power. Fully TSO'd and backed by factory 3 year warranty. Power: 11-33VDC. P/N 11-00665

Power: 11-33VDC. P/N 11-00665

ICARUS MODEL 3000U

The Icarus Model 3000U Altitude serializer connects to the existing Mode C encoder in the aircraft. It converts the gray-code into a decimal format and sends it to the GPS receiver using a serial connection. It will function with Trimble, Garmin 150, Northstar, and Apollo GPS receivers.

Features:

- Northstar has tested and approved the 3000U for use with its GPS receivers.
- Garmin has tested and approved the 3000U for use with its approach approved GPS receivers.
- Trimble Navigation has tested and approved the Model 3000U for use with its GPS aviation receivers.
- IIMorrow has tested and approved the Model 3000U for use with all of its GPS aviation receivers.
- Note: Please advise if transponder is a Narco AT-50 or 50A. or a Wilcox 1014.

Specifications:

- Weight: 5oz.
- Power requirements: 10 to 30 vdc at 20 ma. (must be fused)
- Size: 4.2" x 3" x 1"

P/N 11-04692

AIRCRAFT CABIN SPEAKERS

Engineered for 10,000 hrs. of performance, (minimum), these flame retardant speakers sound clearer and last longer. The magnet assemblies are heavier than original equipment, yet the overall speaker depth is only 2". The voice coils are heat-proof to withstand high power levels & the gaskets are treated with a moisture barrier, for unprecedented reliability.

MICROAIR – BECKER – APPROACH HUB

MICROAIR 760 COM REVISION P

Designed and manufactured in Australia, the Micro Air 760 VHF transceiver is ideal for aircraft requiring compact size and low power consumption. It has many of the features not found in radios costing much more and includes features not available in any other units. It's compatible with a variety of speaker & microphone combinations including all general aviation microphones. Standard model mounts in a standard 2-1/4" panel hole and weighs only 19.4 oz. It has been proven in high noise environments such as Rotax 2-stroke engines and is excellent for gliders, Ultralights, a general aviation aircraft. A unique LED multifunction annunciator located at the top right of the unit provides several alerts, and an external memory toggle switch allows remote control of the memory frequencies. Transmit output: 4W, Size: 2.56" x 2.44" x 7.779"d, 14V. Standard 2-1/4" model..... P/N 11-18700.....

MICROAIR T2000 TRANSPONDER

The Microair Avionics T2000SFL Transponder is a mode 3A/C aircraft transponder designed to operate in an ATCRBS environment. The T2000SFL has been designed to meet RTCA/DO-144 requirements, and has been tested to DO-160D for environmental and EMC requirements.

The T2000SFL software has been developed and approved under RTCA/DO 178B requirements. The T2000SFL is a small lightweight transponder with low power requirements. The T2000SFL is compatible with any C88a compliant altitude encoder, and offers the following features: * Mode 3 A response (4096 codes) * Mode C altitude response * SPI indent response * Encoder Altitude displayed * Altitude Alert (HI / LO) * Voltage alter (OV / UV) * Security coding of serial number * Option to power encoder only in mode C operation.

APPROACH SPORT HUB AVIONICS WIRING SYSTEMS

Simply install the appropriate Approach hub for your instrument panel (basic, VFR or IFR), select the appropriate Approach cables for your avionics, and plug it in and your done. Upgrading and replacing avionics only requires a new Approach cable and future

maintainability is greatly enhanced eliminating most hand writing and troubleshooting. All cabling is Milspec Tefzel and complies with FAA AC43-13B.

STEP 1: Select the appropriate Approach Hub for your instrument panel configuration.

Sport Life Hub for basic instrument panel configuration - The Sport Lite Hub Systems is an all-inclusive hub and cable solution enabling you to install a GPS/Com and intercom in record time and designed for pilots that don't require a full panel, just a single radio and intercom. Perfect for kit planes, sport-life planes, & aerobatic aircraft. P/N 11-01457.....

Sport Hub for VFR instrument panel configurations - The Sport Hub and Cable System is compatible with most NAV/GPS/Com (single & dual), modern audio panels, intercoms, moving map displays, VOR indicators and any other RS-232 formatted device. P/N 11-01458.....

Pro Hub for IFR instrument panel configurations - The Pro Hub and Cable system is designed for a full Garmin, Apollo, or King/Bendix stack. The Pro Hub system is compatible with most NAV/GPS/Com (single & dual), modern audio panels, auto pilots, intercoms, moving map displays, VOR indicators, HSI's, RMI's, ADF's, annunciators, mode control and any other RS-232 formatted device. P/N 11-01459.....

Pro G Hub for Garmin Stacks..... P/N 11-01893.....

STEP 2: Now choose the Approach cables for your specific avionics. Note that certain cables work only with certain Approach Hubs. Cables for the same avionics have different part number for different hubs. Call us if you do not see the cable require. Approach continually releases new cables. The Approach Sport Lite Hub is bundled with and only supports two Approach cables.

BECKER MODE S BXP-6403-2

Single block Mode-S transponder. Certified according to ETSO-2C112b and is suited for VFR and IFR operations up to 15000 feet. Extended squitter and SI code function and it provides an interface to the central aircraft data system. It allows ELS, supports EHS, as well as ADS-B via extended squitter. Designed for slide-in mounting and fits into a 160.3 x 41.28 mm cut out. The use of an adapter allows for retrofit in a KT 76 A tray. Panel inscriptions and sunlight readable display can be illuminated and dimmed for night operation. The display shows the actual settings. The transponder is prepared for the connection of blind encoders from different manufacturers. The encoder can be connected to the transponder by a serial or parallel interface. Supply voltage: 10.0 V to 33.0 V DC. Power-up time: 2 sec (internal self test). Operating modes: Mode A, Mode A+C, Mode S. Vibration resistance: Cat s. Curve M. Humidity: Cat. A/+50 degrees C. Weight: approx. 1kg.

BECKER ATC 4401 TRANSPONDER

2 1/4" ATC 4401 has the same look and similar size as the successful transceiver AR4201. Outstanding performance combined with low power consumption is provided in 2 certified versions; ATC 4401-250 w/ min. 250W transmit power and ATC 4401-175 w/ min. 175W transmit power. Certified according JTSO & TSO regulations. The sunlight readable display is illuminated for night operations. The display shows in addition to the transponder code also the current flight level, if an encoding altimeter is connected and Mode-C is selected. It operates from 9.5 to 32.2v DC, suitable for almost every application in general aviation. A standard encoding altimeter or blind encoder can be connected.

PS ENGINEERING IFE - AUDIO PANELS

PAV 80 IFE SYSTEM

The PAV80 system incorporates AM/FM radio, CD/MP3/MP3Pro for music, plus the added dimension of DVD video. The PAV80 system is a panel mounted player unit, which contains the DVD mechanism, as well as the AM/FM radio. A 5.5" Liquid Crystal Display (LCD) video terminal provides full color pictures. Up to 4 displays can be driven, using an optional video distribution amplifier. Multi-tasking capability. When coupled to an audio control system, such as PMA7000B, the pilot & copilot can listen to the radio, while the DVD movie audio is provided to the passengers or visa versa. This feature gives the aircraft occupants unprecedented control over their audio entertainment. Music in front, movies in back, and a full intercom conversation, with aircraft radio muting of the entertainment as desired (with compatible system). By taking full advantage of the independent inputs designed into our audio panels, we have tailored the IFE outputs the way today's aircraft are used in cross-country travel. Designed specifically as a general aviation entertainment system by pilots for pilots, and incorporates the most asked-for features in an IFE system.

PS ENGINEERING PCD 7100 STEREO INTERCOM/CD PLAYERS

PCD 7100 series, from PS Engineering, is an integrated Intercom and CD player designed specifically for aircraft installations. PCD7100 incorporates PS Engineering's

exclusive IntelliVox™, automating the digitally controlled intercom squelch. The PCD7100 has music and intercom volume controls for adjustment of the audio levels. The 5 back-lit CD push button controls that have LED mode annunciation are Play/Pause, Skip, Repeat, Stop & Eject. In ISO mode, the pilot hears only aircraft radio traffic, without music or intercom interruptions. In crew mode, the pilot and copilot hear the internal CD player and radio traffic. An automatic fail-safe feature (EMG) connects the pilot directly to the aircraft radios if power is removed from the PCD7100 for any reason. Both the pilot and copilot have transmit capability over the aircraft radios. In ALL mode, all intercom positions hear the aircraft radios and the CD Player, with PS Engineering's proprietary SoftMute™ circuit. Now available in either a standard CD player or it can now be ordered with the MP3 player option. Installation is the same, and the units look identical, the difference is the units that can play MP3 discs can have almost 20 hours of continuous music on a single disc using the MP3Pro format

PS ENGINEERING PXE 7300 IFE SYSTEM

An inflight entertainment system specifically designed for general aviation airplanes. Can play CDs & MP3 recordings, and contains an AM/FM receiver. The PXE7300 is the first

we know of that is not an adaptation of automotive technology. Meets all of the FAA TSO standards to ensure no interference with other avionics, fits in the normal radio stack and plays through any standard aircraft audio control. Approved for installation under an STC. Has soft mute feature that lowers volume from the entertainment system for the pilots when a comm signal is received. Passengers hear uninterrupted entertainment. The CD drive is a sturdy unit designed for the aviation environment and plays only a single disk, but if you create your own MP3 disks, you can fit more than 250 songs on a single disk. The AM/FM receiver is designed & certified to not interfere with the VOR/LOC frequencies, not an easy task for FM, and has special logic that helps it discriminate between broadcast signals on the same frequency. At altitude, AM/FM radio receives competing broadcast signals because frequencies are assigned based on the receiver being on the ground. The PXE7300 identifies the strongest signal and rejects any others on the same frequency, so you hear only one radio station at a time. No external antenna required. A thin "strip" antenna can be mounted inside any cabin window, where it is out of the way and probably out of view while still providing excellent AM/FM reception.

P/N 11-01767

MB 10 MARKER BEACON RECEIVER

The MB10-is a 3-light 75 MHz Marker Beacon receiver and indicator. This provides the necessary Marker Beacon lights and audio indications necessary for an Instrument Landing System (ILS) approach. A switch labeled Hi/Lo/TST allows the pilot select high or low sensitivity as well as test and mute modes. P/N 11-05621

PS ENGINEERING PMA 6000 AUDIO PANEL / INTERCOMS

The PMA6000 combines an audio selector panel with a top-quality intercom and a slew of features to enhance versatility and utility. Among the high

points: * Designed to be pin-compatible with the popular Bendix/King KMA-24 audio selector panel, the PMA6000 takes advantage of existing wiring to smooth installation. * Built-in 6 place mono intercom provides synergistic capabilities. The PMA6000 has a built-in marker beacon receiver. * Split mode allows the pilot and copilot to independently and simultaneously use both radios, even transmitting simultaneously on different frequencies. * Pilot and crew/passenger isolate functions are an integral part of the design. * Dual music input jacks for passengers and crew are standard feature. * Independent volume and squelch controls for pilot and copilot are standard. * PSE's renowned Soft Mute technology gently and subtly ramps the music down when conversation comes across either the intercom or the radio. * A patented "swap" function (Patent #5,903,227) allows pilots to use a yoke-mounted switch to select Com 1 and Com 2 options without reaching for the panel. * High quality, voice-activated circuitry and individual microphone channels form the heart of the intercom system. * Passengers have their own voice and audio amplifiers. * Backlit switches linked with a photo sensor carefully calibrates panel lighting to cockpit levels for all situations. * Fail-safe feature automatically hard-wires the pilot to Com1 in the case of an outage. A Digital Recorder is available as an option. This continuous loop digital recorder stores all aircraft radio activity on the selected transmit radio. Up to 1 minute/16 messages are stored.

PMA 7000B/7000H AUDIO PANEL

Lends itself nicely for upgrading an existing Bendix/King KMA24 audio panel. KMA24 pin compatible. None of the existing wires going to the

KMA24 have to be disturb, thus reducing the amount of installation. With our renown 6-place IntelliVox® automatic Voice Operated Relay (VOX) intercom system, adjusting a squelch circuit is a thing of the past. No more clipping or missed syllables. Provides 3-com capability with the option to easily convert Com 3 to a full duplex cellular telephone interface. Also has the pioneered "Split Mode". Allows the pilot to be on Com 1 while the copilot is on Com 2. Also expandable to accommodate up to 12 places (10 passengers) with the addition of the 11606 IntelliPax. Has four un-switched and un-muted inputs. This adds flexibility when installed with today's advanced warning systems.

Having all of the capabilities of the popular PMA7000B, the **PMA7000H** adds 3 more passenger positions (total of 7 passengers with Pilot and Copilot seats), Cockpit Voice Recorder (CVR) output, and Push-To-Talk Intercom (PTT-ICS) function. (better known as Hot-Mic)

PAC 24 AUDIO PANEL/INTERCOM

Designed from the outset as an upgrade/replacement for the popular KMA24 -71.

Many of the enhancements include; a powerful headset audio amplifier, and high-performance IntelliVox® intercom, dual audio capability in a single box, full duplex mode for wireless operations, and expansion capability with stereo IFE input. Can accommodate 5 transceivers. A monaural system, the PAC24 can include a music input. SoftMute™ silences music during radio traffic, but allows music other times. Incorporates a split mode that will allow a single audio panel to separate two pilots on different transceivers. When combined with IntelliPax® expansion system, the dual PAC24 can be a 14-place system. The audio amplifier is capable of providing 120 milliwatts (mW) into general aviation headphones.

PS ENGINEERING AUDIO PANELS — VAL COM

PMA9000EX AUDIO PANEL

Built with the "Wish List from the Homebuilder" the PMA9000EX brings to the cockpit more capability than any other audio panel. The backlit Liquid Crystal Graphics Display. At a glance see what radios are selected, titles of songs, and message alerts. A host of audio panel configurations can be changed with a twist of the Rotary Data Knob. Front panel utility jack acts as an iPod input, telephone input, or USB port for the onboard MP3 player. This USB port allows the crew and passengers to download music from a memory stick, providing hours of continuous music listening. Bluetooth® interface eliminates the wire clutter that used to be necessary to connect telephones. 5 different ways that any two of the three music inputs can be distributed. None of the capabilities of the PMA8000B have been lost. It too is plug and play with the GARMIN GMA340. 9000EX Audio Panel..... P/N 11-05587.....

PMA 8000B AUDIO PANEL

Front-mounted, 2.5mm multipurpose jack give pilots unprecedented access to their audio panel, allowing connections to cell phones, portable music devices, or audio announcements directly into the audio panel. 6 user configurations that are front panel selectable. When used as an entertainment input, the music is directed to the crew, and PS Engineering's patented SoftMute™ functions normally. Our original Karaoke Mode™ can be activated by pressing the front panel "Mute" button, allowing the music to be placed in the background while interruptions to the music will be eliminated. However, if the aircraft has a panel mounted music device and it is active, it changes the front jack for advisory messages. These alert messages are not muted, and presented to the crew headphones only. Also is a convenient way to connect your cellular telephone. Pilot can receive and transmit on the selected VHF COM with ATC as well, for seamless integration in the cockpit. (Cellular telephone use in flight is not permitted, but remains a convenient and safe way to contact air-traffic control or a weather briefer while on the ground.) Virtual Tech Support (VTS) voice prompts each special function selection assuring that the pilot knows exactly what the new audio panel configuration is, in plain English. Six different configurations can be selected from the front panel. Internal Recording System (IRS) is now standard equipment. Backward compatible with the PMA8000. Note: Use of the front panel jack is restricted to advisory information only, from portable systems. Signals required for certified equipment must be interface in accordance with their specific installation manuals.

PMA 8000-SR AUDIO PANEL

An audio selector panel for two VHF coms (including our split mode), a dedicated cellular telephone interface, a 6-place IntelliVox® stereo intercom with dual independent music inputs, and an internal marker beacon receiver with 3-light indicator. True plug-and-play replacement for the GARMIN GMA340. Patented IntelliVox® automatic intercom squelch system eliminates all of the traditional knobs or push buttons. Using digital processing, the system determines if the microphone is picking up voice, or aircraft noise. It opens instantly when voice is detected. This makes conversations seamless, even in a noisy aircraft. Karaoke mode, allowing the music to play continuously without constant interruptions.

TEL mode allows the pilot to access a hands free cellular telephone, where appropriate, through the audio panel and headset. Various front panel intercom configurations allow anyone in the aircraft to be placed on the cell phone, while the crew also remains connected to the communications radios. Configurable music inputs as well, allowing the pilot to tailor who hears what when. So with the addition of the PAV80 or PXE7300, the added dimension of DVD or MP3 can be easily added. NOTE: When flying near around highly populated cities, signal drop may occur due to ground based repeater interference.

AP 100 AUDIO PANEL

Satisfies the need for the convenience of a fully functioning quality audio panel that can be counted on to provide years of reliable service. Non-TSO'd (for experimental

aircraft only. Features: •COM 1, COM 2 transmit select. •NAV 1, NAV 2 audio switching and amplified speaker output. •Marker audio mute reset and active mic key indicator. •Four unswitched audio inputs for the full IFR panels. •Fail-safe feature that connects the pilot's mic and headset to COM 1 when the unit is powered down. •Slim size, only one inch vertical space. •TSO March 2007 Specifications: •Physical Dimensions: 1' x 6.25" x 6" •Weight: 2 lbs •Mounting: Panel-mounted. No shock mounting required. •Power Requirements: 12VDC, 0.5A max. P/N 11-04768

VAL AVIONICS NAV INS 429

The NEW INS 429 is a high quality, multi-function, fully integrated navigational instrument. Not only does it sport its own internal receivers, it will also display course deviation information from an external NAV or GPS source. A perfect solution for a crowded panel. P/N 11-05592.....

VAL AVIONICS COM 2000 VHF TRANSCEIVER

The COM 2000 is the smallest panel mounted COM radio available. Turning back to a more traditional design, it features dual concentric knob controls, displayed active and standby frequency with push button flip-flop and manual squelch control. 3/8" character display is easy to read from any angle and any lighting. P/N 11-06411

VAL INS 422 VOR/LOC/GS/MB

The INS 422 is a high quality, multi-function, fully integrated navigational instrument designed as a complete, stand-alone unit, supplying 4 basic navigational aids: VOR w/digital course select, Automatic Radial "TO" Centering feature, Localizer, Glideslope, and Three Light Marker. The units digital display well define the CDI indications. CDI output data is also available at the rear connector for easy interface with most Autopilots.

Aluminum construction offers a lightweight yet very durable unit, which will provide years of reliable service. This instrument mounts in a standard round 3.125 inch mounting hole.

Automatic Radial Centering: To determine the bearing TO a VOR station with conventional course indicators, it is necessary to manually rotate the OBS to center the course deviation pointer. With the Automatic Radial Centering feature provided on the INS 422 system, this is done automatically when the external momentary button is pushed.

Pushing the remote automatic radial centering button enables circuitry to automatically position the digital CDI indication to provide a one-time radial "TO" the VOR station. The digital indications displayed on the CDI will then return to conventional operation, permitting the radial to be flown in a conventional manner. TSO'd P/N 11-01040.....

VAL INTERCOM

Val Avionics 801010 intercom is a two-position push-to-talk intercom system designed to operate exclusively with the Val COM 760 radio. It is ideally suited for noisy environment aircraft applications where traditional VOX system operations are diminished. P/N 11-02964

VAL VOLTAGE CONVERTER

This unit is a step down voltage converter that drops 28 volts DC down to 13.8 volts DC. This unit would be required to operate either our COM 760 TSO or INS 422 TSO units in an aircraft or vehicle that are 28 volts DC. P/N 11-02963

AVIONICS INNOVATIONS DMP-100

This Digital Media Player is a self-contained unit which stores and replays pre-recorded audio tracks. The audio tracks are encoded in "Motion Picture Expert Group (MPEG) Level 3 format", commonly referred to as MP3. Audio files are stored in a

removable Compact Flash™ memory card which is prepared and installed by the user. **Features:** * Self-contained unit which stores and replays MP3 music and speech files. * MP3 files are stored on a standard Compact Flash card. * MP3 play lists (iPod) can be imported. * One MB = one minute of speech or, music. Currently, Compact Flash cards are available up to 4gb. * Up to sixteen languages can be programmed with the ability to play two different languages simultaneously. * The DMP-100 can be implemented as a cabin briefer. * Audio files can be selected via a single rotary push-button on the front panel. * Optionally, the DMP-100 can be connected to a maximum of seven external discrete trigger inputs to select a particular audio/speech file. * In addition, the RS232 data from a GPS can be connected to the DMP-100 allowing triggering of audio / speech files based on geographical position. * The DMP-100 provides a single pair of ground-referenced stereo line-level output signals. * User programmable with Avionics Innovations' exclusive Card-Prep software supplied with the DMP-100. **Benefits:** * Hours of continuous music and or speech files can be stored on a convenient Compact Flash card. * No more changing and maintaining of CD's. * Can be used for entertainment and or cabin briefing. * Single rotary knob with a push-button action for all front panel functions. * MP3 play lists (iPod) can be imported. * User programmable. * GPS can be connected to the DMP-100 to trigger either speech or music automatically when the aircraft is within a specific distance of a certain waypoint. * FAA/PMA approved. DO-160D tested. **Specifications:** * Power source: 11-33 Volts DC * Ground System: Negative * Current Draw: < 250 mA * Audio Output: Stereo line-level * Dimensions: 5.75" W x 1.875" H x 3.5" D * Mounting Type:Dzus-Rail Mount (adapter available for 6.25" racks) * Weight: 15 oz

RADIORAX - TRAFFIC ALERT SYSTEMS

RADIORAX THE REVOLUTIONARY AVIONICS RACK SYSTEM

Radiator provides flexibility and ease of installation for panel mount avionics. The radiator system consists of anodized slotted rails, stainless nuts, structural strength tray screws that are four times stronger than conventional screws used in aviation, and a stainless capture system that holds each nut where it is needed during assembly. The installer is able to position the nuts in the slot exactly where they are required to install each tray. Once installed, the trays can be easily moved until the screws are fully tightened. Additional nuts can be stored in the

slots for future avionics additions. RadioRax provides great strength, ease-of-alignment, easy change and modification, enhanced quality, owner satisfaction, and is very cost effective.

PROXALERT R5 - COLLISION AVOIDANCE SYSTEM

The R5 is a passive collision avoidance system. It detects transponder replies of aircraft flying in your vicinity and displays simultaneously both squawk code, altitude, vertical trend and estimated distance

of the 3 closest threats. The R5 will increase your ability to visually locate threat aircraft and better apply the FAA 'See and Avoid' concept. The R5 has been designed to be very robust against interference coming from DME equipment and other sources of disturbance. Offers significant operational improvements over previous generation products at a very attractive price. The R5 comes with a 3 year manufacturer warranty. P/N 11-02782.....

ZAON BOSE HEADSET AUDIO ADAPTER

This custom audio cable is 100% compatible with all Bose 6-pin connector headsets, including noise reduction circuitry, and is stereo compatible. One simple cable is all you need! Replaces standard headset audio cable. 6-foot straight cable into Y. P/N 11-04525.....

MONROY ATD-300 AIR TRAFFIC ALERT

The Monroy ATD-300 provides that continuous traffic awareness in a compact size. Detects all transponder type replies from nearby traffic and displays their proximity and their altitude on a bright 8-character dot matrix display. Simultaneously, a clear female voice provides voice alerts in relation to traffic proximity. It even has a test mode to verify onboard transponder operation. All of this and more in the size of an aluminum box (2.75" w x 0.75" h x 5" d) no bigger than your intercom. With the Plug N' Fly feature you just plug the ATD-300 into the cigarette lighter (for power) and the aircraft headphone jack (for voice feedback) and you are ready to fly. No panel space or installation is required. Velcro and mounting brackets are provided for location on top or bottom of the instrument panel and in the panel. The unit comes with a detachable antenna, cigarette lighter power cord, and headphone cable for Plug N' Fly setup. The ATD-300 Traffic-Watch provides multiple capabilities that enhance the safety of flight, such as: • Traffic Range up to 5nm • High/Low Voltage alarm • Traffic MSL Altitude • Auto Mode Display • Voltage Indication • ATD-200 Interchangeable • Traffic relative altitude readout • Host transponder altitude/code readout • Bright LED 8 character dot matrix display Specifications: Weight: 10 oz.; Frequency: 1090 MHz; Max Range: 5nm. P/N 11-02449.....

ZAON XRX ONYX COLLISION AVOIDANCE SYSTEM

Traffic awareness is everyone's concern, but so has been the cost of traffic systems, until now. PCAS XRX-ONYX is the first ever portable, passive, stand-alone collision avoidance system for general aviation to offer direction from within the cockpit. PCAS™, or Portable Collision Avoidance System, is Zaon's solution for providing high-quality, low cost traffic information to the general aviation pilot. XRX-ONYX is our flagship model, providing a complete picture in a simple, easy-to-use device. PCAS represents our third generation of proven traffic detection technology. XRX-ONYX is truly a "Plug and Go" device with its built-in antenna system and built-in display.

XRX-ONYX ONYX UPGRADED SYSTEM

The new XRX-ONYX, is an upgraded version of the current XRX--A system. The differences include: * The code for the new product is **XRX-O-A** * Improved housing in a new black color (Tough-as-nails polycarbonate housing is semi-transparent and attractive) * Software Version 2.1 contains: Minor user interface enhancements, Forward compatibility with integrated systems.

An industry first, XRX-ONYX detects threat aircraft direction from within your cockpit using a cutting-edge, proprietary, self-contained antenna design. With direction, locating and identifying traffic is simple and easy, and traffic information is "three-dimensional", which means it can be displayed on third-party systems, such as moving map GPS devices. Read more about this below. P/N 11-06504.....

XRX BARE WIRE POWER/DATA CABLE - Get XRX Traffic hard wired into your third-party moving map system. Provides hook-up for both the data port (DB9) and the power jack on the XRX. The other end of the 68" cable has tined leads ready for hook-up directly to your third party system. Uses a single lightweight cable for both power and data transmission. P/N 11-06243.....

ZAON MRX COLLISION AVOIDANCE SYSTEM

PCAS MRX is the world's smallest collision avoidance device, yet sacrifices none of the features previous upper-end systems have become known for. MRX displays range and relative altitude of the closest threat, with continuous monitoring of the top 10 threats within the 5 NM scalable detection window. Altitude detection is scalable up to +/- 5000 ft. At 2.5" (65mm) W x 4.2" (107mm) D x 0.6" (17mm) H, MRX is smaller than a deck of cards. MRX uses an easy menu-driven interface and audio annunciations for traffic advisories and alerts. The unit boasts a built in solid-state altimeter for "always relative" altitude information, and built-in temperature compensators and overtemp protection. Information is displayed on the high-brightness LED display (dim-able). MRX also monitors aircraft bus voltage and host transponder output. The unit is powered by aircraft power (12-40 VDC adapter included) or 2 "AA" Batteries (with 8+ hours of use). MRX is half the size, 1/3 less price, portable and offers better accuracy and many more features than the ATD-300. P/N 11-05223.....

R-A-M MOUNTING SYSTEMS

RAM is the revolutionary universal ball and socket mounting system that allows you to mount practically anything anywhere. The new yoke / glareshield mounting system gives the pilot an option of positioning the arm over or under the yoke or anywhere on the glare shield. RAM is backed by NPI's renowned Lifetime warranty and is the only patented ball-and-socket system on the market.

STEP 1

The First Step to finding a RAM Mount is to select a location for a base unit. RAM mounts for aviation can attach to yokes, glare-shields, flat surfaces, wind screens, and seat rails. There is a RAM solution for almost any application you can imagine.

AV

R-A-M MOUNTING SYSTEMS

STEP 2

Once you have a base secured to your aircraft, the 2nd step is to choose a double socket arms are 1.75", 3.5" and 5.25" long (ball to ball) and the flex arms are 6", 9" and 12" end to end.

STEP 3

The 3rd step is to attach the cradle for your device. Most of the cradles will require a 1" ball base that attaches to the cradle to connect with the double socket arm (RAM-B_202 or RAM-B-238).

LOBSTER MOUNTS - GPS MOUNTS

LOBSTER MOUNTS

The "Shrimp" Series of mounts provide an economical solution for mounting mobile electronics. This basic system provides a minimal extension, and utilizes a tri-wing finger knob for locking and positioning. Our off-centered 1-1/4 inch ball-base (patent pending) provides adaptability that cannot be matched. The Shrimp mount extends as little as 2-1/2 inches from the mounting surface and can extend to about 5 inches. The "Shrimp" was designed to support devices up to 3 lbs, and is available with bolt-on, MC/ATV, and Suction bases.

UNIVERSAL MC-ATV CLAMP - Base only! For an additional anchor point we offer this universal rail-clamping base, designed to fit square or round tubing from 3/4 inch to 1-1/2 inch diameter (by adding a 1/4-20 x 3" bolt, this base will fit up to 1-3/4 tube). This rugged base is made from extruded aluminum, an aluminum ball, and includes stainless steel hardware. Weight - Unit 0.5 lbs.

P/N 11-04709.....

UNIVERSAL CRADLE - The Cradle comes with four grip fingers and one stop finger, which are capable of being positioned in any of the eight slots on the body. Rubber pads for the grip fingers and stainless steel hardware are provided. In the short direction, the grip fingers are adjustable from 1-1/2" to 3-1/4", and in the long direction, the grip fingers adjust from 4-1/2" to 5-1/2". For longer devices, the fingers on top could be left off, allowing the device to overhang the cradle base. This product, like our other products is produced for use in aviation and marine environments where being compass compatible and corrosion resistant are important. P/N 11-04710.....

SHRIMP SERIES BOLT-ON WITH CAMERA TOP - A removable 1/4-20 camera stud, universal mounting ball-base and mounting flange, lanyard loop; accommodates the AMPS bolt up pattern (AMPS is a 1-1/2" by 1-3/16" screw hole pattern used in many portable electronic products). Aluminum alloy and reinforced composite parts with stainless steel hardware. P/N 11-04711.....

SHRIMP SERIES MC/ATV CLAMP WITH CAMERA TOP - Same as our Bolt-On model, while adding a universal rail-clamping base, designed to fit square or round tubing from 3/4 inch to 1-1/4 inch diameter (by adding a 1/4-20 x 3" bolt, this base will fit up to 1-3/4" tube). This rugged base is made from extruded aluminum, an aluminum ball, and includes stainless steel hardware. P/N 11-04713.....

SHRIMP SERIES BOLT-ON + CRADLE - Universal mounting ball-base and mounting flange, lanyard loop, along with our cradle for hand-held devices. The Cradle (UN-198) comes with four grip fingers and one stop finger, which are capable of being positioned in any of the eight slots on the body. Rubber pads for the grip fingers and stainless steel hardware are provided. In the short direction, the grip fingers are adjustable from 1-1/2" to 3-1/4", and in the long direction, the grip fingers adjust from 4-1/2" to 5-1/2". For larger devices, the finger may be left out at the top allowing the device to overhang the cradle base. Like our other products, the SH-259 is produced for use in aviation and marine environments where being compass compatible and corrosion resistant are important. P/N 11-04715.....

SHRIMP SERIES SUCTION + CRADLE - Our Suction Base attachment ball is capable of being tilted for extra versatility in positioning your device. Cradle (UN-198) comes with four grip fingers and one stop finger, capable of being positioned in any of the eight slots on the body. Rubber pads for the grip fingers and stainless steel hardware are provided. In the short direction, the grip fingers are adjustable from 1-1/2" to 3-1/4", and in the long direction, the grip fingers adjust from 4-1/2" to 5-1/2". For larger devices, the finger may be left out at the top allowing the device to overhang the cradle base. This mount, like our other products is produced for use in aviation and marine environments where being compass compatible and corrosion resistant are important. P/N 11-04716.....

SHRIMP SERIES MC/ATV + CRADLE - A universal rail-clamping base, designed to fit square or round tubing from 3/4 inch to 1-1/4 inch diameter. Made from extruded aluminum, an aluminum ball, and includes stainless steel hardware. Cradle comes with four grip fingers and one stop finger, capable of being positioned in any of the eight slots on the body. Rubber pads for the grip fingers and stainless steel hardware are provided. In the short direction, the grip fingers are adjustable from 1-1/2" to 3-1/4", and in the long direction, the grip fingers adjust from 4-1/2" to 5-1/2". For larger devices, the finger may be left out at the top allowing the device to overhang the cradle base..P/N 11-04717.....

UN-327 SUCTION BASE - Suction Base Only, If you are already using a Bolt-On or MC/ATV base, this allows you to easily transfer your device to your car or any place with a smooth surface. The Suction Base attachment ball is capable of being tilted for extra versatility in positioning your device. This base, like the other products is produced for use in aviation and marine environments where being compass compatible and corrosion resistant are important. P/N 11-06616.....

SH-334 SHRIMP SUCTION MOUNT WITH CAMERA TOP - Our Suction Base attachment ball is capable of being tilted for extra versatility in positioning your device. The Camera Top (UN-310) has a removable 1/4-20 camera stud. It also features a mounting surface with holes and slots, which accommodate the AMPS standard (1.496" x 1.181") pattern for direct attachment to numerous electronic devices. This base, like our other products, is produced for use in aviation and marine environments where being compass compatible and corrosion resistant are important. P/N 11-06617.....

UN-303 ROLL BAR CLAMP - Base only! For your ATV, golf cart steering column or other applicable with 1-1/2" to 2-1/2" tubing. This rugged base is made from aluminum extrusion, an aluminum ball, and zinc plated steel hardware. Note that this is not compass friendly. P/N 11-06618.....

UN-310 CAMERA TOP - Camera Mounting surface that can also be used for mounting other devices. If you are already using a Universal Cradle (UN-198), this allows you to easily use your mounting system for other purposes. The holes and slots in the flange accommodate the AMPS standard pattern as well as several size u-bolts. This base, like our other products is produced for use in aviation and marine environments where being compass-compatible and corrosion resistant are important. P/N 11-06615.....

ROTATING MOUNT FOR GARMIN GPS

The rotating mount attaches to the Garmin yoke mount supplied with the GPS units. The GPS then mounts on the product and allows the GPS unit to be rotated so the passenger can view the unit if mounted on the pilots side. If used on the co-pilots side, then the pilot can rotate the GPS so he/she can view it as well. Note: The rotating mount is used for the Garmin GPS units (295,196,296,396)

Rotating Mount for Garmin GPS LF..... P/N 11-04661.....
Rotating Mount for Garmin GPS RT..... P/N 11-04662.....

ANGEROLE INSTRUMENT PANEL MOUNT

The photo illustrates the Model 241 040 fitted to a blank instrument panel. An adaptor plate (included with the mount) fits any standard 2-1/4" instrument panel hole so, generally, it can be fitted without any modifications to your airplane. If your application needs it, we can supply this mount with a 3-1/8" panel adaptor plate. If you don't have an unused panel hole, a viable alternative is to drill two holes and simply bolt the mount directly to your panel. The "footprint" area is only 2" x 0.5" so there's probably going to be somewhere you can make it fit. Naturally, you need to be certain this is appropriate, sensible and legal for your installation before drilling holes in your airplane. P/N 11-07238.....

ICOM HANDHELD TRANSCEIVERS

ICOM IC-A24 NAV/COM

Easy To Use While Flying - Simple one-handed operation is the most essential feature of the IC-A24. The well labeled, large keypad provides user friendly operation. The large display shows both letters and numbers and is easy to see, making for fast frequency recognition. The display is backlit, and so is the keypad. The light stays on until you turn it off - a very handy feature for flying at night! "Flip-Flop" Channel Recall - The IC-A24 stores the last 10 channels used. You can easily recall those channels by pushing the "flip-flop" recall buttons on the front panel. It is convenient for switching between several channels, such as Nav and Com channels. VOR Navigation - The IC-A24 has VOR navigation functions. The DVOR mode shows the radial to or from a VOR station and the CDI mode shows the course deviation to/from a VOR station. You can also input your intended radial to/from the VOR station and show the course deviation on the display. The duplex operations allows you to call a COM channel while you are using VOR navigation. External DC Power Jack - An external DC power jack allows for operation with the wall charger or the cigarette lighter cable. When the battery pack is installed, simultaneous charging during operation is also possible. Water Resistant Construction- The water resistant construction provides reliable operation in wet conditions. IC-A24 Nav/Com (110V) - Includes Nicad battery, wall charger, belt clip, carrying case, headset adapter & handstrap. ...P/N 11-02942 IIC-A24 Nav/Com (220V)P/N 11-04355

ICOM IC-A6 COM

Simple one-handed operation is the most essential feature of the IC-A6. The well labeled, large keypad provides user friendly operation. The large display shows both letters and numbers and is easy to see, making for fast frequency recognition. The display is backlit, and so is the keypad. The light stays on until you turn it off. The IC-A6 stores the last 10 channels used. You can easily recall those channels by pushing the "flipflop" recall buttons on the front panel. External DC Power Jack - An external DC power jack allows for operation with the wall charger or the cigarette lighter cable. When the battery pack is installed, simultaneous charging during operation is also possible. Water Resistant Construction - The water resistant construction provides reliable operation in wet conditions. Features: • 200 memory channels (10 banks of 20 channels) allows you to load in up to 10 separate flight plans. 6 character alphanumeric for channel names. • Dedicated 121.5 "emergency" key. • All NOAA weather channels preprogrammed. • Automatic Noise Limiter (ANL) built in for noise reduction. • Icom's exclusive front panel programmable side tone allows you to set the correct side tone level for almost any headset • Icom's exclusive "TAG" scanning and memory bank scanning make it the most user friendly radio on the market. Specifications: • Frequency range: Tx/Rx 118.000-136.975MHz • Weather 161.650-163.275MHz • Wt: 15.02oz. • Dims: 2-1/8" x 5-3/32" x 1-13/32"

IC-A6 Com (110V) - Includes Nicad battery, wall charger, belt clip, headset adapter & handstrap. P/N 11-02944 IC-A6 Com (220V) P/N 11-03178

ICOM A14 HANDHELD TRANSCEIVER

700mW* loud audio - Because air band radios are usually operated in high-noise environments, it is essential for the radio to provide loud clear audio. The IC-A14/S series employs a BTL amplifier that doubles the audio output, offering loud and clear audio that'll cut through cabin or tarmac noise. (*internal speaker only)

Full keypad type or Simple keypad type - The IC-A14 full keypad type allows you to input the channel or frequency directly and has an exclusive button for the 121.5MHz emergency channel. The IC-A14 receives NAV and WX channels. The IC-A14S simple keypad

type provides simpler operation with a minimum of buttons that is suitable for ground crews. **Compact, light weight and rugged body** - The IC-A14/S series is compact (only 120mm tall) and light weight (approx. 350g including antenna and BP-232N). The water resistant construction, equivalent to IPX4, provides reliable operation in wet conditions.

Large capacity Lithium-Ion battery pack - With the 2000mAh large capacity Lithium-Ion battery pack, BP-232N, the IC-A14/S series provides stable output power and 18 hours long (approx.) operating time*. The BP-261, battery case takes 6 AA (LR6) alkaline cells for convenient battery backup. * Typical operation, Tx:Rx: Stand-by=5:5:90.

200 channels with memory banks - A total of 200* memory channels can be named with an 8-character channel name for easy recognition. For fast and simple operation, these channels can be grouped into 10 memory banks*. *IC-A14 only. The IC-A14S has 100 memory channels and memory banks are not available.

ICOM IC-4088A UHF FM TRANSCEIVER

The Icom IC-4088A is a compact, inexpensive transceiver, water resistant and very easy to use. Channel changing is as simple as pushing the up/down keys. The radio can be controlled with only 5 button and a volume control knob. The easy to read LCD shows information at a glance. Other outstanding features includes: Economical AA alkaline batteries (3 not supplied) provide 30+ hrs of use, low battery indicator provides warning of battery condition when using alkaline batteries, rotary type antenna folds down behind radio, optional Ni-Cd battery pack and rapid charger, compact body fits neatly in your hand, and auto power-off timer (two hours). This radio is excellent for use in communicating with friends at airshows.

HANDHELD TRANSCEIVERS

ICOM IC-R5 SPORT

Small size, powerful specifications and outstanding features puts you in the action, whether listening in on your favorite driver's car-to-pit radio calls while at the race track, looking for something new while traveling, or catching your favorite radio programs at home.

Wideband Receive 0.150-1309.995 MHz* The IC-R5's wideband reception means virtually anything from AM broadcast to UHF TV audio is fair listening game. Every TV broadcast channel is preprogrammed into this radio.* Listen to AM & FM radio stations, utility communications, and more. For the race fan, the IC-R5 puts you so close to the asphalt, only the man behind the wheel is experiencing more action.
*Depending on version.

1250 Alphanumeric Memory Channels Make up your own channel names for each of up to 1250 memory channels, and channel recognition is easy! The IC-R5's LCD display lets you use numbers, letters or a combination of both when naming channels and banks. Icom's exclusive Dynamic Memory Scan (DMS) gives you the flexibility to customize and manage the IC-R5's memory banks the way you want or need.

Convenient Power and Charging Power on the go is easy, thanks to the IC-R5's ability to operate from a variety of power sources. You may: power the radio via the DC port; or use the included 2 "AA" size rechargeable Ni-Cd batteries*; or use long storage life "AA" alkalines. A DC jack allows for simultaneous battery charging while operating the radio. *Depending on version.

Computer Programmable With the optional software and cable, IC-R5 programming and cloning are a breeze. Hook your IC-R5 up to a PC and you're ready to customize channel names, scan lists, and more.

VERTEX VXA-220 PRO VI

The VXA-220 features 5 watts TX power output, loud audio (700 mw), long life nickel metal hydride battery, larger LCD display, 250 memory channels with programmable 8 character alpha numeric display, submersible design (3 feet for 30 minutes), NOAA weather receive (10 channels). All of this is backed by the manufacturers 3 year parts and labor warranty. The VXA-220 uses the same accessories as the popular VXA-300.

In the box: VXA 220 COM, FNB-83 - NI-MH Battery 7.2V 1400, CN-3 - SMA TO BNC Antenna Adapter, ATV-10 Rubber Duck Antenna, CT-96 - Headset Adapter, NC-88B - Battery Charger 120V, CD-32 - Charger Cradle

VERTEX VXA-300 TRANSCEIVER

- 5 watt airband transceiver with Nav-Comm display
- Large capacity Ni-MH Battery (twice the battery capacity of Icom IC-A23)
- 8.33 Khz channel spacing (RX only) for European band plan
- Built in VOX
- Built in P.A. mode
- 250 memory channels with 8 character alphanumeric titles
- Submersible (3 ft for 30 min.)
- Extra loud audio amplifier (30% louder than Icom IC-A23)
- NOAA weather channel receiver. The VXA-300 Lite is the same unit as the VXA-300 with the addition of an Alkaline Battery Case and 12V adapter.

REXON RHR520 HANDHELD TRANSCEIVERS

JRC handheld transceivers offer pilots many unique features such as active/standby frequency control, dual watch (monitor 1 frequency while tuned to a primary frequency, instant memory write to instantly save any tuned frequency, and Nav Scan which scans nav frequency band to find useable VOR signals. Other features include DVOR and CDI, 16 button keypad, NOAA weather channels, 100 programmable memory channels, backlit LCD display, 5 watts of output power, full scanning, and much more. Comes complete w/headset adapter, protective case, belt clip, NiCd battery pack, 110 VAC wall charger, & wrist strap.

PASSIVE AIR BAND AIRCRAFT MONITOR

Monitors the entire aircraft band without tuning! Passive design, can be used onboard aircraft, no local oscillator, generates and creates no interference whatsoever! Great for air shows! Patented circuit and design! For decades we have been known for our novel and creative product designs. Well, check this one out! An aircraft receiver that receives all nearby traffic without any tuning. It gets better... there is no local oscillator so it doesn't produce, and can't produce, any interference associated with all other receivers with an LO. That means you can

use it onboard aircraft as a passive device! And what will you hear? The closest and strongest traffic, mainly, the one you're sitting in! How unique is this? We have a patent on it, and that says it all!

GLOPLUG POWER ADAPTERS FOR HANDHELDS

GloPlug is a much needed, well designed cigarette lighter accessory that allows a safe method of providing electrical power to hand-

held equipment. Handheld covers a multitude of portable devices including moving maps, radios, GPS, and fans. GloPlugs glow is a light emitting diode, which lights when the circuit is activated. GloPlug has one power take off socket. GloPlugX3 has three power take off sockets enabling the operation of three handhelds simultaneously. GloPlug protects the handheld by an inline blade fuse which is easily replaced without disassembly. FoolPruf extension cords are available. The cords have terminal ends that are universal. (Either terminal fits the handheld or GloPlug.) The Portable Socket Male & Female provide a means of plugging handhelds into the GloPlug even though the handhelds have permanently attached accessory power cords and accessory plugs. Just plug the handheld accessory into the Portable Socket and then plug socket into GloPlug fire up the handheld, no interruption of other handheld equipment. Simple & fast.

WINDSHIELD ANTENNA KIT FOR HANDHELD RADIOS

This antenna kit attaches to the inside of the windshield & dramatically improves portable nav/com's transmit, receive, and VOR performance based on extensive field testing. It is portable and ideal for those who can't use an ANT-SB. Simply attaches one's own flexible antenna to inside of windshield with BNC, coax, suction cup adapter. Works with any handheld radio using BNC connections.

P/N 11-18603

GLEIM KA11AIR PORTABLE AVIATION RECEIVER

Aviation radio communications are now available to you with Gleim's Aviation Radio Receiver. Monitor the entire aviation frequency band!

This radio is very portable, easy to operate, and extremely cost effective. Enjoy Listening to aircraft and air traffic control communications and build your proficiency in "pilot speak".

This radio receiver is an integral part of GLEIM's Watching Airplanes Course- a tool to assist those interested in aviation to learn more about it.

The KA11Air receiver comes with two AA batteries, the earphones, and external antenna..... P/N 13-06717

UNIDEN BC370CRS RADIO SCANNER

The BC370CRS scanner is a multi-featured conventional channel scanner with All Hazards alert. You can easily enter and store frequencies for police, fire/emergency, marine, air, amateur, and other radio services into 300 channels distributed over ten banks. The scanner also alerts you when NOAA (National Oceanic and Atmospheric

Administration) or any broadcast station the scanner is tuned to issues an EAS (Emergency Alert System) signal. These alerts are issued for severe weather, homeland security, and law enforcement events (such as Amber alerts).

P/N 11-04736

AR-108 AIR-BAND SCANNER

AR-108 is a full-featured handheld Air-Band Scanner with weather channels. The AR-108 is small, rugged and compact. The features include 10 weather channels; 9-digit/24 icon backlit LCD display; 99 programmable memory channels; selective channel steps; scans from either the pre-programmed memory channels or the entire aviation frequency band; key lock; key beep tone on/off; battery power saver; powered by 2 "AA" batteries. Includes: scanner, antenna, beltclip and manual. 1yr warranty. P/N 11-18505

TRUTRAK AUTO PILOTS

SORCERER AS AUTOPILOT

Same features as the TruTrak DFC-250 ATI, plus GPSV and VNAV.

GPS-Slaved solid-state DG • Digital Ground Track Selector • VOR / LOC / ILS • VOR / LOC Reverse • Selected-angle Intercept • GPS Nav Mode • GPS Steering • Solid-state gyroscopically-controlled pitch axis • Selected Vertical Speed climbs and descents • Altitude Hold • Built-in Digital Altimeter • V-NAV • Vertical GPS Steering • Altitude Selector with 50-ft resolution for approaches • Selectable airspeed for altitude transitions (in addition to VS) • True Control Wheel Steering* • Simplified User Interface
 P/N 11-02968
 TruTrak Yaw Damper P/N 11-02972

DIGITRAK AUTOPILOT

• GPS-Slaved solid-state DG
 • Digital Ground Track Selector
 • GPS Nav Mode
 • Magnetic Backup Mode
 • True Control Wheel Steering*
 • 12V only
 • 2-1/4" - Dims 2.5"H x 2.5"W x 3.5"D
 • Standard weight including servo: 3.5 lb
 P/N 11-01595
 TruTrak Yaw Damper

AV

TRUTRAK ADI / EFIS

PICTORIAL TURN AND BANK

This display is like an artificial horizon in roll and actually moves in unison with it. This makes the transition from viewing the horizon much easier than the reverse display of the turn coordinator. For much greater life and reliability, it uses a solid state gyro instead of a spinning rotor.

The Pictorial Turn & Bank is superior to a turn coordinator in all ways.

- It looks and flies like the roll display of an artificial horizon.
- It agrees with the real horizon, so one does not have to reverse his or her sensing when entering or exiting IMC.

- Even in the two inch size it provides more viewing area than the small moving aircraft in the three inch turn coordinator.
- The roll response is without lag just as it is in an artificial horizon.
- Of most importance, it is easier and safer for the non-instrument pilot to fly.
- 12-28 Volts - Weight-6oz

- 2-1/4"..... P/N 11-02834.....
- 3-1/8"..... P/N 11-02628.....

TRUTRAK PICTORIAL PILOT

This autopilot combines the superb performance of our DigiTrak with a real aircraft flight instrument, the Pictorial Turn & Bank. It also contains a digital DG for viewing when the autopilot is not engaged. When the autopilot is engaged this display becomes the track selector.

The Pictorial Pilot is the only low cost autopilot to provide a proven easy to fly flight instrument. This is most important to the non-instrument pilot who

would find it very difficult to fly a moving light bar in IMC.

The Pictorial and DigiTrak autopilots are the only ones in this class to provide a drift free magnetic mode when GPS is lost. In the flight instrument mode (AP - off) one must see to believe. In one instrument, the pictorial display combined with the DG display is as easy to fly as the roll display of an artificial horizon in combination with a conventional DG. In the autopilot mode it provides by far the simplest and thus easiest to use mode control and information display of any product in its class. 12-28 Volts - Weight-6oz

- 3-1/8"..... P/N 11-02629.....

TRUTRAK ADI PILOT II

Features:

- GPS-Slaved solid-state DG
- Digital Ground Track Selector
- GPS Nav Mode
- True Control Wheel Steering
- Altitude Hold
- Altitude adjust for baro change
- Built-in ADI: Bank angle is instantaneous gyro data. Pitch is gyro enhanced vertical speed. Direction is an electronic DG showing track. Extreme bank angle is enunciated by flashing red arrows which indicate required stick motion to correct unusual attitude. Low airspeed warning is enunciated by flashing A-S on the display.
- 12-28 Volts only
- Programmer Dimensions 3.4"H x 3.4"W x 4.7"D
- Standard weight including servo 6lb
P/N 11-04675

TRUTRAK ADI FLIGHT INSTRUMENTS

Bank angle is instantaneous gyro data. Pitch is gyro enhanced vertical speed. Direction is an electronic DG showing track. Extreme bank angle is enunciated by flashing red arrows which indicate required stick motion to correct unusual attitude. Low airspeed warning is enunciated by flashing A-S on the display. Solid state rate gyros for pitch and roll. • Built in GPS (optional) • Backup battery (optional) • Power:

- 12-28 Volts
- ADI 2 is 2.5"H x 2.5"W x 6.75"D.
- ADI 3 is 3.4"H x 3.4"W x 4.6"D.

TRUTRAK EFIS SG

Like TruTrak Flight Systems autopilots, when the power setting is not sufficient to comply with altitude or vertical speed commands, the **FLIGHT DIRECTOR** transitions to an airspeed mode in which airspeed is held at or above a minimum value pre-set to the specific aircraft. The result is the highest level of Safety.

To initiate the **ARRIVAL TRANSITION** press CRS - set the HSI course pointer to the selected runway direction - press APPR - then, using the topilot fly the arrival path to the

flight director or au-selected runway. This will work from any direction.

The main thing that sets this new EFIS apart from other units is flyability

Beyond flyability is ease of operation - The use of labeled soft keys makes the unit so simple to operate that a manual is not even necessary. This is also true when operating the optional built-in autopilot.

Picture quality second to none - While other comparably priced systems use hard-to-read single-pixel lines and text, this system is bold and readable (more like the painted lines in good old steam gauges). All lines in the display are smoothed (anti-aliased) to give photo-quality appearance. The 60-Hz refresh rate provides silky smooth display movement.

Sunlight readability and viewing angle beyond all others. - No other system in the same price range can even compare when it comes to sunlight readability. This system is readable in ALL lighting conditions and can be seen at the widest viewing angle of any system in comparable price range.

TRIO AVIONICS – LONESTAR

TRIO AVIONICS

EZ PILOT AUTOPILOT - The EZ Pilot autopilot is a single axis, gyro stabilized roll control autopilot. It is a modern navigation system designed to accurately track a GPS flight plan or "Go To" course that is entered into a handheld or panel mount GPS receiver. Track, Course (similar to a heading bug), and Intercept modes are available to the pilot. Pilot Command Steering simplifies course changes. Full data display of all GPS input data. Fits standard 3-18" instrument cutout. Length: 3". Weight – Control Head: 6 ounces/ 169 grams Gold Standard Servo: 27 ounces/ 765 grams P/N 11-06547

PRO PILOT AUTOPILOT - The Pro Pilot is a GPS enabled autopilot that provides high-quality 2 axis navigation solutions for Experimental and LSA aircraft. It uses solid-state MEMS gyros for pitch and roll stability. Horizontal and Vertical functions may be individually enabled. Horizontal navigation provides three modes of control – Track, Course and Intercept. Vertical navigation functions offer Altitude Hold, Climb/Descent with Airspeed Limiting, and Altitude Pre-Select. Multi-color LEDs and a bright PLED display screen provide a clear picture of functions and displayed data (LCD screen available upon request). Basic operation is as simple as pushing a button, while advanced features are easily accessible by means of illuminated tactile buttons and a rotary encoder. A slip-skid indicator and a turn rate display duplicate the functions of a standard turn rate coordinator. Advanced Safety Features – "G" force limiting, automatic servo disconnect on takeoff, "intelligent" servos with independent emergency disconnect authority, horizontal Track Offset Positioning, and Trio's "automatic 180 degree turn" feature (for VFR pilots encountering poor weather). Fits a standard 3-1/8" instrument cutout. Length: 6". Weight – Control Head: 12 ounces/ 340 grams Each Servo: 27 ounces/ 765 grams P/N 11-06548

Auto-Trim option for existing aircraft electric pitch trim system - P/N 11-06549

EZ-1 ALTITUDE HOLD - Single axis altitude control system. Provides pitch stabilization and accurate altitude hold using MEMS gyro and sensitive altimeter. LCD switch/display provides a graphical message display for system messages, alerts and warning advisories. Rotary encoder allows fine altitude adjustments. "G" force limiting to prevent high wing stress – alarms and disconnects when sensing high sustained G loads. Remote servo disconnect. Senses and displays pitch trim requirements. Weight – Electronic Components: 8 ounces/ 226 grams Servo: 27 ounces/ 765 grams. P/N 11-06550

EZ-2 ALTITUDE CONTROL - Same physical configuration and features as EZ-1 but adds climb/descent capability and airspeed capture. Pitot port on the electronics module enables airspeed sensing to prevent stalling or over-speeding the aircraft. Pilot Command Steering allows climbs and descents on vertical speed or airspeed. P/N 11-06551

EZ-3 ALTITUDE CONTROL - Same as EZ-2, but adds Altitude Pre-Select. Pilots may enter climb/descent rates and target altitude. Upon reaching the target altitude the EZ-3 will level the aircraft and automatically enter Altitude Hold mode. P/N 11-06552

Auto-Trim option for existing aircraft electric pitch trim system - P/N 11-06549

All altitude control systems employ the Trio Gold Standard servo.

COMMANDER 2000K

This high power unit is pre-wired in the "take home" mode. Simply slide your KLN90A/B, KLN89/B, KLN135 Series, and KLX-135 Series GPS or GPS-COM, into the tray of the Commander 2000K and explore your GPS receiver as if you were flying. Practice actual flight or approach at home, store flight plans, and learn all of your units functions. Update your units database via the internet using a desktop or laptop computer & save up to \$300/year. Recommended by Allied-Signal in your operators handbook in the take home mode section. Appropriate connector is shipped free via UPS Blue Label from the factory. Additional connectors, cooling fan, Argus and moving map interface available. 2000K Station.....P/N 11-18478
2000K 220VAC.....P/N 11-04876

COMMANDER 2900 TRIMBLE 2101 24VOLT

Lone Star Aviation's Docking Station for the Commander 2900 2101/CUGR GPS System is designed to allow you to explore the FreeFlight Systems 2101/CUGR features in a non-flying environment. Ideal for Guard Units, EMS, Law Enforcement, DEA, Border Patrol, etc. staff training. Unit does not include cable. P/N 11-04926

COMMANDER 2900 KLN-900 DOCKING STATION

The Commander 2900K is Lone Star Aviation's Docking Station for BENDIX/KING/HONEYWELL KLN 900 DZUS-Mounted GPS. The portable docking station is designed to let you explore the KLN 900 features in a non-flying environment...in the comfort of your home or office. Operation is simple and fast, just slide your KLN 900 into the Commander's Tray and you are ready to go. P/N 11-04911

COMMANDER GARMIN GNS-430/530

Lone Star Aviation's Docking Station for Garmin's GNS 430/530 Flight Management System. The Commander is a portable Docking Station designed to let you explore the Garmin GNS 430/530 features in a non-flying environment. Features:•Simulate your route of flight and published approaches.

•Access sids and stars. •Program and store flight plans. •Simulate approaches. •Enter and store waypoints. •Reduce your learning curve. •Operating your GNS430/530 in flight will become automatic.

GARMIN COMMANDER GNS 480

The Commander 2000 GNS480 is a Docking Station designed to allow you to explore the Garmin GNS-480(CNX-80) features in a non-flying environment.

Features: * Simulate your route of flight and published approaches * Access sids and stars * Program and store flight plans * Simulate approaches * Enter and store way points * Reduce your learning curve * Operating your GNS-480(CNX-80) in flight will become automatic P/N 11-04916

COMMANDER 2900 KMD 150 & 250

Lone Star Aviation's 2900 Station has been designed for the KMD 150, KMD 250 equipment so that the user can practice their GPS, Display and all of it's functions in a non flying environment. The 1 port cooling fan (LS03-02013) plugs into the rear accessory panel and provides 6-8 CFM of cooling to the KMD 150/250 receiver. The KMD connectors plug into the rear panel of the Commander Station for an easy set-up so you can get right into the training mode. P/N 11-04922

COMMANDER STATION FOR C-5000

Lone Star Aviation's Commander Station has been designed for the Wulfsberg C-5000 Control Head equipment so that the pilot can practice GPS, control head functionality at his or her own pace in a non flying environment. The 1 port cooling fan (LS03-02013) plugs into the rear accessory panel and provides 6-8 CFM of cooling to the C-5000 receiver. P/N 11-04928

ELTS

EBC ELTS

Emergency Beacon Corporation's ELT's are among the most popular on the market today due to their size, weight and convenience. These ELTs do not use lithium batteries, include external antennas and no AD notes have ever been issued on them. Internal antennas and test switches are included with the ELTs. Helicopter EBC ELTs are also available on request. EBC-102A is the smallest cabin mounted ELT available. Operating the toggle switch on top of the unit allows manual activation or pre-flight testing of the EBC-102A. The EBC-502 is fully approved by the FAA and FCC under TSO-C91a and is satellite compatible. It uses a 9V battery

pack and comes complete with a handheld lanyard, mounting bracket, and batteries. It is easily installed and requires no external antenna or cable. **Note: EBC-102 portable ELT is manually operated only.**

POINTER 3000 SERIES ELTS

The Model 3000 (AF/AP) and 3000 (AF) which have been in production for twenty years are now revised to incorporate the upgrades of RTCA DO-183 for emergency locator transmitters. The new models, designated 3000-10 (AF/AP) and 3000-11 (AF) are interchangeable with existing units in form, fit and function. The 3000-10 and 3000-11 transmitters incorporate an alkaline battery pack specifically designed to endure the short term extreme thermal variations and mechanical shock requirements of RTCA DO-183. Installed weight is 2.0 lbs. Emergency voice transmission is provided on the 3000-10 transmitter if desired. Size: 3 1/2"W x 7 5/8"H x 2-3/4"D.

ACK TECHNOLOGIES ELT MODEL E-01

This outstanding ELT from ACK Technologies meets or exceeds all of the current requirements of TSO C91-A as specified by the FAA. Exceeds required power output by over 100% and features a coherent beacon designed for satellite detection. Also included is a miniature instrument panel controller for verification and testing of proper operation of the unit. Rated for full salt water immersion which far exceeds FAA TSO requirements. Comes complete with mounting tray, portable external antenna, installation harness, and life raft tether. Uses standard duracell alkaline "D" cell batteries which eliminates high replacement battery costs. Size: 7.75" x 2.75" x 2.75". Wt.: 3.6 lbs. Model E-01 P/N 11-17960.....

ACK 406/121.5 MHZ E-04 ELT

The all new E-04 ELT is a direct replacement for the more than 62,000 model E-01 ELT's (by ACK) on the market today. The new E-04 fits directly into the current E-01 mounting trays and uses the same remote control panel indicator. The E-04 external antenna will utilize your current antenna mounting and wiring installations.

Undergoing certification testing, ACK is not accepting orders for the E-04 until ELT certification process is complete.
Available: Approx. July 15, 2009

Features: * Accepts GPS position input data from Bendix/King, Garmin, Nema 0183 GPS * New antenna is swept back 20 degrees, and features a molded plastic base. * 5 watts @ 406MHz for 24 hours, and 100 Mw @ 121.5 MHz for 48 hours. * New simple plug in audible alert indicator. * New lithium battery pack offers a 5 year battery life, and makes it substantially lighter. * Can use Ameri-king remote panel indicator

POINTER ELT 8000 SERIES

The COSPAS/SARSAT search and rescue network will discontinue monitoring the current 121.5/243.0 MHz frequencies as of Feb. 1, 2009. The 121.5/243.0 MHz frequencies will continue to be monitored on a voluntary basis by overflying aircraft and utilized by the current search and rescue organizations. After this date, the COSPAS/SARSAT will monitor only 406 MHz. The 406 MHz aircraft ELT, defined by COSPAS/SARSAT operational specifications, incorporates many new features and improvements for search and rescue.

To comply with the new requirements, Pointer, Inc is pleased to announce the Model 8000 series ELT. The transmitter design incorporates the functional and programming requirements of COSPAS/SARSAT specification CST.001, FAA RTCA DO-204 and TSO-C126. The Pointer ELT Model 8000 series transmits phase modulated aircraft identification data on the 406 MHz frequency to quickly identify an emergency. The unit also transmits 121.5 MHz frequency for airborne and ground search operations. Optional features include factory or field programming of the microprocessor as a separate module and internal GPS. The approval program is in process and have completed COSPAS/SARSAT testing. FAA testing has begun.

EBC 406-SERIES ELT'S

The EBC 406 is designed with the newest technology. These transmitters have encapsulated electronics and battery packs to provide for added protection against shock, moisture, and other environmental hazards. They have a built-in monitor that emits a loud beeping tone if the ELT is activated. They can be activated either automatically or manually. The EBC 406 AP-Series ELT should be installed in the cabin of the aircraft. Allows for easy removal of the ELT in case of an actual emergency

- just disconnect the external antenna coax cable and attach the survival antenna. The EBC 406 AF-Series should be installed in the tail section of the aircraft for those who prefer that ELT location. In that case, a remote unit is provided for the aircraft panel so the the ELT can be controlled by the pilot. Survival antenna is used when the transmitter is removed from the aircraft. All EBC 406 ELT's have a built-in self test feature that allows the pilot to check 406 power and the antenna-coax connection. Both cabin and tail mount ELT's use an external antenna. **Features:** • Operating Freqs: 406.028 MHz and 121.5 MHz • Output Power on 406 MHz: 5W for 24 Hours at -20C • Output Power on 121.5 MHz: 50mW min for 50 Hours at -20C • Operating Temperature: -20C to +55C • Useful Battery Life: 5 Years or 1 Hour of Cumulative Use • Modulation 406 MHz: Biphase L (16KOG1D) • Modulation 121.5 MHz: Swept Tone 1600Hz to 300 Hz, 2-4 • Times/Second • Automatic Activation: Velocity Change of 4.5 feet per Second • Altitude: 50,000 feet • Decompression: 8000 feet to 40,000 feet • High Pressure: -15,000 feet • Humidity: 95% for 50 Hours • Shock Performance: Withstands 500G's on 6 axes • Vibration: Withstands 10 G's • Immersion: Withstands 24 hours in Salt Water • Warranty: 2 Years, Made in the USA.

| Model | Description | Part No. | Price |
|---------------|---|----------|-------|
| EBC 406AP | For fixed wing aircraft. Includes transmitter, survival antenna, mounting bracket, external whip antenna with cable & battery pack. For cabin/cockpit installation. | 11-05917 | . |
| EBC 406AF | For fixed wing aircraft. Includes transmitter, survival antenna, mounting bracket, external whip antenna with cable, remote control monitor with connector kit & battery pack. For aircraft tail installation. | 11-05918 | . |
| EBC 406APH | Same as AP system but with omni-directional helicopter activation system. For helicopter use only. | 11-05919 | . |
| EBC 406AFH | Same as AF system but with omni-directional helicopter activation system. For helicopter use only. | 11-05920 | . |
| EBC 406HM | Cabin mounted tri-frequency ELT (406.028, 121.5 and 243.0 MHz) Non-reflective flat black for night vision equipment contractility. With integral antenna, omni-directional helicopter activation system and battery pack. | 11-05921 | . |
| EBC-406HM-INT | Int'l | 11-07240 | . |
| EBC 406APM | Same as EBC 406AP but finished in non-reflective flat black for night vision equipment compatibility. Tri-frequency signal. Comes with external rod antenna. | 11-05922 | . |
| EBC 406AFM | Same as EBC 406AF but finished in non-reflective flat black for night vision equipment compatibility. Tri-frequency signal. Comes with external rod antenna. | 11-05923 | . |
| EBC 406APHM | Same as EBC 406APM but with the addition of an omni-directional helicopter activation system. For cabin mounting. Comes with external rod antenna. | 11-05924 | . |
| EBC 406AFHM | Same as EBC 406AFM but with the addition of an omni-directional helicopter activation system. For tail mounting. Comes with external rod antenna. | 11-05925 | . |

| CB-1 | 6ft. cable between ELT and antenna | 11-05935 | . |
| Manual | Operation and Installation Manuals | 11-05936 | . |

AMERI-KING AK-451 PERSONAL LOCATOR BEACON

ACOSPAS-SARSAT & FCC approved, 406 MHz Satellite P-ELT Personal Emergency Locator Transmitter, triple (406 Satellite /243 Military /121.5 Civilian) MHz frequencies. Having triple frequencies insures your distress message reaches both NOAA Satellite Operation and US Air Force AFSR Ground Operation, Search and Rescue Team, with 100% confidence, due to transmitting on both 243.0 Military and 121.5 Civilian bands, for immediate ground search dispatch, narrowing the searching time to the minimum. The Position accuracy of the 406 MHz satellite signal is about 110 meters at 9.5 degree Cross Track Angle (found in Satellite Qualitative Test at a COSPAS-SARSAT approved Laboratory). Features:• Applicable to all Aviation Uses such as Flying, Gliding, etc. • Harsh/ Robust/ Heavy Duty P-ELT in an enduring composite Emergency Carrying Case. • Ultra long lasting Battery Package, up to 78 hours @ -20 deg C, end of life, 10 years useful life time Lithium type, LiMnO2, 4 D-Size. P/N 11-06305.....

AMERI-KING AK-450 ELT

The AK-450 ELT from Ameri-King is FAA TSO-C91a approved & meets FCC rule for improved satellite detection. It features voice transmitting capability, visual "on" lights for both ELT main unit and remote panel, and uses standard Duracell batteries (included). Includes low drag aircraft antenna, portable antenna, remote control panel, wiring and coaxial cable assembly, handheld lanyard web, mounting tray and clamp. Size: 4.27" w x 2.95" h x 5.64" l. Wt: 2 lbs., 10 oz. 2 yr factory warranty **ATTENTION:** 2009, the international COSPAS-SARSAT satellite system will no longer provide satellite-based monitoring of the 121.5/243 MHz frequency. After the date of the satellite termination, in 2009, 121.5 MHz signals transmitted from ELTs operating on the lower frequency will only be detected by ground-based receivers such as local airport facilities or air traffic control facilities or by overflying aircraft.....P/N 11-02790 ELT for helicopter (6 axes) AK450-1.....P/N 11-01249 AK-450 Cable AssemblyP/N 11-04973 AK-450 Remote SwitchP/N 11-04937 AK-450 Coaxial Assembly.....P/N 11-04938 2 Year WarrantyP/N 11-05793 AK-450 antenna 450017P/N 11-03303

AMERI-KING AK-451 ELT

*Mic jack feature not available on 406 MHz ELTs FAA TSO'd approved, EASA ETSO'd approved, 406 MHz ELT Emergency Locator Transmitter Types (AF) Automatic Fixed, & (AP) Automatic Portable. It transmits aircraft position data, immediately and accurately, on triple (406 Satellite /243 Military /121.5 Civilian) MHz frequencies. Having triple frequencies insures your distress message reaches both NOAA Satellite Operation and US Air Force AFSR Ground Operation, Search and Rescue Team, with 100% fully confidence, due to transmitting on both 243.0 MHz Military and 121.5 MHz Civilian bands, for immediate ground search dispatch. **Package Includes:** * AK-451 w/ Battery (AF/AP ELT) * Portable Antenna * Whip, Rod, or Blade Antenna * Remote Switch * Prefabricated 25 Foot Wiring Harness Assembly * Audible Buzzer Monitor * Six Foot Coaxial Cable Assembly * Mounting Tray * Velcro Holder * Portable Soft Case

KANNAD 406 ELT'S

KANNAD 406 AF (6D) - Designed to be installed near the tail and to be connected to an outside antenna. A sophisticated 6 way "shock sensor" system will activate the ELT automatically in the event of a crash. Its small size and light weight makes it ideal for any helicopter. The "Mounting Bracket, 1 Strap" is not included. Features: * Automatic Fixed ELT * Specifically designed for aircraft or helicopters * Fitted with 6 G-switches * Three frequency transmitter (121.5 / 243.0 / 406 MHz) * 6 year battery life-time * Short circuit protection * Weight: 1260 gr (max)

P/N 11-05786

KANNAD 406 AF - Designed to be installed near the tail and to be connected to an outside antenna. A sophisticated "shock sensor" system will activate the ELT automatically in the event of a crash. Its small size and light weight make it ideal for general aviation. The "Mounting Bracket, 1 Strap" is not included. Features: * Optional Navigation Interface transmits GPS coordinates significantly shortening Search and Rescue response time. * Operates without aircraft power and incorporates an internal alarm/buzzer avoiding costly installation procedures. * Six year lithium manganese battery. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight: (Including batteries) 2.44 lbs (1110 g) / max 2.60 lbs (1180g)

P/N 11-06285

406 AF ELT International..... P/N 11-06987

KANNAD 406 AF-H - Can be installed on board helicopter in flat position Features: * Optional Navigation Interface transmits GPS coordinates significantly shortening Search and Rescue response time. * Operates without aircraft power and incorporates an internal alarm/buzzer avoiding costly installation procedures. * Six year lithium manganese battery. * Rod (ANT300) or Blade (ANT650) ELT antennas sold separately. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight: (Including batteries) 2.44 lbs (1110 g) / max 2.60 lbs (1180g) P/N 11-05790

406 AF-H ELT International..... P/N 11-07559

KANNAD 406 AS - The KANNAD 406 AS is a aeronautical survival beacon. Thanks to its small size and light weight, the Kannad 406 AS fits easily inside a liferaft. It is supplied with a floating collar. Features: * Battery replacement is only every 6 years. * Precise pinpointing (<1NM) due to the unparalleled frequency accuracy of the 406 transmitter. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight (including battery, auxiliary antenna and floating collar) 2.53 lbs (1150 g)..... P/N 11-05787

KANNAD 406 SURVIVAL - Fitted with a water switch sensor. It is automatically activated when in contact with water. Emergency locator transmitter of type (S), the survival is supplied with a floating collar. Features: * Six year lithium battery. * Includes water sensor switch and is automatically activated when in water. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight: (including battery, auxiliary antenna and floating collar) 3.031 lbs (1375 g)..... P/N 11-06287

KANNAD 406 AP - Installed near the tail and connected to an outside antenna. A sophisticated "shock sensor" system will activate the ELT automatically in the event of a crash. When removed from the bracket and connected to the auxiliary antenna, the Kannad 406 AP becomes an autonomous survival beacon operating on 3 frequencies (121.5/243/406 MHz). Features: Operates without aircraft power and incorporates an internal alarm/buzzer * Six year lithium manganese battery. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight: (With battery, bracket, and auxiliary antenna) 2.84 lbs (1290 g)..... P/N 11-06284

406 AP ELT International..... P/N 11-07558

KANNAD 406 AP-H - Installed on board helicopter in a flat position. When removed from its bracket and connected to the auxiliary antenna, the Kannad 406 AP-H becomes an autonomous survival beacon operating on 3 frequencies. (121.5/243.0/406 MHz). The "Mounting Bracket, 1 Strap" is not included. Features: * Ultra small size and light weight ideal for any helicopter installation. * Optional Navigation Interface transmits GPS coordinates. * Operates without aircraft power and incorporates an internal alarm/buzzer. * Six year lithium manganese battery. * Three frequency transmitter (121.5 / 243 / 406 MHz) * Weight: (With battery, bracket, and auxiliary antenna) 2.84 lbs (1290 g)..... P/N 11-05788

406 AP-H ELT International..... P/N 11-07557

KANNAD 406 AF-COMPACT ELT KIT - Designed for all light aircraft requiring a very compact automatic fixed ELT that is fully FAA TSO-C126 approved. The robust and reliable shock sensor will automatically activate the ELT in the event of a crash, the pilot can also manually activate the ELT in case of emergency. Features: * Ultra small size and light weight ideal for any general aviation aircraft. * Six year lithium manganese battery. * Complete kit with install manual. * Two frequency transmitter (121.5 / 406 MHz) * Weight (Including batteries): 1.87 lbs (850 g) / max 1.92 lbs (875 g)..... P/N 11-05786

406 AF-Compact, International..... P/N 11-0631

KANNAD 406 XS-3 GPS

A personal COSPAS-SARSAT beacon with built-in-GPS. Complies with class 2 of the Cospas-Sarsat global system. Programmed with a unique serialised code that must be registered with national authorities. This enables the identification of the beacon owner as well as the environment where the beacon is used (land, air, marine). This information is vital for search and rescue operations to gain precious time. Comes with a very resistant pouch for multi-environmental use. The beacon is buoyant, watertight and remains attached to its pouch. Lies naturally flat on the ground for optimum use in hostile conditions. The antenna is easily unfolded when the beacon is used. An advantage is that the antenna folds back into place around the housing for protection P/N 11-06295

406 XS-3 International..... P/N 11-06620

KANNAD ANTENNAS

ANT300 - ROD ANTENNA - Small whip for radiation on the COSPAS-SARSAT 3 frequencies (121.5 / 243/406 MHz). Speed rating up to 300 - 350 kts. Metallic base plate with 3 fixing holes. BNC connector (female out). Impedance: 50 ohms. VSWR (relative to 50 ohms):<1.7:1. Weight: 0.33 lb (150 g). Antenna height: 15.56 in (395 mm) **Applications:** * AF-Compact, AF, AF-H, AS, AS-H P/N 11-06292

ANT 110 - AUXILIARY ANTENNA (TNC) - Turns Kannad ELT (AF & AF-H) into a portable survival unit. Stores under the velcro strap of the mounting tray. **Applications:** KANNAD 406 AS (TNC) and SURVIVAL model **Caution:** A KANNAD 406 AF associated with an ANT10 cannot be used as an KANNAD 406 AP even if it may look identical P/N 11-06289

ANT100 - AUXILIARY ANTENNA (BNC) - Auxiliary Whip antenna. Turns any Kannad ELT into a portable survival unit. Stores under the velcro strap of the mounting tray. P/N 11-06288

ANT200 - WHIP ANTENNA - Dual frequency antenna (121.5 / 406 MHz) Speed rating up to 250 kts. Can easily be installed through a single hole (Ø 13 mm, 0.515 in.) in the aircraft skin. BNC connector (female out). Impedance 50 ohms Antenna Height: 24 in (609.6 mm) **Applications:** AF-Compact P/N 11-06290

ANT650 - BLADE ANTENNA - Developed by RAYAN. Three frequency antenna (121.5 / 243 / 406 MHz) High performance low profile outside antenna designed for Corporate jets and airliners **Applications:** AF, AF-H, AS, AS-H "High Speed" Aircraft * JTSO and TSO P/N 11-06294

KANNAD ACCESSORIES

RC200 - REMOTE CONTROL - Outline Dimensions: 1.3 x 1.97 x 1.69 in (33 x 50 x 43 mm). 3-position red switch (ON, ARMED, TEST/RESET). D-SUB 9 pin connector with threaded locking device (UNC 4-40) .The Kit includes mating SUB-D9 connector for easier installation. **Applications:** AF-Compact, AF, AF-H, AP, AP-H **Switch is not waterproof. Cannot be installed flat.** P/N 11-06302

BAT300 - BATTERY REPLACEMENT KIT - **Application:** AF, AF-H, AP, AP-H, AS, Survival Comes with 3 cell battery pack, replacement o-ring, desiccant pack and replacement self locking nuts. P/N 11-06296

MOUNTING BRACKET 1 STRAP - Designed to fix the ELT with a retaining strap for quick removal in an emergency Qualified to maintain the ELT into place during 500 G shocks for 4 ms. **Applications:** AF, AF-H, AP, AP-H P/N 11-06301

PROGRAMMING DONGLE, ASSY - Din 12 connector with serial memory module (SMM) for programming operations. Fitted with a female DIN12 connector on RCP side instead of 19 Pts Jaeger connector. Contains the aircraft identification data Avoids the use of specific programming equipment such as PR600 + Computer in case of ELT replacement. **Compatible** with all KANNAD 406 ELTs P/N 11-06304

DIN12 CONNECTOR - For connection to Remote Control Panel, CSI44 interface module, dongle or programming equipment. **Compatible** with all KANNAD 406 ELTs P/N 11-06303

KANNAD PROGRAMMING DONGLE - A smart connector identical to the DIN12 that is used to store aircraft programming information. Once attached to the ELT wire harness it allows fleet operators to move any ELT to any other aircraft. The stored aircraft data will be automatically downloaded into the ELT. This connector is used in place of the DIN12 connector. Required for Navigation Interface connection. P/N 11-07088

KANNAD PROGRAMMING DONGLE INT - Can be use with the following Kannad ELT models: (AF-COMPACT, AF, AF-H, AP, AP-H, AS, SURVIVAL) P/N 11-06990

KANNAD 406 PR600 ELT PROGRAMMING TRAINER - Replaces the former PR550 Programming Equipment kit. P/N 11-07102

KANNAD 406 AS CARRY OFF BAG - P/N 11-07716

KANNAD 406 AS CARRY OFF BAG SHORT - P/N 11-07717

KANNAD 406 AS MOUNTING BRACKET - P/N 11-07718

KANNAD 406 AS LOCKING PIN - P/N 11-07719

ARTEX ME406 ELT

The Artex ME-406 is a single output ELT. Two emergency frequencies (121.5 and 406.028 MHz) utilize the same RF output, requiring only one coax cable to connect to the new series of Artex single input antennas.

The ELT automatically activates during a crash and transmits the standard swept tone on 121.5 MHz. Every 50 seconds for 440 milliseconds the 406 MHz transmitter turns on and transmits an encoded digital message to the Cospas/Sarsat satellite system. The mounting hardware for the ME-406 Series is compatible with all previous models of Artex 406 MHz, as well as the ELT200 Series, ACK, Pointer Model 3000 ELT and Narco ELT's. Current owners of Artex 2-frequency ELT can re-use the remote switch in the cockpit as well as the wiring harness from the cockpit to the ELT thus greatly reducing installation costs.

ARTEX C406 ELT

This system operates on the latest Search & Rescue (SAR) frequency of 406.025 MHz in addition to 121.5 243 MHz. Comes ready to connect to the Artex ELT NAV interface, which enables the ELT to transmit Latitude and Longitude data (P/N 455-6500). Includes ELT transmitter, LiMnO2 5-year battery pack, mounting bracket, remote switch, horn/buzzer, coax cables, high speed blade antenna, installation hardware, and installation and operation manual. The C406- antenna system is approved for aircraft operating speeds up to Mach 1, and C406-2 is approved for speeds up to 350 knots. The C406-1 uses a single connector antenna and a single coax feed cable to accommodate all 3 frequencies. COSPAS/SARSAT, FAA TSO C126 & JTSO-2C126 Approved. C406-1 ELT with 110-340 Blade Antenna ...P/N 11-02984 C406-2 ELT with Rod AntennaP/N 11-02985

ARTEX 2-WIRE REMOTE INTERFACE SYSTEM

This product allows an upgrade to an Artex 5-Wire 406 MHz ELT using an existing 2-wire configuration. The 2-Wire Remote Interface allows two wires from the existing wiring harness to connect the cockpit remote switch to the ELT for simplified, cost-efficient installation.

P/N 11-07776

ARTEX C406-N ELT

The Artex C406N is a single output ELT that incorporates latitude/longitude information from the aircraft navigation system. By use of an optional programming adapter, the ELT can also be programmed with the aircraft's 24-Bit

address for fleet operators as well as other custom programming. All 3 emergency frequencies (121.5/243.0 and 406.028 MHz) utilize the same RF output, which requires only 1 coax cable to connect to the new series of Artex single input antennas.

The ELT automatically activates during a crash and transmits the standard swept tone on 121.5 and 243.0 MHz. Every 50 seconds for 520 milliseconds (long message protocol) the 406.028 MHz transmitter turns on and transmits an encoded digital message to the Cospas/Sarsat satellite system. Also available is the Artex C406-N HM, which is equipped with a 6 axis "G" switch for helicopter installations.

ARTEX G SERIES EMERGENCY LOCATOR TRANSMITTER

The Artex G406-4 transmits on all 3 emergency frequencies (121.5/243.0 and 406 MHz). The ELT automatically activates during a crash and transmits the standard swept tone on 121.5 and 243.0 MHz. The G406-4 also transmits a 406.025 MHz encoded digital message to the Cospas/Sarsat satellite system, which allows for rapid identification and reduces Search and Rescue response time. The G406-4 has been tested to meet the rigorous requirements of TSO C126 including 500 G shock, 1000 pound crush as well as flame and vibration tests.

The G406-4 is available for use with Artex's low cost whip antennas or a sturdy fiberglass rod antenna. The G406-4 also may be interfaced with the Artex ELT/NAV Interface which enables latitude and longitude data to be transmitted as part of the 406.025 MHz message. The G406-4 is value priced to meet your ELT needs.

ARTEX ME406/P ELT

The ME406/P (automatic, portable) is using the proven technology of the ME406 and attaching a removable wrap-around auxiliary flex antenna. It allows the disconnection of the ELT from the installed aerial antenna, removal of

the transmitter from a downed aircraft and after attaching the flexible antenna the distress call is again transmitted with full signal strength to reach the COSPAS-SARSAT satellites. Although Search and Rescue authorities recommend to remain in close proximity to the aircraft, using the ME406/P in it's portable version enables to wait for the Search and Rescue crews in areas sheltered better from the environment.

USA ProgrammedP/N 11-05671
International Programmed.....P/N 11-06985

ARTEX ELT NAV INTERFACE WITH 24 BIT

The Artex "ELT to NAV Interface" is designed to be connected between the aircraft's Flight Management Computer (FMC) or GPS receiver and the Artex 406 MHz series of ELT's. Receives continuous position updates from the aircraft's navigation system and translates it for use by the ELT. Upon activation, the ELT transmits digitally the Latitude and Longitude of the aircraft to the COSPAS/SARSAT satellite system. Allows SAR forces to launch an immediate mission to the last known position of the aircraft. P/N 11-05270

PERSONAL LOCATOR BEACONS

MICROFIX 406 GPS PERSONAL LOCATOR BEACON

In an emergency, the MicroFix™ transmits on 406 MHz via the COSPAS-SARSAT satellite system with the sender's unique registered, digitally coded distress signal. Once activated by a single button, the MicroFix's built-in 12 channel parallel GPS acquires then transmits LAT/LON message to reach local rescue centers with exact coordinates to within 110 yards (100 meters). Simultaneously transmits a signal on the 121.5 MHz (SAR homing frequency) to assist rescuers home in once in the general area. Additional unique MicroFix™ features include: Full functional self-test of internal circuitry, battery voltage and power, 406 MHz transmission and GPS acquisition—an ACR exclusive. 1.4 x 5.85 x 2.21 (35.5 x 149 x 56 cm), 10 oz (285 g). Typical operating life: 40 hrs at -4°F (-20°C) and 8 hrs at -40°F (-40°C). Two Class II lithium battery packs. Five-year replacement cycle (11-year storage). Waterproof up to 16 ft (5 m) at one hour and 33 ft (10 m) at ten minutes. A flat, stainless steel antenna wraps compactly around the unit for easy stowage, and is ready for rapid deployment. 406 GPS Beacon P/N 11-05531.....
406 GPS Canada..... P/N 11-05898.....

ACR 406 PERSONAL LOCATOR BEACON

TerraFix™ 406 GPS I and TerraFix™ 406 GPS I/O Personal Locator Beacons. The same quality that's made ACR the world leader in safety and survival technologies will be available to protect you outdoors. When you activate the TerraFix™ 406 GPS Personal Locator Beacon, it sends your signal to one of seven satellites that continually circle the globe. This signal is then relayed to a ground station so search and rescue personnel can be notified. In less than an hour, aid can be on its way. After several passes, the satellite pinpoints the PLB's location to within a 2.5 miles. Interface a GPS receiver or utilize the onboard GPS (P/N 2798.4 only), and your precise position is sent immediately. 406 Locator Beacon with out GPS..... P/N 11-04759.....

ACR AEROFIX / ONBOARD GPS 2799.4NH BEACON

Internal GPS, FastACQ GPS technology and an external GPS optical interface. The LAT/LON are transmitted, providing rescue agencies the exact position to within 110 yards. At a mere 3.03"L, 1.74"W, 5.71"H and weight of only 12 oz., this is the smallest and lightest P-ELT around! Full functional self test of internal circuitry, battery power, 406 MHz transmission, and GPS acquisition (P/N 2799.4 only). Floats to avoid loss if dropped in water, exceeds 1 meter (3.3ft) requirement, tested to 5 meters (16.5ft) Size: 1.74 x 5.71 x 3.03 in (4.4 x 14.5 x 7.7cm) Weight: 12 oz. (343 g) w/o holster; 13.3 oz. (378 g). Waterproof: 5m (16ft) @ 1 hour, 10m (33ft) @ 10 min. Deployment: Manual Operation: Deploy antenna, press both test buttons simultaneously Certification: FCC Approved (Model :PLB-200/201) Limited Warranty: 5 years P/N 11-07709.....

FASTFIND PLUS 406 PLB WITH BUILT-IN GPS

In the event of an emergency, an alert signal is transmitted to COSPAS-SARSAT satellites and forwarded to a rescue coordination center within typically 3 minutes. The built-in GPS receiver will provide latitude and longitude coordinates to give a position to within typically 98 feet anywhere in the world. The Fastfind Max-G comes complete with lanyard and designer splashproof carry case to enable users to keep the PLB safely attached at all times. Features * 48-hour effective transmit time * Built-in GPS * Weighs just 9 oz. * Global alert to Cospas-Sarsat satellites * 406MHz transmitter * Frequency: 406.037MHz * 121.5MHz homing frequency * Positional accuracy to within 10 feet * Floats * Waterproof to 38 feet * Complete with lanyard and designer carry case * User replaceable battery packs (-4°C°F / -20°C) Specifications * Message Formats: PLB National, Standard and User Location Protocol as applicable. * Programming: Via RS232 light pen and windows based PC. * Temperature: Storage: -67°C°F to + 158°C°F (Class 1). * Operating: -4°C°F to + 131°C°F (Class 1) with class 1 battery pack. * Storage: -22°C°F to + 158°C°F (Class 2) Operating: -4°C°F to + 131°C°F (Class 2) with class 2 battery pack. * Battery life: 5 years storage then 48 hours operating * Sealing: BSEN 60945 temporary immersion MIL-STD-810F method 500.4 15000 feet altitude. * Weight: Approx. 10 oz. with -20 battery pack. * Approvals: R & TTE Approved, International Approvals to follow, and 0.75Cd Xenon discharge light. SPOT SATELLITE PERSONAL TRACKER

The World's First Satellite Messenger. Whether you're just checking in, allowing others to track your progress, or calling for help - SPOT gives you a vital line of communication with friends and family when you want it, and emergency assistance when and where you need it. And since it utilizes 100% satellite technology, SPOT works around the world - even where cell phones don't. Message Export: You can now download your messages to 3 different formats: * KML (xml format compatible with Google Earth) 8 GPX - the GPS exchange format. Compatible with many different applications * CSV (comma separated ascii file) Functional Specifications: SPOT features four key functions that enable users to send messages to friends, family or emergency responders, based upon varying levels of need: * Alert 9-1-1 * Ask for Help - Request help from friends and family in your exact location. * Check In - Let contacts know where you are and that you're okay. * Track Progress - Send and save your location and allow contacts to track your progress using Google Maps™. Annual Service fee required. Please call or email for current rates, P/N 11-05829.....

SPOT CARRYING CASES - Carrying cases feature: * Ballistic nylon construction is rugged, yet lightweight * High Quality Heavy-duty rotating Nitelze™ clip for comfortable positioning * Designed for carrying on a belt when not in use, or shoulder strap while in use

XCOM GME MT410G PERSONAL LOCATOR BEACON WITH GPS

GME MT410G Accusat PLB (Personal Locator Beacon) 406 Mhz EPIRB with GPS. Features: *High location accuracy - MT410 within 5km, MT410G (with GPS) <45m. * Instantaneous 406MHz transmission - unique to GME. Less than 1 minute acquisition time (GPS version only). Unique digitally coded message enables Rescue authorities to confirm owners identity within minutes. * LED strobe light. * 7 year battery replacement period. Duration: in excess of 24 hours at -20C, longer at higher ambient temperatures. * Floats in water. * Supplied with Wrist/Neck strap, Carry Pouch with belt loops. * Meets UN requirements for transport as Non-hazardous cargo on board passenger aircraft P/N 11-05665.....

MCMURDO FASTFIND PLB WITH GPS

Get Found FAST with a PLB as small as a mobile telephone. Fits easily into backpacks, on lifejackets...put it just about anywhere, and get found anywhere in the world! No subscription fees are required, and weighs just 5.3 oz. Features: * Fastfind 210: Category 2, will not float * Programming: Optical infra-red link * Operation: Three-stage manual operation * Temperature : Class 2, -20°C to +55°C, (-4°F to +131°F) * Battery type and life: 9V Lithium; 5 years storage, then 24 hours operating * Sealing: Temporary immersion to 10m (30ft) for 5 mins. (IP 58, IPX7) * Weight: 150g (5.3 oz) * Altitude* MIL-STD-810E (10,000 feet) * Antenna: Deployable flexible vertical blade * 406MHz Transmitter * Frequency : 406.037MHz * Output power: 5 Watts, +/- 2dB 121.5 MHz Transmitter * Frequency : 121.5 MHz +/-3kHz * Output power: 50mW, +/-3dB PERP * Homer sweep direction: UP or DOWN * Applied Standards: COSPAS-SARSAT, T.001/T.007 class2, RTCM SC110 STD 11010.2, ETSI EN 302-152-1, AS/NZS 4280.2, NSS-PLB06 * SOS Flash: Morse code SOS pattern (30 operations allowed) * Haz-Mat: Non-hazardous Shipping: Air or ground..... CAMERA SYSTEMS - STRIKEFINDER®

SHADIN AMS 2000 ALTITUDE MANAGEMENT AND ALERT SYSTEM

With a range of feature previously unavailable in general aviation, the Shadin Avionics AMS-2000 Altitude Management and Alert System brings advanced instrumentation to new levels of function and affordability. The Shadin Avionics AMS-2000 uses information from Mode-C altitude encoder to deliver:

- Time-based Altitude Alerting, rather than fixed altitude buffers.
- Automatic calculation and display of Density Altitude.
- Real-time display of IVS without the inherent lag of your aircraft's static system.
- Calculation and display of Aircraft and Engine Performance • Percentage, at your demand.

These are but a few of the Standard features that are make the AMS-2000 the best value in advanced altitude monitoring instrumentation: 8 FAA approved. TSO C88a, DO-160B. • An appropriate audio and visual warning broadcast upon deviation outside a user-selected envelope surrounding your assigned altitude. • Smooth capture of your cruise altitude is facilitated by a level-off warning sounded and displayed at a user-defined distance from target altitude. • Alerts you just above your pre-selected Decision Height or MDA. • Gear-down reminder. • Displays density altitude and aircraft/engine performance percentage. • Digital display of altitude from -1000 to +62,000 feet in 100 foot increments. • Adjustable audio alert tone and level. • Compatible with most Mode-C transponders in current production. • Standard rectangular 1/2 ATI configuration. • Made in the U.S.A., the AMS-2000 features a 12-month warranty.

The AMS-2000 coupled with the Falcon Altitude Encoder provides all advanced altitude alert functions previously noted, plus the following high-resolution altitude management functions:

- Time-based level-off warning sounded and displayed 15 seconds from target altitude—smooth capture is assured regardless of climb or descent rate.
- Digital display of altitude from -1000 to +62,000 feet in high resolution, 10-foot increments.
- Digital reading of Instantaneous Vertical Speed (IVS).
- Deviation envelope is adjustable in 10 foot increments P/N 10-03711
- Falcon Altitude Encoder P/N 11-12035

STRIKE FINDER® DIGITAL WEATHER AVOIDANCE SYSTEM

The STRIKE FINDER® Digital Weather Avoidance System detects and analyzes the electrical activity emanating from thunderstorms within a 200 nautical mile (nm) radius of the aircraft. A unique graphic display plots an accurate, reliable and easily-interpreted picture of electrical activity, that you can use to circumnavigate the hazards associated with thunderstorms.

The STRIKE FINDER® System analyzes the individual strike signal properties to determine the bearing, range and severity of the activity. Strike data is plotted on the display as single orange dots by range and azimuth, in relation to the aircraft symbol ("heads up"). As the number of lightning strikes increase, so does the number of plotted strike dots. Cells start to form indicating increased lightning activity.

Must be installed by Advantage Avionics or another approved StrikeFinder dealer except for experimental aircraft.

INSIGHT TAS 1000 AIR DATA COMPUTER WITH WINDICATOR

Today's modern avionics integrate many functions with your GPS, but standard installations leave many important features untapped. The TAS 1000 Multi-Function Data Source was specifically designed to supply all the information needed to fill in the missing pieces of your GPS or MFD display in real-time. TAS 1000

provides the pilot with a wealth of useful information all based on real time measurements of airspeed, altitude, temperature, fuel flow, heading, ground speed and track. Designed to interface with many brands of GPS, TAS 1000 unlock many previously hidden data pages in most GPS navigators. In addition to TAS 1000s in flight advisory function, TAS 1000 can also serve as a backup altimeter, airspeed indicator or fuel flow meter. The TAS 1000 is designed for use in any piston, turboprop, or jet aircraft and provides a full compliment of features when interfaced to a slaved compass system or HSI, fuel transducers, and compatible GPS system. TAS 1000 will deliver a useful subset of features even if all the interfaces are not available.

The Windicator is an integral part of the TAS1000 system. It presents a previously unavailable graphical display of the winds aloft in real time. The Windicator information alone is so useful that it makes the TAS 1000 installation worthwhile. TAS 1000 system options include an altitude encoder to provide altitude information to a transponder or GPS unit as well as alerting the pilot with overspeed, altitude, approach & altitude difference alerts.

MUST BE DEALER INSTALLED.

SPIDERTRACKS Spidertracks (A Portable Real-Time Flight Tracking Solution)

Portable global tracking solution using GPS and Iridium satellite network * Antennas integrated in spidertracks unit * Cost effective through portability (no installation certification required) * Simple to install and use * Iridium satellite

network - real time, gap free, guaranteed reliability * Can save money through flight-following and better planning/logistic management Track any mobile asset anywhere in the world. * Easy to use on completely secure web-interface, accessible from anywhere in the world * Simple data update configuration based on user definition * Reporting location based on distance, time or combination of both * Commercial configuration allows tracking of all units in a fleet with one log-in on website * Two-way communication between pilot and the operations based with the optional keypad P/N 11-06980

FLYCAM 1000 VIDEO MONITOR SYSTEM

Fuselage or wing mountable waterproof Day/Night • Color CCD camera coupled with a multi-purpose • 6.8 Inch LCD Video Monitor and complete cable assemblies. • Rugged design made to commercial aircraft quality and performance standards at a low price point • This high-resolution 6.8 Inch LCD Video Monitor delivers picture clarity and color reproduction to view clear detail and waypoints. • Robust Video Input processor rejects video noise and can operate with any +14V or +28V DC electrical system. **Features:** * Use to monitor forward and under views of aircraft that may be blocked during taxiing, take off, landing, or while in flight. Also useful for waypoint verification or landing gear monitoring. * Use in Day or Night with very low light CCD camera. * Ideal for all small aircraft particularly tail dragger type aircraft. *Multi-function LCD Video Monitor will work all NTSC sources so it can be used as a high quality monitor for additional video cameras, DVD players or moving map sources when not being used for the FlyCam. May be used with a simple low cost video input switch. * Simple Interface requires a single external momentary switch for Dimming controls of the LCD Monitor for Day or Night time operation. Three dimming modes: High, Medium, and Low Level (Night Mode). On Screen Display feedback shows the operational mode. * Shock and water resistant LCD Monitor and Camera components. High strength aluminum construction.

FLIGHT OP EFIS

FLIGHT OP EFIS

The Flight Op EFIS features advanced functionality including WAAS/GPS, 3D synthetic vision with integrated terrain warning and traffic, highway-in-the-sky (HITS), a full color moving map, flight planning and engine monitoring all displayed on large, sunlight-readable screens. The display units are available in either portrait or landscape orientation to accommodate a variety of instrument panels. With a Dual screen package, the second display unit can operate as either a second EFIS or a powerful MFD, capable of displaying a full-color moving map with traffic, terrain and weather overlays, a full-screen engine monitoring page, or an approach view showing both lateral and vertical approach views. All Sport EFIS and Flight Op EFIS packages include an AHRS, a WAAS/GPS receiver and an air data computer. Display Units can be upgraded to add an external video interface to support a FLIR camera or other video input. Contact us for ordering instructions for the FLIR/Video interface.

FLIGHT OP INTEGRATED

Flight Op Integrated is the evolution of experimental avionics. The normal cluster of radios, GPS receiver, and transponder are removed and replaced with remotely mounted components. Radio frequencies are tuned and transponder codes are set in the Integrated EFIS and MFD display units. Flight Op Integrated is offered in eight standard packages or custom packages may be specified by choosing individual components to suit specific needs. Integrated packages feature display units with additional communications channels to support more devices than the standard Flight Op packages. "Single" packages include a single display unit while "Dual" packages include two display units. All packages include an AHRS, a WAAS capable GPS receiver, an air data computer, a Mode C transponder, dual Comm radios, a VOR/LOC/GS receiver, an audio panel with marker beacon and a wiring harness¹ to support all of these components. Additional display units can be added to a package for an additional price. The Integrated packages can support up to 4 display units. Display Units can also be upgraded to add an external video interface to support a FLIR camera or other video input. Contact us for ordering instructions for the FLIR/Video interface.

DYNON

DYNON EFIS-D10A

Dynon's EFIS-D10A is the most popular Electronic Flight Information System on the market today. This instrument fits into a standard 3-1/8" panel hole, making it an ideal candidate for replacing vacuum and electric attitude indicators. This innovative design consolidates all your flight instruments into a sunlight-readable, 4" diagonal, color LCD. Key safety features include Dynon's optional Angle-of Attack/ Pitot design that alerts pilots of potential stall conditions and an optional Li-ion backup battery which will keep the instrument running for 2 hours in the event of a power bus failure.

Instruments included: • Attitude Indicator • Airspeed Indicator • Altimeter • Vertical Speed Indicator • Gyro-Stabilized Compass • Heading • Turn Coordinator/Ball • Turn Rate • Clock/Timer • G-Meter/Voltmeter • Angel-of-Attach(w/ optional Dynon AOA pitot) • HSI • Serial altitude encoder output to your transponder ALL SENSORS INSIDE -Includes 15 solid-state sensors all inside the instrument housing eliminating any complicated installation problems. If desired, an optional external compass/magnetometer and outside air temperature probe may be added to your system. Not for certified aircraft.

DYNON EFIS-D100

Dynon's EFIS-D100 is the most affordable large screen Electronic Flight Information System on the market today. Based on the best-selling EFIS-D10A, the 7" wide-screen display features large, easy to read text and graphics and is capable of displaying multiple pages side by side in a split-screen format. Includes all of the instruments and features of the EFIS-D10A.

DYNON EMS-D10 ENGINE MONITORING SYSTEM

Ergonomically engineered engine monitor that blends traditional analog gauges with newer digital technologies to provide a user-friendly instrument that enhances safety and peace of mind. With up to 27 separate inputs available, the pilot's workload is significantly reduced as the EMS-D10 continuously monitors all sensor inputs for the powerplant, fuel and other miscellaneous systems and immediately annunciates any abnormality requiring attention. A multi-page display environment provides pilots with an excellent systems overview coupled with the added capability of presenting additional detail upon demand to optimize overall management of the various systems. Color graphic screen presentations promotes easy visual scanning for interpretation of the current measurements relative to their normal/abnormal operational limits. When connected via the Dynon bus, the EMS-D10 can display data from any Dynon EFIS.. To keep the look and feel of the EFIS series, the EMS-D10 utilizes the identical sunlight visible, color display, keypad and bezel that preserves the look and feel while additionally allowing greater panel uniformity. Once past the common user interface, the electronics support are very different between the EFIS series and EMS-D10 engine monitoring system. EMS-D10 Instrument only P/N 10-01160.....

DYNON HS34 HSI EXPANSION MODEL

Optional expansion module that extends the HSI function already built into and displayed on Dynon's EFISs. This panel-mounted device not only expands the HSI functionality but also enables several new features for any Dynon EFIS, EMS or FlightDEK instrument to which it is networked. Offers greater flexibility when configuring new aircraft panel systems and facilitates future expansion if so desired. Available in the horizontal and vertical mount configurations. Allows Dynon

products to be interfaced to multiple radios and GPS devices at the same time. Includes multiple interfaces to accommodate analog, ARINC-429 and RS-232 inputs plus signals from marker beacon receivers and DME devices. Superior User Interface. Backlit to facilitate night flight conditions. Separate knobs are used for setting the Heading, the Course (OBS) or entering general purpose Values. NAV and Bearing Source buttons that facilitate independent selection over each input. Pilots receive feedback of the currently selected navigation source type from separate GPS and NAV indicator lights. Network connected to Dynon's line of avionics via the Dynon Smart Avionics Bus (DSAB). This two-wire connection not only simplifies wiring but extends individual module benefits to multiple interconnected Dynon instruments. Dimensions: 1.639" wide x 4.903" high x 4.951" deep. Panel Cutout: 1.50" wide x 4.75" tall (3.81 x 12.07 cm). Dynon HS34 HSI Expansion Model - VerticalP/N 10-02590 Dynon HS34 HSI Expansion Model - Horizontal..... P/N 10-02773.....

DYNON AP 74 AUTOPILOT SERVOS

Your Dynon EFIS-D10A, EFIS-D100, or FlightDEK-D180 is your autopilot! Just add servos! For added ease-of-use, the optional AP74 Dedicated Autopilot Interface Module adds panel-mounted controls and LED status lights to your autopilot. It allows you to choose (pre-arm) which of magnetic heading hold, track hold, NAV mode, and altitude hold will be engaged

when you turn on the autopilot. Servo + Mounting Kit Packages:

DYNON

DYNON EMS-D120 ENGINE MONITORING SYSTEM

The EMS-D120 is a large screen Engine Monitoring System (EMS) that blends traditional analog gauges with newer digital technologies. The EMS-D120 replaces up to 16 different types of gauges which are displayed on a stunning 7" diagonal color screen. The sunlight readable, color display and softkey menu system result in a user-friendly instrument that enhances overall safety and peace of mind. What makes the EMS-D120 so powerful is its ability to continuously monitor up to 27 available sensor inputs that cover the engine, fuel and other miscellaneous systems and announce any abnormality immediately upon detection. A split-screen display environment provides pilots with an excellent overview of the system coupled with additional pages of auxiliary information all available upon demand. Each of the color graphic pages are designed to promote easy visual scanning for interpretation of the current measurements relative to their normal/abnormal operational limits. The EMS-D120 key features include leaning via EGT peak detection, fuel computer, user-defined alarm limited via EGT peak detection, fuel computer, user-defined alarm limits and ranges, audio & visual alarms, user-configurable pages, simple setup, English or Metric measurement units, system clock, contact inputs, timers and user-friendly soft key menus. The 854 x 480 high resolution LCD affords split-screen partitioning to display two pages simultaneously. Many of the pages provided offer a high degree of user-defined configurability to accommodate different engine types and pilot preferences. Each screen is easily called up via Hotkey buttons that provide quick access. When wired to other Dynon instruments via the Dynon Smart Avionics Bus (DSAB), the EMS-D120 can additionally display their data whenever called for by the pilot. Dynon now offers an 800 unit super-bright screen option for its EFIS-D100, EMS-D120 and FlightDEK-D180. The enhanced sunlight readability, 854 x 480 resolution and night dimming capability deliver an impressive view no matter how you look at it.

SENSOR INPUTS

- 6 - EGT (Type K Thermocouple)
- 6 - CHT (Type J Thermocouple)
- 2 - Fuel Level (Resistive [0-1 K ohm] or Capacitance [0-5 volt])
- 2 - RPM (Frequency) 2 - Contacts
- 1 - Manifold Pressure (Voltage)
- 1 - Oil Temperature (Resistive)
- 1 - Oil Pressure (Resistive)
- 1 - Fuel Pressure (Resistive)
- 1 - Fuel Flow (Frequency)
- 1 - Amps (Shunt)
- 1 - Volts
- 1 - Turbine Inlet Temperature (Type K Thermocouple)
- 3 - General Purpose (Either resistive or voltage for OAT, Fuel Tanks 3 & 4, Coolant Temp/Press, Carb Temp)

DYNON FLIGHTDEK-D180

Dynon's FlightDEK-D180 integrates its best-selling EFIS and EMS (Engine Monitor System) electronics with a larger 7" diagonal, sunlight readable, color LCD. This instrument boasts a stunning 854 x 480 pixel display that delivers more than three times the resolution offered by competitive units. FlightDEK-D180 provides all your primary flight instruments in combination with a possible 16 engines gauges. Other key capabilities include a built-in altitude encoder and optional Angle of Attack for added safety. A simple softkey menu system facilitates paging through various screens and activating key functions. Audible and visual alarms are immediately announced anytime user-specified limits are exceeded. The price includes a mounting tray, remote compass module and USB-serial converter. Engine probe packages supporting a variety of engines are available as well as other accessories and options that further extend the D180's capabilities. A key benefit that Dynon offers is free lifetime software updates for all its products. **INSTRUMENTS:** Flight: Attitude, Altimeter, Airspeed, Vertical Speed, Gyro-Stabilized Magnetic Compass, Turn Coordinator/Ball, Turn Rate, Clock, Up/Down Timer, HSI, G-Meter, Voltmeter, Altitude Encoder, Angle of Attack with optional Dynon AOA probe. Engine: EGT(6), CHT(6), Fuel Level(2), Fuel Pressure, RPM (2), Manifold Pressure, Oil Temperature, Oil Pressure, Amps, Volts, General Purpose (3- for either OAT, Fuel Level, Coolant Temperature & Pressure, Carburetor Temperature), Contact Inputs (2).

FLIGHTDEK OPTIONS

DYNON EFIS D6/D60

The EFIS-D6 and EFIS-D60 are simpler versions of the well-proven 4" EFIS-D10A and 7" EFIS-D100. The primary functions duplicate a traditional six-pack: airspeed, attitude, altitude, turn coordinator, gyro stabilized heading (DG), and vertical speed, while also adding a voltmeter and altitude encoder. Angle of Attack (AoA) and a battery backup may be added as options. Both products include a remote compass, and the D60 includes Dynon's high brightness screen.

- EFIS-D6 P/N 10-03865
- EFIS-D60 With Super Bright Screen P/N 10-03866

DYNON HEATED AOA PITOT

Most pilots are introduced to the concept of angle of attack during their initial flight training. However, as most GA aircraft do not provide a way to directly measure this critical flight parameter, angle of attack usually becomes an academic notion which is not thought about while flying. Dynon Avionics was the first EFIS manufacturer to realize the importance of angle of attack and offer an affordable, accurate, and useful way to monitor it.

- Standard L-Sharp P/N 10-02158
- Boom style Probe P/N 10-02789

ADVANCED FLIGHT SYSTEMS - GRAND RAPIDS

ADVANCED FLIGHT SYSTEMS AF3400

The AF-3400 can be configured as an EFIS, Engine Monitor, or Combination of both. Both the AF-3400 and AF-3500 systems utilize our Advanced Avionics Bus allowing the pilot and copilot displays to exchange screens. It features a 6.5" (AF-3400) and 8.4"(AF-3500) sunlight readable color LCD display that is 50% brighter than any competitor.

EFIS — Our horizon display is generated from an internal AHRS that is based on certified boards and software. Display features a clear and easy to read airspeed indication with user adjustable color ranges, the altimeter is set using a familiar and convenient adjustment knob, and our heading display is generated from a remote mounted magnetometer. The heading can be displayed on a tape across the top or with our new EFIS DG.

Aircraft Monitoring and Data Acquisition System — Developed from our successful AF-2500 monitor, the system continuously monitors and displays not only all aircraft engine data but several other aircraft functions as well. The display can be customized to the user's preference. Any of the standard instruments can be eliminated or added to the screen.

AOA — Fly safe with AOA! Our patented AOA module can be purchased to drive the display on the AF-3400/3500 screen.

Check the functionality our systems provide, you'll eliminate a surprising number of conventional instruments. Choose one, two, or three AF-3400/3500 displays and configure the system right for you.

GRAND RAPIDS EFIS S200 SPORT

Far beyond a replacement for the traditional six-pack gyro panel, the Sport S200 is the basis for a low-cost, glass-panel cockpit, with features usually found only in the high-end EFIS. Interfaces included in the Sport allow seamless integration with most of the other aircraft's systems, including GPS, NAV radio, autopilot, transponder, EIS engine monitor, and more. Configurable as a single or dual-screens, the Sport S200 is an uncompromising design with the integrity and reliability necessary for it to be primary instrumentation for VFR or IFR flight. Functionality - While other entry level EFIS products provide little more than a replacement of the traditional

six-pack, the Sport S200 starts with attitude, gyro-heading, airspeed, altitude, vertical speed, but includes features such as: * Seamlessly Interfaces to any GPS - Displays flight plan and steering info * Coupling of autopilot to GPS, Synthetic Approach or Heading Select Bug * Complete navigation radio interface and HSI for SL30 Nav/Com * TIS Traffic Display from Garmin GTX330 * Synthetic Approach provides highway-in-the-sky guidance to any runway. * Synthetic view - Display shows runways and obstacles on wide-screen attitude display * Flight path marker - Shows direction of flight relative to runways and obstacles * Continuously computed wind speed/direction * G-Meter * Options for internal GPS, moving map with terrain, graphical engine monitoring. * Slaved directional gyro - never requires setting * Record and Playback function standing tolerance of gyro drift.

P/N 11-05149.....

GRAND RAPIDS EFIS HORIZON

The centerpiece of the EFIS Horizon is its primary flight display. Combined into 1 intuitive display is attitude, navigation and the aircraft's current state. The EFIS Horizon includes a moving map displaying all US airports and nav aids, plus user created waypoints. Engine data is provided to the Horizon EFIS via the proven and well known Engine Information System products. Features include split screens, convenient controls, integrated navigation and attitude, active redundancy, continuous self-testing and a dedicated AHRS processor. All versions of the EFIS Horizon Series I, and EFIS Series I Display unit require a GPS to display GPS related data, and/or an EIS Model 4000 / 6000 / 9000 to display engine data. These items are not included, and must be purchased separately unless otherwise indicated.

EFIS Horizon Series I - The "Horizon" includes both a multi-function display unit, and an AHRS/Air Data Computer, providing primary flight data, with external magnetometer, and cable assembly. Moving map, wind, and GPS related navigation functions require a connection to an external GPS (not included). A cost-effective and superior alternative to traditional instrumentation. For graphical engine data add an optional EIS.

P/N 11-02135.....

EFIS Series I Multi-Function Display - Provides the identical capability of the EFIS Horizon Series I, except it does not include the AHRS/Air Data Computer. Capable of displaying primary flight data (with a connection to an EFIS Horizon Series I, or by adding an AHRS/Air Data Computer), graphical engine monitoring (when connected to an EIS Model 4000/6000/9000 - not included), and moving map (when connected to a GPS - not included). Can be upgraded to a Horizon Series I for the price difference.

P/N 11-02136.....

EFIS Series I Dedicated Display - The low-cost way to add flat panel technology to your airplane. This display unit provides only the primary flight display, OR the graphical engine display, OR the moving map. An excellent way to add one of the three main functions to your airplane, at minimum cost. Flexible upgrade options allow you to add additional functions, without removing the instrument from the airplane. Can be upgraded to include a Horizon Series I for the price difference.

P/N 11-02137.....

Graphical Engine Monitor/Moving Map Package - Same as Graphical Engine Monitor Package above, but also functions as a moving map when connected to your GPS. Includes full and split screen versions of engine monitor and moving map.

P/N 11-02139.....

Dual EFIS Horizon Series I with EIS Model 4000 - Maximum flexibility and redundancy - The dual EFIS Horizon Series I installation performs automatic cross-checks of roll, pitch, heading, airspeed and altitude data. Package price includes 2 display units, 2 AHRS/Air Data Computers with magnetometers, and the EIS Model 4000 Package.

P/N 11-02140.....

Dual Display Package - EFIS Horizon Series I, EFIS Series I Multi-Function Display, and EIS Model 4000 Package. Dual displays allow any data to be displayed on either display. A single AHRS/Air Data Computer drives both displays. The included EFIS also drives both display units. Connect a GPS to both display units, and enjoy the benefits of 2 screens of data. Price includes Model 4000 package.

P/N 11-02141.....

EFIS SINGLE DISPLAY PACKAGE

EFIS is an acronym for "Electronic Flight Information System". The EFIS Horizon. Series I provides primary flight data (attitude, altitude, airspeed, vertical speed, steering), graphical engine data, and a moving map. It is designed as a cost-effective replacement of traditional vacuum-powered mechanical gyros. Unlike mechanical gyros, no maintenance is required, and installation is much quicker, easier, and lighter. Aerobatics, vibration, and temperature do not affect the life of the EFIS, as it is completely electronic. In addition to these benefits, the EFIS Horizon Series I provides data not available with mechanical gyros, such as navigation steering data integrated with the attitude display, an artificial view of the world

showing airports and obstacles just the way they appear out the window, continuously computed winds, and much, much more. Its easy to get excited about the functionality of the Horizon EFIS, but it's more than just features. The Horizon EFIS is engineered from the ground up without compromises. Small details, like a sunlight readable display, wide -15 to +160 deg F operating temperature range, and an attitude/heading reference system (AHRS) that is built to aerospace standards could easily go unnoticed...and that is exactly the idea.

TRUE FLIGHT DISPLAY - EFIS INTEGRA

LS800 TABLET PC

Measures just 8.94" by 6.69" by 0.87" , and it weighs only 2.2 pounds. It's easier to use, stow or transport than any Table PC available today and will easily fit in a lab coat pocket or purse. **Genuine Window® XP Tablet PC Edition Intel® Centrino® Mobile Technology**

• Intel Pentium® M Processor ULV 753 (1.20GHz) • Integrated Intel PRO/Wireless 2200BB • 1GB RAM • 30GB HDD • 8.4" SVGA TFT LCD View Anywhere Display • Integrated Bluetooth® • Ethernet LAN Controller (RJ-45 connector) • Secure Digital (SD) Slot • Integrated Fingerprint Reader • Speak Anywhere® Audio Technology • Ambient Light Sensor View Anywhere display uses a proprietary optical enhancement process based on technology initially developed for high-end military aviation and marine applications.

Compared with Motion's standard display, the View Anywhere display technology enhances indoor viewing - while substantially improving outdoor viewing.

• 10:1 reduction in unwanted reflectance and glare • 15% improvement in "light pass-through" efficiency • 225% increase in sunlight contrast ratio over the standard display • Better view-ability at wide viewing angles The View Anywhere display technology also restrains the traditional feel of pen on paper that has become a hallmark of Motion's ink-enabled Tablet PCs, and the solution is also stronger, more durable, and scratch resistant. Finally, Motion accomplishes this solution without compromises, complexity, or high cost.

TRUE FLIGHT CHEETAH FL190 DISPLAY

The Flight Cheetah FL 190 has all the capabilities and ability to upgrade of the Flight Cheetah line at a price that is affordable. Runs on a combination of hard keys and touch screen access (stylus not required) **Package includes:**•Flight Cheetah FL 190 display. •TrueMap software with capabilities listed below. •GPS antenna receiver. •AC power supply. •DC Power Supply. **Features:** •Intel Celeron M ULV (900MHZ). •7" diagonal High Contrast LCD. •40 GB hard drive. •10/100 Ethernet, 802.11 b/g, Blue tooth

2.0. •2 USB 2.0, 1 Type II CF Card, H/P jack, VGA, DC in. •Dimensions 9.0" H x 5.5" W x 1.0" D. •Weight 1.7 lbs. •Rechargeable Internal battery (2 hours) P/N 11-04828

TRUE FLIGHT CHEETAH FL210 DISPLAY

With the FL 210 you get the an optimal combination of affordability, incredibly high quality bright display, and a range of capabilities unequaled by anything else you will see out there in the industry. The FL 210 is most comparable to the certified panel install MFD's in the \$10,000-\$20,000 range but with far more capabilities, and a far more affordable upgrade path for the future. **Features:** •Display

Resolution: 640 (H) x 480 (V) •Display Brightness: 1,000 Nits (7-10 times brighter than typical lap top displays) •Processor Speed: 833Mhz Celeron. •Ram: 512 meg •Storage Capacity: 20 Gig hard drive or optional 4 Gig solid state hard drive. •Overall Dimensions: 7 3/4" x 5 3/8" x 2 1/4" •Weight: 2.75 Lbs •Operating Voltage: DC 12V -28V •Ports: 2 USB, 1 Serial, 1 VGA, Audio In /Out. Supports Bluetooth Wireless. P/N 11-04829

TRUE FLIGHT ELECTRIC ATTITUDE INDICATOR

True Flight's Electronic Attitude Indicator option automatically monitors your pitch and roll. If you exceed certain parameters that would not be expected in IFR flight you automatically receive an

alert on your display with the EAI in the corner of your screen. Provides you with plenty of time to recover, before it develops into a serious situation. It is a solid state device that uses accelerometers on 3 separate axis to measure pitch, roll and yaw. Power and data are through the USB cable shown above. Although for supplemental use only, the electronic attitude indicator adds an invaluable layer of safety should your primary attitude indicator fail. P/N 11-04834

EFIS INTEGRA TL-6524

EFIS Integra TL-6524 is a multifunctional flight monitoring system integrating all primary flight instruments (Altimeter, Vertical Speed Indicator, Air Speed Indicator, Compass, Accelerometer, Chronometers, Turn & Bank Indicators, Angle Of Attack Indicators, IAT, OAT etc.). The EFIS Integra also combines navigation (HSI, CDI with connection to the popular Garmin SL-30) and 3-D terrain for use worldwide. The wide viewing angles, brilliant colour and direct sunlight readability of the display will give you a new dimension in EFIS instrumentation. Proven, state of the art technology and components will provide you with comfortable, user-friendly control. The Integra controls are fully ambidextrous and provide functions that have previously only been dreamt of - listening to your favourite music after inserting your flash drive into the front panel USB port, 3-D visualization of terrain, integrated 3-axis autopilot, direct voice warnings into your headphones, etc.

Features:

- * Voltage: 10.0 to 32.0 Volts
- * Backlights internal or external: 5V, 12V or 24V
- * Current consumption: 500 to 750 mA @ 14 Volts
- * Maximal voltage and signal current: 30 Volts, 1 Ampere
- * Measurement: +/-1%
- * Operating: -20°C to 70°C (-4°F to 158°F) temperature range
- * Relative humidity: 95% without condensation
- * Load: +/-20 g
- * Vibration: 1 to 200 Hz
- * Weight: 750 grams (0.55 lbs)
- * Dimensions: 192x149x90 mm (7.550x5.860x3.540 inch)

Benefits:

- * Option to select required language - English by default
- * Option to simply update firmware by inserting a Flash drive containing the newest firmware version
- * Option of pre-setup of glass cockpit according to the particular aircraft type saved in a Flash drive
- * Shows a graphical previous flight directly on the glass cockpit display
- * Shows a checklist including the voice output
- * Shows a flight logbook including name of pilot (student and instructor), date, time and position of take-off and landing
- * Download the history of previous flights to a Flash drive or directly to a PC

LANDING GEAR ALERTS – MGL AVIONICS

INTERCOM GEAR WARN DEVICE II

With the increasing use of headphones and in particular Electronic Noise Canceling headphones, it has become more difficult to hear warning horns in the cockpit. Because of this problem, the Intercom Gear Warning Device or IGWD was developed and introduced several years ago. After receiving input from customers, the new IGWD II is now available.

The IGWD II is a small electronic device that can be connected to either the landing gear throttle warning switch or the Flap UP Light or Switch and the Landing Gear Down Light or Switch. The pilots headphones are connected to the audio circuit in the IGWD II and should an unsafe condition occur, a loud pulsing tone is heard in the pilots headphones. In the single input mode, Throttle gear safety switch, if the throttle is reduced and the gear is Up, the IGWD II will sound. The two input mode with the flap UP light and the landing gear down light connected to the sensing inputs, provide added safety by ensuring that the landing gear is down before the flaps are lowered. Should the flap UP light go out before the landing gear Down light is on, the warning tone will be enabled.

In addition to the warning tone, a warning light output is available for a panel mounted light as well as a Test Switch input.

The IGWD II not only provides a second warning tone to the gear horn, it will still function should the gear horn fail, providing an added safety feature.

Features: •Small size: 3.2"L x 2.3"W x 1.0"H •Adjustable Tone Level •Input triggering for Throttle switch or Landing Gear and Flap Lights or Switches •Remote Test Switch Option •Remote Warning Light •DC voltage range 12 to 28 VDC •Weight, 10 oz •Two Year Warranty •Not Approved for Certified Aircraft. P/N 11-01943.....

GEAR ALERT

The Gear Alert uses an electronic sensor to detect the presence of the ground during landing. If the wheels are up, it instantly sounds a voice warning directly into your headset. It is a full time positive warning system and does not depend on throttle position or airspeed for operation. Gear Alert is supplied as a complete kit with all mounting hardware, doubler plates, connectors, and a pre-wired and tested cable assembly for fast and easy installation. 1 yr warranty. FAA Approved. STC's for most single and twin engine aircraft including Cessna up through the 400 series, Beech up through King Air series, Piper up through the Chieftain, Mooney and others. P/N 11-21135.....

MGL AVIONICS V10 VHF AVIATION RADIO TRANSCEIVER

MGL's air band VHF transceiver is the first commercial product of its kind to utilize modern receiver and transmitter technology. All audio processing and much of the receiver and transmitter circuitry is fully digital resulting in an outstanding quality experience unavailable with traditional technology. VHF Airband transceiver based on modern digital signal processing technology with built in multi-mode dual circuit intercom system. Small Size: Fits in a round 3 1/8" instrument hole, but has a mounting depth of only 2.2" + connectors! Light Weight: Approximately 8.8 oz (about 0.5 lb). One of the lightest out there! Powerful: 6 full Watts of transmit power. Digital Interface: Set frequency on the radio from an MGL Avionics EFIS or any equipment capable of setting frequency on the SL40 radio. Built-in VOX / VOGAD Intercom: A high quality intercom system (not a 'hot mic' - this intercom is really usable as your primary intercom). The intercom has 2 channels, but can be used in 4-place aircraft by connecting multiple headsets to the passenger channel. There are several modes of operation for the intercom, including VOX options and MGL Avionics' proprietary VOGAD system. VOGAD (or voice-operated gain-adjusting device) works by adjusting the gain of the microphone as your speak based on the level of your voice. It doesn't 'break squelch' like a VOX intercom - it is activated by your voice and is constantly adjusting to your voice level.

MGL AVIONICS VOYAGER EFIS/EMS/NAVIGATOR

8.4" Perfect Fit

The Voyager is IDENTICAL in PRICE and FUNCTION to the Odyssey. The only difference is the size.

The Voyager is a comprehensive flight, engine and navigation instrument designed for Experimental and Light Sport aircraft. Like the Enigma, the Odyssey/Voyager is a hardware and software concept that promotes a flexible, powerful EFIS platform together with a software application system that is highly user-modifiable.

As an EFIS hardware platform, the Voyager provides state of the art multi-processor based processing utilizing components chosen for absolute robustness in radiation intense environments such as found at high altitudes. This is coupled with intense low power design methods to further maximize overall system application and reliability.

The large amount of flexibility built into the base system allows the adaptation of the Voyager to almost any mission and aircraft. Due to low system cost, the Voyager is equally suited to very light aircraft, gliders and rotorcraft, while providing enough flexibility to be utilized by even turbine- or twin-engine aircraft with full dual engine monitoring.

The Voyager shares all software features with the Enigma, but differs in the following ways:

- Larger screen (8.4" diagonal)
- High resolution full VGA active TFT display - one of the best we have found!
- Faster processor for future functionality
- 2 user-configurable rotary knobs and 7 function keys
- ARINC 429 interface for communication with traffic alert systems (TIS and ZAON XRX) and for communicating with high-end digital autopilots (GPS Steer and Vertical Nav)
- CAN (automotive bus) for reading the ECU of automotive engine conversions
- Analog +/- 150mA NAV inputs to display CDI/LOC/GS when connected to older analog Nav radios

Low...

- Weight: Under 4 lbs
- Current Draw: Only 1.5 Amps @ 12 Volts
- Cost: Typical packages complete with attitude and heading sensors around \$6,000

High...

- Screen brightness (800-1000 nits)
- Reliability
- Flexibility (any screen layout you want!)
- Feature count (more instrument options available than most EFISs)

Please note: Select RDAC model and engine senders for engine functions, and select Attitude/Heading sensors (SP-4 and SP-2) for AHRS functions.

Warranty: The Voyager comes with a 3-year limited Warranty from MGL Avionics US and a 30-day Total Satisfaction Guarantee

DATATOYS XM-DVR PRO DIGITAL RECORDING SYSTEMS

The Plus and Plus 2 systems have everything you need to start recording from one or two of the small and light weight bullet cameras.† The Plus system offers the highest quality on the market with a recorder, cameras, and cabling all designed for harsh environments.

The XM-DVR Pro Digital Video Systems are perfect for aviation applications such as flight training, aerobatic, formation flying, and flight tours, featuring better than DVD quality video with the professional standard MPEG2 compression; which records a more vivid and clearer picture than consumer grade MPEG4 technologies. The XM-DVR Pro records in full D1 resolution at up to three time DVD quality** The XM-DVR Pro accommodates up to two compact flash cards which can then be removed and transferred to your PC; making it not only the highest quality solid state digital recorder on the market but the easiest to use.

The XM-DVR Pro records 2 full channels of audio and video. This means you can have two cameras recording simultaneously, creating two separate video files on your compact flash card. It's like buying two recorders for the price of one!

Housed in an anodized aluminum enclosure less than 2 inches high and weighing only 13 ounces, the XM-DVR Pro is compact, durable, and lightweight. The slim size of the XM-DVR Pro also makes it one of the smallest digital recorders on the market. The XM-DVR Pro can be wired directly into the aircraft and can run on a wide range of 10-32VDC.

Includes: * XM-DVR Pro Recorder with 2xCF module * IR Remote Control * Main Harness: 2 Video Inputs (4-Pin female), 2 Audio Inputs (4-Pin male), 1 AV Out (4-Pin male), 1 Wired Remote Input (4-Pin male) * DC power supply (10-32VDC IN – 5VDC/12VDC OUT) Locking Binder 712 Connector * Bench Top Power Supply AC to 5VDC * USB 2.0 Cable * 1 or 2* 580 Line Sony EXView HAD Bullet Cameras * 1 or 2* Amplified Omni-directional Microphones * 1 or 2* Super Clamps or Suction Mounts * 1 or 2* 2 meter extension cables * 1 or 2* Universal Mounts * 1 or 2* Click Mount Adapters * Software and Documentation * Durable Plastic Case

*SINGLE CAMERA QTY 1, DUAL CAMERA QTY 2

† Just add compact flash card

** With firmware upgrade to 16Mbps (DVD = ~5Mbps)

Features: * Highest quality digital video recorder on the market * Easy Installation – Plug, Record, and Play! * Highest Bit Rate on the Market at 10 Mbps(16Mbps w/ firmware upgrade) * 2-3 times DVD and Broadcast Quality * Professional grade MPEG2 compression * Optimized 580 Line Sony EXView HAD CCD Bullet Cameras provide a clean, vivid picture * Records two full channels * Powered from the aircraft's electrical system or external battery packs * Durable and lightweight * Waterproof IP68 connections * Made in the USA **Specifications:** * Inputs: 2 Video, 2 Audio, 1 Wired Remote, 1 IR Remote * Outputs: 1 AV Out * Resolution: Full D1 720x480 30fps NTSC, 720x576 25fps PAL * Bit Rate: User Selectable .5-10mbps per channel, (firmware upgrade to 16mbps per channel) * Compression: MPEG2 Video, MPEG1 Audio * File Type: MPEG2 * Memory Type: 2 x Compact Flash (default), Hard Drive and SSD (optional) * Software: DVR to PC, DVR (PC Based) * Weight: 13oz (358g) * Dimensions: 4.52" x 3.85" x 1.85" (115mm x 98mm x 47mm) * Construction: Aluminum * Aspect Ratio: 4:3 or 16:9 (Input Dependant) * SDK Available for custom large quantity applications

ANTENNAS

ADVANCED AIRCRAFT ELECTRONICS HIGH GAIN AIRCRAFT ANTENNA SYSTEMS

Here is a new series of aircraft antennas specifically designed to be used without a ground plane. This means that composite aircraft and fabric covered aircraft can now have their antennas mounted totally within the structure. These antennas are designed using the latest engineering technology. Laboratory measurements show them to have better electrical characteristics than currently available products. The unanimous reports from pilots who have been using them confirm that they out perform everything now available on the market. One antenna model works for communication, navigation, and for ELT (Three antennas in the aircraft, but all the same design), and this design is tolerant to installation errors. They will work in metal airframes when a plastic or fiberglass wing tip or similar plastic component is available to provide the mounting structure. The VHF antennas, 5T and 5I, differ only in the location of the BNC connection. The

5T is configured to allow the coax cable to be routed flat along the mounting surface of the airframe. This antenna model would be appropriate for a composite aircraft where the antenna would be mounted in the fuselage or fin and the coax would be close to the skin and be attached periodically for strain relief. In either case, the antenna can be used as a retrofit on in service aircraft or in new installations. The 5I series has the BNC connection positioned so that the coax cable would route out and away from the antenna mounting surface. This configuration is offered for antenna installations such as wing tips of fabric aircraft. If the antenna is mounted on the inside of the tip, the coax route is directly inward toward the wing root and the BNC connection is located near the spar to provide support for the cable. Both antennas are identical in their electrical performance.

Features: Inside mounting. Use with composite skins. Use with fabric covered airframes. Glue or bond to the airframe. Light weight. Wide service temperature. No ground plane corrosion. Mount anywhere inside. Maximum range with low VSWR. Model VHF series designed for comm or nav or ELT. Guaranteed against failure for the life of the airframe. Adapts to existing airframes or to in process construction.

COMANT GPS ANTENNAS

GPS antenna kits from Comant enable you to install a low profile aerodynamic GPS antenna to the exterior of your aircraft. These antennas are all FAA approved under TSO C129, provide superior GPS signal acquisition, and are resistant to ice build-up in flight. All kits come complete with 10' of coax cable. Call with Comant Part No. for pricing on the Comant C1401, C1405, C1-406, OR CI4510 series antenna you require.

CI 401 ANTENNAS

These antennas are designed for aircraft up to 600 knots and feature a rectangular footprint. Available in active or passive models. Height: 0.75". 50 ohms.

| CI 401 ACTIVE ANTENNAS | | |
|---|--------------|-------|
| APPLICATION | P/N | PRICE |
| II Morrow, Precedus, 920 | CI-401-3K1C | . |
| Magellan w/detachable antennas except 5000A, Garmin 55, 89, 90, 95, 100, 150, 155, 165, 250, Skyforce, and panel GPS requiring 26 dB gain | | |
| Antenna Only | CI-401-8C | . |
| Trimble/Terra all panel GPS 40 dB | CI-401-15C | . |
| CI 401 Passive Antennas (limited to 10' run of RG142 or 6' of RG58) | | |
| Magellan w/detachable antennas incl. 5000A, Garmin 55, 89, 90, 95, 100, 150, 155, 165, 250, Micrologic Super Sport & all other GPS receivers requiring a passive antenna. | | |
| Antenna Only | CI401-30C | . |
| Bendix King KLX100 (only) | CI401-32GK2C | . |

CI 405 ANTENNAS

These antennas are similar to the CI 401 antenna series but are designed to fit most existing VHF bent whip and stick type antenna mounting holes and most existing Loran antenna mounting holes. Footprint is same as Cessna type Com antennas. These antennas are great when converting from Loran to GPS.

COMANT ANTENNAS

COMANT DME/TRANSPONDER ANTENNAS

COMANT DME/TRANSPONDER (CI 100 SERIES) - All Metal Blade DME/Transponder antenna designed and developed for Mach 2 military aircraft. Design is unique in the blade and mounting base are die-cast as one piece with no dielectric material in the airstream. Standard six-hole mounting configuration. See Order Options for available connectors

CI-101 TRANSPONDER ANTENNA - Frequencies Covered 1030-1090 MHz. Transponder antenna with top loaded stub monopole. Contact points are made from beryllium copper. Mounts through a single 0.600" diameter mounting hole.
P/N 11-17970

CI-105 TRANSPONDER/DME ANTENNA - A very broadband and rugged antenna which is encased in glass reinforced molded shell. Rated to 400 kts. TAS. Height. 3.25"; Wt. 0.2 lb. Does not include BNC or hardware. P/N 11-17965

COMANT DME/ TRANSPONDER (CI -105-3) - Frequencies Covered 75 MHz. Antenna configuration specifically designed for external applications using a three hole flange mounting. BNC female connector. P/N 11-06810

COMANT DME/XPDR (CI -105-6 & 105-7) - Frequency • 960-1220 MHz. Comant CI 105-3 DME/Transponder antenna. Ant signed for external applications using a three hole flange mounting. BNC female connector.
CI 105-6 connector - BNC P/N 11-06811

CI 105-7 connector - C P/N 11-06817

COMANT DME/ TRANSPONDER (CI-105-9) - Frequency • 960-1220 MHz. Antenna assembly encased in a glass reinforced polyester molded shell. Comes standard with a 6" extension coax cable and BNC connector. This model offers standard two stud mounting, where the studs are extended to 1 inch in length.
P/N 11-06818

COMANT DME/ TRANSPONDER (CI -105-16) - Frequency • 960-1220 MHz. Was designed specifically for the Honeywell Bendix- King™ KA60. This unit offers the extended length two-stud mounting found on the KA60. Tested to the tougher DO-160D environmental requirements, this antenna offers the best in ruggedness and performance. P/N 11-06819

COMANT DME/ XPDR (CI-110-40-30) - Frequency • 960-1220 MHz & 1030-1090 MHz. All metal, low profile antenna is designed for business jet and commercial high speed aircraft. With a popular four hole mount and connector with open path to ground, this antenna is ideally suited for those aircraft equipped with standard and Mode S transponders. Tough one piece construction provides 175 lbs. side load capability. Moisture failure is prevented with completely sealed construction. P/N 11-06820

COMANT DME/ TRANSPONDER (CI-110-41-30) - Frequencies Covered 960 -1220 MHz. All metal, low profile antenna is designed for business jet and commercial high speed aircraft. With a popular four hole mount and connector with short path to ground, this antenna is ideally suited for those aircraft equipped with standard and Mode S transponders. Tough one-piece construction provides 175 lbs. side load capability. Moisture failure is prevented with completely sealed construction. P/N 11-06821

COMANT DME/XPDR (CI -110-60-30) - Frequency • 960-1220 MHz & 1030-1090 MHz. All metal, low profile antenna is designed for business jet and commercial high speed aircraft. Six hole mount and connector with open path to ground. Suited for aircraft equipped with standard and Mode S transponders. Provides 175 lbs. side load capability. Moisture failure is prevented with completely sealed construction. P/N 11-06822

COMANT DME/ XPDR (CI-110-61-30) - Frequency • 960 -1220 MHz. All metal, low profile antenna is designed for business jet and commercial high speed aircraft. Six hole mount and connector with short path to ground. Suited for those aircraft equipped with standard and Mode S transponders. Tough one-piece construction provides 175 lbs. side load capability. Moisture failure is prevented with completely sealed construction. P/N 11-06823

COMANT DME/ TRANSPONDER (CI-305) - Frequency • 960-1220. Miniature high speed DME/Transponder - one of the smallest DME/Transponder antennas available from Comant. Less than 2.75 inches high, featuring a very low-drag frontal profile. Strong, lightweight and easy to mount using four external mounting holes through base. P/N 11-06824

COMANT FM BAND & AM/FM ANTENNAS

COMANT AM/ FM RECIEVER (CI-222) - Frequency 88-108 MHz 550-1600 KHz. Offers a unique low profile design using standard 4 hole mounting used on many VHF type antennas. Bent whip configuration is ideally suited for underbelly and helicopter installations. P/N 11-00412

COMANT MARKER BEACON ANTENNAS

CI-102 MARKER BEACON - Frequency 75 MHz. For use with the modern, high sensitivity marker beacon receivers. Featuring 4-hole internal mounting for simple installation. Enclosed in an injection molded radome which is impervious to the tough environments typical of the underside of an aircraft. Skydrol and rain erosion resistant. DC grounded to minimize accumulation of precipitation static. P/N 11-17931

CI-118 MARKER BEACON - Frequency 75 MHz. Designed specifically for high-performance aircraft applications. Features aerodynamic design in a lightweight package. Antenna is a low profile blade-type encased in a molded polyurethane shell. Skydrol and rain erosion resistant. P/N 11-17932

COMANT MARKER BEACON (CI-118-1) - Frequency • 75 MHz. Low-drag, lower profile alternative to the popular CI 102 "boat style" marker beacon antenna. Approved for medium to high performance single, turbo-prop or jet aircraft and provides simple external mounting. Skydrol and rain erosion resistant. DC grounded to minimize accumulation of precipitation static. P/N 11-06847

COMANT MARKER BEACON (CI-118-9) - Frequency 75 MHz. Identical to the CI 118 except the mounting configuration allows for "drop-in" replacement to the Honeywell Bendix-King KA 26 Marker Beacon. This Comant design has been tested to the tough DO-160D environmental standards. Skydrol and rain erosion resistant. DC grounded to minimize accumulation of precipitation static. P/N 11-06989

COMANT MARKER BEACON (CI-118-10) - Frequency 75 MHz. This Comant marker beacon is identical to the CI 118 except with a 4-hole through mount configuration. This model has been tested to the tough DO-160D environmental standards. Skydrol and rain erosion resistant. DC grounded to minimize accumulation of precipitation static. P/N 11-06848

COMANT MARKER BEACON (CI-164) - Frequency • 75 MHz. Lightweight flush mount provides for dual marker beacon signal outputs at the antenna, eliminating the need for a separate marker beacon splitter. Antenna is housed in a aluminum enclosure with a glass laminate cover. Internal components are potted in place for mechanical integrity. The CI 164 is designed for curved "crown" surface mounting as is currently used on the Cessna Citation I and II. P/N 11-06850

COMANT MARKER BEACON (CI-165) - Frequency • 75 MHz. Lightweight flush mount antenna, provides for dual marker beacon signal outputs at the antenna, eliminating the need for a separate marker beacon splitter. Antenna is housed in a aluminum enclosure with a glass laminate cover. Internal components are potted in place for mechanical integrity. The CI 164 is designed for curved "crown" surface mounting as is currently used on the Cessna Citation I and II. P/N 11-06851

COMANT DATALINK & SATCOM ANTENNAS

COMANT VHF/DATA LINK (CI-248-30) - Dual function single engine aircraft antenna for VHF and Narrow Cast datalink from Avidyne. Both normal VHF communication as well as use of Narrowcast datalink. For dual use order Avidyne's DC50 coupler switch. VHF: 118-137 MHz / Orbcomm: 137-150.5 MHz P/N 11-07074

COMANT FIS/DATA LINK (CI 248-180) - 136.450 - 136.475 MHz. Assures positive FIS performance with the new CI 248-180 FIS Data Link antenna. Designed specifically to bring NEXRAD, METAR, and TAF frequencies to the cockpit. P/N 11-07077

COMANT IRIDIUM (CI-490-1) - Dual-band passive antenna operates at Iridium™ frequencies, with continuous transmit and receive coverage from 1616 to 1626.5 MHz. Can also operate separately as a passive GPS antenna. Iridium™ delivers essential communications services to and from areas where terrestrial communication are not available. P/N 11-07078

COMANT RADIOPHONE / DME ANTENNAS

COMANT DME/ TRANSPONDER (CI-105-20) - Wide band vertically polarized/omnidirectional antenna designed for high performance aircraft over the UHF/L Band of frequencies from 806 to 960 MHz. 894-896 MHz Transmit 849-851 MHz Receive 960-1220 MHz P/N 11-07081

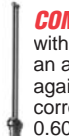

AV

COMANT ANTENNAS

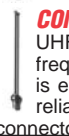

COMANT RADIOPHONE / DME ANTENNAS

 **COMANT UHF (CI-177-20)** - 450-470 MHz. A rugged monopole antenna particularly well-suited to the harsh environments experienced on the underside of an aircraft. Features standard 4-hole mounting, diecast metal base and radiator encased in glass laminate housing. P/N 11-06836.....

 **COMANT UHF (CI-200)** - 450-470 MHz. Rugged monopole antenna particularly well-suited to the harsh environments experienced on the underside of an aircraft. Features a very compact 3-hole mounted die-cast aluminum base with the radiator encased in a glass laminate housing. P/N 11-06837.....

 **COMANT UHF (CI-271)** - 403-512 MHz. Stub antenna designed to withstand the harsh environments associated with the underside of an aircraft. Antenna radiator is mechanically captivated and is sealed against leakage. All exposed metal surfaces are nickel-plated for corrosion resistance and long service. Mounts through a single 0.600" hole. BNC connector is standard. P/N 11-06838.....

 **COMANT UHF (CI-273)** - 403-512 MHz. Stub antenna designed to withstand the harsh environments associated with the underside of an aircraft. Antenna radiator is mechanically captivated and is sealed against leakage. All exposed metal surfaces are nickel-plated for corrosion resistance and long service. Mounts through a single 0.600" hole. BNC connector is standard. P/N 11-06839.....

 **COMANT UHF (CI-275)** - Frequency 406-512 MHz. Wide band UHF antenna designed for high-performance aircraft over the full frequency range of 406-512 MHz. Low profile, blade-type antenna is encased in a low drag, low weight molded body to ensure high reliability. The CI 275 comes standard with a BNC connector. Other connectors available. See order option chart.

| Connector | Model | Part No. | Price |
|-----------|----------|----------|-------|
| BNC | CI 275 | 11-06840 | . |
| TNC | CI 275-2 | 11-06841 | . |
| N | CI 275-5 | 11-06842 | . |

 **COMANT UHF (CI-285)** - Frequency • 400-960 MHz UHF blade antenna design for high performance aircraft over the full range of 400-960 MHz. Features vertically polarized/omni-directional pattern, extremely wide band/high efficiency electrical performance. DC grounding for lightning protection, 6 hole mounting. P/N 11-06843.....

 **COMANT UHF (CI-306)** - Frequency • 800-870 MHz. Stub-type antenna tuned for the 800- 870 MHz radio telephone band. Intended for use on low-flying aircraft and helicopters. CI 306 available with BNC connector and mounts through a single 0.600" inch diameter hole. P/N 11-06844.....

 **COMANT CI 310-20 RADIOPHONE** - Frequencies Covered 806-960 & 1030-1090 MHz L Band / UHF blade antenna designed for high performance aircraft. Features vertical/ omnidirectional pattern, wide band/high efficiency electrical performance and DC grounding for lightning protection. P/N 11-06845.....

 **COMANT CI 310-22 RADIOPHONE ANTENNA** - Frequencies Covered 806-960 & 1030-1090 MHz L Band / UHF blade antenna designed for high performance aircraft. Low profile, light weight antenna and is packaged in a molded body with metal mounting base to ensure stable environmental performance and resistance to vibration, rain erosion and cleaning solvents. Features vertical/omnidirectional pattern, wide band/high efficiency electrical performance and DC grounding for lightning protection. P/N 11-06846.....

COMANT RADIOPHONE / DME ANTENNAS

 **COMANT VHF COMMUNICATION (CI-121)** - Frequencies Covered 118-137 MHz. Similar to the CI 109, the CI 121 is smaller in diameter and lighter at only 0.5 pounds. Upgraded to the new RTCA DO-160D environmental requirements and offers the 118 to 137 MHz frequency associated with DO-186A MOPS. P/N 11-17921.....

 **COMANT VHF COMMUNICATIONS (CI-122)** - Frequencies Covered 118-137 MHz. Designed specifically for mounting to the underside of an aircraft providing excellent radiation coverage for air-to-ground VHF communications. Bent configuration makes it ideally suited for helicopters and low wing aircraft. Upgraded to the new RTCA DO-160D environmental requirements and offers 118 to 137 MHz frequency associated with the DO-186A MOPS. P/N 11-17922.....

 **COMANT VHF COMM (CI-211)** - Frequencies Covered 118-137 MHz. For large twins and medium jet aircraft. Only 8.25 inches high. Upgraded to the new RTCA DO-160D environmental requirements and offers the 118 to 137 MHz frequency associated with DO-186A MOPS. P/N 11-07082.....

COMANT RADIOPHONE / DME ANTENNAS

 **COMANT VHF COMMUNICATIONS (CI-291)** - Frequencies Covered 118-137 MHz Upgraded to the new RTCA DO-160D environmental requirements and offers the 118 to 137 MHz frequency associated with DO 186A MOPS. P/N 11-17991.....

 **COMANT VHF COMMUNICATIONS (CI-292-1)** - Frequencies Covered 118-137 MHz. Designed specifically for top mounting on an aircraft. Upgraded to the new RTCA DO-160D environmental requirements and offers the 118 to 137 MHz frequency associated with DO-186A MOPS. P/N 11-05093.....

 **COMANT VHF COMMUNICATIONS (CI-292-2)** - Upgraded to the new RTCA DO-160D environmental requirements and offers the 118 to 137 MHz frequency associated with DO 186A MOPS. P/N 11-29202.....

 **COMANT VHF COMMUNICATION (CI-248-5)** - Frequencies Covered 118-137 MHz. Developed for Cessna 182 and 182T aircraft. The only VHF antenna with a built-in notch filter, that allows installation in close proximity to GPS antennas without co-sight interference. P/N 11-05585.....

 **COMANT VHF COMMUNICATIONS (CI-108)** - Frequencies Covered 450-470 MHz Suitable for either top or bottom mounting. Upgraded to the RTCA DO-160D environmental requirements with DO-186A MOPS. Optional leading edge protection - CI 108-L. CI-108 P/N 11-07079..... CI-108L P/N 11-07080.....

COMANT VOR / LOC / GS ANTENNAS

 **COMANT VOR/ GS (CI-120G-S)** - Frequency • 108-118 MHz (VOR/LOC) 329-335 MHz (GS) Antenna system qualified for use on single engine, twin, jet, and helicopter aircraft. Provides glideslope reception capability. Complete set includes a pair (2) of blades, each with single BNC connector output, two coax interconnect cables and a signal combiner output providing for a single cable run to the avionics installation. P/N 11-06801.....

 **COMANT VOR/LOC/GS (CI-120-200G/S)** - Frequency • 108-118 MHz (VOR/LOC) 329-335 MHz (GS) Antenna system qualified for use on single engine, twin, jet, and helicopter aircraft. Provides glideslope reception capability. Complete set includes a pair (2) of blades, each with single BNC connector output, two coax interconnect cables. Dual output signal combiner providing for separate RF cable runs to the avionics installation for NAV1 and NAV 2 receivers, is included. P/N 11-06802.....

CI-120-200G/S-L - Blades have leading edge protection and come with rubber gasket enabling mounting on curved vertical stabilizers. P/N 11-06803.....

 **COMANT VOR/LOC/GS (CI-120-400)** - Frequency • 108-118 MHz (VOR/LOC) 329-335 MHz (GS) Designed for the Cessna 182 Series. Complete kit includes a pair (2) of blades, each with a single BNC output, and two coax interconnect cables. Single BNC output phasing combiner providing for a single RF cable run to the avionics installation. P/N 11-06804.....

 **COMANT VOR/LOC/GS (CI-157P)** - Frequency 108-118 MHz (VOR/LOC) 329-335 MHz (Glide Slope) "V" dipole VOR/ Glide Slope antenna with fixed elements designed specifically for compatibility with the Piper Aircraft mounting. Radiating elements are not removable. Not approved for helicopter installations. P/N 11-15700.....

 **COMANT VOR/LOC/GS (CI-185C)** - Frequency • 108-118 MHz (VOR/LOC) 329-335 MHz (GS) "V" Dipole VOR/LOC/ GS antenna with detachable elements mounts on top of the vertical fin stabilizer for most single engine general aviation aircraft. RF design similar to the CI 157P. Integral ferrite balun provides for higher radiation efficiency. Detachable elements result in a significantly smaller shipping and storage carton than fixed element versions. Not approved for helicopter installations. P/N 11-17923.....

 **COMANT VOR/LOC/GS (CI-158C-2)** - Frequency • 108-118 MHz (VOR/LOC) 329-335 MHz (GS) Detachable elements mounts on top of the vertical fin stabilizer offering the four-hole mounting configuration found on many beech aircraft. Detachable elements result in a significantly smaller shipping and storage carton than fixed element versions. Not approved for helicopter installations. P/N 11-06806.....

 **COMANT VOR/LOC/GS (CI-158C-3)** - Frequency 108-118 MHz (VOR / LOC) 329-335 MHz (Glide Slope) "V" Dipole VOR/ Glide Slope Antenna with detachable elements was developed specifically for Beech Bonanza aircraft and encompasses reduced static capability with the use of P-Stat Paint and bleeder resistors. Not approved for helicopter installations. P/N 11-06807.....

 **COMANT VOR/LOC/GS (CI-159C)** - Frequency 108-118 MHz (VOR / LOC) 329-335 MHz (Glide Slope) Similar to the CI 158C-3 with the exception of offering 2-hole mount instead of a 4-hole mount. Not approved for helicopter installations. P/N 11-17924.....

COMANT ANTENNAS

COMANT VOR / LOC / GS ANTENNAS

-  **COMANT GLIDE SLOPE (CI-193)** - Frequencies Covered 329-335 MHz (GS) For interior mounting for GS reception. P/N 11-05200.....
-  **COMANT VOR/GS (CI-205-3)** - Frequency 108-118 MHz (VOR/ LOC) 329-335 MHz (Glide Slope) Mounting on the aircraft vertical stabilizer or helicopter tail boom. Set includes a pair (2) of "towel bar" sensor elements each with a single BNC output connector and a one-piece dual coax interconnect signal combiner harness with a single BNC connector output. Provides for a single cable routing to the avionics location. P/N 11-17985.....
-  **COMANT GLIDE SLOPE (CI-212-2)** - Frequency • 329-335 MHz (GS) Similar to the CI 212 except provides two output signals for dual glide slope receiver installation without the need for a glide slope coupler. P/N 11-06808.....
-  **COMANT VOR/LOC/GS (CI-215)** - Frequencies Covered 108-118 MHz (VOR/LOC) , 329-335 MHz (GS) Detachable elements featuring two integrally molded mounting legs or "spacers" for increased strength. P/N 11-17926.....
-  **COMANT VOR/LOC/GS (CI-259E)** - Frequencies Covered 108-118 MHz (VOR/LOC), 329-335 MHz (GS) Fixed elements for helicopter aircraft. P/N 11-06809.....

COMANT COMDAT GPS ANTENNAS

-  **COMDAT ANTENNA (CI-401-220)** - Frequency • GPS 1575.42 +/- 3 MHz Contains stable amplifier that offers great performance. Gain performance at 26.5 to 31.5 dB minimum. Presents very low noise levels at 3.8 dB maximum. Built-in voltage regulator. P/N 11-04139.....
-  **COMDAT GPS (CI-401-221)** - GPS antenna with TNC connector. Meets RTCA DO 160-D operating standards including direct effects lightning. Operate with 26.5 dB panel mount GPS receivers. Certified FAA TSO-C144 for GPS and GPS WAAS Class Gamma 1 equ. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. Not compatible with most portable GPS receiver systems. GPS 1575.42 MHz / 26.5 dB Gain P/N 11-06795.....
-  **COMDAT GPS CI 408-20/ ACTIVE** - Designed for airborne applications with aircraft speeds up to 600 KTAS. Drop-in replacement for many popular GPS applications. RTCA DO 160-D operating standards including direct effects lightning. GPS 1575.42 MHz - 28.0 db Gain P/N 11-06796.....
-  **COMDAT ANTENNA (CI-420-220)** - Stand-alone GPS antenna with TNC connector. Meets RTCA DO 160D operating standards including direct effects lightning. Designed to operate with 26.5 dB panel mount GPS receivers. Certified FAA TSO-C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. Not compatible with most portable GPS receiver systems. GPS 1575.42 MHz - 26.5 db Gain P/N 11-05848.....
-  **COMDAT GPS (CI-420-221)** - Stand-alone GPS antenna with TNC connector. Meets RTCA DO 160D operating standards including direct effects lightning. Designed to operate with Garmin 17.0 dB panel mount GPS receivers. Not compatible with most portable GPS receiver systems. GPS 1575.42 MHz - 17.0 db Gain P/N 11-04291.....

COMANT COMDAT GPS/XM ANTENNAS

-  **COMDAT GPS/XM (CI 420-420)** - Frequencies • GPS 1575.42 MHz / 26.5 dB Gain XM 2332.5-2345.0 /30-34 dB Gain. GPS and XM Weather antenna. Designed for compatibility with panel mount 26.5 dB gain GPS receivers. Add XM to an existing GPS antenna location without the need for a completely new installation location. Certified FAA TSO-C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. Not compatible with most portable GPS receiver systems P/N 11-05852.....
-  **COMDAT GPS/XM (CI-401-460)** - GPS and XM Weather antenna. Compatibility with panel mount 26.5 dB gain GPS receivers. Certified FAA TSO C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. The CI 401-460 replaces the CI 401-420. Not compatible with most portable receiver systems. GPS 1575.42 MHz / 26.5 dB Gain. XM 2332.5-2345.0 /26-30 dB Gain. P/N 11-06791.....
-  **COMDAT GPS/XM CI-420-421** - GPS and XM Weather antenna. Designed for compatibility with Garmin panel mount 17.0 dB gain GPS receivers. Add XM to an existing GPS antenna location without the need for a completely new installation location. Not compatible with most portable GPS receiver systems. GPS 1575.42 MHz /17.0 dB Gain. XM 2332.5-2345.0 /30-34 dB Gain P/N 11-06792.....

COMANT COMDAT VHF/GPS ANTENNAS

-  **COMDAT VHF/GPS (CI-2480-200)** - Dual function single engine antenna for VHF/GPS. For popular 26.5 dB gain GPS panel mount systems. Certified FAA TSO-C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. VHF 118-137 MHz GPS 1575.42 MHz / 26.5 dB Gain P/N 11-05850.....
-  **COMDAT ANTENNA (CI-2480-201)** - 1575.42 MHz 17.0dB Gain 118 - 137 MHz VHF. Separate connectors for GPS and VHF, GPS is protected from VHF harmonics. Designed for use with Garmin's™ panel mount GPS systems that require 17dB gain. P/N 11-05849.....

COMANT COMDAT VHF/GPS ANTENNAS

-  **COMDAT VHF/GPS (CI-2680-200)** - Designed for use with Air-cell Broadband Systems (ABS). Single and twin engine piston aircraft for applications of this antenna design. Some light turbine and light jets. Consult your FBO or installation shop for best application information. VHF 118-137 MHz GPS 1575.42 MHz / 26.5 dB Gain P/N 11-06789.....
-  **COMDAT VHF/GPS CI-2680-201** - Dual function high speed antenna for twins and light jets. Featuring VHF and GPS in a single antenna. Designed for use with Garmin GPS panel mount receiver units requiring 17.0 dB gain. Not compatible with most portable GPS receiver systems. VHF 118-137 MHz GPS 1575.42 MHz / 17.0 dB Gain P/N 11-06790.....

COMANT COMDAT VHF/GPS/XM ANTENNAS

-  **COMDAT VHF/GPS/XM (CI 2480-400)** - Frequency • 1575.42 MHz 26.5dB Gain GPS 2332.5 - 2345.0 MHz XM@ WX 118-137 MHz VHF VHF, GPS and XM@ Weather Data in a single, combined antenna. Built-in 80dB low pass filter protects both GPS and XM@ antennas against unwanted VHF interference. 26.5dB GPS amplifier. Helicopter rated. P/N 11-05853.....
-  **COMDAT VHF/GPS/XM (CI-2680-400)** - Triple function VHF/GPS/XM Weather antenna for twin and light jet aircraft. Certified FAA TSO C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. Not compatible with most portable receiver systems. VHF 118-137 MHz GPS 1575.42 MHz / 26.5 dB Gain XM 2332.5 - 2345.0 / 30 dB Gain P/N 11-06786.....
-  **COMDAT ANTENNA (CI 2680-500)** - Frequencies • VHF 118-137 MHz XM 2332.5 - 2345.0 30-34dB Gain. VHF/GPS/XM For twin and light jet aircraft. Provides 80 dB of VHF harmonic suppression. Requires Avidyne's DC50 coupler switch for dual VHF/Data Link functionality. Certified FAA TSO-C144 for GPS and GPS WAAS Class Gamma 1 equipment. Not compliant for GPS WAAS Class Gamma 2 and 3 applications. P/N 11-05855.....

COMANT COMDAT XM ANTENNAS

-  **COMDAT XM (CI-420-10)** - XM 2332.5-2345.0 /25.0 dB Gain. For Garmin GDL 69/69A receivers and Heads Up Technologies (HUT) receivers with short coaxial cable runs. Feature robust TNC female connector. P/N 11-06798.....
-  **COMDAT XM (CI-420-16)** - XM 2332.5-2345.0 /26-30 dB Gain. For Heads Up Technologies (HUT) receivers with longer coaxial cable runs. Features robust TNC female connector. P/N 11-06799.....

COMANT ATTENUATOR, SPLITTERS, COUPLERS, & DUPLEXERS

- COMANT GPS ATTENUATOR (CI-511)** - 1575.42 MHz. Used with 26.5 dB gain ComDat GPS antennas, it allows operation of Garmin GPS systems that require 17 dB gain. P/N 11-06825.....
- COMANT SPLITTER (CI-5120) DUAL VOR/ LOC/ GS** - 108-118 MHz & 329-335 MHz. For use with Garmin GNS 580 and similar systems. Splits single coax antenna input into equally proportioned VOR/ LOC/GS outputs. P/N 11-06826.....
- CI-502 Dual VOR Coupler** - Allows the simultaneous use of two VOR receivers from one VOR antenna. P/N 11-17975.....
- CI-503 Dual GS Diplexer** - Permits operation of two glide slope receivers from one glide slope antenna. P/N 11-17976.....
- CI-505 VOR/GS Triplexer** - Permits operation of two NAV & one glide slope receiver from 1 VOR/LOC antenna. P/N 11-17977.....
- CI-507 Single VOR/GS Diplexer** - Provides the operation of one VOR and one glide slope receiver from one VOR/GS antenna. P/N 11-17980.....
- CI-509 COMANT COUPLER MARKER BEACON** - Permits the use of two marker beacon receivers from one marker beacon antenna. P/N 11-06852.....
- CI-601 COMANT DUPLEXER** - Designed to provide operation between two transceivers and one antenna. P/N 11-06827.....
- CI-1125 VOR/GS Quadraplexer** - Permits operation of two NAV & two glide slope receivers from 1 VOR/LOC antenna. P/N 11-03777.....

DORNE & MARGOLIN ANTENNAS - ANTENNA TEMPLATES

DM C63-1/A ANTENNA

Frequency Range 118-137 MHz The DM C63-Series antennas are VHF communication antennas designed for high mechanical strength with machine tapered aluminum alloy radiating elements. These vertically polarized antennas cover the frequency range of 118-137 MHz for both transmitting and receiving applications. The DM C63-1/A is designed for mounting on top of the fuselage. All DM C63-Series antennas are supplied with a gasket and a doubler plate. P/N 11-02764.....

DM C63-2 ANTENNA

Designed for high mechanical strength with machine tapered aluminum alloy radiating elements. Vertically polarized antennas cover the frequency range of 118-137 MHz for both transmitting and receiving applications. Low profile "bentback" radiating element designed for mounting on the bottom of the fuselage. Supplied with a gasket and a doubler plate. P/N 11-02765.....

DM C63-3/A ANTENNA

VHF communication antenna designed for high mechanical strength with machine tapered aluminum alloy radiating elements. These vertically polarized antennas cover the frequency range of 138-174 MHz for both transmitting and receiving applications. Low profile "bentback" radiating element designed for mounting on the bottom of the fuselage. Supplied with a gasket and a doubler plate. P/N 11-02766.....

DM C70-1/A TRIM LINE ROD ANTENNA

Designed for top or bottom installation on high-performance, single, twin and turbo engine fixed and rotary wing aircraft. These uniquely designed antennas offer mechanical strength and high-electrical efficiency to provide maximum reliability and full 360/720 channel transceiver operation. The lightweight profile is unobtrusive, resists icing and offers low drag. Height: 15" Speed Rating: 400 mph. P/N 11-02768.....

DM C70-3 STRAIGHT ROD ANTENNA

Designed for top or bottom installation on high-performance, single, twin and turbo engine fixed and rotary wing aircraft. These uniquely designed antennas offer mechanical strength and high-electrical efficiency to provide maximum reliability and full 360/720 channel transceiver operation. The lightweight profile is unobtrusive, resists icing and offers low drag. Height: 20.5". Speed Rating: 250 mph. P/N 11-02769.....

DM C70-4 ANTENNA

Designed for top or bottom installation on high-performance, single, twin and turbo engine fixed and rotary wing aircraft. These uniquely designed antennas offer mechanical strength and high-electrical efficiency to provide maximum reliability and full 360/720 channel transceiver operation. The lightweight profile is unobtrusive, resists icing and offers low drag. P/N 11-02770.....

DM N170-2 ANTENNA

L-band metal blades with and extended bandwidth for use with both transponders or distance measuring equipment. Sealed and waterproofed for increased reliability. P/N 11-02767.....

DM N48-1 ANTENNA

Balanced loop design assures an omnidirectional radiation pattern at the horizon to obtain the maximum signal for standard VOR and area navigation systems installed in lightweight aircraft, medium twins, and helicopters operating up to 250 mph. Dual VOR receiver operation is obtained when the antenna is used with the DM H21-1 diplexer. P/N 11-02771.....

DORNE & MARGOLIN ANTENNA COUPLERS

DM H21-2 - Dual Market Beacon or Dual VOR
P/N 11-02772.....

DM H22-1 - Single G/S or Single VOR.
P/N 11-02773.....

DM H23-1 - Triplexer. Dual VOR & Single G/S
P/N 11-02774.....

DM H69-1 - Quadraplexer. Dual VOR & Dual G/S
P/N 11-02775.....

11-02774

DM H24-1 - Diplexer, Dual G/S P/N 11-02776.....

ANTENNA INSTALLATION TEMPLATES

Image shown for illustrative purposes may not depict specific part number

SealingGuide

Custom designed templates improve the antenna sealing process, making it more precise, efficient and cost-effective.

Each Sealing Guide template is custom designed to correspond to an individual antenna. They consist of 2 pieces, one inner part and one outer part. The inner template adheres to the base of the antenna, the outer template is placed on the body of the aircraft surrounding the antenna. Sealant is applied to the gap between the templates. Sealant is applied to the gap between

the templates. When the templates are removed and discarded, the sealant is left to cure, resulting in a clean, precise and smooth seal.

Each template is custom designed to correspond to an individual antenna. You will no longer need to laboriously cut and paste various lengths of tape, trying to fit them around the irregular antenna shape.

The Sealing Guide template consists of 2 pieces, one inner part and one outer part. Application is simple. The inner template adheres to the base of the antenna, and the outer template is placed on the body of the aircraft surrounding the antenna. Sealant is applied to the gap between the templates. The templates are then removed and discarded. The sealant is left to cure, resulting in a clean, precise and smooth seal.

Incorporating the "Sealing Guide" system into your sealing process will significantly reduce labor time.

AV

R.A. MILLER ANTENNAS

ALL LISTED ANTENNA SPECIALISTS HAVE 50 OHM IMPEDANCE. FOR SPEEDS TO 250 MPH AND 25,000' ALTITUDE.

VHF COM ANTENNA - Stainless steel bent whip antenna with insulator and mounting hardware. 118-136 MHz. Wt. 3-1/2 oz.

P/N AV-534.....

Same antenna as described above but furnished w/96" lead of RG58 A/U cable with BNC and ground strap with lugs. Wt. 7.5 oz.

P/N AV-534L.....

VHF "BROAD BAND" COM ANTENNA - Blade type-low drag. Aluminum radiator encapsulated in rigid urethane foam with white fiberglass housing. 118-136 MHz. Power capability: 50 watts. 13-1/2" high. Weight: 20 oz./P/N AVT-4.....

VHF "BROAD BAND" ANTENNA - Rod type. Silver plated braid radiator encapsulated in fiberglass tube with white epoxy finish. Die cast aluminum base. 118-136 MHz. Wt: 8 oz. BNC termination. Supplied with weather sealing rubber pad and mounting hardware. P/N AV-529.....

CB ANTENNA - This "general aviation" CB communications antenna is uniquely designed w/ "center loading coil" to permit the antenna to be short for practical operation. Unit is constructed of a fiberglass rod mounted in an aluminum die cast base. BNC connector. Power rating 5W. 27 MHz. Final tuning on airplane. Wt. 10 oz.

P/N AV-568.....

OMNI VOR NAV ANTENNA - This antenna is constructed of taper-ground high-strength stainless steel to withstand the vibration and wind loads with the stability necessary for reliable operation. The insulators are compression molded bakelite with mounting holes provided and weather sealed. The antenna may be mounted with the "V" pointed forward or aft. Impedance is 50 ohms when used with the balun & 30 ft. of RG-58 A/U cable supplied. 108-118 MHz.

P/N AV-532L.....

P/N AV-532 (without Cable).....

TRANSPOUNDER ANTENNA - Chrome plated, phosphor bronze radiating element mounted in Teflon insulator. Ball tip for low-noise static discharge. May be installed from the outside. TSO'd. 1030-1090 MHz. BNC connector. Wt. 1 oz.

P/N AV-22.....

MARKER BEACON ANTENNA - Sled

type. Centerless ground stainless steel, supplied with feed system, low-absorption high-strength standoff insulator, stainless steel mounting hardware. Lead not supplied. 75 MHz. Wt. 7.25 oz.

P/N AV-533.....

MARKER BEACON ANTENNA - Boat Type

P/N AV-569.....

VHF DIPLEXER COUPLER - Splits the signal from a single antenna into two NAV receivers; eliminating the need for a second antenna.

P/N AV-547.....

AV-9 - A broadband DME ("L" band) antenna durably constructed around a Type "N" low-loss connector. The large diameter radiator of polished chrome-plated aluminum gives the broad coverage required with this type of antenna. The antenna is easily installed and operates to speeds of up to 250mph and altitudes up to 50,000 ft.

P/N 11-02344.....

AV-545 - An ADF Sense antenna supplied with "Government Approved" self-gripping jaws and a stainless steel small diameter low drag tension device for reliable installation. The unit is also supplied with 23 ft of

type 6370-2 copperweld polycovered antenna wire for minimum stretching, mounting bracket and hardware, rubber pad and ASA insulator with feed-thru. The antenna operates at speeds of up to 250 mph and altitudes up to 50,000 ft.

P/N 11-02345.....

BASE STATION ANTENNA - Ground Plane 118-136 MHz

P/N AV-5.....

AV-10 COMMUNICATIONS ANTENNA - 4-bolt design. Designed for high-performance aircraft applications. Identical in mounting and appearance to Cessna communications antennas. Rated to 250 knots. Equivalent to Comant CI-121

Antenna. Wt. 8 oz. Ht. 17-1/2" P/N 11-12500.....

AV-14 PUBLIC SERVICE AND BUSINESS BAND ANTENNA - Available in 4-bolt design. Features a tapered glass laminate housing and die-cast aluminum base. Rated to 250 knots. Equivalent to Comant CI-177-1. Wt. 8oz. Ht. 17.5"

P/N 11-12600.....

AV-17 COMMUNICATIONS ANTENNA - 4-bolt design. Designed for mounting to the underside of an aircraft, providing an excellent radiation pattern for air-to-ground communications. Low profile configuration makes it ideal for

helicopters and low-wing aircraft. Equivalent to Comant CI-122 antenna. Wt. 8 oz. Ht. 8-3/4" P/N 11-12700.....

VHF TRIPLEXER SPLITTER - Splits signal from VOR NAV antenna into two NAV receivers and one glide slope receiver. P/N AV-571.....

RA MILLER TRANSPONDER/DME ANTENNA (AV-74) - For transponder or DME application. The antenna housing is constructed of an acrylonitrile-styrene-acrylic (ASA) shell. The white color allows maximum performance without losses due to color pigments or unseen dirt. The antenna is supplied with cellular neoprene mounting pad and hardware. The antenna is designed to operate at speeds up to 350 mph and altitudes up to 50,000 ft. It has a drag force of 0.09 lbs @ 250 mph. This antenna is a direct replacement for Comant's model CI-105.

P/N AV-74.....

VHF DIPLEXER SPLITTER - Splits the signal from a VOR NAV antenna into NAV and glide slope receivers. Construction similar to AV-547. Insertion loss in applicable band - max.1 dB. Separation - min. 38 dB. Filtering - min. 30 dB, average - 40 dB. Connections UG-1094U. Accepts BNC. 108-118 MHz, 329-333 MHz. Wt. 3-1/2 oz.

P/N AV-570.....

AV-1 - is a base station antenna for communications with ground vehicles or aircraft. It has heavy-duty construction with 3/8" diameter aluminum radials, a 1" diameter aluminum tube radiator, and is iridite-treated for durability. It mounts easily to a 1" diameter pipe or a 1-1/4" O.D. tube with locking set screws.

P/N 11-05996.....

AV-2 - is a high performance vehicular antenna for use on all surface vehicles where communication on the aircraft VHF frequency band is required. Heavy duty construction with a tapered 17-7PH stainless steel whip and spring mount.

P/N AV-2.....

AV-3 - is a low profile snap-in mounting quarterwave antenna for use on surface vehicles. It has a solderless cable connection at the antenna and is supplied with 12 feet of cable and PL-529 connector.

P/N AV-3.....

AV-12 - is a VOR receive only antenna which uses a highly efficient technique of molding the elements directly into a high-impact thermo-setting bakelite center insulator. A 25 ft cable with integral balun is also supplied. with the AV-12L

P/N AV-12.....

P/N AV-12L.....

QUICKIE ANTENNA KIT - Simple installation procedure produces excellent communications antenna. Order additional kit for navigation antenna. P/N 11-09800.....

Toroids Only - Used in our quickie antenna kit for composite aircraft. P/N 11-09900..... ea.

ADF ANTENNA KIT - This ADF Antenna Kit is an economical replacement for the Cessna factory style antenna used on all the smaller Cessna aircraft. This antenna will work on most aircraft except those with a moveable tail such as the Mooney.

Replacement Kit..... P/N 11-12300.....

For new installations..... P/N 11-02655.....

DM N4-17/N ANTENNA - VOR/LOC/GS BAL. LOOP SYSTEM (DM N4-17/N) Single Output -- Frequency VOR/LOC 108-118 MHz -- GS 329-335.3 MHz

P/N 11-05859.....

AV-6 CABLE ASSEMBLY - Cable assembly consisting of 50 foot of RG-58/U low loss transmission line, a PL-259 connector at one end and a BNC male connector at the other. Commonly used with the AV-1 and AV-5

P/N 11-06992.....

AV-741 ANTENNA - Designed for use with DME/Transponder sets. Constructed from an aluminum casting which is capable of withstanding particle erosion at high speeds. Designed to operate at speeds up to 350 mph and altitudes of 50,000 ft. It has a drag force of 0.35 lb @ 250 mph.

P/N 11-06995.....

AV-15 ANTENNA - Used with aviation, land mobile radio and flight phone bands. Chrome-plated ball tip provides low noise static discharge. Designed to operate at speeds up to 350 mph and altitudes of 50,000 ft. It has a drag force of 0.75 lb @ 250 mph.

P/N 11-06993.....

AV-64 ANTENNA - Marker beacon antenna designed for very low drag. Supplied with cellular neoprene mounting pad and hardware. Designed to operate at speeds up to 350 mph and altitudes up to 50,000 ft. It has a drag force of 0.22 lbs @ 250 mph.

P/N 11-06994.....

AV-530 ANTENNA - Designed for broadband communications. Has a die-cast aluminum base and a tapered stainless steel whip for less drag at higher airspeeds. Supplied with a weather-sealing gasket and mounting hardware. Designed to operate at speeds up to 350 mph and altitudes up to 50,000 ft. It has a drag force of 1.65 lb @ 250 mph.

P/N 11-06696.....

AV

ANTENNAS

BOB ARCHER AIRCRAFT ANTENNAS

Designed by Bob Archer utilizing concepts common to military aircraft and space vehicles. The antenna performance is superior to most in use today in private aircraft. Antennas must be installed in accordance with the installation instructions. These antennas are designed to be installed inside fiberglass or other non-conductive wing tips or tail caps of metal or other conductive material aircraft.

SPORT AIRCRAFT ANTENNAS

MODEL 1 - This VOR antenna is designed to fit inside larger fiberglass wing tips on metal (conductive that is) airplanes such as T-18's, RV's Bonanzas etc. The wing tips must have internal dimensions of at least 11"x24" and generally fit better on the bottom surface. The VSWR is normally less than 2.0:1 over a frequency band of 108-127 Mhz but could be higher due to installation factors.

Left Side P/N 11-21015-1
Right Side P/N 11-21015-2

MODEL 1A Wing tip Com antenna. looks the same as Model 1 above and fits the same tips as those above but tuned for the Com band. Offered because of pressure from RV builders. Does not perform as well as Model 2 Com antenna but users report good communications at ranges greater than 50 miles. Should be installed so that the maximum height of the tip is utilized to get the most vertical polarization.

Left Side P/N 11-21016-1
Right Side P/N 11-21016-2

MODEL 2 - Tail cap Com antenna for metal conductive airplanes installed inside a tail top fiberglass fairing with inside dimensions of at least 10" high x 12" long. VSWR is normally less than 2.0:1 over a COM frequency band of 118-136 Mhz.

Left Side P/N 11-21020

MODEL 3 - Wing tip VOR antenna of same general design as the Model 1 but of a narrower design to fit Mooney tips with internal dimensions of 8" x 24". VSWR less than 2.0:1 over the frequency band of 108 to 118 Mhz.

Left Side P/N 11-21010-1
Right Side P/N 11-21010-2

MODEL 4 - Wing tip VOR antenna designed for smaller tips than Model 3 and with a 10 degree flare on the top portion and a curled aft portion. VSWR less than 2.0:1 over the frequency band of 108 to 118Mhz.

Right Side P/N 11-21025-1
Left Side P/N 11-21025-2

STYLE 1 OR 2 ANTENNAS

NOTE: Wingtip antennas come in RH and LH types. The -1 suffix indicates the installation of the antenna on the lower inside surface of the left wingtip or the upper inside surface of the right wingtip. The -2 suffix indicates the installation of the antenna on the upper inside surface of the left wingtip or the lower inside surface of the right wingtip.

MIRACLE AIR WHIP ANTENNA

The Miracle Air Whip Antenna features include: • Installs in the nose of you Challenger or similar aircraft in minutes • Groundplane free - a full half-wave dipole so it doesn't need any ground plane or wires • Pre-tuned for the highest effective radiated power from your transeiver • Mainly omni-directional pattern with slight bias towards your heading • Extended frequency response compared to most whips • Highest quality mil-spec connectors, cable and other materials • Available versions for Comms/VOR & ELT

COM/VOR P/N 11-03018
ELT P/N 11-03023

STAINLESS VHF ANTENNAS FOR HOMEBUILTS

These VHF antennas are stainless steel including all hardware. Insulators are made of Delrin, which resists extreme cold or high temperatures and is non-breakable. Antennas are available in straight and 45° or 90° angles. 118-136 mHz range. Weight: 3 oz. Not FAA approved.

Economy stainless ADF ANT.kit..... P/N 11-12300
ADF stainless ANTENNA kit..... P/N 11-02655

ANTENNAS FOR COMPOSITE AIRCRAFT

MODEL 5 - This transponder/DME antenna is an etched copper clad epoxy circuit board dipole that is designed to be installed inside non-conductive aircraft without need for the additional installation of a ground plane. The dimensions are 6" x 7" and it can be installed in the aft fuselage or the wings with the 6" dimension vertical. VSWR is less than 1.2:1 over bands of 1032 to 1090 Mhz.

P/N 11-21005

MODEL 6 - This com antenna is designed to be installed on the inside surface of the aft fuselage of composite and wood aircraft. It is a dipole that is folded up to minimize the vertical dimension and requires 12" of fore and aft space and 26.5" vertically. It is designed with flexibility so it can match the internal curvature of the fuselage. The VSWR is less than

2:1 across the com frequency band..... P/N 11-21000

MODELS 7 & 8 - These antennas are essentially the same with the exception of the overall length and the matching devices with the com antenna being installed vertically and the nav antenna being installed horizontally. VSWR is less than 2:1 over their respective frequency bands. The outer ends of these antennas may be swept to +/-30° to facilitate installation in various aircraft types.

NAV Antenna Model 7..... P/N 11-21030
COM Antenna Model 8..... P/N 11-21035

AV-GPS ACTIVE GPS ANTENNA

The RAMI model AV-GPS is a permanently mounted external aircraft antenna designed for use with GPS receivers which provide +5VDC on their antenna connector. Most handheld GPS receivers have this provision. It is an active (amplified) antenna providing an average 26 dB gain over a passive (non-amplified) antenna.

P/N 11-17990.....

ANTENNA COVER PLATE

For those of you who have been removing Loran-C antennas, here is your answer, the Antenna cover plate. It was designed to fit the same footprint as the CI-121SP or similar series antennas. Machined from white acrylic.

INTERCOMS

DAVID CLARK DC-COM INTERCOMS

DC-500 is a compact panel mount voice activated intercom. Features include two radio transmit, independent VOX circuit for each station, pilot, co-pilot, passenger isolation, select switch for ATC priority, individual volume and squelch controls, input for aux, radio, tape, or CD players, true stereo system with dual channels, VOX override option, solid state electronics, and five year warranty. Includes horizontal or vertical mounting options. Accommodates up to six headset stations. Made in U.S.A. P/N 11-90000.....

DAVID CLARK ISOCOM VOICE ACTIVATED INTERCOM

Superior squelch circuit that eliminates syllable "clipping" Pilot-Copilot priority override during transmission Provides constant monitoring of Air Traffic Control Headset side tone if not supplied through radio control

Internally lighted ISOCOM assures clear identification of the volume and squelch controls and on/off switch Transmit indicator light (located between the volume and squelch knobs) is illuminated when a P-T-T switch is activated for external transmission Universal voltage capability (11-32V) that makes it compatible with either 14 or 28 volt electrical systems **Specifications:** • Weight: 0.7lbs • Dimensions: 2.562" x 2.562" x 6.125" with rear connector • Power Requirements: 11-32 VDC, 250 ma. max. • Temperature Range: -15° F to + 150° F • Total Headsets: 6 @ 600 ohms nominal • Total Output Power: 90mw • Lamp Current: 14V @ 120ma., or 28V @60ma. P/N 11-06002.....

AVCOMM AC-2EX PORTABLE INTERCOM

Expandable, stereo and portable AvComm's new AC-2EX may possibly be the only intercom you will ever need! Measuring a mere 5.1" by 2.85", the AC-2EX is designed to produce powerful communications you can depend on. The compact design makes it easy to carry in your flight bag, a feature pilots who rent aircraft will especially appreciate. Need 4 positions? Simply add the AC-2XM module to accommodate additional passengers. FEATURES: • AVCOMM's Expandable Portable: 2 to 4 place • Rugged compact design • Two 9V batteries with quick access or 12-28V DC power • Stuck mic' indicator & Power-transmit LED • For use with mono or stereo headsets • Pilot priority PTT • Fail safe feature • Wt: 14.1 oz. • Full 3 year factory warranty. AC-2EX intercom.....P/N 11-02264.....

MULTICOMM AIRCRAFT INTERCOM

MultiComm is the first complete, fully-integrated multi-function intercom, radio-interface and power supply system for ultralights and light-sport aircraft. With it's unparalleled low-noise operation, rich sound quality and unique operating features, you now - finally - have the cabin sound you always wanted. Includes everything you need to get up-and-running, prewired and plug-and-play. MultiComm has multi-pass active and passive filters in the intercom and power supply to take all the noise out, while optimising the voice band-pass for maximum speech intelligibility. MultiComm is unique in providing four distinct operating modes to give you independent control over each individual mic's activation for both intercom and radio in a variety of combinations. Radio sidetone feeds your transmitted audio back to your headphones, confirming that you are transmitting as expected and allowing you to adjust your speech for maximum effectiveness. P/N 11-05791.....

SMOOTHIE BRICKWALL NOISE FILTER

• Powers radios, intercoms, music players, and all digital gear • Eliminates all the electrical noise from your system • Provides fully-regulated power at your choice of voltage (adjustable) • Protects gear from all forms of power spikes, noise and over-voltage • Prevents in-flight problems including flaky operation and failures • Replaces most outboard power adaptors from other manufacturers • May be used in multi-unit installations

Specs: • Voltage out - 9.6-15.3V (adjustable, regulated within 1%) • Voltage in - 12-16V • Current out - 1.0A continuous, 3.0A intermittent • Size - 3.6 x 2.6 x 1.1 inches • Weight - 4.4 oz

***Note: Smoothie is a sophisticated noise filter and secondary voltage regulator - it does not replace the primary regulator used to power mechanical systems and charge the aircraft battery.**

P/N 11-05792.....

FLIGHT DATA SYSTEMS AP-60 AUDIO MIXER

An Audio Mixer is Required any time there is more than one Audio Source. This unit mixes and amplifies six audio inputs. Mounts behind the instrument panel. **For Example:** • Communications Radio Audio • Navigation Radio Audio • EFIS Warning Audio • Music Player Audio • Traffic Warning Audio **Specifications** • Aux. Audio Input • Compact (2.5" X 3.4 X .6"), Lightweight (2.1 oz) • 12-28 Volt Compatible • No Special Tools Required For Installation P/N 10-03427.....

PS ENGINEERING PM1000 PANEL MOUNT INTERCOMS

Eliminates clipped words and shouting. Includes individual volume and squelch controls for the pilot and copilot. Independent microphone circuits allow individuals who are speaking to be heard, and keep background noises shut out. Music can be added to the intercom for in-flight entertainment. Automatic muting when the intercom is active, or intercom and radio (PM1000II-series) ensures uninterrupted communications.

PS Engineering's "SoftMute" gradually returns the music to the original level when conversation stops. Although monaural, the music fidelity is still excellent. In most airplanes, you won't notice the lack of stereo separation. The PM1000 is an effective 2-place intercom, with individual volume and squelch controls, while the 4-place PM1000II adds a transmit indicator lamp, and music muting during radio traffic. The PM1000II, 11-11922, has pilot isolate mode that allows the pilot to concentrate on flying, while the passengers enjoy music and conversation. The PM1000II with CREW mode (P/N 11-11920) allows for separate intercom for the pilot and copilot positions, as well as separate music sources for front and back. The PM1000-series can be expanded using additional units (11-11918) for up to 8 places. A version with a digital recorder will store up to a minute of incoming radio traffic for instantaneous playback. The P/N 11-11909 is specifically designed for ultra-high noise environments, such as open cockpit aircraft. A round mounting plate allows installation in a 2.25" instrument mounting hole. The standard metal faceplate will accommodate horizontal and mounting configurations. Power:14 or 28 VDC; Size: 1.3"x 3"x 5.5"; Wt: 10.5 oz. 1-yr warranty if installed by authorized PS Engineering Dealer. Custom wiring harnesses available.

INTERCOMS

PS ENGINEERING AEROCOM III

The Aerocom III is a 2-place stereo portable intercom with IntelliVox™, a completely automatic VOX squelch. Each microphone computes the difference between speech and cabin noise. It opens instantly when somebody talks and only the microphone spoken into is active. This prevents unwanted background noise from entering the audio system. Powered by a 9V battery (10 hrs of use) or aircraft power. Features low battery alert. By using external push-

to-talk buttons (not included), both the pilot and copilot positions have the ability to transmit over the aircraft radio. The aerocom III will route stereo music to the headsets through the optional music cable. The music automatically mutes when there is intercom activity or radio traffic. There are two modes controlled by a top-mounted switch. In "ALL" mode, both positions hear radio communications, music, and have intercom capability. In the "ISO" mode, only the pilot side is connected to the aircraft radios, without intercom or music distractions. The copilot position continues to have music, and intercom communications with an expansion unit if installed. The aerocom III is expandable to 4-places with the Aerocom EX expansion unit available by special order. This contains separate music input and dedicated IntelliVox™ processors. Specifications: Size: 4.375"l x 3.250"w x 1.500"h; Wt: 10 Oz.; Power: 9V batt. or 12/24V aircraft power Battery Life: Approx. 10 hrs.; Headphone output: 40m w/channel into 150Ω, < 1% THD; ±3dB mic frequency range: 350 Hz to 4500 (to reduce noise); ±3 dB music frequency range: 180Hz-15,000Hz P/N 11-00427..... PM 3000 PANEL MOUNT STEREO INTERCOM

The world's first stereo intercom to be FAA-TSO approved. Available in 4- & 6-place versions. The 4-pl. PM3000 (P/N 11-11931) features pilot isolate and "All" reception modes. The PM 3000 6-place (P/N 11-00851) intercom includes a "CREW" mode. In CREW mode, the pilot & copilot are on one intercom channel, while passengers have conversation on another. Constant squelch adjustments are eliminated with the PM3000. A single squelch knob controls multiple circuits making the intercom one of the quietest to use, even in the noisiest airplanes. The 6-place PM3000 provides for two independent stereo entertainment inputs. This gives the passengers and the crew each the option to listen to their music device. The PM3000 has an automatic fail-safe interconnect to the aircraft systems. If power to the intercom is disrupted, the pilot's headset is automatically connected to the aircraft radio. With the PM3000 installed, both pilot and copilot have transmit capability over the aircraft radio. A 2-color LED shows green when power is on, and red during radio transmissions. This feature acts as a stuck microphone indication.

PM3000 4-Pl. Stereo Intercom (w/o digital recorder) – FAA-TSO; 4-pl. panel mount intercom, single music input. Installation hardware includes 4 sets of headset jacks, a music jack and reversible (horizontal and vertical) metal mounting plate. P/N 11-04843

INTERCOMS

SIGTRONICS MINIATURE PANEL-MOUNTED INTERCOMS

Measuring only 1" x 2-1/2" x 4" deep, only 4.5 oz, the SPA-400 and 6-place SPA-600 are FAA TSO'd and can be mounted either horizontally or vertically. Also available in special "HIGH-NOISE" model SPA-400N for Ultra-lights, and open cockpit aircraft, kit aircraft and warbirds. The se intercoms

allow you to put "push-to-intercom" buttons in the aircraft to eliminate VOX mode when desired. This is especially good for open-cockpits where wind noise can be a problem. The SPA-400N simulates side-tone because some radios that are currently used in these markets do not have it. The SAS-440 and SAS-640 intercoms feature Sigtronics' exclusive "Auto-Squelch". One touch of the squelch button and the intercom perfectly sets the squelch level to your headsets and the aircraft noise level. All Sigtronics intercoms are voice activated with a 5-year warranty and operate on any voltage from 12V to 24V. Made in USA.

SIGTRONICS SPA-4S STEREO INTERCOM

The SPA-4S is a 2 or 4 place voice activated intercom with inputs for stereo music. It is a small, compact system that allows it to fit in space critical panels. The SPA-4S uses the industry standard Sigtronics squelch, fast on

slow off for hands free communication. The music will full mute during ATC communication and partial mute during intercom communication. Each intercom comes complete with all necessary mounting hardware, jacks, and two 4-foot pre-wired harnesses. The SPA-4S only requires 1" X 2.5" of panel space, mounts horizontal or vertically, is 4" deep, and weights 5.5 oz. The SPA-4S intercom can easily upgrade the SPA-400. The SPA-4S uses the same panel hole pattern and interface cable as the SPA-400. A second cable is provided for the music inputs and headphone outputs. The SPA-4SN is available for the high noise amateur built aircraft. As with all of Sigtronics products, the SPA-4S is RFI and EMI immune. Power: 11-32 VDC.

- Standard SPA-4S P/N 11-00567
- High Noise SPA-4SN P/N 11-00568

PILOT USA PA200 SERIES INTERCOM

PA200 World's Smallest Portable Intercom. A solid VOX intercom offering clear communications. Adjustable volume control and squelch control allows for easy adjustment for all ambient noise levels. 2 push-to-talk switches can be used with the intercom allowing transmission through the radio. Unit is ideal for rental aircraft. PA 200R is also available for motor-sports. FEATURES: •On/Off volume control •Adjustable squelch circuitry •Fail-safe capability •Y-adapter for 2 push-to-talk switches •Powered by one 9V battery (24 hours) •Size: 2.25" x 1.38" x 2.75" •3-yr unconditional warranty •Wt: 8 oz. (227 grams)

PILOT USA PA400 SERIES INTERCOM

The stereo version PA-400ST intercom is a portable design that has been used successfully in general aviation for over 18 years. No other intercom on the market has the features and capabilities of the PA-400ST intercom.

This particular series has been recently modified to include a cell phone jack for your safety and convenience. Before using in an aircraft we recommend that you take a check-ride in your living room and become familiar with all the features of your new intercom. A hook-up diagram is included in this guide along with brief description of each function and each control setting.

- PA400ST P/N 11-03548

FLIGHTCOM IISX PORTABLE INTERCOM

The IISX is the world's most popular 2-place, portable intercom. The modular design offers expansion capability to the backseat if needed. * Expandable to 4-place portable with optional SR-4 expansion module * Auxiliary inputs and outputs for music or recording flight information * Low-battery indicator and pilot isolate * Uses aircraft power or 9-volt battery Flightcom IISX 2 place

includes: • IISX Intercom • Cigarette lighter adapter • Co-pilot transmit cable Flightcom IISX 4 place includes: • All parts in the 2 place • SR-4 expansion module

FLIGHTCOM 403MC PANEL MOUNT INTERCOM

The 403 is a 6-place panel mount, voice-activated stereo intercom. This easy to use intercom is

designed to fit almost anywhere in the panel. Includes: * 403MC Intercom * Connector kit * 4 place mono jack kit. Features: * 3-position transmit capability * Selectable muting and pilot isolate * Auxiliary input for music or alerts * Rectangular faceplate can be mounted horizontally or vertically Specifications: * Weight: 3.6 oz * Length: 2.62 in * Width: 2.37 in * Height: 1 in * Not TSO'D * Power requirement: 12-28 VDC * Two-year warranty P/N 11-08755

XCOM INTERCOM

The XCOM Intercom is a state-of-the-art, digitally controlled, intercom system suitable for nearly every 2 or 4 place aircraft. The XCOM Intercom features a full VOX (Voice Activated) intercom with second com ability, music input with muting and the ability to use different branded headsets without compatibility issues. The XCOM Intercom was originally

designed for the Microair, Filser, Dittel and Becker aircraft radios but it has now been successfully mated to the leading handhelds as well as panel-mounted Icom, Narco, King and the like. Measuring only 2-1/8 x 1 x 3-7/8" or (53 x 24 x 100mm) and with a panel size of only 1 x 2 1/8 (53 x 24mm), it's one of the smallest and lightest intercoms in the world and only draws 60 ma (at 14 V) during operation. Mount horizontally or vertically. The XCOM Intercom has no voice clipping; it's truly instant on / slow off. Nothing is lost in conversation between the pilot and passengers and the digital voice control provides clear and crisp communication at all times. The XCOM Intercom monitors and reduces background noise when the voice circuit is open and the noise in the cockpit is greatly reduced during conversation or transmission. One simple DB15 connector is all that's needed to control the XCOM Intercom, on top of the Intercom is the RS-232 port for future software updates. 2 com inputs cater for a primary airband com and a secondary VHF, UHF or Marine band transceiver. Additional input for CD player, FM Radio or MP3 player is available with auto muting to enable seamless communication in the cockpit. Selecting the Pilot Isolate feature allows the pilot to only hear his com radio and the co-pilot & passengers can continue talking and listening to the CD music without being interrupted by airways chatter. Landing gear, stall and GPS warnings can all be configured for input to the intercom unit so that they are audible through the headsets. Voltage: 10-30 VDC. 2 yr warranty. P/N 11-02207

FLIGHTTECH ITC-2004 ENRI 4-PLACE INTERCOM

4 place portable intercom with pilot isolate capability. Features: Exclusive Electronic Noise Reduction circuits. Up to 110db of Noise Reduction. Continuous Audio, No missed Syllables or Words. Small Size: 5.5" x 1.5" x 3.2" Three Year Warranty....P/N 11-17669

AV

INTERCOMS

FLIGHTTECH ITC-401-ENRI PORTABLE INTERCOM

The ITC-401-ENRI 2-place intercom features the Enhanced Noise Reduction Intercoms circuit in a basic, small package. With ENRI, the problems common with voice activated intercoms are eliminated. There are no squelch controls to adjust, no automatic squelch circuits that keep changing levels, only one single volume control. ENRI continuously monitors background noise picked up by the headset microphone and eliminates it, even while talking. Excellent for open cockpit aircraft. 9V Battery Operation • Pilot/All Switch • Available with cable and standard plugs or ICOM A-22, A3 and A4 Cable & Plug • 3 year warranty • 4"L x 2.5"W x 1.5"D.

ITC-401-23 - Plugs directly into Icom A5 & 23 with out the need for additional cables P/N 11-01005

ITC-401/1-ENRI - Plugs into Icom A22, A3, A4 with out need for additional cables P/N 11-00825

FLIGHTTECH ITC-2003-ENRI REMOTE PANEL MOUNT INTERCOM

The ITC-2003-ENRI features ENRI technology, a unique design, a small panel control unit and a remote intercom unit. The small control panel consisting of a Volume control and a Pilot/All switch measures only 1" w x 1.3" d x 1" h. The second part, the intercom unit is only 4.6" x 3.1" x 1.7" and included mounting tabs. Because of D.C. switching and control between the panel control and the intercom, the mounting location is not critical. Simply mount the intercom unit in an easy to reach location, run cables to the headphone jacks, power and a small six conductor cable to the panel control unit. The Electronic Noise Reduction feature is exclusive to FlightTech Intercoms and allows for quiet communications without the background noise common to Voice Operated Squelch controlled intercom. With ENRI, the microphones are active at all times, ENRI monitors the background noise and eliminates it allowing only the headset user's voice to pass.

Power: 12V or 24V P/N 11-00172
With preassembled 2-place cable P/N 11-00822

FLIGHTTECH MINIVOX PORTABLE INTERCOM

The MiniVOX two place portable intercom is designed for the student pilot and renter pilot requiring a basic low cost voice operated intercom. Measuring 4" x 2.5" x 1.5", the MiniVOX features adjustable Squelch and Volume controls, on-board Push-To-Talk button and up to 25 hours of operation from a 9V battery. Ease of operation, long battery life and a small size make the the new MiniVOX an ideal entry level intercom. Weighs less than 10 oz. Made in the USA.

P/N 11-02126

FLIGHTTECH ITC-401TC INTERCOM

ITC-401TC is different from the rest of the ITC-401 series in that the "Noise Reduction" control is located on the front of the intercom, rather than an internal "Set and Forget" adjustment. The ITC-401TC is available in versions with cables and plugs for panel mount jacks as well as handheld radios and they include the following: ITC-401TC, Standard cable and plugs for panel jacks P/N 11-03201

ITC-401TC-1, Cable and plugs for the ICOM, A22, A3, A24, & A P/N 11-03202

ITC-401TC-23, Cable & plug for the ICOM A23 & A5 P/N 11-03203

FLIGHTTECH ITC-2001-ENRI 2PLACE PORTABLE STEREO INTERCOM

Ideal for the renter pilot or as a permanent intercom without the installations concerns associated with a panel mount intercom. Features: Exclusive Electronic Noise Reduction circuits. Up to 110db of Noise Reduction. Continues Audio, No missed Syllables or Words. Built-in Cellular Phone Interface, includes patch cable. Pilot/All Switch. Specifications: 9 Volt Battery or External DC Operation, Cigarette Lighter Adaptor included. Auxiliary Stereo Audio Input with Radio Mute and Intercom Audio Mute. Light weight, 10 oz. Push-to-Talk Button for Keying the Comm Radio. Pilot and CoPilot Radio PTT Jacks. Small Size: 5.5" x 1.5" x 3.2" Three Year Warranty.

SOFTCOMM PANEL MOUNT INTERCOMS

ATC-2P (2-passenger), ATC-4P (4-passenger) & ATC-6P (6-passenger) panel-mounted intercoms are so compact that they fit most anywhere in the aircraft's panel. Designed to mount either horizontally or vertically, these panel-mounted intercoms will fit in any homebuilt, business aircraft, or general aviation aircraft in production today, and offer stereo or mono sound. The panel-mounted intercom has an exclusive Softcomm feature of a back-up battery (9V) that affords power to the Intercom when the aircraft's master power is shut off or fails in flight. The battery is automatically switched off when aircraft power is present and on when absent. The panel-mounted intercom offers SoftComm's features of Recorder-In and Recorder-Out. A miniature remote audio panel houses this feature and can be located anywhere the pilot prefers. This allows recording of clearances, flight lessons, enroute weather and flight events. The ATC-2P, ATC-4P, & ATC-6P panel-mounted intercoms come complete with mounting instructions, wiring diagrams, all required microphone and headphone jacks, audio recorder jacks, and bi-directional mounted nomenclature plates. These intercoms are supplied with pre-tested 8 ft. cable assembly terminated into a DB25 pin connector. Size: 1"hx2.5"wx6"d. Power 12Vdc. Wt:6.25oz., 3yr warranty.

ITC-402P/404S-P PANEL MOUNT INTERCOMS WITH ENRI

The ITC-402P Enhanced Noise Reduction Intercom is a small, easy to install intercom designed for the pilot who flies a two or four place aircraft. Featuring single control volume control operation, the pilot and passenger can enjoy quiet communications on those long cross country trips. The ITC-402P includes a stereo auxiliary audio input. To prevent missing ATC communications, the music is muted when either audio from the communication radio is present or there is intercom audio. The new ITC-404S-P has full auxiliary Stereo in and Stereo out, with dual function muting. Features: • Enhanced Noise Reduction Technology • No Squelch circuits or controls • Size: 2.1" w x 1.2" h x 3.1" l • Single Volume Control Operation • Pilot/All Isolation Switch • Pilot and Copilot Push-to-Talk Switch Inputs • Stereo Music Input w/Muting • 12 to 28VDC operation. • Cellular Phone interface, include phone cable.

SOFTCOMM PORTABLE INTERCOMS

These top quality, economical intercom systems are perfect for any type aircraft and are compatible with any standard headset. Features include automatic on/off power, panel controls for volume and gain and a pilot isolate switch (ATC-4 only). The intercoms are 9V DC portable or panel mountable with pilot and copilot transmit as a standard feature. These intercoms can be used with other equipment to record instructions or play cassette music. The new model of the ATC-2 has reduced size and weight, and a front-panel mounted PTT switch. The improved ATC-4 and ATC-6 also have a new dual transmit design. All units have aux power cord and stereo cable. With pilot isolate and push-to-talk switch. Model ATC-2T is a 2-place portable intercom designed for the student pilot. It has a recording feature that allows all CFI and ATC instruction to be recorded on a standard cassette player for future study. It is 9V battery powered and is compatible with all general aviation headsets and radios.

BOSE AVIATION HEADSET X

Enjoy full-spectrum noise reduction, comfortable fit and clearer reception when you fly with the Bose® Aviation Headset X. Thanks to proprietary TriPort® headset technology, this unique combination of benefits is available in one lightweight headset. The redesigned control module and greater usability make the #1 headset choice of many pilots and military personnel even better.

BOSE® TECHNOLOGY MAKES THE DIFFERENCE - Most active noise reduction headsets require large earcups and considerable headband force to muffle aircraft noise. Through 25 years of research, Bose® has developed a better solution—TriPort® headset technology. This patented innovation enables a smaller, more comfortable headset that delivers full-spectrum noise reduction.

Acoustic Noise Cancelling® headset technology contributes to this high level of noise reduction. It monitors sound at the ear, identifies unwanted noise and creates an out-of-phase signal to reduce it. Their active equalization circuitry also delivers clean, full sound that improves the intelligibility of radio and intercom audio. In fact, U.S. Air Force tests with Bose headsets achieved intelligibility scores of 95% at 115db compared to 80% for conventional headsets.

AT BOSE, A COMFORTABLE FIT IS MISSION CRITICAL - Whether you're a general aviator or helicopter pilot, comfort counts. That's why Bose® designed the Headset X with 50% less clamping force than most active noise reduction headsets. The solid magnesium headband is extremely lightweight yet durable. The sheepskin cushion eliminates hot spots, and soft, padded ear cushions provide an effective seal—even over glasses. The result is superior noise reduction in a comfortable headset that weighs only 12 oz.

LONGER, SMARTER BATTERY LIFE - Proprietary AdaptiSense™ headset technology allows at least 40 hours use from just 2 AA batteries. It supplies power as needed, detects when you've stopped wearing the headset and automatically shuts off the active electronics. Plus, the new tri-color indicator provides real-time battery status.

FOCUS ON YOUR FLIGHT, NOT YOUR HEADSET CONTROLS - The redesigned control module is 30% smaller than the previous version and even easier to use. Its slim design puts all functions—including dual thumbwheel volume controls—within easy reach. The improved boom microphone design enables smoother, more precise adjustments. Experience the full-spectrum noise reduction, comfort and clearer communication of Aviation Headset X. Choose the configuration that best fits your flight needs: an installed version or one of two portable options.

KEY FEATURES:

TriPort headset technology Proprietary Bose technology utilizes three small ports in the earcups to produce a rich audio performance that's remarkable for headphones this small. Enjoy clearer communications from a headset that stays comfortable on long flights.

Acoustic Noise Cancelling headset technology Only from Bose, this patented technology electronically identifies and reduces unwanted noise, allowing improved intelligibility of radio and intercom audio. The continuous roar of flying is reduced, so your concentration is improved.

AdaptiSense headset technology Sophisticated electronics monitor current demand and instantaneously adjust the voltage to maintain maximum performance. Smart shutoff detects when you've stopped using the headset for even greater battery life—up to 40 hours from just two AA batteries. (Applies to portable version only.)

CLARITY ALOFT HEADSET

Used to improve both hearing protection and speech communications. Each earpiece includes a miniature speaker that reproduces speech signals from the aircraft audio system. The replaceable compliant foam tips attach to the earpiece and contain a pathway for the sound to travel from the transducer to the ear. Provides the highest level of hearing protection available by any method including active noise reduction. (ANR) The noise-canceling microphone is a high fidelity noise canceling Electret Condenser microphone. Include a Push-to-Talk button in the Volume control box. This button could also be used as a backup in case of other system failures. Balance and comfort are the result of its elegantly simple design. P/N 11-02923.....

CLARITY ALOFT PRO HEADSET

All the features you'll love from the original with **TSO Certification** and additional features like: **Music Input**. Equipped with a music input in the volume control box that will accommodate most music devices through a 1/8 inch plug. **Adjustment Band**. Some people prefer a closer fit, an adjustment band is included in your purchase. The adjustment band is a flexible band that slips over the back of the headset frame and tightens with toggles at each end. P/N 11-05794.....

LIGHTSPEED MACH 1 HEADSET

Designed without any of the traditional boundaries of headset implementation, the Mach1 series of headsets is design by simplifying the concept of an Aviation headset. Based on new In-the-Ear (ITE) technologies, utilizing advancements in Ear Plug attenuation and comfort, artisan crafted custom ear molds, and new ultra small speakers and noise-canceling microphones, the Mach1 series weighs less than an ounce, delivers crystal clear audio communication, a stable face-contouring fit, and over-the-ear support

Features:

- Lightweight: Magnesium Alloy Construction Makes This Product Incredibly Lightweight Yet Rugged and Durable
- Replaceable Foam Ear Plugs: Comes Standard with Patented MATRIX™ No Roll Foam Ear Plugs by Howard Leight. Other Plugs Available For Optimal Customer Fit and Performance.
- Optional: Sensaphonics sound-isolating custom soft gel silicone ear plugs.
- Stereo Hi-Fidelity Sound: For Maximum Music and Speech Reproduction
- Music Interface: Plug in a Portable CD Player, or Any Digital Music Player with powered amplifier. (utilizes lithium disk battery)
- Cell/Satellite Phone Interface: Make a Call Using Your Headset
- "Pilot Isolate" For Conversation Privacy When Cell Phone is in Use
- 5-Year Warranty

LIGHTSPEED HEADSETS

ZULU HEADSET BY LIGHTSPEED

Not just the best headset Lightspeed has made, it is the most popular Lightspeed ANR headset. Made with magnesium, stainless steel, and four types of composite plastics, it's extremely durable and yet weighs just over 13 ounces. Inside the headband is a core of thin, flexible spring steel. Luxurious, soft

leather surrounds 'extra wide' ear seals made from temperature sensitive foam. Calibrated magnesium sliders adjust ergonomically to accommodate your exact head size with uniform pressure. The vented headpad evenly distributes the weight of the headset. All wiring is fully concealed using patented design features, and Zulu folds flat for easy storage. Bluetooth® allows Zulu to connect wirelessly with your cell phone, MP3 player, or other compatible device. richness of Zulu's FRC audio system. Fortunately, our design team included musicians and audiophiles. Setting a new standard for clarity, fidelity, comfort, and quiet. From the start we intended to set a new standard in clarity and fidelity.

Here are just a few of the premium components we insisted on:
 • Gold contacts for all wire connections • High Grade audio quality film capacitors are used throughout the signal path.

HEADSETS

AIRCRAFT SPRUCE SKYCOM & SKYPRO HEADSETS

SKYCOM II SERIES - Offer a family of products with a different look, fit and performance from the 'traditional' headset design. While >30% lighter in overall weight, they offer better quieting with greater comfort and user features. They were designed around the best hearing protectors offered in the Industrial Safety world to offer maximum passive noise rejection. The thin, flexible wireframe headband design easily contours to your head, limiting clamping pressure yet maintains a very low profile for canopy clearance. The ear seal system offers a larger ear opening with numerous options for type of seal available. The Boom mounts under the cup and is reversible for use on both sides.

All models include dual volume controls, Electret N/C mics with adjustable gain, Stereo/Mono compatibility, a carry bag, and a 3 year warranty. Model-specific features include Cellphone interface, and stereo music interface with muting, and ANR performance with a convenient small/inline, 2 AA battery solution.

Skycom II ANR: Cell/Music w/muting..... P/N 11-02659.....

SKYCOM I SERIES - Was first offered over 10 years ago and is designed around the traditional, oval-shaped headset design used for over 40 years in aviation. It features a steel headband, large headpad, and metal yoke/pivot system. Earseals mount around a protruded flange and are easily replaceable. The reversible boom mounts on the side of the cup and offers two styles on the models offered.

All models offer electrets N/C mics and warranties range from 1-3 years. The ANR model offers over 15dB of additional cancellation using a detachable 9 volt battery module

SIGTRONICS S-AR HEADSET

The S-AR headset protects your hearing switched on or off. With S-AR switched on you hear a major reduction in low frequency noise. Radio transmissions that are weak and garbled on passive headsets will sound strong and clear with an S-AR headset. Features up to 19 db of active

noise reduction, air foam head pad cushion that virtually eliminates "Hot Spots", ultra-deep gel ear seals for comfort and ease of use and custom flex boom for perfect mic placement. Sigtronics exclusive "Stop-Break" high flex cord and RFI and EMI free electronics make the S-AR ideal for pilots who want a high performance mono/stereo headset. A battery power module (9V) with belt clip and custom headset bag are included with all S-AR headsets. P/N 11-00859.....

SIGTRONICS S-8 HEADSET

Eliminate scratching the top of your canopy by using the Sigtronics S-8 headset. features a behind the head headband with quick adjust velcro strap that fits the shape of your head, a flex boom and gel ear seals. The S-8 has a passive noise reduction rating of 24 dB. 5 Year warranty. P/N 11-00645.....

SIGTRONICS HIGH PERFORMANCE HEADSETS

All Sigtronics headsets and intercoms are specifically designed for high-noise environments and are RFI and EMI immune, giving you clear, interference-free transmission even in fabric or composite aircraft or in use with handheld radios.

SERIES 8 HEADSETS

"8 Series" superlight headsets are full-size quality headsets available at just 11.9 oz., delivering comfort, and performance. A new lightweight, custom flex boom stays where you put it, even in

the roughest conditions.

S-58 features new, durable, non-glare "powder-coated" black hardware and Sigtronics "sky-blue" earcups. The new ergonomic headpad and custom fit gel seals deliver comfort and eliminate "hot-spots". A new microphone configuration cancels unwanted noise before it can get into the system. Sigtronics' 5-year warranty, custom padded bag, easy-grab volume controls, ultra foam windscreen & exclusive clothing clip are included. Wt. 11.9 oz. Flex boom.

ANR HEADSET RETROFIT KIT

The ANR Adapter is a product that will transform a current aviation headset into a high-tech active noise reduction (ANR) unit. The ANR Adapter comes as a kit and includes a pair of inserts that fit more than 20 different headset models. Installation requires fitting the inserts, drilling a small hole in one earcup for the power receptacle, and soldering the original cable leads to the kit replacement parts. (uses (2) 9V batteries)

David Clark type.....P/N 11-11955.....

Peltor.....P/N 11-11956.....

AMP CABLE (AUDIO+MIC+POWER)

A standard ANR upgrade kit comes with a 6' long add-on power cable which tie-wraps to your original audio cable, and it requires that you drill a 1/4" hole in the left earcup (next to where the main cable enters the cup). The AMP cable replaces your original cable and has the DC power wires, audio wires and mic wires all in 1 cable. The result is more esthetically pleasing and no additional hole is required in the left earcup. P/N 11-03012

AV

SENNHEISER HEADSETS

Sennheiser developed a full line of innovative headsets in response to the aviation industry's concern about clear communications and prevention of hearing loss and fatigue. Several of these headsets feature active noise cancellation (ANC). Superior clarity and steadfast reliability make Sennheiser's aviation headsets standard equipment for discerning pilots and passengers everywhere. Over 150 international airlines as well as major manufacturers and pilots of corporate and general aviation aircraft know they can count on Sennheiser. Most headsets comply with FAA/TSO -C57A, C58A. All headsets have a 5yr warranty unless noted.

HME43-K PILOTS HEADSET

The HME 43-K is a pilot's headset with closed headphones and Ultra Noise Cancelling Microphone for use in Business Jets. Features: •Very lightweight •Ultra Noise Cancelling Microphone for superior speech transmission •Microphone can be worn on either left or right-hand side •Headset with comfort leatherette and replaceable ear pads •Double-sided adjustable headband with comfort headpads •Superior speech intelligibility •Lightweight Headset •Headband cable completely internal •ActiveGard safeguards the user from the effects of an acoustic burst •2 year warranty

P/N 11-04841

HME25KA-2 PASSIVE HEADSET

Designed for comfort & clarity in the loud aviation environment, the HME25KA-2 pairs a lightweight, split headband headphone with a noise-compensating, electret mic. The ultra lightweight, closed-back, supra-aural design provides 16dB of passive attenuation. An excellent choice for the cockpit or for air traffic controllers.

Wt: 4.9oz; 6 ft. cord. Now TSO'd. P/N 11-09790

HME46PASSIVE / HMEC46 ANC

These boomsets successfully combine proven functionality with the latest audio technology and maximum user comfort. The HME 46 incorporates peak level protection. It delivers reliable protection from excessive volume peaks of more than 110 dB during radio communication. The new boomsets are available with all common plug configurations. Features: •Extremely light weight •Superb wearing comfort due to patented two-piece automatic headband and soft ear pads •Flip-away headphone allows single-sided listening •Flexible microphone boom, can be worn on either left or right-hand side •Noise-compensated condenser microphone ensures excellent speech transmission •Single-sided cable, length 1.85 m, easy to exchange •With volume control •Volume peaks above 110 dB are eliminated •ETSO/TSO approval C57a and C58a.

HMEC25KA ANC HEADSET

For those who work or play in a loud cockpit and would like a low-profile, lightweight headset with outstanding noise reduction, the HMEC 25-KA is the answer. Active noise cancellation reduces noise by over 15dB to provide over 30dB of total noise attenuation. The HMEC 25-KA is a supra-aural, closed back headset that weighs less than 6 oz. and has a split headband design for unsurpassed comfort and fit. Wt: 6 oz., electret mic, ANC power, 2 AA batteries, 6 ft. cord. • FAA and JAR TSO approval C572 and C58a .

HMEC 25-KA P/N 11-09795.....

HMEC25-KAS HEADSET

A supra-aural closed back headset that weighs less than six ounces and has a split headband design for unsurpassed comfort and fit. Active noise cancellation (ANC) reduces noise by over 15 dB to provide over 30 dB of total noise attenuation. The microphone boom can be turned through 350° and can thus be worn on either side of the head. The micro-phone module with noise-compensated electret capsule and integrated pre-amplifier is easily replaceable in the unlikely event of damage. • Lightweight, closed back supra-aural headset • 15 dB Active noise cancellation • 11 dB Passive Attenuation NRR • Noise cancelling electret microphone with rotating boom • Stereo/Mono switch • Dual Volume Control. • operates on 2 AA batteries.

C.A.T. SYSTEM PILOT EAR MICROPHONE

Does not interfere with eye or sun glasses and weighs only 1oz., eliminating the 'Over the Head' or 'Behind the Head Pressure Producing Head Band'. The "Heavy Boom Microphone" has been eliminated since all of the transmitted and received audio is derived from and delivered to the wearer's ears. The Ear Pieces produce a Noise Reduction Rating (NRR) of 33dB with universal foam ear molds and up to 46dB with custom ear molds. They are connected to the Interface Controller with a lightweight, heavy-duty cable and locking connector. The Controller interfaces directly to most General Aviation Avionics Packages, which include Navigation, communications, Radios and Intercoms. Complete with an individual volume control for the wearer's comfort. Utilizes a Double Shielded Coil cord with gold plated avionics connectors to eliminate any possible interference when using it in close proximity to a handheld transceiver. Weighs only 9 ounces and is covered by a Limited Lifetime Replacement Warranty. The Ear Pieces and coil cord are covered by a 1-yr Warranty. TSO pending.

2001-ACFT Pilot Pro - Includes the Controller and Foam Ear molds.
 P/N 11-00369.....

2001-APT - Remote Velcro Push-to-Talk Button for yoke mounting. The button is mounted with Velcro and has a coil cord with a 1/4" Plug and a .206 Jack for interfacing into the aircraft's avionics system.

DRE 6000 ANR HEADSET

- Powerful ANR performance
- Stay-put half-flex boom
- BNC clear hear electret mic
- Dual volume control stereo
- Pillow top headpad
- Deluxe gel ear seals
- Wind block mic muff
- Auto shut-off battery pack
- Auxiliary power input jack
- 20-hour battery life
- Weight: 16.5 oz.
- 3 year warranty

The most powerful ANR (active noise reduction) aviation headset available! Not just an add-on kit, but also a headset designed for true ANR performance. The DRE6000 has ear cups with internal baffle-plate providing the strongest ANR in the industry. With 18-20dB of noise reduction @ 200Hz with an effective range from 20 to 600Hz, the DRE6000 ANR is guaranteed to exceed the performance of any production ANR headset. When the noise is just too much, simply flip the switch and enjoy the flight. Custom fit half-flex boom stays where you put it and is completely adjustable for an exact position even on those long flights. Quick disconnect main cable for easy storage and hassle free replacement if broken. Additional features include extraordinary audio fidelity, battery life LED indicator, gold-plated plugs, and high-flex reliable wiring.

BEYERDYNAMIC HEADSETS - FLITELITE

BEYERDYNAMIC HS300 AVIATION HEADSET

The perfect combination of quietness, comfort and design. As a headset with "closed back" construction, the HS 300 Individual offers perfect noise protection for long and safe flying. An audio box comes with the headset and it is possible to route the signal from a mobile phone or MP-3 player through this

box. When a radio signal is received the volume of the music or phone call automatically decreases. Only high-quality materials, designed for a long service life and maximum user comfort, are used for this hand-crafted premium headset.

Features:

- Noise attenuation of approximately 30 dB
- Audio box included with an interface for mobile phone / music player (two cables included)
- Automatic muting of external signals when radio signals come in (muting can be switched off)
- Noise-compensating microphone with adjustable sensitivity (can be Worn left or right)
- Mono/stereo selection switch
- Balanced sound and high reproduction precision for excellent intelligibility of speech
- Integrated volume control
- Made in Germany with a five-year warranty
- Rugged construction using spring steel hoop and soft, replaceable head bolster
- Low weight (approx. 325 g without cables)
- Service-friendly - all parts are easy to replace
- Headset case included

BEYERDYNAMIC HS600 DANR AVIATION HEADSET

HS 600 DANR is the only Aviation headset worldwide that provides a processor-controlled active noise attenuation with an intelligent algorithm producing the counter sound. This advantage of the DANR concept makes this new headset a benchmarking product.

- Excellent silent noise attenuation of approx. 40 dB due to Digital Adaptive Noise Reduction

- Software version 2.0 with Noise Peak Reduction and broadband reduction
- Audio box with integrated volume control provides connection for mobile phones or music players (supplied with two connection cables)
- Automatic reduction of telephone and music volume (mute) when Intercom signals are received (function can be switched off)
- Powered by two AA batteries inserted in the audio box with a minimum operating time of 25 hours or by the on-board power supply system (12 - 36 V DC) when using the supplied 3-pin XLR cable (delivery includes appropriate jack)
- Automatic switch-off function
- Superior comfort for wearing due to light weight (approx. 325 g without cable) and low headband pressure (approx. 6.5 N)
- Premium ear pads filled with viscoelastic foam
- Noise-compensated microphone with adjustable gain, which can be worn on the left or right hand side
- Made in Germany with a five-year warranty
- Balanced sound and high reproduction precision for excellent intelligibility of speech
- Mono/stereo selection switch
- Rugged headband construction made of spring steel and replaceable headband pad made of soft leather
- Easy servicing as all parts are replaceable
- Supplied with headset bag

FLIGHTCOM HEADSETS

DENALI ANR HEADSETS

Revolutionary in design, the 13.4 oz. Denali ANR provides radical advances in full spectrum hearing protection. An innovative low-force headband and contoured ear seals, coupled with ergonomically canted, low profile ear domes, give Denali a sleek, near custom fit & feel. Advances in the acoustic performance of the ANR circuitry provide an additional 19 to 21dB of low frequency noise attenuation, above the passive model. Just holding this headset in your hands, let alone wearing it in flight, will make you instantly aware of its outstanding "feather weight" and the completeness of its engineering. Smart placement of the volume controls; a solid, flex boom; elliptical noise-canceling mic with large 'sweet spot' for improved communications; ANR "drop and go" 9 volt battery box – no battery leads to attach in flight. Made in USA. Available in J-3 yellow & graphite blue.

TELEX ECHELON 20 AVIATION HEADSET

Designed for students, new pilots, and value-conscious experienced fliers, the Telex Echelon™ 20 full cushion aviation headset offers comfort, excellent hearing protection and value. The Echelon 20 provides an impressive 20+ dB of passive noise protection and a top-quality noise canceling electret microphone for clear, reliable communications. The Echelon 20 features a low-profile headband for even weight distribution plus patented ComfortCam™ technology, a three-click tension adjustment system for a custom fit. Special earpieces with foam ear-seals pivot two ways to conform to any wearer while detent sliders adjust the headband — making the Telex Echelon 20 a comfortable headset for any flight.

P/N 11-04564

STRATUS™ 50-DIGITAL ANR HEADSET

The Stratus™ 50-D cuts noise 3 ways by providing 24dB passive attenuation for high frequency noise outside the ANR range, 15dB of analog ANR for noise reduction below 1000 Hz, and up to 50dB of digital tonal noise reduction. DSP (Digit Signal Processing) allows the Stratus to predict recurring cabin noise and fine tune the Active Noise Reduction for the ultimate in hearing protection. Patented Comfort Cam™ tension adjustment allows for a custom fit, as do the heat sensitive slow recovery foam ear cushions, which conform to the user's head during wear. Extra thick cushions and pad reduce headband tension and provide a luxurious feel. Overmolded rubber earcups, volume control knobs and comfort cams offer ease of handling, and add to the comfort package. Features • Capable of battery or panel power Stereo/mono switch • Auto shut-off feature saves battery • Dual volume controls • Reversible mic for pilot/copilot operation • 18 oz. • Collapses for ease of portability. • Incl. Deluxe carrying case

P/N 11-04560

TELEX AIRMAN ANR 850

Telex Airman ANR 850 uses Active Noise Reduction technology to provide up to 12dB of noise attenuation ensuring the clearest in-flight communication. Never before has a headset been so comfortable weighing less than 4 oz. Combining "set and forget" volume control with never worrying about a battery pack, undoubtedly makes the Telex Airman ANR 850 the most convenient commercial aviation headset available today. Power to the ANR is provided by mic bias (active intercom) eliminating the need for battery packs or panel power. By drastically reducing wind noise in jet cockpits, the Airman ANR 850 helps to reduce fatigue. The Telex Airman ANR 850 is unsurpassed in clarity, comfort and convenience.P/N 11-01880.....

TELEX ANR 500 HEADSET

The Airman ANR 500 features an all new design, and includes volume control and a panel power option! Designed for comfort and durability with stainless steel at the stress points, this well balanced headset evenly distributes weight on head without pressure points, and weighs in at just 7 oz. (198g)! Foam-filled moleskin ear cushions are standard. An electret noise cancelling microphone is mounted on flex boom, adjustable for left or right side operation. The battery module includes for power, volume, and stereo/mono operation, as well as a low battery indicator and a metal clothing clip. The battery pack accepts (1) 9V alkaline battery (supplied) for 50 hours typical flying time. Panel power is available as an option. NRR of 12 dB passive & 13-14 dB active below 1000 Hz.

TELEX HEADSETS - SPORT-LINK HEADSETS/HELMETS

TELEX ECHELON 25XT HEADSET

The Echelon 25XT packs additional comfort and performance features onto the solid Echelon platform. The 25XT includes Telex's innovative cell phone/MP3 adapter that allows you to attach both your cell phone and MP3 player at the same time. No more switching cords! Need to communicate? Simply mute them both at a touch of a button. For increased comfort, the Echelon 25XT features a plush, thick foam headband pad and newly designed, more comfortable ear cushions. The Echelon 25XT also offers individual

volume controls for each ear cup and a stereo/mono select switch.
FEATURES: • Total Noise Reduction • Customize Your Headset for a Comfortable Fit • Cell Phone/Audio Adapter • Advanced Microphone Technology • Impact-Resistant Headband Design • Seal Out Sound. Seal In Comfort. • Total Control Means Superior Sound • Boom Microphone • Flight Bag • Weight: 13.6 oz/386 grams

P/N 11-04563

TELEX AIRMAN 750 HEADSET

A featherweight headset which is the lightest in the industry (2.5 oz.). Features a miniature noise-cancelling electret microphone that provides superior 400 Hz hum rejection. Microphone pivot arm pivots 310° for use on left or right side. The optional Telex PT-300 push-to-talk switch is recommended for use with the Airman 750.

P/N 11-09500

Foam Ear Cushions for 750/760

TELEX AIRMAN 750 SINGLE-SIDED HEADSET

The Airman® 750SS is 25% lighter than the Airman® 750. Its effective weight (without the cord) is only 2.4 oz. Many pilots prefer the ergonomics of a single sided headset. It eliminates the need to pull off one of the earphones when listening to cockpit conversations.

P/N 11-01123

SUPER SOFT TOP FOR HEADSETS

The Super Soft Top headset is the ultimate in comfort. Put this headset on and feel the difference! It contains two layers of foam and one layer of polyester wool that is covered with a 90% cotton fabric for maximum humidity absorption. Easy to install, it fits the following headsets:

- All David Clark models, (except DC20-10 series)
- All Pilot Avionics models, (except PA-1776, PA-1779, Premier, Concord HNE, & Commander series)
- All Marv Golden MG's * All Sigtronics
- All ASA's * All Softcom's
- All Flightcom models (except F-20 & Eclipse)

P/N 13-00358

HEADSET COMFORTOP

Replaces the original head pad with a sheepskin pad providing optimum comfort.

P/N 11-03014

NAV-DATA DELUXE HEADSET

The Nav-Data Technologies deluxe headset has one of the best passive noise reduction ratings of any headset available at any cost. There are many reasons to own the Nav-Data Headset:

- * Switch selectable stereo or mono operation
- * Dual volume controls
- * Gel earseals for extra comfort and noise attenuation
- * Super padded head band for comfort during long flights
- * Full flexible mic boom - stays where you put it!
- * Noise canceling electret mic

PILOT'S HEADSET CUSHION

Constructed of plush 3/4" thick sheepskin & genuine leather. Does your headset feel uncomfortable and create a sore spot on the top of your head after wearing it for just a short time? If so, you need our plush, super soft sheepskin and leather headset cushion! The soft sheepskin rests on your head instead of the uncomfortable headset pad. Designed to fit all headsets with its adjustable velcro closure. Extra velcro across top also holds your flashlight for nighttime flying. Relieves all contact and pressure on the top of your head for even the longest trips. P/N 13-40730

PTL EARMUFFS

The only muff that lets workers listen safely without removing their muffs. When workers lift their muffs, they lower their protection. Now Peltor puts safe listening at their fingertips. Just push the button on the PTL muff and speech & sounds "outside" the muff cup can be heard "inside"-- clearly and safely. After 30 seconds, the muff automatically returns to its full protection with an NRR of up to 26 dB. Listen again? Just push again. It's that simple **Two styles to choose from:** • Hi-Viz PTL: • 26 NRR • Hi-Viz color for recognition of workers in low light conditions • A perfect choice for road construction, airport, & utility workers Behind-the-Head PTL: • Behind-the-head band design allows for easy use with hard hats • Two low mounting points provide great comfort • 26 NRR P/N 11-04300

HEADSETS, INC. EM-1 ANR HEADSET

EM-1 features conservative dark green ear cups, an Oregon Aero SoftTop padded headband, gel ear seals, and place-it-anywhere mic boom which makes it ergonomically friendly. Stereo capable with individual volume controls for each ear and a switch on the cord for mono or stereo audio. New ANR modules are made of softer material for better noise absorption. Ear cups are also rubberized for the same reason. A separate battery box is used and shares a cord with the mic/phone jacks, eliminating the need to unite 2 separate cords. The cords are heavily reinforced at attach points to avoid wear or breakage. The cords separate at the end so you can find a convenient place to stow the battery box in the cockpit. Optional power sources allow the EM-1 to be powered by the aircraft's electrical system, a cigarette lighter, or rechargeable battery. Comes with a 3-yr warranty, headset bag, the Oregon Aero SoftTop, & gel ear seals. P/N 11-00512

SILICONE GEL EAR SEALS

Gel ear seals conform to the shape of your head, resulting in an airtight fit which is required for proper air performance. If your earmolds are the older dry foam or liquid filled they must be replaced. P/N 11-03011

AUTO SHUT-OFF BATTERY BOX

This option will extend the battery life by automatically turning off after 4 minutes of inactivity. The flashing LED cts as a reminder that the power is on and changes color from green to yellow to red as the battery depletes. P/N 11-03013

SAFETYCELL HEADSET/ CELL PHONE ADAPTER

Allows a pilot to use his cell phone with his avionic headset and listen and transmit radio and phone transmissions simultaneously. SafetyCell is light-weight and portable, maintenance free and installs in seconds. Easy to use; simply dial the phone normally, talk and listen through your headset. Great for primary and emergency communications and many other applications.

The Standard SafetyCell (pictured) utilizes sophisticated solid state circuitry to mix your cell phone and radio signals together and bring them into your headset where you can hear them clearly. It is small enough to fit in the corner of your flight bag and only weighs 6 oz. It does not require any batteries. It is compatible with any cellular telephone that accepts a hands free system (i.e. has a 2.5mm jack on the phone). Some phones do require an adapter to work properly. This unit works without batteries so you must have a VOX style intercom for it to work properly.

NOTE: This will only work in an extremely quiet environment; the Standard SafetyCell is not amplified.

The Amplified SafetyCell is similar to the Standard SafetyCell but power packed with features. It is our most popular model. The amplified SafetyCell filters your radio and cell phone signals, cleans them up and then amplifies your cell phone volume by as much as 600%, depending on your phone/headset combination. Both the radio and the cell phone signals are then brought into the headset for loud and clear communication. This is the unit you will want if your plane is on the noisy side or if you have "mature" ears. This unit does not require any batteries but must be plugged into your VOX mic jack to work properly. It can also be used with the optional battery pack for "out of the plane" use.

With the Battery powered SafetyCell unit is powered by a 9V battery which will last for hundreds of hours. It is housed in a slim custom case that will slip right into the pilot pocket in your airplane. The battery SafetyCell will work with any headset, in or out of the airplane. If you want to use your SafetyCell on your boat, lawn mower, truck or airplane, this is the unit for you. This unit is amplified and is about twice as loud as the amplified SafetyCell. It will work with any cell or satellite phone that has the standard 2.5mm earpiece jack for handsfree use. Phones that do not have this feature will require an adapter. This unit now has a separate input jack for your mp3 player or walkman.

The Bose 6 Pin SafetyCell model is for those that have a built in Bose headset and do not use the Bose battery pack. This model is an amplified SafetyCell that is especially altered for the Bose headset circuitry. No batteries are required. The Bose 6 pin model fits between your headset and the panel to give you seamless intergration of your cell phone and radios. The standard Bose locking connectors are supplied. The Helicopter SafetyCell amplifies the cell phone by an incredible 12db and uses the standard military (NATO Style) single plug interface. This is the loudest SafetyCell we make!

The Helicopter SafetyCell is amplified and will work either in or out of your craft. This unit is powered by a 9V battery so you do not have to have your intercom turned on for it to work. If your batteries go dead, your radios and intercom stay alive. All the batteries do is drive the cellphone.

LYNX PILOT SYSTEM

The Pilot System is a range of headsets and helmets for use in light aircraft and helicopters. The main advantage of these products are that they provide an integrated headset and helmet system for use in aircraft which have standard twin jack intercom equipment already installed.

| Part No. | System Equipment | Description | Price |
|----------|-----------------------------|---|-------|
| 11-05394 | Pilot System Headset + Lead | Standard general aviation headset. | . |
| 11-05395 | Twin Jack Headset Lead | Interchangeable lead for Pilot headset. | . |
| 11-05396 | US NATO Headset Lead | Interchangeable lead for Pilot headset. | . |
| 11-05397 | UK NATO (Euro) Headset Lead | Interchangeable lead for Pilot headset. | . |

NOTE: Pilot System uses the same helmet, helmet visor, visor extension, leather helmet, helmet goggles, helmet bag, headset bag, and double helmet bag as the Micro System. Order part numbers as shown for Micro System Components.

LYNX RELAI SYSTEM

The relai System is a range of headsets and helmets for direct connection to hand-portable radios. This equipment also provides the facility to use a helmet with the headset and is used mainly by pilots of single seat aircraft, Paramotor pilots and airport ground crew.

*Please specify the make and model of radio that will be used with the Relai System Headset.

| Part No. | Description | Price |
|----------|--|-------|
| 11-05398 | Relai System Headset + Radio Module. | . |
| 11-05400 | Lynx Avionics Relai System headsets to be used with the following radios: Alinco, Cobra, Delcom, Icom A2/A20/A21, JRC, Maxon, Motorola, Radio Shack, Yaesu, FT-23R, YAESU 2000 | . |
| 11-05401 | Lynx Avionics Relai System headsets to be used with the following radios: ICOM A3/A4/A6/A22/A24 ICOM A5/A23 | . |
| 11-05402 | Allows Lynx Avionics Relai System headsets to be used with the following radios: ICOM A3/A4/A6/A22/A24/ ICOM A5/A23 | . |

NOTE: Relai System uses the same helmet, helmet visor, visor extension, leather helmet, helmet goggles, helmet bag, headset bag, and double helmet bag as the Micro System. Order part numbers as shown for Micro System Components.

PUSH-TO-TALK - LEATHER HELMETS

PUSH-TO-TALK SWITCHES

TELEX PT-300 PUSH-TO-TALK SWITCH - Attaches to any control wheel. Simple installation, no tools required. Simply wrap hook and pile strap around control wheel. Provides instant communications when used with any headset or Telex flexible boom mike. With 6 ft. coiled cord, jack and plug. P/N PT-300

With purchase of any headset only **\$39.95**

ECONOMY PUSH-TO-TALK SWITCH - Similar to PT-300, this top quality switch is offered at considerable savings. Features gold contacts for durability. Fully guaranteed. P/N 11-12100

With purchase of any headset only **\$8.95**

DAVID CLARK C10-15 PORTABLE PUSH-TO-TALK SWITCH - Compatible with all general aviation headsets, recommended for use with David Clark. Dual plunger switch assures positive contact. High quality features are incorporated in every aspect of this switch. P/N C10-15

PTT-400 PORTABLE PUSH-TO-TALK SWITCH - Designed so that the pilot may push downward to invoke the radio transmit function, instead of the traditional "sideways activation" of typical strap-on PTTs. Secures to the top of the vertical handle of the control yoke with provided velcro tape. Housed at the top of a thin, 1/2" dia. cylindrical enclosure, the soft-touch red push button is rated for 50,000 failure-free operations. 5ft. coiled cable terminates with standard plug & jack. Fast and easy plug-in installation, in virtually any aircraft. P/N 11-02072

SIGTRONICS PUSH-TO-TALK SWITCH - This versatile yoke mounted switch features a sealed aluminum alloy case and mounts in a .380" diameter hole. Button is red thermoplastic. P/N 11-02926

NAV-DATA PUSH-TO-TALK SWITCH - Finally, an affordable Push-to-talk switch. Heavy duty construction. With dual internal contacts. Also equipped with a strap to attach to any yoke control. P/N 13-06089

MICROPHONES

TELEX 66T TRANSISTORIZED MICROPHONE - Dynamic, noise-cancelling, hand-held mic. Built-in amplifier is adjustable for full transmitter output. Meets specifications for aircraft and mobile applications. Impedance 50-600Ω. Wt: 9oz. Complete with 5 ft. coiled cord and hanger bracket. Also available with right-angle plug - specify model 66TRA. P/N 66T

Right angle plug P/N 66TRA

TELEX 100TRA DYNAMIC MICROPHONE - Dynamic, noise-cancelling, amplified, handheld mike. Push-to-talk switch is in front. Handsome beige and black with walnut grain trim. Impedance 50-600Ω. Wt. 9 oz. Includes 5ft. coiled cord with right-angle plug and hanger bracket. P/N 100TRA

TELEX 38T ELECTRET MICROPHONE - A state-of-the-art high quality noise cancelling microphone designed as a direct replacement for the RS-38 series microphones. Hanger bracket not included. P/N 38T

TELEX 500T ELECTRET MICROPHONE - Amplified hand-held electret mike features outstanding noise cancellation. Impedance 50-600 Ω (ohms). Weight: 6.5oz. Complete with 5ft. coiled cord, plug and hanger bracket. P/N 500T

DAVID CLARK M-4 MICROPHONE - The M-4 electret microphone is featured on the H10-40 and H10-46 headsets. Available separately, as are all David Clark mics. P/N 11-03908

DAVID CLARK M-1/DC AMPLIFIED DYNAMIC HEADSET MIC - The M-1/DC Amplified Dynamic headset microphone is a noise canceling type designed to operate in place of carbon and amplified dynamic microphones. P/N 11-09230

DAVID CLARK M-1A AMPLIFIED DYNAMIC HEADSET MIC - The M-1A Amplified Dynamic headset microphone is a noise canceling type designed to operate in place of carbon and amplified dynamic mics. P/N 11-09225

CALL FOR SPECIAL PRICES!
HEADSET MICROPHONE A1060 BLACK - Proper shielding improves noise immunity in aircraft with heated windshields, power inverters, and other sources of electrical noise. Fits all C40 Model Headsets (David Clark, Softcomm, Telex, etc.) A1060 fits all C40 Models P/N 11-04838

Microphone windscreens covers all headsets. P/N 11-04840

AVIATION HEADSET PORTABLE MUSIC ADAPTER

The PSA0017C addresses the problem of attempting to use an aviation headset to listen to a portable music device while connected to the aircraft intercom. The 600 ohm aviation headset requires more power to drive than low-power portable music devices are capable of delivering. Furthermore, music at levels high enough to overcome the high-noise environments of the general aviation cockpit can easily drown out other intercom audio. The PSA0017C resolves both of these issues easily. Implementation of dual low-noise amplifier stages clearly boosts music signals to levels expected by general aviation headsets, while providing enough power to clearly hear the entire range of audio frequencies without distortion. Active auto mute silences the music whenever activity is detected on the intercom, thus ensuring that intercom activity and ATC communication is never missed. The included 9 volt battery provides 25-30 hours of useful battery life. The low battery indicator provides advance indication of battery expiration. P/N 11-06246.....

AIRCRAFT INTERCOM RECORDING CABLE

The IRC0014 series intercom recording cables addresses the problem of attempting to use a standard microphone interface to record a signal intended to drive a 600 ohm aviation headset. The integrated electronic circuitry steps the signal down to levels expected by the recording device, preventing oversaturation of the recording device and thereby eliminating any distortion. Additional protection is provided via AC coupling, ensuring that only the audio signal is passed while DC power remains isolated to the respective equipment. At low levels, DC power interference can reveal itself as a high-pitched squeal in the recorded audio. If enough voltage is present, irreparable equipment damage can occur. Professional grade metallic connectors are utilized in the make-up of the IRC0017S, providing additional electronic noise shielding not available from low cost plastic parts, ensuring the cleanest low-noise recording possible. P/N 11-06247.....

IPOD / MP3 MUSIC ADAPTER

This adapter works with your existing intercom by pumping your music into any available mic jack, allowing it to be distributed through the intercom to everyone wearing a headset. Plug one end into the aircraft's mic jack and the other into your media player's headphone jack. * Compatible with ipod, iphone, mp3, CD, laptops, and most other portable media players * Music in your headset without costly upgrades * Listen to music through the aircraft's speaker during pre-flight * Plugs into standard mic jack * Just Plug and Play! No more wearing uncomfortable in-ear headphones under your aviation headset. No need for an expensive new intercom or new headset. This will work in any intercom system with an available mic jack. Maintain the comfort and quiet of you current headset; just add your favorite music! Also works great in many airliners. P/N 11-07541.....

HEADSET CUSHION

For headsets with single 5/8" wide headband springs (Aviall, David Clark, etc.) and Telex ProAir 2000E and ANR-type headsets. P/N 11-02858.....

SOFTSEAL™ EAR CUSHIONS

Conforms to your head. 200-300% more volume for total comfort. Temperature-sensitive Confor foam core. Smooth, soft, washable UltraLeather covering over foam core. Great with eyewear or earrings. Eliminate ear pressure. Self-wicking reduces perspiration build-up. Attaches with flange, adhesive ring, or snap-on mount, depending on headset type.

Soft skin covers keep your ears even drier and cooler than with Softseal alone. Especially helpful in hot, humid climates. Designed to slip over our SoftSeal ear cushions for added comfort and product life. Fit loose, not tight like a drum. Choose for 3/4" or 1-1/8" thick SoftSeals.

HEADSET MICMUFF™ MICROPHONE COVERS

Eliminates cockpit noise from radios and intercom. Greatly improves intelligibility. The bigger the ambient noise problem (open cockpit, warbirds, or other very noisy aircraft), the more dramatic the improvement in intercom communication and transmission clarity. MicMuff™ functions as an acoustic baffle and must be used on all headsets installed in the communications system. Smooth, soft, washable UltraLeather covering over foam windscreen. Adaptable to all mics, electret or dynamic. Doesn't blow away.

- Amplified Dynamic MicMuff Mic Cover P/N 11-10937
- Electret MicMuff Mic Cover P/N 11-10938
- Military Dynamic (M-87) MicMuff Mic Cover P/N 11-10939

EVERY HEADSET MICROPHONE USED IN AN INTERCOM SYSTEM MUST HAVE THE MICMUFF INSTALLED IN ORDER FOR THE MICMUFF TO BE EFFECTIVE! THE ONLY EXCEPTION IS PUSH-TO-TALK INTERCOM SYSTEMS.

OREGON AERO HEADSET UPGRADE KITS

PASSIVE NOISE ATTENUATION COMPONENTS PERFORM BETTER THAN ANR HEADSETS

Headset Upgrade Testing-The headset upgraded with Oregon Aero components performed better than ANR headsets in tests conducted at a U.S. Government laboratory!

In the mid-range frequency levels of 700-7000 hz, the Oregon Aero upgraded headset performed better than the best-performance ANR headset, and in fact the Oregon Aero numbers significantly and consistently dip BELOW the DESIRED 85db level! This is the sound frequency range that contributes the most to hearing damage and loss.

FOR BOSE® AVIATION HEADSET X™ 83006BX -

Includes:

J-HOOK HEADSET HANGER

The J-Hook Aviation Headset Hanger is designed to be installed on one of the tube crossmembers in the cockpit of aircraft with exposed tubing upon which to hang your headsets when not in flight. These types of aircraft include Huskies, Cubs, Citabrias, etc. This makes entering or exiting the aircraft much easier and eliminates the chance of damaging your headset or the interior of the aircraft. This product has been machined from 6061-T6 aluminum with stainless steel hardware for a lifetime of service. Mounts on 3/4" tubing

HEADSET ADAPTERS AND EXTENSIONS

HEADSET EXTENSIONS

HEADPHONE EXTENSION – This heavy duty extension allows a .25" phone jack to be extended by 5ft. Great for customizing an aircraft with rear passenger headphone (listen only) capabilities.
P/N 11-10620

HEADSET EXTENSION – This heavy duty extension allows a general aviation headset using PJ-068 & PJ-055B or equivalent plugs to be extended by 5ft. Ideal when aircraft radio or intercom does not allow headset cords to reach comfortably.
P/N 11-10640

MICROPHONE EXTENSION – This heavy duty extension allows a .206" mic jack to be extended by 5ft. Great for customizing an aircraft with rear passenger microphone jacks.
P/N 11-10625

HELICOPTER HEADSET EXTENSION – Extends a headset that uses a U-174/U, U-93A/U or equivalent plug. 5 ft. in length. P/N 11-00688

U-75/U EXTENSION – Extends a headset which uses U-75/U plug 5 ft. in length.
P/N 11-00689

"Y" ADAPTERS

DUAL HEADSET Y ADAPTER – This heavy duty adapter converts one .25" phone jack into two. Perfect for those who want to connect two headphones to one a/c radio headphone jack. Can be used with stereo or mono headphones and jacks. Length: 2 ft. P/N 11-10610

DOUBLE HEADSET Y ADAPTER – This heavy duty adapter converts one set of a/c radio panel jacks, (.206" mic and .25" phone) into two sets. Can be used with any general aviation headset using PJ-068 & PJ-055B or equivalent plugs.
P/N 11-10635

DUAL MICROPHONE Y ADAPTER – This heavy duty adapter converts one .206" aircraft radio microphone jack into two. Perfect for those who want to add another push-to-talk position to the radio. Length: 2 ft. P/N 11-10615

TRIPLE HEADSET ADAPTER – This high quality adapter converts a set of radio or intercom mic and phone jacks into 3 sets. Sets are one, three and five feet respectively. Great for adding a pair of headset to the back of the aircraft without requiring major installation. P/N 11-00680

DUAL HELICOPTER Y HEADSET ADAPTER – This adapter allow a single helicopter radio or intercom jack (TJ-120, TJT-120, TJT-102) to be used by two headsets. Length: 1 ft. Great for adding an additional space for headset without costly installation.
P/N 11-00681

PATCHCORD COCKPIT VOICE RECORDER

PatchCord has electronic circuitry specifically designed to enable direct hook-up between a 600Ω headphone jack and the mic jack of tape recorders and / or most video cameras. The PatchCord

has been designed to enable you to record on any tape recorder or video camera, both sides of all your radio communications and all mic equipped persons in the aircraft when used with intercom. If not equipped with intercom, PatchCord enables you to record both sides of all your radio communications if aircraft radio has sidetone. The most advantageous way to use PatchCord is with the intercom and voice actuated tape recorder.

Student Pilots: • Great learning aid • Playback of previously recorded tape enables students to review the entire flight lesson, whether it be ATC clearances or flight instruction • Great study aid for the FAA written test • Save recorded tapes of flight lessons as a memento of your student pilot experiences.

Other Pilots: • Assists in studying for additional FAA ratings • Back up your memory and your notations by recording your IFR clearances • Record in-flight ATIS and weather reports, enabling you to play back and review in detail that part of briefing you need to know • Use tapes to improve your radio proficiency • Have your own tapes if you have a problem with ATC.
P/N 13-01456

AIRCRAFT/HELICOPTER CONVERSION ADAPTERS

.206" JACK Y ADAPTER – This adapter converts a headset with a single .206" plug into one with 2 (standard .206 mic & .25" phone plugs). Length: 9".
P/N 11-00682

.25" JACK Y ADAPTER – This adapter converts a headset with a single .25" plug into 1 with 2 (standard .206" mic & .25" phone plugs). Length: 9".
P/N 11-00683

.206" PLUG Y ADAPTER – This adapter converts a headset w/ dual .206 mic & .25" phone plugs into one plug (.206") headset. Length: 9".
P/N 11-00684

.25" PLUG Y ADAPTER – This adapter converts a headset w/ dual .206 mic & .25" phone plugs into one plug (.25") headset. Length: 9".
P/N 11-00685

STANDARD (MIC/PHONE) TO HELICOPTER ADAPTER – This adapter converts a G.A. headset that has both mic and phone plug into one that uses a helicopter (U-174/U, U-93A/U or equiv.) plug. Length: 9". P/N 11-10630

HELICOPTER TO STANDARD (MIC/PHONE) ADAPTER – This adapter converts a helicopter (U-174/U or U-93A/U) headset that has one plug into a G.A. headset that has both mic and phone plug. Length: 9". P/N 11-10650

U-174/U OR U-93A HEADSET CONVERTER – This adapter converts a headset U-75/U plug to a U-174/U or U-93A/U type plug. Length: 9".
P/N 11-00686

U-75/U HEADSET CONVERTER ADAPTER – This adapter converts a headset which has a U-174/U, U-93A/U or equivalent type plug into one which uses a U-75/U plug. Length: 9".
P/N 11-00687

U-75/U HEADSET CONVERTER ADAPTER – This adapter converts a headset which has a .206" mic and .25" phone plug into one which uses a U-75/U plug. Length: 9". P/N 11-00690

U-75/U TO STANDARD PLUGS CONVERTER – This adapter converts a headset which has a U-75/U or equivalent plug into a standard .206" mic & .25" phone plug. Length: 9".
P/N 11-00691

SPECIALTY ADAPTERS/IMPEDANCE CONVERTERS

VIDEO RECORDER ADAPTER GA/HELICOPTER – This product allow you to interface your video recorder with the aircraft intercom system. Great for creating your own aerial videos without excess cabin noise. Records sounds transmitted through the intercom system only. Std Version
P/N 11-00692

Helicopter Version P/N 11-00693

CD PLAYER GENERAL AVIATION ADAPTER – This product allow you to interface your portable CD Player with a general aviation headset.
P/N 11-00694

LOW TO HIGH IMPEDANCE ADAPTER – This adapter converts a low impedance mic & phone military headset into higher impedance for use in general aviation aircraft. It also converts the U-174/U plug on the military headset into .206" & .25" plugs used in general aviation. Length: 3 ft.
Standard Version P/N 11-10645

Helicopter Version P/N 11-00706

MAGNETO TIMING LIGHT - MODEL E50

Designed specifically for internal timing of aircraft magnetos and for synchronizing magnetos to aircraft engines. Eliminates all guesswork and provides a greater safety factor by creating perfect timing quickly and easily. Simply attach three clips to the magnetos and adjust until both bright lights flash in sync and the buzzer changes pitch. Fail-safe circuitry, variable pitch buzzer. Heavy-duty 3"x 5"x 2-1/8" unbreakable case. Wt. 1.5 lbs. Complete with 18 gauge lead wires 36" long and instructions.
 P/N 12-01013
 U.S. Industrial Equivalent.....P/N TP105.....

AIRCRAFT TIMING INDICATOR MODEL E25

This all-aluminum unit improves and speeds up the timing of magnetos to the engine. Easily attached to propeller spinner, it is accurate to within 1/2 degree. Has easy to read dial and comes with top dead center locator and mounting bands.

MAGNETO TIMING LIGHT

These devices measure the change in inductance in the magneto coil when the points open and close. Simply shorting the clip leads together will not indicate a point closing, therefore eliminating any false reading caused by loss of contact to the magneto grounding terminal. To use, simply remove one plug from each cylinder. Connect black clip lead to engine ground. Connect red and green leads to right and left magneto terminals. Turn propeller slowly. When the points open the LEDs will turn off and the audio "tweeter" will sound. The magneto connected to the red lead will sound a rapid beat and the magneto connected to the green lead will sound a slower beat. When both sets of points are open, a third and continuous sound will be emitted. Adjust magneto timing accordingly. 100% solid state, compact 3/4" x 3" x 5" size, long battery life. Color coordinated leads are 4 ft. long. Comes in strong anodized aluminum case.

TRACERLINE AVIATION ULTRASONIC LEAK DETECTOR

Master Kit Includes: • Marksman Receiver • UltraSonic Emitter • Headphones • 12 inch Air Probe • Contact Probe • Carrying Case
Features: • Converts & Amplifies Ultrasonic Sound Into Audible "Natural" Sound for Accurate Diagnosis. Finds Problems Before They Result in Major Breakdowns
 • Frequency Response: 36,000 - 44,000 Hz • Detects Air Brake, Compressed Air, Vacuum, EVAP System and Other Pressurized

Leaks Quickly and Effortlessly • Pinpoints Gear and Bearing Wear in Wheel Hubs, Transmissions, Transfer Cases, Differentials and Electric Motors. Check for Electrical Discharge Associated with Insulation Breakdown, Carbon Tracking and Arcing • Finds Air and Water Leaks Passed Faulty Seals, Gaskets and Weather Stripping in Passenger Cabs, Trailers and other Non-Pressurized Enclosures Using Ultrasonic Pulses
 10-Bar LED Intensity Indicator Helps Detect Sounds Well Beyond the Range of the Human Ear • Automatic Gain Control that Instantly Compensates for Changes in Signal Strength so you can focus on the task
Specifications: • Shipping Weight: 3.4 lbs (1.7kg) • Housing: Chemical Resistant Nylon with Protective Boot • Battery Life: Approx 20 hours. • Power Requirement: One Standard 9-Volt Alkaline Battery Each for. • Receiver & Emitter • Power Consumption: 27mA • Frequency Response: 36,000 - 44,000Hz • Circuitry: Solid State • Headphones: Full-Sized, noise attenuating

HIGH VOLTAGE CABLE TESTER MODEL E5

Gives a fast, accurate test of high voltage aircraft ignition cables. Simply connect 3 wires, push test button and test is completed. The E5 will instantly indicate in its test window both good and defective cables - no waiting for indication to appear. Fail-safe circuitry. Heavy-duty lead wires. Compact 3" x 5" x 2-5/8" case. Wt. 1-1/2 lbs.

 U.S. Industrial equiv P/N TP103.....

DIFFERENTIAL CYLINDER PRESSURE TESTER

DIFFERENTIAL CYLINDER PRESSURE MODEL E2A

The Model E2A tester quickly locates worn or cracked rings, a defective intake or exhaust valve, scored or cracked cylinders, leaky head gaskets, worn or stripped spark plug bushings, etc. Eliminates guesswork by allowing you to locate the exact location and cause of your engine's loss of efficiency. The Model E-2M differential cylinder pressure tester, with a

SLOW FILL safety valve and built in Master Orifice, has been field tester for 2 years by Teledyne Continental Motors, and has been approved for use on Teledyne Continental Engines by their Engineering and Field Services Group. The new valving adds additional safety; speeds up the test process. Rugged construction features heavy-duty gauges, extra long high-pressure hose, precision regulator, all connections quick-disconnect, 18mm plug adapter. Complete instructions with each unit. "M" models have built-in master orifice.

COMPRESSION TESTER EXTENSION

This tool makes compression testing easy. Wrench free way to test that allows for exhaust system and baffling clearance. Tester is manufactured with quality-welded construction and offers a spark plug thread with O-Ring seal. It has a standard air fitting.
 P/N 12-01060

AUDIOTECH PROBE

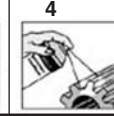

The Model AT201 diagnostic Listening Tool is a versatile, time-saving tool which is ideal for use in any application where there is movement of mechanical parts, air, gas, or fluid. Ideal for use on commercial, general aviation, or homebuilt aircraft and helicopters for application such as air leak and vacuum detection, bearing wear, worn or chipped gears, engines, turbines, and compressors, hydraulics, fuel injectors, flow valves, instrument failure, and more. Audiotech Probe can quickly and accurately pinpoint the trouble spot so that the problem can be fixed quickly the first time. Diameter of small mic at end of probe is 3mm. AAA battery included. Perfect for homebuilders, A & P's, A & E's, and A & I's.

PENETRANT INSPECTION KITS-MALLETS-HAMMERS

MAGNAFLUX NDT (NON-DESTRUCTIVE TESTING) KIT

| | | | | |
|---|---|--|---|---|
|  |  |  |  |  |
| 1 Pre-clean inspection area. Spray on Cleaner, wipe off with cloth. | 2 Apply penetrant. Allow short penetration period. | 3 Wipe to remove Penetrant from surface. Use Cleaner, moistened towel if surface is rough. | 4 Shake can and spray on a thin film of Developer. | 5 Inspect. Defects will show as bright red lines in white Developer background. |

A quick, easy way to make shop and in-field inspections of landing gear, airframe and components. Highly sensitive Spotcheck dye penetrants which give clear, bright red indications. Locates very fine cracks on the surface of ferrous and non-ferrous components, equipment and structures. Reveals cracks on materials with surface temperatures as high as 350°F. Perfect for testing welds before thorough cooling. Convenient spray cans make application easy and contain no fluorocarbon propellants. Non-flammable. Materials meet applicable specifications for dye penetrant inspections (ASME, ASTM and MIL specs). Considered flammable and hazardous by UPS.

4-CAN SPOT CHECK® TEST KIT - The lowest priced way to check for cracks, leaks and other defects on any metal parts. Kit includes 1 spray can of developer, 2 cans of cleaner & 1 can of dye penetrant in cardboard case.

Magnaflux 4-can kit P/N 09-00391
 Developer P/N SKD-S2
 Replacement Materials: Penetrant P/N SKL-SP
 Cleaner/Remover (12oz. Aerosols) P/N SKC-S

SK-3 KIT - The SK-3 kit is larger, comes in a lightweight high-impact plastic carrying case containing 2 cans of penetrant SKL-SP, 4 cans of cleaner/remover SKC-NF, 2 cans of developer SKD-NF, brush, cloth and instructions. P/N SK-S.....

SKC-S CLEANER - This clear, fast-drying solvent can be used for pre-cleaning, post-cleaning and penetrant removal. P/N SKC-S.....

SKL-SP PENETRANT - Because of its vivid red color, this solvent removable dye penetrant provides excellent color contrast performance to locate surface cracks in virtually any metal or non-porous ceramic material. P/N SKL-SP

SKD-S2 DEVELOPER - Made especially for use with SKL-SP penetrant, this developer contains suspended white particles that provide an ideal background for red Spotcheck penetrant indications. P/N SKD-S2

MET-L-CHEK PENETRANT INSPECTION KITS

Met-L-Chek kits provide a completely portable, job-proven method used throughout the industry to locate cracks, flaws and other defects. These economical & effective kits provide everything needed to make inspections in the shop or field. The penetrant materials are packaged in easy-to-use aerosol spray cans and a can of cleaner included for cleaning parts before inspection. The inspection procedure is easy to learn, accurate and inexpensive. Met-L-Chek can be used on ferrous and non-ferrous materials to find surface defects and 'thru leaks'. Supplied in a rugged metal case with complete instructions. The 4-Can Kit has one aerosol spray of cleaner, penetrant, developer and remover. The 8-Can Kit has 2 cans of each material. Individual replacement cans available.

 8-Can Kit P/N 09-38308

GARLAND NON-MARRING MALLETS AND HAMMERS

Since 1866, Garland Manufacturing has been supplying America with top-quality products made from the finest water buffalo rawhide. Today, they're the leader in the manufacture of soft-faced mallets and hammers of unsurpassed quality.

All Garland products are manufactured in the U.S.A. to ISO 9002 international quality standards. They combine superior craftsmanship with the best materials and then field-test their products extensively on a range of surface finishes to meet the requirements of the industries in which they're used. Industries ranging from foundries and electrical manufacturing to jewelry and woodworking. Their mallets and soft-faced hammers are preferred by both craftsmen and production workers.

RAWHIDE AND WEIGHTED RAWHIDE MALLETS

Garland's all-rawhide mallets are made of tough, long-wearing, water buffalo rawhide. They're ideal for use on broad-faced striking surfaces in a broad range of applications.

| RAWHIDE MALLETS | | | | | |
|--------------------------|--------------------|----------------------|--------------|----------|-------|
| Size | Face Dia. (Inches) | Head Length (Inches) | Weight (oz.) | Part No. | Price |

TUBE BENDERS – CUTTERS – FLARING TOOLS

SPRING TUBE BENDERS

Economical tools for hand-bending of soft aluminum and copper tubing to any shape without collapsing walls. Special spring steel, nickel finished. End belled for quick tube removal. Set of 6 for 1/4", 5/16", 3/8", 7/16", 1/2" and 5/8" O.D. tubing.

P/N 12-00823

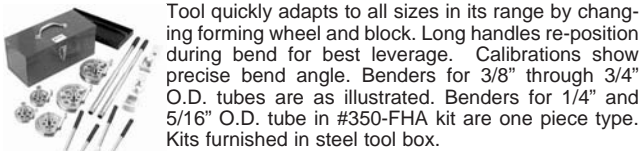

LEVER TYPE BENDERS

Each tool bends one size. Open side type slips over tube at any point. Makes smooth short-radius bends up to 180° with minimum effort. No marking, scraping or flattening of tubing. Calibrated to show angle of bend. Wide hook grips tube securely. Suitable for bending annealed copper, aluminum, steel, stainless steel and hard copper tubing of bending temper.

| Tubing O. D. | Bender Model No. | Part No. | Bending Radius | Price |
|--------------|------------------|----------|----------------|-------|
| 1/8" | 364-FH-02 | 12-20002 | 3/8" | . |
| 3/16" | 364-FH-03 | 12-20003 | 7/16" | . |

| 1/2" | 364-FHA-08 | 12-20008 | 1-1/2" | . |
| 5/8" | 364-FHA-10 | 12-20010 | 2-1/4" | . |
| 3/4" | 364-FHA-12 | 12-20012 | 3" | . |

WIDE RANGE LEVER TYPE BENDERS

Tool quickly adapts to all sizes in its range by changing forming wheel and block. Long handles re-position during bend for best leverage. Calibrations show precise bend angle. Benders for 3/8" through 3/4" O.D. tubes are as illustrated. Benders for 1/4" and 5/16" O.D. tube in #350-FHA kit are one piece type. Kits furnished in steel tool box.

Model 350-FHA Kit- For 1/4", 5/16", 3/8", 1/2", 5/8" & 3/4" Tube P/N 12-20100

HL-DUTY TUBE CUTTER

For 1/8" to 1" O.D. metal tubing. Makes clean, right-angle cuts with no burrs or chips to clog tubing. Roller type with flare cut-off groove, fold-away reamer and spare cutting wheel. Wt. 6-1/2 oz.

Hi-Duty Tube Cutter P/N 12-00382.....

Replacement Cutter Wheel P/N 75015.....

Replacement Reamer Blade P/N 79318-01.....

"IMP" TUBE CUTTER

Designed for use in tight quarters where other cutters won't fit. For 1/8" to 5/8" O.D. tubing. Requires only 13/16" swing radius. Perfect for instrument panels, control cabinets, machine tools, etc. Size: 111/16" x 1-5/16" x 7/8". Wt. 2-1/2 oz.

P/N 12-01277.....

JUNIOR TUBE CUTTER

Exceptionally handy in close quarters - only 3-1/2" overall length. Makes clean, right-angle cuts without flattening tube. Cuts 1/8" to 3/4" O.D. tubing. Enclosed feed mechanism. Wt. 5 oz.

Junior Cutter P/N 12-01576.....

Replacement Cutter Wheel P/N 32633.....

WEATHERHEAD

T-1295 Heavy Duty Segmented Flaring Tool (37°)

Tool Flares: 1/8", 3/16", 1/4", 5/16", 3/8", and 1/2", O.D. tubing. Forms 37° flares in annealed stainless steel (MIL-T-6845 or AMS-5566), cold drawn stainless steel, and annealed copper, brass, steel or aluminum. Bar has vice extension. Wt.: 3lbs. P/N 12-01166.....

HI-DUTY FLARING TOOL 37°

Hard chrome-finished cone makes exceptionally smooth, high strength flares with a radius at base of flare instead of the sharp angle formed by ordinary tools. Slip-on yoke permits use in tight quarters. For tubing sizes: 3/16", 1/4", 5/16", 3/8", 1/2" and 5/8" O.D. Wt. 1 lb. 11 oz. Not for use on Stainless Steel Tubing.

P/N 12-01581.....

ROL-AIR FLARING TOOL 37°

Faceted, hard chrome finished cone rolls out perfect flares above die block, then automatically burnishes flare face. Slip-on yoke permits use in tight quarters. Heat treated dies grip tubing without scoring. Flares and burnishes: 3/16", 1/4", 5/16", 3/8", 1/2" and 5/8" O.D. tubing. Wt. 1-1/2 lbs. Works on some Stainless Steel Tubing but not warranted for Stainless.

P/N 12-01582.....

ROLO-FLAIR FLARING TOOL 37°

Operates on same principle as Imperial #507-FA but flares 1/8" (primer line) and 3/4" tubing as well. Size: 4"W x 4"D x 8"H. Wt. 2-1/2 lbs. Excellent tool for bench - not for close-quarter work. Not for use on Stainless Steel Tubing.

P/N 12-01575.....

DELUXE 37° FLARING TOOL

Forms 37° flare to AN standards in steel, stainless steel (including MIL-T 6845), titanium, an other metal tubing. Three rollers in flaring cone roll out 37° flare above die block. Extension on yoke for clamping in vise. Furnished in plastic kit. Wt. 2-1/2 lb.

P/N 12-01579.....

PARKER TYPE AIRCRAFT TUBE BEADING TOOL

The Parker Beading Tool has been the number one choice of aircraft mechanics for making clamping beads in metal tubes. To this day, no other tool even comes close to matching its quality. So by special arrangement, the manufacturer tooling up

to recreate this classic tool in every detail. In the process they have added a few enhancements of their own, such as ground, hardened, and polished surfaces for mar-free beads in aluminum, copper, brass, and mild steel tubes ranging from 1/4" to 1" diameter. Meets MILSPEC MS33660D and SAE AS5131 standards. P/N 12-01049.....

IMPERIAL 664-FH-08 180° TUBING BENDER

The 664-FH-08 Heavy Duty 180° Tube Bender line for 1/2" stainless steel and other tough tubing metals! Its patented ROTO-LOK™ quick action trigger release two-stage handle allows the tubing to be bent up to 180° without crossing the hands or handles! This means bends are made with reduced effort and much better control.

P/N 12-02081

IMPERIAL 470-FH TRIPLE HEAD 180° TUBING BENDER

The 470-FH Triple Head 180° Tube Bender bends 4 diameters of tubing with just one tool! It handles soft copper, aluminum and thin-walled steel tubing in 3/16", 1/4", 5/16" & 3/8" diameters. Like the heavy duty 464-FH, it features the patented ROTO-LOK™ two-stage handle that allows easy fabrication of bends up to 180°. It also features optimized bending grooves that allow the user to bend the tubing in the smallest

radius possible to enable tighter turns and minimize the space taken by the bends. Soft copper - .030-.032" wall. 304 stainless steel - .030-.032" wall.

P/N 12-01042

ATS HAND RIVET SQUEEZER

The newest addition to our ATS Pro Rivet Squeezer Line is built for hard use, but we must admit it's also one of the best looking squeezers we've ever seen. It's an all stainless steel design that's constructed to last a lifetime. The unique unibody styling is drop forged for extra strength and CNC machined to tight tolerances. The yoke (also stainless steel) is engineered to be half the weight of other yokes, yet retain full strength. Finally, the whole thing is beautifully finished in a brush satin look and highly polished surfaces. Has a very solid feel, and professional look that will complement anyone's toolbox. Squeezes up to 5/32" aluminum (1/8" seal) rivets. Works with any rivet sets, or dipole dies having a 3/16" (.187") shank. Adjustable ram does not need shims. Lifetime warranty.

Features: •1.5" Yoke •Drop forged from Stainless Steel for unmatched strength and durability •Clasic brushed stainless steel finish. •Adjustable ram does not need shims •Squeezes aluminum rivets up to 5/32" and steel rivets up to 1/8" •Comfort grip rubber handles •4lbs shipping weight. P/N 12-01620.....

PROFESSIONAL RIVETING KIT

This Professional Riveting Kit has all the tools you need to drive rivets like a pro... It contains the best-selling ATS Pro Series 3X Rivet Gun, a selection 4 of our most popular Bucking Bars (141, 142, 148, and 149), plus a complete assortment of Rivet Sets to install Universal Head (AN470) or Flush (AN426) rivets in sizes 3/32" to 3/16".

And it all comes to you in a stylish molded case to keep things neatly organized. This is the perfect "field" kit to take with you anywhere -- it has the riveting tools you need conveniently laid out in one handy ready-to-go package. The Professional Riveting Kit is a part of our ATS-PRO Series, so you can rest assured that your tool investment will be well protected by an Unconditional 30 Day Money Back Guarantee, and industry-leading ATS Pro Lifetime Warranty. 19lbs shipping weight.

RIVET SQUEEZERS – RIVET SETS

SPRING TENSION CLAMPS

Spring tension clamps can be applied in a fraction of the time required for ordinary screw clamps. The AT542 clamp, with 2" throat depth, has a Zamak alloy yoke and a steel spring which provides a 70 lb. clamping pressure. Designed for use with sheet holder pliers.

P/N AT542..... *Jea.*

SIDE GRIP CLAMPS

Designed to hold two or more work pieces together where no holes exist. Clamping force is applied at edge of work. Spring loaded, plier actuated. The lack of a takeup screw makes it impossible to over-tighten and damage the work surfaces or the clamp. Clamping capacity - 0-1/2". Jaw depth: 1/2" and 1". Length: 2-3/16".

P/N SC-1/2-1..... *Jea.*

AT-114C3 QUICK-CHANGE RETAINER SPRING

Makes possible the changing of rivet sets without removal of retainer spring. For .402" shank dia. rivet sets.

P/N AT-114C3..... *Jea.*

AT 107A FLUSH RIVET SETS

Large radii at critical points to prevent breakage. Slightly crowned, highly polished face designed for rapid flush riveting where a smooth skin surface is essential. Shank dia. .401".

| Part No. | Face Dia. | Length | Price |
|-----------|-----------|--------|-------|
| AT-107A-1 | 1" | 2-3/4" | . |
| AT-107A-3 | 1-1/4" | 3-3/4" | . |

AT 100A STRAIGHT RIVET SETS

Cup surfaces are highly polished and guaranteed to conform with rivet heads. Carried in stock in AN470 (MS20470) universal-head cup shape. Overall length, 3-1/2", .401" dia. centerless-ground shank.

| | | |
|----------------|-------|---|
| AT-100A-3-3/32 | 3/32" | . |
| AT-100A-3-1/8 | 1/8" | . |
| AT-100A-3-5/32 | 5/32" | . |
| AT-100A-3-3/16 | 3/16" | . |

AT 101A OFFSET RIVET SETS

Same tool as AT100A but has 10° bend 1" back from the cup to allow added clearance. Permits easier riveting where obstructions are encountered.

| | | |
|----------------|-------|---|
| AT-101A-3-3/32 | 3/32" | . |

SWIVEL HAND RIVET SQUEEZER

This tool incorporates a 3/8" stroke and 5/8" ram adjustment. The full 360° yoke can be locked in any position in relation to the handles. Uses standard squeezer sets with 3/16" shank diameter. Yoke depth: 1-1/2".

Model AT502AH-D..... P/N 12-00400.....

INSTRUCTIONS FOR SELECTING RIVET SETS

To develop maximum power, the riveter must drive the rivet near the end of the riveter's stroke. For maximum power the combined length of the two rivet sets must be of the correct length. Determine the correct length as follows:

WHEN TWO CUPPED RIVET SETS ARE USED - The sum of the two rivet sets "L" dimension should equal the closed height dimension of the yoke minus the total thickness of the material being used.

WHEN TWO FLUSH SETS ARE USED - The sum of the two rivet sets "L" dimension should equal the closed height dimension of the yoke minus the overall length of the rivet after it is driven.

WHEN ONE CUPPED SET & ONE FLUSH SET ARE USED - The sum of the two rivet sets "L" dimension should equal the closed height dimension of the yoke minus the total thickness of the material being riveted and the height of the finished rivet head driven by the flush set. If necessary, select rivet sets a little short and shim to proper length with hardened shims listed in the table. The closed height dimension of the yoke referred to above is the opening available when jaws of plunger are in extreme closed or forward position with both rivet sets in place.

RIVET SETS FOR SQUEEZER

Assorted Squeezer Set. 5-piece, consisting of rivet sets for 3/32, 1/8 and 5/32" AN470 rivets, and one flat set. Shank dia. 3/16".

COUNTERSINK CUTTERS

MICROSTOP COUNTERSINK CUTTER KIT AT590CSK

This kit provides countersinking versatility with nine different 1/2" diameter cutters, six of the most commonly used foot pieces, and a high-speed bearing-constructed microstop. The microstop controls cutting depth in .001 increments, from 0 to 5/16". Cutters-ground on-centers to ensure concentricity-are 100°, with pilot diameters #40, #30, #21, 3/32", 1/8", 3/16", and 1/4".

P/N 12-00824.....

100° AT455 COUNTERSINK CUTTER

Designed for operating in angle drills with 1/4-28 threads and in the AT441SLS Micro Stop Countersink. Has 1/4-28 threaded shank. Cutter angle 100°. AT455D-4 has 7/16" dia. cutter head. Use with AT484 pilots. P/N AT455D-4.....

AT484 PILOTS

AT484 replaceable pilots have a .086" dia. shank with a flat to accommodate the set screw of the AT455 cutter. An undercut permits the head to seat on the cutter angle. Order by P/N..... ea.

AT441 HSS MICROSTOP COUNTERSINK

AT441 HS Micro Stop Countersink, similar to the AT442SLS unit, except with 1/4-28 female threaded nose to accommodate AT455 cutter.

P/N 12-01591.....

AT 442 HS MICRO STOP COUNTERSINK

A precision tool for production countersinking. Ball thrust bearing for absolute depth control. Adjusts in .001" increments, with positive adjustment lock. Skirt accepts cutters up to 5/8" dia. Has 1/4-28 male threaded shaft for use with AT418 cutters. Can be assembled and disassembled without special tools. Split shaft and taper

locks pilot in place when cutter is tightened. Order cutters and pilots separately. P/N AT442-SLS.....

MICRO-STOP COUNTERSINK CAGES AND NYLON FOOT PIECE

2 Models available-one with NEEDLE bearing and one with BRONZE bushings. .001" increment depth adjustment. Positive adjustment lock. 1/4" dia. shank. 9/32" shaft travel. 9/16" cutter capacity. For 1/4-28 threaded cutters. Comes with "NO-MAR" foot piece. Rated at 3,000 RPM. Made in USA.

With Bronze Bushings P/N 12-01412.....

With Needle Bearings P/N 12-00940.....

BRAKE RIVET SET

Use these sets with your hand squeezer. Will set brake rivets eliminating the possibility of cracking your brake pads.

P/N 12-00550.....

AT 409 SERIES STRAIGHT SHANK COUNTERSINK WITH INTERCHANGEABLE CUTTERS AND PILOTS

P/N AT416-1

ADAPTER ONLY
P/N AT416-57

Assembly, consists of AT418E (1/2") cutter, AT416 pilot and AT409-1, 1/4" straight-shank. Has a collet-type shaft to securely hold the replaceable pilot.

When ordering specify: Part number of cutter and pilot dia.

Assembly Example: AT409 with 100° cutter A418E & 1/8 pilot.

(AT416-57) Adapter only.....P/N AT409-1

AT418 STOP COUNTERSINK CUTTERS

Three-straight flute replaceable pilot cutters with female thread. These cutters are designed with extra deep flute to permit numerous resharpenings and radial clearance to assure fast smooth cutting.

For Replaceable Pilots Refer to AT416 Series. Used With AT418

PLIERS – PUNCHES – BRAKES

HAND SEAMER

Handy tools for comparatively light work. Wide, deep jaws machined for smooth parallel fit. Form precise folds and seams. Strong, lasting drop-forged steel construction. No. 44 has plain 3 1/2" wide blades. No. 44r is similar with a radius to prevent tearing of aluminum and other light metals. No. 793 has a 3 1/2" wide blade with adjustable depth gauge. P/N 12-00620.....

HAND SEAMER TP44

• Wide, deep jaws machined for smooth parallel fit • Forms precise folds and seams • 1" deep x 3-1/2" wide throat P/N 44R.....

ROPER-WHITNEY METAL CRIMPER

Handy crimping tool to disperse excess metal. Depth of throat 1-1/8". Overall length 9". Wt. 1 lb. P/N 111.....

ROPER-WHITNEY NOTCHER

Designed for fast, accurate 32° notch in sheet metal. Hook design of jaws permits notching to exact desired depth without slippage. Spring-return jaws. Capacity 20 ga. Wt. 1 lb. P/N 141.....

FLUTING PLIERS

These aircraft-type fluting pliers are a drop-forged quality tool. Non-marring working surfaces of jaws specifically designed for use on aircraft components. Comfort grip handles. P/N 12-00500.....

HOLE FLANGING TOOL

A real time saver for flanging lightening holes. Non-marring. Easy to use. Nylon rollers and ball bearings assure long life. P/N 12-00600.....

MIGHTY ROD SHEET METAL BENDER

Designed to bend solid round, square and flat alloys into nearly any shape and angle. FEATURES: • Works on solid materials up to 3/8" diameter. • Coils and bends wires of many sizes. • Includes dies for 1/2", 3/4", 1", 1 1/4" & 1-1/2" diameter bends. • Constructed of 3" x 3" aluminum base 1" thick with a 12" handle 7/8" in diameter. • Made in the USA. • 1 year Replacement Warranty. P/N 12-00934.....

JUMBO ROD SHEET METAL BENDER

Constructed of 4" x 6" aluminum base 1" thick with a 16" handle 7/8" diameter. Bends solid round, square and flat iron. FEATURES: • Works on solid materials of up to 3/8" round and square (1/2" wide flat). • Coils and bends wire of many sizes. • Bends metal to any shape and degree of angle. • Include dies for 3/8", 3/4", 2", 3" & 4" diameter bends. • Installs on any vise. • Ideal for hobbyists, prototype shops and do-it-yourselfers. • Made in the USA. P/N 12-00935.....

MAGNUM BENDER

For many homebuilders, the production of high quality aircraft metalwork can be a daunting prospect. There can be hundreds of intricate fittings to produce and many will require accurate bending. Magnum Bender has a BIG capacity and is capable of bending 1/8" thick x 6" wide 4130N. Magnum

bender uses sets of interchangeable bending bars each with two different radii to produce high quality bends, up to, and including 90 degrees. Bending bars are hardened and polished and allow for material 'spring back'. The Magnum Bender is available as either a standard version with 1/16", 3/32", 1/8", 5/32", 3/16" and 1/4" radii. Or, as a metric version, with 3 bending bars offering 1,2,3,4,5 and 6mm radii. Each machine is supplied with two pairs of operating levers, 1 ft. long and 2 ft. long. Standard version P/N 12-01550..... Metric version P/N 12-01551.....

ROPER-WHITNEY METAL PUNCH

#5 JR. HAND PUNCH – with one ton punching power. Punches 1/4" hole through 16 Ga. mild steel. Throat clearance 1-3/4". Complete set in metal box with 3/32, 1/8, 5/32, 3/16, 7/32, 1/4 and 9/32" punches & dies. Wt. 4-1/4 lbs. P/N 12-01600.....

BENCH MOUNT BASE – for stationary use. Base swivels to any position. Punch is held by L-shaped clamp rod through a 7/16" or larger hole in bench. P/N 12-01700.....

STRAIGHT PUNCH & DIE SETS – for No. 5 Jr. punch in the seven sizes shown below.

RIVET GUNS

G-28 HAND RIVETER GUN

The Cherry G-28 is a lightweight (13 oz.) ruggedly compact hand tool designed to efficiently set a broad range of Cherry commercial rivets. A unique torsion spring keeps the lever arm in place, ready to accept rivet after rivet. The G-28 comes with two popular size nosepieces, 728A9-4 (to set Cherry N Rivets - 1/8" dia. & Cherry Q Rivets - 1/8" dia.) and 728A9-6 (to set Cherry N Rivets - 5/32" & 3/16" dia. & Cherry Q Rivets - 5/32" & 3/16" dia.), one of which is stored securely out of the way in the riveter handle.

P/N 12-03000.....

CHERRY G-29 HAND RIVETER

The Cherry® G-29 Hand Riveter is an efficient, compact, lightweight tool for installing Cherry® NUT-PLATE rivets. It comes equipped with a 728A9-3 nosepiece to install 3/32" rivets and has a 728A9-104 nosepiece stored in the handle for installing 1/8" rivets. The G-29 Riveter is 9-1/4" long, weighs just 13 ounces and is intended for use when access or power limitations prevent the use of Cherry® power tools.

P/N 12-00701.....

CHERRY G-27 HAND RIVETER KIT

The Cherry G-27 Hand Riveter is designed specifically for the most efficient installation of 1/8" CherryMAX Rivets. The G-27 Riveter is intended for use where access or power limitation prevents the use where access or power limitation prevents the use of Cherry pneumatic power tools. Overall length of the G-27 is 9-1/4", the net weight is just 13 ounces and the pulling head is an integral part of the tool. This compact, lightweight tool comes in a rugged plastic case.

P/N 12-03105.....

RIVET KIT

The Deluxe hand riveter kit includes 200 assorted Klik-Fast rivets in popular sizes. The molded plastic case houses and protects the tool, rivets. G-28 Rivet Gun not included. Weight 4 lbs.

P/N 12-03100.....

120° FLUSH DIMPLING TOOL

This unique tool for 1/8" 120° countersunk "Pop" rivets attaches to the Cherry G-28 standard hand "Pop" rivet gun. Simple design makes dimpling foolproof, quick and easy, with no cracking of metal. For use on aluminum to .040" thickness.

P/N 17014.....

ADJUSTABLE RIVET SPACER

For uniform spacing of rivets, bolts, nails, etc. Unique fan design expands to 36". Equally spaces up to 20 holes between 2 given points. Made of 301 stainless steel.

10 Hole spacer P/N 12-00184.....

RIVEDRILL™

Allows operators to set up to 14 rivets per minute - twice as many as can be set by standard hand tools. The RiveDrill is ergonomically friendly, requiring just 6.6 lbs. of pressure to operate, compared to 77.2 lbs. required for hand tool operation. Excellent for working on aircraft, autos, or boats. The RiveDrill™ can be quickly inserted into a 3/8" reversible power drill as any standard drill bit would and is able to set any standard blind rivet up to 3/16" aluminum. The shank of the rivet is expelled when the drill is operated in the "reverse" mode. (For cordless electric power drills, a minimum 12V battery is recommended.) Nosepieces for 1/8", 5/32", & 3/16" sizes are included. RiveDrill™ Specifications: • Model 110 • Wt: .618 Lbs. (280 grams) • Length: 5.5 in. (1441 mm) • Diameter: 2.4 in. (60 mm) • Battery for cordless drill: 12V • Nosepieces included: 1/8", 5/32", 3/16" • Drill Types: Cordless, Electric, Pneumatic • Rivet capacities: 1/8", 5/32", 3/16" aluminum standard rivets; 1/8", 5/32" steel standard rivets; 1/8" stainless standard rivets.

P/N 12-00253.....

ULTRALITE NUTPLATE DRILL MOTOR

Ergonomic, lightweight design. Only one hand required to locate, drill & countersink both holes. Easily convert rivet spacings with interchangeable foot attachments. Available in single wing, double wing & mickey mouse models. Accommodates all nutplate spindle spacings from 0.219" to 1.125". Fully adjustable feed rate. 600 or 7,000 RPM

P/N 12-01376.....

SWIVEL RIVETING TOOL

Rotates 360° and rivets in any position. High leverage handles for added power. Hardened steel construction for long life. Extended nose for hard to reach places. Will pull 3/32", 1/8", 5/32", and 3/16" rivets. Model TP844.....

COMBINATION RIVET-RIVNUT TOOL

The D100-RN hand operated hydraulic tool is ideally suited to the needs of the aircraft homebuilder. The tool develops 3,500 lbs. of pulling force which permits the installation of all Cherry Commercial Blind Rivets or any other Pop type rivets through 1/4" diameter as well as all CherryMax rivets through 3/16" diameter. Will not pull Cherry Lock rivets. The D100-RN quickly converts to a threaded blind nut setter to allow efficient installation of Rivnuts or similar blind nuts. The kit includes the D100 hydraulic tool with adapters for blind rivet and blind nut installation, rivet nosepieces for 1/8", 5/32" and 3/16" diameter blind rivets, blind nut pull-up studs with nosepieces for 6-32, 8-32, 10-32 and 1/4-28 Rivnuts, operating instructions and a rugged Plastic storage case. Size: 12-1/2" x 8-1/4" x 3". Weight: 3 lbs.

P/N D100-RN Kit.....

PNEUMATIC-HYDRAULIC BLIND RIVETER

The PT-100-1 power riveter, no larger than a compact drill motor, will install virtually any straight-pull blind rivet with installation loads of 3500 lbs. or less. All blind rivets from 3/32" dia. up to and including 1/4" dia. CherryMax rivets can be installed with the P-100-1. It utilizes a patented two-valve hydraulic pump actuated by 90 to 130 PSIG air pressure. Unlike most riveters, the P-100-1's collect/jaw assembly remains stationary while the outer sleeve-nosepiece assembly is hydraulically moved, creating sufficient load to install the rivet. Furnished with three nosepieces for 1/4", 1/8", 3/16"

& 3/32" rivets. Wt. 29 oz.

L-7000 RIVNUT SPEED DRIVER

Designed for light production. Same as the L-6000 except made with a longer stroke for slotted rivet nuts. Made in U.S.A. Order by part number. Available in the following thread sizes: 6-32 (P/N 12-13605), 8-32 (P/N 12-13610), 10-32 (P/N 12-13615), and 1/4-28 (P/N 12-13620)

C-845 ECONOMY RIVNUT TOOL

Model L-845 wrench type rivnut tool is for field repair & experimental use. Adequate for aluminum, brass, steel, and stainless. Made in U.S.A. Order by part number. Available in following thread sizes:

6-32 P/N 12-13400..... 8-32..... P/N 12-13500
 10-24 P/N 12-13600..... 10-32..... P/N 12-13700
 1/4-20 P/N 12-13800..... 1/4-28... P/N 12-13900

L722 WRENCH TYPE RIVNUT TOOL

L722 Wrench Type Riv-Nut installation tool for the larger size fasteners 5/16" up to 1/2", tool comes with long arm allen wrench with plastic handle for easy installation.

HEAVY DUTY RIVET CUTTER

This high quality, durable rivet cutter features all steel construction and cuts 1/16" to 1/4" diameter rivets. It is adjustable for 1/4" to 3/4" long rivets. P/N 12-16840

RIVET CUTTER

This handy rivet cutter, w/ 2 hardened blades, cuts rivets of any standard dia. from 3/32" to 3/16" without burring. The length of the cut rivet can be varied from 3/16" to 5/8" by means of 8 adjustable leaves attached to the cutting head. Plastic coated grips. Wt. 2 lbs. P/N 12-00200

BENCHTYPE RIVET CUTTER

Cuts 5 different diameter rivets, as well as wire and screws to 7 different lengths. Made of hardened and ground steel, this rivet cutter can be easily fastened to a workbench or held in a vise. Accepts rivet diameters 1/16, 3/32, 1/8, 5/32, 3/16, Will cut to lengths: 5/32, 7/32, 9/32, 11/32, 15/32, 17/32. P/N 12-00262

LUFKIN METRIC/INCH TAPE MEASURE

LUFKIN NO. W9210ME Has 1/2" blade, 3 meters long (equal to about 10 ft.). Markings are on one side only, with millimeters on upper edge and inches to 16ths on lower edge. White face.

Replacement Blade (RY23CMF)..... P/N 12-19700
 P/N 12-19750

STANLEY DECIMAL INCH TAPE MEASURE

This 12-ft. steel tape measure with 1/2" blade is graduated in tenths & hundredths of inches and also in fractions of inches (32nds). Very handy for all aircraft construction. A must for building composite aircraft.

P/N 33-272

SMART TOOL DIGITAL INCLINOMETER

Smart Tool is a unique digital inclinometer with up to 0.1° of repeatable accuracy. Place Smart Tool anywhere and it provides an accurate digital readout of angular reading instantly with no interpretation or guesswork needed. It measures and displays any angle through 360°, and readings can be relative to any angle. Smart level even calculates complicated slope measurements in either percent or inches per foot. It is sunlight viewable, features 3 sensitivity settings, and has 120-hour battery life with auto shut-off. Smart Tool is ideal for fixture work, tube bending, metal forming, body work, drive shaft angles, camber, caster, and A-arm angles, and a wide variety of other applications in the aircraft and race car building industries. Also ideal for coordinating and aligning flight control surfaces. Compact & rugged, Smart Tool is powered by any 9V battery.

Smart Tool in 24" rail..... P/N 12-21365
 Smart Tool in 48" rail..... P/N 12-21370

INSTANT ANGLE FINDERS

MODEL 200M (2-3/4" Dia. Dial) - Very versatile tool —ideal plumb bob. Magnetic base and center hang hole. Body of high impact ABS plastic. Dial protected by acrylic cover. Angle and rise chart on back.

P/N 12-14800

PRO 360 DIGITAL PROTRACTOR

The Pro 360 Digital Protractor is a revolutionary measuring tool that provides an immediate, digital reading of all angles in a 360° circle. The machined aluminum frame is a rigid, light weight, ultra-precise platform that allows the state-of-the-art sensor and its microprocessor circuit to provide unsurpassed accuracy throughout the Protractor's 360° range. Typical used by aircraft builders, maintenance personnel and airport operators. P/N 12-20125

PRO 3600 DIGITAL PROTRACTOR

The PRO-3600 is accurate to 0.01° and has an RS-232 compatible serial port for a computer interface and SPC records keeping.

P/N 12-00759

UNI-MAG WRIST BAND MAGNET

Uni-Mag is a wrist worn magnet that allows craftsmen to keep parts close to hand while working rather than in your pocket, on a ladder, or in your mouth. It holds nuts, bolts, screws, nails, tools, etc. A specially created magnetic field allows parts to lay flat on the face of Uni-Mag rather than upright. Save time and put an end to fumbling for small hardware with Uni-Mag. Comes complete with magnet and wristband. P/N 12-30110

RIVET CONVERSION KITS

Converts your conventional hand pop riveter into an economical RivNut installer tool.

| Size | Part No. | Price |

| 6-32 | 12-13680 | |
| 8-32 | 12-13681 | |
| 10-32 | 12-13682 | |

HOMEBUILDERS RIVET NUT TOOL

This rivet nut tool is an inexpensive alternative to industrial rivet nut setters. Fast and easy to use for the builder who needs to make sturdy installations requiring a rivet nut fastener. It has unlimited uses. Its design enables the rivet nuts to be seated tighter than with conventional tools. This fastening tool has unique uses! The rivet nut possesses far greater load bearing capability than a regular sheet metal screw! Proudly made in U.S.A. Use it instead of a sheet metal screw. Its compact design takes up less room in your tool box. For use with aluminum or steel rivet nuts. Kit includes Rivet Nut Tool, Stabilizing Rod, and Qty 1 each of 6-32, 8-32 and 10-32 rivet nuts.

P/N 12-00968

TO

TOOLS

RECOIL KITS

The Recoil System is the simple way to repair stripped or damaged threads. It provides stronger and more efficient threads which have great holding power. The system is quick and easy to use and is ideal for alloys and other light materials. The recoil insert, which is larger in diameter than the tapped hole, is compressed during installation then allowed to spring back, permanently anchoring into place. The Recoil System consists of Recoil stainless steel helically wound precision inserts, high quality HSS taps and installation tools.

BLIND SKIN SCRIBE

For use on flush skin butt joints. This tool quickly and easily finds the cut line on the overlap of new metal. The lower leg slides under the new metal and hooks on the adjacent skin and the upper leg scribes the new skin as it pulled along. This tool is adjustable to suite the desired gap at the skin joint. This tool is especially handy when the old skin that is removed is damaged beyond usefulness as a pattern Note: For use on aluminum only.

P/N 12-00746.....

6-IN-1 COMBINATION SCREWDRIVER

• Industrial rated bits for extra long life • Heat treated 1/4" & 5/16" nut drivers • Interchangeable bits fit both Philips & Slotted screws • Bits: 3/16" Slotted; 9/32" Slotted; #1 Philips, #2 Philips.

P/N 12-14000.....

SCREWSTICK POCKET SCREWDRIVER

The Screwstick is a pocket screwdriver which accepts any common 1/4" tip. An extra tip is stored in the stainless steel shaft, and a heavy duty magnet holds tips firmly in place. A steel torque driver for stubborn applications is stored in the shaft. A rubber finger grip for holding plus a heavy duty pocket clip are included. Ideal for aviation, automotive, & many other applications. Great for mechanics.

P/N 12-20105.....

BALLPOINT HEX SOCKET DRIVER

3/32" Ballpoint Hex Socket Driver for use on hex head screws and nuts.

**This tool is commonly used with most avionics units like Honeywell Bendix/King and Garmin.*

P/N 12-02063.....

MASTER CHUCK

These versatile Master Key Chucks are available in two sizes (small & large) which open sizes 1/4" to 3/4". These tools allow you to open over 1200 different key chucks. Save wear on chucks by always having the proper key size available. The squared center of the keys opens acetylene tanks. Made of treated steel with black oxide finish.

Small..... P/N 12-30165.....
Large..... P/N 12-30170.....

ALL-SHARP DIAMOND SHARPENER

All Sharp is an innovative diamond sharpener that provides 4 different grit sizes on the same tool. All Sharp sharpens and fine sharpens tools and bits and cleans burrs on hard to reach parts and equipment. It's tough stainless body will not rust and All Sharp fits in any tool tray or pouch. Model ST-7..... P/N 12-21430.....

SCREW & BOLT SHEAR

The Screw & Bolt Shear is a bolt cutting device manufactured from very high quality tool steel which is hardened, tempered & machined to very close precision tolerances. The action of this tool is similar in nature to a "guillotine" design and is quite effective in cutting screws/bolts to specific lengths. The cutting body of the SBS-1 will accommodate screws or bolts in sizes of 4-40, 6-32, 8-32, 10-32, 10-24, 1/4-20 & 1/4-28. P/N 12-14250.....

BOJO PLASTIC PRY TOOLS

Soft, yet strong, all Bojo tools are made tough enough to pry, but not hard enough to damage. These 4 tools are provided as a set.

PLASTIC GENERAL WEDGE TOOL - General narrow point for reaching in narrow spaces.

PLASTIC STICKER/GASKET TOOL - Wedge tip, for use where a wide area is desired with a "soft" touch.

PLASTIC PRY BAR TOOL - The forked tip. The original for removing door panels and plastic grommets.

PLASTIC WEDGE PULLER TOOL - The forked tip. The original for removing door panels and plastic grommets.

Set of 4..... P/N 12-00748.....

MASTER INSTALLER KIT - Soft, yet strong, all Bojo tools are made tough enough to scrape, but not hard enough to damage. Set of 7.

P/N 12-00976.....

AIRCRAFT ASSEMBLY SCRAPER KIT - Soft, yet strong, all Bojo tools are made tough enough to scrape, but not hard enough to damage. Set of 4.

P/N 12-00977.....

DELUXE SCRAPER KIT - This is an expansion of our original 4 Piece Scraper Kit (which you currently buy in the medium strength material NGL). The new tips were design from request in the aviation fuel bladder cleaning industry for the US Air Force and US Navy overhaul programs. This new, stronger material is highly resistance to all forms of chemicals and sealants.

MULTI WEDGE NON-MARRING TOOL SETS

Multi Wedge non-marring tool sets allow homebuilders and avionics installers to remove panels, dash trim bezels, and other interior moldings, including door panels, without causing damage. Excellent for use in aviation, auto restoration, body work, electronics installation, upholstery etc. The Orange Set (3400) P/N 12-01671 is made of a softer polyethylene plastic blend for prying dash bezels, trims, and moldings without damaging the vehicles interior. The Black Set (3500) P/N 12-01672 is made of a more expensive high impact polycarbonate plastic for prying harder materials such as thin walled aluminum engine covers and sheet metal panels. **Product Benefits:** • Thin tip to fit into tiny gaps • Wide surface area to displace force, therefore reducing damage • Flexible • Slick surface for ease of prying • Built-in handle • Non-marring surface • Slim powerful angle • Curved tip for easy prying • Thing tip for tight gaps

LATHES – MILLS

MICRO LATHE

This is the machine you don't have to "baby". The Micro Lathe is a rugged, precision instrument. Its machined, ground and stabilized steel bed has a lifetime ball bearing spindle, coupled with a 6-speed positive v-belt drive. Spindle speeds in geometric progression from 525 to 5200rpm provide the power to "HOG" 1/8-inch cuts in mild

steel or the speed and accuracy to dust a few tenths. Other big lathe features include large .001 graduations on the cross slide dial, an all-angle tool post and a carriage depth stop. Adjustable gibs provide full compensation for carriage and cross slide wear. 2-yr. factory warranty. 15" bed. Comes factory assembled. The Unit pictured is a basic unit (P/N 12-00171) with an optional 3-Jaw Chuck, Boring bar(1097E), Tailstock (1150), Drill Chuck (1091), 1/4 HP 1725 RPM Motor (1021w), Motor Mount Bracket (1022), Mounting Board (1023), and Pulleys (1162 with 3M 500 belt). All accessories are sold separately and are not included in the base price. Note: Photo shows Lathe with all accessories which are not included (Available separately). P/N 12-00171 is basic lathe unit only.

General Specifications:

- Overall working accuracy: 0.0005"
- Max. bearing run out: 0.0004"
- Headstock normality to bed: .0004 in max error
- Max. taper bed dovetail over pins: 0.0001"
- All machine dovetails: 45°
- Bed width: 2 5/16 "
- Cross slide dial graduation: 0.001
- Cross slide screw: 1/4"-20 adjustment for back-lash take-up provided (jam nut arrangement)
- Carriage travel: 0.600" 1 rev. of hand wheel
- Max. spindle speed recommend: 7000 rpm
- Motor requirement: 1/8 – 1/4 HP
- Pulley type: Std. 5/8" bore, multi-step V-belt
- Length of headstock on ways: 2.875"
- Length of carriage on ways: 3.000"
- Width of cross slide on carriage: 2.000"
- Tool post: may be adjusted for angle cutting (chamfer, boring, etc.)

Capacity:

- Swing over bed: 4.5" (max. turning dia.)
- Swing over cross slide: 2 3/8"
- Overall length of bed: 15.5"
- Overall length of lathe: 16.5"
- Tool bit size: 1/4"
- Drill chuck capacity: 0 to 1/2"
- Distance between centers: 9.75"
- Carriage travel: 9"
- Cross slide travel: 1.75"

Spindle Specifications:

- Sealed precision ball: 1.5748 O.D. 0.6692 I.D.
- Spindle nose: 3/4" – 16 (3/4" SAE)
- Spindle hole: 0.343
- Spindle ID taper: 15° (30° included)
- Max. collet diameter: 9/32"
- Pulley size: 5/8" bore

MICRO MILL

The Micro Mill has effortless, chatterless table and mill head movement. This is due to the unique design of our oversized gibs, ground steel ways, massive carriage, steel bed and vertical mill head support which makes the Micro Mill ready for CNC upgrade if you desire.

Our small mill is really a scaled down big mill with manual operation. Other big mill features include large 0.001 graduations on friction adjustable micrometer dials for X, Y, and Z controls. Adjustable gibs provide full compensation for X, Y, and Z mill-ways wear. It all adds up to the best value in small mills. 15.5" table, power switch & cord included. Comes

factory assembled. 2-yr. warranty. P/N 12-00170

NICHOLSON HACKSAW BLADES

Nicholson Bi-Metaloy hacksaw blades last twice as long as high-speed steel and 10 times longer than carbon steel. Can operate 20%-50% faster. Practically unbreakable.

GENERAL RECOMMENDATIONS FOR BLADE SELECTION

- 14 TOOTH** – For cutting heavy cross section and for soft materials where maximum chip clearance is needed. P/N 12-19514
- 18 TOOTH** – For general shop use, where blade is used on several jobs. P/N 12-19518
- 24 TOOTH** – For cross sections of 1/16" to 1/4", such as pipe, angles, small drill rod. P/N 12-19524
- 32 TOOTH** – For cutting stock up to 1/16" thick, such as 4130 tubing, sheet metal, BX. P/N 12-19532

PLYWOOD PLANER-SCARFFER ATTACHMENT

The Plywood Planer-Scarffer attachment enables you to make consistent scarf cuts quickly and easily. Easy installation and removal allows your planer to be readily used for scarfing as well as a regular planer. The Planer-Scarffer attachment is easily installed on the Makitan 1900B, Makitan 1911B and the Porter Cable 9125 planers. The attachment is not limited to these particular models or makes. With the Planer-Scarffer attachment, you can purchase standard size sheets of plywood and then join them together. This saves the extra cost of larger sheets and the shipping charges that would be required. By scarfing 4x8 sheets together, save 60% or more in the price of the plywood and make the cost more bearable. The attachment is mounted on a power-planer and cuts an 8:1 bevel. 2 models are available. One fits a 4-3/8" planer for plywood up to 1/2". The other is designed for a 3-1/4" planer and can be used on plywood up to 3/8". Specify planer type when ordering.

- 3.25" attachment for Porter/Cable 9125.....P/N 12-20110-1900
- 3.25" attachment for Makita n1900B.....P/N 12-20111-1911

CRAFTSMAN WOOD TOOL CHEST PLANS

Build this magnificent wood tool chest from our detailed professional plan. It's the kind of chest a craftsman dreams of. Features 10 drawers in the sturdy base, 12 more drawers plus a large top bin in the removable upper section. Overall size is 25"W x 10-5/16"L x 27"H. Ideal for the aircraft builder or aircraft mechanic. Plans only for Wood Tool Chest.

P/N 12-18350

CRAFTSMAN WOOD TOOL CABINET PLANS

Machinist's and woodworkers show your skill. Impress potential customers when they come into your shop, and see such a nice cabinet like this. This cabinet has removable trays for easy access to all hand tools. This cabinet when built by my plans, will have room for all your hand tools. As a bonus it has wheels on it for easy mobility. Size of this unit when completed 32"W x 19"D x 68"H

TOOL KITS — METAL FORMING TOOLS

RV BUILDER TOOL KIT

These RV builders tool kits are based on recommendations from the Van's Aircraft Builders Manual as well as on the tools that have been purchased from Aircraft Spruce by RV builders. It is an excellent tool kit for the construction of the RV4, 6, 7, 8, and 10 aircraft. They include an air drill, hand rivet squeezer,

rivet sets and other tools of the highest quality. If you are building a RV-9 order 100 extra 3/32" clecos and 50 extra 1/8" clecos. If you are building a RV-10 kit, order 175 extra 3/32" clecos and 125 extra 1/8" clecos as well as the RV-10 bucking bar. See Chart Below for Components Kit with 2x Rivet Gun.....P/N 12-00890.....
 Kit with 3x Rivet Gun.....P/N 12-00899.....

KIT BUILDER AIRCRAFT TOOL KIT

Initially designed for the RV3, RV4 and RV6 builders, this kit has proven to be very popular with virtually all aircraft home builders. It contains our most popular rivet hammer and is an excellent tool kit for RV builders. Weight: 40 lbs.

This 530 piece kit includes:

- 1 TP44 - Hand Seamer
 - 1 TP638 - Bucking Bar
 - 1 TP1112 - Bucking Bar
 - 1 TP116 - Hand Rivet Squeezer
 - 1 TP670 - Bucking Bar
 - 1 TP162 - Fluting Pliers
 - 1 TP216 - Tool Box w/Tote Tray
 - 1 TP97 - Air Tool Regulator
 - 1 TP4263 - Dimple & Die Set
 - 1 TP4264 - Dimple & Die Set
 - 1 TP45 - 1/4" Air Drill
 - 1 TP61 - Micro Stop Countersink
 - 1 TP91 - Flush Rivet Set w/Rubber Guard
 - 1 TP89 Straight Rivet Set (5 Pcs. SM10 Series)
 - 1 TP83 Standard or TP84 (special order) Rivet Gun (specify)
 - 1 TP88- Beehive & Quick Change Retainer Springs
 - 1 TP90- 10" Offset Rivet Sets (5 Pcs., SM20 Series)
 - 3 TP62 - Countersink Cutter Pilots (1 ea.: TP62-21, TP62-30, TP62-40)
 - 500 TP75 - Cleco Fasteners (325 pcs. TP75-3/32 & 175 pcs. TP75-1/8)
- P/N 12-001145.....

WHEELING MACHINE (BENCH MODEL)

Clearly, this is the most popular of in-home English Wheels. Trick out your custom-built bike or complete hobby projects without breaking the bank. Provides outstanding performance on small jobs like motorcycle tanks, tank covers, seat cowls and aircraft fillets. Versatile use - mount on bench, clamp in vise or use with optional welded stand.

Applications: Ideal for small metal crafting projects such as motorcycle gas tanks, hobby projects and small fillets for aircraft applications.

Specifications:

- * Thickness capacity for steel is 16 gage; for aluminum, up to 3/32".
 - * Features can be rolled into the center of a 44" panel.
 - * Can be mounted to a bench, clamped in a vise or used with the optional welded floor stand.
 - * Optional wheels and stand sold separately.
 - * Anvil yoke is adjustable on both sides of the axle support with thumb screws so the anvil wheel can be trued with the upper wheel.

TOOL KITS

MASTER KIT BUILDERS KIT

The Master Kit Builders Kit (TP176MKB) contains all the tools supplied in the "RV" tool kit plus many more. It is designed to supply all the major, most commonly used tools for the building sheet metal aircraft. These items can be used on RV's, Zenair, Questair and Mustang Aeronautics Kits as well as many, many others. A huge savings can be realized by purchasing this kit over the individual tool price. Wt. 50 lbs.

Kit Contains:

- 1 - TP83 or TP84 Rivet Gun (specify)
- 1 - TP89i - Straight Rivet Set (5 pcs., SM10 series)
- 1 - TP90i - 10° Offset Rivet Sets (5 pcs., SM20 series)
- 1 - TP91i - Flush Rivet Set with Rubber Guard
- 1 - TP88 - Beehive & Quick Change Retainer Springs
- 1 - TP97 - Air Tool Regulator
- 1 - TP96 Rivet Cutter
- 1 - TP45 - 3/8" Air Drill
- 1 - TP162 - Fluting Pliers
- 1 - TP61 - Micro Stop Countersink
- 3 - TP62 - Countersink Cutter Pilots (1 ea.: TP62-21, TP62-30, TP62-40)
- 500 - TP75 - Cleco Fasteners (325 pcs. TP75-3/32 & 175 pcs. TP75-1/8)
- 1 - TP74 Cleco Pliers
- 1 - TP44 - Hand Seamer
- 1 - TP266 - Deburring Tool
- 1 - TP638 - Bucking Bar
- 1 - TP647 - Bucking Bar
- 1 - TP670 - Bucking Bar
- 1 - TP1112 - Bucking Bar
- 1 - TP51 - Aviation Snip - Right
- 1 - TP52 - Aviation Snip - Left
- 1 - TP53 - Aviation Snip -Straight
- 1 - TP844 - Hand Blind Riveter
- 1 - TP636-1/8" Pop Dimple Die Set
- 6 - TP49-40 - Drill Bit
- 4 - TP49-30 - Drill Bit
- 2 - TP49-12 - Drill Bit
- 1 - TP49-1/4 - Drill Bit
- 4 - TP145DS - Drill Stops (#40, #30, #12, 1/4)
- 1 - TP312 - Circle Hole Cutter
- 1 - TP116 - Hand Rivet Squeezer
- 1 - TP116A Rivet Sets for TP116 (2 Flush & 4 Universal Head)
- 1 - TP4263-3/32" Dimple Die Set
- 1 - TP4264 - 1/8" Dimple Die Set
- 1 - TP722-Fluting Plier(small Flute)
- 1 - TP260 2 Drawer Tool Box (US902 pneumatic Cleco installation tool is optional, but recommended)

P/N 12-00832

MASTER AIRCRAFT TOOL KIT

This 121-piece complete Aircraft mechanics Kit is excellent for aircraft restoration, repair and manufacturing. It is ideal for the A & P mechanic, student and homebuilder. Kit comes with everything from sheet metal tools to riveting tools in a two-drawer tool chest. This kit includes the top quality riveting hammer manufactured in the U.S.A. Wt. 48 lbs.

48 lbs.

Kit Contains:

- 1 - TP83 / TP84 3X or 4X Offset Handle Rivet Gun
- 40 - TP75 - Cleco Fasteners (10 ea.: 3/32", 1/8", 5/32" & 3/16")
- 20-TP109M - Wing Nut Fasteners (5 ea.: 3/32", 1/8", 5/32" & 3/16")
- 4 - TP145DSK - Drill Stop Kit (1 ea.: #21, #30, #40 & #10)
- 3 - TP62 - Replaceable Pilots (1 ea.: #21, #30 & #40)
- 3 - TP54 - Threaded Drill Bits (1 ea.: #21, #30 & #40)
- 2 - TP88 - Spring Retainer Set
- 5 - TP89i - Straight Rivet Set Mix
- 5 - TP90i - Offset Rivet Set Mix
- 1 - TP91i - Flush Set with Guard
- 1 - TP638 - Bucking Bar
- 1 - TP1112 - Bucking Bar
- 1 - TP670 - Bucking Bar
- 1 - TP647 - Bucking Bar
- 1 - TP97 - Air Tool Regulator
- 1 - TP51 - Aviation Snip - Left
- 1 - TP52 - Aviation Snip - Right
- 1 - TP52 - Aviation Snip - Right
- 1 - TP53 - Aviation Snip-Straight
- 1 - TP61 - Stop Countersink
- 1 - TP45 - 3/8" Pistol Grip Air Drill
- 1 - TP46 - 90° Angle Attachment
- 1 - TP346 - Heavy Duty Rivet Cutter
- 1 - TP116 - Hand Rivet Squeezer
- 6 - TP116A - Squeezer Set Mix
- 1 - TP74 - Cleco Pliers
- 1 - TPMM250-1 - Strap Duplicator #40
- 1 - TPMM250-2 - Strap Duplicator #30
- 1 - TPMM250-3 - Strap Duplicator #21
- 1 - TPMM250-5 - Strap Duplicator #10
- 1 - TP57 - Cone Jaw Chuck
- 1 - TP162 - Fluting Pliers
- 1 - TP76K - Hand Punch Kit
- 1 - TP44 - Hand Seamer
- 1 - TP81 - Hand Nibbler
- 1 - TP206 - Aircraft Repair Manual
- 1 - TP260 - 2-Drawer Tool Chest
- 5 - TP123SG - Side Grip Fasteners
- 1 - TP70 - Chip Chaser
- 1 - TP675 - Air Vacuum

P/N 12-01126

DELUXE STUDENT TOOL KIT

This kit meets most school requirements for basic sheet metal tools. These high quality tools will take the student through school and into the profession for years of outstanding service. It contains the most popular rivet hammer and is a great starter kit. Wt. 14 lbs.

P/N 12-01127

Kit Contains:

- 1 - TP83 - Rivet Hammer
- 1 - TP2012 - Deluxe Air Tool Regulator
- 1 - A1006-234X - Beehive Spring Retainer
- 1 - A1007-234X - Quick Change Spring Retainer
- 1 - TP89 - 5 Pc. Straight Rivet Set Mix (AN470)
- 1 - TP670 - Bucking Bar
- 1 - TP346 - Rivet Cutter
- 40 - TP74 - Cleco Fasteners (10.: 3/32" 1/8", 5/32", 3/16")
- 1 - TP45 - 3/8" Air Drill
- 6 - TP49 - Drill Bits
- 1 - TP145DSK - 4 Pc. Drill Stop Kit
- 1 - TP61K - Micro Stop Countersink and 3 Cutters
- 1 - TP279 - Military Style Tool Pouch

GLASTAR TOOL KIT

This kit is designed for all new Glastar kit aircraft. The tools included are recommended by the manufacturer, specifically for the assembly of the sheet metal portion of the kit. Many of these tools are of top quality, and designed to last. They are all covered by a 30 day unconditional money back guarantee. P/N 12-00831

Kit Contains:

- 1 - SM10-4706i - 3/16" Universal Rivet Set
- 1 - TP83 - Rivet Gun
- 1 - SM10-4703i - 3/32" Universal Rivet Set
- 1 - SM10-4704i - 1/8" Universal Rivet Set
- 1 - TP91 - Flush Set w/rubber guard
- 1 - A1007-234X - Quick Change Retainer Spring
- 1 - TP61 - Stop Countersink
- 1 ea. - TP62 - 100° Countersink Cutter Pilots (12, 21, 30 & 40)
- 1 ea. - TP62A - 120° Countersink Cutter Pilots (30)
- 1 - TP116 - Hand Rivet Squeezer
- 1 - TP4263SB-1/8" Dimple Die Set
- 1 - TP4264SB - 3/32" Dimple Die Set
- 1 - TP45 - 3/8" Capacity Air Drill
- 250 - TP75 -3/32 - 3/32 Clecos
- 150 - TP75 -1/8 - 1/8 Clecos
- 25 - TP75-3/16 - 3/16 Clecos
- 1 - TP74 - Cleco Plier
- 1 - TP266 -Deburring Tool w blades
- 1 - TP838 90° Countersink/ Deburring Set
- 1 - TP216 - Tool Box
- 1ea. - TP638, TP721, TP760B - Bucking Bars
- 1ea. - TP49-11/64, 1/4, 1/16 - Assorted Jobber Drill Bits
- 1 - TP249 - 60 pcs. - #1-#60 Jobber Drill Bit Set
- 1ea. - TP55-30, 40 - 6" Aircraft Extension Bits
- 1 - TP55A-40-12" Side Grip Clamps
- 2 - TP538STC - Tension Clamp
- 1 - TP51K - Aviation Snip Kit - Left , Right, Straight
- 1 - TP46K - 90° Drill Attachment with Bits #40, #30, #21
- 1 - TP70 - Chip Chaser
- 1 - TP844 - Swivel Hand Riveter
- 1 - TPA5588 - Hook Scriber
- 1 - TP294AP - Center Punch
- 1 - BG383-1 - Tape Measure
- 1 - TP604B - 12" Ruler 32nds, 64ths, 10ths, 100ths, Graduations
- 1 - TP297-Spring Divider (Caliper)

P/N 12-00831

U.S. INDUSTRIAL MUSTANG KIT

This kit is designed especially for the assembly of the Mustang Kit aircraft. It is comprised of over 300 items, specifically required in the fabrication and assembly of this aircraft.

This 317 piece kit includes:

- 1 TP83(3x) or TP84(4x) Rivet Gun
- 1 TP91 Flush Rivet Set
- 1 SM10-4703 Rivet Set
- 1 SM10-4704 Rivet Set
- 5 TP641HC Handi-Clamp
- 25 TP75L-3/32 3/32 Cleco Fasteners
- 1 TP81 Hand Nibbler
- 4 TP49-30 Drill Bits
- 4 TP49-3/32 Drill Bits
- 4 TP49-40 Drill Bits
- 4 TP49-1/8 Drill Bits
- 2 TP49-12 Drill Bits
- 2 TP49-3/16 Drill Bits
- 1 TPA5611 Unibit Drill
- 1 TP294HD Auto Center Punch
- 1 TP735K Hand Pack Trial Kit
- 1 TPF56 Flat File
- 1 TP4263 Dimple and Die Set
- 1 TP4264 Dimple and Die Set
- 1 TP216 Tool Box
- 1 SM10-4705 Rivet Set
- 1 A1007-234X QC Retainer Spring
- 1 TP346 Heavy Duty Rivet Cutter
- 1 TP61K Stop Countersink Kit
- 1 TP722 Fluting Pliers
- 130 TP75-1/8 Cleco Fasteners
- 25 TP75L-1/8 Cleco Fasteners
- 80 TP75-3/32 Cleco Fasteners
- 1 TP74 Cleco Pliers
- 1 TP44 Hand Seamer
- 1 TP227G Duckbill Pliers
- 1 TP266 Deburring Tool
- 1 TP888-3 Hand Rivet Squeezer
- 1 TP116A Squeezer Sets
- 1 TP751 Bucking Bar
- 1 TP670 Bucking Bar
- 1 SM181 Swivel Flush Rivet Set
- Kit w/ TP83 gun (3x).....P/N 12-00347
- Kit w/ TP84 gun (4x).....P/N 12-00498

US INDUSTRIAL TP83 & TP84 RIVET GUN KIT

This complete kit contains all the basic tools required for most riveting applications. In addition, the tools are well organized in the molded plastic case, making it the perfect kit for the A & P student, mechanic, airline maintenance personnel or homebuilder.

This 21 piece kit includes:

- 1 TP83(3x) or TP84(4x) rivet gun
- 1 TP89i straight rivet set.
- 1 TP90i offset rivet set
- 1 TP91 flush set with guard
- 1 TP88 spring retainers (2 pc.)
- 2X, 3X, 4X and many
- 1 TP112 bucking bar
- 1 TP638 bucking bar
- 1 TP647 bucking bar
- 1 TP670 bucking bar
- 1 TP97 air tool regulator
- 1 A1142 air tool oil
- 1 TP216M molded plastic case
- Kit with TP83(3x) GunP/N 12-02009
- Kit with TP84(4x) GunP/N 12-02011

RIVETING HAMMERS

RIVETING HAMMERS

US 3X

These high quality riveting hammers are excellent for all light aircraft metal riveting applications. They feature a convenient offset handle (except Model US3AA which is straight handle) and come complete with retainer spring and regulator. All models feature metered teasing trigger, made in U.S.A.

| Part No. | Blows / Min. | Capacity | | Stroke | Length | Weight (Lbs.) | Price |
|----------|--------------|----------|-------|----------|----------|---------------|-------|
| | | Alum. | Bore | | | | |
| US1X | 3600 | 1/8" | 9/16" | 1-1/2" | 5-11/16" | 2 | . |

| US7X | 900 | 3/8" | 3/4" | 5-13/16" | 8-5/16" | 6 | . |

"RECOILLESS" RIVETING HAMMERS

US 3R

In the early stages of developing a truly recoilless/fatigueless riveting hammer, it was determined that the tools must meet certain goals. The main goal being a reduction in low-frequency vibration in accordance with ISO Standard #5349-1986. In this standard are guidelines for the measurement and

assessment of human exposure to hand-transmitted vibration. As a result, the following has been achieved: •Ergonomic design: To maximize user comfort by achieving a relaxing, comfortable, lightweight and balanced tool •Compact tool size: Since aircraft riveting is never standard, a tool that will allow the best overall access • Retain user touch: A metered trigger which provides single or multiple blows per minute while maintaining the ability to set rivets in seconds • Further dampen noise output. • Least amount of parts: No similar tool is produced with fewer parts, thus enhancing reliability, but keeping it simple enough so that maintenance can be done by anyone.

Independent testing* has shown these tools will greatly lessen job-related effects of prolonged exposure to vibration & boost user productivity.

SPECIFICATIONS

| Part No. | Capacity | | Bore | Stroke | Blows per minute |
|----------|----------|-------|------|--------|------------------|

PNEUMATIC RIVET SQUEEZER

Heavy duty industrial tools are manufactured to exacting standards to insure long service life. All critical parts, including the yoke, are fabricated from 4130 steel and heat treated to Rc 42-46. These rivet squeezers have earned a reputation for durability and reliability through years of service on the production lines of major airframe manufacturers such as Grumman, Piper, Beech and Cessna. Easily operated by one hand. All replacement parts and other yoke designs available. Features feathering throttle.

AIRCRAFT RIVET GUNS

2X

The standard tool used in aircraft manufacturing plants such as Boeing, Rockwell, Lockheed etc., is completely interchangeable with Chicago Pneumatic. These tools are slow hitting with excellent finger tip control. Accepts all .401 shank rivet sets and attachments. All guns are brand new and carry a full 1 year warranty.

| Part No. | Blows / Min. | Capacity Alum. | Bore | Stroke | Weight (Lbs.) | Price |

| 4X | 1740 | 1/4" | 1/2" | 3-1/16" | 3.6 | . |

TP82 .TP83, AND TP84 RIVET GUNS

This "X" type feathering trigger riveter is the only rivet gun that allows you to slowly begin riveting without damage to the skin. This is critical in performing riveting operations. This gun is used by aircraft mechanics worldwide. It's also the perfect tool for kit builders.

NOTE: Long term exposure to low frequency vibration caused by riveting may be harmful to your hands and arms. We suggest you take frequent breaks when riveting to reduce this exposure. Features: * Takes .401 shank rivet sets * Lightweight aluminum handle * Price includes spring retainer & regulator (TP97) * Precision machined hardened and ground valve * "Sure Grip" powder coated finish * Teasing trigger * Precision machined and hardened cylinder for long life. • Made in the U.S.A.

AT590RGK 3X RIVET GUN KIT

This kit provides all the essentials for straight and offset riveting. Four of the most commonly used bucking bars; eight cupped sets for 3/32", 1/8", 3/16" AN470 universal head rivets; 3 flush sets for AN426 rivets; 2 retainer springs; an air regulator for adjusting hammer blows; tool oil; an attractive molded rubber case for organization and storage; and a 3X rivet gun. Ideal for structural and sheet-metal technicians, home builders, & students. P/N 12-00240.....

SPECIAL DIMPLING & RIVET SET FOR RV4, RV6, RV8 AIRCRAFT

This 21-piece dimpling and riveting set was designed especially for use in the construction of the Vans RV aircraft series, and is ideal for a variety of other aircraft as well. All the riveting sets and dimple dies are made from heat treated stainless steel.

* Dimple dies size stainless steel – rivet set are steel. All are heat treated.

Special RV Dimpling and Riveting Kit includes: Set holder block, Cup sets, Flat sets, and Spring back dimple dies.

Dimple Dies – 3/32", 1/8", 5/32" rivet size. 6-32, 8-32, 10-32 screw sizes.

Cup Sets – 3/32", 1/8", 5/32".
Flat Sets – 1/16", 1/8", 3/16", 1/4", 5/16", 3/8", 1/2". Polyethylene set.

RIVET SET HOLDER

This "no mar" rivet set holder was developed by an RV-7 builder who needed to drive rivets in tight spaces without scratching the surrounding metal, such as happens when using standard metal spring type set holders. Just attach the holder to a recessed (mushroom) rivet set, backside rivet sets, or any other rivet too set. A small slit in the half inch hole allows the set holder to stretch over the shoulder of the recessed and backside tools. P/N 12-01391.....

BACK RIVETING RIVET SET

For back riveting flush rivets on RV control surfaces and other home-builts. Has a plastic Delrin sleeve with spring to hold multiple sheets of aluminum together while riveting. 0.401 shank x 4-1/8 inches long.

Back Rivet Set 3-1/2" long P/N 12-07100-3..... ea.

TO

BUCKING BARS

Our bucking bars are cast with ductile iron to insure non-porous finish which is very important in order to have a highly polished finished surface. They are heat treated to 38-42 RC and therefore can be repolished many times without changing hardness. This wide selection of sizes, shapes, and weights enables the aircraft builder to pick the proper bar for his job. Made in the U.S.A.

HAND RIVETING & DIMPLING TOOL

Used for hand dimpling of skins and small parts and for hand riveting of parts, assemblies, and spars. This tool maintains alignment of the dies to each other, and insures proper alignment to the work surface for superior dimpling results over either rivet gun or free-hand dimpling methods.

Features include: • 22" deep x 4" tall throat • Heavy wall 1" x 2" steel tube arm • Heavy wall aluminum channel base • Bronze 1/2" I.D. guide bushings for shafts • Heat treated and

centerless ground stainless steel driver shaft (2)– one shaft has flat end for riveting with rivet gun & one shaft accepts 0.187" shanks for dimple dies & sets. • 1.5" extension shaft for dies • Adjustable die holder block. Rivet Tool Return Spring Kit now included (Spring, collar and wrench). Great for one handed dimpling of skins and parts. Uses rivet, dimple and die sets with .187" shank. (Dies and sets sold separately)

P/N 12-00177.....

DRDT-2 RIVET DIMPLER

DRDT-2 (AKA Dash 2) is a welded steel c-frame rivet dimpler. Replaces the common impact c-frame rivet dimplers of the past. With its ample mechanical advantage, dimpling is fast, easy, less fatiguing and safe on the skins. With a fully adjustable set holder you can achieve consistent and accurate dimples. The DRDT-2 incorporates a new low force spring return system that prevents skin damage from the

accidental release of the handle without increasing the force required to dimple. 22" throat depth allows dimpling of up to 44" wide sheets. The relief under the lower frame member provides dimpling access to spars, ribs, leading edge skins. Designed and analyzed using state of the art engineering tools the DRDT-2 can handle all your dimpling needs on your project. The DRDT-2 is painted with an industrial powder coat giving one of the toughest finishes available. Features: • Weight: 60 lbs • Size: 28"X16"X3" • Capacity: Up to 22" depth • Gap: 4" • Skin thickness: Up to 0.040" Aluminum. Dimple Dies: 3/16" shank Diameter.

AIRCRAFT BUILDER CALIPERS

Our Aircraft Builder's Calipers feature an easy-to-read dial, 6" length capacity, and measurement in 4 dimensions outer, inner, depth, and step. The dial has .001" graduations for case and bullet mea-

surements. A chart that shows maximum and trim lengths for all popular calipers, plus a fitted case with instructions, are included. Ideal measurement tool for aircraft mechanics and homebuilders. Available in plastic or stainless steel.

Plastic Calipers P/N 12-30215
Stainless Steel Calipers P/N 12-30220

DIGITAL FRACTION CALIPERS

The Digital Fractional Caliper brings you three universal systems of measurement, making it an equally practical choice for both

professional and do-it-yourself projects. The high-contrast digital display easily switches between inches, millimeters and fractions, with guaranteed accuracy to 0.001". In addition, the rugged stainless steel design delivers accurate readings of inside, outside, step and depth measurements. The Fraction+ comes with a foam padded plastic case for safe storage when not in use.

Features * Stainless Steel Caliper. * Tri-Mode digital display – inches, millimeters, and fractions. * For making inside, outside, depth and step measurements. * Resolution 0.0005" (0.01mm). * Accuracy 0.001" (0.02mm). * Auto on/off feature preserves battery life. * Bar scale is graduated in inches and millimeters. * Free-wheeling friction roller advances and retracts slide. * Extendable depth gage for use in slots and small holes. * Etched and filled black graduations. * Convenient foam-padded case for storage.

AVREY CUTTING & POLISHING WHEEL KIT

Avery cutting polishing wheels are a uniform blend of minerals and resins molded into wheel form with rugged, dense construction that provides aggressive polishing and blending action without removing excess base materials.

These wheels generate uniform finishes and can remove minor surface imperfections. Use these wheels with a die grinder for deburring holes and edges. Small wheels are more versatile than large (6") wheels. Can be used on hand held parts or parts in the jig. These wheels are the same density, grade, and mineral type as the 7A MED 6" wheel.

3M™ SCOTCH-BRITE™ DEBURRING WHEEL

Two Styles Available: Cut & Polish/Unitized Wheel-7A Medium grade (harder) Use to radius and deburr edges of aluminum parts. These wheels give a uniform brushed satin finish to parts and deburr quicker and easier than hand finishing. These wheels are discs of Scotch-Brite web compressed and bonded to form a rugged, dense wheel. Wheel size: 6" dia. x 1" wide x 1/2" thru hole.P/N 12-00875

Light Deburring Wheel-7S Fine Grade (Softer)
Light deburring 7S Fin 6 x 1 x 1. This wheel has a 1" thru hole. To fit 1/2" order P/N 12-01585.....P/N 12-00948

SHEET METAL TOOLS

POLYETHYLENE DIMPLING Mallet

This custom made UHMW polyethylene plastic mallet is great for dimpling skins. Blows are more solid and much quieter than with steel hammers. Will outlast wood mallets. Hammer head measures 2.5" round x 4" long with 12" handle. Wt: 16oz. P/N 12-00605.....

PLASTIC FORMING Mallet

This custom made UHMW polyethylene plastic forming mallet is great for metal forming. Smooth radiused surfaces will not mar surface. Long life, split resistant. Mallet head measures 2.5" round X 5" long w/ 11" handle; Wt: 14 oz. Great combo to the shot bag. P/N 12-00607.....

METAL FORMING SHOT BAG

For those builders that want to try their hand at metal forming this leather shot bag is a must have item. Leather shot bag made from 3/4 oz. top grain cowhide. The bag is double stitched and fills through a 1" opening sealed with Velcro. The bag is 12" round and 1-1/2" thick. Use lead shot #8 - #7.5; or sand - mortar quality type (shot can be purchased at local sporting goods or gun stores). P/N 12-00606.....

HAND SEAMER/3.5" JAW

Has VISE GRIP locking feature to aid clamping & holding work. Use for straightening and bending rib and bulkhead flanges. Made with 7" vise grip plier. Jaws are made from 3/16" X 1" X 3-1/2" stainless steel with machined radius. TIG welded & polished. P/N 12-00608.....

FLUTING PLIER

Make narrow & precise flutes for straightening ribs and bulkheads easier & better than pliers with molded jaws. Made with 7" VISE GRIP pliers. Pins are 3/16" dia. stainless steel. TIG welded & polished. P/N 12-00609.....

VISE GRIP DIMPLERS

Made for dimpling in restricted and hard to reach places where regular dimple dies won't fit. Made with 7" VISE GRIP jaws then polished. 2 sizes available (3/32" and 1/8"). P/N 12-00611.....
3/32" P/N 12-00612.....
1/8"..... P/N 12-00612.....

LEVER SNIPS

Offset cutting tool, leaves 2 clean, finished edges. 8.5" length, .75 lb.

Model TP133 - (Right hand snip, cuts left & straight)..... P/N 12-00366.....
Model TP134 - (Left hand snip, cuts left & straight)..... P/N 12-00367.....

ROBIN OFFSET HEAVY DUTY SNIP

This offset blade design allows the sheet to pass under your hand. The steel forged blades keep metal from stretching and causing puckering marks along the cut edge. 16 gauge mild steel capacity. 1.63 lbs. Model TP299..... P/N 12-00369.....

ADJUSTABLE SET HOLDER FOR PNEUMATIC SQUEEZERS

New improved design. Heat treated 4130 steel investment casting with rolled threads. This special set holder is made to replace the rigid (2-9/16") set holder standard to most CP214 style pneumatic squeezers. This adjustable set holder will eliminate the need to shim the dies and sets with shim washers. Adjustments are faster & easier. P/N 12-00615.....

Note: Only for yokes with 1" thick base or less. Will not work in tandem units.

POP GRIP DIMPLERS AN-426 RIVETS

For dimpling in hard to reach places. Works with any hand pop rivet tool. Can be used over & over. Works for both 100 & 120 pop rivets. Extra nails included (Uses standard hardware store nails). 2 sizes available. 3/32"..... P/N 12-00613.....
1/8"..... P/N 12-00614.....

Note: The pop rivet dimplers show above are made with 100° angles, same as regular dimple dies. They will work with either solid flush rivets (AN-426 - 100°) or with pull type rivets such as a AVEV rivets (120°), etc. The dimple formed with these pop rivet dies will not be as 'sharp' as dimples formed with regular dimple dies. This is because you get more pressure with a squeezer or a hammer than with a pop rivet puller; however, the dimples formed with pop rivet dimplers are adequate for occasional use in tight or hard-to-use places.

FLUSH SWIVEL RIVET SET

U.S. MADE -- ATI Brand. New design flush rivet set with swivel action eliminates problem of rivet gun alignment with the work surface + rubber guard to reduce slippage while flush riveting. .401" shank X 1-1/4" dia. polished face. Built-in retaining spring. P/N 12-00741.....

BACK RIVETING PLATE

Back riveting requires a hard flat surface to act as a bucking bar while you set the shop head of the rivet. Our plate is a perfect hard & flat surface for "Back Riveting". 3/8" thick X 4" wide X 15" long. Low carbon steel plate with flat ground surface. Weight 10 lbs. P/N 12-00618.....

HOLE FLANGING TOOL

For forming flanges around lightening holes. Made from 2024 aluminum and hard black anodized. Ball bearing style rollers. Comes with spare set of rollers. P/N 12-00619.....

SPARE ROLLER-SET OF 2

Replacement rollers for our edge rolling & hole flanging tools (above). P/N 12-00621.....

WISS COMPOUND ACTION SNIPS

Famous for cutting ease, keeping their edge and making clean, sharp cuts. Hardened molybdenum steel blades, serrated jaws and vinyl comfort grips. Capacity 18 gauge (.049") steel. Length 9-3/4". Wt. 14 oz. P/N 12-01155.....

P/N 12-01155- Cuts left, from tight curves to straight..... P/N 12-01189- Cuts right, from tight curves to straight.....

P/N 12-01190- Cuts straight (or wide curves left or right in light stock)..... P/N 12-01189.....

IRWIN OFFSET SNIPS

Irwin offset snips handle virtually every cutting job in sheet metal - linoleum, carpet, tile and other materials. They are easier to use than conventional metal snips, and cut in 3 directions. Irwin snips feature forged steel blades, a unique curved handle for comfortable fit in the hand, and an exclusive pinchpoint wire cutter. They cut in three directions—straight, sharp angles in one direction, and 5" diameter circles in the opposite direction. Irwin offset snips make difficult cuts easy - they can make tight circular cuts, cut easily through corrugated metal, and cut solid and stranded wire. Available in right or left cutting models. IRWIN (Right Cutting)..... P/N 12-00187.....
IRWIN (Left Cutting)..... P/N 12-00186.....

SHEET METAL TOOLS

SPEED DEBURRING & C'SINKING TOOL

Swivel action - makes deburr & c'sink holes fast & easy. Molded handle with 2" long plated steel "Dog-leg" shaft with 1/4"-28 threaded holder. Includes (1) 3/8" X 100° 3-flute burring cutter (part #1050) + 8" extension shaft for deburring the inside of flanges

& other hard to reach holes. P/N 12-00622
Handle and Extension Shaft sold separately
 Swivel handle only..... P/N 12-00623
 Extension Shaft only..... P/N 12-00624

BLUE SKY COUNTER SINK DEBURRING TOOL

This is an aluminum handle that a counter sink bit will fit into; a clutch mechanism allows the bit to only turn in one direction. The normal "speed de-bur" handle cuts a very irregular pattern and will not countersink, or true up a countersink. This tool will do both countersinking and de-burring. Use any countersink with a 1/4" shaft. P/N 12-01753

HSS THREE FLUTE BURRING CUTTER - 100°

US made. High speed steel, precision ground, three flute burring cutter. 3/8" diameter X 100° with 1/4-28 threaded shank. Same style as a countersink but without the pilot. P/N 12-00625

SNAP RING PLIER KIT

Install or remove retaining rings of the Waldes Tru-Arc type with ease. Quality pliers made of heat-treated steel with vinyl covered handles. Kit includes two pair of pliers and two sets of four replacement tips to handle the most common sizes of both internal and external rings. Furnished in plastic box. P/N 4440R

STRAP WRENCH

Heavy malleable iron body with latex-treated nylon webbing. For gripping and turning of round, hex or square parts without marring the surface. Indispensable tool for use in close quarters where ordinary pliers cannot be used. Tool is 11-1/2" long with 18" strap. Capacity 3". Wt. 1-1/2 lbs. P/N 3004

TEMPORARY ASSEMBLY PINS

Initial fitting of control surfaces require multiple installation and removals of the parts to fit, trim, and adjust everything. These temporary assembly pins make the task quicker and easier. Pins are 3/16" diameter with tapered points and angle bends for easy installation. The pins are threaded so the pin holder can be removed — this is necessary to prevent damage should you move the control surface too far during fitting. To remove pins just screw holder back on pin and remove pin. Packaged in sets: 6 pins / 2 holders. P/N 12-00627

BOLT GRIP

This new tool lightly grips the heads of bolts and screws for easier insertion into tight or blind spots. No more dropped or lost parts. Tool has one end for -3 (3/16") fasteners and one for -4 (1/4") fasteners. 12" overall length. P/N 12-00628

DOUBLE EDGE DEBURRING TOOL

Used to quickly deburr edges of sheets up to 1/8" thick. Save time and motion deburring edges of parts. Precision ground Carbide "V" shape blade with hex aluminum handle. Non-removable cutter style. P/N 12-00629

BRASS PLUMB BOB

Precision machined brass with clear lacquer finish and hardened replaceable tip. Top unscrews for centered string installation. Model: 6C235 Size: 8 oz, 4 7/8" L Finish: Clear Lacquer Characteristics: Replaceable Tip, Screw Top To Attach String (String Not Included) P/N 12-01711

EDGE MARKER BLOCK

This handy device holds a marking pen and has an adjustable stop for running along the edge of a part. The adjustable stop allows variable edge distance for rivet layout, etc. One thumbscrew holds the pen (pen sold separately) and the other thumbscrew holds the adjustable stop. Made from delrin (plastic) material. Comes ready to use with (1) Pilot marking pen. P/N 12-00630

SHOP HEAD RIVET GAUGE SET

Set of four gauges for -3, -4, -5, & -6 rivets. Each gauge measures MINIMUM height and MINIMUM diameter of shop heads AFTER setting. Eliminates guessing if your rivets are properly set. Works for measuring both universal head and flush rivets. Precision machined to size from 2024 aluminum. Rivet size permanently stamped on each gauge. Color coded anodized finish. Instructions included. P/N 12-00631

EDGE ROLLING TOOL

For pre-bending skin edges on lap joints and butt joints before riveting. "Edge rolling" will prevent skin edges from curling up during riveting. Machined round body made from 2024 aluminum. Hard black anodized finish for wear resistance. Ball bearing style nylon rollers (non marking); + spare set of rollers and instructions included. P/N 12-00632

RIVET LENGTH GAUGE

One gauge measures -3, -4, -5, & -6 rivets. Used to check for proper length of rivets BEFORE setting. Eliminates measuring and guessing of rivet lengths. Works for both universal head and flush rivets. Precision machined to size from 2024 aluminum. Rivet sizes permanently stamped. Gold anodized finish. Instructions included. P/N 12-00633

STEELMAX MAGNETIC BASE DRILL

SteelMax® brand drills maintain rigidity and accuracy throughout the life of the drill. The rail system eliminates the need to adjust or maintain traditional gibs. In addition to saving on maintenance, cutter life is increased by reducing movement at the cutter tips. When cutters last longer, you save money every day you use SteelMax! **Features:** • Powerful, Portable Drill that cuts through mild steel up to 2 1/16" Diameter, with 2" Depth of cut and weighing only 37 lbs. • Unique low maintenance rail system reduces cutter run out and breakage without adjustments • Dual speed for cutting a variety of hole sizes as small as 1/16" up to 2 - 1/16". Uses adjustable chuck for twist drill bits up to 1/2". • Versatile, Light weight, and powerful, the D2's unique design allows for easy maintenance and repairs in the field, keeping it in service far longer than competitors with gib system designs Steelmax Magnetic Base Drill..... P/N 12-01718
 D1 Portable Magnetic Drill..... P/N 12-01811

STEELMAX METAL CUTTING SAW 9 INCH

More efficient than any portable metal cutting process you are using now! • **Increase Productivity** - No Milling or de-burring with near surgical dry-cut technology. • **Cuts a Variety of Metals, Plastic and Wood** - Bring your saw to the work-piece while cutting mild steel, stainless steel and aluminum as easy as it cuts plywood. • **Cool-to-the-Touch** - No waiting for your workpiece to cool down. Just cut it and handle it. • **Precise Cutting** - With integrated laser sighting system..... P/N 12-01716

STEELMAX DRYCUT SAW S14

Utilizing a 14" carbide tipped blade, the Steelmax S14 cuts through metal faster, safer and cleaner than abrasive chop saws in a fraction of the time and cost. Powered with a 15 amp motor and geared to turn slower than a chop saw, the S14 dry cutter cuts like a cold saw, but at a fraction of the cost. Sold standard with a 14" carbide tipped mild steel blade attached, heavy duty, industrial strength cast iron base and two position locking vise, this saw is ready for immediate action! Cuts solid mild steel up to 1" thickness; cut profiles: pipe, angles, channel with a depth of cut up to 4-3/4". Bevels to 45 degrees. Saves time and money giving cool cuts that need little to no finishing, eliminating any need for grinding or cool down time..... P/N 12-01717

METAL WORKING TOOLS

SHOT BAGS

These shot bags are made out of .070/.090 thick top grain cowhide for extended life and to produce a blemish-free metal surface. These bags have suede outer or forming surface and a tanned inner surface to resist abrasive wear from the media. Convenient media filter and reinforced flap with velcro seal is provided. All bags are approximately 1.5" to 2" thick when filled. Can be filled with buckshot or silica sand (not included) found at most sporting good stores.

forced flap with velcro seal is provided. All bags are approximately 1.5" to 2" thick when filled. Can be filled with buckshot or silica sand (not included) found at most sporting good stores.

PANEL BEATER HAMMER & DOLLY KIT

The most widely used selection of panel beaters and dollies for most metal shaping needs, professional grade in a molded plastic box. Each hammer is color-coded for either shrinking (blue) or stretching (red) forming tasks. The 3 panel beaters included are the dinging, shallow-domed face and pick hammer

combo. The dollies included are the thin toe, utility, curved and heel shapes, providing the user with the best combination kit on the market. See the individual sections on panel beaters and dollies for more specifications on each item. 8-piece kit includes: • DT2566, DT2560 & DDT2537 panel beaters • CP548, CP552, CP553, & CP554 dollies • Blow molded plastic case. All tools made from medium carbon steel, forged, heat treated and mechanically polished for years of continuous service. Weight: 16.5 lbs.; size: 16.5"L x 14"W x 4"H.

P/N 12-01011

T-DOLLIES

Simple, but necessary forming tool allows you to create new flanges or straighten out damaged flanges. Can be used effectively by taking to an existing body panel or locked in bench vise and create an exact radius edge using any flat faced panel beater or wood slapper. T-dollies are fabricated

out of carbon steel hardened and zinc plated to provide years of service life. Extra long flat handle. Heads have radius ends.

ARC360 HOLE CUTTER

The tools on the market for cutting lightning holes in your airframe parts have never impressed me much especially if the holes are larger than a couple of inches in diameter. Panel knock put punches and hole saws work well for holes that are aren't too big but it gets harder and more expensive as the size of the hole increases.

You can cut holes with a router but cutting holes with a router is a cumbersome ordeal. The router is really just too big a tool to be swinging 360 degrees easily. You can set it to cut holes down to around 1.5 inches and up to around 10 inches. The tool's small size allows you to easily see your work as you are cutting. If you want an arc you can start and stop anywhere you want. It will cut any thickness of sheet aluminum and I even made the Mustang-II flap handle notch plates in the photo out of .06 thick 4130 steel.

The cutting speed in 032 thick 2024-T3 aluminum is around 40 inches per minute so you can cut a 4-inch diameter hole in less than 20 seconds. P/N 12-01977

MODEL SLP1 MODEL SLP2

MODEL SLP3 MODEL SLP4

HARDWOOD SLAPPER

These slappers are made from grade A select midwestern grown hard maple for toughness, stiffness and durability. With an ergonomically designed grip area, the hand and wrist are positioned in a neutral and natural condition. Finished with protective oil that resists staining and guards against moisture penetration. 4 different shapes: gentle, medium, flat, and radius face. The new thinner cross-section of 2-1/4" allows work-

ing a tighter radius in more confined areas. Each slapper comes with a leather face cover to eliminate marring of the metal.

ALUMINUM BODY MINI AIR VACUUM

A handy air powered vacuum works off an air compressor and is simple to use. Attached 12" clear plasticflex tube can easily get into tiny spaces to clean. The canvas bag is easily

removed for cleaning. P/N 12-01474
.....

CHIP CHASER

Ideal for removing chips and burrs from between metal after drilling rivet holes. Each chaser features a plastic molded handle and flexible steel blade with hook on the end. Blades are 5.5" and 2.5" long.

2.5"P/N 12-01597
5.5" P/N 12-01476....
.....

DOGLEG DEBURRING TOOL

Swivel action of this tool makes deburring holes fast and easy. Shaft includes a 1/4"-28 threaded holder.

P/N 12-01478
.....

BURNISHING SPOON

Designed to remove surface blemishes in aircraft sheet metal. Hard chrome plated. Comfort grip handle. P/N 12-01479
.....

CLECO PLIERS

Used in limited access areas, requires less travel per activation. P/N 12-01480
.....

SPRING TENSION CLAMPS (ZINC ALLOY YOKE OR STEEL YOKE)

Spring tension clamps can be applied in a fraction of the time required for ordinary screw clamps. The clamp, with 2" throat depth, has a Zamak alloy yoke and a steel spring which provides a 70 lb. clamping pressure. Designed for use with sheet holder pliers.

| Description | Part No. | Price |
|-------------|----------|-------|
| Zinc Alloy | 12-01481 | . |
| Steel 2" | 12-01482 | . |
| Steel 3" | 12-01483 | . |

SIDE GRIP CLAMPS

Designed to hold two or more work pieces together where no holes exist. Clamping force is applied at edge of work. Spring loaded, plier actuated. The lack of a takeup screw makes it impossible to over-tighten and damage the work surfaces or the clamp. There are 4 standard sizes : 1/2 x 1/2", 1/2 x 1", 3/4 x 1/2", 3/4 x 1".

| Description | Part No. | Price |
|-------------|----------|-------|
| 1/2" x 1/2" | 12-01484 | . |
| 1/2" x 1" | 12-01485 | . |
| 3/4" x 1/2" | 12-01486 | . |
| 3/4" x 1" | 12-01487 | . |

DRILL STOPS

Use when drilling in sheet metal to help eliminate drill breakage & surface marks.

Safely keeps drill from going too far through the work. Drill stops have a coiled spring to cushion the drill breakthrough & prevents the drill chuck from marring the work surface. Color coded for easy identification.

EDGE BREAKER

This tool allows the quick removal of burrs and roughness from the edges of sheet metal. .25" or .187" in diameter grooved blade with safety shield. Safety-grip plastic handle. P/N 12-01527

HAND SEAMER

Large jaws are machined for smooth, parallel fit. Forms precise folds and seams. Has rounded jaws to prevent tearing when bending of aluminum and other light metals. Depth of throat 1". Width of jaws 3-1/2". Overall length 8". P/N 12-01528

AIR SWIVELS & REGULATOR TOOLS

Air Swivel Connector W/ Regulator (Pictured to the left) P/N 12-01530
Air Swivel Connector P/N 12-01529
Air Swivel Regulator P/N 12-01545

BRASS RIVET SET

This rivet set has a soft face to prevent damage to the fastener when inserted or removed. Fits into any standard rivet gun or air hammer that supports .401" shank tooling, 3 1/8" overall length. P/N 12-01543

RIVET GUN SHAFT REDUCER

Rivet set adapter sleeve, .401 shank. Made of hardened steel (SKD11) and is open at both ends to allow maximum riveting power. P/N 12-01544

ECONOMY SAFETY WIRE TWISTERS

These top quality twisting lock pliers with automatic return are economically priced and extremely durable. Features a sharp cutting edge and will twist up to .060" dia. safety wire. Length 6" & 9". Foreign made.
6" P/N 12-01472
12" P/N 12-01473

CAMLOC PLIERS

These Camloc Pliers are used to depress #2600, #2700 and #4000 series Camloc (C-LOCK) studs so they can be properly installed. Pliers are manufactured from forged steel and feature polished bearing surfaces to avoid scratching the stud as it's being installed. The grips are rubber cushioned for extra comfort and to reduce slipping. P/N 12-01475

CANNON CONNECTOR PLIERS

The tool features serrated jaws for improved gripping and a slip joint for improved leverage. Ideal for all common cannon connector applications. P/N 12-01531

SHOP HEAD RIVET GAUGE SET

Set of four gauges for -3, -4, -5, -6 rivets. Each gauge measures Minimum height and Minimum diameter of shop heads AFTER setting. Eliminates guessing if your rivets are properly set. Works for measuring both universal head and flush rivets. Precision machined to size from 2024 aluminum. Rivet size permanently stamped on each gauge. Color coded anodized finish. P/N 12-01533

RIVET LENGTH GAUGE

One gauge measure -3, -4, -5, -6 rivets. Used to check for proper length of rivets Before setting. Eliminates measuring and guessing of rivets lengths. Works for both universal head and flush rivets. Precision machined to size from 2024 aluminum. Rivet size permanently stamped. Blue anodized finish. P/N 12-01534

DRILL EXTENSION THREADED

Use these different length extensions in your 90° or 45° drills. 1/4"-28 male threads on one end and 1/4"-28 female threads on other.
2" P/N 12-01535
4" P/N 12-01536
6" P/N 12-01537

DRILL EXTENSION DUAL THREADED

Use these different length extensions in your 90° or 45° drills. 1/4"-28 male threads on one end and 1/4"-28 female threads on other. Comes in three different lengths 1", 2" & 4".
2" P/N 12-01541
4" P/N 12-01542

SLIM MICRO-STOP

A slim design that's only 11/16" outside diameter. Used for those narrow areas that can't be reached with a standard micro-stop. • 1/4" Shaft • 1/4"-28 Female Threads • Adjustable in .001" increments • 1/2" Cutter Capacity • Rates for 3000 RPM use. P/N 12-01790

MICRO-STOP (LONG NOSE)

This micro-stop reaches into very confined areas. • 5/16" Quick-change Shaft or regular chuck • 1/4"-28 Female Threads • Adjustable in .001" increments • 3/8" Cutter Capacity • Rates for 3000 RPM use. P/N 12-01789

MICRO-STOP (NYLON FACE)

• 1/4" Shaft • 1/4"-28 Female Threads • Adjustable in .001" increments • 11/16" Cutter Capacity • Rates for 3000 RPM use. P/N 12-01788

RADIUS CHECK

Radius Check is a hand-held tool which can be used to check the radius of parts and panels used in the construction or restoration of aircraft. Also used extensively in the restoration of antique and classic automobiles. P/N 12-21595

RADIUS OR FILLET GAUGES

16 leaves, especially for checking radius of inside and outside fillets and corners. Checks 1/32 to 17/64" by 64ths. P/N 432A

TO

ECONOMY AIRCRAFT TOOLS

ECONOMY RIVET GUNS

These popular 2X /3X /4X rivet guns used in aircraft manufacturing plants worldwide. "X" series rivet gun has an incomparable teasing triggers, allowing you to slowly begin riveting without damaging the skin. A lightweight aluminum handle with powder coat finish for comfort. Hardened & precision ground steel piston, cylinder, spool valve for long life. Includes spring retainer & brass air regulator.

| Length | BPM | Capacity | Bore | Shank | Stroke | Weight (lbs) | Part No. | Price |
|----------|------|----------|------|-------|---------|--------------|----------|-------|

ECONOMY FLUTING PLIERS

Narrow type fluting pliers are used for straightening out or coaxing sheet metal into the correct shape. This tool makes narrow and precise flutes in sheet metal.

P/N 12-01782.....

RIVET HOLDER

This tool holds your rivet, small bolt, or screw so you can get into those hard-to-reach areas.

P/N 12-01791.....

QUICK-CHANGE CHUCK

Allows tool change in seconds. Designed for drilling bits, countersinks, etc. with quick-change ends. 3/8" x 24 thread.

P/N 12-01778.....

C-SET

This C-Rivet Set bends around obstacles and allows you to reach into awkward areas for riveting. • 3/16" diameter hole for any squeezer sets or dimple dies with 3/16" shaft • .401 shaft

P/N 12-01776.....

60° C-SET

Excellent for limited access areas. • 60° Angle • .401 shaft

P/N 12-01777.....

TURNBUCKLE WRENCH

2 inch diameter turnbuckle wrench easily rotates turnbuckle while chain tool holds the cable ends in precise alignment and prevents them from rotating.

P/N 12-01795.....

TURNBUCKLE CHAIN TOOL

This tool consists of two clamps joined by sprocket type (bicycle) chain. When clamped to cable and fittings at each side of the turnbuckle, anchor the cable to allow free adjustment of the turnbuckle. The adjustment becomes a two hand instead of three hand adjustment.

P/N 12-01794.....

SPEED HANDLE 3/8"

Useful for quickly tightening and loosening a nut or bolt particularly where other types of wrenches will not reach.

P/N 12-01797.....

PHENOLIC SCRAPER

Scraper Blade, 2" wide x 6.5" long x 3/8" thick. Designed for use with a rivet gun (.401 shank). Phenolic scrapers are perfect for safely removing sealant, adhesives, stickers, labels, grime, and more.

P/N 12-01796.....

SKIN WEDGE

Made of 4130 steel and heat-treated to perfection. • 7" long x 1" wide • Body thickness 1/4"....

P/N 12-01793.....

HEX KEYS

Designed to use when installing Hi-Lok style fasteners. Includes set screw and Allen key.
